- (3) Where the invention is capable of elucidation and presentation by drawings, such drawings shall be prepared in accordance with **rule 11** and shall be supplied with, and referred to in detail in the specification:
- (4) Irrelevant or other matter, not necessary, in the opinion of the Controller, for elucidation of the invention, shall be excluded from the title, description, abstract, claims and drawings.
- (5) The Third Schedule to these rules shall have effect in relation to certain applications for patents, and patents for inventions which involve the use of or concern biological material.

10. Abstract:-

- (1) The abstract shall commence with the title for the invention.
- (2) The abstract shall contain a concise summary of the matter contained in the specification. The summary shall indicate the technical field to which the invention belongs and be drafted in a way which allows a clear understanding of the technical problem to which the invention relates, the gist of the solution to that problem through the invention and the principal use or uses of the invention. Where appropriate, the abstract shall also contain the chemical formula which, among those contained in the specification, best characterizes the invention. It shall not contain statements on the alleged merits or value of the invention or on its speculative application.
- (3) The abstract shall normally consist of not more than 2 pages.
- (4) If the specification contains any drawings, the applicant shall indicate on the abstract the figure or, exceptionally, the figures of the drawings which he suggests should accompany the abstract when published. The Controller may decide to publish one or more other figures if he considers that they better characterise the invention. Each main feature mentioned in the abstract and illustrated by a drawing shall be followed by the reference sign used in that drawing.

11. Drawings:-

- (1) Drawings shall be on sheets the usable surface area of which shall not exceed 26.2 cm by 17 cm. The sheets shall not contain frames round the usable or used surface. The minimum margins shall be as follows,-

 - (b) cross-sections shall be indicated by hatching which does not impede the clear reading of the reference signs and leading lines;

- (c) the scale of the drawings and the distinctness of their graphical execution shall be such that a photographic reproduction with a linear reduction in size to two-thirds would enable all details to be distinguished without difficulty. If, as an exception, the scale is given on a drawing, it shall be represented graphically;
 - (d) all numbers, letters, and reference signs, appearing on the drawings shall be simple and clear and brackets, circles and inverted commas shall not be used in association with numbers and letters;
 - (e) elements of the same figure shall be in proportion to each other, unless a difference in proportion is indispensable for the clarity of the figure;
 - (f) the height of the numbers and letters shall not be less than 0.32 cm and for the lettering of drawings, the Latin and, where customary, the Greek alphabets shall be used;
 - (g) the same sheet of drawings may contain several figures. Where figures drawn on two or more sheets are intended to form one whole figure, the figures on the several sheets shall be so arranged that the whole figure can be assembled without concealing any part of the partial figures. The different figures shall be arranged without wasting space, clearly separated from one another. The different figures shall be numbered consecutively in English numerals, independently of the numbering of the sheets;
 - (h) reference signs not mentioned in the description or claims shall not appear in the drawings, and vice versa. The same features, when denoted by reference signs, shall, throughout the application, be denoted by the same signs;
 - (i) the drawings shall not contain textual matter, except, when required for the understanding of the drawings, a single word or words such as "water", "steam", "open", "closed", section on AA", and, in the case of electric circuits and block schematic or flow sheet diagrams, a few short catchwords; and
 - (j) the sheets of the drawings shall be numbered in accordance with sub-rule (9) of **rule 5**.
- (3) Flow sheets and diagrams shall be considered to be drawings for the purposes of these Rules.
- (4) Drawings shall bear,-
- (a) in the left-hand top corner the name of the applicant and, in the case of drawings filed with a complete specification after one or more provisional specifications, the numbers and years of the applications;
 - (b) in the right-hand top corner the number of sheets or drawings sent and the consecutive number of each sheet, and the words 'original' or 'true copy' as the case may require;
 - (c) in the right-hand bottom corner the signature of the applicant or his agent.
- (5) The title of the invention shall not appear on the drawings.
- (6) No descriptive matter shall appear on constructional drawings, but drawings in the nature of flow sheets may bear descriptive matter to show

- the materials used and the chemical or other reactions or treatments effected in carrying out the invention.
- (7) Drawings showing a number of instruments or units of apparatus and their interconnections, either mechanical or electrical, where each such instrument or unit is shown only symbolically, may bear such descriptive matter as is necessary to identify the instruments or units or their interconnections.
 - (8) No drawing or sketch, other than a graphic chemical formula or a mathematical formula, symbol or equation, shall appear in the verbal part of the specification and if such a formula, symbol or equation is used therein in a copy thereof, prepared in the same manner as original drawings, shall be furnished if the Controller so directs.
 - (9) Drawings shall be delivered at the Patent Office free from folds, breaks or creases, which would render them unsuitable for reproduction.
 - (10) If an applicant desires to adopt the drawings filed with his provisional specification as the drawings or part of the drawings for his complete specification, he shall refer to them in the complete specification as those filed with the provisional specification.

12. Manner of Making amendments:-

- (1) When a specification, or any drawing accompanying it, requires an amendment, one copy shall be returned to the applicant or his agent and all amendments shall be made thereon as far as possible. Additional matter may be interpolated, if necessary, by rewriting such pages as are required to form a continuous document. Amendments shall not be made by slips pasting, or as footnotes, or by writing in the margin.
- (2) The amended document shall be returned to the Controller together with the cancelled or replaced pages or drawings, if any, duly marked, cancelled and initialed by the applicant or his agent, along with a duplicate of any pages that have been added or substantially amended. Amendments, alterations or additions shall be initialed in the margin by the applicant or his agent.
