(2) The application shall be made, in the case of a patent, within twelve months or, in the case of a design, within four months, from the person applying for protection in the United Kingdom or the foreign State with which the arrangement is in force.

(3) Nothing contained in this section shall entitle the patentee or proprietor of the design to recover damages for infringements happening prior to the date of the actual acceptance of his complete specification or the actual registration of his design, as the case may be, in Trinidad and Tobago.

(4) The publication in Trinidad and Tobago during the respective periods aforesaid of any description of the invention, or the use therein during such periods of the invention, or the exhibition or use therein during such periods of the design or the publication therein during such periods of a description or representation of the design shall not invalidate the patent granted for the invention or the registration of the design.

(5) The application for the grant of a patent or the registration of a design under this section shall be made in the same manner, and subject to the payment of the same fees, as prescribed in the Patents Act.

Ch. 82:76.

(6) In the case of a patent, an application under this section shall be accompanied by a complete specification which if it is not accepted within the period of twelve months, shall with drawings, if any, be open to public inspection at the expiration of that period.

(7) The provisions of this section shall, in the case of foreign States, apply only in the case of those foreign States with respect to which the President, from time to time, by Order declares the provisions of the aforesaid section \*103 of the said Patents, Designs, and Trade Marks Act, 1883, or any subsequent written law, to be applicable, and so long only in the case of each State as such Order continues in force with respect to that State.

**55.** (1) The President may, as respects any Convention country (as defined in section 91A of the Patents and Designs Acts 1907 to 1946 of the United Kingdom), if he is satisfied that provision substantially equivalent to the provision to be made by or under this section has been or will be made under the law of that country, make Rules empowering the Controller to extend the time for making application under section 54 of this Act for the granting, in priority to other applicants, of a patent for an invention, or for the registration, in priority to other applicants, of a design, in any case where the period specified in section 54(2) for the making of an application under the section expires during a period prescribed by the Rules.

- (a) may, where any agreement or arrangement has been made between Her Majesty's government in the United Kingdom and the government of the Convention country for the supply or mutual exchange of information or articles, provide, either generally or in any class of case specified in the Rules, that an extension of time shall not be granted under this section unless the invention or design has been communicated in accordance with the agreement or arrangement;
  - (b) may, either generally or in any class of case specified in the Rules, fix the maximum extension which may be granted under this section and provide for reducing the term of any patent granted on an application made by virtue of this section, and (notwithstanding anything contained in Rules made under this Act) vary the times for the payment of renewal fees in respect of such a patent and the amount of such fees;
  - (c) may prescribe or allow any special procedure in connection with applications made by virtue of this section;
  - (d) may empower the Controller, as respects any application made by virtue of this section, to substitute for the period of twelve months specified in section 54(6) such other period as appears to him expedient;
  - (e) may empower the Controller to extend, subject to such conditions, if any, as may be imposed by or under the Rules, the time limited by or under the foregoing provisions of this Act for doing any act in relation to an application made by virtue of this section;
  - (f) may provide for securing that the rights conferred by a patent granted or registration made on an application made by virtue of this section shall

be subject to such restriction or conditions as may be specified by or under the Rules and in particular that where, otherwise than as the result of any communication made in accordance with such an agreement or arrangement as is mentioned in paragraph (a) and before the date of the application in question or such later date as may be allowed by the Rules, either the invention has been made, used, exercised or vended, or the design applied, by any person (including a person acting on behalf of the State), or application for a patent for the invention or for registration of the design has been made by any such person as aforesaid, the rights conferred by a patent granted, or registration made, upon the first-mentioned application shall be subject to such conditions and reservations for the protection of that person as may be specified by or under the Rules.

**56.** Where an agreement or arrangement has been made between Her Majesty's government in the United Kingdom and the government of another country for the supply or mutual exchange of information or articles, and the President is satisfied that provision substantially equivalent to the provision to be made by or under this section has been or will be made under the law of that country, the President may make Rules to secure that the communication, in accordance with the agreement or arrangement, of an invention or design, or the publication, making, use, exercise or vending of an invention, or publication or application of a design, in consequence of the communication, shall not prejudice any application for a patent for the invention or registration of the design, being an application made by a person from whom the invention or design was so communicated or the legal representative or assignee of such a person, or invalidate the grant on such an application of a patent for the invention or the registration of such an application of the design.

Provisions as to communication of inventions and designs under agreements with other countries.

Provisions as to Rules under sections 55 and 56.

**57.** (1) Any Rules made in pursuance of sections 55 and 56 shall be laid before Parliament.

(2) Any such Rules and any order made, direction given, or other action taken under the Rules by the Controller, may be made, given or taken so as to have effect as respects things done or omitted to be done on or after such date, whether before or after the coming into operation of the Rules, as may be specified in the Rules.

Commonwealth arrangements.

**58.** (1) Whenever it appears to the President that the legislature of any Commonwealth territory has made satisfactory provision for the protection in such territory of inventions and designs patented or registered in Trinidad and Tobago, the President may, by Order, apply all or any of the provisions of section 57 relating to the protection of inventions and designs patented or registered in the United Kingdom, with such variations or additions, if any, as to the President seem fit, to inventions patented, and designs registered, in such Commonwealth territory.

(2) The ground mentioned in subsection (1) shall be an additional ground for revoking a patent under section 10, and shall also, on infringement proceedings, be an additional ground of defence or for a counterclaim for the revocation of a patent or the cancellation of the registration of a design.

(3) The foregoing provisions of this section shall not apply in any case where—

- (a) the applicant, patentee, or proprietor of a registered design, as the case may be, proves that the invention or design was invented or designed in Germany before 3rd September 1938, or was invented or designed in Japan before 7th December 1941, and has at no time since the said 3rd September or, as the case may be, the said 7th December, been beneficially owned in whole or in part by a German or Japanese national or a German or Japanese company;
- (b) the application for the patent or for the registration of the design was made before 1st February 1946, and the applicant, patentee, or proprietor of the design, as the case may be, proves that the invention or design was independently invented or designed outside Germany and Japan by a person, other than a German or Japanese national, being either the applicant, patentee or proprietor or a person through whom he claims; or
- (c) the invention or design was invented or designed by a prisoner of war in German or Japanese hands, unless it is shown that it was subsequently obtained from him by any German or Japanese national before 1st January 1946.

(4) An appeal shall lie from any decision of the Controller under this section to a Judge in Chambers.
