10 Meaning of useful

An invention, so far as claimed in a claim, is **useful** if the invention has a specific, credible, and substantial utility.

11 Computer programs

- (1) A computer program is not an invention and not a manner of manufacture for the purposes of this Act.
- (2) Subsection (1) prevents anything from being an invention or a manner of manufacture for the purposes of this Act only to the extent that a claim in a patent or an application relates to a computer program as such.

- (3) A claim in a patent or an application relates to a computer program as such if the actual contribution made by the alleged invention lies solely in it being a computer program.

Examples*A process that may be an invention*

A claim in an application provides for a better method of washing clothes when using an existing washing machine. That method is implemented through a computer program on a computer chip that is inserted into the washing machine. The computer program controls the operation of the washing machine. The washing machine is not materially altered in any way to perform the invention.

The Commissioner considers that the actual contribution is a new and improved way of operating a washing machine that gets clothes cleaner and uses less electricity.

While the only thing that is different about the washing machine is the computer program, the actual contribution lies in the way in which the washing machine works (rather than in the computer program per se). The computer program is only the way in which that new method, with its resulting contribution, is implemented.

The actual contribution does not lie solely in it being a computer program. Accordingly, the claim involves an invention that may be patented (namely, the washing machine when using the new method of washing clothes).

A process that is not an invention

An inventor has developed a process for automatically completing the legal documents necessary to register an entity.

The claimed process involves a computer asking questions of a user. The answers are stored in a database and the information is processed using a computer program to produce the required legal documents, which are then sent to the user.

The hardware used is conventional. The only novel aspect is the computer program.

The Commissioner considers that the actual contribution of the claim lies solely in it being a computer program. The mere execution of a method within a computer does not allow the method to be patented. Accordingly, the process is not an invention for the purposes of the Act.

-
- (4) The Commissioner or the court (as the case may be) must, in identifying the actual contribution made by the alleged invention, consider the following:
- (a) the substance of the claim (rather than its form and the contribution alleged by the applicant) and the actual contribution it makes:
 - (b) what problem or other issue is to be solved or addressed:
 - (c) how the relevant product or process solves or addresses the problem or other issue:
 - (d) the advantages or benefits of solving or addressing the problem or other issue in that manner:
 - (e) any other matters the Commissioner or the court thinks relevant.

- (5) To avoid doubt, a patent must not be granted for anything that is not an invention and not a manner of manufacture under this section.

- (2) A patent application made under subsection (1) is a **convention application**.
- (3) For the purposes of this Act,—
 - (a) the filing of a complete specification in a convention country after the filing of a provisional specification in relation to an application for protection must be treated as a basic application made in that country; and
 - (b) a person must be treated as having made a basic application in a convention country in respect of an invention if the person has made an application for protection in respect of the invention by an application that,—
 - (i) in accordance with the terms of a treaty subsisting between that convention country and any 1 or more other convention countries, is equivalent to a basic application duly made in any one of those convention countries; or
 - (ii) in accordance with the law of that convention country, is equivalent to a basic application duly made in that convention country; and
 - (c) a matter must be treated as having been disclosed in a basic application made in a convention country if it was claimed or disclosed (otherwise than by way of disclaimer or acknowledgment of prior art) in that application or in documents submitted by the person who made the basic application in support of, and at the same time as, that application.
- (4) Despite subsection (3)(c), if the Commissioner has given a written notice to the convention applicant requiring the convention applicant to file a copy of any or all of the documents referred to in that paragraph, account must not be taken of

any disclosure in the document or those documents unless a copy of the document or documents is filed within the prescribed period after the Commissioner has given the notice.

54 How convention applications are made and dealt with

- (1) A convention application must be made and dealt with in the same manner as any other patent application.
- (2) However, a patent application that is a convention application must—
 - (a) include the prescribed information relating to the relevant basic application; and

- (a) basic application A was made in, or in respect of, the same convention country and by the same applicant as basic application B; and
- (b) not later than the date of filing of basic application B, basic application A was unconditionally withdrawn, abandoned, or refused; and
- (c) basic application A had not been made available to the public in New Zealand or elsewhere before its unconditional withdrawal, abandonment, or refusal; and
- (d) no rights remain outstanding in respect of basic application A; and

Compare: 1953 No 64 s 7(2A)

56 Basic applications for 2 or more cognate inventions

- (1) If basic applications have been made in 1 or more convention countries for 2 or more inventions that are cognate or of which one is a modification of another, a single convention application may be made for those inventions at any time within 12 months from the date of the earliest of the basic applications.
- (2) Despite subsection (1), the requirements of section 54(2)(a) apply separately to the basic applications for each of the inventions referred to in subsection (1).

Subpart 5—Priority dates

57 Priority date of claims of complete specification

- (1) Every claim of a complete specification has effect from the date prescribed by this subpart as the priority date of that claim.
- (2) A patent is not invalidated—
 - (a) by reason only that the invention, so far as claimed in a claim, has been made available to the public (whether in New Zealand or elsewhere) on or after the priority date of the claim by written or oral description, by use, or in any other way; or
 - (b) by the grant of another patent on a specification claiming the same invention in a claim of the same or a later priority date.

Compare: 1953 No 64 s 11(1)

58 Priority date if complete specification filed for single application

The priority date of a claim is the filing date of the patent application if—

- (a) the complete specification is filed for a single application that was accompanied by a provisional specification or by a specification that is treated as a provisional specification; and
- (b) the claim is supported by the matter disclosed in that provisional specification.

Compare: 1953 No 64 s 11(2)

59 Priority date if complete specification filed for 2 or more applications

- (1) This section applies if—
 - (a) the complete specification is filed or proceeded with in relation to 2 or more patent applications that were accompanied by provisional specifications or by specifications that are treated as provisional specifications; and
 - (b) the claim is supported by the matter disclosed in at least 1 of those provisional specifications.
- (2) The priority date of the claim is the filing date of the patent application that is accompanied by the specification that disclosed the matter that supports the claim (or, if there is more than 1 application accompanied by such a specification, the filing date of the earliest of them).

Compare: 1953 No 64 s 11(3)

60 Priority date for convention applications

- (1) This section applies if the complete specification is filed for a convention application and the claim is supported by the matter disclosed—
 - (a) in the basic application; or

- (b) if the convention application is founded on more than 1 basic application, in at least 1 of those basic applications.
- (2) The priority date of the claim is the date of the basic application that disclosed the matter that supports the claim (or, if there is more than 1 such basic application, the date of the earliest of them).

Compare: 1953 No 64 s 11(4)

61 Priority date for Treaty applications that claim priority of earlier applications

- (1) This section applies if—
 - (a) the patent application that relates to the complete specification that contains the claim is a Treaty application; and
 - (b) that Treaty application claims the priority of an earlier application under Article 8 of the Patent Cooperation Treaty; and
 - (c) that earlier application is—
 - (i) an application made in New Zealand not more than 12 months before the international filing date of the Treaty application; or
 - (ii) an application made in New Zealand more than 12 months before the international filing date of the Treaty application, for which—
 - (A) a receiving Office has restored priority under rule 26bis.3 of the Treaty regulations; and
 - (B) the restored priority has not been found to be ineffective by the Commissioner or the court under rule 49ter.1 of the Treaty regulations; or
 - (iii) a basic application for an invention, made in a convention country not more than 12 months before the international filing date of the Treaty application, that is the first application made in a convention country for the invention; or
 - (iv) a basic application for an invention made in a convention country more than 12 months before the international filing date of the Treaty application, that is the first application made in a convention country for the invention, for which—
 - (A) a receiving Office has restored priority under rule 26bis.3 of the Treaty regulations; and
 - (B) the restored priority has not been found to be ineffective by the Commissioner or the court under rule 49ter.1 of the Treaty regulations; or
 - (v) a basic application for an invention made in a convention country after an application referred to in subparagraph (iii); and

- (d) the claim is supported by the matter disclosed in that earlier application or in a specification filed for that earlier application.
- (2) The priority date of the claim is,—
 - (a) if the claim is supported by the matter disclosed in the earlier application, the date of filing of that application; or
 - (b) in any other case, the date of filing of the specification for the earlier application that disclosed the matter that supports the claim (or, if there is more than 1 such specification, the date of filing of the earliest of them).
- (3) For the purposes of subsection (2), **date of filing** means,—
 - (a) in the case of the earlier application being an application made in New Zealand, the date that the earlier application or specification for the earlier application (as the case may be) is filed in New Zealand;
 - (b) in any other case, the date that the earlier application or specification for the earlier application (as the case may be) is filed in the convention country.

62 Rules that apply if 2 or more priority dates apply or other rules do not apply

- (1) If, under sections 59 to 61, a claim would, but for this provision, have 2 or more priority dates, the priority date of that claim is the earlier or earliest of those dates.
- (2) If sections 58 to 61 do not apply to any case, the priority date of a claim is the filing date of the complete specification.

Compare: 1953 No 64 s 11(5), (6)

63 Priority date in case of lack of entitlement in respect of another patent application

- (1) This section applies if—
 - (a) a patent application (**application A**) is made for an invention that has been claimed in a complete specification filed in relation to another patent application (**application B**); and
 - (b) 1 or more of the following applies:
 - (i) the Commissioner has refused to grant a patent in relation to application B on the ground specified in section 92(1)(b) (whether in a re-examination or an opposition proceeding under subpart 9);
 - (ii) the patent granted in relation to application B has been revoked by the court or the Commissioner on the ground specified in section 114(1)(b);
 - (iii) the complete specification filed in relation to application B has, in a re-examination or an opposition proceeding under subpart 9 or a proceeding under subpart 11, been amended by the exclusion of

the claim relating to the invention as a result of a finding by the Commissioner that the nominated person or the patentee is not entitled to the patent.

- (2) The Commissioner may direct that application A and any specification filed in relation to it must, for the purposes of this subpart, be treated as having been filed on the date on which the corresponding document was filed, or is treated as having been filed, in relation to application B.

65 Examination

- (1) The Commissioner must, after being asked to do so under section 64, examine a patent application and the complete specification relating to the application, and report on—

- (3) Subpart 1 of Part 4 applies (subject to section 82) to a proceeding under this section with all necessary modifications (including reading references to the patentee as references to the nominated person and construing references to a patent being in force, granted, or valid consistently with this section).

- (1) In a proceeding under section 81, the court must, in considering the amount of damages or an account of profits for an infringement, consider whether or not it would have been reasonable to expect, from a consideration of the complete specification that became open to public inspection, that a patent would be granted that would confer on the patentee protection from an act of the same description as that found to infringe the rights conferred by that section.
- (2) If the court finds that it would not have been reasonable, the court must reduce the damages, or the amount of an account of profits, to an amount that it thinks just.

Compare: 1953 No 64 s 68B

146 No infringement for prior use of invention

- (1) It is not an infringement of a patent for a person to do an act that exploits an invention, and that would infringe a patent apart from this section, if, immediately before the priority date of the relevant claim, the person—
 - (a) was exploiting the invention in the patent area; or
 - (b) had taken definite steps (contractually or otherwise) to exploit the invention in the patent area.
- (2) Subsection (1) does not apply if, before the priority date, the person—
 - (a) had stopped (except temporarily) exploiting the invention; or
 - (b) had abandoned (except temporarily) the steps to exploit the invention.
- (3) Subsection (1) does not apply to an invention the person derived from any of the following persons, unless the person derived the invention from information that was made publicly available by or with the consent of that person:
 - (a) the patentee or nominated person;
 - (b) any person from whom the patentee or nominated person derives title.
- (4) A person (**A**)—

 - (b) may not license any or all of A's entitlement under subsection (1) to another person.
- (5) This section applies in respect of a patent only if—

- (2) If the defendant is a government department, it may apply by way of counterclaim in an infringement proceeding for revocation of the patent on the ground stated in section 115 (whether or not it also applies by way of counterclaim for revocation of the patent on any of the grounds stated in section 114).

Bringing infringement proceeding in court

148 Who may bring infringement proceeding

- (1) An infringement proceeding may be brought in court by—

- (2) However, section 150 affects the right to bring a proceeding under this section.

149 When proceeding may be brought

- (1) An infringement proceeding may not be brought until the patent is granted.
- (2) However, section 81 enables an infringement proceeding to relate to infringements before the patent is granted in the circumstances set out in that section.

150 Right to bring infringement proceeding if registrable assignment or licence has occurred

- (1) If a person has the right to bring an infringement proceeding under section 148(1) by virtue of a transaction that must be registered under section 165, that person must not bring the proceeding unless—
- (a) the person's title or interest was registered at least 1 month before the commencement of the proceeding; or
- (b) the person has—
- (i) given at least 1 month's written notice to the proposed defendant of the intention to bring the proceeding; and
- (ii) registered the person's title or interest before bringing the proceeding.

- (2) However, a person may bring an infringement proceeding in court, despite not having registered the person's title or interest, if—
 - (a) the person would be entitled to do so under section 148(1) if the title or interest was registered; and
 - (b) the person has given at least 1 month's written notice to the proposed defendant of the intention to bring the proceeding and provided an address for service in New Zealand; and
 - (c) within that notice period, the proposed defendant has not required the proposed plaintiff to register that title or interest.

- (b) at the option of the plaintiff, damages or an account of profits.

Compare: 1953 No 64 s 69

153 Court must not award damages or account of profits if innocent infringement

- (2) It is presumed that a person ought reasonably to have known that a patent existed if—
 - (a) a product is marked so as to indicate it is patented in New Zealand and with the New Zealand patent number; and
 - (b) the person knew, or ought reasonably to have known, of the product.

- (1) If an amendment has been made to an accepted complete specification under this Act, the court must not award damages or an account of profits for an infringement that occurs before the date of the decision to allow the amendment.
- (2) Subsection (1) does not apply if—
- (a) the court is satisfied that the specification, as accepted, was framed in good faith and with reasonable skill and knowledge; or
 - (b) it is only an amendment to correct an obvious mistake.

Compare: 1953 No 64 s 68(3)

155 Court may refuse damages or account of profits if renewal fees not paid

- (3) It is at the court's discretion whether or not to grant costs and as to the date from which damages or the account of profits should be counted.
- (4) The court may, as a condition of the relief, direct that the specification be amended by an application under section 89 (which relates to the amendment of a specification with the leave of the court), and the application may be made even if the other issues in the infringement proceeding have not yet been determined.

Compare: 1953 No 64 s 71

158 Court may grant costs for subsequent proceeding if validity of specifications contested

250 Preservation of various regulations and orders

- (1) An Order in Council made under section 77 of the Patents Act 1953 that is in force immediately before the commencement of this section—

- (a) continues in force, despite section 247, as if made under this Act:
 - (b) may be amended or revoked as if made under this Act.
- (2) The Patents (United States of America) Regulations 1956 (SR 1956/159)—

252 Validation of priority date for Treaty applications

- (1) This section applies to a Treaty application to which the Patents Act 1953 applies or applied that claims the priority, under Article 8 of the Patent Cooperation Treaty, of an earlier application made in New Zealand.
- (2) The claim to priority by the application is validated and must be taken to be, and always to have been, lawful to the extent that it would have been valid under the Patents Act 1953 if New Zealand had been a convention country for the purposes of that Act.
- (3) Nothing in subsection (2) affects a claim to priority by an application that is the subject of a proceeding commenced in a court before 30 March 2010.

Transitional provisions for patents and patent applications

253 Outline of transitional provisions for patents

- (1) The general scheme and effect of the transitional provisions for patents on and from the commencement of Part 3 of this Act (**commencement**) is as follows:
 - (a) this Act applies to patents granted under the Patents Act 1953 (but patents retain their existing key dates, term, and grounds for revocation):
 - (b) patent applications made under the Patents Act 1953 continue to be dealt with under that Act unless a complete specification is filed on or after commencement and, in this case, the complete specification may be filed only under this Act and this Act then applies to the patent application:
 - (c) Treaty applications—
 - (i) continue to be dealt with under the Patents Act 1953 if the applicant has fulfilled the applicant's obligations under Article 22(1) or

- 39(1)(a) of the Patent Cooperation Treaty before commencement;
and
 - (ii) must be dealt with under this Act if the applicant did not fulfil those obligations before that time:
 - (d) there are particular transitional provisions for post-dated applications and divisional applications.
- (2) This section is a guide only to the general scheme and effect of the transitional provisions for patents.

254 Transitional provision for patents granted under Patents Act 1953

- (1) This Act applies to a patent granted under the Patents Act 1953 as if it were granted under this Act.
- (2) However,—
- (a) the patent retains its original date of filing of the patent application, patent date (that is the date of filing of the complete specification), priority date or dates, date of the publication of the accepted complete specification, date that the patent was granted, and date that the next renewal fee was due under the Patents Act 1953; and
 - (b) the patent retains its existing term; and
 - (c) the next renewal fee (after this section comes into force) must be paid when due in accordance with the Patents Act 1953 but, after that due date, renewal fees become due in accordance with this Act; and
 - (d) on a re-examination of the patent application and the complete specification under section 95, the grounds that a person may specify in a request for re-examination, and that the Commissioner may consider and report on, are the grounds in section 41(1) of the Patents Act 1953 (rather than the grounds in section 114 of this Act); and
 - (e) the Commissioner or the court may revoke the patent under this Act only on the grounds set out in section 41(1) or (3) of the Patents Act 1953, and those grounds are available as grounds of defence in a proceeding for the infringement of the patent (rather than the grounds in section 114 of this Act); and
 - (f) section 146 of this Act does not apply; and
 - (g) in relation to any existing endorsement of the patent under section 44 of the Patents Act 1953,—
 - (i) the repeals in section 247 do not affect the endorsement; and
 - (ii) sections 44 and 45 of the Patents Act 1953 continue to apply to the patent for the purposes of the endorsement, as if sections 247 to 249 were not in force (and accordingly, renewal fees remain at one-half of the fees otherwise payable under this Act while the patent is so endorsed).

255 Patent applications made under Patents Act 1953 continue under that Act

- (1) The Patents Act 1953 (and the regulations, orders, directions, and other matters made under it) continues to apply, as if sections 247 to 249 were not in force, for the purposes of—
 - (a) a patent application made under that Act before the commencement of Part 3 of this Act;
 - (b) the bringing and completion of any application, request, notice, or other proceeding relating to that application (whether commenced before or after the commencement of Part 3 of this Act).
- (2) Any reference in any other enactment to a repealed provision of the Patents Act 1953 (or a revoked provision of any regulations made under it) continues to apply for the purposes of subsection (1) as if the reference had not been repealed or amended by this Act.
- (3) Section 254 applies to any patent granted under the Patents Act 1953 in respect of that application.
- (4) This section is subject to sections 256, 257, and 259.

256 Patents Act 1953 ceases to apply to patent application if complete specification later filed

- (1) Despite section 255,—
 - (a) a complete specification may not be filed under the Patents Act 1953 on or after the commencement of Part 3 of this Act (unless section 258 applies to the complete specification); and
 - (b) the complete specification must instead comply with, and be filed under, this Act; and
 - (c) on and from the date on which the complete specification is filed, this Act applies in respect of the patent application (and any application, request, notice, or other proceeding relating to it) as if it were made under this Act (including as to the priority date).
- (2) Subsection (1) applies whether the complete specification is filed for one of the following reasons or any other reason:
 - (a) only a provisional specification was filed before that commencement; or
 - (b) the original complete specification was directed (whether before or after that commencement) to be treated as a provisional specification under section 9(4) of the Patents Act 1953.
- (3) If a complete specification is provided for 2 or more patent applications that are cognate or of which one is a modification of another, this section applies to those 2 or more patent applications.

257 This Act applies if patent application under Patents Act 1953 is post-dated

If a patent application made under the Patents Act 1953 is post-dated to a date that is on or after the commencement of Part 3 of this Act, this Act applies to the patent application as if the patent application had been made under this Act.

258 Patents Act 1953 applies to divisional applications dated before commencement

- (1) This section applies to a fresh patent application that is made on or after the commencement of Part 3 of this Act (and any complete specification that is filed at the same time) if—
 - (a) the fresh patent application is made for any part of the subject matter of a patent application to which the Patents Act 1953 applies under section 255 or 259; and
 - (b) the fresh patent application is given a date before that commencement.
- (2) The fresh patent application must be treated as a patent application made under the Patents Act 1953 (and section 255 applies to it) and the complete specification must be treated as having been filed on the date given to the fresh patent application.

259 Which Act applies to Treaty applications

- (1) The Patents Act 1953 (and the regulations, orders, directions, and other matters made under it) continues to apply, as if sections 247 to 249 were not in force, for the purposes of—
 - (a) a Treaty application if the applicant fulfilled the applicant's obligations under Article 22(1) or 39(1)(a) of the Patent Cooperation Treaty before the commencement of Part 3 of this Act;
 - (b) the bringing and completion of any application, request, notice, or other proceeding relating to that application (whether commenced before or after the commencement of Part 3 of this Act).
- (2) Any reference in any other enactment to a repealed provision of the Patents Act 1953 (or a revoked provision of any regulations made under it) continues to apply for the purposes of subsection (1) as if the reference had not been repealed or amended by this Act.
- (3) Section 254 applies to any patent granted under the Patents Act 1953 in respect of that application.
- (4) However, this Act applies to a Treaty application if the applicant did not fulfil those obligations before the commencement of Part 3.

Transitional provisions for other applications, notices, and requests

260 Transitional provision for other applications, notices, or requests

- (1) The Patents Act 1953 (and the regulations, orders, directions, and other matters made under it) continues to apply, as if sections 247 to 249 were not in force, for the purposes of completing any application, notice, or request that was received by the Commissioner or the court, or completing any other proceeding commenced, before the commencement of Part 3 of this Act.
- (2) Subsection (1) does not apply to a patent application, or an application, notice, request, or other proceeding relating to a patent application, to which any of sections 255 to 259 apply.
- (3) If the Patents Act 1953 continues to apply to an application, notice, or request under this section, any reference in any other enactment to a repealed provision of the Patents Act 1953 (or a revoked provision of any regulations made under it) continues to apply for that purpose as if the reference had not been repealed or amended by this Act.

Transitional provision for matters in force on commencement

261 Transitional provision for orders, directions, and other matters in effect on transition to new law

- (1) Any order, direction, or other matter made under a repealed provision of the Patents Act 1953, and that is in effect immediately before its transition takes effect under subsection (3), continues to have effect as if it had been made under the provision of this Act—
 - (a) that, with or without modification, replaces, or that corresponds to, the provision of the Patents Act 1953 under which it was made; and
 - (b) under which it could be made.
- (2) The order, direction, or other matter may be amended or revoked as if it had been made under the provision of this Act that replaces, or that corresponds to, the provision of the Patents Act 1953 under which it was made.
- (3) The transition of an order, direction, or other matter takes effect for the purposes of this section on the later of the following:
 - (a) on the repeal of the provision under which the order, direction, or other matter is made; or
