#### APPLICATIONS FOR THE GRANT OF PATENTS

Form of application.

Forms 1, 2, 3, 4, 5, 6, 21.

9. (1) An application for a patent, other than a Patent of Addition or a Secret Patent, shall be made on one of the Patents Forms, 1 or 2 as the case may be. An application for a Patent of Addition shall be made on Patents Forms 3, 4 or 5, and an application for a Secret Patent on Patents Form 6. An application for the grant of a Patent of Addition in lieu of an independent patent shall be made on Patents Form 21.

(2) An application for a patent for an invention communicated from abroad, and an application for a patent made by a person who is not at the time resident in Guyana, shall not be received by the Registrar unless made through a licensed patent agent.

10. In the case of an application for a patent by the legal representative of a person who has died possessed of an invention, the probate of the will, or the letters of administration granted of the estate and effects, or a certified copy of such probate or letters, shall be produced at the Office in proof of the applicant's title to be regarded as legal representative and be supported by such further evidence as the Registrar may require.

Application by representative of deceased inventor.

11. Applications for patents sent through the post shall, as far as may be practicable, be opened and numbered in the order in which the letters containing the same are delivered in the ordinary course of post.

Order of recording applications.

Applications left at the Office otherwise than through the post shall be in like manner numbered in the order of their receipt at the Office.

12. (1) When a specification comprises several distinct matters, they shall not be deemed to constitute one invention by reason only that they are all applicable to or may form parts of an existing machine, apparatus, or process.

One invention.

Where a person making application for a patent has included in his specification more than one invention, the Registrar may require or allow him to amend such application and specification and drawings or any of them so as to apply to one invention only, and the applicant may make application for a separate patent for any invention excluded by such amendment.

Applications for separate patents by way of amendment.

Every such last-mentioned application may, if the Registrar at any time so direct, bear the date of the original application or such date between the date of the original application and the date of the application in question, as the Registrar may direct, and shall otherwise be proceeded with as a substantive application in the manner prescribed by the Act.

Where the Registrar has required or allowed any application or specification or drawings or any of them to be amended as aforesaid, such application shall, if the Registrar at any time so direct, bear such date, subsequent to the original date of the application and not later than the date when the amendment was made, as the Registrar shall consider reasonably necessary to give sufficient time for the subsequent procedure relating to such application.

(2) Where the same applicant has put in two or more provisional specifications for inventions which he believes to be cognate or modifications one of the other and the Registrar is of opinion that such inventions are not cognate or modifications one of the other, the applicant may divide the complete specification left in connection with his applications into such number of complete specifications as may be necessary to enable the applications to be proceeded with as two or more separate applications for patents for different inventions.

Claims. 13. The statement of the invention claimed, with which a complete specification must end, shall be clear and succinct as well as separate and distinct from the body of the specification.

#### DRAWINGS

General. 14. Drawings, when furnished, must accompany the provisional or complete specification to which they refer, except in the case provided for by regulation 21. No drawing or sketch such as would require the preparation for the printer of a special illustration for use in the letterpress of the specification when printed may appear in the specification itself.

Requirements as to paper etc. 15. Drawings must be made on pure white, hot-pressed, rolled, or calendered strong paper of smooth surface, good quality, and medium thickness, without washes or colours, in such a way as to admit of being clearly reproduced on a reduced scale by photography. Mounted drawings may not be used.

Size of drawings and arrangement of figures. 16. Drawings must be on sheets which measure 13 inches from top to bottom and are either from 8 inches to  $8\frac{1}{4}$  inches or from 16 inches to  $16\frac{1}{2}$  inches wide, the narrower sheets being preferable. A clear margin must be left half an inch from the edges of the sheet.

If there are more figures than can be shown on one of the smaller sized sheets, two or more of these sheets should be used in preference to employing the larger size. When an exceptionally large figure is required, it should be continued on subsequent sheets. There is no limit to the number of sheets that may be sent in, but no more sheets

should be employed than are necessary. The figures should be numbered consecutively throughout and without regard to the number of sheets. They should be separated by a sufficient space to keep them distinct.

Drawings to be suitable for reproduction.

17. Drawings must be prepared in accordance with the following requirements—

- (a) They must be executed with absolutely black ink.
- (b) Each line must be firmly and evenly drawn, sharply defined, and of the same strength throughout.
- (c) Section lines, lines for effect, and shading lines must be as few as possible, and must not be closely drawn.
- (d) Shading lines must not contrast too much in thickness with the general lines of the drawing.
- (e) Sections and shading must not be represented by solid black or washes.
- (f) They must be on a scale sufficiently large to show the invention clearly, and only so much of the apparatus, machine, etc., may appear as affects this purpose. If the scale is given, it must be drawn, and not denoted by words. No dimensions may be marked on the drawings.
- (g) The figures must be drawn in an upright position in regard to the top and bottom of the sheet.
- (h) Reference letters and numerals, and index letters and numerals used in conjunction therewith, must be bold, distinct and not less than one-eighth of an inch in height. The same letters or numerals must be used in different views of the same parts. Where the reference letters or numerals are shown outside the figure, they must be connected with the parts referred to by fine lines.

18. Drawings must bear the name of the applicant (and, in the case of drawings left with a complete specification after one or more provisional specifications, the numbers and years of the applications) in the left-hand top corner; the number of sheets of drawings sent, and the consecutive number of each sheet, in the right-hand top corner; and the signature of the applicant or his agent in the right-hand bottom corner. Neither the title of the invention nor any descriptive matter shall appear on the drawings.

Drawings to bear name of applicant, etc., but no descriptive matter.

19. A facsimile or “true copy” of the original drawings shall be filed at the same time as the original drawings, prepared strictly in accordance with these regulations, except that the reference letters or numerals and leading lines thereto should be in black-lead pencil. In the case of a hand-made drawing this copy may be on tracing cloth.

Copies of drawings.

The words “original” or “true copy” must in each case be marked at the right-hand top corner, under the numbering of the sheet.

Marking originals and true copies.

20. Drawings must be delivered at the Office free from folds, breaks, or creases which would render them unsuitable for reproduction by photography.

Condition of drawings on delivery.

21. If an applicant desires to adopt the drawings lodged with his provisional specification as the drawings or part of the drawings for his complete specification, he shall refer to them in the complete specification as those left with the provisional specification.

Provisional drawings used for complete specification.

Request for  
postdating  
an applica-

#### PROCEDURE UNDER SECTION 9 OF THE ACT

Provisional  
report in case  
of complete  
anticipation.

24. (1) When the Registrar or the examiner in prosecution of the investigation prescribed by section 9 (1) of the Act finds that the invention claimed in the specification under examination has been wholly claimed or described in one or more specifications referred to in the subsection, he shall, without any further prosecution of the investigation, make a provisional report to that effect.

(2) If the provisional report of the Registrar or the examiner made under this regulation be not reversed or altered, it may be deemed a final report, and the application shall be dealt with as provided by subsection (4) of the said section. If, however, such provisional report be reversed or altered, the investigation shall be continued, and a further report shall be made, and the specification shall be dealt with as provided in subsection (3) or subsection (4) of the said section, as the case may require.

Time for  
leaving  
amended  
specification.

25. (1) The time within which an applicant may leave his amended specification under section 9 (2) shall be two months from the date of the letter informing him that the invention claimed has been wholly or in part claimed or described in any specification or specifications within the meaning of subsection (1) of the said section.

(2) Application for an extension of time for leaving the amended specification shall be made on Patents Form 12, but no such extension of time shall be granted which would extend beyond the date prescribed by the Act for the acceptance of the specification and any fees payable under these regulations for the extension of time for acceptance of a specification shall be paid in addition to the fees for an extension of time under this regulation.

Hearing by  
the Registrar  
under sub-  
section (4).

26. (1) When the applicant for a patent has been informed of the result of the investigation made under section 9 (1), and the time allowed for amendment of his specification has expired, the Registrar, if he is not satisfied that no objection exists to the specification on the ground that the invention claimed therein has been wholly or in part claimed or described in a previous specification referred to in that subsection, shall inform the applicant accordingly and appoint a time for hearing him, and shall give him ten days' notice at the least of such appointment. The applicant shall as soon as possible notify the Registrar whether or not he desires to be heard. The Registrar shall, after hearing the applicant, or without a hearing, if the applicant has not attended a hearing appointed or has notified that he does not desire to be heard, determine whether reference ought to be made in the applicant's specification to any, and, if so, what prior specification or specifications by way of notice to the public, and in the event of the invention claimed being wholly and

specifically claimed or wholly and specifically described in any specification to which the investigation has extended, whether he should refuse to grant a patent, and shall inform the applicant accordingly. As an alternative to the insertion of a reference to a prior specification, the Registrar may prescribe or permit such amendments of the specification as will be to his satisfaction and, in such case, the applicant must elect, within such time as may be fixed by the Registrar, whether he agrees to the amendments or to the insertion of a reference. If no communication is received within the prescribed time or such further time as may be allowed, the references will be inserted.

(2) Application for an extension of the time fixed by the **Form 12.** Registrar under paragraph (1) of this regulation shall be made in the manner prescribed in regulation 25 (2).

27. (1) When under section 9 (4) the Registrar determines that a reference to a prior specification ought to be made by way of notice to the public, the form of reference shall be as follows, and shall be inserted after the claims—

Reference to  
prior specifi-  
cation.

Reference has been directed in pursuance of section 9 (4) of the Patents and Designs Act to specification No..... of 19.....

(2) Where the reference is inserted as the result of a provisional report under regulation 24, a statement to that effect shall be added to the reference.

28. The procedure to be followed when anticipating documents within section 9(5) are brought to the notice of the Registrar shall be that set out in regulations 24 to 27, with the necessary modifications.

Procedure  
under s. 9 (5).

#### PROCEDURE UNDER SECTION 10 OF THE ACT

Procedure  
under s. 10.

29. (1) Where on the additional investigation provided for by section 10 it appears that the invention claimed in any specification deposited pursuant to an application is wholly or in part claimed in any published specification deposited pursuant to a prior application, the applicant shall be informed of the result of such extended investigation, and shall, within two months from the date of the letter so informing him, apply for leave to amend his specification by way of disclaimer, stating specifically what amendments he is prepared to make in it to remove the objection, or if he considers that no amendments are necessary, inform the Registrar accordingly.

Form 12.

(2) Application for an extension of time for making such an application shall be made on Patents Form 12, but no such extension of time shall be granted which would extend beyond the date prescribed by the Act for the acceptance of the specification, and any fees payable under these Regulations for the extension of time for acceptance of a specification shall be paid in addition to the fees for an extension of time under this regulation.

(3) The Registrar shall consider any amendments submitted by the applicant for this purpose, and may allow the necessary amendments to be made.

Hearing by  
Registrar.

30. (1) If, at the expiration of the said two months or such extended time as the Registrar may allow, the Registrar is not satisfied that the invention claimed by the applicant is not wholly or in part claimed in the specification or specifications cited, he shall inform the applicant accordingly and appoint a time for hearing him, and shall give him ten days' notice at the least of such appointment. The applicant shall as soon as possible notify the Registrar whether or not he desires to be heard. The Registrar shall, after hearing the applicant or without a hearing, if the applicant has not attended a hearing appointed, or has notified that he does not desire to be heard, determine whether reference ought to be made in the applicant's specification to any, and if so, what prior specification or specifications by way of notice to the public and shall inform the applicant accordingly. As an alternative to the insertion of a reference to a prior specification, the Registrar may prescribe or permit such amendments of the specification as will be to his satisfaction, and in such case, the applicant must elect, within such time as may be fixed by the Registrar, whether he agrees to the amendments or to the insertion of a reference. If no communication is received within the prescribed time or such further time as may be allowed, the reference will be inserted.

(2) Application for an extension of the time fixed by the Registrar under paragraph (1) of this regulation shall be made in the manner prescribed in regulation 25.

Form 12.

31. When, under section 10(2), the Registrar determines that reference to a prior specification ought to be made, by way of notice to the public, the form of reference shall be as follows, and shall be inserted after the claims:

Reference to  
prior specification.

"Reference has been directed, in pursuance of section 10(2) of the Patents and Designs Act to specification No..... of 19....."

Chemical  
inventions—  
typical  
samples and  
specimens.

(2) A schedule specifying the nature of such samples or specimens may be inserted in the complete specification or appended thereto.

(3) The fact that such samples or specimens have been furnished shall also be notified to the public by a statement to that effect at the head of the complete specification and in connection with the advertisement of acceptance of such specification in the *Gazette*.

(4) The samples or specimens must, unless other directions are specially given, be supplied in glass bottles of a total height not exceeding three inches, and of an external diameter of  $1\frac{1}{2}$  inches, and the bottles must be securely closed by well-fitting stoppers, and sealed. Each bottle must have an adhesive or otherwise securely attached label bearing a description which clearly identifies the sample with the substance described in the specification. Labels which are not secured to the bottle by an adhesive should be 3 inches wide and not more than 4 inches long.

(5) Where samples or specimens of colouring matters are supplied, they must unless otherwise directed by the Registrar be accompanied by samples or specimens of materials printed or dyed with such colouring matters, such last-mentioned samples or specimens must be as flat as possible, and firmly attached to cards 13 inches long by 8 inches broad. The cards must bear a full description of the processes by which the respective dyed or printed effects were produced, including the compositions and strengths of the various baths, the temperatures, duration of treatment, degree of exhaustion of the dye baths, in the case of dyed fabrics the percentage of colouring matter fixed on, in the case of prints the composition of the printing paste, and other necessary information. This description must also clearly identify the substance used with that described in the specification.
