Where a single convention application has been made in respect of all or part of the inventions in respect of which two or more applications for protection have been made in one or more convention countries, and the Examiner reports that the claims of the specification filed with the said convention application relate to more than one invention, the Commissioner may allow one or more further applications to be filed and the specification to be divided into such number of specifications as may be necessary to enable two or more separate convention applications to be proceeded with, and may direct that the said applications be deemed to have been filed on the date of filing of the original application.

Extension of Period for Filing Complete Specification

27. A request for an extension of time for filing a complete specification up to a period not exceeding fifteen months from the date of filing of the application shall be made in form 7.

(2) If the examiner finds that substantially the whole of the invention claimed has been published in one or more such specifications or documents he may, without continuing the investigation, make a provisional report to that effect.

(3) If the applicant replies to the examiner's objections or amends his specification and the examiner is not satisfied either that the invention so far as claimed in any claim has not been published in any specification or other document cited by the examiner or that the priority date of the claim is not later than the date on which the relevant document was published, the applicant shall be given an opportunity to be heard in the matter if he so requests.

(4) Whether or not the applicant has replied or amended his specification, the Commissioner may appoint a hearing if he considers it desirable to do so, having regard to the time remaining for putting the application in order or other circumstances of the case.

(5) When a hearing is appointed, the applicant shall be given not less than ten days' notice of the appointment, unless in the opinion of the Commissioner a shorter notice is reasonable, and the applicant shall as soon as possible notify the Commissioner whether he will attend the hearing.

(6) After hearing the applicant, or without a hearing if the applicant has not attended or has notified that he does not desire to be heard, the Commissioner may prescribe or permit such amendment of the specification as will be to his satisfaction, and may refuse to accept the specification unless the amendment is made within such period as he may fix.

Procedure Under Section 14 of the Act

40.—

(1) When the examiner reports that the invention so far as claimed in any claim of the complete specification is claimed in any claim of any other complete specification falling within subsection (1) or subsection (3) of section 14 of the Act, the applicant shall be so informed and shall be afforded an opportunity of amending, or submitting amendments of, his specification.

(2) If, when the applicant's specification is otherwise in order for acceptance, an objection under section 14 of the Act is outstanding, the Commissioner may accept the specification and fix a period (being not less than two months from the date of its publication) for removing the objection.

(3) If an objection under section 14 of the Act is communicated to the applicant after acceptance of the specification, the Commissioner shall fix a period (being not less than two months from the date of the communication) for removing the objection.

(4) If the applicant so requests at any time, or if the examiner is not satisfied that the objection has been met within the period prescribed by this regulation, including any extension thereof which the Commissioner may allow, a time for hearing the applicant shall be appointed and the applicant shall be given not less than ten days' notice of the appointment and shall as soon as possible notify the Commissioner whether he will attend the hearing.

(5) After hearing the applicant, or without a hearing if the applicant has not attended or has notified that he does not desire to be heard, the Commissioner may prescribe or permit such amendment of the specification as will be to his satisfaction and may direct that a reference to such other specification as he shall mention shall be inserted in the applicant's specification unless the amendment is made or agreed to within such period as he may fix.

Reference to Prior Patent

44.—

(1) When in making the investigations under sections 13 and 14 of the Act it appears to the examiner that the applicant's invention cannot be performed without substantial risk of infringement of a claim of another patent, the applicant shall be so informed and the procedure provided in regulations 40 and 41 hereof shall apply.

(2) When, pursuant to that procedure, the Commissioner directs that reference to a patent shall be inserted in the applicant's complete specification, the reference shall be inserted after the claims and shall be in the following form:

“Reference has been directed, in pursuance of section 16 (1) of the Patents Act 1953, to patent No.”
