- (4) The translation of the foreign language file referred to in subsection (2) is deemed to be the specification and drawings as submitted attached to the request under preceding Section (2) and the translation of the foreign language abstract referred to in subsection (2) is deemed to be the abstract as submitted attached to the request under preceding Section (2).

37.—Where there are two or more inventions, they may be the subject of a patent application in the same request provided that these inventions are of an invention claimed in one claim (hereinafter referred to as “the specified invention”) and of another or other inventions having the relationship as indicated below with respect to such specified invention:

- (2) Where two or more patent applications relating to the same invention are filed on the same date, only one such applicant, agreed upon after mutual consultation among all the applicants, may obtain a patent for the invention. If no agreement is reached or no consultation is possible, none of the applicants shall obtain a patent for the invention.

- (3) Where an invention claimed in a patent application is the same as a device claimed in a utility model application and the applications are filed on different dates, the patent applicant may obtain a patent only if his application was filed before the utility model application.
- (4) Where an invention claimed in a patent application is the same as a device claimed in a utility model application and the applications are filed on the same date, only one applicant, agreed upon after mutual consultation between the applicants, may obtain the patent or the utility model registration. Even in the absence of the warning, the same shall apply to a person who commercially worked the invention before the registration of the establishment of the patent right, knowing that the invention was claimed in the patent application laid-open for public inspection.
- (2) The right to claim the compensation under subsection (1) may not be exercised unless after the registration of the establishment of the patent right.
- (3) The exercise of the right to claim the compensation under subsection (1) shall not preclude the exercise of the patent right.

However, this provision shall not apply when the examiner's decision that the application is to be refused has become final and conclusive or when an extension of the term of the patent right has been registered.
- (6) When an application for registration of an extension of the term of a patent right is filed, the matters as set forth under each of the paragraphs in subsection (1) shall be published in the Patent Gazette.

67ter.—

- (1) The examiner shall make a decision that an application for registration of an extension of a patent right is to be refused where it falls under any of the following paragraphs:

82.—

(1) Where a design right under an application for a design registration filed prior to or on the filing date of a patent application conflicts with the patent right under the patent application and the term of the design right has expired, a person who, at the time of expiration, has an exclusive license on the expired design right or a non-exclusive license which is effective under Section 99(1), as applied under Section 28(3) of the Design Law, against the design right or the exclusive license, shall, to the extent of the expired right, have a non-exclusive license on the patent right concerned or on the exclusive license existing at the time when the design right expired.

83.—

(1) Where a patented invention has not been sufficiently and continuously worked during a period of three years or more in Japan, a person who intends to work the patented invention may request the patentee or the exclusive licensee to hold consultations on the grant of a non-exclusive license thereon. However, this provision shall not apply unless four years have elapsed since the filing date of the application corresponding to the patented invention.

(2) If no agreement is reached or no consultation is possible under the preceding subsection, a person who intends to work the patented invention may request the Commissioner of the Patent Office for an arbitration decision.

(Submission of written reply)

84.—Where a request has been made for arbitration under Section 83(2), the Commissioner of the Patent Office shall transmit a copy of the written request to the patentee or exclusive licensee mentioned in the request or to other persons having any registered rights relating to the patent and shall give them an opportunity to submit a written reply, designating an adequate time limit.

(Hearing of Industrial Property Council, etc.)

85.—

(1) Before rendering an arbitration decision under Section 83(2), the Commissioner of the Patent Office shall hear the views of the Council to be set up by Cabinet Order.

prescribed in the arbitration decision under Section 83(2), the arbitration decision ordering the non-exclusive license to be granted shall lose its effect.

(Cancellation of arbitration decision)

90.—

(1) After rendering an arbitration decision ordering a non-exclusive license to be granted, when the reason for the arbitration decision is no longer applicable or circumstances have otherwise changed and it has become to be impossible to sufficiently support the arbitration decision or a person who has obtained a non-exclusive license under the arbitration decision fails to work the patented invention sufficiently, the Commissioner of the Patent Office may cancel the arbitration decision upon the request of the interested person or *ex officio*.

(2) Sections 84, 85(1), 86 and 87 shall apply *mutatis mutandis* to the cancellation of the arbitration decision under preceding subsection and Section 85(2) shall apply *mutatis mutandis* to the cancellation of the arbitration decision under preceding subsection when the person who has obtained a non-exclusive license under the arbitration decision fails to work the patented invention sufficiently.

(Arbitration decision on grant of non-exclusive license on one's own patented invention)

92.—

(1) Where a patented invention falls under any of the cases provided for in Section 72, the patentee or the exclusive licensee may request the other person referred to in that section to hold consultations on the grant of a non-exclusive license to work the patented invention or of a non-exclusive license on the utility model right or the design right.

(2) The other person referred to in Section 72 who has been requested to hold the consultations under the preceding subsection may request the patentee or the exclusive licensee having requested the consultations to hold consultations on the grant of a non-exclusive license within the scope of the patented invention which the patentee or exclusive licensee desires to work by obtaining the non-exclusive license on the patent right, the utility model right or the design right through the consultations requested by the patentee or the exclusive licensee.

(3) If no agreement is reached or no consultation is possible under subsection (1), the patentee or the exclusive licensee may request the Commissioner of the Patent Office for an arbitration decision.

(4) If no agreement is reached or no consultation is possible under subsection (2) and an arbitration under the preceding subsection is requested, the other person referred to in Section 72 may request the Commissioner of the Patent Office for an arbitration decision only within the time limit which the Commissioner of the Patent Office designates as the time limit for the other person to submit a written reply in accordance with Section 84 as applied under subsection (7).

(5) If, in the case of subsection (3) or the preceding subsection, the grant of a non-exclusive license would unduly injure the interests of the other person referred to in Section 72 or the patentee or exclusive licensee, the Commissioner of the Patent Office shall not render an arbitration decision ordering a non-exclusive license to be granted.

(6) In the case of subsection (4) in addition to the case provided for in the preceding subsection, the Commissioner of the Patent Office shall not render an arbitration decision ordering a non-exclusive license

to be granted if an arbitration decision ordering a non-exclusive license to be granted is not rendered with respect to the request for the arbitration decision under subsection (3).

(7) Sections 84, 85(1) and 86 to 91bis shall apply mutatis mutandis to the arbitration under subsection (3) or (4).

(Arbitration decision on grant of non-exclusive license in public interest)

(2) If no agreement is reached or no consultation is possible under the preceding subsection, a person who intends to work the patented invention may request the Minister for International Trade and Industry for an arbitration decision.

(3) Sections 84, 85(1) and 86 to 91bis shall apply mutatis mutandis to the arbitration under the preceding subsection.

(Transfer, etc. of non-exclusive license)

(2) A non-exclusive licensee may, except in the case of a non-exclusive license resulting from an arbitration decision under Section 83(2), 92(3) or (4) or 93(2) of this Law, Section 22(3) of the Utility Model Law or Section 33(3) of the Design Law, establish a pledge on the non-exclusive license, but only with the consent of the patentee (or the patentee and exclusive licensee in the case of a non-exclusive license on an exclusive license).

(4) A non-exclusive license resulting from an arbitration decision under Section 92(3) of this Law, Section 22(3) of the Utility Model Law or Section 33(3) of the Design Law shall be transferred together with the patent, utility model or design right to which the non-exclusive license is entitled, and if such right has been transferred independently from the business in which it is worked or extinguished, the non-exclusive license shall be extinguished simultaneously.

(5) A non-exclusive license resulting from an arbitration decision under Section 92(4) shall be transferred together with the patent, utility model or design right to which the non-exclusive license is entitled and shall be extinguished at the same time as the patent, utility model right or design right.

(6) Section 73(1) shall apply mutatis mutandis to non-exclusive license.

(Pledges)

95.—Where a patent right or an exclusive or non-exclusive license is the subject of a pledge, the pledgee may not work the patented invention except as otherwise provided by contract.

96.—A pledge on a patent right or an exclusive or non-exclusive license may be exercised against the remuneration received as consideration for the patent right or the license or against money or goods that the patentee or exclusive licensee would be entitled to receive for the working of the patented invention. However, an attachment order shall be obtained prior to the payment or delivery of the money or property.

(Surrender of patent right, etc.)

97.—

- (1) Where there is an exclusive licensee, pledgee or non-exclusive licensee under Section 35(1), 77(4) or 78(1), a patentee may surrender his patent right only with the consent of such person.
- (2) Where there is a pledgee or non-exclusive licensee under Section 77(4), an exclusive licensee may surrender his license only with the consent of such person.
- (3) Where there is a pledgee, a non-exclusive licensee may surrender his license only with the pledgee's consent.

 - (ii) the grant, transfer (otherwise than by inheritance or other general succession), modification or extinguishment (otherwise than on a merger or on the extinguishment of the patent right) of an exclusive license, or a restriction on the disposal thereof;
 - (iii) the grant, transfer (otherwise than by inheritance or other general succession), modification or extinguishment (otherwise than on a merger or on the extinguishment of a secured credit) of a pledge on a patent right or exclusive license, or a restriction on the disposal thereof.
- (2) Inheritance or other general succession under any of the preceding paragraphs shall be notified to the Commissioner of the Patent Office without delay.

99.—

- (1) Once a non-exclusive license has been registered, it shall also be effective against anyone subsequently acquiring the patent right or the exclusive license or an exclusive license on such a patent right.
- (2) A non-exclusive license under Section 35(1), 79, 80(1), 81, 82(1) or 176 shall be effective as under the preceding subsection without registration.
- (3) The transfer, modification, extinguishment or restriction on disposal of a non-exclusive license or the grant, transfer, modification, extinguishment or restriction on disposal of a pledge relating to a non-exclusive license shall not be effective against any third party unless it is registered.

2. Infringement

(Injunction)

100.—

- (1) A patentee or exclusive licensee may require a person who is infringing or is likely to infringe the patent right or exclusive license to discontinue or refrain from such infringement.
- (2) A patentee or an exclusive licensee who is acting under the preceding subsection may demand the destruction of the articles by which the act of infringement was committed (including the articles manufactured by the act of infringement in the case of a patented invention of a process of manufacture), the removal of the facilities used for the act of infringement, or other measures necessary to prevent the infringement.

(Acts deemed to be infringement)

101.—The following acts shall be deemed to be an infringement of a patent right or exclusive license:

- (i) in the case of a patent for an invention of product, acts of manufacturing, assigning, leasing, importing or offering for assignment or lease of, in the course of trade, article to be used exclusively for the manufacture of the product;

(Presumption, etc. of amount of damage)

102.—

- (1) Where a patentee or exclusive licensee claims, from a person who has intentionally or negligently infringed the patent right or exclusive license, compensation for damage caused to him by the infringement, the profits gained by the infringer through the infringement shall be presumed to be the amount of damage suffered by the patentee or exclusive licensee.
- (2) A patentee or exclusive licensee may claim, from a person who has intentionally or negligently infringed the patent right or exclusive license, an amount of money which he would normally be entitled to receive for the working of the patented invention, as the amount of damage suffered by him.
- (3) The preceding subsection shall not preclude a claim to damages exceeding the amount referred to therein. In such a case, where there has been neither wilfulness nor gross negligence on the part of the person who has infringed the patent right or the exclusive license, the court may take this into consideration when awarding damages.

(Presumption of negligence)

103.—A person who has infringed a patent right or exclusive license of another person shall be presumed to have been negligent as far as the act of infringement is concerned.

(Presumption of manufacture by patented process)

104.—In the case of a patent for an invention of a process of manufacturing a product, where such product was not publicly known in Japan prior to the filing of the patent application concerned, any identical product shall be presumed to have been manufactured by that process.

(Production of documents)

105.—In litigation relating to the infringement of a patent right or exclusive license, the court may, upon the request of a party, order the other party to produce documents necessary for the assessment of the damage caused by the infringement. However, this provision shall not apply when the person possessing the documents has a legitimate reason for refusing to produce them.

(Measures for recovery of reputation)

106.—Upon the request of a patentee or exclusive licensee, the court may, in lieu of damages or in addition thereto, order a person who has injured the business reputation of the patentee or exclusive licensee by infringing the patent right or exclusive license, whether intentionally or negligently, to take the measures necessary for the recovery of the business reputation.

3.

(2) The annual fee for each year from the fourth and subsequent years under Section 107(1) shall be paid during the preceding year or prior thereto. However, where the date of transmittal of the examiner's decision or trial decision that the registration of an extension of the term of a patent right is to be made (hereinafter referred to in this subsection as the "date of transmittal") is later than a date which is thirty days prior to the last day of the year in which the day of the expiration of the patent right would fall if there had been no registration of an extension, the annual fee shall be paid in lump sum, for each year from the year following that year to the year in which the date of transmittal falls (where there are less than thirty days from the date of transmittal to the last day of the year in which the day of transmittal falls, to the year following that year in which the date of transmittal falls).

(3) Upon the request of a person liable to pay an annual fee, the Commissioner of the Patent Office may extend the period prescribed in subsection (1) by a period not exceeding 30 days.

(Reduction or deferment of payment of annual fees or exemption therefrom)

(Payment of annual fees by an interested person)

110.—

- (1) An interested person may pay an annual fee even against the will of the person liable to pay.
- (2) An interested person who has paid an annual fee in accordance with the preceding subsection may demand reimbursement of the expenditure to the extent that the person liable to pay is actually making a profit.

(Refund of annual fees)

111.—

- (1) Annual fees shall be refunded, upon the request of the person who paid them, only in the following cases:
 - (i) annual fees paid by mistake or in excess;
 - (ii) the annual fees for the year following the year in which a ruling to revoke the patent under Section 114(2) or a trial decision that the patent is to be invalidated became final and conclusive and subsequent years;
 - (iii) The annual fee for the year following the year in which the trial decision that the registration of an extension of the term of a patent right is to be invalidated became final and conclusive, and subsequent years (limited to that for the year following the year in which the day of the expiration of the term of the patent right would fall if there had been no registration of the extension and subsequent years).
- (2) No refund of annual fees under the preceding subsection may be requested after one year from the date of payment in the case of annual fees under paragraph (i) above, or after six months from the date on which a ruling to revoke the patent under Section 114(2) or a trial decision became final and conclusive in the case of annual fees under paragraphs (ii) and (iii) above.

(Late payment of annual fees)

112.—

- (1) Where a patentee is unable to pay an annual fee within the time limit prescribed in Section 108(2) or within the time limit for deferred payment under Section 109, he may pay the annual fee belatedly within six months from the expiration of that time limit.
- (2) In the case of late payment of an annual fee in accordance with the preceding subsection, the patentee shall, in addition to the annual fee provided for in Section 107(1), pay a surcharge of the same amount as the annual fee.
- (3) The payment of the surcharge referred to in the preceding subsection shall be made by patent revenue stamps as prescribed by an ordinance of the Ministry of International Trade and Industry.
- (4) Where a patentee fails to pay within the time limit for late payment under subsection (1) an annual fee due by the time limit prescribed in the principal sentence of Section 108(2) as well as the surcharge under subsection (2), the patent right shall be deemed to have been extinguished retroactively from the time of the expiration of the time limit prescribed in the principal sentence of Section 108(2).
- (5) Where a patentee fails to pay an annual fee under Section 108(2) and the surcharge under subsection (2) within the time limit for late payment under subsection (1), the patent right shall be deemed to have been extinguished retroactively from the time of the lapsing of the year in which the day of the expiration of the term of the patent right would fall if there had been no registration of the extension.
- (6) Where a patentee fails to pay an annual fee whose payment has been deferred under Section 109, and the surcharge under subsection (2), within the time limit for late payment under subsection (1), the patent right shall be deemed never to have existed.

(Restoration of patent right by late payment of annual fees)

112bis.—

- (1) Where the patent right is one which was deemed to have been extinguished under Section 112(4) or (5) or which was deemed never to have existed under Section 112(6) and the owner of the extinguished patent right is unable to pay an annual fee and surcharge belatedly within the time limit for late payment under Section 112(1) due to reasons outside his control, he may pay the annual fee and surcharge referred to in Section 112(4) to (6) within 14 days (where he is a resident abroad, within two months) from the date on which the reasons ceased to be applicable but not later than six months following the expiration of said time limit.
- (2) Where the annual fee and surcharge have been paid in accordance with preceding subsection, the patent right shall be deemed to have been maintained retroactively from the time of the expiration of the time limit prescribed in the principal sentence of Section 108(2) or the lapsing of the year in which the day of the expiration of the term of the patent right falls or existed from the beginning.

(Restriction on effects of patent right restored)

112ter.—

- (1) Where a patent right has been restored under preceding Section (2), if the patent has been granted for the invention of a product, the effects of the patent right shall not extend to the product which was imported into, or manufactured or acquired in Japan after the expiration of the time limit for late payment under Section 112(1) but before the registration of the restoration of the patent right.
- (2) The effects of patent right restored under preceding Section (2) shall not extend to the following acts after the expiration of the time limit for late payment under Section 112(1) but before the registration of the restoration of the patent right:
 - (i) the working of the invention;
 - (ii) in the case of a patent for an invention of product, acts of manufacturing, assigning, leasing, importing or offering for assignment or lease of the article to be used exclusively for the manufacture of the product;
 - (iii) in the case of a patent for an invention of a process, acts of manufacturing, assigning, leasing, importing or offering for assignment or lease of the article to be used exclusively for the working of the invention.

(Ruling)

114.—
