Ex Parte reexamination forms are structured so that the PALM printer can be used to print the identifying information for the reexamination file and the mailing address — usually the address of the patent owner's legal representative. Where there is no legal representative, the patent owner's address is printed. Only the first patent owner's address is printed where there are multiple patent owners. A transmittal form PTOL-465 is also provided for each partial patent owner in addition to the one named on the top of the Office action.

All actions in a third party requester *ex parte* reexamination will have a copy mailed to the third party requester. A transmittal form PTOL-465 must be used in providing the third party requester with a copy of each Office action.

A completed transmittal form PTOL-465 will be provided as needed for any third party requester and additional partial patent owner (discussed above), and the appropriate address will be entered on it. The number of transmittal forms provides a ready reference for the number of copies of each Office action to be made, and the transmittal form permits use of the window envelopes in mailing the copies of the action to parties other than the patent owner.

**

2265 Extension of Time [R-7]

37 CFR 1.550. Conduct of ex parte reexamination proceedings.

*****

(c) The time for taking any action by a patent owner in an *ex parte* reexamination proceeding will be extended only for sufficient cause and for a reasonable time specified. Any request for such extension must be filed on or before the day on which action by the patent owner is due, but in no case will the mere filing of a request effect any extension. Any request for such extension must be accompanied by the petition fee set forth in § 1.17(g). See § 1.304(a) for extensions of time for filing a notice of appeal to the U.S. Court of Appeals for the Federal Circuit or for commencing a civil action.

*****

The provisions of 37 CFR 1.136 (a) and (b) are *NOT* applicable to *ex parte* reexamination proceedings under any circumstances. Public Law 97-247 amended 35 U.S.C. 41 to authorize the Director to provide for extensions of time to take action which do not require a reason for the extension in an "application." An *ex parte* reexamination proceeding does not involve an "application." 37 CFR 1.136 authorizes extensions of the time period only in an application in which an applicant must respond or take action. There is neither an "application," nor an "applicant" involved in a reexamination proceeding.

An extension of time in an *ex parte* reexamination proceeding is requested pursuant to 37 CFR 1.550(c). Accordingly, a request for an extension (A) must be filed on or before the day on which action by the patent owner is due and (B) must set forth sufficient

reason for the extension, and (C) must be accompanied by the petition fee set forth in 37 CFR 1.17(g). Requests for an extension of time in an *ex parte* reexamination proceeding will be considered only after the decision to grant or deny reexamination is mailed. Any request filed before that decision will be denied.

The certificate of mailing and the certificate of transmission procedures (37 CFR 1.8) and the "Express Mail" mailing procedure (37 CFR 1.10) may be used to file a request for extension of time, as well as any other paper in a pending *ex parte* reexamination proceeding (see MPEP § 2266).

With the exception of an automatic 1-month extension of time to take further action which will be granted upon filing a first timely response to a final Office action (see MPEP § 2272), *all* requests for extensions of time to file a patent owner statement under 37 CFR 1.530 or respond to any subsequent Office action in an *ex parte* reexamination proceeding must be filed under 37 CFR 1.550(c) and will be decided by the Director of the Central Reexamination Unit (CRU) or Technology Center (TC) conducting the reexamination proceeding. These requests for an extension of time will be granted only for sufficient cause and must be filed on or before the day on which action by the patent owner is due. In no case, other than the "after final" practice set forth immediately above, will mere filing of a request for extension of time automatically effect any extension. Evaluation of whether sufficient cause has been shown for an extension must be made in the context of providing the patent owner with a fair opportunity to present an argument against any attack on the patent, and the requirement of the statute (35 U.S.C. 305) that the proceedings be conducted with special dispatch.

Any request for an extension of time in a reexamination proceeding must fully state the reasons therefor. The reasons must include (A) a statement of what action the patent owner has taken to provide a response, to date as of the date the request for extension is submitted, and (B) why, in spite of the action taken thus far, the requested additional time is needed. The statement of (A) must provide a factual accounting of reasonably diligent behavior by all those responsible for preparing a response to the outstanding Office action within the statutory time period. All requests must be submitted in a separate paper which will be forwarded to the CRU or TC Director for action. A request for an extension of the time period to file a petition from the denial of a request for reexamination can only be entertained by filing a petition under 37 CFR 1.183 with appropriate fee to waive the time provisions of 37 CFR 1.515(c). Since the reexamination examination process (for a reexamination request filed under 35 U.S.C. 302 and 37 CFR 1.510) is intended to be essentially *ex parte*, the party requesting reexamination can anticipate that requests for an extension of time to file a petition under 37 CFR 1.515(c) will be granted only in extraordinary situations.

The time period for filing a third party requester reply under 37 CFR 1.535 to the patent owner's statement (i.e., 2 months from the date of service of the statement on the third party requester) cannot be extended under any circumstances. No extensions will be permitted to the time for filing a reply under 37 CFR 1.535 by the requester because the 2-month period for filing the reply is a statutory period. 35 U.S.C. 304. It should be noted that a statutory period for response cannot be waived. See MPEP § 2251.

Ex parte prosecution will be conducted by initially setting either a 1-month or a 2-month shortened period for response, see MPEP § 2263. The patent owner also will be given a 2-month * period after the order for reexamination to file a statement >(by statute (35 U.S.C. 304), this period cannot be less than 2-months, even in a proceeding where the patent is being litigated)<. See 37 CFR 1.530(b). First requests for extensions of these statutory time periods will be granted for sufficient cause, and for a reasonable time specified — usually 1 month. The reasons stated in the request will be evaluated by the CRU or TC Director, and the requests will be favorably considered where there is a factual accounting of reasonably diligent behavior by all those responsible for preparing a response within the statutory time period. Second or subsequent requests for extensions of time or requests for more than 1 month will be granted only in extraordinary situations. Any request for an extension of time in a reexamination proceeding to file a notice of appeal to the Board of Patent Appeals and Interferences, a brief or reply brief, or a request for reconsideration or rehearing will be considered under the provisions of 37 CFR 1.550(c). The time for filing the notice and reasons of appeal to the U.S. Court of Appeals for the Federal Circuit or for commencing a

civil action will be considered under the provisions of 37 CFR 1.304.

Form paragraph 22.04.01 may be used to notify the parties in a reexamination proceeding the extension of time practice in reexamination.

¶ *22.04.01 Extension of Time in Reexamination*

Extensions of time under 37 CFR 1.136(a) will not be permitted in these proceedings because the provisions of 37 CFR 1.136 apply only to "an applicant" and not to parties in a reexamination proceeding. Additionally, 35 U.S.C. 305 requires that reexamination proceedings "will be conducted with special dispatch" (37 CFR 1.550(a)). Extensions of time in *ex parte* reexamination proceedings are provided for in 37 CFR 1.550(c).

I. FINAL ACTION — TIME FOR RESPONSE

The after-final practice in reexamination proceedings did not change on October 1, 1982 (at which time a change in practice was made for applications), and the automatic extension of time policy for response to a final rejection and associated practice are still in effect in reexamination proceedings.

The filing of a timely first response to a final rejection having a shortened statutory period for response is construed as including a request to extend the shortened statutory period for an additional month, which will be granted even if previous extensions have been granted, but in no case may the period for response exceed 6 months from the date of the final action. Even if previous extensions have been granted, the primary examiner is authorized to grant the request for extension of time which is implicit in the filing of a timely first response to a final rejection. It should be noted that the filing of any timely first response to a final rejection will be construed as including a request to extend the shortened statutory period for an additional month, even an informal response and even a response that is not signed. An object of this practice is to obviate the necessity for appeal merely to gain time to consider the examiner's position in reply to an amendment timely filed after final rejection. Accordingly, the shortened statutory period for response to a final rejection to which a proposed first response has been received will be extended 1 month. Note that the Office policy of construing a response after final as inherently including a request for a 1-month extension of time applies only to the <u>first</u> response to the final rejection. This automatic 1-month extension of time does <u>not</u> apply once the Notice of Appeal has been filed. In that instance, the patent owner will be notified that an appeal brief is due two months from the date of the notice of appeal to avoid dismissal of the appeal, and extensions of time are governed by 37 CFR 1.550(c).

It should be noted that the patent owner is entitled to know the examiner's ruling on a timely response filed after final rejection before being required to file a notice of appeal. Notification of the examiner's ruling should reach the patent owner with sufficient time for the patent owner to consider the ruling and act on it.

Normally, examiners will complete a response to an amendment after final rejection within 5 days after receipt thereof. In those situations where the advisory action cannot be mailed in sufficient time for the patent owner to consider the examiner's position with respect to the amendment after final rejection (or other patent owner paper) and act on it before termination of the prosecution of the proceeding, the granting of additional time to complete the response to the final rejection or to take other appropriate action would be appropriate. See *Theodore Groz & Sohne & Ernst Bechert Nadelfabrik KG v. Quigg*, 10 USPQ2d 1787 (D.D.C. 1988). The additional time should be granted by the examiner, and the time granted should be set forth in the advisory Office action. The advisory action form, *Ex Parte* Reexamination Advisory Action Before the Filing of an Appeal Brief (PTOL-467), states that "THE PERIOD FOR RESPONSE IS EXTENDED TO RUN ___ MONTHS FROM THE MAILING DATE OF THE FINAL REJECTION." The blank before "MONTHS" should be filled in with an integer (2, 3, 4, 5, or 6); fractional months should not be indicated. In no case can the period for reply to the final rejection be extended to exceed 6 months from the mailing date of the final rejection. An appropriate response (e.g., a second or subsequent amendment or a notice of appeal) must be filed within the extended period for response. If patent owner elects to file a second or subsequent amendment, it must place the reexamination in condition for allowance. If the amendment does not place the reexamination in condition for allowance, the prosecution of the reexamination proceeding will stand terminated under 37 CFR 1.550(d) unless an appropriate notice of appeal was filed before the expiration of the response period.

II. EXTENSIONS OF TIME TO SUBMIT AFFIDAVITS AFTER FINAL REJECTION

Frequently, patent owners request an extension of time, stating as a reason therefor that more time is needed in which to submit an affidavit. When such a request is filed after final rejection, the granting of the request for extension of time is without prejudice to the right of the examiner to question why the affidavit is now necessary and why it was not earlier presented. If the patent owner's showing is insufficient, the examiner may deny entry of the affidavit, notwithstanding the previous grant of an extension of time to submit it. The grant of an extension of time in these circumstances serves merely to keep the prosecution of the proceeding from becoming terminated while allowing the patent owner the opportunity to present the affidavit or to take other appropriate action. Moreover, prosecution of the reexamination to save it from termination must include such timely, complete and proper action as required by 37 CFR 1.113. The admission of the affidavit for purposes other than allowance of the claims, or the refusal to admit the affidavit, and any proceedings relative, thereto, shall not operate to save the prosecution of the proceeding from termination.

Implicit in the above practice is the fact that affidavits submitted after final rejection are subject to the same treatment as amendments submitted after final rejection. See *In re Affidavit Filed After Final Rejection,* 152 USPQ 292, 1966 C.D. 53 (Comm'r Pat. 1966).

2266 Responses [R-7]

37 CFR 1.111. Reply by applicant or patent owner to a non-final Office action.

(a)(1) If the Office action after the first examination (§ 1.104) is adverse in any respect, the applicant or patent owner, if he or she persists in his or her application for a patent or reexamination proceeding, must reply and request reconsideration or further examination, with or without amendment. See §§ 1.135 and 1.136 for time for reply to avoid abandonment.

(2) *Supplemental replies*. (i) A reply that is supplemental to a reply that is in compliance with § 1.111(b) will not be entered as a matter of right except as provided in paragraph (a)(2)(ii) of this section. The Office may enter a supplemental reply if the supplemental reply is clearly limited to:

(A) Cancellation of a claim(s);

(B) Adoption of the examiner suggestion(s);

(C) Placement of the application in condition for allowance;

(D) Reply to an Office requirement made after the first reply was filed;

(E) Correction of informalities (e.g., typographical errors); or

(F) Simplification of issues for appeal.

(ii) A supplemental reply will be entered if the supplemental reply is filed within the period during which action by the Office is suspended under § 1.103(a) or (c).

(b) In order to be entitled to reconsideration or further examination, the applicant or patent owner must reply to the Office action. The reply by the applicant or patent owner must be reduced to a writing which distinctly and specifically points out the supposed errors in the examiner's action and must reply to every ground of objection and rejection in the prior Office action. The reply must present arguments pointing out the specific distinctions believed to render the claims, including any newly presented claims, patentable over any applied references. If the reply is with respect to an application, a request may be made that objections or requirements as to form not necessary to further consideration of the claims be held in abeyance until allowable subject matter is indicated. The applicant's or patent owner's reply must appear throughout to be a *bona fide* attempt to advance the application or the reexamination proceeding to final action. A general allegation that the claims define a patentable invention without specifically pointing out how the language of the claims patentably distinguishes them from the references does not comply with the requirements of this section.

(c) In amending in reply to a rejection of claims in an application or patent under reexamination, the applicant or patent owner must clearly point out the patentable novelty which he or she thinks the claims present in view of the state of the art disclosed by the references cited or the objections made. The applicant or patent owner must also show how the amendments avoid such references or objections.

37 CFR 1.550. Conduct of ex parte reexamination proceedings.

(a) All *ex parte* reexamination proceedings, including any appeals to the Board of Patent Appeals and Interferences, will be conducted with special dispatch within the Office. After issuance of the *ex parte* reexamination order and expiration of the time for submitting any responses, the examination will be conducted in accordance with §§ 1.104 through 1.116 and will result in the issuance of an *ex parte* reexamination certificate under § 1.570.

(b) The patent owner in an *ex parte* reexamination proceeding will be given at least thirty days to respond to any Office action. In response to any rejection, such response may include further statements and/or proposed amendments or new claims to place the patent in a condition where all claims, if amended as proposed, would be patentable.

(c) The time for taking any action by a patent owner in an *ex parte* reexamination proceeding will be extended only for sufficient cause and for a reasonable time specified. Any request for such extension must be filed on or before the day on which action by the patent owner is due, but in no case will the mere filing of a request effect any extension. Any request for such extension must be accompanied by the petition fee set forth in § 1.17(g). See §

1.304(a) for extensions of time for filing a notice of appeal to the U.S. Court of Appeals for the Federal Circuit or for commencing a civil action.

(d) **>If the patent owner fails to file a timely and appropriate response to any Office action or any written statement of an interview required under § 1.560(b), the prosecution in the *ex parte* reexamination proceeding will be a terminated prosecution, and the Director will proceed to issue and publish a certificate concluding the reexamination proceeding under § 1.570 in accordance with the last action of the Office.<

(e) If a response by the patent owner is not timely filed in the Office,

(1) The delay in filing such response may be excused if it is shown to the satisfaction of the Director that the delay was unavoidable; a petition to accept an unavoidably delayed response must be filed in compliance with § 1.137(a); or

(2) The response may nevertheless be accepted if the delay was unintentional; a petition to accept an unintentionally delayed response must be filed in compliance with § 1.137(b).

(f) The reexamination requester will be sent copies of Office actions issued during the *ex parte* reexamination proceeding. After filing of a request for *ex parte* reexamination by a third party requester, any document filed by either the patent owner or the third party requester must be served on the other party in the reexamination proceeding in the manner provided by § 1.248. The document must reflect service or the document may be refused consideration by the Office.

(g) The active participation of the *ex parte* reexamination requester ends with the reply pursuant to § 1.535, and no further submissions on behalf of the reexamination requester will be acknowledged or considered. Further, no submissions on behalf of any third parties will be acknowledged or considered unless such submissions are:

(1) in accordance with § 1.510 or § 1.535; or

(2) entered in the patent file prior to the date of the order for *ex parte* reexamination pursuant to § 1.525.

(h) Submissions by third parties, filed after the date of the order for *ex parte* reexamination pursuant to § 1.525, must meet the requirements of and will be treated in accordance with § 1.501(a).

Pursuant to 37 CFR 1.550(a):

> "After issuance of the *ex parte* reexamination order and expiration of the time for submitting any response, the examination will be conducted in accordance with §§ 1.104 through 1.116…"

Accordingly, the provisions of 37 CFR 1.111 apply to the response by a patent owner in a reexamination proceeding.

The certificate of mailing and certificate of transmission procedures (37 CFR 1.8), and the "Express Mail" mailing procedure (37 CFR 1.10), may be used to file any response in a pending *ex parte* reexamination proceeding.

The patent owner is required to serve a copy of any response made in the reexamination proceeding on the third party requester. 37 CFR 1.550(f). See MPEP § 2266.03 as to service of patent owner responses to an Office action.

The patent owner will normally be given a period of 2 months to respond to the Office action. An extension of time can be obtained only in accordance with 37 CFR 1.550(c). Note that 37 CFR 1.136 does not apply in reexamination proceedings.

If the patent owner fails to file a timely and appropriate response to any Office action, the prosecution of the reexamination proceeding will be terminated, unless the response is "not fully responsive" as defined in MPEP § 2266.01 or is an "informal submission" as defined in MPEP § 2266.02. After the prosecution of the proceeding is terminated, the Director will proceed to issue >and publish< a reexamination certificate.

Pursuant to 37 CFR 1.111(a)(2), a response that is supplemental to a response that is in compliance with 37 CFR 1.111(b) will not be entered as a matter of right. The Office may enter a supplemental response if the supplemental response is clearly limited to: (A) cancellation of a claim(s); (B) adoption of the examiner suggestion(s); (C) placement of the proceeding in condition for Notice of Intent to Issue Reexamination Certificate (NIRC); (D) a response to an Office requirement made after the first response was filed; (E) correction of informalities (e.g., typographical errors); or (F) simplification of issues for appeal. When a supplemental response is filed in sufficient time to be entered into the reexamination proceeding before the examiner considers the prior response, the examiner may approve the entry of a supplemental response if, after a cursory review, the examiner determines that the supplemental response is limited to meeting one or more of the conditions set forth in 37 CFR 1.111(a)(2)(i).

A supplemental response, which has not been approved for entry, will not be entered when a response to a subsequent Office action is filed, even if there is a specific request for its entry in the subsequent response. If a patent owner wishes to have the unentered supplemental response considered by the examiner, the patent owner must include the contents of the unentered supplemental response in a proper response to a subsequent Office action.

The patent owner in an *ex parte* reexamination proceeding must not file papers on behalf of a third party. 37 CFR 1.550(g). If a third party paper accompanies, or is submitted as part of a timely filed response, the response and the third party paper are considered to be an improper submission under 37 CFR 1.550(g), and the entire submission shall be returned to the patent owner, since the Office will not determine which portion of the submission is the third party paper. The third party paper will not be considered. The decision returning the improper response and the third party paper should provide an appropriate extension of time under 37 CFR 1.550(c) to refile the patent owner response without the third party paper. See MPEP § 2254 and § 2267.

>Patent owner cannot submit an application data sheet (ADS) in a reexamination proceeding since a reexamination proceeding is not an "application" (see 37 CFR 1.76). An ADS is an improper paper in a reexamination proceeding.<

2266.01 Submission Not Fully Responsive to Non-Final Office Action [R-7]

A response by the patent owner will be considered not fully responsive to a non-final Office action where:

(A) a *bona fide* response to an examiner's non-final action is filed;

(B) before the expiration of the permissible response period;

(C) but through an apparent oversight or inadvertence, some point necessary to a full response has been omitted (i.e., appropriate consideration of a matter that the action raised, or compliance with a requirement made by the examiner, has been omitted).

Where patent owner's amendment or response **prior to final rejection** is not fully responsive to an Office action in a reexamination and meets all of (A) through (C) above, the prosecution of the reexamination proceeding should not be terminated; but, rather, a practice similar to that of 37 CFR 1.135(c) (which is directed to applications) may be followed. The examiner may treat a patent owner submission which is not fully responsive to a non-final Office action by:

(A) waiving the deficiencies (if not serious) in the response and acting on the patent owner submission;

(B) accepting the amendment as a response to the non-final Office action but notifying the patent owner (via a new Office action setting a new time period for response) that the omission must be supplied; or

(C) notifying the patent owner that the response must be completed within the remaining period for response to the non-final Office action (or within any extension pursuant to 37 CFR 1.550(c)) to avoid termination of the prosecution of the proceeding under 37 CFR 1.550(d). This third alternative should only be used in the *very unusual situation* where there is sufficient time remaining in the period for response (including extensions under 37 CFR 1.550(c)), as is discussed below.

Where a patent owner submission responds to the rejections, objections, or requirements in a non-final Office action and is a *bona fide* attempt to advance the reexamination proceeding to final action, but contains a minor deficiency (e.g., fails to treat every rejection, objection, or requirement), the examiner may simply act on the amendment and issue a new (non-final or final) Office action. The new Office action may simply reiterate the rejection, objection, or requirement not addressed by the patent owner submission, or the action may indicate that such rejection, objection, or requirement is no longer applicable. In the new Office action, the examiner will identify the part of the previous Office action which was not responded to and make it clear what is needed. Obviously, this course of action would not be appropriate in instances in which a patent owner submission contains a serious deficiency (e.g., the patent owner submission does not appear to have been filed in response to the non-final Office action).

Where patent owner's submission contains a serious deficiency (i.e., omission) to be dealt with prior to issuing an action on the merits and the period for response has expired, or there is insufficient time remaining to take corrective action before the expiration of the period for response, the patent owner should be notified of the deficiency and what is needed to correct the deficiency, and given a new time period for response (usually 1 month). The patent owner must supply the omission within the new time period for response (or any extensions under 37 CFR 1.550(c) thereof) to avoid termination of the prosecu-

tion of the proceeding under 37 CFR 1.550(d). The patent owner may also file a further response as permitted under 37 CFR 1.111. This is analogous to 37 CFR 1.135(c) for an application.

Form paragraph 22.14 may be used where a *bona fide* response is not entirely responsive to a non-final Office action.

¶ *22.14 Submission Not Fully Responsive to Non-Final Office Action - Ex Parte Reexamination*

The communication filed on **[1]** is not fully responsive to the prior Office action. **[2]**. The response appears to be *bona fide*, but through an apparent oversight or inadvertence, consideration of some matter or compliance with some requirement has been omitted. Patent owner is required to deal with the omission to thereby provide a full response to the prior Office action.

A shortened statutory period for response to this letter is set to expire ONE MONTH, or THIRTY DAYS, whichever is longer, from the mailing date of this letter. If patent owner fails to timely deal with the omission and thereby provide a full response to the prior Office action, prosecution of the present reexamination proceeding will be terminated. 37 CFR 1.550(d).

Examiner Note:

1. In bracket 2, the examiner should explain the nature of the omitted point necessary to complete the response, i.e., what part of the Office action was not responded to. The examiner should also make it clear what is needed to deal with the omitted point.

2. This paragraph may be used for a patent owner communication that is not completely responsive to the outstanding (i.e., prior) Office action. See MPEP § 2266.01.

3. This practice does not apply where there has been a deliberate omission of some necessary part of a complete response.

4. This paragraph is only used for a response made prior to final rejection. After final rejection, an advisory Office action and Form PTOL 467 should be used, and the patent owner informed of any non-entry of the amendment.

In the very unusual situation where there is sufficient time remaining in the period for response (including extensions under 37 CFR 1.550(c)), the patent owner may simply be notified that the omission must be supplied within the remaining time period for response. This notification should be made, by telephone, and an interview summary record (see MPEP §*> 2281<) must be completed and entered into the file of the reexamination proceeding to provide a record of such notification. When notification by telephone is not possible, the procedure set forth above should be followed.

The practice of giving the patent owner a time period to supply an omission in a *bona fide* response (which is analogous to that set forth in 37 CFR 1.135(c) for an application) does not apply where there has been a deliberate omission of some necessary part of a complete response; rather, it is applicable **only** when the missing matter or lack of compliance is considered by the examiner as being "inadvertently omitted." Once an inadvertent omission is brought to the attention of the patent owner, the question of inadvertence no longer exists. Therefore, a second Office action giving another new (1 month) time period to supply the omission would not be appropriate. However, if patent owner's response to the notification of the omission raises a different issue of a different inadvertently omitted matter, a second Office action may be given.

This practice authorizes, but does not require, an examiner to give the patent owner a new time period to supply an omission. Thus, where the examiner concludes that the patent owner is attempting to abuse the practice to obtain additional time for filing a response, the practice should not be followed. If time still remains for response, the examiner may telephone the patent owner and inform the patent owner that the response must be completed within the period for response to the non-final Office action or within any extension pursuant to 37 CFR 1.550(c) to avoid termination of the prosecution of the reexamination proceeding.

The practice of giving the patent owner a time period to supply an omission in a *bona fide* response does **not** apply after a final Office action. If a *bona fide* response to an examiner's action is filed **after final rejection** (before the expiration of the permissible response period), but through an apparent oversight or inadvertence, some point necessary to fully respond has been omitted, the examiner should **not** issue (to the patent owner) a notice of failure to fully respond. Rather, an advisory Office action (form PTOL-467) should be issued with an explanation of the omission. The time period set in the final rejection continues to run and is extended by 1 month if the response is the first response after the final rejection in accordance with the guidelines set forth in MPEP § 2265. See also MPEP § 2272.

Amendments after final rejection are approved for entry only if they place the proceeding in condition

for issuance of a reexamination certificate or in better form for appeal. Otherwise, they are not approved for entry. See MPEP § 714.12 and § 714.13. Thus, an amendment after final rejection should be denied entry if some point necessary for a complete response under 37 CFR 1.113 was omitted, even where the omission was through an apparent oversight or inadvertence. Where a submission after final Office action (e.g., an amendment filed under 37 CFR 1.116) does not place the proceeding in condition for issuance of a reexamination certificate, the period for response continues to run until a response under 37 CFR 1.113 (i.e., a Notice of Appeal or an amendment that places the proceeding in condition for issuance of a reexamination certificate) is filed. Where a submission after appeal (e.g., an amendment filed under 37 CFR 41.33) does not place the proceeding in condition for issuance of a reexamination certificate, the period for filing an appeal brief continues to run until an appeal brief or an amendment that places the proceeding in condition for issuance of a reexamination certificate is filed. The nature of the omission is immaterial. The examiner cannot give the patent owner a time period to supply the omission.

The examiner has the authority to enter the response, withdraw the final Office action, and issue a new Office action, which may be a final Office action, if appropriate, or an action closing prosecution in an otherwise allowable application under *Ex parte Quayle*, 25 USPQ 74, 1935 C.D. 11 (Comm'r Pat. 1935), if appropriate. This course of action is within the discretion of the examiner. However, the examiner should recognize that substantial patent rights will be at issue with no opportunity for the patent owner to refile under 37 CFR 1.53(b) or 1.53(d) in order to continue prosecution nor to file a request for continued examination under 37 CFR 1.114. Thus, where the time has expired for response and the amendment submitted would place the proceeding in condition for issuance of a reexamination certificate except for an omission through apparent oversight or inadvertence, the examiner should follow this course of action.

2266.02 Examiner Issues Notice of Defective Paper in *Ex Parte* Reexamination [R-5]

Even if the substance of a submission is complete, the submission can still be defective, i.e., an "informal submission." Defects in the submission can be, for example:

(A) The paper filed does not include proof of service;

(B) The paper filed is unsigned;

(C) The paper filed is signed by a person who is not of record;

(D) The amendment filed by the patent owner does not comply with 37 CFR 1.530(d)-(j);

(E) The amendment filed by the patent owner does not comply with 37 CFR 1.20(c)(3) and/or (c)(4).

Where a submission made **prior to final rejection** is defective (informal), form PTOL-475 is used to provide notification of the defects present in the submission. In many cases, it is only necessary to check the appropriate box on the form and fill in the blanks. However, if the defect denoted by one of the entries on form PTOL-475 needs further clarification (such as the specifics of why the amendment does not comply with 37 CFR 1.530(d)-(j)), the additional information should be set forth on a separate sheet of paper which is then attached to the form.

The defects identified above as (A) through (E) are specifically included in form PTOL-475. If the submission contains a defect other than those specifically included on the form, the "other" box on the form is to be checked and the defect explained in the space provided for the explanation. For example, a response might be presented on easily erasable paper, and thus, a new submission would be needed.

A time period of one month or thirty days, whichever is longer, from the mailing date of the PTOL-475 letter will be set in form PTOL-475 for correction of the defect(s). Extension of time to correct the defect(s) may be requested under 37 CFR 1.550(c). >If, in response to the notice, the defect still is not corrected, the submission will not be entered. If the failure to comply with the notice results in a patent owner failure to file a timely and appropriate response to any Office action, the prosecution of the reexamination proceeding generally will be terminated under 37 CFR 1.550(d).<

If a defective (informal) response to an examiner's action is filed **after final rejection** (before the expiration of the permissible response period), the examiner should **not** issue a form PTOL-475 notification to the

patent owner. Rather, an advisory Office action (form PTOL-467) should be issued with an explanation of the defect (informality). The time period set in the final rejection continues to run and is extended by 1 month if the response is the first response after the final rejection in accordance with the guidelines set forth in MPEP § 2265. See also MPEP § 2272.

Notice Of Defective Paper In Ex Parte Reexamination	**Control Number**	**Patent Under Reexamination**	
	Examiner	**Art Unit**	

--The MAILING DATE of this communication appears on the cover sheet with the correspondence address--

1. ☐ Since no proof of service was included with the paper filed on _____ , it fails to comply with 37 CFR 1.248 and 1.540. Proof of service is required within ONE (1) MONTH or THIRTY (30) DAYS from the mailing date of this letter, whichever is longer. Failure to provide proof of service may result in a refusal to consider the paper. If the failure to comply with this requirement results in a patent owner failure to file a timely and appropriate response to any Office action or any written statement of an interview required under 37 CFR 1.560(b), the prosecution of the reexamination proceeding will be terminated under 37 CFR 1.550(d).

2. ☐ The paper filed on _____ is unsigned. A duplicate paper or ratification, properly signed, is required within ONE (1) MONTH or THIRTY (30) DAYS from the mailing date of this letter, whichever is longer. Failure to comply with this requirement will result in the paper not being considered. If the failure to comply results in a patent owner failure to file a timely and appropriate response to any Office action or any written statement of an interview required under 37 CFR 1.560(b), the prosecution of the reexamination proceeding will be terminated under 37 CFR 1.550(d).

3. ☐ The paper filed on _____ is signed by _____ , who is not of record. A duplicate paper or ratification signed by a person of record, or by a person made of record by way of a new power of attorney, is required within ONE (1) MONTH or THIRTY (30) DAYS from the mailing date of this letter, whichever is longer. Failure to comply with this requirement will result in the paper not being considered. If the failure to comply results in a patent owner failure to file a timely and appropriate response to any Office action or any written statement of an interview required under § 1.560(b), the prosecution of the reexamination proceeding will be terminated under 37 CFR 1.550(d).

4. ☐ The Amendment filed on _____ does not comply with 37 CFR 1.530(d)-(j). Patent owner is given ONE (1) MONTH or THIRTY (30) DAYS from the mailing date of this letter, whichever is longer, to correct this informality; otherwise, the prosecution of the reexamination proceeding will be terminated under 37 CFR 1.550(d).

5. ☐ The amendment filed by patent owner on _____, does not comply with 37 CFR ☐1.20(c)(3) and/or ☐1.20(c)(4), as to excess claim fees. Patent owner is given a time period of ONE (1) MONTH or THIRTY (30) DAYS from the mailing date of this letter, whichever is longer, to correct this fee deficiency, or the prosecution of the reexamination proceeding will be terminated under 37 CFR 1.550(d), to effect the "abandonment" set forth in 37 CFR 1.20(c)(5).

6. ☐ Other: _____

NOTE: EXTENSION OF TIME ARE GOVERNED BY 37 CFR 1.550(c). If the period for response specified above is less than thirty (30) days, a response within the statutory minimum of thirty (30) days will be considered timely.

cc: Requester (if third party requester)

U.S. Patent and Trademark Office
PTOL-475 (Rev.07-05) **Notice of Defective Paper in *Ex Parte* Reexamination** Part of Paper No

2266.03 Service of Papers [R-5]

37 CFR 1.510. Request for ex parte reexamination.

*****

(b) Any request for reexamination must include the following parts:

*****

(5) A certification that a copy of the request filed by a person other than the patent owner has been served in its entirety on the patent owner at the address as provided for in § 1.33(c). The name and address of the party served must be indicated. If service was not possible, a duplicate copy must be supplied to the Office

*****

37 CFR 1.550. Conduct of ex parte reexamination proceedings.

*****

(f) The reexamination requester will be sent copies of Office actions issued during the *ex parte* reexamination proceeding. After filing of a request for *ex parte* reexamination by a third party requester, any document filed by either the patent owner or the third party requester must be served on the other party in the reexamination proceeding in the manner provided by § 1.248. The document must reflect service or the document may be refused consideration by the Office.

*****

Any paper filed with the Office, i.e., any submission made, in a third party requested reexamination by either the patent owner or the third party requester, must be served on every other party in the reexamination proceeding.

As proof of service, the party submitting the paper to the Office must attach a certificate of service to the paper. It is required that the name and address of the party served, and the method of service be set forth in the certificate of service. Further, a copy of the certificate of service must be attached with the copy of the paper that is served on the other party.

**>Any paper for which proof of service is required, which is filed without proof of service,< may be denied consideration. Where no proof of service is included, the reexamination clerk should immediately contact the party making the submission by telephone to see whether the indication of proof of service was inadvertently omitted from the submission but there was actual service.

If service was in fact made, the party making the submission should be advised to submit a supplemental paper indicating the manner and date of service. The reexamination clerk should enter the submission for consideration, and annotate the submission with:

"Service confirmed by [name of person] on [date]"

If no service was made, or the party making the submission cannot be contacted >where an effort to do so was made<, the submission is placed in the reexamination file and normally is not considered. *>Where the submission is not considered because of a service defect, the< submission is added to the IFW file history as an unentered paper with a "N/E" notation, along with a brief annotation as to why the paper is not entered. The submission itself shall be annotated with "no service," which also can be crossed through if the appropriate service is later made.

If the party making the submission cannot be contacted, a Notice of Defective Paper (PTOL-475), giving 1 month or 30 days, whichever is longer, to complete the paper, with a supplemental paper indicating the manner and date of service, will be mailed to the party.

If it is known that service of a submission was not made, notice of the requirement for service of copy is given (to the party that made the submission), and a 1-month or 30 days, whichever is longer, time period is set. Form paragraph 22.15 may be used to give notice.

¶ *22.15 Lack of Service - 37 CFR 1.550(f)*

The submission filed on **[1]** is defective because it appears that the submission was not served on the **[2]**. After the filing of a request for reexamination by a third party requester, any document filed by either the patent owner or the third party requester must be served on the other party (or parties where two or more third party requester proceedings are merged) in the reexamination proceeding in the manner provided in 37 CFR 1.248. See 37 CFR 1.550(f).

It is required that service of the submission be made, and a certificate of service be provided to the Office within a shortened statutory period of ONE MONTH or THIRTY DAYS, whichever is longer, from the mailing date of this letter. If service of the submission is not timely made, the submission may be denied consideration.

Examiner Note:

1. This paragraph may be used where a submission to the Office was not served as required in a third party requester reexamination proceeding.

2. In bracket 2, insert --patent owner-- or --third party requester--, whichever is appropriate.

The cover sheet to be used for mailing the notice will be form PTOL-473.

The failure of a party to serve the submission in response to the notice will have the following consequences:

(A) For a patent owner statement or a third party reply, the submission may be refused consideration by the Office. Where consideration is refused, the submission will not be addressed in the reexamination proceeding other than to inform parties of the lack of consideration thereof;

(B) For a patent owner response to an Office action, the response may be refused consideration by the Office. Where consideration of a response is refused, the prosecution of the proceeding will be terminated in accordance with 37 CFR 1.550(d), unless the patent owner has otherwise completely responded to the Office action.

See MPEP § 2220 as to the initial third party request.

See MPEP § 2249 as to the patent owner statement.

See MPEP § 2251 as to third party reply.

See MPEP § 2266 as to patent owner responses to an Office action.

2267 Handling of Inappropriate or Untimely Filed Papers [R-7]

The applicable regulations (37 CFR 1.501(a), 1.550(e)) provide that certain types of correspondence will not be considered or acknowledged unless timely received. Whenever reexamination correspondence is received, a decision is required of the Office as to the action to be taken on the correspondence based on what type of paper it is and whether it is timely.

The return of inappropriate submissions complies with the regulations that certain papers will not be considered and also reduces the amount of paper which would ultimately have to be scanned into the record. >Where an inappropriate (unauthorized, improper) paper has already been scanned into the Image File Wrapper (IFW) of the reexamination proceeding before discovery of the inappropriate nature of the paper, the paper cannot be physically returned to the party that submitted it. Instead, the paper will be "returned" by expunging it, i.e., by marking the paper as "non-public" and "closed" so that it does not appear in the active IFW record with the other active papers that comprise the public record of the reexamination proceeding.<

I. DISPOSITION OF PAPERS

Where papers are filed during reexamination proceedings which are inappropriate because of some defect, such papers will either be returned to the sender or forwarded to one of three files, the "Reexamination File" (paper file or IFW file history), the "Patent File" (paper file or IFW file history), or the "Storage File" (paper file). Any papers returned to the sender from the Central Reexamination Unit (CRU) or a Technology Center (TC) must be accompanied by a letter indicating signature and approval of the CRU or TC Director.

The "Storage Files" will be maintained separate and apart from the other two files at a location selected by the CRU or TC Director. For example, the CRU or TC Director may want to locate the "Storage File" in a central area in the CRU or TC as with the reexamination clerk or in his or her room.

II. TYPES OF PAPERS RETURNED WITH DIRECTOR OF THE USPTO OR CRU/TC DIRECTOR'S APPROVAL REQUIRED

Filed by Owner	A. Premature Response by Owner-
§ 1.530(a), § 1.540	Where the patent owner is NOT the requester, any response or amendment filed by owner prior to an order to reexamine is premature and will be returned and will not be considered.
§ 1.550(g)	B. Paper Submitted on Behalf of Third Party - Submission filed on behalf of a third party will be returned and will not be considered. Where third party paper is submitted as part of a patent owner response, see MPEP § 2254 and § 2266.

>In those rare instances where an opposition to a patent owner petition is filed, after such opposition is filed by a third party requester (regardless of whether such opposition has an entry right or not), any further paper in opposition/rebuttal/response to the third party opposition paper will not be considered and will be returned. There must be a limitation on party iterations of input, especially given the statutory mandate for special dispatch in reexamination.<

Filed by Requester	A. No Statement Filed by Owner -
§ 1.535	If a patent owner fails to file a statement within the prescribed limit, any reply by the requester is inappropriate and will be returned and will not be considered.
	B. Late Response by Requester -
§ 1.535, § 1.540	Any response subsequent to 2 months from the date of service of the patent owner's statement will be returned and will not be considered.
	C. Additional Response by Requester-
§ 1.550(g)	The active participation of the reexamination requester ends with the reply pursuant to § 1.535. Any further submission on behalf of requester will be returned and will not be considered.

>In those rare instances where an opposition to a requester petition is filed, after such opposition is filed by the patent owner (regardless of whether such opposition has an entry right or not), any further paper in opposition/rebuttal/response to the patent owner opposition paper will not be considered and will be returned. There must be a limitation on party iterations of input, especially given the statutory mandate for special dispatch in reexamination. Further, any petition requesting that an extension of time be denied will be returned, since a requester does not have a participation right in the reexamination proceeding. <

Filed by Third Party	
§ 1.501, § 1.565(a)	Unless a paper submitted by a third party raises only issues appropriate under 37 CFR 1.501, or consists solely of a prior decision on the patent by another forum, e.g., a court (see MPEP § 2207 and § 2286 or presentation of a paper of record in a litigation (see MPEP § 2282)), it will be returned to an identified third party or destroyed if the submitter is unidentified.

Where a paper is to be returned based on the above criteria, or other appropriate reasons, and the paper is not accompanied by a petition under 37 CFR 1.182 or 1.183, the CRU or TC Director will return the paper. Where a petition under 37 CFR 1.182 or 1.183 has been filed, the reexamination proceeding should be forwarded to the Office of Patent Legal Administration for decision.

III. TYPES OF DEFECTIVE PAPERS TO BE LOCATED IN THE "REEXAMINATION FILE"

Filed by Owner	A. Unsigned Papers -
§ 1.33	Papers filed by owner which are unsigned or signed by less than all of the owners (no attorney of record or acting in representative capacity).
	B. No Proof of Service -
§ 1.248	Papers filed by the patent owner in which no proof of service on requester is included and proof of service is required may be denied consideration.
	C. Untimely Papers -
§ 1.530(b), § 1.540	Where owner has filed a paper which is untimely, that is, it was filed after the period set for response, the paper will not be considered.

Filed by Requester	A. Unsigned Papers -
	Papers filed by requester which are unsigned will not be considered.
	B. No Proof of Service -
§ 1.510(b)(5) § 1.33, § 1.248	Papers filed by requester in which no proof of service on owner is included and where proof of service is required may be denied consideration.

>In those limited instances where there is a right to file an opposition to a petition, any such opposition must be filed within two weeks of the date upon which a copy of the original petition was served on the opposing party, to ensure consideration. Any such opposition which is filed after the two-week period will remain in the record, even though it is not considered.<

IV. PAPERS LOCATED IN THE "STORAGE FILE"

§ 1.501	Citations by Third Parties
§ 1.550(h)	Submissions by third parties based solely on prior art patents or publications filed after the date of the order to reexamine are not entered into the patent file but delayed until the reexamination proceedings have been concluded. See MPEP § 2206.

Proper timely filed citations by third parties (i.e., filed prior to the order) are placed in the reexamination file.

2268 Petition for Entry of Late Papers for Revival of Reexamination Proceeding [R-7]

35 U.S.C. 41. Patent fees; patent and trademark search systems.

(a) GENERAL FEES. — The Director shall charge the following fees:

*****

(7) REVIVAL FEES. — On filing each petition for the revival of an unintentionally abandoned application for a patent, for the unintentionally delayed payment of the fee for issuing each patent, or for an unintentionally delayed response by the patent owner in any reexamination proceeding, $1,500, unless the petition is filed under section 133 or 151 of this title, in which case the fee shall be $500.

*****

35 U.S.C. 133. Time for prosecuting application.

Upon failure of the applicant to prosecute the application within six months after any action therein, of which notice has been given or mailed to the applicant, or within such shorter time, not less than thirty days, as fixed by the Director in such action, the application shall be regarded as abandoned by the parties

thereto, unless it be shown to the satisfaction of the Director that such delay was unavoidable.

*37 CFR 1.137. **>Revival of abandoned application, terminated or limited reexamination prosecution, or lapsed patent.*

(a) *Unavoidable*. If the delay in reply by applicant or patent owner was unavoidable, a petition may be filed pursuant to this paragraph to revive an abandoned application, a reexamination prosecution terminated under §§ 1.550(d) or 1.957(b) or limited under § 1.957(c), or a lapsed patent. A grantable petition pursuant to this paragraph must be accompanied by:<

(1) The reply required to the outstanding Office action or notice, unless previously filed;

(2) The petition fee as set forth in § 1.17(l);

(3) A showing to the satisfaction of the Director that the entire delay in filing the required reply from the due date for the reply until the filing of a grantable petition pursuant to this paragraph was unavoidable; and

(4) Any terminal disclaimer (and fee as set forth in § 1.20(d)) required pursuant to paragraph (d) of this section.

(b) **>*Unintentional*. If the delay in reply by applicant or patent owner was unintentional, a petition may be filed pursuant to this paragraph to revive an abandoned application, a reexamination prosecution terminated under §§ 1.550(d) or 1.957(b) or limited under § 1.957(c), or a lapsed patent. A grantable petition pursuant to this paragraph must be accompanied by:<

(1) The reply required to the outstanding Office action or notice, unless previously filed;

(2) The petition fee as set forth in § 1.17(m);

(3) A statement that the entire delay in filing the required reply from the due date for the reply until the filing of a grantable petition pursuant to this paragraph was unintentional. The Director may require additional information where there is a question whether the delay was unintentional; and

(4) Any terminal disclaimer (and fee as set forth in § 1.20(d)) required pursuant to paragraph (d) of this section.

*****

**>

(e) *Request for reconsideration*. Any request for reconsideration or review of a decision refusing to revive an abandoned application, a terminated or limited reexamination prosecution, or lapsed patent upon petition filed pursuant to this section, to be considered timely, must be filed within two months of the decision refusing to revive or within such time as set in the decision. Unless a decision indicates otherwise, this time period may be extended under:

(1) The provisions of § 1.136 for an abandoned application or lapsed patent;

(2) The provisions of § 1.550(c) for a terminated *ex parte* reexamination prosecution, where the *ex parte* reexamination was filed under § 1.510; or

(3) The provisions of § 1.956 for a terminated *inter partes* reexamination prosecution or an *inter partes* reexamination limited as to further prosecution, where the *inter partes* reexamination was filed under § 1.913.<

*****

Pursuant to 37 CFR 1.550(d), the prosecution of an *ex parte* reexamination proceeding is terminated if the patent owner fails to file a timely and appropriate response to any Office action or any written statement of an interview required under 37 CFR 1.560(b). An *ex parte* reexamination prosecution terminated under 37 CFR 1.550(d) can be revived if the delay in response by the patent owner (or the failure to timely file the interview statement) was unavoidable in accordance with 37 CFR 1.137(a), or unintentional in accordance with 37 CFR 1.137(b).

The failure to timely file a statement pursuant to 37 CFR 1.530 or a reply pursuant to 37 CFR 1.535, however, would not (under ordinary circumstances) constitute adequate basis to justify a showing of unavoidable/unintentional delay regardless of the reasons for the failure, since failure to file a statement or reply does not result in a "termination" of the reexamination prosecution, to which 37 CFR 1.137 is directed.

All petitions in reexamination proceedings to accept late papers and to revive the proceedings will be decided in the Office of Patent Legal Administration.

I. PETITION BASED ON UNAVOIDABLE DELAY

The unavoidable delay provisions of 35 U.S.C. 133 are imported into, and are applicable to, *ex parte* reexamination proceedings by 35 U.S.C. 305. See *In re Katrapat*, 6 USPQ2d 1863 (Comm'r Pat. 1988). Accordingly, the Office will consider, in appropriate circumstances, a petition showing unavoidable delay under 37 CFR 1.137(a) where untimely papers are filed subsequent to the order for reexamination. Any such petition must provide an adequate showing of the cause of unavoidable delay, including the details of the circumstances surrounding the unavoidable delay and evidence to support the showing. Additionally, the petition must be accompanied by the petition fee set forth in 37 CFR 1.17(l) and a proposed response to continue prosecution (unless it has been previously filed).

II. PETITION BASED ON UNINTENTIONAL DELAY

The unintentional delay fee provisions of 35 U.S.C. 41(a)(7) are imported into, and are applicable to, all *ex parte* reexamination proceedings by section 4605 of the American Inventors Protection Act of 1999. The unintentional delay provisions of 35 U.S.C. 41(a)(7) became effective in reexamination proceedings on November 29, 2000. Accordingly, the Office will consider, in appropriate circumstances, a petition showing unintentional delay under 37 CFR 1.137(b) where untimely papers are filed subsequent to the order for reexamination. Any such petition must provide a verified statement that the delay was unintentional, a proposed response to continue prosecution (unless it has been previously filed), and the petition fee set forth in 37 CFR 1.17(m).

III. RENEWED PETITION

Reconsideration may be requested of a decision dismissing or denying a petition under 37 CFR 1.137(a) or (b) to revive a terminated reexamination prosecution. The request for reconsideration must be submitted within one (1) month from the mail date of the decision for which reconsideration is requested. An extension of time may be requested only under 37 CFR 1.550(c); extensions of time under 37 CFR 1.136 are not available in reexamination proceedings. Any reconsideration request which is submitted should include a cover letter entitled "Renewed Petition under 37 CFR 1.137(a)" (for a petition based on unavoidable delay) or "Renewed Petition under 37 CFR 1.137(b)" (for a petition based on unintentional delay).

IV. FURTHER DISCUSSION OF THE PETITION REQUIREMENTS

See also MPEP § 711.03(c), subsection III, for a detailed discussion of the requirements of petitions filed under 37 CFR 1.137(a) and (b).

2269 Reconsideration

In order to be entitled to reconsideration, the patent owner must respond to the Office action. 37 CFR 1.111(b). The patent owner may respond to such Office action with or without amendment and the patent under reexamination will be reconsidered, and so on repeatedly unless the examiner has indicated that the action is final. See 37 CFR 1.112. Any amendment after the second Office action, which will normally be final as provided for in MPEP § 2271, must ordinarily be restricted to the rejection or to the objection or requirement made.

2270 Clerical Handling [R-7]

The person designated as the reexamination clerk will handle most of the initial clerical processing of the reexamination file. The Central Reexamination >(CRU) Supervisory Patent Examiner (SPE)< Unit or Technology Center ** >(TC) Quality Assurance Specialist (QAS)< provides oversight as to clerical processing.

Amendments which comply with 37 CFR 1.530(d)-(j) will be entered for purposes of reexamination in the reexamination file. See MPEP § 2234 and § 2250 for the manner of entering amendments.

For entry of amendments in a merged reissue-reexamination proceeding, see MPEP § 2283 and § 2285.

Where an amendment is submitted in proper form and it is otherwise appropriate to enter the amendment, the amendment will be entered for purposes of the reexamination proceeding, even though the amendment does not have legal effect until the certificate is issued. Any "new matter" amendment to the disclosure (35 U.S.C. 132) will be required to be canceled, and claims containing new matter will be rejected under 35 U.S.C. 112. A "new matter" amendment to the drawing is ordinarily not entered. See MPEP § 608.04, § 608.04(a) and (c). Where an amendment enlarges the scope of the claims of the patent, the amendment will be entered; however the appropriate claims will be rejected under 35 U.S.C. 305.

2271 Final Action [R-7]

Before a final action is in order, a clear issue should be developed between the examiner and the patent owner. To bring the prosecution to a speedy conclusion and at the same time deal justly with the patent owner and the public, the examiner will twice provide the patent owner with such information and references as may be useful in defining the position of the Office as to unpatentability before the action is made final. Initially, the decision ordering reexamination of the patent will contain an identification of the new ques-

tions of patentability that the examiner considers to be raised by the prior art considered. In addition, the first Office action will reflect the consideration of any arguments and/or amendments contained in the request, the owner's statement filed pursuant to 37 CFR 1.530, and any reply thereto by the requester, and should fully apply all relevant grounds of rejection to the claims.

The statement which the patent owner may file under 37 CFR 1.530 and the response to the first Office action should completely respond to and/or amend with a view to avoiding all outstanding grounds of rejection.

It is intended that the second Office action in the reexamination proceeding following the decision ordering reexamination will **>generally be made final. The criteria for making a rejection final in an *ex parte* reexamination proceeding is analogous to that set forth in MPEP § 706.07(a) for making a rejection final in an application. Both< the patent owner and the examiner should recognize that a reexamination proceeding may result in the final cancellation of claims from the patent and that the patent owner does not have the right to renew or continue the proceedings by refiling under 37 CFR 1.53(b) or 1.53(d) or former 37 CFR 1.60 or 1.62, nor by filing a request for continued examination under 37 CFR 1.114. Complete and thorough actions by the examiner coupled with complete responses by the patent owner, including early presentation of evidence under 37 CFR 1.131 or 1.132, will go far in avoiding such problems and reaching a desirable early termination of the reexamination prosecution.

In making the final rejection, all outstanding grounds of rejection of record should be carefully reviewed and any grounds or rejection relied on should be reiterated. The grounds of rejection must (in the final rejection) be clearly developed to such an extent that the patent owner may readily judge the advisability of an appeal. However, where a single previous Office action contains a complete statement of a ground of rejection, the final rejection may refer to such a statement and also should include a rebuttal of any arguments raised in the patent owner's response.

I. PANEL REVIEW CONFERENCE

After an examiner has determined that the reexamination proceeding is ready for final rejection, the examiner will formulate a draft preliminary decision to issue a final rejection, the preliminary decision setting forth which claims to reject, the grounds of rejection, which claims to allow/confirm and reasons for allowance/confirmation. The examiner will then inform his/her **>Central Reexamination Unit (CRU) Supervisory Patent Examiner (SPE) or Technology Center (TC) Quality Assurance Specialist (QAS)< of his/her intent to issue the final rejection. The *>CRU SPE/TC QAS< will convene a panel review conference, and the conference members will review the patentability of the claim(s) pursuant to MPEP § 2271.01. If the conference confirms the examiner's preliminary decision to reject and/or allow the claims, the proposed final rejection shall be issued and signed by the examiner, with the two other conferees initialing the action (as "conferee") to indicate their presence in the conference. If the conference does not confirm the examiner's preliminary decision, the examiner will reevaluate and issue an appropriate Office action.

II. FORM PARAGRAPHS

The final rejection letter should conclude with one of form paragraphs 22.09 or 22.10.

¶ *22.09 Ex Parte Reexamination - Action Is Final*

THIS ACTION IS MADE FINAL.

A shortened statutory period for response to this action is set to expire **[1]** from the mailing date of this action.

Extensions of time under 37 CFR 1.136(a) do not apply in reexamination proceedings. The provisions of 37 CFR 1.136 apply only to "an applicant" and not to parties in a reexamination proceeding. Further, in 35 U.S.C. 305 and in 37 CFR 1.550(a), it is required that reexamination proceedings "will be conducted with special dispatch within the Office."

Extensions of time in reexamination proceedings are provided for in 37 CFR 1.550(c). A request for extension of time must be filed on or before the day on which a response to this action is due, and it must be accompanied by the petition fee set forth in 37 CFR 1.17(g). The mere filing of a request will not effect any extension of time. An extension of time will be granted only for sufficient cause, and for a reasonable time specified.

The filing of a timely first response to this final rejection will be construed as including a request to extend the shortened statutory period for an additional month, which will be granted even if previous extensions have been granted. In no event, however, will the statutory period for response expire later than SIX MONTHS from the mailing date of the final action. See MPEP § 2265.

Examiner Note:

1. This form paragraph may be used only in reexamination proceedings.
2. In bracket 1, insert the appropriate period for response, which is normally TWO (2) MONTHS. In court sanctioned or stayed litigation situations a ONE (1) MONTH period should be set.

¶ *22.10 Ex Parte Reexamination - Action Is Final, Necessitated by Amendment*

Patent owner's amendment filed **[1]** necessitated the new grounds of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a).

A shortened statutory period for response to this action is set to expire **[2]** from the mailing date of this action.

Extensions of time under 37 CFR 1.136(a) do not apply in reexamination proceedings. The provisions of 37 CFR 1.136 apply only to "an applicant" and not to parties in a reexamination proceeding. Further, in 35 U.S.C. 305 and in 37 CFR 1.550(a), it is required that reexamination proceedings "will be conducted with special dispatch within the Office."

Extensions of time in reexamination proceedings are provided for in 37 CFR 1.550(c). A request for extension of time must be filed on or before the day on which a response to this action is due, and it must be accompanied by the petition fee set forth in 37 CFR 1.17(g). The mere filing of a request will not effect any extension of time. An extension of time will be granted only for sufficient cause, and for a reasonable time specified.

The filing of a timely first response to this final rejection will be construed as including a request to extend the shortened statutory period for an additional month, which will be granted even if previous extensions have been granted. In no event, however, will the statutory period for response expire later than SIX MONTHS from the mailing date of the final action. See MPEP § 2265.

Examiner Note:

1. This form paragraph may be used only in reexamination proceedings.
2. In bracket 1, insert filing date of amendment.
3. In bracket 2, insert the appropriate period for response, which is normally TWO (2) MONTHS. In court sanctioned or stayed litigation situations a ONE (1) MONTH period should be set.
4. As with all other Office correspondence on the merits in a reexamination proceeding, the final Office action must be signed by a primary examiner.

III. ART CITED BY PATENT OWNER DURING PROSECUTION

Where art is submitted in a prior art citation under 37 CFR 1.501 and/or 37 CFR 1.555 (an IDS filed in a reexamination is construed as a prior art citation) and the submission is not accompanied by a statement similar to that of 37 CFR 1.97(e), the examiner may use the art submitted and make the next Office action final whether or not the claims have been amended, provided that no other new ground of rejection is introduced by the examiner based on the new art not cited in the prior art citation. See MPEP § 706.07(a).

IV. SIGNATORY AUTHORITY

As with all other Office correspondence on the merits in a reexamination proceeding, the final Office action must be signed by a primary examiner.

2271.01 *>Panel< Review * [R-5]

**>A panel review will be conducted at each stage of the examiner's examination in an *ex parte* reexamination proceeding, other than for actions such as notices of informality or incomplete response. Matters requiring decision outside of the examiner's jurisdiction (e.g., decisions on petitions or extensions of time, or Central Reexamination Unit (CRU) support staff notices) will not be reviewed by a panel.

The panel review is carried out for each Office action. The panel reviews the examiner's preliminary decision to reject and/or allow the claims in the reexamination proceeding, prior to the issuance of each Office action.

I. MAKE-UP OF THE PANEL

The panel will consist of three members, one of whom will be a manager. The second member will be the examiner in charge of the proceeding. The manager will select the third member. The examiner-conferees will be primary examiners, or examiners who are knowledgeable in the technology of the invention claimed in the patent being reexamined and/or who are experienced in reexamination practice. The majority of those present at the conference will be examiners who were not involved in the examination or issuance of the patent. An "original" examiner (see MPEP § 2236) should be chosen as a conferee only if that examiner is the most knowledgeable in the art, or there is some other specific and justifiable reason to choose an original examiner as a participant in the conference.<

II. **>PANEL< PROCESS

The examiner must inform his/her *>manager< of his/her intent to issue **>an Office action. The manager< will then convene a **>panel and the members

will confer and< review the patentability of the claim(s). If the conference confirms the examiner's preliminary decision to reject and/or allow the claims, the Office action ** shall be issued and signed by the examiner, with the two other conferees initialing the action (as "conferee") to indicate their participation in the conference. Both conferees will initial, even though one of them may have dissented from the 3-party conference decision as to the patentabiliy of claims. If the conference does not confirm the examiner's preliminary decision, **>examiner will reevaluate and< issue an appropriate Office action **.

Where the examiner in charge of the proceeding is not in agreement with the conference decision, the *>manager< will generally assign the proceeding to another examiner**.

III. WHAT THE CONFERENCE IS TO ACCOMPLISH

Each conference will provide a forum to consider all issues of patentability as well as procedural issues having an impact on patentability. Review of the patentability of the claims by more than one primary examiner should diminish the perception that the patent owner can disproportionately influence the examiner in charge of the proceeding. The conferences will also provide greater assurance that all matters will be addressed appropriately. All issues in the proceeding will be viewed from the perspectives of three examiners. What the examiner in charge of the proceeding might have missed, the other two conference members would likely detect. The conference will provide for a comprehensive discussion of, and finding for, each issue.

IV. CONSEQUENCES OF FAILURE TO HOLD CONFERENCE

Should the examiner issue **>an Office action without panel review<, the patent owner or the third party requester who wishes to object must promptly file a paper alerting the Office of this fact. (The failure to **>provide panel review< would be noted by the parties where there are no conferees' initials at the end of the ** Office action.) Any challenge of the failure to hold a *>panel< review conference must be made within two *>weeks of receipt< of the Office action issued, or the challenge will not be considered. ** In no event will the failure to hold a >panel< review conference, by itself, be grounds for vacating any Office decision(s) or action(s) and "restarting" the reexamination proceeding.

2272 After Final Practice [R-7]

It is intended that prosecution before the examiner in a reexamination proceeding will be concluded with the final action. Once a final rejection that is not premature has been entered in a reexamination proceeding, the patent owner no longer has any right to unrestricted further prosecution. Consideration of amendments submitted after final rejection and prior to, or with, the appeal will be governed by the strict standards of 37 CFR 1.116. Further, consideration of amendments submitted after appeal will be governed by the strict standards of 37 CFR 41.33. Both the examiner and the patent owner should recognize that substantial patent rights will be at issue with no opportunity for the patent owner to refile under 37 CFR 1.53(b), or 1.53(d), and with no opportunity to file a request for continued examination under 37 CFR 1.114. Accordingly, both the examiner and the patent owner should identify and develop all issues prior to the final Office action, including the presentation of evidence under 37 CFR 1.131 and 1.132.

>In the event that the patent owner is of the opinion that (A) a final rejection is improper or premature, or (B) that an amendment submitted after final rejection complies with 37 CFR 1.116 but the examiner improperly refused entry of such an amendment, the patent owner may file a petition under 37 CFR 1.181 requesting that the final rejection be withdrawn and that prosecution be reopened, or file a petition under 37 CFR 1.181 requesting entry of the amendment, where appropriate. The petition under 37 CFR 1.181 must be filed within the time period for filing a notice of appeal. Note that the filing of a petition under 37 CFR 1.181 does **not** toll the time period for filing a notice of appeal.<

I. FINAL REJECTION — TIME FOR RESPONSE

The statutory period for response to a final rejection in a reexamination proceeding will normally be two (2) months. If a response to the final rejection is filed, the time period set in the final rejection continues to run. The time period is automatically extended by 1 month (in accordance with the guidelines set forth

in MPEP § 2265) if the response is the first response after the final rejection and a notice of appeal has not yet been filed. Any advisory Office action using form PTOL-467, *Ex Parte* Reexamination Advisory Action Before the Filing of an Appeal Brief, which is issued in reply to patent owner's response after final rejection (and prior to the filing of the notice of appeal) will inform the patent owner of the automatic 1 month extension of time. It should be noted that the filing of any timely first response to a final rejection (even an informal response or even a response that is not signed) will automatically result in the extension of the shortened statutory period for an additional month. Note further that the patent owner is entitled to know the examiner's ruling on a timely response filed after final rejection before being required to file a notice of appeal. Notification of the examiner's ruling should reach the patent owner with sufficient time for the patent owner to consider the ruling and act on it. Accordingly, the period for response to the final rejection should be appropriately extended in the examiner's advisory action. See *Theodore Groz & Sohne & Ernst Bechert Nadelfabrik KG v. Quigg*, 10 USPQ2d 1787 (D.D.C. 1988). The period for response may not, however, be extended to run past 6 months from the date of the final rejection.

II. ACTION BY EXAMINER

It should be kept in mind that a patent owner cannot, as a matter of right, amend any finally rejected claims, add new claims after a final rejection, or reinstate previously canceled claims. For an amendment filed after final rejection and prior to the appeal brief, a showing under 37 CFR 1.116(b) is required and will be evaluated by the examiner for all proposed amendments after final rejection except where an amendment merely cancels claims, adopts examiner's suggestions, removes issues for appeal, or in some other way requires only a cursory review by the examiner. An amendment filed at any time after final rejection but before an appeal brief is filed, may be entered upon or after filing of an appeal provided:

(A) the total effect of the amendment is to cancel claims or comply with any requirement of form expressly set forth in a previous Office action, or present rejected claims in better form for consideration on appeal;

(B) for an amendment touching the merits of the patent under reexamination, the patent owner provides a showing of good and sufficient reasons why the amendment is necessary and was not earlier presented.

The first proposed amendment after final action in a reexamination proceeding will be given sufficient consideration to determine whether it places all the claims in condition where they are patentable and/or whether the issues on appeal are reduced or simplified. Unless the proposed amendment is entered in its entirety, the examiner will briefly explain the reasons for not entering a proposed amendment. For example, if the claims as amended present a new issue requiring further consideration or search, the new issue should be identified and a brief explanation provided as to why a new search or consideration is necessary. The patent owner should be notified if certain portions of the amendment would be entered if a separate paper was filed containing only such amendment.

Any second or subsequent amendment after final will be considered only to the extent that it removes issues for appeal or puts a claim in obvious patentable condition.

Since patents undergoing reexamination cannot become abandoned and cannot be refiled, and since the holding of claims unpatentable and canceled in a certificate is absolutely final, it is appropriate that the examiner consider the feasibility of entering amendments touching the merits after final rejection or after appeal has been taken, where there is a showing why the amendments are necessary and a suitable reason is given why they were not earlier presented.

The practice of giving the patent owner a time period to supply an omission in a *bona fide* response (as set forth in MPEP § 2266.01) does **not** apply after a final Office action. If a *bona fide* response to an examiner's action is filed **after final rejection** (before the expiration of the permissible response period), but through an apparent oversight or inadvertence, some point necessary to fully respond has been omitted, the examiner should **not** issue (to the patent owner) a notice of failure to fully respond. Rather, an advisory Office action (form PTOL-467) should be issued with an explanation of the omission.

Likewise, the practice of notifying the patent owner of the defects present in a submission via form PTOL-475 and setting a time period for correction of

the defect(s) (as set forth in MPEP § 2266.02) does **not** apply after a final Office action. If a defective (informal) response to an examiner's action is filed **after final rejection** (before the expiration of the permissible response period), the examiner should **not** issue a form PTOL-475 notification to the patent owner. Rather, an advisory Office action (form PTOL-467) should be issued with an explanation of the defect (informality) being provided in the advisory action.

2273 Appeal in *Ex Parte* Reexamination [R-7]

35 U.S.C. 306. Appeal.

The patent owner involved in a reexamination proceeding under this chapter may appeal under the provisions of section 134 of this title, and may seek court review under the provisions of sections 141 to 145 of this title, with respect to any decision adverse to the patentability of any original or proposed amended or new claim of the patent.

A patent owner who is dissatisfied with the primary examiner's decision to reject claims in an *ex parte* reexamination proceeding may appeal to the Board of Patent Appeals and Interferences for review of the examiner's rejection by filing a notice of appeal within the required time. A third party requester may not appeal, and may not participate in the patent owner's appeal.

In an *ex parte* reexamination filed before November 29, 1999, the patent owner may appeal to the Board after the second rejection of the claims (which is either final or non-final). This is based on the version of 35 U.S.C. 134 in existence prior to the amendment of the reexamination statute on November 29, 1999, by Public Law 106-113. This "prior version" of 35 U.S.C. 134 applies to appeals in reexamination where the reexamination was filed in the Office **>before< November 29, 1999. See Section 13202(d) of Public Law 107-273.

In an *ex parte* reexamination filed on or after November 29, 1999, the patent owner may appeal to the Board only after the final rejection of the claims. This is based on the current version of 35 U.S.C. 134 as amended by Public Law 106-113. This "current version" of 35 U.S.C. 134 applies to appeals in reexamination, where the reexamination was filed in the Office on or after November 29, 1999. See Section 13202(d) of Public Law 107-273.

The notice of appeal need not be signed by the patent owner or his or her attorney or agent. See 37 CFR 41.31(b). The fee required by 37 CFR 41.20(b)(1) must accompany the notice of appeal. See 37 CFR 41.31(a)(2) and (a)(3).

The period for filing the notice of appeal is the period set for response in the last Office action which is normally 2 months. The timely filing of a first response to a final rejection having a shortened statutory period for response is construed as including a request to extend the period for response an additional month, even if an extension has been previously granted, as long as the period for response does not exceed 6 months from the date of the final rejection. The normal *ex parte* appeal procedures set forth at 37 CFR 41.31 through 37 CFR 41.54 apply in *ex parte* reexamination, except as pointed out in this Chapter. A third party requester may not appeal or otherwise participate in the appeal.

The reexamination statute does not provide for review of a patentability decision favoring the patentee. *Greenwood v. Seiko Instruments*, 8 USPQ2d 1455 (D.D.C. 1988).

See MPEP § 1204 for a discussion of the requirements for a proper appeal. However, note that in the unusual circumstances where an appeal is defective (e.g., no proof of service is included, it was filed for the wrong proceeding), patent owner should **not** be advised by the examiner to obtain an extension of time under 37 CFR 1.136(a), because an extension of time under 37 CFR 1.136 cannot be obtained in a reexamination proceeding.

Where a notice of appeal is defective, the patent owner will be so notified. Form PTOL-475 will be used to provide the notification. The "other" box on the PTOL-475 will be checked where it is appropriate with an explanation as to why the notice of appeal is defective. A 1-month or 30 days, whichever is longer, time period will be provided for the patent owner to cure the defect(s) in the appeal.

If the patent owner does not timely file a notice of appeal and/or does not timely file the appropriate appeal fee, the patent owner will be notified that the appeal is dismissed. Form PTOL-468 will be used to provide the notification. The reexamination prosecution is then terminated, and a Notice of Intent to Issue *Ex Parte* Reexamination Certificate (NIRC) will subsequently be issued indicating the status of the claims

at the time of final rejection (or after the second rejection of the claims, where an appeal was taken from that action without waiting for a final rejection). See MPEP § 2287.

2274 Appeal Brief [R-5]

I. AMENDMENT

Where the appeal brief is not filed, but within the period allowed for filing the brief an amendment is presented which places the claims of the patent under reexamination in a patentable condition, the amendment may be entered. Amendments should not be included in the appeal brief.

As to separate amendments, i.e., amendments not included with the appeal brief, filed with or after the appeal, see MPEP § 1207.

II. TIME FOR FILING APPEAL BRIEF

The time for filing the appeal brief is 2 months from the date of the appeal.

III. EXTENSION OF TIME FOR FILING APPEAL BRIEF

In the event that the patent owner finds that he or she is unable to file a brief within the time allowed by the rules, he or she may file a petition with the appropriate extension of time fee, to the >Central Reexamination Unit (CRU) or< Technology Center (TC), requesting additional time (usually 1 month), and give reasons for the request. The petition should contain the address to which the response is to be sent. If sufficient cause is shown and the petition is filed prior to the expiration of the period sought to be extended (37 CFR 1.550(c)), the >CRU or< TC Director is authorized to grant the extension for up to 1 month. Requests for extensions of time for more than 1 month will also be decided by the >CRU or< TC Director, but will not be granted unless extraordinary circumstances are involved; e.g., death or incapacitation of the patent owner. The time extended is added to the last calendar day of the original period, as opposed to being added to the day it would have been due when said last day is a Saturday, Sunday, or Federal holiday.

IV. FAILURE TO TIMELY FILE APPEAL BRIEF

Failure to file the brief and/or the appeal brief fee within the permissible time will result in dismissal of the appeal. Form PTOL-468 is used to notify the patent owner that the appeal is dismissed. The reexamination prosecution is then terminated, and a Notice of Intent to Issue *Ex Parte* Reexamination Certificate (NIRC) (see MPEP § 2287) will subsequently be issued indicating the status of the claims at the time of appeal.

V. REQUIREMENTS FOR THE APPEAL BRIEF

A fee as set forth in 37 CFR 41.20(b)(2) is required when the appeal brief is filed for the first time in a particular reexamination proceeding, 35 U.S.C. 41(a). 37 CFR 41.37 provides that the appellant shall file a brief of the authorities and arguments on which he or she will rely to maintain his or her appeal, including a summary of claimed subject matter which must refer to the specification by page and line number, and to the drawing, if any, by reference characters, and a copy of the claims involved. Only one copy of the appeal brief is required. Where the request for reexamination was filed by a third party requester, a copy of the brief must be served on that third party requester.

In the case of a merged proceeding (see MPEP § 2283 and § 2285), one original copy of the brief should be provided for each reexamination proceeding and reissue application in the merged proceeding. In addition, a copy of the brief must be served on any third party requesters who are part of the merged proceeding.

For the sake of convenience, the copy of the claims involved should be double spaced and should start on a new page. Note that >the copy of the< claims on appeal in reexamination proceedings *>must< include all underlining and bracketing *>, as required by 37 CFR 1.530(f),< to reflect the changes made to the original patent claims throughout the prosecution of the reexamination. In addition, any new claims added in the reexamination should be completely underlined. This represents a departure from the procedure set forth in MPEP § 1205.02 for applications.

The brief, as well as every other paper relating to an appeal, should indicate the number of the *>art unit<

to which the reexamination is assigned and the reexamination control number. When the brief is received, it is forwarded to the *>CRU or TC (depending which is examining the proceeding)< where it is entered in the file and referred to the examiner.

Patent owners are reminded that their briefs in appeal cases must be responsive to every ground of rejection stated by the examiner. A reply brief, if filed, shall be entered, except that amendments or affidavits or other evidence are subject to 37 CFR 1.116 and 41.33. See 37 CFR 41.41(a)(2).

It is essential that the Board of Patent Appeals and Interferences should be provided with a brief fully stating the position of the appellant with respect to each issue involved in the appeal so that no search of the record is required in order to determine that position. The fact that appellant may consider a ground to be clearly improper does not justify a failure on the part of the appellant to point out to the Board the reasons for that view in the brief.

See MPEP § 1205.02 for further discussion of the requirements for an appeal brief.

VI. DEFECTIVE APPEAL BRIEF

Where an appeal brief is defective, the examiner will notify the patent owner that the brief is defective, using PTOL-462R. A 1-month period is provided for the patent owner to cure the defect(s). Where items 1-9 in the form do not provide the defect which has been found in the brief, or where more explanation is needed as to one of items 1-9, box 10 should be checked and the nature of the defect(s) explained by the examiner in an attachment to form PTOL-462R. An example of this is where an appellant patent owner inadvertently fails to respond by way of brief to any ground of rejection under a separate heading, and it is clear from the record which ground has not been responded to. In such a case, appellant should be notified by the examiner that he or she is given 1 month to correct the defect by filing a supplemental brief.

It is important for the examiner to identify any defects in the brief and give the patent owner 1 month in which to cure the defects. Where this procedure has not been followed, the Board of Patent Appeals and Interferences (Board) may return the reexamination file to the examiner for compliance (i.e., for corrective action).

When the record clearly indicates *intentional failure* to respond by brief, to any ground of rejection, for example, the examiner should inform the Board of this fact in his or her answer and merely specify the claim(s) affected. Where the failure to respond by brief appears to be intentional, the Board may summarily sustain the rejection. Oral argument at the hearing will not remedy such deficiency of a brief.

The mere filing of any paper whatsoever entitled as a brief cannot necessarily be considered as compliance with 37 CFR 41.37. The rule requires that the brief must set forth the authorities and arguments relied on, and to the extent that it fails to do so with respect to any ground of rejection, that ground may be summarily sustained. A distinction must be made between the lack of any argument and the presentation of arguments that carry no conviction. In the former case summarily sustaining the rejection is in order, while in the latter case a decision on the merits is made, although it may well be merely an affirmance based on the grounds relied on by the examiner.

Appellant must traverse *every* ground of rejection set forth in the final rejection that appellant is presenting for review in the appeal. Oral argument at the hearing will not remedy a deficiency of failure to traverse a ground of rejection in the brief. Ignoring or acquiescing in any rejection, even one based upon formal matters which could be cured by subsequent amendment, will invite summarily affirmance of the rejection.

The reexamination prosecution is considered terminated as of the date of the dismissal of the appeal. After the appeal is dismissed, the examiner will proceed to issue a Notice of Intent to Issue *Ex Parte* Reexamination Certificate for the proceeding; see MPEP § 2287.

2275 Examiner's Answer [R-3]

**>

37 CFR 41.39. Examiner's answer.

(a)(1)The primary examiner may, within such time as may be directed by the Director, furnish a written answer to the appeal brief including such explanation of the invention claimed and of the references relied upon and grounds of rejection as may be necessary, supplying a copy to appellant. If the primary examiner determines that the appeal does not comply with the provisions of §§ 41.31 and 41.37 or does not relate to an appealable action, the primary examiner shall make such determination of record.

(b) If an examiner's answer contains a rejection designated as a new ground of rejection, appellant must within two months from the date of the examiner's answer exercise one of the following two options to avoid sua sponte dismissal of the appeal as to the claims subject to the new ground of rejection:

(1) Reopen prosecution. Request that prosecution be reopened before the primary examiner by filing a reply under § 1.111 of this title with or without amendment or submission of affidavits (§§ 1.130, 1.131 or 1.132 of this title) or other evidence. Any amendment or submission of affidavits or other evidence must be relevant to the new ground of rejection. A request that complies with this paragraph will be entered and the application or the patent under ex parte reexamination will be reconsidered by the examiner under the provisions of § 1.112 of this title. Any request that prosecution be reopened under this paragraph will be treated as a request to withdraw the appeal.

(2) Maintain appeal. Request that the appeal be maintained by filing a reply brief as set forth in § 41.41. Such a reply brief must address each new ground of rejection as set forth in § 41.37(c)(1)(vii) and should follow the other requirements of a brief as set forth in § 41.37(c). A reply brief may not be accompanied by any amendment, affidavit (§§ 1.130, 1.131 or 1.132 of this title) or other evidence. If a reply brief filed pursuant to this section is accompanied by any amendment, affidavit or other evidence, it shall be treated as a request that prosecution be reopened before the primary examiner under paragraph (b)(1) of this section.

(c) Extensions of time under § 1.136 (a) of this title for patent applications are not applicable to the time period set forth in this section. See § 1.136 (b) of this title for extensions of time to reply for patent applications and § 1.550 (c) of this title for extensions of time to reply for ex parte reexamination proceedings.<

MPEP § *>1207< through § *>1207.05< relate to preparation of examiner's answers in appeals. The procedures covered in these sections apply to appeals in both patent applications and patents undergoing *ex parte* reexamination proceedings, except as provided for in this Chapter.

Where appellant files a timely reply brief to an examiner's answer or a supplemental examiner's answer, the examiner may * (A) acknowledge receipt and entry of the reply brief, * (B) ** reopen prosecution to respond to the reply brief>, or (C) furnish a supplemental examiner's answer responding to any new issue raised in the reply brief (see MPEP § 1207.05 for information on supplemental examiner's answer). See 37 CFR 41.43(a)<. A supplemental examiner's answer **>responding to a reply brief may not include a new ground of rejection. See 37 CFR 41.43(a)(2). A supplemental examiner's answer, other than to respond to any new issue raised in the reply brief, is not permitted unless the reexamination proceeding< has been remanded by the Board of Patent Appeals and Interferences for such purposes.

2276 Oral Hearing [R-3]

If appellant (patent owner) desires an oral hearing, appellant must file a written request for such hearing accompanied by the fee set forth in 37 CFR *>41.20(b)(3)< within 2 months after the date of the examiner's answer >or supplemental examiner's answer. The time for requesting an oral hearing may not be extended. 37 CFR 41.73(b). No appellant will be permitted to participate in an oral hearing unless he or she has requested an oral hearing and submitted the fee set forth in 37 CFR 41.20(b)(3)<.

Where the appeal involves reexamination proceedings, oral hearings are open to the public as observers (subject to the admittance procedures established by the Board), unless the appellant (A) *>petitions under 37 CFR 41.3< that the hearing not be open to the public>,< * (B) presents *>sufficient< reasons for such a request>, (C) pays the petition fee set forth in 37 CFR 41.20(a), and (D) the petition is granted<.

MPEP § 1209 relates to oral hearings in appeals in both patent applications and *ex parte* reexamination proceedings.

2277 Board of Patent Appeals and Interferences Decision [R-2]

MPEP § 1213 through § 1213.03 relate to decisions of the Board of Patent Appeals and Interferences for both applications and >*ex parte*< reexamination proceedings.

2278 Action Following Decision [R-2]

MPEP § 1214 through § 1214.07 provide the procedures to be followed after the conclusion of the appeal to the Board of Patent Appeals and Interferences, for both patent applications and >*ex parte*< reexamination proceedings, except as provided for in this Chapter.

2279 Appeal to Courts [R-3]

A patent owner >who is< not satisfied with the decision of the Board of Patent Appeals and Interferences may seek judicial review.

In an *ex parte* reexamination filed before November 29, 1999, the patent owner may appeal the deci-

sion of the Board of Patent Appeals and Interferences to either (A) the United States Court of Appeals for the Federal Circuit pursuant to 35 U.S.C. 141, or (B) the United States District Court for the District of Columbia pursuant to 35 U.S.C. 145. This is based on the version of 35 U.S.C. 141 and 35 U.S.C. 145 in existence prior to the amendment of the reexamination statute on November 29, 1999 by Public Law 106-113. This "prior version" of 35 U.S.C. 141 and 35 U.S.C. 145 applies to appeals in reexamination, where the reexamination was filed in the Office before November 29, 1999. See Section 13202(d) of Public Law 107-273.

In an *ex parte* reexamination filed on or after November 29, 1999, the patent owner may appeal the decision of the Board of Patent Appeals and Interferences only to the United States Court of Appeals for the Federal Circuit pursuant to 35 U.S.C. 141. This is based on the current version of 35 U.S.C. 141 and 35 U.S.C. 145 as they were amended by Public Law 106-113. This "current version" of 35 U.S.C. 141 and 35 U.S.C. 145 applies to appeals in reexamination, where the reexamination was filed in the Office on or after November 29, 1999. See Section 13202(d) of Public Law 107-273.

A third party requester of an *ex parte* reexamination may not seek judicial review. *Yuasa Battery v. Comm'r*, 3 USPQ2d 1143 (D.D.C. 1987).

While the reexamination statutory provisions do not provide for participation by any third party requester during any court review, the courts have permitted intervention by a third party requester in appropriate circumstances. See *In re Etter*, 756 F.2d 852, 225 USPQ 1 (Fed. Cir. 1985) and *Reed v. Quigg*, 230 USPQ 62 (D.D.C. 1986). See also MPEP § 1216, § 1216.01, and § 1216.02. A third party requester who is permitted to intervene in a civil action has no standing to appeal the court's decision, *Boeing Co. v. Comm'r*, 853 F.2d 878, 7 USPQ2d 1487 (Fed. Cir. 1988).

2280 Information Material to Patentability in Reexamination Proceeding [R-7]

37 CFR 1.555. Information material to patentability in ex parte reexamination and inter partes reexamination proceedings.

(a) A patent by its very nature is affected with a public interest. The public interest is best served, and the most effective reexamination occurs when, at the time a reexamination proceeding is being conducted, the Office is aware of and evaluates the teachings of all information material to patentability in a reexamination proceeding. Each individual associated with the patent owner in a reexamination proceeding has a duty of candor and good faith in dealing with the Office, which includes a duty to disclose to the Office all information known to that individual to be material to patentability in a reexamination proceeding. The individuals who have a duty to disclose to the Office all information known to them to be material to patentability in a reexamination proceeding are the patent owner, each attorney or agent who represents the patent owner, and every other individual who is substantively involved on behalf of the patent owner in a reexamination proceeding. The duty to disclose the information exists with respect to each claim pending in the reexamination proceeding until the claim is cancelled. Information material to the patentability of a cancelled claim need not be submitted if the information is not material to patentability of any claim remaining under consideration in the reexamination proceeding. The duty to disclose all information known to be material to patentability in a reexamination proceeding is deemed to be satisfied if all information known to be material to patentability of any claim in the patent after issuance of the reexamination certificate was cited by the Office or submitted to the Office in an information disclosure statement. However, the duties of candor, good faith, and disclosure have not been complied with if any fraud on the Office was practiced or attempted or the duty of disclosure was violated through bad faith or intentional misconduct by, or on behalf of, the patent owner in the reexamination proceeding. Any information disclosure statement must be filed with the items listed in § 1.98(a) as applied to individuals associated with the patent owner in a reexamination proceeding, and should be filed within two months of the date of the order for reexamination, or as soon thereafter as possible.

(b) Under this section, information is material to patentability in a reexamination proceeding when it is not cumulative to information of record or being made of record in the reexamination proceeding, and

(1) It is a patent or printed publication that establishes, by itself or in combination with other patents or printed publications, a *prima facie* case of unpatentability of a claim; or

(2) It refutes, or is inconsistent with, a position the patent owner takes in:

(i) Opposing an argument of unpatentability relied on by the Office, or

(ii) Asserting an argument of patentability.

A *prima facie* case of unpatentability of a claim pending in a reexamination proceeding is established when the information

compels a conclusion that a claim is unpatentable under the preponderance of evidence, burden-of-proof standard, giving each term in the claim its broadest reasonable construction consistent with the specification, and before any consideration is given to evidence which may be submitted in an attempt to establish a contrary conclusion of patentability.

(c) The responsibility for compliance with this section rests upon the individuals designated in paragraph (a) of this section and no evaluation will be made by the Office in the reexamination proceeding as to compliance with this section. If questions of compliance with this section are raised by the patent owner or the third party requester during a reexamination proceeding, they will be noted as unresolved questions in accordance with § 1.552(c).

The duty of disclosure in reexamination proceedings applies to the patent owner; to each attorney or agent who represents the patent owner, and to every other individual who is substantively involved on behalf of the patent owner. That duty is a continuing obligation on all such individuals throughout the proceeding. The continuing obligation during the reexamination proceeding is that any such individual to whom the duty applies who is aware of, or becomes aware of, patents or printed publications which (A) are material to patentability in a reexamination proceeding, and (B) which have not previously been made of record in the patent file, must bring such patents or printed publications to the attention of the Office.

Such individuals are strongly encouraged to file information disclosure statements in accordance with 37 CFR 1.98, within two months of the date of the order to reexamine, or as soon thereafter as possible, in order to bring the patents or printed publications to the attention of the Office. An information disclosure statement filed under 37 CFR 1.555 by the patent owner after the order for reexamination and before the first action on the merits may be submitted as part of the statement under 37 CFR 1.530, or it may be filed as a separate paper. If the information disclosure statement is filed as part of a statement under 37 CFR 1.530, the submission may include a discussion of the patentability issues in the reexamination. If, however, the submission is filed as a separate paper, not part of a statement under 37 CFR 1.530, the submission must be limited to a listing of the information disclosed and an explanation of its relevance. See 37 CFR 1.98. Any discussion of the information disclosed relating to patentability issues in the reexamination would be improper.

It is to be noted that, to comply with 37 CFR 1.98(a) as to documents cited in the patent or its parent applications that a party wishes to submit, the party must supply copies of the information. >37 CFR 1.98(a)(2) requires a legible copy of:

(1) each foreign patent;

(2) each publication or that portion which caused it to be listed, other than U.S. patents and U.S. patent application publications unless required by the Office;

(3) for each cited pending unpublished U.S. application, the application specification including the claims, and any drawing of the application, or that portion of the application which caused it to be listed including any claims directed to that portion;

(4) all other information or that portion which caused it to be listed.<

The exception to the requirement for copies noted in 37 CFR 1.98(d) does not apply to *ex parte* and *inter partes* reexamination proceedings, since a reexamination proceeding does not rely on the patent for an earlier effective filing date.

Any individual substantively involved in the reexamination proceeding may satisfy his or her duty by disclosing the information to the attorney or agent having responsibility for the reexamination proceeding or to a patent owner acting in his or her own behalf. A patent owner may satisfy his or her duty by disclosing the information to the attorney or agent having responsibility for the reexamination proceeding. An attorney, agent, or patent owner who receives information has no duty to submit such information if it is not material to patentability in the reexamination proceeding. See 37 CFR 1.555(b) for the definition of "material to patentability."

The responsibility of compliance with 37 CFR 1.555 rests on all such individuals. Any fraud practiced or attempted on the Office or any violation of the duty of disclosure through bad faith or intentional misconduct by any such individual results in noncompliance with 37 CFR 1.555(a). This duty of disclosure is consistent with the duty placed on patent applicants by 37 CFR 1.56. Any such issues raised by the patent owner or the third party requester during a reexamination proceeding will merely be noted as unresolved questions under 37 CFR 1.552(c).

All such individuals who fail to comply with 37 CFR 1.555(a) do so at the risk of diminishing the

quality and reliability of the reexamination certificate issuing from the proceeding.

See MPEP § 2282 (*ex parte* reexamination) and MPEP § 2686 (*inter partes* reexamination) for the patent owner's duty to disclose prior or concurrent proceedings in which the patent is or was involved.

2281 Interviews in *Ex Parte* Reexamination Proceedings [R-7]

37 CFR 1.560. Interviews in ex parte reexamination proceedings.

(a) Interviews in *ex parte* reexamination proceedings pending before the Office between examiners and the owners of such patents or their attorneys or agents of record must be conducted in the Office at such times, within Office hours, as the respective examiners may designate. Interviews will not be permitted at any other time or place without the authority of the Director. Interviews for the discussion of the patentability of claims in patents involved in *ex parte* reexamination proceedings will not be conducted prior to the first official action. Interviews should be arranged in advance. Requests that reexamination requesters participate in interviews with examiners will not be granted.

(b) In every instance of an interview with an examiner in an ex parte reexamination proceeding, a complete written statement of the reasons presented at the interview as warranting favorable action must be filed by the patent owner. An interview does not remove the necessity for response to Office actions as specified in § 1.111. Patent owner's response to an outstanding Office action after the interview does not remove the necessity for filing the written statement. The written statement must be filed as a separate part of a response to an Office action outstanding at the time of the interview, or as a separate paper within one month from the date of the interview, whichever is later.

Interviews are permitted in an *ex parte* reexamination proceeding. In the *ex parte* proceeding, only *ex parte* interviews between the examiner and patent owner and/or the patent owner's representative are permitted. Requests by third party requesters to participate in interviews or to attend interviews will not be granted. >However, it is permitted for a Paralegal or Legal Instruments Examiner (or support staff in general) to telephone a requester to discuss a request that fails to comply with the filing date requirements for filing a reexamination request, because there is no reexamination proceeding yet.<

Unless the Office of Patent Legal Administration authorizes otherwise, interviews between examiner and the owners of patents undergoing *ex parte* reexamination or their attorneys or agents must be had in the Office at such times, within Office hours, as the respective examiners may designate.

Where a panel review has been conducted for an action in a reexamination proceeding, every effort will be made to have the panel members present at an interview requested by the patent owner to discuss that action. An interview such as a telephone interview initiated by the examiner to obtain an amendment to allow the case will not have the panel member participating in the telephone interview.

Interviews for the discussion of the patentability of claims in patents involved in reexamination proceedings will ordinarily not be had prior to the first Office action following the order for reexamination and any submissions pursuant to 37 CFR 1.530 and 1.535. Such interviews will be permitted prior to the first Office action *only* where the examiner initiates the interview for the purpose of providing an amendment which will make the claims patentable and the patent owner's role is passive. The patent owner's role (or patent owner's attorney or agent) is limited to agreeing to the change or not. The patent owner should not otherwise discuss the case on the merits during this interview.

The patent owner's questions on purely procedural matters may be answered by the examiner at any time during the proceeding.

Where any party who is not the patent owner requests information as to the merits of a reexamination proceeding, the examiner will not conduct a personal or telephone interview with that party to provide the information. Only questions on strictly procedural matters, i.e., not directed to any specific reexamination proceeding, may be discussed with that party. The party who is not the patent owner should be referred by the examiner to the ** Central Reexamination Unit (CRU) **>Supervisory Patent Examiner (SPE) or Technology Center (TC) Quality Assurance Specialist (QAS)< to address any such questions on strictly procedural matters. See MPEP § 2212.01. The following guidelines are to be followed in determining whether a question is strictly directed to a procedural matter: (A) any information which a person could obtain by reading the file (which is open to the public) is procedural, and it may be discussed; (B) a matter not available from a reading of the file is considered as relating to the merits of the proceeding, and may not be discussed. Thus, for example, a question relating to when the next Office action will be rendered is improper as it relates to the merits of the proceeding (because this

information cannot be obtained from a reading of the file). Such a question by a party who is not the patent owner should not be responded to by the examiner or any other official.

The examiner must complete an *Ex Parte* Interview Summary form PTOL-474 for each interview held where a matter of substance has been discussed (see MPEP § 713.04). A copy of the form should be given to the patent owner at the conclusion of the interview. The original should be made of record in the reexamination file, and a copy should be mailed to any third party requester.

The general procedure for conducting interviews and recording same is described at MPEP § 713.01 - § 713.04.

Pursuant to 35 U.S.C. 305, however, "[a]ll reexamination proceedings … will be conducted with special dispatch within the Office." Accordingly, there are additional procedural requirements to facilitate the statutory mandate for "special dispatch."

In the case where the patent owner desires to initiate an interview, the patent owner should initially contact the examiner in charge of the proceeding to indicate what issues are sought to be discussed, and to determine if an interview will be granted. If the examiner agrees to grant the interview, the patent owner must file, at least three (3) working days prior to the interview, *>an informal< written statement of the issues to be discussed at the interview, and *>an informal< copy of any proposed claims to be discussed, unless examiner waives this requirement. **>The copy of these materials is to be submitted by facsimile transmission (FAX) directly to the examiner or hand-carried to the examiner so as to avoid the possibility of delay in matching the materials with the file. The informal copies that are considered by the examiner will be made of record in the reexamination proceeding as an attachment to the Interview Summary form PTOL-474 completed by the examiner after the interview. These preliminary steps are for the purpose of providing< structure to the interview so as to facilitate the statutory mandate for special dispatch.

The duration of the interview will not exceed one hour, unless the patent owner files a petition under 37 CFR 1.182 showing sufficient cause where more time is needed. In a reexamination proceeding, the invention should be well defined after the patent has issued, and it is simply a matter of defining the claims over art applied, to the extent such is deemed necessary. An hour of time in a structured planned interview should be sufficient to accomplish this, and in those rare instances where it is not, a patent owner may show cause to extend the time. During the interview, the examiner is always free to extend the duration of the interview to discuss issues that the examiner deems appropriate for (further) discussion. Such an extension of the duration of the interview is permitted at the examiner's sole discretion.

Only one interview may be requested after an Office action and prior to filing the response to that action, absent a showing of good cause to conduct a second interview during this period.

PATENT OWNER'S STATEMENT OF THE INTERVIEW

In every instance of an interview with the examiner, a patent owner's statement of the interview, including a complete written statement of the reasons presented at the interview as warranting favorable action, **must** be filed by the patent owner. 37 CFR 1.560(b). The written statement must be filed either as a separate paper within one month after the date of the interview, or as a separate part of a response to an outstanding Office action, whichever is later.

The requirement for a patent owner's statement of the interview cannot be waived by the examiner. It should be noted that, pursuant to 37 CFR 1.550(d), the failure to file a written statement of an interview as required under 37 CFR 1.560(b) will result in the termination of the reexamination prosecution (in the same way that failure to timely respond to an Office action results in the termination of the reexamination prosecution).

2282 Notification of Existence of Prior or Concurrent Proceedings and Decisions Thereon [R-7]

37 CFR 1.565. Concurrent office proceedings which include an ex parte reexamination proceeding.

(a) In an *ex parte* reexamination proceeding before the Office, the patent owner must inform the Office of any prior or concurrent proceedings in which the patent is or was involved such as interferences, reissues, *ex parte* reexaminations, *inter partes* reexaminations, or litigation and the results of such proceedings. See § 1.985 for notification of prior or concurrent proceedings in an *inter partes* reexamination proceeding.

*****

It is important for the Office to be aware of any prior or concurrent proceedings in which a patent undergoing *ex parte* reexamination is or was involved, such as interferences, reissues, *inter partes* reexaminations, other *ex parte* reexaminations or litigations, and any results of such proceedings. In accordance with 37 CFR 1.565(a), the patent owner is required to provide the Office with information regarding the existence of any such proceedings, and the results thereof, if known. Ordinarily, no submissions of any kind by third parties filed after the date of the order are entered into the reexamination or patent file while the reexamination proceeding is pending. However, in order to ensure a complete file, with updated status information regarding prior or concurrent proceedings regarding the patent under reexamination, the Office will, at any time, accept from any parties, for entry into the reexamination file, copies of notices of suits and other proceedings involving the patent and copies of decisions or papers filed in the court from litigations or other proceedings involving the patent. >Such decisions include final court decisions (even if the decision is still appealable), decisions to vacate, decisions to remand, and decisions as to the merits of the patent claims. Non-merit decisions on motions such as for a new venue, a new trial/discovery date, or sanctions will not be entered into the patent file, and will be expunged from the patent file by closing the appropriate paper if they were entered before discovery of their nature. Further, papers filed in the court from litigations or other proceedings involving the patent will not be entered into the record (and will be expunged if already entered) if they provide a party's arguments, such as a memorandum in support of summary judgment. If the argument has an entry right in the reexamination proceeding, it must be submitted via the vehicle (provision(s) of the rules) that provides for that entry right. It is not required nor is it permitted that parties submit copies of copending reexamination proceedings and applications (which copies can be mistaken for a new request/filing); rather, submitters may provide a notice identifying the application/proceeding number and its status. Any submission that is not permitted entry will be returned, expunged, or discarded, at the sole discretion of the Office.< It is to be noted that if the Office, in its sole discretion, deems the volume of the papers filed from litigations or other proceedings to be too extensive/lengthy, the Office may return >, expunge or discard, at its sole discretion,< all or part of the submission. In such an instance, a party may limit the submission in accordance with what is deemed relevant, and resubmit the papers. Persons making such submissions must limit the submissions to the notification, and must not include further arguments or information. Where a submission is not limited to bare notice of the prior or concurrent proceedings (in which a patent undergoing reexamination is or was involved), the submission will be returned by the Office. It is to be understood that highlighting of certain text by underlining, fluorescent marker, etc., goes beyond bare notice of the prior or concurrent proceedings.

Any proper submission pursuant to 37 CFR 1.565(a) will be promptly entered into the record of the reexamination file, and will be considered by the examiner as to its content, when the proceeding comes up for action on the merits. Thus, for example, if the patent owner properly files in a reexamination proceeding, pursuant to 37 CFR 1.565(a), an Information Disclosure Statement (IDS) that was submitted by a third party in the discovery stage of litigation of the patent being reexamined, the IDS would be entered into the reexamination file and considered by the examiner, the next time the proceeding comes up for action on the merits. See MPEP § 2286 for Office investigation for prior or concurrent litigation.

Form paragraph 22.07 or 22.08, if appropriate, may be used to remind the patent owner of the continuing duty under 37 CFR 1.565(a) to apprise the Office of any litigation activity.

¶ *22.07 Litigation Reminder (Patent Owner Request or Director Ordered Reexamination)*

The patent owner is reminded of the continuing responsibility under 37 CFR 1.565(a), to apprise the Office of any litigation activity, or other prior or concurrent proceeding, involving Patent No. **[1]** throughout the course of this reexamination proceeding. See MPEP §§ 2207, 2282 and 2286.

Examiner Note:

This form paragraph is to be used when granting an *ex parte* reexamination request filed by a patent owner and in the first action in a Director Ordered reexamination.

¶ *22.08 Litigation Reminder (Third Party Requester)*

The patent owner is reminded of the continuing responsibility under 37 CFR 1.565(a), to apprise the Office of any litigation activity, or other prior or concurrent proceeding, involving Patent

No. **[1]** throughout the course of this reexamination proceeding. The third party requester is also reminded of the ability to similarly apprise the Office of any such activity or proceeding throughout the course of this reexamination proceeding. See MPEP §§ 2207, 2282 and 2286.

Examiner Note:

This form paragraph is to be used when granting an *ex parte* reexamination request filed by a third party requester.

2283 Multiple Copending *Ex Parte* Reexamination Proceedings [R-7]

37 CFR 1.565. Concurrent Office proceedings which include an ex parte reexamination proceeding.

*****

(c) **>If *ex parte* reexamination is ordered while a prior *ex parte* reexamination proceeding is pending and prosecution in the prior *ex parte* reexamination proceeding has not been terminated, the *ex parte* reexamination proceedings will usually be merged and result in the issuance and publication of a single certificate under § 1.570. For merger of *inter partes* reexamination proceedings, see § 1.989(a). For merger of *ex parte* reexamination and *inter partes* reexamination proceedings, see § 1.989(b).<

*****

This section discusses multiple copending reexamination requests which are filed on the same patent, where none of the requests is an *inter partes* request. If one of the multiple copending reexamination requests is an *inter partes* request, see MPEP § 2686.01.

In order for a second or subsequent request for *ex parte* reexamination to be granted, a substantial new question of patentability must be raised by the art (patents and/or printed publications) cited in the second or subsequent request for reexamination. MPEP § 2240 provides a discussion as to whether a substantial new question of patentability is raised by the prior art cited in a second or subsequent request for reexamination filed while a reexamination proceeding is pending.

If the second or subsequent request is granted, the decision on whether or not to combine the proceedings will be made by the Central Reexamination Unit (CRU) Director where the reexamination is pending. The CRU Director may delegate this to the **>CRU Supervisory Patent Examiner (SPE)<. No decision on combining the reexaminations should be made until reexamination is actually ordered in the later filed request for reexamination.

I. PROCEEDINGS MERGED

**>

Where a second request for reexamination is filed and reexamination is ordered, and a first reexamination proceeding is pending, 37 CFR 1.565(c) provides that the proceedings will usually be merged. However, a decision not to merge is within the sole discretion of the Office to facilitate/carry out the statutory mandate of 35 U.S.C. 305 to conduct reexamination proceedings with "special dispatch."

Where a second request for reexamination is filed while a first reexamination proceeding is pending, the second request is decided based on the claims in effect at the time of the determination (see 37 CFR 1.515(a)), and if reexamination is ordered, the patent owner and the second requester are given an opportunity to file a statement and reply, respectively. It is then considered whether the proceedings will, or will not, be merged. If the proceedings are merged, the< prosecution will then continue at the most advanced point possible for the first proceeding. It should be noted that if a final rejection has been issued in the first proceeding, prosecution will be ordinarily be reopened where any of the new patents or printed publications presented in the second request are applied to the merged proceeding in a new ground of rejection.

The patent owner will be provided with an opportunity to respond to any new rejection in a merged reexamination proceeding prior to the action being made final. See MPEP § 2271. If the reexamination proceedings are merged, a single certificate will be issued based upon the merged proceedings, 37 CFR 1.565(c).

II. WHEN PROCEEDING IS SUSPENDED

It may also be desirable in certain situations to suspend a proceeding for a short and specified period of time. For example, a suspension of a first reexamination proceeding may be issued to allow time for the patent owner's statement and the requester's reply in a second proceeding prior to merging. Further, after the second proceeding *has been ordered*, it may be desirable to suspend the second proceeding where the first proceeding is presently on appeal before a Federal court to await the court's decision prior to merging. A suspension will only be granted in extraordinary instances, because of the statutory requirements that

examination proceed with "special dispatch." The express written approval of the CRU or Technology Center (TC) Director must be obtained. Suspension will not be granted when there is an outstanding Office action.

III. MERGER OF REEXAMINATIONS

The following guidelines should be observed when two requests for reexamination directed to a single patent have been filed.

The second request (i.e., Request 2) should be processed as quickly as possible and assigned to the same examiner to whom the first request (i.e., Request 1) is assigned. Request 2 should be decided immediately without waiting the usual period (e.g., for submission of art). If Request 2 is denied, *ex parte* prosecution of Request 1 should continue. If Request 2 is granted, the order in the second proceeding should be mailed immediately. The two requests should be held in storage until the patent owner's statement and any reply by the requester have been received in Request 2, or until the time for filing same expires. Then, the CRU Director or the CRU Director's delegate will prepare a decision whether to merge the two proceedings.

A decision by the CRU Director to merge the reexamination proceedings should include a requirement that the patent owner maintain identical claims in both files. It will further require that responses by the patent owner, and any other paper filed in the merged proceeding, must consist of a single response, addressed to both files, filed in duplicate, each bearing a signature and containing identifying data for both files, for entry in both files. The decision will point out that both files will be maintained as separate complete files. Where the claims are not the same in both files, the decision of merger will indicate at its conclusion that the patent owner is given 1 month to provide an amendment to make the claims the same in each file. Where the claims are already the same in both files, the decision will indicate at its conclusion that an Office action will be mailed in due course, and that the patent owner need not take any action at present. The decision of merger will be mailed immediately.

Where the merger decision indicates that an Office action will follow, the merged proceeding is returned to the examiner immediately after the decision to issue an Office action. Where the merger decision indicates that the patent owner is given 1 month to provide an amendment to make the claims the same in each file (identical amendments to be placed in all files), the **>CRU will< await submission of the amendment or the expiration of the time to submit the amendment. After the amendment is received and processed by the technical support staff or the time for submitting the amendment expires, the merged proceeding will be returned to the examiner to issue an Office action.

Once the merged proceeding is returned to the examiner for issuance of an Office action, the examiner should prepare an Office action at the most advanced point possible for the first proceeding. Thus, if the first proceeding is ready for a final rejection and the second proceeding does not provide any new information which would call for a new ground of rejection, the examiner should issue a final rejection for the merged proceeding using the guidelines for the prosecution stage set forth below.

If the *ex parte* prosecution stage has not yet begun in Request 1 when Request 2 is received, Request 1 should be processed to the point where it is ready for *ex parte* prosecution. Then, Request 1 is normally held until Request 2 is granted and is ready for *ex parte* action following the statement and reply. Thereafter, the two proceedings would be merged. However, if Request 2 is denied, there would be no merger and prosecution will be carried out solely on Request 1. Note that Request 2 should be determined on its own merits and should not rely on nor refer to the decision issued in Request 1.

In the event that an amendment to make the claims the same in each file is required by the merger decision (identical amendments to be placed in all files) but is not timely submitted, any claim that does not contain identical text in all of the merged proceedings should be rejected under 35 U.S.C. 112, second paragraph, as being indefinite as to the content of the claim, and thus failing to particularly point out the invention.

IV. THE PROSECUTION STAGE, AFTER MERGER

>Where merger is ordered, the patent owner is required to maintain identical amendments in the merged reexamination files for purposes of the merged proceeding. The maintenance of identical

amendments in the files is required as long as the reexamination proceedings remain merged. Where identical amendments are not present in the reexamination files at the time merger is ordered, the patent owner will be required to submit an appropriate "housekeeping" amendment placing the same amendments in the proceedings. This may be accomplished by amending one or more of the proceedings, as appropriate. The patent owner must not address any issue of patentability in the housekeeping amendment. In the event that an amendment to make the claims the same in each file is required by the merger decision (identical amendments to be placed in all files) but is not timely submitted, any claim that does not contain identical text in all of the merged proceedings should be rejected under 35 U.S.C. 112, paragraph 2, as being indefinite as to the content of the claim, and thus failing to particularly point out the invention.<

When prosecution is appropriate in merged proceedings, a single combined examiner's action will be prepared. Each action will contain the control number of the two proceedings on every page. A single action cover form (having both control numbers penned in at the top) will be provided by the examiner to the clerical staff. The clerical staff will copy the action cover form, and then use the PALM printer to print the appropriate data (A) on the original for the first request and (B) on the copy for the second request. Each requester will receive a copy of the action and both action cover forms, with the transmission form PTOL-465 placed on top of the package. The patent owner will get a copy of both action cover forms and the action itself.

When a "Notice Of Intent To Issue *Ex Parte* Reexamination Certificate" (NIRC) is appropriate, plural notices will be printed. Both reexamination files will then be processed. The TC or the CRU should prepare the file of the concurrent proceedings in the manner specified in MPEP § 2287 before release to Office of *>Data Management<.

The above guidelines should be extended to those situations where more than two requests for reexamination are filed for a single patent.

V. PROCEEDINGS NOT MERGED

Pursuant to 35 U.S.C. 305, "[a]ll reexamination proceedings under this section…will be conducted with special dispatch within the Office." This statutory provision is grounded on the need for certainty and finality as to the question of patentability raised by the request for reexamination. Thus, if a second request for reexamination **>will unduly delay< the first reexamination proceeding, the two proceedings generally will not be merged. If the Office were to merge the two *>proceedings<, the first reexamination proceeding would need to be withdrawn from its **>place in the process,< thus delaying, instead of advancing, prosecution. This would run contrary to the statutory "special dispatch" requirement of 35 U.S.C. 305 and its intent. On the other hand, if the Office does not merge, the first reexamination proceeding can be concluded, and any substantial new question of patentability raised by the second reexamination request can be resolved in the second proceeding, with no delay resulting. The second request is then considered based on the claims in the patent as indicated in the issued reexamination certificate, rather than the original claims of the patent. However, the Office always retains the authority to merge because in some instances, it may be more efficient to merge the two proceedings, which would foster "special dispatch.">The instances where the Office may, or may not, merge an ongoing reexamination proceeding with a subsequent reexamination proceeding, are addressed on a case-by-case basis.<

**

For processing of the second reexamination proceeding, see MPEP § 2295.

VI. FEES IN MERGED PROCEEDINGS

Where the proceedings have been merged and a paper is filed which requires payment of a fee (e.g., excess claim fee, fee for request for extension of time, petition fee, appeal fee, brief fee, oral hearing fee), only a single fee need be paid. For example, only one fee need be paid for an appeal brief even though the brief relates to merged multiple proceedings and copies must be filed for each file in the merged proceeding.

VII. PETITION TO MERGE MULTIPLE COPENDING REEXAMINATION PROCEEDINGS

No petition to merge multiple reexamination proceedings is necessary since the Office will generally, *sua sponte*, make a decision as to whether or not it is

appropriate to merge the multiple reexamination proceedings. If any petition to merge the proceedings is filed prior to the determination (37 CFR 1.515) and order to reexamine (37 CFR 1.525) on the second request, it will not be considered but will be returned to the party submitting the same by the CRU Director. The decision returning such a premature petition will be made of record in both reexamination files, but no copy of the petition will be retained by the Office. See MPEP § 2267.

While the patent owner can file a petition to merge the proceedings at any time after the order to reexamine (37 CFR 1.525) on the second request, the better practice is to include any such petition with the patent owner's statement under 37 CFR 1.530, in the event the CRU Director has not acted prior to that date to merge the multiple reexamination proceedings. If the requester of any of the multiple reexamination proceedings is not the patent owner, that party may petition to merge the proceedings as a part of a reply pursuant to 37 CFR 1.535 in the event the CRU Director has not acted prior to that date to merge the multiple proceedings. A petition to merge the multiple proceedings which is filed by a party other than the patent owner or one of the requesters of the reexamination will not be considered but will be returned to that party by the CRU Director as being improper under 37 CFR 1.550(g).

All decisions on the merits of petitions to merge multiple reexamination proceedings will be made by the CRU Director (or to the CRU **>SPE<, if the CRU Director delegates it to him or her).

2284 Copending *Ex Parte* Reexamination and Interference Proceedings [R-5]

37 CFR 1.565. Concurrent office proceedings which include an ex parte reexamination proceeding.

(a) In an *ex parte* reexamination proceeding before the Office, the patent owner must inform the Office of any prior or concurrent proceedings in which the patent is or was involved such as interferences, reissues, *ex parte* reexaminations, *inter partes* reexaminations, or litigation and the results of such proceedings. See § 1.985 for notification of prior or concurrent proceedings in an *inter partes* reexamination proceeding.

*****

(e) If a patent in the process of ex parte reexamination is or becomes involved in an interference, the Director may suspend the reexamination or the interference. The Director will not consider a request to suspend an interference unless a motion (§ 41.121(a)(3) of this title) to suspend the interference has been presented to, and denied by, an administrative patent judge, and the request is filed within ten (10) days of a decision by an administrative patent judge denying the motion for suspension or such other time as the administrative patent judge may set. For concurrent inter partes reexamination and interference of a patent, see § 1.993.

37 CFR 41.8. Mandatory notices.

(a) In an appeal brief (§§ 41.37, 41.67, or 41.68) or at the initiation of a contested case (§ 41.101), and within 20 days of any change during the proceeding, a party must identify:

(1) Its real party-in-interest, and

(2) Each judicial or administrative proceeding that could affect, or be affected by, the Board proceeding.

(b) For contested cases, a party seeking judicial review of a Board proceeding must file a notice with the Board of the judicial review within 20 days of the filing of the complaint or the notice of appeal. The notice to the Board must include a copy of the complaint or notice of appeal. See also §§ 1.301 to 1.304 of this title.

37 CFR 41.102. Completion of examination.

Before a contested case is initiated, except as the Board may otherwise authorize, for each involved application and patent:

(a) Examination or reexamination must be completed, and

(b) There must be at least one claim that:

(1) Is patentable but for a judgment in the contested case, and

(2) Would be involved in the contested case.

37 CFR 41.103. Jurisdiction over involved files.

The Board acquires jurisdiction over any involved file when the Board initiates a contested case. Other proceedings for the involved file within the Office are suspended except as the Board may order.

A patent being reexamined in an *ex parte* reexamination proceeding may be involved in an interference proceeding with at least one application, where the patent and the application are claiming the same patentable invention, and at least one of the application's claims to that invention are patentable to the applicant. See MPEP Chapter 2300.

The general policy of the Office is that a reexamination proceeding will not be delayed, or stayed, because of an interference or the possibility of an interference. The reason for this policy is the requirement of 35 U.S.C. 305 that all reexamination proceedings be conducted with "special dispatch" within the Office. In general, the Office will follow the practice of making the required and necessary decisions in the reexamination proceeding and, at the same time, going forward with the interference to the extent desirable. It is noted that 37 CFR 41.103 provides the

Board with the flexibility to tailor a specific solution to occurrences where reexamination and interference proceedings for the same patent are copending, as such occurrences may arise. Decisions in the interference will take into consideration the status of the reexamination proceeding and what is occurring therein. The decision as to what actions are taken in the interference will, in general, be taken in accordance with normal interference practice.

Although a *patent* being reexamined via a reexamination proceeding may become involved in an interference proceeding, the reexamination proceeding itself can never be involved in an interference proceeding. See 35 U.S.C. 135 subsection (a) which states that "[w]henever an application is made for a patent which, in the opinion of the Director, would interfere with any pending *application*, or with any unexpired *patent*, an interference may be declared" (emphasis added). The reexamination proceeding is neither an application nor a patent.

I. ATTEMPTING TO PROVOKE AN INTERFERENCE WITH A PATENT INVOLVED IN A REEXAMINATION PROCEEDING

When an amendment is filed in a pending application seeking to provoke an interference with a patent involved in a reexamination proceeding, the applicant must comply with 37 CFR 41.202(a), including identifying the patent under reexamination with which interference is sought. The corresponding application claims may be rejected on any applicable ground including, if appropriate, the prior art cited in the reexamination proceeding. See MPEP Chapter 2300. Prosecution of the application should continue as far as possible. If the application is placed in condition for allowance and still contains claims which interfere with claims of the patent under reexamination, then an interference should ordinarily be proposed between the application and the patent. The examiner must notify the Office of Patent Legal Administration (OPLA) before proposing the interference, and such an interference may not be proposed unless authorized by OPLA.

If the interference is not authorized (e.g., resolution of an issue in the reexamination proceeding is necessary to the interference), further action on the application should be suspended until the certificate on the reexamination proceeding has been issued and published. Form paragraph 23.16 may be used to notify applicant of the suspension.

Once the reexamination certificate has issued and published, the examiner should review the certificate to see if it makes any changes in the patent claims and then evaluate whether the patent still contains claims which interfere with claims of the application. If the claims do interfere, then the examiner should propose an interference. See MPEP Chapter 2300.

II. MOTION/REQUEST TO SUSPEND INTERFERENCE PENDING THE OUTCOME OF A REEXAMINATION PROCEEDING

A miscellaneous motion under 37 CFR 41.121(a)(3) to suspend an interference pending the outcome of a reexamination proceeding may be made at any time during the interference by any party thereto. See 37 CFR 41.123(b) for the procedure. The motion must be presented to the administrative patent judge who will decide the motion based on the particular fact situation. However, suspension is not favored. Normally, no consideration will be given such a motion unless and until a reexamination order is issued, nor will suspension of the interference normally be permitted until after any motions have been disposed of in the interference proceeding. If the motion under 37 CFR 41.121(a)(3) is denied by the administrative patent judge, a request to stay the interference may be made to the Director of the USPTO under 37 CFR 1.565(e).

A request to stay an interference under 37 CFR 1.565(e) will be decided by the Chief Administrative Patent Judge of the Board of Patent Appeals and Interferences.

III. REQUEST FOR REEXAMINATION FILED DURING INTERFERENCE

In view of the provisions of 37 CFR 1.510(a), "[a]ny person may, at any time during the period of enforceability of a patent" file a request for reexamination. Under 37 CFR 41.8(a), the patent owner must notify the Board of Patent Appeals and Interferences that a request for reexamination was filed, within 20 days of receiving notice of the request having been filed. Where it is the patent owner that files the request for reexamination, the 20 days run from the filing date of the request, since that is when the patent owner "received the notice" of filing the request. Such

requests for reexamination will be processed in the normal manner. No delay, or stay, of the reexamination will occur because the requester is not a party to the interference. If the examiner orders reexamination pursuant to 37 CFR 1.525 and subsequently rejects a patent claim corresponding to a count in the interference, the attention of the Board shall be called thereto.

IV. INTERFERENCE DECLARED WHILE REEXAMINATION PROCEEDING IS ON-GOING

Under 37 CFR 1.565, the patent owner in a reexamination proceeding before the Office is required to notify the Office when the patent being reexamined becomes involved in an interference. To do so, the patent owner must file in the reexamination proceeding a paper giving notice of the interference proceeding. The requirements of 37 CFR 1.565, and of 37 CFR 41.8(a) (see the preceding paragraph), are designed to keep the Office and the appropriate parties informed of activity which is relevant to reexamination and interference proceedings and, to the extent possible, to eliminate procedural surprise.

V. PETITION TO STAY REEXAMINATION PROCEEDING BECAUSE OF INTERFERENCE

Any petition to stay a reexamination proceeding, because of an interference, which is filed prior to the determination (37 CFR 1.515) and order to reexamine (37 CFR 1.525) will not be considered, but will be returned to the party submitting the same. The decision returning such a premature petition will be made of record in the reexamination file, but no copy of the petition will be retained by the Office. A petition to stay the reexamination proceeding because of the interference may be filed by the patent owner as a part of the patent owner's statement under 37 CFR 1.530 or subsequent thereto. If a party to the interference, other than the patent owner, is a requester of the reexamination, that party may petition to stay the reexamination proceeding as a part of a reply pursuant to 37 CFR 1.535. If the other party to the interference is not the requester, any petition by that party is improper under 37 CFR 1.550(g) and will not be considered. Any such improper petitions will be returned to the party submitting the same. Premature petitions to stay the reexamination proceedings, i.e., those filed prior to the determination (37 CFR 1.515) and order to reexamine (37 CFR 1.525), will be returned by the >Central Reexamination Unit (CRU) or< Technology Center (TC) Director as premature. Petitions to stay filed subsequent to the date of the order for reexamination will be referred to the OPLA for decision. All decisions on the merits of petitions to stay a reexamination proceeding because of an interference will be made in the OPLA.

VI. ACTION IN INTERFERENCE FOLLOWING REEXAMINATION

If one or more claims of a patent which is involved in an interference are canceled or amended by the issuance and publication of a reexamination certificate, the Board must be promptly notified.

Upon issuance and publication of the reexamination certificate, the patent owner must notify the administrative patent judge thereof.

2285 Copending *Ex Parte* Reexamination and Reissue Proceedings [R-7]

37 CFR 1.565. Concurrent office proceedings which include an ex parte reexamination proceeding.

*****

(d) **>If a reissue application and an *ex parte* reexamination proceeding on which an order pursuant to § 1.525 has been mailed are pending concurrently on a patent, a decision will usually be made to merge the two proceedings or to suspend one of the two proceedings. Where merger of a reissue application and an *ex parte* reexamination proceeding is ordered, the merged examination will be conducted in accordance with §§ 1.171 through 1.179, and the patent owner will be required to place and maintain the same claims in the reissue application and the *ex parte* reexamination proceeding during the pendency of the merged proceeding. The examiner's actions and responses by the patent owner in a merged proceeding will apply to both the reissue application and the *ex parte* reexamination proceeding and will be physically entered into both files. Any *ex parte* reexamination proceeding merged with a reissue application shall be concluded by the grant of the reissued patent. For merger of a reissue application and an *inter partes* reexamination, see § 1.991.<

*****

The general policy of the Office is that a reissue application examination and an *ex parte* reexamination proceeding will not be conducted separately at the same time as to a particular patent. The reason for this policy is to permit timely resolution of both proceedings to the extent possible and to prevent incon-

sistent, and possibly conflicting, amendments from being introduced into the two proceedings on behalf of the patent owner. Accordingly, if both a reissue application and an *ex parte* reexamination proceeding are pending concurrently on a patent, a decision will normally be made (A) to merge the two proceedings or (B) to stay one of the two proceedings. See *In re Onda*, 229 USPQ 235 (Comm'r Pat. 1985). The decision as to whether the proceedings are to be merged, or which proceeding (if any) is to be stayed is made in the Office of Patent Legal Administration (OPLA).

Where a reissue application and a reexamination proceeding are pending concurrently on a patent, the patent owner, i.e., the reissue applicant, has a responsibility to notify the Office of such. 37 CFR 1.178(b), 1.565(a), and 1.985. The patent owner should file in the reissue application, as early as possible, a Notification of Concurrent Proceedings pursuant to 37 CFR 1.178(b) in order to notify the Office in the reissue application of the existence of the reexamination proceeding on the same patent. See MPEP § 1418. In addition, the patent owner should file in the reexamination proceeding, as early as possible, a Notification of Concurrent Proceedings pursuant to 37 CFR 1.565(a) or 1.985 (depending on whether the reexamination proceeding is an *ex parte* reexamination proceeding or an *inter partes* reexamination proceeding) to notify the Office in the reexamination proceeding of the existence of the two concurrent proceedings.

I. TIME FOR MAKING DECISION ON MERGING OR STAYING THE PROCEEDINGS

A decision whether or not to merge the reissue application examination and the *ex parte* reexamination proceeding, or to stay one of the two proceedings, will not be made prior to the mailing of an order to reexamine the patent pursuant to 37 CFR 1.525 >, and the expiration of the statement-reply period following the order to reexamine<. Until such time **, the examination of the reissue application will proceed. A determination on the request must not be delayed because of the existence of a copending reissue application, since 35 U.S.C. 304 and 37 CFR 1.515 *require a determination within 3 months* following the filing date of the request. See MPEP § 2241. If the decision on the request denies reexamination (MPEP § 2247), the examination of the reissue application should be continued. If reexamination is ordered (MPEP § 2246), the ** Central Reexamination Unit (CRU) >Supervisory Patent Examiner (SPE)< or Technology Center **>Quality Assurance Specialist (QAS)< will await the filing of any statement under 37 CFR 1.530 and any reply under 37 CFR 1.535, or the expiration of the time for same (see MPEP § 2249 to § 2251). Thereafter, **>CRU SPE or TC QAS< should promptly notify the OPLA that the proceedings are ready for consideration of merger. If any of the reexamination file, the reissue application, and the patent file are paper files, they should be hand delivered to the OPLA at the time of the notification to OPLA.

If a reissue application is filed during the pendency of a reexamination proceeding, the OPLA should be notified as promptly as possible after the reissue application reaches the TC, that the proceedings are ready for consideration of merger. If any of the reexamination file, the reissue application, and the patent file are paper files, they should be hand delivered to the OPLA at the time of the notification to OPLA.

The decision on whether or not the proceedings are to be merged, or which proceeding (if any) is to be stayed, will generally be made as promptly as possible after receipt of the notification to OPLA and delivery of all the paper files to the OPLA. Until a decision is mailed merging the proceedings or staying one of the proceedings, the two proceedings will continue and be conducted simultaneously, but separately.

The Office may in certain situations issue a certificate at the termination of a reexamination prosecution, even if a copending reissue application or another reexamination request has already been filed.

II. CONSIDERATIONS IN DECIDING WHETHER TO MERGE THE PROCEEDINGS OR WHETHER TO STAY A PROCEEDING

The decision on whether to merge the proceedings or stay a proceeding will be made on a case-by-case basis based upon the status of the various proceedings. **>The decision to merge, or not to merge, is within the sole discretion of the Office to facilitate/carry out the orderly operation of the Office in addressing the proceedings. The status of the reissue application and the reexamination proceeding will be taken into account in the decision as to whether

merger will be ordered, or one of the two proceedings stayed.<

A. Reissue About To Issue, Reexamination Requested.

If the reissue patent will issue before the determination on the reexamination request must be made, the determination on the request should normally be delayed until after the granting of the reissue patent; and then the determination should be made on the basis of the claims *in the reissue patent*. The reexamination, if ordered, would then be on the reissue patent claims rather than the original patent claims. Since the reissue application would no longer be pending, the reexamination would be processed in a normal manner.

Where a reissue patent has been issued, the determination on the request for reexamination should specifically point out that the determination has been made on the claims of the reissue patent and not on the claims of the original patent. Any amendment made in the reexamination proceeding should treat the changes made by the reissue as the text of the patent, and all bracketing and underlining made with respect to the patent **as changed by the reissue**. Note that the reissue claims used as the starting point in the reexamination proceeding must be presented in the reexamination proceeding as a "clean copy." Thus, words bracketed in the reissue patent claim(s) would not appear at all in the reexamination clean copy of the claim(s). Also, words that were added via the reissue patent will appear in italics in the reissue patent, but must appear in plain format in the reexamination clean copy of the claim(s).

If a reissue patent issues on the patent under reexamination after reexamination is ordered, the next action from the examiner in the reexamination should point out that further proceedings in the reexamination will be based on the claims of the reissue patent and not on the patent surrendered. Form paragraph 22.05 may be used in the Office action.

¶ *22.05 Reexamination (Ex Parte or Inter Partes) Based on Reissue Claims*

In view of the surrender of original Patent No. **[1]** and the granting of Reissue Patent No. **[2]** which issued on **[3]**, all subsequent proceedings in this reexamination will be based on the reissue patent claims.

Where the reissue patent has issued prior to the filing of a request for reexamination of the parent patent, see MPEP § 2258.

B. Reissue Pending, Reexamination Request Filed.

Where a reissue patent will not be granted prior to the expiration of the 3-month period for making the determination on the reexamination request, a decision will be made as to whether the reissue application and the reexamination proceeding are to be merged, or which of the two (if any) is to be stayed, after an order to reexamine has been issued.

The general policy of the Office is to merge the more narrow reexamination proceeding with the broader reissue application examination whenever it is desirable to do so in the interests of expediting the conduct of both proceedings. In making a decision on whether or not to merge the reissue application and the reexamination proceeding, consideration will be given to the status of the reissue application examination at the time the order to reexamination the patent pursuant to 37 CFR 1.525 is mailed. For example, if examination of the reissue application has not begun, or if a rejection by the primary examiner has not been appealed to the Board of Patent Appeals and Interferences (Board) pursuant to 37 CFR 41.31, it is likely that the OPLA will order a merger of the reissue application examination and the reexamination proceeding. If, however, the reissue application is on appeal to the Board or the courts, that fact would be considered in making a decision whether to merge the reissue application and the reexamination proceeding or stay one of them. See *In re Stoddard*, 213 USPQ 386 (Comm'r Pat. 1982); and *In re Scragg*, 215 USPQ 715 (Comm'r Pat. 1982).

If such a merger of the reissue application and the reexamination proceeding is ordered, the order merging them will also require that the patent owner place the same claims in the reissue application and in the reexamination proceeding for purposes of the merged proceedings. An amendment may be required to be filed to do this within a specified time set in the order merging the proceedings.

If the reissue application examination has progressed to a point where a merger of the two proceedings is not desirable at that time, then the reexamination proceeding will generally be stayed

until the reissue application examination is complete on the issues then pending. After completion of the examination on the issues then pending in the reissue application examination, the stay of the reexamination proceeding will be removed and the proceedings will be merged if the reissue application is pending, or the reexamination proceeding will be conducted separately if the reissue application has become abandoned. The reissue application examination will be reopened, if necessary, for merger of the reexamination proceeding therewith.

If a stay of a reexamination proceeding has been removed following a reissue application examination, the first Office action will set a shortened statutory period for response of 1 month unless a longer period for response clearly is warranted by the nature of the examiner's action. The second Office action will normally be final and also have a 1-month period for response. These shortened periods are considered necessary to prevent undue delay in concluding the proceedings and also to proceed with "special dispatch" in view of the earlier stay.

If the reissue application examination and the reexamination proceeding are merged, the issuance of the reissue patent will also serve as the certificate under 37 CFR 1.570 and the reissue patent will so indicate.

C. Reexamination Proceedings Underway, Reissue Application Filed.

When a reissue application is filed after an *ex parte* reexamination request has been filed, the OPLA should be notified as promptly as possible after the reissue application reaches the TC. A determination will be made as to whether reexamination should be ordered. If reexamination is ordered, no first Office action will accompany the decision ordering reexamination. The order and any of the files that are paper files should then be hand delivered to the OPLA.

Where reexamination has already been ordered prior to the filing of a reissue application, the OPLA should be notified as promptly as possible after the reissue application reaches the TC, that the proceedings are ready for consideration of merger. If any of the reexamination file, the reissue application, and the patent file are paper files, they should be hand delivered to the OPLA at the time of the notification to OPLA.

In making a decision on whether or not to merge the reissue application examination and the reexamination proceeding, consideration will be given as to whether issues are raised in the reissue application that would not be proper for consideration in reexamination. In addition, consideration will also be given to the status of the reexamination proceeding. For example, if the reexamination proceeding is on appeal to the Board or to the Court of Appeals for the Federal Circuit, or a Notice of Intent to Issue a Reexamination Certificate was issued for the reexamination, that fact would be considered in making a decision whether to merge the reissue application examination and the reexamination proceeding or stay one of them.

III. EXAMINER ASSIGNMENT

With respect to the appropriate examiner assignment of the merged reexamination/reissue proceeding, see MPEP § 2236.

IV. CONDUCT OF MERGED REISSUE APPLICATION AND REEXAMINATION PROCEEDING

>Where merger is ordered, the patent owner is required to maintain identical amendments in the reissue application and the reexamination file for purposes of the merged proceeding. The maintenance of identical amendments in both files is required as long as the reissue and reexamination proceedings remain merged. See 37 CFR 1.565(d). Where identical amendments are not present in both files at the time merger is ordered, the patent owner will be required to submit an appropriate "housekeeping" amendment placing the same amendments in both proceedings. This may be accomplished by amending either of the two proceedings (the reissue application or the reexamination) or both of them, as appropriate. The patent owner must not address any issue of patentability in the housekeeping amendment. Amendments in a merged reexamination/reissue proceeding are submitted under 37 CFR 1.173, in accordance with reissue practice.<

Where the merger decision indicates that an Office action will follow, the merged proceeding is returned to the examiner immediately after the decision to issue an Office action. Where the merger decision indicates that the patent owner is given 1 month to provide an amendment to make the claims the same in

each file (identical amendments to be placed in all files), the **>CRU SPE or TC QAS< will retain jurisdiction over the merged reexamination proceeding to await submission of the amendment or the expiration of the time to submit the amendment. After the amendment is received and processed by the technical support staff or the time for submitting the amendment expires, the merged proceeding will be returned to the examiner to issue an Office action.

Once the proceeding is returned to the examiner for issuance of an Office action, the examiner should prepare an Office action at the most advanced point possible for the first proceeding. Thus, if the first proceeding is ready for a final rejection and the second proceeding does not provide any new information which would call for a new ground of rejection, the examiner should issue a final rejection for the merged proceeding.

In the event that *>a "housekeeping"< amendment to make the claims the same in each file is required by the merger decision (identical amendments to be placed in all files) but is not timely submitted, any claim that does not contain identical text in all of the merged proceedings should be rejected under 35 U.S.C. 112, paragraph 2, as being indefinite as to the content of the claim, and thus failing to particularly point out the invention.

If a reissue application examination and a reexamination proceeding are merged, the merged examination will be conducted on the basis of the rules relating to the broader reissue application examination. Amendments should be submitted in accordance with the reissue practice under 37 CFR 1.121(i) and 37 CFR 1.173; see MPEP § 1453. The examiner, in examining the merged proceeding, will apply the reissue statute, rules, and case law to the merged proceeding. This is appropriate in view of the fact that the statutory provisions for reissue applications and reissue application examination include provisions equivalent to 35 U.S.C. 305 relating to the conduct of reexamination proceedings.

In any merged reissue application and reexamination proceeding, each Office action issued by the examiner will take the form of a single action which jointly applies to both the reissue application and the reexamination proceeding. Each action will contain identifying data for both the reissue application and the reexamination proceeding, and each action will be physically entered into both files, which will be maintained as separate files.

Any response by the applicant/patent owner in such a merged proceeding must consist of a single response, filed in duplicate for entry in both files (or provide multiple copies if there are multiple reexamination proceedings being merged with a reissue application), and service of copy must be made on any third party reexamination requester. A copy of all Office actions will be mailed to the third party reexamination requester but not to any other third party.

If the applicant/patent owner in such a merged proceeding fails to file a timely and appropriate response to any Office action, the merged proceeding will be terminated. The reissue application will be held abandoned. A NIRC will be issued (see MPEP § 2287), and the Director will proceed to issue a reexamination certificate under 37 CFR 1.570 in accordance with the last action of the Office, unless further action is clearly needed in view of the difference in rules relating to reexamination and reissue proceedings.

If the applicant/patent owner in a merged proceeding files an express abandonment of the reissue application pursuant to 37 CFR 1.138, the next Office action of the examiner will accept the express abandonment, dissolve the merged proceeding, and continue the reexamination proceeding. If the applicant/patent owner files a continued prosecution reissue application (a CPA) of a reissue design application under 37 CFR 1.53(d), whereby the existing reissue design application is considered to be expressly abandoned, this will most likely result in the dissolution of the merged proceeding, a stay of the CPA reissue application, and separate, continued prosecution of the reexamination proceeding.

Where the merged proceeding is dissolved based on abandonment of the reissue application and the reexamination proceeding continues, any grounds of rejection which are not applicable under reexamination should be withdrawn (e.g., based on public use or on sale) and any new grounds of rejection which are applicable under reexamination (e.g., improper broadened claims) should be made by the examiner. The existence of any questions remaining which cannot be considered under reexamination following dissolution of the merged proceeding would be noted by the examiner as not being proper under reexamination pursuant to 37 CFR 1.552(c).

Where the merged proceeding is dissolved based on abandonment of the reissue application and the reexamination proceeding continues, there is no guarantee that any continuation reissue application will be merged with the reexamination proceeding (the continuation reissue application might be stayed pending conclusion of the reexamination). This policy is necessary to prevent the patent owner from filing reissue continuation applications to delay a decision by the Board on rejected claims.

If applicant/patent owner files a request for continued examination (RCE) of the reissue application under 37 CFR 1.114 (which may be filed on or after May 29, 2000 for an application filed on or after June 8, 1995), the reissue application is not considered to be expressly abandoned; rather the finality of the Office action is withdrawn, and the merged proceeding will continue. This is so, because an RCE is not an abandonment of any application, whether it be a reissue application or a non-reissue application.

V. PETITION TO MERGE REISSUE APPLICATION AND REEXAMINATION PROCEEDING OR TO STAY EITHER OF THE TWO BECAUSE OF THE EXISTENCE OF THE OTHER

No petition to merge the reissue application and the reexamination proceeding, or stay one of them, should be filed before an order directing reexamination is issued because the Office will generally, *sua sponte*, make a decision to merge the reissue application and the reexamination proceeding or stay one of them. If any petition to merge the reissue application and the reexamination proceeding, or to stay one of them because of the other, is filed prior to the determination (37 CFR 1.515) and order to reexamine (37 CFR 1.525), it will not be considered, but will be returned to the party submitting the same by the CRU or TC Director, regardless of whether the petition is filed in the reexamination proceeding, the reissue application, or both. This is necessary to prevent premature papers relating to the reexamination proceeding from being filed. The decision returning such a premature petition will be made of record in both the reexamination file and the reissue application file, but no copy of the petition will be retained by the Office. See MPEP § 2267.

The patent owner may file a petition under 37 CFR 1.182 to merge the reissue application and the reexamination proceeding, or stay one of them because of the other, at the time the patent owner's statement under 37 CFR 1.530 is filed or subsequent thereto in the event the Office has not acted prior to that date to merge or stay. If the requester of the reexamination is not the patent owner, that party may petition to merge the reissue application and the reexamination proceeding, or stay **>the reexamination proceeding< because of the *> reissue proceeding<, as a part of a reply pursuant to 37 CFR 1.535, in the event the Office has not acted prior to that date to merge or stay. A petition to merge the reissue application and the reexamination proceeding, or stay one of them because of the other, which is filed by a party other than the patent owner or the requester of the reexamination will not be considered, but will be returned to that party by the CRU or TC Director as being improper under 37 CFR 1.550(g).

**>All petitions to merge or stay which are filed by the patent owner or the third party requester subsequent to the date of the order for reexamination will be referred to the OPLA for decision.<

VI. FEES IN MERGED PROCEEDINGS

Where the proceedings have been merged and a paper is filed which requires payment of a fee (e.g., excess claim fee, extension of time fee, petition fee, appeal fee, brief fee, oral hearing fee), only a single fee need be paid. For example, only one fee need be paid for an appeal brief even though the brief relates to merged multiple proceedings and copies must be filed for each file in the merged proceeding. As to excess claim fees, reissue practice will control.

2286 *Ex Parte* Reeexamination and Litigation Proceedings [R-7]

37 CFR 1.565. Concurrent office proceedings which include an ex parte reexamination proceeding.

*****

(b) If a patent in the process of *ex parte* reexamination is or becomes involved in litigation, the Director shall determine whether or not to suspend the reexamination. See § 1.987 for *inter partes* reexamination proceedings.

*****

35 U.S.C. 302 permits a request for *ex parte* reexamination to be filed "at any time." Requests for *ex parte* reexamination are frequently filed where the patent for which reexamination is requested is involved in concurrent litigation. The guidelines set forth below will generally govern Office handling of *ex parte* reexamination requests where there is concurrent litigation in the Federal courts.

I. COURT->ORDERED/< SANCTIONED REEXAMINATION PROCEEDING, LITIGATION STAYED FOR REEXAMINATION, OR EXTENDED PENDENCY OF REEXAMINATION PROCEEDING CONCURRENT WITH LITIGATION

*>Where a< request for *ex parte* reexamination * indicates (A) that it is filed as a result of >an order by a court or< an agreement by parties to litigation which agreement is sanctioned by a court, or (B) that litigation is stayed for the filing of a reexamination request >, the request< will be taken up by the examiner for decision 6 weeks after the request was filed >, and all aspects of the proceeding will be expedited to the extent possible<. See MPEP § 2241. If reexamination is ordered, the examination following the statement by the patent owner under 37 CFR 1.530 and the reply by the requester under 37 CFR 1.535 will be expedited to the extent possible. Office actions in these reexamination proceedings will normally set a 1-month shortened statutory period for response rather than the 2 months usually set in reexamination proceedings. See MPEP § 2263. **>Response periods< may be extended only upon a >strong< showing of sufficient cause. See MPEP § 2265. >Action on such a proceeding will generally take precedence to any other action taken by the examiner.< See generally *In re Vamco Machine and Tool, Inc.*, 752 F.2d 1564, 224 USPQ 617 (Fed. Cir. 1985); *Gould v. Control Laser Corp.*, 705 F.2d 1340, 217 USPQ 985 (Fed. Cir. 1983); *Loffland Bros. Co. v. Mid-Western Energy Corp.*, 225 USPQ 886 (W.D. Okla. 1985); *The Toro Co. v. L.R. Nelson Corp.*, 223 USPQ 636 (C.D. Ill. 1984); *Digital Magnetic Systems, Inc. v. Ansley*, 213 USPQ 290 (W.D. Okla. 1982); *Raytek, Inc. v. Solfan Systems Inc.*, 211 USPQ 405 (N.D. Cal. 1981); and *Dresser Industries, Inc. v. Ford Motor Co.*, 211 USPQ 1114 (N.D. Texas 1981).

In addition, if (A) there is litigation concurrent with an *ex parte* reexamination proceeding and (B) the reexamination proceeding has been pending for more than one year, the Director or Deputy Director of the Office of Patent Legal Administration (OPLA), Director of the Central Reexamination Unit (CRU), Director of the Technology Center (TC) in which the reexamination is being conducted, or a Senior Legal Advisor of the OPLA, may approve Office actions in such reexamination proceeding setting a one-month or thirty days, whichever is longer, shortened statutory period for response rather than the two months usually set in reexamination proceedings. A statement at the end of the Office action – "One month or thirty days, whichever is longer, shortened statutory period approved," followed by the signature of one of these officials, will designate such approval. It is to be noted that the statutory requirement for "special dispatch" in reexamination often becomes important, and sometimes critical, in coordinating the concurrent litigation and reexamination proceedings.

II. FEDERAL COURT DECISION KNOWN TO EXAMINER AT THE TIME THE DETERMINATION ON THE REQUEST FOR REEXAMINATION IS MADE

If a Federal Court decision *on the merits* of a patent is known to the examiner at the time the determination on the request for *ex parte* reexamination is made, the following guidelines will be followed by the examiner, whether or not the person who filed the request was a party to the litigation. When the initial question as to whether the prior art raises a substantial new question of patentability as to a patent claim is under consideration, the existence of a final court decision of claim *validity* in view of the same or different prior art does not necessarily mean that no new question is present. This is true because of the different standards of proof and claim interpretation employed by the District Courts and the Office. See for example *In re Zletz*, 893 F.2d 319, 322, 13 USPQ2d 1320, 1322 (Fed. Cir. 1989) (manner of claim interpretation that is used by courts in litigation is not the manner of claim interpretation that is applicable during prosecution of a pending application before the PTO) and *In re Etter*, 756 F.2d 852, 225 USPQ 1 (Fed. Cir. 1985) (the 35 U.S.C. 282 presumption of patent validity has no application in reex-

amination proceedings). Thus, while the Office may accord deference to factual findings made by the court, the determination of whether a substantial new question of patentability exists will be made independently of the court's decision on validity as it is not controlling on the Office. A *non-final* holding of claim *invalidity* or unenforceability will not be controlling on the question of whether a substantial new question of patentability is present. A final holding of claim invalidity or unenforceability (after all appeals), however, is controlling on the Office. In such cases, a substantial new question of patentability would *not* be present as to the claims held invalid or unenforceable. See *Ethicon v. Quigg*, 849 F.2d 1422, 7 USPQ2d 1152 (Fed. Cir. 1988).

>Note the following two Federal Circuit decisions involving reexamination proceedings where the court affirmed the Office's rejections even though parallel district court proceeding upheld the claims as valid and infringed. *In re Trans Texas Holdings Corp*., 498 F.3d 1290, 83 USPQ2d 1835 (Fed. Cir. 2007) and *In re Translogic Technology, Inc.*, 504 F.3d 1249, 84 USPQ2d 1929 (Fed. Cir. 2007).

In *Trans Texas*, the patent being reexamined was subject to an infringement suit, in which the district court had issued its claim construction ruling (in a district court opinion) as to the definition of a term. The parties ultimately reached a settlement before trial, and the district court issued an "Order of Dismissal with Prejudice." The patent owner relied on that district court claim construction ruling in a reexamination proceeding, and argued that the Office was bound by that district court claim construction ruling, under the doctrine of issue preclusion. The Federal Circuit stated that issue preclusion could not be applied against the Office based on a district court holding in an infringement proceeding, since the Office was not a party to that earlier infringement proceeding.

In *Translogic*, a district court infringement suit proceeded in parallel with a reexamination proceeding. The district court upheld the validity of the patent in the infringement suit, while the reexamination examiner found the claim combination to be obvious . The examiner's rejection was affirmed by the Board of Patent Appeals and Interferences (Board). The defendant (the alleged infringer) of the infringement suit appealed the district court decision to the Federal Circuit, while the patent owner appealed the Board's decision to the Federal Circuit. The Federal Circuit consolidated the appeals, and then addressed only the patent owner's reexamination appeal from the Board. The Federal Circuit affirmed the examiner's conclusion of obviousness by relying upon and providing an extensive discussion of *KSR International Co. v. Teleflex Inc.*, 550 U.S.___, 82 USPQ2d 1385 (2007).<

Any determination on a request for reexamination which the examiner makes after a Federal Court decision must be reviewed by the Central Reexamination Unit (CRU) **>Supervisory Patent Examiner (SPE)< to ensure that it conforms to the current Office litigation policy and guidelines. See MPEP § 2240.

For a discussion of the policy in specific situations where a Federal Court decision has been issued, see MPEP § 2242.

III. REEXAMINATION WITH CONCURRENT LITIGATION BUT ORDERED PRIOR TO FEDERAL COURT DECISION

In view of the statutory mandate to make the determination on the request within 3 months, the determination on the request based on the record before the examiner will be made without awaiting a decision by the Federal Court. It is not realistic to attempt to determine what issues will be treated by the Federal Court prior to the court decision. Accordingly, the determination on the request will be made without considering the issues allegedly before the court. If an *ex parte* reexamination is ordered, the reexamination will continue until the Office becomes aware that a court decision has issued. At such time, the request will be reviewed in accordance with the guidelines set forth below. The patent owner is required by 37 CFR 1.565(a) to call the attention of the Office to any prior or concurrent proceeding in which the patent is involved or was involved. Thus, the patent owner has an obligation to promptly notify the Office that a decision has been issued in the Federal Court.

IV. FEDERAL COURT DECISION ISSUES AFTER *EX PARTE* REEXAMINATION ORDERED

Pursuant to 37 CFR 1.565(a), the patent owner in an *ex parte* reexamination proceeding must promptly notify the Office of any Federal court decision involving the patent. Where the reexamination proceeding is currently pending and the court decision issues, or

the Office becomes aware of a court decision relating to a pending reexamination proceeding, the order to reexamine is reviewed to see if a substantial new question of patentability is still present. If no substantial new question of patentability is still present, the order to reexamine is vacated by the CRU or TC Director and reexamination is concluded.

A *non-final* Federal Court decision concerning a patent under reexamination shall have no binding effect on a reexamination proceeding.

The issuance of a *final* Federal Court decision upholding validity during an *ex parte* reexamination also will have no binding effect on the examination of the reexamination. This is because the court states in *Ethicon v. Quigg*, 849 F.2d 1422, 1428, 7 USPQ2d 1152, 1157 (Fed. Cir. 1988) that the Office is *not* bound by a court's holding of patent *validity* and should continue the reexamination. The court notes that district courts and the Office use different standards of proof in determining invalidity, and thus, on the same evidence, could quite correctly come to different conclusions. Specifically, invalidity in a district court must be shown by "clear and convincing" evidence, whereas in the Office, it is sufficient to show nonpatentability by a "preponderance of evidence." Since the "clear and convincing" standard is harder to satisfy than the "preponderance" standard, deference will ordinarily be accorded to the factual findings of the court where the evidence before the Office and the court is the same. If sufficient reasons are present, claims held valid by the court may be rejected in reexamination.

On the other hand, a *final* Federal Court holding of invalidity or unenforceability (after all appeals), is binding on the Office. Upon the issuance of a final holding of invalidity or unenforceability, the claims being examined which are held invalid or unenforceable will be withdrawn from consideration in the reexamination. The reexamination will continue as to any remaining claims being examined. Thus, the reexamination will continue if any original, new, or amended claim being examined that was not found invalid or unenforceable by the Court. If all of the claims being examined in the reexamination proceeding are finally held invalid or unenforceable, the reexamination will be vacated by the CRU or TC Director as no longer containing a substantial new question of patentability and the reexamination will be concluded. If not all claims being examined were held invalid (or unenforceable), a substantial new question of patentability may still exist as to the remaining claims. In such a situation, the remaining claims would be examined; and, as to the claims held invalid/unenforceable, form paragraph 22.20 should be used at the beginning of the Office action.

¶ *22.20 Claims Held Invalid By Court, No Longer Being Reexamined*

Claims **[1]** of the **[2]** patent are not being reexamined in view of the final decision of **[3]**. Claim(s) **[1]** was/were held invalid/unenforceable by the **[4]**.

Examiner Note:

1. In bracket 1, insert the claim(s) held invalid.
2. In bracket 2, insert the patentee (e.g., Rosenthal, Schor et al).
3. In bracket 3, insert the decision (e.g., *ABC Corp. v. Smith*, 888 F. 3d 88, 999 USPQ2d 99 (Fed. Cir. 1999) or *XYZ Corp. v. Jones*, 888 F. Supp. 2d 88, 999 USPQ2d 1024 (N.D. Cal. 1999)).
4. In bracket 4, insert the name of the court (e.g., the Court of Appeals for the Federal Circuit, or the Federal District Court).

V. LITIGATION REVIEW AND *APPROVAL

In order to ensure that the Office is aware of prior or concurrent litigation, the examiner is responsible for conducting a reasonable investigation for evidence as to whether the patent for which *ex parte* reexamination is requested has been or is involved in litigation. The investigation will include a review of the reexamination file, the patent file, and the results of the litigation computer search by the STIC.

If the examiner discovers, *at any time* during the reexamination proceeding, that there is litigation or that there has been a federal court decision on the patent, the fact will be brought to the attention of the CRU **>SPE or Technology Center (TC) Quality Assurance Specialist (QAS)< prior to any further action by the examiner. The **>CRU SPE or TC QAS< must review any action taken by the examiner in such circumstances to ensure current Office litigation policy is being followed.

VI. FEDERAL COURT DECISION CONTROLLING IN REEXAMINATION PROCEEDING

Once a federal court has ruled upon the merits of a patent and an *ex parte* reexamination is still appropriate under the guidelines set forth above, the federal court decision will be considered controlling and will

be followed as to claims finally held to be invalid by the court.

2287 Conclusion of *Ex Parte* Reexamination Proceeding [R-7]

Upon conclusion of the *ex parte* reexamination proceeding, the examiner must prepare a "Notice of Intent to Issue *Ex Parte* Reexamination Certificate" (NIRC) by completing form PTOL-469. If appropriate, an examiner's amendment will also be prepared. Where claims are found patentable, reasons must be given for each claim found patentable. See the discussion as to preparation of an examiner's amendment and reasons for allowance at the end of this section. In addition, the examiner must prepare the reexamination file so that the Office of *>Data Management< can prepare and issue a certificate in accordance with 35 U.S.C. 307 and 37 CFR 1.570 setting forth the results of the reexamination proceeding and the content of the patent following the proceeding. See MPEP § 2288.

**>The examiner will so inform his/her Central Reexamination Unit (CRU) Supervisory Patent Examiner (SPE) or Technology Center (TC) Quality Assurance Specialist (QAS) of the conclusion of the reexamination proceeding. The CRU SPE/TC QAS< will convene a panel review conference (see MPEP § 2271.01), and the conference members will review the patentability of the claim(s). If the conference confirms the **>examiner's decision<, a NIRC shall be issued and signed by the examiner, with the two other conferees initialing the NIRC (as "conferee") to indicate their participation in the conference. Both conferees will initial, even though one of them may have dissented from the 3-party conference decision on the patentability of the claim(s). If the conference does not confirm the patentability of the claim(s), the examiner will reevaluate and issue an appropriate Office action rejecting the claim(s), not confirmed as patentable.

A panel review conference is not to be held as to any claim that was in the case (proceeding) at the time the case was reviewed by the Board of Patent Appeals and Interferences (Board) or a federal court. The following example will serve to illustrate this point. In a reexamination proceeding, claims 5-10 are allowed by the examiner, and claims 1-4 are rejected. The rejection of claims 1-4 is then appealed to the Board. The Board reverses the rejection of claims 1-4 and imposes a new ground of rejection of claims 1-4 under 37 CFR 41.50(b). The patent owner then elects further prosecution before the examiner pursuant to 37 CFR 41.50(b)(1) and submits an amended set of claims 1-4. The examiner finds amended claims 1-4 to be allowable and wishes to "allow" the entire case by issuing a NIRC. A panel review conference must be held at this stage of the proceeding. The conferees will review the allowance of amended claims 1-4. The conferees will not, however, review the allowance of claims 5-10, because claims 5-10 were in the case, and before the Board at the time the Board decided the appeal.

A panel review conference is not to be held where the proceeding is to be concluded by the cancellation of all claims. No panel review conference is needed in this instance, as the issuance of the NIRC is essentially ministerial.

Thus, a panel review conference **must** be held in each instance where a NIRC is about to be issued, unless the NIRC is being issued: (A) following and consistent with a decision by the Board of Patent Appeals and Interferences (or court) on the merits of the proceeding; or (B) as a consequence of the patent owner's failure to respond or take other action where such a response or action is necessary to maintain pendency of the proceeding and, as a result of which failure to respond, all of the claims will be canceled.

A NIRC informs the patent owner and any third party requester that the reexamination prosecution has been terminated. The rules do not provide for an amendment to be filed in a reexamination proceeding after prosecution has been terminated. The provisions of 37 CFR 1.312 do *not* apply in reexamination. Any amendment, information disclosure statement, or other paper related to the merits of the reexamination proceeding filed after prosecution has been terminated must be accompanied by a petition under 37 CFR 1.182 to have the amendment considered.

Normally the title of the invention will not need to be changed during reexamination. If a change of the title is necessary, the patent owner should be notified of the need to provide an amendment changing the title as early as possible in the prosecution as a part of an Office action. If all of the claims are found to be patentable and a NIRC has been or is to be mailed, the examiner may change to the title of the invention

only by an examiner's amendment. Changing the title and merely initialing the change is *not* permitted in reexamination.

An examiner's amendment can be made to change the abstract, where the patent owner's narrowing amendments during the prosecution of the reexamination have changed the focus of the invention. An example of this would be where a claim is made more specific during reexamination, and the abstract does not at all focus on the specific limitation that is now required for all the patent claims.

If all of the claims are disclaimed in a patent under reexamination, a certificate under 37 CFR 1.570 will be issued indicating that fact.

I. PREPARATION OF THE CASE FOR PUBLICATION

In preparing the reexamination file for publication of the certificate, the examiner must review the reexamination and patent files (IFW and paper files) to be sure that all the appropriate parts are completed. The review should include completion of the following items:

(A) The IFW file wrapper Search Notes form — The "SEARCHED" and the "SEARCH NOTES" boxes are to be filled in with the classes and subclasses that were actually searched and other areas consulted. See MPEP § 719.05.

(B) The IFW file jacket form — Check to be sure that the necessary data is included thereon. The "Litigation Review" and "Copending Office Proceedings" boxes should be completed to ensure that the Office is aware of prior or concurrent litigation and Office proceedings.

(C) The Bibliographic Data Sheet — Check to be sure that the data included thereon is correct and the blank spaces have been initialed.

(D) The Issue Classification IFW form — The form must be completed to set forth the status of each claim and the final claim numbers. The appropriate information must be included in the "Issue Classification" box. The current international classification and U.S. classification must be inserted for both the original classification and all cross-references. Completion of the Issue Classification box is required, even if all of the claims are canceled.

An appropriate drawing figure is to be indicated for printing on the certificate cover sheet and in the *Official Gazette*. In addition, a representative claim which has been reexamined is to be indicated for publication in the *Official Gazette*. The claim or claims for the *Official Gazette* should be selected in accordance with the following instructions:

(A) The broadest claim should be selected;

(B) Examiners should ordinarily designate but one claim on each invention, although when a plurality of inventions are claimed in one application, additional claims up to a maximum of five may be designated for publication. In the case of reexamination, the examiner must select only one claim;

(C) A dependent claim should not be selected unless the independent claim from which it depends is also printed. In the case where a multiple dependent claim is selected, the entire chain of claims for one embodiment should be listed. In the case of reexamination, a dependent patent claim may be selected where the independent original patent claim has been canceled; in such a case, the dependent claim would be printed while the independent claim would not be printed; and

(D) In reissue applications, the broadest claim with changes or the broadest additional reissue claim should be selected for printing.

When recording this information in the box provided, the following items should be kept in mind:

(A) Write the claim number clearly in black ink;

(B) If multiple claims are selected, the claim numbers should be separated by commas; and

(C) The claim designated must be referred to by using the renumbered patent claim number rather than the original application claim number.

If the patent owner desires the names of the attorneys or agents, or law firm, to be printed on the certificate, a separate paper limited to this issue which lists the names and positively states that they should be printed on the certificate must be filed. A mere power of attorney or change of address is not a request that the name appear on the certificate.

The examiner must also complete a checklist, form PTO-1516, for the reexamination file which will be forwarded to the Office of *>Data Management< identifying information used in printing the reexamination certificate. A copy of this form may be

obtained from the **>CRU SPE or TC QAS or their support staff<.

The examiner should inspect the title report, or patent abstract of title, in the file. If the title report, or patent abstract of title, indicates a title in the inventors, but the patent copy shows an assignment to an assignee, a telephone call can be made to the patent owner, and the patent owner can be asked to submit a statement under 37 CFR 3.73(b) indicating that title is in the assignee (i.e., it has not reverted back to the inventors). See MPEP § 320.

After the examiner has prepared the NIRC and attachments for mailing, completed the review and preparation of the case as discussed above, and completed the Examiner Checklist form PTOL-1516, the reexamination and patent files will be given to the reexamination clerk. The reexamination clerk will complete the Reexamination Clerk Checklist form PTO-1517. The reexamination clerk will revise and update the files. The clerk should check to see if any changes in especially:

(A) the title;
(B) the inventor;
(C) the assignee;
(D) the continuing data;
(E) the foreign priority;
(F) the address of the owner's attorney; and
(G) the requester's address

have been properly entered in the reexamination and patent files (in the file history of an IFW file and on the face of a paper file) and properly entered in the PALM data base. After the clerk has finished his/her processing, he or she will forward the reexamination proceeding to the **>CRU SPE or TC QAS< for review. After approval by the **>CRU SPE or TC QAS<, the reexamination clerk will mail the NIRC with attachments and forward the reexamination proceeding to the OPLA (see MPEP § 2289), which will ultimately forward same to the Office of *>Data Management< for printing.

II. REEXAMINATION PROCEEDINGS IN WHICH ALL THE CLAIMS ARE CANCELED

There will be instances where all claims in the reexamination proceeding are to be canceled, and a NIRC will be issued indicating that fact. This would occur where the patent owner fails to timely respond to an Office action, and all live claims in the reexamination proceeding are under rejection. It would also occur where all live claims in the reexamination proceeding are to be canceled as a result of a Board decision affirming the examiner, and the time for appeal to the court and for requesting reconsideration or modification has expired.

Prior to canceling the claims and issuing the NIRC, the examiner should telephone the patent owner to inquire if a timely response, timely appeal, etc., was filed with the Office so as to make certain that a timely response has not been misdirected within the Office. Where the patent owner indicates that no such filing was made, or where the patent owner cannot be reached, the examiner will proceed to issue a NIRC terminating prosecution.

A panel review conference is not to be held, because the proceeding is to be concluded by the cancellation of all claims. Rather, the examiner will issue a NIRC action, and as an attachment to the NIRC, the examiner will draft an examiner's amendment canceling all live claims in the reexamination proceeding. In the examiner's amendment, the examiner should point out why the claims have been canceled. For example, the examiner might make one of the two following statements, as appropriate:

> "Claims 1-5 and 6-8 (all live claims in the proceeding) were subject to rejection in the last Office action mailed 9/9/99. Patent owner failed to timely respond to that Office action. Accordingly claims 1-5 and 6-8 have been canceled. See 37 CFR 1.550(d) and MPEP § 2266."

> "The rejection of claims 1-5 and 6-8 (all live claims in the proceeding) has been affirmed in the Board decision of 9/9/99, and no timely appeal to the court has been filed. Accordingly claims 1-5 and 6-8 have been canceled."

If the patent owner was reached by telephone and indicated that there was no timely filing (as discussed above), the attachment to the NIRC will make the telephone interview of record.

In order to physically cancel the live claims in the file history, brackets should be placed around all the live claims on a copy of the claims printed from the file history, and the copy then scanned into the IFW file history. All other claims in the proceeding should have previously been either replaced or canceled.

The examiner will designate a cancelled original patent claim, to be printed in the *Official Gazette*, on

the Issue Classification IFW form in the appropriate place for the claim chosen.

III. HANDLING OF MULTIPLE DEPENDENT CLAIMS

The following discussion provides guidance on how to treat multiple dependent claims when preparing a reexamination proceeding for publication of the reexamination certificate.

Assume Patent X issues with the following claims:
Patent claims:

1. A method of sintering a particulate ceramic preform, comprising heating it above 500 degrees F, cooling it to 100 degrees F, and repeating the heating and cooling steps six times.

2. The method of **claim 1**, where a pressure of 300 - 400 psi is applied during the heating steps.

3. The method of **claim 1 or claim 2**, where the pressure applied during the heating steps is 350 - 375 psi.

4. The method of **claim 3**, where the pressure applied during the heating steps is 360 - 365 psi.

5. The method of **claim 1**, where the preform contains lithium and magnesium oxides.

6. The method of **claim 5**, where the preform contains sodium fluoride.

7. The method of **claim 1 or claim 5**, where the sintered preform is machined into a lens.

A reexamination request is then filed for Patent X, and at the point when the claims are ready for issuance of the certificate, the following claims are present in the reexamination file.

In reexamination:

1. (Text Unchanged) A method of sintering a particulate ceramic preform, comprising heating it above 500 degrees F, cooling it to 100 degrees F, and repeating the heating and cooling steps six times.

2. (Amended) The method of **claim 1 or claim 8**, where the sintered preform is machined into a lens.

3. (Amended) The method of **[claim 1 or] claim 2**, where the pressure applied during the heating steps is 350 - 375 psi.

4. (Amended) The method of **claim 3 or claim 8**, where the pressure applied during the heating steps is 355 [360] - 365 psi.

5. (Text Unchanged) The method of **claim 1**, where the preform contains lithium and magnesium oxides.

6. (Amended) The method of **claim 8[5]**, where the preform contains sodium fluoride.

7. (Text Unchanged) The method of **claim 1 or claim 5**, where the sintered preform is machined into a lens.

8. (New) A method of sintering a particulate fluoride ceramic preform comprising heating it above 500 degrees F, cooling it to 100 degrees F, and repeating the heating and cooling steps six times.

The status of the claims would be set forth as follows:

Part 1(h) of the Notice of Intent to Issue *Ex Parte* Reexamination Certificate Form PTOL-469 (NIRC) would be completed as follows.

Patent claims confirmed: 1, 2/1, 5, 7
Patent claims amended: 3, 4/3,
Patent claims canceled: 3/1, 6/5
New claims patentable: 2/8, 4/8, 6/8, 8

The parts of the Examiner's checklist (Form PTO-1516) directed to the status of the claims would be completed as follows.

7. Patent claims confirmed: 1, 5, 7
11. Patent claims canceled: None
12. Patent claims amended: 2, 3, 4 and 6
13. Patent claims dependent on amended: None
14. New claims patentable: 8

Looking at claim 2:

For the purpose of the NIRC, the addition of a claim of the multiple dependency is viewed as adding a new claim for which protection is now to be provided. Thus, prior to reexamination, only the subject matter of claim 2/1 was protected. As a result of reexamination, claim 2/8 has been added, and its subject matter is now protected. Thus, claim 2/8 is designated as a new claim. Claim 2/1 has not changed as to its content and its scope of protection, and is designated as a confirmed claim.

For the purpose of the Examiner's checklist, the addition or deletion of a claim of the multiple dependency is viewed simply as amending the claim,

because of the way claims are printed on the certificate. Thus, claim 2 is designated as an amended claim and is simply printed on the certificate in its amended form as:

2. The method of claim 1 or claim 8, where the sintered preform is machined into a lens.

Looking at claim 3:

For the purpose of the NIRC, the deletion of a claim of the multiple dependency is viewed as canceling the claim deleted, and protection is no longer provided for the claim as dependent from the deleted claim. Thus, prior to reexamination, the subject matter of claims 3/1 and 3/2 was protected. As a result of reexamination, claim 3/1 has been deleted, and its subject matter is no longer protected. Thus, claim 3/1 is designated as a canceled claim. Claim 3/2 has not changed as to its content and its scope of protection, and is designated as a confirmed claim.

For the purpose of the Examiner's checklist, the addition or deletion of a claim of the multiple dependency is viewed simply as amending the claim, because of the way claims are printed on the certificate. Thus, claim 3 is designated as an amended claim and is simply printed on the certificate in its amended form as:

3. The method of [claim 1 or] claim 2, where the pressure applied during the heating steps is 350 - 375 psi.

Looking at claim 4:

For the purpose of the NIRC, the addition of a claim of the multiple dependency is viewed as adding a new claim for which protection is now to be provided. Thus, prior to reexamination, only the subject matter of claim 4/3 was protected. As a result of reexamination, claim 4/8 has been added, and its subject matter is now protected. Thus, claim 4/8 is designated as a new claim. Claim 4/3 has changed as to its content and its scope of protection due to the expanding of the pressure range from 360 - 365 psi to 355 - 365 psi, and claim 4/3 is designated as an amended claim.

For the purpose of the Examiner's checklist, the addition or deletion of a claim of the multiple dependency is viewed simply as amending the claim, because of the way claims are printed on the certificate. Thus, claim 4 is designated as an amended claim and simply printed on the certificate in its amended form as:

4. (Amended) The method of claim 3 or claim 8, where the pressure applied during the heating steps is 355 [360] - 365 psi.

Looking at claim 6:

For the purpose of the NIRC, prior to reexamination, the subject matter of claim 6/5 was protected and claim 6/8 did not exist. As a result of reexamination, claim 6/5 has been deleted and claim 6/8 has been added. Thus, claim 6/5 is designated as a canceled claim, and claim 6/8 is designated as a new claim.

For the Examiner's checklist, claim 6 is designated as an amended claim and is simply printed on the certificate in its amended form as:

6. (Amended) The method of claim 8 [5], where the preform contains sodium fluoride.

Looking at claim 7:

It is unchanged as to its text. Claim 7 remains dependent on claim 1 or claim 5, as it did prior to reexamination. Thus, both claims 7/1 and 7/5 are confirmed. Claims 7/1 and 7/5 are listed in the "Confirmed" part of the NIRC. They are not listed separately, but rather simply as "7." This is because the entirety of claim 7 has been confirmed.

As to the Examiner's checklist, claim 7, being unchanged as to its text and not being dependent on an amended claim, is simply listed in the "Confirmed" part of the checklist. Claim 7 will not be printed on the certificate, but will simply be listed as one of the confirmed claims.

IV. REEXAMINATION REMINDERS

The following items deserve special attention. The examiner should ensure they have been correctly completed or followed before forwarding the case to the Legal Instrument Examiner (LIE).

(A) All patent claims for which a substantial new question of patentability has been found must have been examined. See MPEP § 2243.

(B) No renumbering of patent claims is permitted. New claims may require renumbering. See MPEP § 2250.

(C) All amendments to the description and claims must conform to requirements of 37 CFR 1.530(d)-(j). This includes any changes made by Examiner's Amendment. If a portion of the text is amended more than once, each amendment should indicate all of the changes (insertions and deletions) in relation to the current text in the patent under reexamination. See MPEP § 2250.

(D) The prior art must be listed on a form PTO 892, PTO/SB/08A or 08B, or PTO/SB/42 (or on a form having a format equivalent to one of these forms). These forms must be properly completed. See MPEP § 2257.

(E) The examiner and reexamination clerk checklists PTO-1516 and PTO-1517 must be *entirely* and *properly* completed. A careful reading of the instructions contained in these checklists is essential. The clerical checklist is designed as a check and review of the examiner's responses on the examiner checklist. Accordingly, the reexamination clerk should personally review the file before completing an item. The reexamination clerk should check to make certain that the responses to all related items on both checklists are in agreement.

(F) Multiple pending reexamination proceedings are often merged. See MPEP § 2283.

(G) Where the reexamination proceeding is copending with an application for reissue of the patent being reexamined, the files must have been forwarded to the Office of Patent Legal Administration (OPLA) for a consideration of potential merger, with a decision (by a Senior Legal Advisor or Special Projects Examiner) on the question being present in the reexamination file. See MPEP § 2285.

(H) Reasons for patentability and/or confirmation are required for each claim found patentable. See below.

(I) There is no issue fee in reexamination. See MPEP § 2233.

(J) The patent claims may not be amended nor new claims added after expiration of the patent. See MPEP § 2250.

(K) Original drawings cannot be physically changed. All drawing amendments must be presented on new sheets. The examiner may have the draftsperson review the new sheets of drawings if the examiner would like the draftsperson's assistance in identifying errors in the drawings. A draftsperson's "stamp" to indicate approval is no longer required on patent drawings, and these stamps are no longer to be used by draftspersons. See MPEP § 2250.01.

(L) An amended or new claim may not enlarge the scope of the patent claims. See MPEP § 2250.

(M) If the patent has expired, all amendments to the patent claims and all claims added during the proceeding must be withdrawn. Further, all presently rejected and objected-to claims are canceled by examiner's amendment. See MPEP § 2250, subsection III, Amendment after the Patent Has Expired.

V. EXAMINER'S AMENDMENT

Where it is necessary to amend the patent in order to place the proceeding in condition to issuance of a reexamination certificate, the examiner may request that the patent owner provide the amendment(s), or the examiner may make the amendments, with the patent owner's approval, by a formal examiner's amendment. If the changes are made by an examiner's amendment, the examiner's amendment must comply with the requirements of 37 CFR 1.530(d)-(j) in amending the patent. Thus, the examiner's amendment requires presentation of the full text of any paragraph or claim to be changed, with the 37 CFR 1.530(f) markings. The exception for examiner's amendments set forth in 37 CFR 1.121(g) does not apply to examiner's amendments in reexamination proceedings. See MPEP § 2250. The only **exception** to the full text presentation requirement is that an entire claim or an entire paragraph of specification may be deleted from the patent by a statement deleting the claim or paragraph without the presentation of the text of the claim or paragraph.

>If a patent expires during the pendency of a reexamination proceeding for that patent, all amendments to the patent claims and all claims added during the proceeding must be withdrawn. The examiner's amendment is to include a statement such as:

"As the patent being reexamined has expired during the pendency of the present reexamination proceeding, all amendments made during the proceeding are improper, and are hereby expressly withdrawn."

If it has not previously been done in the proceeding, a diagonal line should be drawn across a copy of all amended and new claims (and text added to the specification) residing in the amendment papers, and scanned into the IFW. <

Where an examiner's amendment is prepared, Box 7 of form PTOL-469 (Notice of Intent to Issue *Ex Parte* Reexamination Certificate) is checked, and form paragraph 22.06 is used to provide the appropriate attachments.

¶ *22.06 Examiner's Amendment Accompanying Notice of Intent To Issue Ex Parte Reexamination Certificate*

An examiner's amendment to the record appears below. The changes made by this examiner's amendment will be reflected in the reexamination certificate to issue in due course.

[1]

VI. REASONS FOR PATENTABILITY AND/OR CONFIRMATION

Reasons for patentability must be provided, unless all claims are canceled in the proceeding. Box 2 of form PTOL-469 is checked, and the reasons are provided as an attachment. In the attachment to the NIRC, the examiner should indicate why the claims found patentable in the reexamination proceeding are clearly patentable over the cited patents or printed publications. This is done in a manner similar to that used to indicate reasons for allowance in an application. See MPEP § 1302.14. Where the record is clear as to why a claim is patentable, the examiner may refer to the particular portions of the record which clearly establish the patentability of that claim.

The reasons for patentability may be set forth on form PTOL-476, entitled "REASONS FOR PATENTABILITY AND/OR CONFIRMATION." However, as a preferred alternative to using form PTOL-476, the examiner may instead use form paragraph 22.16.

¶ *22.16 Reasons For Patentability and/or Confirmation*

STATEMENT OF REASONS FOR PATENTABILITY AND/OR CONFIRMATION

The following is an examiner's statement of reasons for patentability and/or confirmation of the claims found patentable in this reexamination proceeding: **[1]**

Any comments considered necessary by PATENT OWNER regarding the above statement must be submitted promptly to avoid processing delays. Such submission by the patent owner should be labeled: "Comments on Statement of Reasons for Patentability and/or Confirmation" and will be placed in the reexamination file.

Examiner Note:

This form paragraph may be used as an attachment to the Notice of Intent to Issue *Ex Parte* Reexamination Certificate, PTOL-469 (item number 2).

Original patent claims that are found patentable in a reexamination proceeding are generally to be designated as "confirmed" claims, while new claims and amended patent claims are generally to be designated as "patentable" claims. However, for purposes of the examiner setting forth reasons for patentability or confirmation, the examiner may use "patentable" to refer to any claim that defines over the cited patents or printed publications. There is no need to separate the claims into "confirmed" and "patentable" categories when setting forth the reasons.

Obviously, where all claims are canceled in the proceeding, no reasons for patentability are provided.

Any "Comments on Statement of Reasons for Patentability and/or Confirmation" which are received will be placed in the reexamination file, without comment. This will be done even where the reexamination certificate has already issued.

>

2287.01 Examiner Consideration of Submissions After a NIRC [R-7]

The rules do not provide for an amendment to be filed in a reexamination proceeding after a Notice of Intent to Issue Ex Parte Reexamination Certificate (NIRC) has been issued. Note that 37 CFR 1.312 does not apply in a reexamination proceeding. Any amendment, information disclosure statement, or other paper related to the merits of the reexamination proceeding filed after the NIRC must be accompanied by a petition under 37 CFR 1.182. The petition must be granted, in order to have the amendment, information disclosure statement, or other paper related to the merits considered. Where an amendment, information disclosure statement, or other paper related to the merits of the reexamination proceeding is filed after the NIRC, and the accompanying petition under 37 CFR 1.182 is granted, the examiner will reconsider the case in view of the new information, and if appropriate, will reopen prosecution. See MPEP § 2256 for a detailed discussion of the criteria for obtaining entry and consideration of an information disclosure statement filed after a NIRC.

Any "Comments on Statement of Reasons for Patentability and/or Confirmation" which are received will be placed in the reexamination file, without comment. This will be done even where the reexamination certificate has already issued.<

2288 Issuance of *Ex Parte* Reexamination Certificate [R-7]

35 U.S.C. 307. Certificate of patentability, unpatentability, and claim cancellation.

(a) In a reexamination proceeding under this chapter, when the time for appeal has expired or any appeal proceeding has terminated, the Director will issue and publish a certificate canceling any claim of the patent finally determined to be unpatentable, confirming any claim of the patent determined to be patentable, and incorporating in the patent any proposed amended or new claim determined to be patentable.

*****

*37 CFR 1.570. **>Issuance and publication of ex parte reexamination certificate concludes ex parte reexamination proceeding.*

(a) To conclude an *ex parte* reexamination proceeding, the Director will issue and publish an *ex parte* reexamination certificate in accordance with 35 U.S.C. 307 setting forth the results of the *ex parte* reexamination proceeding and the content of the patent following the *ex parte* reexamination proceeding.

(b) An *ex parte* reexamination certificate will be issued and published in each patent in which an *ex parte* reexamination proceeding has been ordered under § 1.525 and has not been merged with any *inter partes* reexamination proceeding pursuant to § 1.989(a). Any statutory disclaimer filed by the patent owner will be made part of the *ex parte* reexamination certificate.<

(c) The *ex parte* reexamination certificate will be mailed on the day of its date to the patent owner at the address as provided for in § 1.33(c). A copy of the *ex parte* reexamination certificate will also be mailed to the requester of the *ex parte* reexamination proceeding.

(d) **>If an *ex parte* reexamination certificate has been issued and published which cancels all of the claims of the patent, no further Office proceedings will be conducted with that patent or any reissue applications or any reexamination requests relating thereto.<

(e) If the *ex parte* reexamination proceeding is terminated by the grant of a reissued patent as provided in § 1.565(d), the reissued patent will constitute the *ex parte* reexamination certificate required by this section and 35 U.S.C. 307.

(f) A notice of the issuance of each *ex parte* reexamination certificate under this section will be published in the *Official Gazette* on its date of issuance.

Since abandonment is not possible in a reexamination proceeding, a reexamination certificate will be issued >and published< at the conclusion of the proceeding in each patent in which a reexamination proceeding has been ordered under 37 CFR 1.525 except where the reexamination has been concluded by vacating the reexamination proceeding or by the grant of a reissue patent on the same patent in which case the reissue patent also serves as the reexamination certificate.

Where the reexamination is to be concluded for a failure to timely respond to an Office action, see MPEP § 2266.

The reexamination certificate will set forth the results of the proceeding and the content of the patent following the reexamination proceeding. The certificate will:

(A) cancel any patent claims determined to be unpatentable;

(B) confirm any patent claims determined to be patentable;

(C) incorporate into the patent any amended or new claims determined to be patentable;

(D) make any changes in the description approved during reexamination;

(E) include any statutory disclaimer or terminal disclaimer filed by the patent owner;

(F) identify unamended claims which were held invalid on final holding by another forum on any grounds;

(G) identify any patent claims not reexamined;

(H) be mailed on the day it is dated to the patent owner at the address provided for in 37 CFR 1.33(c) and a copy will be mailed to the third party requester; and

(I) identify patent claims, dependent on amended claims, determined to be patentable.

If a certificate issues >and publishes< which cancels all of the claims of the patent, no further Office proceedings will be conducted with regard to that patent or any reissue application or reexamination request directed thereto. >However, in an extremely rare situation in which a reissue application is copending with a reexamination proceeding in which a reexamination certificate subsequently issues cancelling all claims of the patent, the patent owner may file a petition under 37 CFR 1.183 requesting waiver of the provisions of 37 CFR 1.570(d), to address claims that were pending in the reissue application prior to the issuance of the certificate. Any such petition must be accompanied by a paper cancelling any claim within the scope of the claims canceled by the certificate and pointing out why the claims remaining in the reissue application can be patentable, despite the cancellation of all the patent claims by certificate, i.e., why the

remaining claims are patentable over the cancelled claims. Such a paper will be available to the examiner, should the petition be granted.< See 37 CFR 1.570(d).

If a reexamination proceeding is concluded by the grant of a reissued patent as provided for in 37 CFR 1.565(b), the reissued patent will constitute the reexamination certificate required by 35 U.S.C. 307 and this section. See 37 CFR 1.570(e).

A notice of the issuance of each reexamination certificate will be published in the *Official Gazette* on its date of issuance in a format similar to that used for reissue patents. See 37 CFR 1.570(f) and MPEP § 2291.

2289 Reexamination Review [R-7]

All reexamination cases are monitored and reviewed in the Central Reexamination Unit (CRU) or Technology Center (TC) by the **>CRU Supervisory Patent Examiner (SPE) or TC Quality Assurance Specialist (QAS)<, paralegal or other technical support who might be assigned as backup at several stages during the prosecution. This is done to ensure that practice and procedure unique to reexamination has been carried out for the reexamination proceeding. In addition to the *>CRU SPE or TC QAS< review of the reexamination cases, a a panel review is made prior to issuing Office actions as set forth in MPEP § 2271.01.

After a Notice of Intent to Issue *Ex Parte* Reexamination Certification (NIRC) has been issued and prosecution has been terminated, all reexamination cases go through a screening process currently performed in the Office of Patent Legal Administration (OPLA) for obvious errors and proper preparation in order to issue a reexamination certificate.

The above identified review processes are appropriate vehicles for correcting errors, identifying problem areas and recognizing trends, providing information on the uniformity of practice, and providing feedback to the Office personnel that process and examine reexamination cases.

2290 Format of *Ex Parte* Reexamination Certificate [R-5]

An *ex parte* reexamination certificate is issued at the close of each *ex parte* reexamination proceeding in which reexamination has been ordered under 37 CFR 1.525, except for the following two cases:

(A) The *ex parte* reexamination proceeding is merged with a reissue application pursuant to 37 CFR 1.565(d). If the *ex parte* reexamination proceeding is concluded by the grant of a reissue patent, the reissue patent will constitute the reexamination certificate;

(B) The *ex parte* reexamination proceeding is merged with an *inter partes* reexamination proceeding pursuant to 37 CFR 1.989(a). If the *ex parte* reexamination proceeding is to be concluded as part of a merged proceeding containing an *inter partes* reexamination proceeding, a single reexamination certificate will issue for both proceedings; see MPEP § 2690.

The *ex parte* reexamination certificate is formatted much the same as the title page of current U.S. patents.

The certificate is titled "*Ex Parte* Reexamination Certificate." The title is followed by an "ordinal" number in parentheses, such as "(235th)," which indicates that it is the two hundred and thirty fifth *ex parte* reexamination certificate that has issued. *Inter partes* reexamination certificates are numbered in a separate and new ordinal sequence, beginning with "(1st)." *Ex parte* reexamination certificates continue the ordinal numbering sequence that has already been established for *ex parte* reexamination certificates.

The *ex parte* reexamination certificate number will always be the patent number of the original patent followed by a two-character "kind code" suffix. The first letter of the "kind code" suffix is "B" for reexamination certificates published prior to January 2, 2001, and "C" for reexamination certificates published on or after January 2, 2001. The second letter of the "kind code" suffix is the number of the reexamination proceeding of that patent, and thus shows how many times that patent has been reexamined.

Note that where the first reexamination certificate was a "B1' certificate and a second reexamination certificate then issues, the second reexamination certificate will be designated "C2" and NOT "C1." Thus, by looking at the number following the "C," one will be able to ascertain the number of reexamination certificates that preceded the certificate being viewed, i.e., how many prior reexamination certificates have been issued for the patent. (If this were not the practice and C1 were used, one would not be able to ascer-

tain from the number on the certificate how many B certificates came before.)

It should also be noted that the next higher number will be given to the reexamination proceeding for which the reexamination certificate is issued, regardless of whether the proceeding is an *ex parte* reexamination or an *inter partes* reexamination proceeding.

See MPEP § 901.04(a) for a complete list of the kind codes used by the United States Patent and Trademark Office.

The certificate denotes the date the certificate was issued at INID code [45] (see MPEP § 901.04). The title, name of inventor, international and U.S. classification, the abstract, and the list of prior art documents appear at their respective INID code designations, much the same as is presently done in utility patents.

The primary differences, other than as indicated above, are:

(A) the filing date and number of the request is preceded by "Reexamination Request;"

(B) the patent for which the certification is now issued is identified under the heading "Reexamination Certificate for"; and

(C) the prior art documents cited at INID code [56] will be only those which are part of the reexamination file and cited on forms ** PTO/SB/08A or 08B, or PTO/SB/42 (or on a form having a format equivalent to one of these forms) (and the documents have not been crossed out because they were not considered) and PTO-892.

Finally, the certificate will identify the patent claims which were confirmed as patentable, canceled, disclaimed, and those claims not examined. Only the status of the confirmed, canceled, disclaimed, and not examined claims will be indicated in the certificate. The text of the new and amended claims will be printed in the certificate. Any new claims will be printed in the certificate completely in italics, and any amended claims will be printed in the certificate with italics and bracketing indicating the amendments thereto. Any prior court decisions will be identified, as well as the citation of the court decisions.

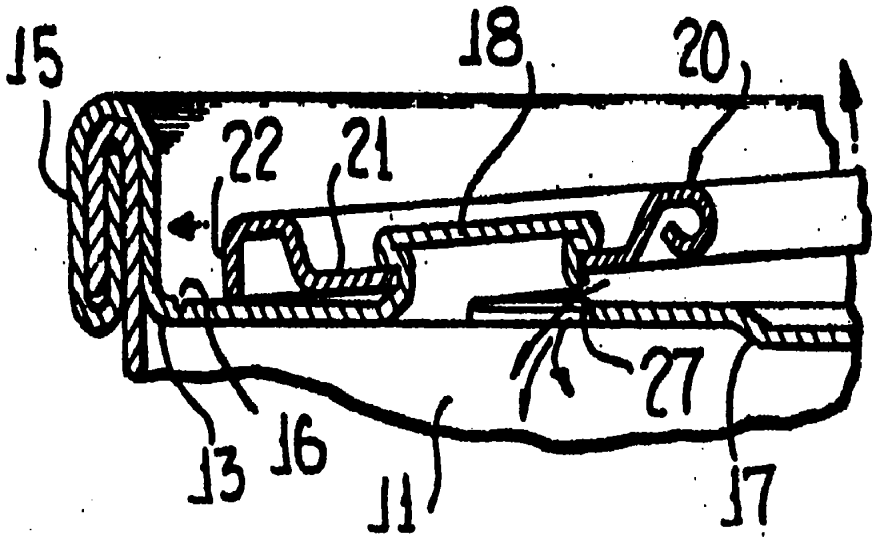
Primary Examiner—George T. Hall

[57] **ABSTRACT**

This disclosure has to do with an easy opening container end wherein substantially the entire end panel is removed. The removable panel portion has rigidly attached thereto a pull tab which is first utilized as a lever to obtain the initial rupture of the end panel and then as a handle to tear out the removable panel portion. The removable panel portion is provided with a weakening line immediately adjacent the connection between the pull tab and the removable panel portion for the purpose of first venting the interior of a container and then forming a hinge which will permit the necessary pivoting of the pull tab relative to the end panel.



REEXAMINATION CERTIFICATE ISSUED UNDER 35 U.S.C. 307.

THE PATENT IS HEREBY AMENDED AS INDICATED BELOW.

Matter enclosed in heavy brackets appeared in the patent, but has been deleted and is no longer a part of the patent; matter printed in italics indicates additions made to the patent.

AS A RESULT OF REEXAMINATION, IT HAS BEEN DETERMINED THAT:

The patentability of claims 1–10, 16, 18, 19 and 21–54 is confirmed.

Claims 11–15, 17 and 20 are determined to be patentable as amended:

11. In a container end including an end panel defined by an upstanding chuck wall, a [weakening] *score* line formed in said end panel and defining a removable panel portion, said [weakening] *score* line including a starting portion disposed closely adjacent said chuck wall, a pull tab having a nose for engaging said panel along said [weakening] *score* line starting portion for effecting the ruputre of said panel in the removal of said panel portion, and securing means securing said pull tab to said panel; the improvement comprising said securing means rigidly securing said pull tab to said panel portion and including hinge forming means in said removable panel portion for facilitating the hinging of said pull tab relative to said end panel to rupture said end panel along said [weakening] *score* line starting portion.

12. The container end of claim 11 wherein said hinge forming means includes a generally U-shaped [weakening] *score* line opening towards said [weakening] *score* line starting portion.

13. The container end of claim 11 wherein said hinge forming means includes a generally U-shaped [weakening] *score* line opening towards said [weakening] *score* line starting portion and having terminal ends directed away from said [weakening] *score* line starting portion for preventing the accidental tearing out of a narrow portion only of said removable panel portion between said [weakening] *score* lines.

14. The container end of claim 11 wherein said *score* line [of weakening] includes a generally U-shaped central portion and diverging adjacent portions.

15. The assembly of claim 1 wherein said removable panel portion is defined by a second *score* line [of weakening] formed separate and apart from the first-mentioned *score* line [of weakening], and said *score* lines [of weakening] define an intermediate strap-like hinge strip.

17. In a container, the combination of:

a container wall of sheet material;

a first *score* line [of weakness] in said container wall defining a tear strip manually removable therefrom;

a second *score* line [of weakness] in said container wall adjacent said first *score* line [of weakness] and defining a hinge, said hinge being spaced from said first *score* line [of weakness] by a portion of said tear strip;

a *separate* tab lying at least partialy within the area of said tear strip, said tab having a handle end and a force applying end with the force applying end lying at a preselected location closely adjacent said first *score* line [of weakness]; and

means integral with said tear strip for securing said tab to said tear strip, movement of said handle end of said tab urging said force applying end firmly against said container wall to cause hinged movement of said portion of said container wall about said hinge to initiate severance of the tear strip along said first *score* line [of weakness].

20. A combination as defined in claim 18 wherein said hinge lies intermediate said last mentioned means and said first *score* line [of weakness] and said preselected location is on said tear strip.

(57) **ABSTRACT**

A particulate filled fluoropolymeric matrix composite article and method of making the same is presented. Preferably, the article comprises an electrical substrate material. The method for making the particulate filled polymeric matrix composite film includes mixing a polymeric matrix material with a dispersion of particulate filler in a carrier liquid to form a casting composition and adjusting the viscosity of the casting composition to retard separation of the particulate filler from the composition. A layer of the viscosity-adjusted casting composition is cast on a substrate and the layer is consolidated to form the particulate filled polymer matrix composite film. Films made by the method include very thin, e.g. less than 1.0 mil, fluoropolymeric matrix films highly filled with very small diameter, preferably spherical, particles for use as, e.g. dielectric substrate materials in laminar electrical circuits.

REEXAMINATION CERTIFICATE ISSUED UNDER 35 U.S.C. 307

THE PATENT IS HEREBY AMENDED AS INDICATED BELOW.

Matter enclosed in heavy brackets [ ] appeared in the patent, but has been deleted and is no longer a part of the patent; matter printed in italics indicates additions made to the patent.

AS A RESULT OF REEXAMINATION, IT HAS BEEN DETERMINED THAT:

Claims **1–40** are cancelled.

New claims **41–53** are added and determined to be patentable.

41. A particulate filled fluoropolymeric matrix composite circuit material, comprising:

(1) an electric substrate including a nonfibrillated fluoropolymer matrix and about 15 to about 95 volume percent filler particles distributed throughout the matrix, said particles having a maximum equivalent spherical diameter of less than about 10 μm, said filler particles comprising inorganic filler particles treated with a coating selected from the group consisting of silane coatings, zirconate coatings, and titanate coatings;

(2) a layer of metal being disposed on at least one surface of said substrate; and

(3) said substrate being formed by a casting composition, wherein the viscosity of said casting composition is adjusted by a polymeric viscosity modifier to adjust the viscosity of the casting composition to retard separation of the particulate filler from the composition to provide a stabilized, homogeneous casting composition, said polymeric viscosity modifier being substantially removed after the completion of processing, and wherein a surfactant is added to said casting composition to modify the surface tension of the carrier liquid so that the carrier liquid wets the filler particles.

42. The circuit material of claim 41, wherein the fluoropolymer comprises polytetrafluoroethylene.

43. The circuit material of claim 41, wherein the fluoropolymer comprises polychlorotrifluoroethylene.

44. The circuit material of claim 41, wherein the fluoropolymer comprises a copolymer of tetrafluoroethylene and a monomer selected from the group consisting of hexafluoropropylene and perfluoroalkylvinyethers.

45. The circuit material of claim 41, wherein the fluoropolymer comprises a copolymer of tetrafluoroethylene and a monomer selected from the group consisting of vinylideneflouride, vinyl fluoride and ethylene.

46. The circuit material of claim 41, wherein the fluoropolymer comprises a copolymer of chlorotrifluoroethylene and a monomer selected from the group consisting of hexafluoropropylene, perfluoroalkylvinylethers, vinylidenefluoride, vinyl fluoride, and ethylene.

47. The circuit material of claim 41, wherein the substrate comprises a film having a thickness of less than about 2 mil.

48. The circuit material of claim 41, wherein the substrate comprises a film having a thickness of less than about 1 mil.

49. The circuit material of claim 41 wherein said metal comprises copper.

50. The circuit material of claim 41, wherein each of the filler particles has an equivalent spherical diameter of less than 5 μm.

51. The circuit material of claim 41, wherein none of the filler particles has a single linear dimension greater than 10 μm.

52. The circuit material of claim 41, wherein none of the filler particles has a single linear dimension greater than 5 μm.

53. The circuit material of claim 41, wherein all of the filler particles are of substantially the same particle size.

2291 Notice of *Ex Parte* Reexamination Certificate Issuance in *Official Gazette* [R-3]

The *Official Gazette* notice will include bibliographic information, and an indication of the status of each claim after the *>conclusion< of the reexamination proceeding. Additionally, a representative claim will be published along with an indication of any changes to the specification or drawing.

The notice of *ex parte* reexamination certificate will clearly indicate that it is a certificate for a concluded *ex parte* reexamination proceeding, as opposed to an *inter partes* reexamination proceeding.

2292 Distribution of Certificate [R-3]

**>An e-copy< of the reexamination certificate **>will be associated with the e-copy< of the patent in the search files. A copy of the certificate will also be made a part of any patent copies prepared by the Office subsequent to the issuance of the certificate.

A copy of the certificate will also be forwarded to all depository libraries and to those foreign offices which have an exchange agreement with the U.S. Patent and Trademark Office.

2293 Intervening Rights

35 U.S.C. 307. Certificate of patentability, unpatentability, and claim cancellation.

*****

(b) Any proposed amended or new claim determined to be patentable and incorporated into a patent following a reexamination proceeding will have the same effect as that specified in section 252 of this title for reissued patents on the right of any person who made, purchased, or used within the United States, or imported into the United States, anything patented by such proposed amended or new claim, or who made substantial preparation for the same, prior to issuance of a certificate under the provisions of subsection (a) of this section.

The situation of intervening rights resulting from reexamination proceedings parallels the intervening rights situation resulting from reissue proceedings, and the rights detailed in 35 U.S.C. 252 apply equally in reexamination and reissue situations. See *Fortel Corp. v. Phone-Mate, Inc.*, 825 F.2d 1577, 3 USPQ2d 1771 (Fed. Cir. 1987); *Kaufman Co., Inc. v. Lantech, Inc.*, 807 F.2d 970, 1 USPQ2d 1202 (Fed. Cir. 1986); *Tennant Co. v. Hako Minuteman, Inc.*, 4 USPQ2d 1167 (N.D. Ill. 1987); *Key Mfg. Group, Inc. v. Microdot, Inc.*, 679 F. Supp. 648, 4 USPQ2d 1687 (E.D. Mich. 1987).

2294 Concluded Reexamination Proceedings [R-7]

Ex parte reexamination proceedings may be concluded in one of four ways:

(A) The prosecution of the proceeding may be *>brought to an end<, and the proceeding itself concluded, by a denial of reexamination>,< or vacating the reexamination proceeding**>, or terminating the reexamination proceeding. (In these instances<, no Reexamination Certificate is issued).

**>

(1) A reexamination file< (IFW or paper) in which reexamination has been denied or vacated *>is< processed by the Central Reexamination Unit (CRU) or Technology Center (TC) to provide the partial refund set forth in 37 CFR 1.26(c). The reexamination file will then be given a 420 status (reexamination denied) or a 422 status (reexamination vacated). A copy of the PALM "Application Number Information" screen and the "Contents" screen is printed. The printed copy is annotated by adding the comment "PROCEEDING CONCLUDED," and the annotated copy is then scanned into IFW using the miscellaneous letter document code.

>

(2) A reexamination file (IFW or paper) in which the reexamination proceeding has been terminated should be forwarded to the Central Reexamination Unit (CRU) if the file is not already there. The reexamination file will then be given a 420 status. A copy of the PALM "Application Number Information" screen and the "Contents" screen is printed, the printed copy is annotated by adding the comment "PROCEEDING CONCLUDED," and the annotated copy is then scanned into IFW using the miscellaneous letter document code. A partial refund is not made in this instance, since the reexamination was properly commenced and addressed, and was terminated later based upon a court decision, or the like.<

(B) The proceeding may be concluded under 37 CFR 1.570(b) with the issuance of a Reexamination Certificate.

A reexamination proceeding that is to be concluded in this manner should be processed as set forth in MPEP § 2287, reviewed by the **>CRU Supervisory Patent Examiner (SPE) or TC Quality Assurance Specialist (QAS)<, and then forwarded to the Office of Patent Legal Administration (OPLA).

(C) The proceeding may be concluded under 37 CFR 1.570(e) where the reexamination proceeding has been merged with a reissue proceeding and a reissue patent is granted; an individual reexamination certificate is not issued, but rather the reissue patent serves as the certificate.

A reexamination proceeding that is to be concluded in this manner should be processed, together with the reissue proceeding, as set forth in MPEP § 1455 and forwarded to the OPLA in accordance with MPEP § 1456.

(D) The proceeding may be concluded under 37 CFR 1.997(b) where the *ex parte* reexamination proceeding has been merged with an *inter partes* reexamination proceeding and a single reexamination certificate is issued.

A reexamination proceeding that is to be concluded in this manner should be processed, together with the *inter partes* reexamination, into a merged certificate of the nature set forth in MPEP § 2690 and MPEP § 2694.

2295 Reexamination of a Reexamination [R-7]

This section provides guidance for the processing and examination of a reexamination request filed on a patent for which a reexamination certificate has already issued, or a reexamination certificate issues on a prior reexamination, while the new reexamination is pending. This reexamination request is generally referred to as a "Reexamination of a reexamination."

The reexamination request is to be considered based on the claims in the patent *as modified by the previously issued reexamination certificate*, and not based on the original claims of the patent. Accordingly, when the file for the new reexamination proceeding (reexamination of a reexamination) is first received by the Central Reexamination Unit (CRU) or Technology Center (TC), the reexamination clerk will promptly incorporate into the reexamination specification all of the changes to the patent made by the issued reexamination certificate. Such incorporation must be done prior to forwarding the proceeding to the examiner for action.

The examiner should review the reexamination clerk's entry of the reexamination certificate to ensure that all certificate changes are properly entered so that (A) the reexamination will be given on an accurate specification and claims, and (B) the appropriate version of the patent will be printed in any future reexamination certificate that will ultimately issue. The examiner will issue a decision on the reexamination request **based on the patent claims (and specification) with the certificate changes entered**.

Once reexamination is ordered, the reexamination proceeding is conducted in accordance with 35 U.S.C. 305, 37 CFR 1.550 and MPEP § 2254 - § 2294.

I. PRIOR REEXAMINATION MATURES TO CERTIFICATE WHILE LATER REEXAMINATION IS PENDING

If a second request for reexamination of a patent is filed where the certificate for the first reexamination of the patent will issue within 3 months from the filing of the second request, the proceedings normally will not be merged. If the certificate for the first reexamination proceeding will issue before the decision on the second request must be decided, the reexamination certificate is allowed to issue. The second request is then considered based upon the claims in the patent as indicated in the issued reexamination certificate rather than the original claims of the patent. The Legal Instrument Examiner (LIE) will print out a copy of the issued reexamination certificate and make it of record in the second reexamination file wrapper as a preliminary amendment.

In the order/denial decision on the second request, it should be noted that this preliminary amendment (the certificate) was entered into the reexamination file, and that the determination (order/denial) was based upon the new patent claims in the certificate.

A copy of the reexamination certificate should be included as an attachment to the order/denial decision to ensure that any third party requester of the second reexamination has a copy of the certificate claims.

II. PATENT OWNER'S SUBMISSION OF AMENDMENTS

Any amendment to the claims (or specification) of the reexamination proceeding must be presented as if the changes made to the patent text via the reexamination certificate are a part of the original patent. Thus, all italicized text in the certificate is considered as if the text was present without italics in the original patent. Further, any certificate text placed in brackets is considered as if it were never present in the patent at all.

For example, an amendment in a "reexamination of a reexamination" might include italicized text of claim 1 of the reexamination certificate as underlined (or italicized) in the copy of claim 1 submitted in the amendment. This would indicate that text already present in the patent (via the reexamination certificate) is again being added. This would be an improper amendment, and as such, an "informal submission." Accordingly, the examiner would notify the patent owner that the amendment does not comply with 37 CFR 1.530. Form PTOL-475 would be used to provide the notification of the defect in the amendment, and a 1-month time period would be set for correction of the defect. See also MPEP § 2266.02.

III. COMPLETION OF THE CHECKLISTS

Upon conclusion of the reexamination proceeding, the reexamination file will be processed by the CRU or the TC so that the Office of *>Data Management< can prepare and issue a certificate in accordance with 35 U.S.C. 307 and 37 CFR 1.570. The certificate will set forth the results of the reexamination proceeding and the content of the patent following the proceeding. See MPEP § 2287. The examiner will complete a checklist, Form PTO-1516, and the reexamination clerk will complete the reexamination clerk checklist Form PTO-1517. In completing the checklists, the examiner and reexamination clerk should keep in mind that the "patent" is the *original patent as modified by the reexamination certificate*. For example, claims canceled by the prior reexamination certificate should be listed in Item 8 - "Claim(s) _____ (and) _____ was (were) previously canceled." Likewise, in Item 12 of the examiner checklist - "Claim(s) ____ (and) ____ is (are) determined to be patentable as amended."; any claims amended **only** by the prior reexamination certificate (i.e., not further amended in the present reexamination) **should not be listed**.

Each "reexamination of a reexamination" must be reviewed by a **>CRU Supervisory Patent Examiner (SPE) or TC Quality Assurance Specialist (QAS)< and a paralegal to ensure compliance with the above guidelines.

2296 USPTO Forms To Be Used In *Ex Parte* Reexamination [R-3]

The following forms must be used in *ex parte* reexamination actions and processing (these forms are not reproduced below):

**>

(A) Granting/Denying Request For *Ex Parte* Reexamination – PTOL-471

(B) Office Action in *Ex Parte* Reexamination – PTOL-466

(C) *Ex Parte* Reexamination Advisory Action – PTOL-467

(D) *Ex Parte* Reexamination Notification re Appeal – PTOL-468

(E) Notification of Non-Compliant Appeal Brief (37 CFR 41.37) in *Ex Parte* Reexamination – PTOL-462R

(F) *Ex Parte* Reexamination Advisory Action After the Filing of an Appeal Brief – PTOL-304R

(G) Notice of Intent to Issue *Ex Parte* Reexamination Certificate – PTOL-469

(H) *Ex Parte* Reexamination Communication Transmittal Form – PTOL-465

(I) *Ex Parte* Reexamination Interview Summary-PTOL-474

(J) Notice of Defective Paper In *Ex Parte* Reexamination – PTOL-475

(K) *Ex Parte* Reexamination Communication – PTOL-473

(L) Reexamination Clerk Checklist – PTOL-1517

(M) Examiner Checklist – Reexamination – PTOL-1516<

A Request for *Ex Parte* Reexamination Transmittal Form, PTO/SB/57, is available on the USPTO web site at http://www.uspto.gov for use in the filing of a request for reexamination; its use, however, is not mandatory.

Chapter 2300 Interference Proceedings

**

**>

2301 Introduction [R-4]

An interference is a contest under 35 U.S.C. 135(a) between an application and either another application or a patent. An interference is declared to assist the Director of the United States Patent and Trademark Office in determining priority, that is, which party first invented the commonly claimed invention within the meaning of 35 U.S.C. 102(g)(1). See MPEP § 2301.03. Once an interference has been suggested under 37 CFR 41.202, the examiner refers the suggested interference to the Board of Patent Appeals and Interferences (Board). An administrative patent judge declares the interference, which is then administered at the Board. A panel of Board members enters final judgment on questions of priority and patentability arising in an interference.

Once the interference is declared, the examiner generally will not see the application again until the interference has been terminated. Occasionally, however, the Board may refer a matter to the examiner or may consult with the examiner on an issue. Given the very tight deadlines in an interference, any action on a consultation or referral from the Board must occur with special dispatch.

The application returns to the examiner after the interference has been terminated. Depending on the nature of the judgment in the case, the examiner may need to take further action in the application. For instance, if there are remaining allowable claims, the application may need to be passed to issue. The Board may have entered a recommendation for further action by the examiner in the case. If the applicant has lost an issue in the interference, the applicant may be barred from taking action in the application or any subsequent application that would be inconsistent with that loss.

Given the infrequency, cost, and complexity of interferences, it is important for the examiner to consult immediately with an Interference Practice Specialist (IPS) in the examiner's Technology Center, see MPEP § 2302, once a possible interference is identified. It is also important to complete examination before the possible interference is referred to the Board. See MPEP § 2303.<

>

2301.01 Statutory Basis [R-4]

35 U.S.C. 102. Conditions for patentability; novelty and loss of right to patent.

A person shall be entitled to a patent unless —

*****

(g)(1) during the course of an interference conducted under section 135 or section 291, another inventor involved therein establishes, to the extent permitted in section 104, that before such person's invention thereof the invention was made by such other inventor and not abandoned, suppressed, or concealed, or

*****

35 U.S.C. 104. Invention made abroad.

(a) IN GENERAL.—

(1) PROCEEDINGS.—In proceedings in the Patent and Trademark Office, in the courts, and before any other competent authority, an applicant for a patent, or a patentee, may not establish a date of invention by reference to knowledge or use thereof, or other activity with respect thereto, in a foreign country other than a NAFTA country or a WTO member country, except as provided in sections 119 and 365 of this title.

(2) RIGHTS.—If an invention was made by a person, civil or military—

(A) while domiciled in the United States, and serving in any other country in connection with operations by or on behalf of the United States,

(B) while domiciled in a NAFTA country and serving in another country in connection with operations by or on behalf of that NAFTA country, or

(C) while domiciled in a WTO member country and serving in another country in connection with operations by or on behalf of that WTO member country, that person shall be entitled to the same rights of priority in the United States with respect to such invention as if such invention had been made in the United States, that NAFTA country, or that WTO member country, as the case may be.

(3) USE OF INFORMATION.—To the extent that any information in a NAFTA country or a WTO member country concerning knowledge, use, or other activity relevant to proving or disproving a date of invention has not been made available for use in a proceeding in the Patent and Trademark Office, a court, or any other competent authority to the same extent as such information could be made available in the United States, the Director, court, or such other authority shall draw appropriate inferences, or take other action permitted by statute, rule, or regulation, in favor of the party that requested the information in the proceeding.

(b) DEFINITIONS.—As used in this section—

(1) The term "NAFTA country" has the meaning given that term in section 2(4) of the North American Free Trade Agreement Implementation Act; and

(2) The term "WTO member country" has the meaning given that term in section 2(10) of the Uruguay Round Agreements Act.

35 U.S.C. 135. Interferences.

(a) Whenever an application is made for a patent which, in the opinion of the Director, would interfere with any pending application, or with any unexpired patent, an interference may be declared and the Director shall give notice of such declaration to the applicants, or applicant and patentee, as the case may be. The Board of Patent Appeals and Interferences shall determine questions of priority of the inventions and may determine questions of patentability. Any final decision, if adverse to the claim of an applicant, shall constitute the final refusal by the Patent and Trademark Office of the claims involved, and the Director may issue a patent to the applicant who is adjudged the prior inventor. A final judgment adverse to a patentee from which no appeal or other review has been or can be taken or had shall constitute cancellation of the claims involved in the patent, and notice of such cancellation shall be endorsed on copies of the patent distributed after such cancellation by the Patent and Trademark Office.

*****

>

2301.02 Definitions [R-4]

37 CFR 41.2. Definitions.

Unless otherwise clear from the context, the following definitions apply to proceedings under this part:

Affidavit means affidavit, declaration under § 1.68 of this title, or statutory declaration under 28 U.S.C. 1746. A transcript of an ex parte deposition may be used as an affidavit in a contested case.

Board means the Board of Patent Appeals and Interferences and includes:

(1) For a final Board action:

(i) In an appeal or contested case, a panel of the Board.

(ii) In a proceeding under § 41.3, the Chief Administrative Patent Judge or another official acting under an express delegation from the Chief Administrative Patent Judge.

(2) For non-final actions, a Board member or employee acting with the authority of the Board.

Board member means the Under Secretary of Commerce for Intellectual Property and Director of the United States Patent and Trademark Office, the Deputy Under Secretary of Commerce for Intellectual Property and Deputy Director of the United States Patent and Trademark Office, the Commissioner for Patents, the Commissioner for Trademarks, and the administrative patent judges.

Contested case means a Board proceeding other than an appeal under 35 U.S.C. 134 or a petition under § 41.3. An appeal in an inter partes reexamination is not a contested case.

Final means, with regard to a Board action, final for the purposes of judicial review. A decision is final only if:

(1) *In a panel proceeding.* The decision is rendered by a panel, disposes of all issues with regard to the party seeking judicial review, and does not indicate that further action is required; and

(2) *In other proceedings*. The decision disposes of all issues or the decision states it is final.

Hearing means consideration of the issues of record. *Rehearing* means reconsideration.

Office means United States Patent and Trademark Office.

Panel means at least three Board members acting in a panel proceeding.

Panel proceeding means a proceeding in which final action is reserved by statute to at least three Board members, but includes a

non-final portion of such a proceeding whether administered by a panel or not.

Party, in this part, means any entity participating in a Board proceeding, other than officers and employees of the Office, including:

(1) An appellant;

(2) A participant in a contested case;

(3) A petitioner; and

(4) Counsel for any of the above, where context permits.

37 CFR 41.100. Definitions.

In addition to the definitions in § 41.2, the following definitions apply to proceedings under this subpart:

Business day means a day other than a Saturday, Sunday, or Federal holiday within the District of Columbia.

Involved means the Board has declared the patent application, patent, or claim so described to be a subject of the contested case.

37 CFR 41.200. Procedure; pendency.

(a) A patent interference is a contested case subject to the procedures set forth in subpart D of this part.

(b) A claim shall be given its broadest reasonable construction in light of the specification of the application or patent in which it appears.

(c) Patent interferences shall be administered such that pendency before the Board is normally no more than two years.

37 CFR 41.201. Definitions.

In addition to the definitions in §§ 41.2 and 41.100, the following definitions apply to proceedings under this subpart:

Accord benefit means Board recognition that a patent application provides a proper constructive reduction to practice under 35 U.S.C. 102(g)(1).

Constructive reduction to practice means a described and enabled anticipation under 35 U.S.C. 102(g)(1) in a patent application of the subject matter of a count. *Earliest constructive reduction to practice* means the first constructive reduction to practice that has been continuously disclosed through a chain of patent applications including in the involved application or patent. For the chain to be continuous, each subsequent application must have been co-pending under 35 U.S.C. 120 or 121 or timely filed under 35 U.S.C. 119 or 365(a).

Count means the Board's description of the interfering subject matter that sets the scope of admissible proofs on priority. Where there is more than one count, each count must describe a patentably distinct invention.

Involved claim means, for the purposes of 35 U.S.C.135(a), a claim that has been designated as corresponding to the count.

Senior party means the party entitled to the presumption under § 41.207(a)(1) that it is the prior inventor. Any other party is a *junior party*.

Threshold issue means an issue that, if resolved in favor of the movant, would deprive the opponent of standing in the interference. Threshold issues may include:

(1) No interference-in-fact, and

(2) In the case of an involved application claim first made after the publication of the movant's application or issuance of the movant's patent:

(i) Repose under 35 U.S.C. 135(b) in view of the movant's patent or published application, or

(ii) Unpatentability for lack of written description under 35 U. S.C. 112(1) of an involved application claim where the applicant suggested, or could have suggested, an interference under § 41.202(a).<

>

2301.03 Interfering Subject Matter [R-4]

37 CFR 41.203. Declaration.

(a) *Interfering subject matter*. An interference exists if the subject matter of a claim of one party would, if prior art, have anticipated or rendered obvious the subject matter of a claim of the opposing party and vice versa.

*****

A claim of one inventor can be said to interfere with the claim of another inventor if they each have a patentable claim to the same invention. The Office practice and the case law define "same invention" to mean patentably indistinct inventions. *Case v. CPC Int'l, Inc.*, 730 F.2d 745, 750, 221 USPQ 196, 200 (Fed. Cir. 1984); *Aelony v. Arni*, 547 F.2d 566, 570, 192 USPQ 486, 489-90 (CCPA 1977); *Nitz v. Ehrenreich*, 537 F.2d 539, 543, 190 USPQ 413, 416 (CCPA 1976); *Ex parte Card*, 1904 C.D. 383, 384-85 (Comm'r Pats. 1904). If the claimed invention of either party is patentably distinct from the claimed invention of the other party, then there is no interference-in-fact. *Nitz v. Ehrenreich*, 537 F.2d 539, 543, 190 USPQ 413, 416 (CCPA 1976). 37 CFR 41.203(a) states the test in terms of the familiar concepts of obviousness and anticipation. Accord *Eli Lilly & Co. v. Bd. of Regents of the Univ. of Wa.*, 334 F.3d 1264, 1269-70, 67 USPQ2d 1161, 1164-65 (Fed. Cir. 2003) (affirming the Office's interpretive rule).

Identical language in claims does not guarantee that they are drawn to the same invention. Every claim must be construed in light of the application in which it appears. 37 CFR 41.200(b). Claims reciting means-plus-function limitations, in particular, might have different scopes depending on the corresponding structure described in the written description.

When an interference is declared, there is a description of the interfering subject matter, which is called a "count." Claim correspondence identifies claims that would no longer be allowable or patentable to a party if it loses the priority determination for the count. To determine whether a claim corresponds to a count, the

subject matter of the count is assumed to be prior art to the party. If the count would have anticipated or supported an obviousness determination against the claim, then the claim corresponds to the count. 37 CFR 41.207(b)(2). Every count must have at least one corresponding claim for each party, but it is possible for a claim to correspond to more than one count.

Example 1

A patent has a claim to a compound in which R is an alkyl group. An application has a claim to the same compound except that R is n-pentyl, which is an alkyl. The application claim, if prior art to the patent, would have anticipated the patent claim. The patent claim would not have anticipated the application claim. If, however, in the art n-pentyl would have been an obvious choice for alkyl, then the claims define interfering subject matter.

Example 2

An application has a claim to a boiler with a novel safety valve. A patent has a claim to just the safety valve. The prior art shows that the need for boilers to have safety valves is well established. The application claim, when treated as prior art, would have anticipated the patent claim. The patent claim, when treated as prior art and in light of the boiler prior art, can be shown to render the application claim obvious. The claims interfere.

Example 3

An application has a claim to a reaction using platinum as a catalyst. A patent has a claim to the same reaction except the catalyst may be selected from the Markush group consisting of platinum, niobium, and lead. Each claim would have anticipated the other claim when the Markush alternative for the catalyst is platinum. The claims interfere.

Example 4

Same facts as Example 3, except the applicant has a Markush group for the catalyst consisting of platinum, osmium, and zinc. Each claim would have anticipated the other claim when the Markush alternative for the catalyst in each claim is platinum. The claims interfere.

Example 5

An application has a claim to a protein with a specific amino acid sequence shown in SEQ ID NO:1. A patent has a claim to the genus of polynucleotides defined as encoding the same amino acid sequence as the applicant's SEQ ID NO:1. The patent claim would have anticipated the application claim since it expressly describes an amino acid sequence identical to the protein of the application. The application claim would have rendered the patent claim obvious in light of a well-established relationship between nucleic acids for encoding amino acids in protein sequences. The claims interfere.

Example 6

A patent has a claim to a genus of polynucleotides that encode a protein with a specific amino acid sequence. An application has a claim to a polynucleotide that encodes a protein with the same amino acid sequence. The application claim is a species within the genus and thus would have anticipated the patent claim. The patent claim would not have anticipated or rendered the application claim obvious without some explanation of why a person having ordinary skill in the art would have selected the applicant's species from the patentee's genus. Generally the explanation should include citation to prior art supporting the obviousness of the species. Without the explanation, the claims do not interfere.

Example 7

A patent and an application each claim the same combination including "means for fastening." The application discloses glue for fastening, while the patent discloses a rivet for fastening. Despite otherwise identical claim language, the claims do not interfere unless it can be shown that in this art glue and rivets were considered structurally equivalent or would have rendered each other obvious.

Example 8

A patent claims a formulation with the surfactant sodium lauryl sulfate. An application claims the same formulation except no specific surfactant is described. The application discloses that it is well known in the art to use sodium lauryl sulfate as the surfactant in these types of formulations. The claims interfere.

Example 9

An applicant has a claim to a genus and a species within the genus. The interference is declared with two counts, one directed to the genus and one directed to the species. The species claim would correspond to the species count because the count would have anticipated the claimed subject matter. The genus count would not ordinarily have anticipated the species claim, however, so the species claim would only correspond to the genus count if there was a showing that the genus count would have rendered the claimed species obvious. The genus claim, however, would have been anticipated by both the genus count and the species count and thus would correspond to both counts.<

>

2302 Consult an Interference Practice Specialist [R-4]

Every Technology Center (TC) has at least one Interference Practice Specialist (IPS), who must be consulted when suggesting an interference to the Board of Patent Appeals and Interferences (Board).

Less than one percent of all applications become involved in an interference. Consequently, examiners are not expected to become experts in interference practices. Instead, examiners are expected to be proficient in identifying potential interference and to consult with an IPS in their TC on interference matters. The IPS, in turn, is knowledgeable about when and how to suggest interferences, how to handle inquiries to and from the Board before and during interferences, and how to handle applications after interferences are completed.

An IPS must approve any referral of a suggested interference to the Board. The referral must include a completed Form PTO-850, which either an IPS or a Director of the examiner's TC must sign.

IPSs consult with administrative patent judges (APJs) that declare interferences to stay current in interference practice. When necessary, an IPS may arrange for a consultation with an APJ to discuss a suggested interference or the effect of a completed interference. Examiners must promptly address inquiries or requests from an IPS regarding a suggested interference.

Form PTO-850-(Rev. 09-30-2005)

DO NOT SCAN - PREDECISIONAL MEMORANDUM
SUGGESTED INTERFERENCE REFERRAL

Count #_____

To the Board of Patent Appeals and Interferences:

An interference is suggested involving the following (insert number) ____ parties—

PARTY	APPLICATION NO.* ☐	FILING DATE	PATENT NO., IF ANY	ISSUE DATE, IF ANY
If the involved case is a patent, have its maintenance fees been paid? Yes ☐ No ☐			Not due yet ☐	In grace period ☐
The claim(s) of this party corresponding to this count:			Claim(s) NOT corresponding to this count:	

Proposed priority benefit (list all intervening applications necessary for continuity)

INSTRUCTIONS *(Check off each step, if applicable)*

- ☐ 1. Obtain all files listed above. IFW files should be messaged to the mailbox **BPAI.Inbox**.
- ☐ 2. Confirm that the proposed involved claims are still active and all corrections and entered amendments have been considered. The patents must not be expired for, among other things, failure to pay a maintenance fee (Check RAM File History).
- ☐ 3. If one of the involved or benefit files is a published application or a patent, check for compliance with 35 U.S.C. 135(b).
- ☐ 4. Obtain a certified translation of any non-English language benefit or PCT document (37 CFR 1.55(a)) if not already in file.
- ☐ 5. Attach an explanation of why the claims interfere.
- ☐ 6. Discuss the proposed interference with an Interference Practice Specialist in your Technology Center.

*For each application listed, check the box if a paper file or artifact file is associated with the application.

Page_____of _____

GENERAL PRACTICES

Practice 1. Consult an Interference Practice Specialist.

In an effort to maximize uniformity, when an examiner first becomes aware that a potential interference exists or any other interference issue arises during prosecution of an application, the examiner should bring the matter to the attention of an IPS in the examiner's TC.

The IPS in turn will consult with an APJ designated from time to time by the Chief Administrative Patent Judge.

A plan of action will be developed on a case-by-case basis.

Practice 2. Party not in condition for allowance.

When:

(A) a first application and a second application claim the same patentable invention; and

(B) a first application is in condition for allowance; and

(C) the second application is not in condition for allowance,

then generally a notice of allowance should be entered in the first application and it should become a patent.

Without suspending action in the first application and after consultation consistent with Practice 1 above, the examiner may wish to give the second applicant a very brief period of time within which to put the second application in condition for allowance, e.g., by canceling rejected claims thereby leaving only allowable claims which interfere with the claims of the first application.

When examination of the second application is complete, an application versus patent interference may be appropriate.

Practice 3. Both in condition for allowance; earliest effective filing dates within six months.

When two applications are in condition for allowance and the earliest effective filing dates of the applications are within six months of each other, an application versus application interference may be suggested, provided the applicant with the later filing date makes the showing required by 37 CFR 41.202(d). Note that if the earliest filed application is available as a reference (for example, as a published application under 35 U.S.C. 102(e)) against the other application, then a rejection should be made against the other application. Ideally, the rejection would be made early in the prosecution, but if it is not and as a result the junior application is not in condition for allowance, then the senior application should be issued. In light of patent term adjustments it is no longer appropriate to suspend an application on the chance that an interference might ultimately result.

Practice 4. Both in condition for allowance; earliest effective filing dates not within six months.

If the applications are both in condition for allowance and earliest effective filing dates of the applications are not within six months of each other, the application with the earliest effective filing date shall be issued. The application with the later filing date shall be rejected on the basis of the application with the earliest effective filing date. Further action in the application with the later filing date will be governed by prosecution in that application. If the applicant in the application with the later filing date makes the showing required by 37 CFR 41.202(d), an application versus patent interference may be declared. If no rejection is possible over the patent issuing from the application with the earliest effective filing date, then the applicant must still be required under 35 U.S.C. 132 to make the priority showing required in 37 CFR 41.202(d).

Practice 5. Suspension discouraged.

Suspension of prosecution pending a possible interference should be rare and should not be entered prior to the consultation required by Practice 1 above.<

>

2303 Completion of Examination [R-4]

37 CFR 41.102. Completion of examination.

Before a contested case is initiated, except as the Board may otherwise authorize, for each involved application and patent:

(a) Examination or reexamination must be completed, and

(b) There must be at least one claim that:

(1) Is patentable but for a judgment in the contested case, and

(2) Would be involved in the contested case.

An interference should rarely be suggested until examination is completed on all other issues. Each

pending claim must be allowed, finally rejected, or canceled. Any appeal from a final rejection must be completed, including any judicial review. Any petition must be decided.

Example 1

An applicant has one allowed claim directed to invention A, which is the same invention of another inventor within the meaning of 35 U.S.C. 102(g)(1), and has rejected claims directed to different invention B. If the rejection is contested, the application is not yet ready for an interference. Restriction of the application to invention A, followed by cancellation of the claims directed to invention B would remove this impediment to declaring an interference.

Example 2

A patent has a claim to a species. An applicant has claims to the species and to a genus that includes the species. The examiner has allowed the species claim, but rejected the genus claim. The applicant suggests an interference with the patent. The interference will generally not be declared until the applicant resolves the status of the genus claim by, for example, appealing the rejection or canceling the rejected claim. An applicant may expedite the process of having the interference declared by canceling the genus claim from the application.

Two grounds of unpatentability receive particularly close scrutiny before an interference is declared. Enforcement of the written description requirement under 35 U.S.C. 112, first paragraph and the late claiming bars under 35 U.S.C. 135(b) are important to preserve the efficiency and integrity of interferences. 37 CFR 41.201, "Threshold issue." See, e.g., *Berman v. Housey*, 291 F.3d 1345, 1354, 63 USPQ2d 1023, 1029 (Fed. Cir. 2002).

RESTRICTION IN APPLICATIONS WITH INTERFERING CLAIMS

Ordinarily restrictions are limited to situations where (A) the inventions are independent or distinct as claimed, and (B) there would be a serious burden on the examiner if restriction is not required (see MPEP § 803). Potential interferences present an additional situation in which a restriction requirement may be appropriate. Specifically, restriction of interfering claims from non-interfering claims, or from unpatentable claims whose further prosecution would unduly delay initiation of an interference, can be an appropriate use of restrictions under 35 U.S.C. 121. An Interference Practice Specialist (IPS) should be consulted in making and resolving restrictions under this heading. An applicant may, of course, also choose to cancel claims and refile them in a continuation application without waiting for the restriction requirement.

A. Non-Interfering Claims

Patent term adjustments are available for patents whose issuance has been delayed for an interference. 35 U.S.C. 154(b)(1)(C)(i). A claim that does not interfere, by definition, is directed to a patentably distinct invention compared to a claim that does interfere. Leaving a non-interfering claim in an application going into an interference creates an unwarranted delay in the issuance of claims to the non-interfering subject matter. As far as the public and the Office are concerned, there is no justification for not issuing the non-interfering claims promptly. An exception exists if the claims are already term limited, as would be the case for an application subject to a terminal disclaimer or a reissue application (see 35 U.S.C. 154(b)(1)(C) (referring to issuance of the original patent)).

If an application contains both interfering and non-interfering claims, a restriction requirement should be made between the two. If the applicant traverses the restriction requirement, depending on the reasons for the traversal, the restriction may be maintained or the traversal may be treated as a concession that the non-interfering claims should be designated as corresponding to the count.

B. Unpatentable Claims

Ordinarily restriction of claims simply because they are not patentable would not be appropriate. If, however, (A) prosecution of the unpatentable claims to completion would unduly delay initiation of the interference and (B) the delay would create prejudice to another stakeholder, such as another applicant or the public, a restriction requirement may be appropriate. Approval of an IPS is required before this restriction requirement may be made.

Example

An applicant has both broad and narrow claims. The narrow claims are plainly supported, but the support for the broad claims is contested. A patent with claims to the narrow invention issues to another inventor with a much later earliest effective filing date. Delay of the interference until the patentability of the broader claims is resolved may unduly prejudice the patentee and the public by leaving a cloud of doubt hanging over the patent claims.

If the unpatentable application claims are eventually prosecuted to allowance, the examiner should consult with the IPS regarding the status of the interference in case the claims would be affected by the outcome of the interference.

C. Reissue Applications

As explained above, reissue applications are not subject to patent term adjustments. Applicants sometimes, however, file reissue applications to amend patent claims in response to events occurring in the interference. To maintain parity with other applicants, the Board does not permit reissue applicants to add claims that would not correspond to a count. *Winter v. Fujita*, 53 USPQ2d 1234, 1249 (Bd. Pat. App. & Inter. 1999). Since the burden lies with the reissue applicant to comply with *Winter*, the examiner need not require restriction of the non-interfering claims. Practice under *Winter*, however, may explain why some reissue applicants file more than one reissue application for the same patent.

Form paragraph 23.01 may be used to acknowledge a request for interference that is premature since examination of the application has not been completed.

¶ *23.01 Request for Interference Premature; Examination Not Completed*

The request for interference filed **[1]** is acknowledged. However, examination of this application has not been completed as required by 37 CFR 41.102(a). Consideration of a potential interference is premature. See MPEP § 2303.

<
>

2303.01 Issuance and Suspension [R-4]

Since applicants may be eligible for patent term adjustments to offset delays in examination, 35 U.S.C. 154(b)(1), it is important that suspensions should rarely, if ever, be used and that applications with allowed claims be issued to the greatest extent possible.

Example 1

A claim of patent A and a claim of application B interfere. Examination of application B is completed. An interference may not be declared between two patents. 35 U.S.C. 135(a). Consequently, the interfering claim in application B should not be passed to issue, even if it has an earlier effective filing date than patent A. Instead, an interference should be suggested.

Example 2

Two applications, C and D, with interfering claims are pending. Examination of application C is completed and all claims are allowable. Examination of application D is not completed. Application C should be issued promptly. If application C has an earlier effective U.S. filing date when issued as patent C, or when published as application publication C, it may be available as prior art under 35 U.S.C. 102(e) against application D. However, even if application C's effective filing date is later than application D's effective filing date, application C should issue. Until examination of application D is completed, it is not known whether application D should be in interference with application C, so suspension of application C will rarely, if ever, be justified.

Example 3

Two applications, E and F, with interfering claims are pending. Both are ready to issue. (Such ties should be extremely rare; suspensions must not be used to create such ties.) If the applications have their earliest effective filing dates within six months of each other, then an interference may be suggested. If, however, application E's earliest effective filing date is more than six months before application F's earliest effective filing date, then application E should issue. If application E (or the resulting patent E) is available as prior art (under 35 U.S.C. 102(a) or 102(e)) against application F, then a rejection should be made. If not, a requirement under 37 CFR 41.202(d) to show priority should be made. See MPEP § 2305.<

>

2303.02 Other Outstanding Issues with Patents [R-4]

Patents that are undergoing reexamination or reissue are subject to the requirement of 37 CFR 41.102 that examination be completed. Patents may, however, be the subject of other proceedings before the Office. For instance, a patent may be the subject of a petition to accept a late maintenance fee, 35 U.S.C. 41(c), or a request for disclaimer or correction. 35 U.S.C. 253 to 256. Such issues must be resolved before an interference is suggested because they may affect whether or how an interference may be declared.

Example 1

A patent maintenance fee has not been timely paid. By operation of law, 35 U.S.C. 41(b), the patent is considered to be expired. An interference cannot be declared with an expired patent. 35 U.S.C. 135(a). Consequently, if a petition to accept delayed payment is not granted, 37 CFR 1.378, then no interference can be declared.

Example 2

A disclaimer under 35 U.S.C. 253, is filed for the sole patent claim directed to the same invention as the claims of the applicant. Since the patentee and applicant must both have claims to the same invention, 35 U.S.C. 102(g)(1), no interference can be declared.

Example 3

Similar to Example 2, a request for correction under 35 U.S.C. 254 or 255, is filed that results in a change to the sole patent claim such that it is no longer directed to the same invention as any claim of the applicant. Again, since the patentee and applicant must both have claims to the same invention, 35 U.S.C. 102(g)(1), no interference can be declared.

Example 4

Inventorship is corrected such that the inventors for the patent and the application are the same. Since 35 U.S.C. 102(g)(1) requires the interference to be with "another inventor," the correction eliminates the basis for an interference. Other rejections, such as a double-patenting rejection may be appropriate.<

>

2304 Suggesting an Interference [R-4]

The suggestion for an interference may come from an applicant or from an examiner. Who suggests the interference determines what must be done and shown prior to declaration of an interference. In either circumstance, the examiner must consult with an Interference Practice Specialist (IPS), who may then refer the suggested interference to the Board of Patent Appeals and Interferences.<

>

2304.01 Preliminaries to Referring an Interference to the Board [R-4]

<

>

2304.01(a) Interference Search [R-4]

When an application is in condition for allowance, an interference search must be made by performing a text search of the "US-PGPUB" database in EAST or WEST directed to the comprehensive inventive features in the broadest claim. If the application contains a claim directed to a nucleotide or peptide sequence, the examiner must submit a request to STIC to perform an interference search of the sequence. If the search results identify any potential interfering subject matter, the examiner will review the application(s) with the potential interfering subject to determine whether interfering subject matter exists. If interfering subject matter does exist, the examiner will follow the guidance set forth in this chapter. If there is no interfering subject matter then the examiner should prepare the application for issuance. A printout of only the database(s) searched, the query(ies) used in the interference search, and the date the interference search was performed must be made of record in the application file. The results of the interference search must not be placed in the application file.

The search for interfering applications must not be limited to the class or subclass in which the application is classified, but must be extended to all classes, in and out of the Technology Center (TC), in which it has been necessary to search in the examination of the application. See MPEP § 1302.08.<

>

2304.01(b) Obtaining Control Over Involved Files [R-4]

Ordinarily applications that are believed to interfere should be assigned to the same examiner.

I. IN DIFFERENT TECHNOLOGY CENTERS

If the interference would be between two applications, and the applications are assigned to different Technology Centers (TCs), then one application must be reassigned. Ordinarily the applications should both be assigned to the TC where the commonly claimed invention would be classified. After termination of the interference, further transfer may be appropriate depending on the outcome of the interference.

II. PAPERS NOT CONVERTED TO IMAGE FILE WRAPPER FILES

Although the official records for most applications have been converted into Image File Wrapper (IFW) files, some records exist only in paper form, particularly older benefit application files. Even IFW files may have artifact records that have not been converted. Complete patent and benefit files are necessary for determining whether benefit should be accorded for purposes of 35 U.S.C. 102(g)(1). A suggested interference must not be referred to the Board of Patent Appeals and Interferences (Board) if all files, including benefit files, are not available to the examiner in either IFW format or paper.

If a paper file wrapper has been lost, it must be reconstructed before the interference is referred to the Board.

III. PATENT COOPERATION TREATY APPLICATION FILES

Generally, a separate application file for a Patent Cooperation Treaty (PCT) application is not required for according benefit because the PCT application is included in a national stage application file that is itself either the application involved in the interference or a benefit file. Occasionally, however, the PCT application file itself is required for benefit. For instance, if benefit is claimed to the PCT application, but not to a national stage application in which it is included, then the PCT application file must be obtained.<

>

2304.01(c) Translation of Foreign Benefit Application [R-4]

A certified translation of every foreign benefit application or Patent Cooperation Treaty (PCT) application not filed in English is required. 35 U.S.C. 119(b)(3) and 372(b)(3) and 37 CFR 1.55(a)(4). If no certified translation is in the official record for the application, the examiner must require the applicant to file a certified translation. The applicant should provide the required translation if applicant wants the application to be accorded benefit of the non-English language application. Any showing of priority that relies on a non-English language application is *prima facie* insufficient if no certified translation of the application is on file. 37 CFR 41.154(b) and 41.202(e).

Form paragraph 23.19 may be used to notify applicant that a certified English translation of the priority document is required.

¶ *23.19 Foreign Priority Not Substantiated*

Should applicant desire to obtain the benefit of foreign priority under 35 U.S.C. 119(a)-(d) prior to declaration of an interference, a certified English translation of the foreign application must be submitted in reply to this action, 37 CFR 41.154(b) and 41.202(e).

Failure to provide a certified translation may result in no benefit being accorded for the non-English application.

<

>

2304.01(d) Sorting Claims [R-4]

An applicant may be entitled to a day-for-day patent term adjustment for any time spent in an interference. If an applicant has several related applications with interfering claims intermixed with claims that do not interfere, the examiner should consider whether the interfering claims should be consolidated in a single application or whether an application should be restricted to claims that do not interfere. This way examination can proceed for any claims that do not interfere without the delay that will result from the interference.

Interfering claims of an applicant are “conflicting claims” within the meaning of 37 CFR 1.78(b). The

examiner may require consolidation of such claims into any disclosure of the applicant that provides support for the claims. 35 U.S.C. 132(a).

Similarly, the examiner should require an applicant to restrict an application to the interfering claims, 35 U.S.C. 121, in which case the applicant may file a divisional application for the claims that do not interfere.

Sorting of claims may not be appropriate in all cases. For instance, a claim should not be consolidated into an application that does not provide support under 35 U.S.C. 112, first paragraph for the claim.<

>

2304.02 Applicant Suggestion [R-4]

37 CFR 41.202. Suggesting an interference.

(a) *Applicant.* An applicant, including a reissue applicant, may suggest an interference with another application or a patent. The suggestion must:

(1) Provide sufficient information to identify the application or patent with which the applicant seeks an interference,

(2) Identify all claims the applicant believes interfere, propose one or more counts, and show how the claims correspond to one or more counts,

(3) For each count, provide a claim chart comparing at least one claim of each party corresponding to the count and show why the claims interfere within the meaning of § 41.203(a),

(4) Explain in detail why the applicant will prevail on priority,

(5) If a claim has been added or amended to provoke an interference, provide a claim chart showing the written description for each claim in the applicant's specification, and

(6) For each constructive reduction to practice for which the applicant wishes to be accorded benefit, provide a chart showing where the disclosure provides a constructive reduction to practice within the scope of the interfering subject matter.

*****

(d) *Requirement to show priority under 35 U.S.C. 102(g).* (1) When an applicant has an earliest constructive reduction to practice that is later than the apparent earliest constructive reduction to practice for a patent or published application claiming interfering subject matter, the applicant must show why it would prevail on priority.

(2) If an applicant fails to show priority under paragraph (d)(1) of this section, an administrative patent judge may nevertheless declare an interference to place the applicant under an order to show cause why judgment should not be entered against the applicant on priority. New evidence in support of priority will not be admitted except on a showing of good cause. The Board may authorize the filing of motions to redefine the interfering subject matter or to change the benefit accorded to the parties.

*****

When an applicant suggests an interference under 37 CFR 41.202(a), an examiner must review the suggestion for formal sufficiency. As explained in MPEP § 2304.02(c), the examiner is generally not responsible for determining the substantive adequacy of any priority showing. The examiner may, however, offer pertinent observations on any showing when the suggested interference is referred to the Board of Patent Appeals and Interferences. The observations may be included as an attachment to the Form PTO-850.

Form paragraphs 23.06 to 23.06.06 may be used to acknowledge applicant's suggestion for interference under 37 CFR 41.202(a) that failed to comply with one or more of paragraphs (a)(1) to (a)(6) of 37 CFR 41.202.

¶ *23.06 Applicant Suggesting an Interference*

Applicant has suggested an interference pursuant to 37 CFR 41.202(a) in a communication filed **[1]**.

Examiner Note:

1. Use this form paragraph if applicant has suggested an interference under 37 CFR 41.202(a) and applicant has failed to comply with one or more of paragraphs (a)(1) to (a)(6) of 37 CFR 41.202.

2. In bracket 1, insert the date of applicant's communication.

3. This form paragraph must be followed by one or more of form paragraphs 23.06.01 to 23.06.03 and end with form paragraph 23.06.04.

¶ *23.06.01 Failure to Identify the Other Application or Patent*

Applicant failed to provide sufficient information to identify the application or patent with which the applicant seeks an interference. See 37 CFR 41.202(a)(1) and MPEP § 2304.02(a).

¶ *23.06.02 Failure to Identify the Counts and Corresponding Claims*

Applicant failed to (1) identify all claims the applicant believes interfere, and/or (2) propose one or more counts, and/or (3) show how the claims correspond to one or more counts. See 37 CFR 41.202(a)(2) and MPEP § 2304.02(b).

¶ *23.06.03 Failure to Provide Claim Chart Comparing At Least One Claim*

Applicant failed to provide a claim chart comparing at least one claim of each party corresponding to the count. See 37 CFR 41.202(a)(3) and MPEP § 2304.02(c).

¶ *23.06.04 Failure to Explain in Detail Why Applicant Will Prevail on Priority*

Applicant failed to provide a detailed explanation as to why applicant will prevail on priority. See 37 CFR 41.202(a)(4), (a)(6), (d) and MPEP § 2304.02(c).

¶ *23.06.05 Claim Added/Amended; Failure to Provide Claim Chart Showing Written Description*

Claim **[1]** has been added or amended in a communication filed on **[2]** to provoke an interference. Applicant failed to provide a claim chart showing the written description for each claim in the applicant's specification. See 37 CFR 41.202(a)(5) and MPEP § 2304.02(d).

¶ *23.06.06 Time Period for Reply*

Applicant is given ONE MONTH or THIRTY DAYS, whichever is longer, from the mailing date of this communication to correct the deficiency(ies). THE PROVISIONS OF 37 CFR 1.136 DO **NOT** APPLY TO THE TIME SPECIFIED IN THIS ACTION.

<

>

2304.02(a) Identifying the Other Application or Patent [R-4]

37 CFR 41.202. Suggesting an interference.

(a) *Applicant*. An applicant, including a reissue applicant, may suggest an interference with another application or a patent. The suggestion must:

(1) Provide sufficient information to identify the application or patent with which the applicant seeks an interference,

*****

Usually an applicant seeking an interference will know the application serial number or the patent number of the application or patent, respectively, with which it seeks an interference. If so, providing that number will fully meet the identification requirement of 37 CFR 41.202(a)(1).

Occasionally, an applicant will believe another interfering application exists based only on indirect evidence, for instance through a journal article, a "patent pending" notice, or a foreign published application. In such cases, information about likely named inventors and likely assignees may lead to the right application. The applicant should be motivated to help the examiner identify the application since inadequate information may prevent the declaration of the suggested interference.<

>

2304.02(b) Counts and Corresponding Claims [R-4]

37 CFR 41.202. Suggesting an interference.

(a) *Applicant*. An applicant, including a reissue applicant, may suggest an interference with another application or a patent. The suggestion must:

*****

(2) Identify all claims the applicant believes interfere, propose one or more counts, and show how the claims correspond to one or more counts,

(3) For each count, provide a claim chart comparing at least one claim of each party corresponding to the count and show why the claims interfere within the meaning of § 41.203(a),

*****

The applicant must identify at least one patentable claim from every application or patent that interferes for each count. A count is just a description of the interfering subject matter, which the Board of Patent Appeals and Interferences uses to determine what evidence may be used to prove priority under 35 U.S.C. 102(g)(1).

The examiner must confirm that the applicant has (A) identified at least one patentable count, (B) identified at least one patentable claim from each party for each count, and (C) has provided a claim chart comparing at least one set of claims for each count. The examiner need not agree with the applicant's suggestion. The examiner's role is to confirm that there are otherwise patentable interfering claims and that the formalities of 37 CFR 41.202 are met.<

>

2304.02(c) Explaining Priority [R-4]

37 CFR 41.202. Suggesting an interference.

(a) *Applicant*. An applicant, including a reissue applicant, may suggest an interference with another application or a patent. The suggestion must:

*****

(4) Explain in detail why the applicant will prevail on priority,

*****

(6) For each constructive reduction to practice for which the applicant wishes to be accorded benefit, provide a chart showing where the disclosure provides a constructive reduction to practice within the scope of the interfering subject matter.

*****

(d) *Requirement to show priority under 35 U.S.C. 102(g)*. (1) When an applicant has an earliest constructive reduction to practice that is later than the apparent earliest constructive reduction to practice for a patent or published application claiming interfering subject matter, the applicant must show why it would prevail on priority.

(2) If an applicant fails to show priority under paragraph (d)(1) of this section, an administrative patent judge may never-

theless declare an interference to place the applicant under an order to show cause why judgment should not be entered against the applicant on priority. New evidence in support of priority will not be admitted except on a showing of good cause. The Board may authorize the filing of motions to redefine the interfering subject matter or to change the benefit accorded to the parties.

*****

A description in an application that would have anticipated the subject matter of a count is called a constructive reduction-to-practice of the count. One disclosed embodiment is enough to have anticipated the subject matter of the count. If the application is relying on a chain of benefit disclosures under any of 35 U.S.C. 119, 120, 121 and 365, then the anticipating disclosure must be continuously disclosed through the entire benefit chain or no benefit may be accorded.

If the application has an earlier constructive reduction-to-practice than the apparent earliest constructive reduction-to-practice of the other application or patent, then the applicant may simply explain its entitlement to its earlier constructive reduction-to-practice. Otherwise, the applicant must (A) antedate the earliest constructive reduction-to-practice of the other application or patent, (B) demonstrate why the other application or patent is not entitled to its apparent earliest constructive reduction-to-practice, or (C) provide some other reason why the applicant should be considered the prior inventor.

The showing of priority may look similar to showings under 37 CFR 1.130-1.132, although there are differences particularly in the scope of what must be shown. In any case, with the exception discussed below, the examiner is not responsible for examining the substantive sufficiency of the showing.

I. REJECTION UNDER 35 U.S.C. 102(a) or 102(e)

If an application claim is subject to a rejection under 35 U.S.C. 102(a) or 102(e) and the applicant files a suggestion under 37 CFR 41.202(a) rather than a declaration under 37 CFR 1.130-1.132, then the examiner must review the suggestion to verify that the applicant's showing, taken at face value, is sufficient to overcome the rejection. If the examiner determines that the showing is not sufficient, then the examination is not completed, 37 CFR 41.102, the rejection should be maintained and the suggestion should not be referred to the Board of Patent Appeals and Interferences (Board) for an interference.

II. COMPLIANCE WITH 35 U.S.C. 135(b)

If an application claim interferes with a claim of a patent or published application, and the claim was added to the application by an amendment filed more than one year after issuance of the patent, or the application was not filed until more than one year after issuance of the patent (but the patent is not a statutory bar), then under the provisions of 35 U.S.C. 135(b), an interference will not be declared unless at least one of the claims which were in the application, or in a parent application, prior to expiration of the one-year period was for "substantially the same subject matter" as at least one of the claims of the patent.

If the applicant does not appear to have had a claim for "substantially the same subject matter" as at least one of the patent claims prior to the expiration of the one-year period, the examiner may require, 35 U.S.C. 132, that the applicant explain how the requirements of 35 U.S.C. 135(b) are met. Further, if the patent issued from an application which was published under 35 U.S.C. 122(b), note the one year from publication date limitation found in 35 U.S.C. 135(b)(2) with respect to applications filed after the date of publication.

The obviousness test is not the standard for determining whether the subject matter is the same or substantially the same. Rather the determination turns on the presence or absence of a different material limitation in the claim. These tests are distinctly different. The analysis focuses on the interfering claim to determine whether all material limitations of the interfering claim necessarily occur in a prior claim. *In re Berger*, 279 F.3d 975, 61 USPQ2d 1523 (Fed. Cir. 2002). If none of the claims which were present in the application, or in a parent application, prior to expiration of the one-year period meets the "substantially the same subject matter" test, the interfering claim should be rejected under 35 U.S.C. 135(b). *In re McGrew*, 120 F.3d 1236, 43 USPQ2d 1632 (Fed. Cir. 1997). Note that the expression "prior to one year from the date on which the patent was granted" in 35 U.S.C. 135(b) includes the one-year anniversary date of the issuance of a patent. *Switzer v. Sockman*, 333 F.2d 935, 142 USPQ 226 (CCPA 1964).

Form paragraph 23.14 may be used to reject a claim as not being made prior to one year of the patent issue date. Form paragraph 23.14.01 may be used to reject a claim as not being made prior to one year from the application publication date.

¶ *23.14 Claims Not Copied Within One Year of Patent Issue Date*

Claim **[l]** rejected under 35 U.S.C. 135(b)(1) as not being made prior to one year from the date on which U.S. Patent No. **[2]** was granted. See *In re McGrew*, 120 F.3d 1236, 1238, 43 USPQ2d 1632, 1635 (Fed. Cir. 1997) where the Court held that 35 U.S.C. 135(b) may be used as a basis for *ex parte* rejections.

¶ *23.14.01 Claims Not Copied Within One Year Of Application Publication Date*

Claim **[l]** rejected under 35 U.S.C. 135(b)(2) as not being made prior to one year from the date on which **[2]** was published under 35 U.S.C. 122(b). See *In re McGrew*, 120 F.3d 1236, 1238, 43 USPQ2d 1632, 1635 (Fed. Cir. 1997) where the Court held that 35 U.S.C. 135(b) may be used as a basis for *ex parte* rejections.

Examiner Note:

1. In bracket 2, insert the publication number of the published application.

2. This form paragraph should only be used if the application being examined was filed after the publication date of the published application.

<

>

2304.02(d) Adequate Written Description [R-4]

37 CFR 41.202. Suggesting an interference.

(a) *Applicant*. An applicant, including a reissue applicant, may suggest an interference with another application or a patent. The suggestion must:

*****

(5) If a claim has been added or amended to provoke an interference, provide a claim chart showing the written description for each claim in the applicant's specification, and

*****

An applicant is not entitled to an interference simply because applicant wants one. The interfering claim must be allowable, particularly with respect to the written description supporting the interfering claim.

Historically, an applicant provoked an interference by copying a claim from its opponent. The problem this practice created was that differences in the underlying disclosures might leave the claim allowable to one party, but not to the other; or despite identical claim language differences in the disclosures might require that the claims be construed differently.

Rather than copy a claim literally, the better practice is to add (or amend to create) a fully supported claim and then explain why, despite any apparent differences, the claims define the same invention. 37 CFR 41.203(a). The problem of inadequate written description in claims added or amended to provoke an interference is so great that the issue has been singled out for heightened scrutiny early in the course of an interference. 37 CFR 41.201, under "Threshold issue."<

>

2304.03 Patentee Suggestion [R-4]

37 CFR 41.202. Suggesting an interference.

*****

(b) Patentee. A patentee cannot suggest an interference under this section but may, to the extent permitted under § 1.99 and § 1.291 of this title, alert the examiner of an application claiming interfering subject matter to the possibility of an interference.

*****

A patentee may not suggest an interference unless it becomes an applicant by filing a reissue application. A patentee may, however, to the limited extent permitted under 37 CFR 1.99 and 1.291, alert an examiner to the existence of interfering claims in an application. See MPEP § 1134 and § 1901.<

>

2304.04 Examiner Suggestion [R-4]

37 CFR 41.202. Suggesting an interference.

*****

(c) *Examiner*. An examiner may require an applicant to add a claim to provoke an interference. Failure to satisfy the requirement within a period (not less than one month) the examiner sets will operate as a concession of priority for the subject matter of the claim. If the interference would be with a patent, the applicant must also comply with paragraphs (a)(2) through (a)(6) of this section. The claim the examiner proposes to have added must, apart from the question of priority under 35 U.S.C. 102 (g):

(1) Be patentable to the applicant, and

(2) Be drawn to patentable subject matter claimed by another applicant or patentee.

*****

<

>

2304.04(a) Interfering Claim Already in Application [R-4]

If the applicant already has a claim to the same subject matter as a claim in the application or patent of another inventor, then there is no need to require the applicant to add a claim to have a basis for an interference.

The examiner may invite the applicant to suggest an interference pursuant to 37 CFR 41.202(a). An applicant may be motivated to do so in order to present its views on how the interference should be declared.

If the applicant does not suggest an interference, then the examiner should work with an Interference Practice Specialist (IPS) to suggest an interference to the Board of Patent Appeals and Interferences (Board). The suggestion should include an explanation of why at least one claim of every application or patent defines the same invention within the meaning of 37 CFR 41.203(a). See MPEP § 2301.03 for a discussion of interfering subject matter. The examiner must also complete Form PTO-850.

The examiner should be prepared to discuss why claims interfere, whether the subject matter of other claims would have been anticipated or rendered obvious if the interfering claims are treated as prior art, and whether an applicant or patentee is entitled to claim the benefit of an application as a constructive reduction-to-practice. The IPS may require the examiner to prepare a memorandum for the Board on any of these subjects. The IPS may require the examiner to participate in a conference with the Board to discuss the suggested interference.<

>

2304.04(b) Requiring a Claim [R-4]

35 U.S.C. 132. Notice of rejection; reexamination.

(a) Whenever, on examination, any claim for a patent is rejected, or any objection or requirement made, the Director shall notify the applicant thereof, stating the reasons for such rejection, or objection or requirement, together with such information and references as may be useful in judging of the propriety of continuing the prosecution of his application; and if after receiving such notice, the applicant persists in his claim for a patent, with or without amendment, the application shall be reexamined. No amendment shall introduce new matter into the disclosure of the invention.

*****

The examiner may, pursuant to 35 U.S.C. 132(a), require an applicant to add a claim that would interfere with the claim of another application or patent. For example, the requirement may be made to obtain a clearer definition of the interfering subject matter or to establish whether the applicant will pursue claims to the interfering subject matter. When the requirement is based on a published application with allowed claims or a patent, the examiner must identify the published application or the patent in making the requirement.

Given the cost and complexity of interferences, a requirement to add a claim under 37 CFR 41.202(c) should not be lightly made. Before making the requirement, the examiner should consult with an Interference Practice Specialist (IPS). The following principles should guide the examiner in exercising discretion to make this requirement:

(A) An interference should generally not be suggested if examination of the application is not otherwise completed.

(B) The required claim must not encompass prior art or otherwise be barred.

(C) The application must provide adequate support under 35 U.S.C. 112, first paragraph for the subject matter of the required claim.

(D) A claim should not be required when the applicant expressly states that the commonly described subject matter is not the applicant's invention.

(E) A claim based on a claim from a published application should not be required unless the claim from the published application has been allowed.

Example 1

A patent is 35 U.S.C. 102(b) prior art against any possible interfering claim. No interfering claim should be required.

Example 2

The patent issued more than one year ago and the applicant did not previously have a claim to the

same subject matter. Any added claim would most likely be time barred under 35 U.S.C. 135(b)(1). No interfering claim should be required.

Example 3

An application describes work that attributes to another inventor, but also describes and claims an improvement. The other inventor has received a patent for original work. The applicant may in some sense have 35 U.S.C. 112, first paragraph support for an interfering claim to the other inventor's work. Nevertheless, the applicant has indicated that the commonly described subject matter is not the applicant's invention. No interfering claim should be required.

Example 4

An application has support for both a generic claim G and a species claim G1. The applicant only claims the genus G. A patent discloses and claims only G1. Under the facts of this example, there is no evidence that genus G would have rendered the species G1 obvious. If for some reason the patent is not available as a reference against the application, the examiner may require the applicant to add a claim to species G1 after consulting with an IPS.

Example 5

Published application H and application I both support a claim to H1. Published application H contains a claim to H1, but application I does not. The claim to H1 in the published application is under rejection. Applicant I should not ordinarily be required to add the claim.

Form paragraph 23.04 may be used to require applicant to add a claim to provoke interference.

¶ *23.04 Requiring Applicant to Add Claim to Provoke Interference*

The following allowable claim from **[1]**is required to be added for the purpose of an interference:

[2]

The claim must be copied exactly.

Applicant is given ONE MONTH or THIRTY DAYS, whichever is longer, from the mailing date of this communication to add the claim. Refusal to add a required claim will operate as a concession of priority for the subject matter of the required claim, but will **not** result in abandonment of this application. See 37 CFR 41.202(c) and MPEP § 2304.04(b). THE PROVISIONS OF 37 CFR 1.136 DO NOT APPLY TO THE TIME SPECIFIED IN THIS ACTION.

If the interference would be with a patent, applicant must also comply with 37 CFR 41.202(a)(2) to (a)(6).

Examiner Note:

1. In bracket 1, insert the published application number if the claim is an allowed claim from a U.S. application publication or the patent number if the claim is from a U.S. patent.
2. In bracket 2, insert the claim which applicant is required to add to provoke an interference.

APPLICANT MUST ADD THE CLAIM

If required to add a claim under 37 CFR 41.202(c), the applicant must do so. Refusal to add a required claim will operate as a concession of priority for the subject matter of the required claim. The applicant would then be barred from claiming, not only the subject matter of the required claim, but any subject matter that would have been anticipated or rendered obvious if the required claim were treated as prior art. *In re Ogiue*, 517 F.2d 1382, 1390, 186 USPQ 227, 235 (CCPA 1975).

While complying with the requirement to add a claim, an applicant may also express disagreement with the requirement several ways, including:

(A) Identifying a claim already in its application, or another of its applications, that provides a basis for the proposed interference;

(B) Adding an alternative claim and explaining why it would provide a better basis for the proposed interference (such as having better support in the applicant's disclosure); or

(C) Explaining why the required claim is not patentable to the applicant.

The examiner may withdraw the requirement if persuaded by the reasons the applicant offers.<

>

2304.05 Common Ownership [R-4]

37 CFR 41.206. Common interests in the invention.

An administrative patent judge may decline to declare, or if already declar ed the Board may issue judgment in, an interference between an application and another application or patent that are commonly owned.

An interference is rarely appropriate between two applications or an application and patent that belong to the same owner. The owner should ordinarily be able to determine priority and is obligated under 37 CFR 1.56 to inform the examiner about which application or patent is entitled to priority. The examiner

may require an election of priority between the application and other application or patent. 35 U.S.C. 132(a).

In making the election, the owner must eliminate the commonly claimed subject matter. This may be accomplished by canceling the interfering application claims, disclaiming the interfering patent claims, amending the application claims such that they no longer interfere, or filing a reissue application to amend the patent claims such that they no longer interfere.

Example 1

Two corporations have applications that claim the same invention. After a merger of the corporations, the resulting corporation owns both applications. The new corporation is obligated to investigate priority. Once the corporation has had an opportunity to determine which application is entitled to priority, the corporation must elect between the applications or otherwise eliminate the need for an interference.

Example 2

J files an application in which J is the sole inventor and assignee. K files an application in which J and K are named as inventors and co-assignees. Although J is an owner of both applications, an interference may nevertheless be necessary if J and K disagree about which application is entitled to priority.<

>

2305 Requiring a Priority Showing [R-4]

37 CFR 41.202. Suggesting an interference.

*****

(d) *Requirement to show priority under 35 U.S.C. 102(g).* (1) When an applicant has an earliest constructive reduction to practice that is later than the apparent earliest constructive reduction to practice for a patent or published application claiming interfering subject matter, the applicant must show why it would prevail on priority.

*****

(e) *Sufficiency of showing.* (1) A showing of priority under this section is not sufficient unless it would, if unrebutted, support a determination of priority in favor of the party making the showing.

(2) When testimony or production necessary to show priority is not available without authorization under § 41.150(c) or § 41.156(a), the showing shall include:

(i) Any necessary interrogatory, request for admission, request for production, or deposition request, and

(ii) A detailed proffer of what the response to the interrogatory or request would be expected to be and an explanation of the relevance of the response to the question of priority.

*****

Whenever the application has an earliest constructive reduction-to-practice that is later than the earliest constructive reduction-to-practice of a published application having allowed claims or a patent with which it interferes, the applicant must make a priority showing under 37 CFR 41.202(d)(1).

There are two typical situations in which a showing under 37 CFR 41.202(d)(1) is filed without a requirement from the examiner. First, the applicant may be complying with 37 CFR 41.202(a)(2) in order to suggest an interference under 37 CFR 41.202(a) or as part of complying with a requirement under 37 CFR 41.202(c). Second, the applicant may file the showing to overcome a rejection based on 35 U.S.C. 102(a) or 102(e) when an affidavit is not permitted under 37 CFR 1.131(a)(1) because the applicant is claiming interfering subject matter.

If no showing has been filed, and the application's earliest constructive reduction-to-practice is later than the earliest constructive reduction-to-practice of a patent or published application, then the examiner must require a showing of priority. This showing is necessary because an insufficient showing (including no showing at all) can trigger a prompt judgment against the applicant in an interference. 37 CFR 41.202(d)(2). The applicant may choose to comply with a requirement under 37 CFR 41.202(d)(1) by suggesting an interference under 37 CFR 41.202(a).

Example

Application L has claims that interfere with claims of patent M. Application L was filed in June 2001. The application that resulted in patent M was filed in November 2001, but has an earliest constructive reduction-to-practice in a foreign application filed in December 2000. Assuming no rejection is available under 35 U.S.C. 102(e), the examiner must require a showing under 37 CFR 41.202(d)(1) in application L.

I. RELATIONSHIP TO 37 CFR 1.131 AFFIDAVIT

Ordinarily an applicant may use an affidavit of prior invention under 37 CFR 1.131 to overcome a rejection under 35 U.S.C. 102(a) or 102(e). An exception to the rule arises when the reference is a patent or application published under 35 U.S.C. 122(b) and the reference has claims directed to the same patentable invention as the application claims being rejected. 37 CFR 1.131(a)(1). The reason for this exception is that priority is determined in an interference when the claims interfere. 35 U.S.C. 135(a). In such a case, the applicant must make the priority showing under 37 CFR 41.202(d) instead. In determining whether a 37 CFR 1.131 affidavit is permitted or not, the examiner should keep the purpose of the exception in mind. If an interference would not be possible at the time the affidavit would be submitted, then the affidavit should be permitted. This situation could arise two ways.

First, the claims that matter for the purposes of 37 CFR 1.131 are not the published claims but the currently existing claims. For example, if the claims that were published in a published application have been significantly modified during subsequent examination, they may no longer interfere with the rejected claims. Similarly, the patent claims may have been subsequently corrected or amended in a reissue application or a reexamination. Since an interference no longer exists between the current claims in the patent or published application and the rejected claims, an affidavit under 37 CFR 1.131 may be submitted.

Similarly, if a published application contains claims to the same invention, but the claims in the published application are not in condition for allowance, then no interference is yet possible. 37 CFR 41.102. Since the claims in the published application might never be allowed in their present form, it is not appropriate to proceed as though an interference would be inevitable. Consequently, an affidavit under 37 CFR 1.131 may be submitted.

II. NOT A PRIORITY STATEMENT

A priority showing under 37 CFR 41.202(d)(1), which is presented during examination, is not the same as a priority statement under 37 CFR 41.204(a), which is filed during an interference. A priority statement is a notice of what a party intends to prove on the issue of priority during an interference. A priority showing under 37 CFR 41.202(d)(1) must, however, actually prove priority assuming that the opposing party did not oppose the showing. 37 CFR 41.202(e)(1). Generally speaking, while a priority statement might be more detailed in some respects, it will not be sufficient to make the necessary showing of priority for the purposes of 37 CFR 41.202.

An applicant presenting a priority showing must establish through the showing that it would prevail on priority if an interference is declared and the opponent does not oppose the showing. The requirement for a priority showing is intended to spare a senior party patentee the burden of an interference if the junior party applicant cannot establish that it would prevail in an interference even if the senior party does nothing. *Kistler v. Weber*, 412 F.2d 280, 283-85, 162 USPQ 214, 217-19 (CCPA 1969) and *Edwards v. Strazzabosco*, 58 USPQ2d 1836 (Bd. Pat. App. & Inter. 2001).

The consequence of an inadequate showing may be serious for the applicant. If an interference is declared and the Board of Patent Appeals and Interferences (Board) finds the priority showing insufficient (thereby issuing an order to show cause why judgment should not be entered against the applicant), the applicant will not be allowed to present additional evidence to make out a priority showing unless the applicant can show good cause why any additional evidence was not presented in the first instance with the priority showing before the examiner. 37 CFR 41.202(d)(2); *Huston v. Ladner*, 973 F.2d 1564, 23 USPQ2d 1910 (Fed. Cir. 1992); *Hahn v. Wong*, 892 F.2d 1028, 13 USPQ2d 1313 (Fed. Cir. 1989); *Edwards v. Strazzabosco*, 58 USPQ2d 1836 (Bd. Pat. App. & Inter. 2001). The principles which govern review of a priority showing are discussed in *Basmadjian v. Landry*, 54 USPQ2d 1617 (Bd. Pat. App. & Inter. 1997) (citing former 37 CFR 1.608(b)).<

>

2306 Secrecy Order Cases [R-4]

37 CFR 5.3. Prosecution of application under secrecy orders; withholding patent.

*****

(b) An interference will not be declared involving a national application under secrecy order. An applicant whose application is under secrecy order may suggest an interference (§ 41.202(a) of

this title), but the Office will not act on the request while the application remains under a secrecy order.

*****

Once an interference is declared, an opposing party is entitled to access to the application and benefit applications. 37 CFR 41.109. See MPEP § 2307.02. Consequently, an interference should not be suggested for an application under a secrecy order. See MPEP § 120 and § 130. When a secrecy order expires or is rescinded, if the examination is otherwise completed, 37 CFR 41.102, then the need for an interference may be reconsidered.

If an application not under a secrecy order has allowable claims that interfere with allowable claims of an application that is under a secrecy order, then the application that is not under the secrecy order should be passed to issue as a patent. An interference may be suggested with the application and the patent (unless the patent has expired) once the secrecy order has been lifted.

Example

Application L discloses and claims a transistor that is useful in a commercial context. Application M discloses the same transistor in the context of a missile control circuit, but claims only the transistor. A secrecy order is placed on application M. Once examination of application L is completed and the transistor claim is allowable, application L should pass to issue.<

>

2307 Action During an Interference [R-4]

37 CFR 41.103. Jurisdiction over involved files.

The Board acquires jurisdiction over any involved file when the Board initiates a contested case. Other proceedings for the involved file within the Office are suspended except as the Board may order.

Once a patent or application becomes involved in an interference, the Board of Patent Appeals and Interferences (Board) has jurisdiction over the file. The examiner may not act on an involved patent or application except as the Board may authorize.

The Board may occasionally consult with the examiner, for instance, on a question regarding the technology at issue in an involved application or patent.

The Board retains jurisdiction over the interference until the interference is terminated. The Director has defined termination to occur after a final Board judgment in the interference and the period for seeking judicial review has expired or, if judicial review is sought, after completion of judicial review including any further action by the Board. 37 CFR 41.205(a).<

>

2307.01 *Ex Parte* Communications [R-4]

37 CFR 41.11. Ex parte communications in inter partes proceedings.

An ex parte communication about an inter partes reexamination (subpart C of this part) or about a contested case (subparts D and E of this part) with a Board member, or with a Board employee assigned to the proceeding, is not permitted.

Since an interference involves two or more parties, the integrity of the process requires the opportunity for the opposing party to participate in communications or actions regarding any involved application or patent. Once an interference is declared, any attempt by a party to communicate with the Board of Patent Appeals and Interferences (Board) through the examiner or to have the examiner act in an involved patent or application without Board authorization should be promptly reported to the Board. Board action may include a sanction in the interference or referral of a patent practitioner to the Office of Enrollment and Discipline.<

>

2307.02 Access to Related Files [R-4]

37 CFR 41.109. Access to and copies of Office records.

(a) *Request for access or copies*. Any request from a party for access to or copies of Office records directly related to a contested case must be filed with the Board. The request must precisely identify the records and in the case of copies include the appropriate fee set under § 1.19(b) of this title.

(b) *Authorization of access and copies.* Access and copies will ordinarily only be authorized for the following records:

(1) The application file for an involved patent;

(2) An involved application; and

(3) An application for which a party has been accorded benefit under subpart E of this part.

*****

In addition to any access permitted to a member of the public under 37 CFR 1.11 and 1.14 (see MPEP § 103), an opposing party may be authorized under 37 CFR 41.109 to have access to or a copy of the record for any involved patent or application, and for any

application for which benefit has been accorded. The availability of a file to an opposing party under 37 CFR 41.109 has no bearing on whether a file is otherwise available under 37 CFR 1.11 or 1.14.<

>

2307.03 Suspension of Related Examinations [R-4]

Although the examiner may not act in a patent or an application directly involved in an interference, 37 CFR 41.103, examination may continue in related cases, including any benefit files. Once examination is completed, the examiner should consult with an Interference Practice Specialist (IPS) to determine whether and how further action should proceed. The IPS may consult with the Board of Patent Appeals and Interferences (Board) to determine whether the application claims would be barred in the event the applicant loses the interference.

Suspension may be necessary if the claims would be barred by a loss in the interference. Steps should be considered to minimize the effect of any patent term adjustment that would result from the suspension. For instance, the examiner could require restriction, 35 U.S.C. 121, of the application to only the claims that do not interfere so that they can be issued. The applicant may then file a divisional application with the interfering claims, which may be suspended.<

>

2307.04 Additional Parties to Interference [R-4]

During the course of an interference, the examiner may come across applications or patents of parties that claim the same invention, but are not already involved in the interference. If so, the examiner should consult with an Interference Practice Specialist (IPS) and prepare a referral of the suggested interference to the Board of Patent Appeals and Interferences in the same way that a referral is prepared in the first instance.<

>

2307.05 Board Action on Related Files [R-4]

Occasionally, the Board may order that a paper be filed in a related application. Generally, the paper will notify the examiner of a fact, such as a party admission or prior art, that may be relevant to examination of the related case.<

>

2307.06 Action at the Board [R-4]

Action at the Board of Patent Appeals and Interferences (Board) during an interference is beyond the scope of this Chapter. For further information, see 37 CFR part 41, subparts A, D, and E; see also the Board's Contested Case Practice Guide. A Standing Order and other orders, which further direct the conduct of the parties, are also entered in each interference.<

>

2308 Action After an Interference [R-4]

37 CFR 41.127. Judgment.

(a) *Effect within Office*—(1) *Estoppel*. A judgment disposes of all issues that were, or by motion could have properly been, raised and decided. A losing party who could have properly moved for relief on an issue, but did not so move, may not take action in the Office after the judgment that is inconsistent with that party's failure to move, except that a losing party shall not be estopped with respect to any contested subject matter for which that party was awarded a favorable judgment.

(2) *Final disposal of claim*. Adverse judgment against a claim is a final action of the Office requiring no further action by the Office to dispose of the claim permanently.

*****

(c) *Recommendation*. The judgment may include a recommendation for further action by the examiner or by the Director. If the Board recommends rejection of a claim of an involved application, the examiner must enter and maintain the recommended rejection unless an amendment or showing of facts not previously of record is filed which, in the opinion of the examiner, overcomes the recommended rejection.

*****

Jurisdiction over an application returns to the examiner once the interference has terminated. If there is a recommendation for further action in the application, the examiner must reopen prosecution to consider the recommendation. The examiner must enter any recommended rejection, and must maintain the rejection unless the applicant by amendment or submission of new evidence overcomes the rejection to the examiner's satisfaction.

If there is no recommendation in the judgment, the examiner should update the search and may, but is not

required to, reopen prosecution for any claim not disposed of in the judgment.

An interference judgment simply resolves any question of priority between the two parties to the interference. The judgment does not prevent the examiner from making a rejection in further examination in the same application or a different application. If a party loses on an issue in the interference, the examiner should reject any claim for which allowance would be inconsistent with the interference judgment.

Form paragraph 23.02 may be used to resume *ex parte* prosecution.

¶ *23.02 Ex Parte Prosecution Is Resumed*

Interference No. **[1]** has been terminated by a decision **[2]** to applicant. *Ex parte* prosecution is resumed.

Examiner Note:

1. In bracket 1, insert the interference number.
2. In bracket 2, insert whether favorable or unfavorable.

<

>

2308.01 Final Disposal of Claims [R-4]

Judgment against a claim in an interference, including any judgment on priority or patentability, finally disposes of the claim. No further action is needed from the examiner on that claim. If no claim remains allowable to the applicant, a notice of abandonment should be issued.<

>

2308.02 Added or Amended Claims [R-4]

An applicant may file a motion during the interference to add or amend a claim. A patentee may file a reissue application in support of a motion to add or amend a claim. A copy of the paper adding or amending the claim will be placed in the official record of the application, but not entered. A decision on the motion is entered in the official record of the application. The examiner may enter the added claim or amended claim into the application only if, and only to the extent, authorized by the Board of Patent Appeals and Interferences, typically in the decision on the motion. The decision authorizing entry of the added or amended claim does not prevent the examiner from rejecting the claim during further prosecution.<

>

2308.03 Estoppel Within the Office [R-4]

If a party loses on an issue, it may not re-litigate the issue before the examiner or in a subsequent Board of Patent Appeals and Interferences (Board) proceeding. The time for the party to make all pertinent arguments is during the interference, unless the Board expressly prevented the party from litigating the issue during the interference.

There are two main types of interference estoppel. First, a losing party is barred on the merits from seeking a claim that would have been anticipated or rendered obvious by the subject matter of the lost count. *In re Deckler*, 977 F.2d 1449, 24 USPQ2d 1448 (Fed. Cir. 1992); *Ex parte Tytgat*, 225 USPQ 907 (Bd. Pat. App. & Inter. 1985). Second, a losing party is procedurally barred from seeking from the examiner relief that could have been--but was not--sought in the interference. 37 CFR 41.127(a)(1); *Ex parte Kimura*, 55 USPQ2d 1537 (Bd. Pat. App. & Inter. 2000) (reissue applicant estopped to claim compound when patentability of that compound could have been put in issue in interference where opponent's application also described compound).

The examiner should consult with an Interference Practice Specialist (IPS) before allowing a claim to a losing party that was added or amended during post-interference examination.

Example 1

The applicant lost on priority for a count drawn to subject matter X. The Board's judgment automatically disposed of all of the applicant's claims corresponding to the count. The applicant files a continuing application with a claim to subject matter X. The claim must be rejected as estopped on the merits by the applicant's loss in the interference.

Example 2

Same facts as Example 1 except the applicant files a continuing application with a claim generic to subject matter X. Since the generic claim encompasses subject matter lost in the interference, the generic claim must be rejected as estopped on the merits by the loss in the interference.

Example 3

Same facts as Example 1 except the applicant files a continuing application with a claim to subject matter that would have been obvious in view of subject matter X. The claim must be rejected as estopped on the merits by the applicant's loss in the interference, but the examiner must demonstrate why the claim would have been obvious if subject matter X is assumed to be prior art.

Example 4

Same facts as Example 1 except the applicant files a continuing application with a claim identical to a claim that corresponded to the count of the interference. The applicant also files a showing of why the claim should not have corresponded to the count. The claim should be rejected as procedurally estopped. Whether the showing is adequate or not, it is too late. The time to make the showing was during the interference.

Example 5

Same facts as Example 4 except that during the interference the applicant timely requested, but was not permitted, to show the claim did not correspond to the count. The examiner may determine in light of the new showing whether the lost count would have anticipated or rendered obvious the subject matter of the claim. The procedural estoppel does not apply if, through no fault of the applicant, the Board prevented the applicant from seeking relief during the interference.

Example 6

The applicant's claim 1 was held unpatentable during the interference. The applicant could have moved, but did not move, to amend the claim. The applicant files a continuing application with an amended claim 1. If the subject matter of the amended claim would have been anticipated or obvious in view of a count of the interference, it must be rejected as procedurally estopped. Whether the amendment is sufficient to overcome the ground for unpatentability or not, the time to have amended the claim was during the interference.

Example 7

Same situation as Example 6 except the applicant did move to amend the claim, but the motion was denied. The result is the same as in Example 6. If the subject matter of the amended claim would have been anticipated or obvious in view of a count of the interference, it must be rejected as procedurally estopped. The applicant's lack of success on the motion does not prevent the estoppel from applying to the claim.

Example 8

Same facts as Example 6 except the applicant filed a late request during the interference to amend the claim to overcome the basis for unpatentability. The request was denied as untimely. The claim must be rejected as procedurally estopped. Even though the applicant was not permitted to amend the claim during the interference, the estoppel still applies because the applicant's inability to obtain relief in the interference was the result of the applicant's failure to seek timely relief.<

>

2308.03(a) Losing Party [R-4]

A party is barred (estopped) from raising an issue if the party lost on the issue during the interference. A party may lose on one issue, yet not lose on a different issue.

Example

The applicant lost the interference on a count drawn to a compound, but the opponent lost on a count drawn to methods of using the compound. The applicant may continue to pursue claims to the method of using the compound, but not claims to the compound itself.<

>

2308.03(b) No Interference-in-Fact [R-4]

A judgment of no interference-in-fact means that no interference is needed to resolve priority between the parties. Neither party has lost the interference for the purpose of estoppel, 37 CFR 41.127(a)(1), even if one of the parties suggested the interference.

A judgment of no interference-in-fact bars any further interference between the same parties for claims to the same invention as the count of the interference.<

>

2308.03(c) No Second Interference [R-4]

No second interference should occur between the same parties on patentably indistinct subject matter. If the Board of Patent Appeals and Interferences held that there is no interference-in-fact between the parties for the subject matter of the count, that holding may not be reopened in further examination. If a party that lost the earlier interference is again claiming the same invention as the count, the interfering claims should be rejected as estopped.<

>

2309 National Aeronautics and Space Administration or Department of Energy [R-4]

Ownership of an invention made pursuant to a U.S. government contract may be vested in the contracting government agency. The Board of Patent Appeals and Interferences (Board) determines two such ownership contests using interference procedures: for the National Aeronautics and Space Administration (NASA), 42 U.S.C. 2457 (inventions having significant utility in aeronautical or space activity), and for the Department of Energy (DoE), 42 U.S.C. 2182 (inventions relating to special nuclear material or atomic energy).

An applicant with an application covered by these Acts must file a statement regarding the making or conception of the invention and any relation to a contract with NASA or DoE. See MPEP § 150 and § 151. The examiner should work in coordination with Licensing and Review and one of the Technology Centers Interference Practice Specialists in suggesting these cases to the Board. Although these cases are not interferences, the interference practices in this chapter generally apply to NASA and DoE ownership contests as well.<

●●●●●●●●●●●●●●●●●●●●●●●●●●●●

Chapter 2400 Biotechnology

2401 Introduction

This chapter provides guidance on the practices and procedures for implementation of the deposit rules (37 CFR 1.801 - 1.809) and the sequence rules (37 CFR 1.821 - 1.825). The final rule for deposits of biological materials for patent purposes was published in the *Federal Register*, 54 FR 34864 (August 22, 1989) and in the *Official Gazette*, 1106 O.G. 37 (September 12, 1989). The deposit rules went into effect on January 1, 1990. Revised deposit rules were published in the *Federal Register* at 66 FR 21090 (April 27, 2001) and in the *Official Gazette* at 1246 O.G. 104 (May 22, 2001) and went into effect on May 29, 2001. The final rule for the requirements for patent applications containing nucleotide sequence and/or amino acid sequence disclosures was published in the *Federal Register*, 55 FR 18230 (May 1, 1990) and in the *Official Gazette*, 1114 O.G. 29 (May 15, 1990) and went into effect on October 1, 1990. Revised sequence rules were published in the *Federal Register* at 63 FR 29620 (June 1, 1998) and in the *Official Gazette* at 1121 O.G. 82 (June 23, 1998) and went into effect on July 1, 1998.

Further revisions to the sequence rules were published in the *Federal Register* at 65 FR 54604 (September 8, 2000) and in the *Official Gazette* at 1238 O.G. 145 (September 19, 2000) and went into effect on September 8, 2000.

Additional information regarding the development of the deposit rules can be obtained in the text of the draft policy statement, published in BNA's *Patent, Trademark and Copyright Journal*, 32 PTCJ 781 at 76, 90 (May 22, 1986), the advanced notice of proposed rulemaking, published in the *Federal Register*, 52 FR 34080 (September 9, 1987), and in the *Official Gazette*, 1082 O.G. 47 (September 29, 1987) and in the notice of proposed rulemaking, published in the *Federal Register*, 53 FR 39420 (October 6, 1988), and in the *Official Gazette*, 1095 O.G. 47 (October 25, 1988). Additional information regarding the development of the sequence rules can be obtained in the text of the notice of proposed rulemaking, published in the *Federal Register*, 54 FR 18671 (May 2, 1989) and in the *Official Gazette*, 1102 O.G. 34 (May 16, 1989).

See MPEP § 803.04 and § 1850 for restriction and unity of invention practice respectively in patent applications claiming independent and distinct nucleotide sequences. See also MPEP § 2434.

2402 The Deposit Rules

Every patent must contain a written description of the invention sufficient to enable a person skilled in the art to which the invention pertains to make and use the invention. Where the invention involves a biological material and words alone cannot sufficiently describe how to make and use the invention in a reproducible manner, access to the biological material may be necessary for the satisfaction of the statutory requirements for patentability under 35 U.S.C. 112. Courts have recognized the necessity and desirability of permitting an applicant for a patent to supplement the written disclosure in an application with a deposit of biological material which is essential to meet some requirement of the statute with respect to the claimed invention. See, e.g., *Ajinomoto Co. v. Archer-Daniels-Midland Co.*, 228 F.3d 1338, 1345-46, 56 USPQ2d 1332, 1337-38 (Fed. Cir. 2000), *cert. denied*, 121 S.Ct. 1957 (2001)(explaining how deposit may help satisfy enablement requirement); *Merck and Co., Inc. v. Chase Chemical Co.*, 273 F. Supp. 68, 155 USPQ 139 (D. N.J. 1967); *In re Argoudelis*, 434 F.2d 666, 168 USPQ 99 (CCPA 1970). To facilitate the recognition of deposited biological material in patent applications throughout the world, the Budapest Treaty on the International Recognition of the Deposit of Microorganisms for the Purposes of Patent Procedure was established in 1977, and became operational in 1981. The Treaty requires signatory countries, like the United States, to recognize a deposit with any depository which has been approved by the World Intellectual Property Organization (WIPO).

The deposit rules (37 CFR 1.801 - 1.809) set forth examining procedures and conditions of deposit which must be satisfied in the event a deposit is required. The rules do not address the substantive issue of whether a deposit is required under any particular set of facts.

The rules are effective for all applications filed on or after January 1, 1990, and for all reexamination proceedings in which the request for reexamination was filed on or after January 1, 1990, except that deposits made prior to the effective date which were acceptable under the then current practice will be acceptable in such applications and proceedings. Since most of the provisions of the rules reflect policy and practice existing prior to January 1, 1990, little change in practice or burden on applicants for patent and patent owners relying on the deposit of biological material has occurred. Applicants and patent owners are encouraged to comply with these rules even if their applications and reexamination proceedings were filed prior to January 1, 1990.

2403 Deposit of Biological Material

37 CFR 1.801. Biological material.

For the purposes of these regulations pertaining to the deposit of biological material for purposes of patents for inventions under 35 U.S.C. 101, the term biological material shall include material that is capable of self-replication either directly or indirectly. Representative examples include bacteria, fungi including yeast, algae, protozoa, eukaryotic cells, cell lines, hybridomas, plasmids, viruses, plant tissue cells, lichens and seeds. Viruses, vectors, cell organelles and other non-living material existing in and reproducible from a living cell may be deposited by deposit of the host cell capable of reproducing the non-living material.

37 CFR 1.801 indicates that the rules pertaining to deposits for purposes of patents for inventions under 35 U.S.C. 101 are intended to relate to biological material. For the purposes of these rules, the term "biological material" is defined in terms of a non-exhaustive list of representative materials which can be deposited in accordance with the procedures defined in these rules. These rules are intended to address procedural matters in the deposit of biological material for patent purposes. They are not designed to decide substantive issues such as whether a deposit of a particular organism or material would be recognized or necessary for the purposes of satisfying the statutory requirements for patentability under 35 U.S.C. 112. Although the issue of the need to make a deposit of biological material typically arises under the enablement requirement of the first paragraph of 35 U.S.C. 112, the issue could also arise under the description requirement (35 U.S.C. 112, first paragraph), best mode requirement (35 U.S.C. 112, first paragraph) or the requirements of the second paragraph of 35 U.S.C. 112 with respect to the claims.

37 CFR 1.801 does not attempt to identify what biological material either needs to be or may be deposited to comply with the requirements of 35 U.S.C. 112. For the most part, this issue must be addressed on a case-by-case basis. Thus, while the Office does not currently contemplate that there would be any situations where a material that is not capable of self-replication either directly or indirectly would be acceptable as a deposit, an applicant is clearly not precluded by these rules from attempting to show in any given application why the deposit of such a material should be acceptable to satisfy the requirements of 35 U.S.C. 112.

2403.01 Material Capable of Self-Replication

Biological material includes material that is capable of self-replication either directly or indirectly. Direct self-replication includes those situations where the biological material reproduces by itself. Representative examples of materials capable of self-replication are defined in the rule. Indirect self-replication is meant to include those situations where the biological material is only capable of replication when another self-replicating biological material is present. Self-replication after insertion in a host is one example of indirect self-replication. Examples of indirect replicating biological materials include viruses, phages, plasmids, symbionts, and replication defective cells. The list of representative examples of each type of replicating material includes viruses to demonstrate that the two lists in the rule are not intended to be mutually exclusive.

2403.02 Plant Material

Although plant material is included within the scope of the definition of biological material for purposes of patents for plant inventions under 35 U.S.C. 101, the rules on deposits are not applicable to applications filed under the Plant Patent Act (35 U.S.C. 161-164). The Office is of the view that a deposit is not required under the present provisions of 35 U.S.C. 162. Thus, a deposit is not necessary for the grant of a plant patent under the provisions of 35 U.S.C. 161-164. As with other biological material deposited for

purposes of patents for inventions under 35 U.S.C. 101, the deposit of plant material together with the written specification must enable those skilled in the art to make and use the claimed invention, in accordance with the requirements of 35 U.S.C. 112.

As with some types of reproducible biological material, seeds can be reproduced only after a growing season which may be relatively long. Although the rules do not specify a specific number of seeds to be deposited to meet the requirements of these rules, the Office will consider 2500 to be a minimum number in the normal case, but will give an applicant the opportunity to provide justification why a lesser number would be suitable under the circumstances of a particular case. The Department of Agriculture requires a deposit of 2500 seeds for the grant of a Plant Variety Protection Certificate under the Plant Variety Protection Act (7 U.S.C. 2321 *et seq.*). As the reproduction of seeds will often take a substantial period of time, the Office will require, at a minimum for the grant of a patent, a number of seeds that is likely to satisfy demand for samples once the patent is granted. In one instance, the Office accepted a deposit of 600 seeds coupled with an undertaking to deposit 1900 more seeds with due diligence. The particular situation involved a "seedless" vegetable with very few seeds per "fruit;" about two growing seasons were required to provide the additional 1900 seeds.

2404 Need or Opportunity to Make a Deposit

37 CFR 1.802. Need or opportunity to make a deposit.

(a) Where an invention is, or relies on, a biological material, the disclosure may include reference to a deposit of such biological material.

(b) Biological material need not be deposited unless access to such material is necessary for the satisfaction of the statutory requirements for patentability under 35 U.S.C. 112. If a deposit is necessary, it shall be acceptable if made in accordance with these regulations. Biological material need not be deposited, *inter alia*, if it is known and readily available to the public or can be made or isolated without undue experimentation. Once deposited in a depository complying with these regulations, a biological material will be considered to be readily available even though some requirement of law or regulation of the United States or of the country in which the depository institution is located permits access to the material only under conditions imposed for safety, public health or similar reasons.

(c) The reference to a biological material in a specification disclosure or the actual deposit of such material by an applicant or patent owner does not create any presumption that such material is necessary to satisfy 35 U.S.C. 112 or that deposit in accordance with these regulations is or was required.

37 CFR 1.802(a) permits a deposit of a biological material to be referenced in a patent application where an invention is, or relies on, a biological material. The invention may rely on a biological material for the purposes of making or using the invention, either as a preferred mode or an alternative mode of operation. A reference to a deposit may be included in a specification even though the deposit is not required to satisfy the requirements of 35 U.S.C. 112.

There is no necessary implication or presumption that can or should be made about the need for a deposit simply because reference to a deposit is made in an application disclosure, as noted in paragraph (c). As noted in paragraph (b), biological material need not be deposited unless access to such material is necessary for the satisfaction of the statutory requirements for patentability under 35 U.S.C. 112 and that access is not otherwise available in the absence of a deposit. Where a deposit is required to provide the necessary access, a deposit is acceptable for patent purposes only where it is made in accordance with these regulations. Even where access to biological material is required to satisfy these statutory requirements, a deposit may not be necessary if access sufficient to satisfy these requirements is otherwise available.

2404.01 Biological Material That Is Known and Readily Available to the Public

In an application where the invention required access to specific biological material, an applicant could show that the biological material is accessible because it is known and readily available to the public. The concepts of "known and readily available" are considered to reflect a level of public accessibility to a necessary component of an invention disclosure that is consistent with an ability to make and use the invention. To avoid the need for a deposit on this basis, the biological material must be both known and readily available - neither concept alone is sufficient. A material may be known in the sense that its existence has been published, but is not available to those who wish to obtain that particular known biological material. Likewise, a biological material may be

available in the sense that those having possession of it would make it available upon request, but no one has been informed of its existence.

The Board of Patent Appeals and Interferences has held that a description of the precise geographic location of marine tunicates, as a biological material, used in a claimed invention was adequate to satisfy the enablement requirement of 35 U.S.C. 112. *Ex Parte Rinehart*, 10 USPQ2d 1719 (Bd. Pat. App. & Int. 1985). The term "readily" used in the phrase "known and readily available" is considered appropriate to define that degree of availability which would be reasonable under the circumstances. If the biological material and its natural location can be adequately described so that one skilled in the art could obtain it using ordinary skill in the art, the disclosure would appear to be sufficient to meet the enablement requirement of 35 U.S.C. 112 without a deposit so long as its degree of availability is reasonable under the circumstances.

By showing that a biological material is known and readily available or by making a deposit in accordance with these rules, applicant does not guarantee that such biological material will be available forever. Public access during the term of the patent may affect the enforceability of the patent. Although there is a public interest in the availability of a deposited biological material during and after the period of enforceability of the patent, there should not be any undue concern about continued access to the public. See 37 CFR 1.806 (the term of deposit is "at least thirty (30) years and at least five (5) years after the most recent request" for a sample; the agreement sufficiently ensures that the deposit will be "available beyond the enforceable life of the patent"). Unless there is a reasonable basis to believe that the biological material will cease to be available during the enforceable life of the patent, current availability would satisfy the requirement. The incentives provided by the patent system should not be constrained by the mere possibility that a disclosure that was once enabling would become non-enabling over a period of time through no fault of the patentee. *In re Metcalfe*, 410 F.2d 1378, 161 USPQ 789 (CCPA 1969).

If an applicant has adequately established that a biological material is known and readily available, the Office will accept that showing. In those instances, however, the applicant takes the risk that the material may cease to be known and readily available. Such a defect cannot be cured by reissue after the grant of a patent.

On the other hand, *Ex parte Humphreys*, 24 USPQ2d 1255 (Bd. Pat. App. & Int. 1992), held that the only manner in which applicants could satisfy their burden of assuring public access to the needed biological material, and, thereby, compliance with the enablement requirement of 35 U.S.C. 112, was by making an appropriate deposit. The fact that applicants and other members of the public were able to obtain the material in question from a given depository prior to and after the filing date of the application in issue did not establish that upon issuance of a patent on the application that such material would continue to be accessible to the public. The applicants did not make of record any of the facts and circumstances surrounding their access to the material in issue from the depository, nor was there any evidence as to the depository's policy regarding the material if a patent would have been granted. Further, there was no assurance that the depository would have allowed unlimited access to the material if the application had matured into a patent.

There are many factors that may be used as indicia that a biological material is known and readily available to the public. Relevant factors include commercial availability, references to the biological material in printed publications, declarations of accessibility by those working in the field, evidence of predictable isolation techniques, or an existing deposit made in accordance with these rules. Each factor alone may or may not be sufficient to demonstrate that the biological material is known and readily available. Those applicants that rely on evidence of accessibility other than a deposit take the risk that the patent may no longer be enforceable if the biological material necessary to satisfy the requirements of 35 U.S.C. 112 ceases to be accessible.

The Office will accept commercial availability as evidence that a biological material is known and readily available only when the evidence is clear and convincing that the public has access to the material. See the final rule entitled "Deposit of Biological Materials for Patent Purposes," 54 FR 34864, 34875 (August 22, 1989). A product could be commercially available but only at a price that effectively eliminates accessibility to those desiring to obtain a sample. The

relationship between the applicant relying on a biological material and the commercial supplier is one factor that would be considered in determining whether the biological material was known and readily available. However, the mere fact that the biological material is commercially available only through the patent holder or the patent holder's agents or assigns shall not, by itself, justify a finding that the necessary material is not readily available, absent reason to believe that access to the biological material would later be improperly restricted.

The mere reference to a deposit or the biological material itself in any document or publication does not necessarily mean that the deposited biological material is readily available. Even a deposit made under the Budapest Treaty and referenced in a United States or foreign patent document would not necessarily meet the test for known and readily available unless the deposit was made under conditions that are consistent with those specified in these rules, including the provision that requires, with one possible exception (37 CFR 1.808(b)), that all restrictions on the accessibility be irrevocably removed by the applicant upon the granting of the patent. *Ex parte Hildebrand*, 15 USPQ2d 1662 (Bd. Pat. App. & Int. 1990).

A Budapest Treaty deposit cited in a U.S. patent need not be made available if it was not required to satisfy 35 U.S.C. 112. For this reason, 37 CFR 1.808(c) provides that upon request made to the Office, the Office will certify whether a deposit has been stated to have been made under conditions which make it available to the public as of the issue date. See 37 CFR 1.808(c) and MPEP § 2410.02 for the requirements of the request. The Office will not certify that the aforementioned statement has been made unless

(A) the deposit was necessary to overcome a rejection under 35 U.S.C. 112,

(B) there is, in the record, a statement by the examiner that a rejection would have been made "but for" the deposit (assumes deposit information in record, as filed), or

(C) the record otherwise clearly indicates that the deposit was made under Budapest Treaty, and that all restrictions imposed by the depositor on the availability to the public of the deposited material will be irrevocably removed upon the granting of the patent (with the possible exception of requiring the request for the deposit to be in the format specified in 37 CFR 1.808(b)).

If a deposit is not made under the conditions set forth in 37 CFR 1.808(a), the deposit cannot be relied upon for other purposes, e.g., the deposit cannot be relied upon by a third party to establish "known" and "readily available" in another application. See 37 CFR 1.808 and MPEP § 2410 and § 2410.02.

Once a deposit is made in a depository complying with these rules, and under conditions complying with these rules, a biological material will be considered to be readily available even though some requirement of law or regulation in the United States or in the country where the depository institution is located permits access to the material only under conditions imposed for health, safety or similar reasons. This provision is consistent with the Budapest Treaty (Article 5) and is designed to permit the patenting of inventions involving materials having restricted distribution, where the restrictions are imposed for the public, as opposed to the private, welfare.

2404.02 Biological Material That Can Be Made or Isolated Without Undue Experimentation

Applicant may show that a deposit is not necessary even though specific biological materials are required to practice the invention if those biological materials can be made or isolated without undue experimentation. Deposits may be required to support the claims if an isolation procedure requires undue experimentation to obtain the desired biological material. *Ex Parte Jackson*, 217 USPQ 804 (Bd. App. 1982). No deposit is required, however, where the required biological materials can be obtained from publicly available material with only routine experimentation and a reliable screening test. *Tabuchi v. Nubel*, 559 F.2d 1183, 194 USPQ 521 (CCPA 1977); *Ex Parte Hata*, 6 USPQ2d 1652 (Bd. Pat. App. & Int. 1987).

2404.03 Reference to a Deposit in the Specification

37 CFR 1.802(c) specifically provides that the mere reference to a biological material in the specification disclosure or the actual deposit of such material does not create any presumption that such referenced or deposited material is necessary to satisfy 35 U.S.C.

112, or that a deposit in accordance with these regulations is or was required. It should be noted, however, that a reference to a biological material, present in an application upon filing, may form the basis for making a deposit, where required, after the filing date of a given application but that the reference to the biological material, itself, cannot be added after filing without risking the prohibited introduction of new matter (35 U.S.C. 132). See the discussion of the Lundak application in MPEP § 2406.01.

2405 Acceptable Depository

37 CFR 1.803. Acceptable depository.

(a) A deposit shall be recognized for the purposes of these regulations if made in

(1) any International Depositary Authority (IDA) as established under the Budapest Treaty on the International Recognition of the Deposit of Microorganisms for the Purposes of Patent Procedure, or

(2) any other depository recognized to be suitable by the Office. Suitability will be determined by the Commissioner on the basis of the administrative and technical competence, and agreement of the depository to comply with the terms and conditions applicable to deposits for patent purposes. The Commissioner may seek the advice of impartial consultants on the suitability of a depository. The depository must:

(i) Have a continuous existence;

(ii) Exist independent of the control of the depositor;

(iii) Possess the staff and facilities sufficient to examine the viability of a deposit and store the deposit in a manner which ensures that it is kept viable and uncontaminated;

(iv) Provide for sufficient safety measures to minimize the risk of losing biological material deposited with it;

(v) Be impartial and objective;

(vi) Furnish samples of the deposited material in an expeditious and proper manner; and

(vii)Promptly notify depositors of its inability to furnish samples, and the reasons why.

(b) A depository seeking status under paragraph (a)(2) of this section must direct a communication to the Commissioner which shall:

(1) Indicate the name and address of the depository to which the communication relates;

(2) Contain detailed information as to the capacity of the depository to comply with the requirements of paragraph (a)(2) of this section, including information on its legal status, scientific standing, staff and facilities;

(3) Indicate that the depository intends to be available, for the purposes of deposit, to any depositor under these same conditions;

(4) Where the depository intends to accept for deposit only certain kinds of biological material, specify such kinds;

(5) Indicate the amount of any fees that the depository will, upon acquiring the status of suitable depository under paragraph (a)(2) of this section, charge for storage, viability statements and furnishings of samples of the deposit.

(c) A depository having status under paragraph (a)(2) of this section limited to certain kinds of biological material may extend such status to additional kinds of biological material by directing a communication to the Commissioner in accordance with paragraph (b) of this section. If a previous communication under paragraph (b) of this section is of record, items in common with the previous communication may be incorporated by reference.

(d) Once a depository is recognized to be suitable by the Commissioner or has defaulted or discontinued its performance under this section, notice thereof will be published in the Official Gazette of the Patent and Trademark Office.

37 CFR 1.803 indicates that a depository will be recognized as acceptable for the purposes of these regulations if it is either an International Depositary Authority (IDA) established under the Budapest Treaty, or if it is a depository recognized as suitable by the Commissioner. After the effective date of these regulations, a deposit of biological material which is made in a depository which is not recognized as acceptable under this regulation will not be considered as satisfying the requirements of 35 U.S.C. 112. See *Ex parte Humphreys*, 24 USPQ2d 1255 (Bd. Pat. App. & Int. 1992). On the other hand, if a deposit is not required to satisfy the requirements of 35 U.S.C. 112, it is permissible to make reference to such a deposit even though it may not be in a depository or made under the conditions which are acceptable under these regulations. As new depositories are recognized as suitable by the Commissioner, their identity will be announced in the *Official Gazette*.

An organization may be recognized as suitable by the Office if the procedure and conditions specified in 37 CFR 1.803(a)(2) and 37 CFR 1.803(b) are followed. Generally, it is not the intention of the Office to recognize as suitable any organization where the need for a suitable depository for patent purposes is being met by depositories recognized as IDAs under the Budapest Treaty. Suitability will be judged by the Commissioner, based on need and the information supplied by the organization seeking status, and information obtained from other sources that may be consulted.

While there is a desire to provide flexibility to a patent applicant in selecting an appropriate depository, these rules are not intended to permit each patent applicant to become its own depository since both the patent owner and the public have an interest in the continued availability and accessibility of the deposit

during the enforceable life of the patent, and the public has a continuing interest in its availability when the patent is no longer enforceable. The concept of a depository independent of the control of the depositor or an IDA as an acceptable depository is based on the need and desire to ensure the safe and reliable storage of a deposited biological material under circumstances that are substantially free of the opportunity for intentional mishandling or negligent handling of the deposited material. The use of an independent depository or internationally recognized depository will tend to preserve the integrity of the deposit process against those that may accidentally alter the deposited material, may wish to tamper with the deposited material or may wish to resume control of its availability when the patent is no longer enforceable, and will tend to preserve the interest of the public in the access to the biological material once the term of the patent expires.

When a depository having status under 37 CFR 1.803(a)(2) seeks to change the kinds of biological materials that it will accept and maintain for the purposes of these rules, a communication requesting such a change should be directed to the Commissioner containing the information requested in 37 CFR 1.803(b). When such a change is requested, the requesting depository should provide a complete list of the kinds of biological materials it will accept.

37 CFR 1.803(d) indicates that once a depository is recognized as suitable for the purposes of this rule, or has defaulted or discontinued its performance under this section, notice thereof will be published in the *Official Gazette* of the Patent and Trademark Office. A current list (as of January, 1998) of IDAs recognized under the Budapest Treaty, with addresses, is included below. The mere fact that a deposit has been made in one of these depositories does not mean that the terms of the deposit meet either the requirements of the Budapest Treaty or the deposit regulations. Many of the depositories recognized under the Budapest Treaty have many different arrangements under which biological material may be stored.

The World Intellectual Property Organization (WIPO) publishes a Guide to the Deposit of Microorganisms under the Budapest Treaty (WIPO Publication No. 661 (E)) on the procedures and requirements concerning the deposit of biological material, including procedures for obtaining a sample of deposited material, in each of the international depository authorities.

CURRENT IDAs

The following constitutes the list of IDAs recognized under the Budapest Treaty. The list is current as of July, 2001.

Advanced Biotechnology Center (ABC)
Interlab Cell Line Collection
(Biotechnology Dept.)
Largo Rossana Benzi, 10
16132 Genova
Italy

Agricultural Research Service
Culture Collection (NRRL)
1815 North University Street
Peoria, Illinois 61604
USA

American Type Culture Collection (ATCC)
10801 University Blvd.
Manassas, Virginia 20110-2209
USA

Australian Government Analytical
Laboratories (AGAL)

2406 Time of Making an Original Deposit

37 CFR 1.804. Time of making an original deposit.

(a) Whenever a biological material is specifically identified in an application for patent as filed, an original deposit thereof may be made at any time before filing the application for patent or, subject to § 1.809, during pendency of the application for patent.

(b) When the original deposit is made after the effective filing date of an application for patent, the applicant must promptly submit a statement from a person in a position to corroborate the fact, stating that the biological material which is deposited is a biological material specifically identified in the application as filed.

37 CFR 1.804 specifies the time for making an original deposit to fulfill the requirements of 35 U.S.C. 112. For the reasons discussed throughout this section, it is recommended that a deposit be made before the filing date of the application. However, for the purposes of complying with the requirements of 35 U.S.C. 112, a deposit of a biological material may be made at any time before filing the application for patent or during the pendency of the application

subject to the conditions of 37 CFR 1.809. Where a deposit is needed to satisfy the requirements of 35 U.S.C. 112 and it is made during the pendency of the application, it must be made no later than the time period set by the examiner at the time the Notice of Allowance and Issue Fee Due is mailed. A necessary deposit need not be made by an applicant until the application is in condition for allowance so long as the applicant provides a written assurance that an acceptable deposit will be made on or before the payment of the issue fee. This written assurance must provide sufficiently detailed information to convince the examiner that there is no outstanding issue regarding deposits that needs to be resolved.

These rules are equally applicable in the cases of international and national stage applications filed under the Patent Cooperation Treaty. Insofar as the rules do not permit post-issuance original deposits, the failure to make an original deposit in an application cannot be cured by filing a reissue application or instituting a reexamination proceeding. However, if an amendment of claims in a reexamination proceeding raises the need for a deposit, an original deposit may be made during the reexamination proceeding.

2406.01 Description in Application Specification

37 CFR 1.804(a) specifies not only a permissible time frame for making an original deposit, but also specifies that the biological material deposited must be specifically identified in the application for patent as filed. The requirement for a specific identification is consistent with the description requirement of the first paragraph of 35 U.S.C. 112 and provides an antecedent basis for the biological material which either has been or will be deposited before the patent is granted.

The description in the Lundak application as filed (now patent 4,594,325) provides a suitable illustration of the specific identification and description which are required in an application as filed. In that application, an immortal B-cell line was disclosed and claimed. The cell line was referred to in the application, as filed, as WI-L2-729 HF2. The methods of obtaining and using this cell line were also described in the application as filed. A deposit of the cell line was made with the American Type Culture Collection (ATCC) about a week after the application was filed in the United States. The United States Court of Appeals for the Federal Circuit held that the requirements of access by the Office to a sample of the cell line during pendency, and public access after grant, were met by Lundak's procedures. The Court further held that the addition of information designating the depository, accession number, and deposit date of the deposited cell line in ATCC after the filing date did not violate the prohibition against new matter in 35 U.S.C. 132. *In re Lundak*, 773 F.2d 1216, 227 USPQ 90 (Fed. Cir. 1985). However, it must be clear from the application as filed that the invention claimed and described in the specification “was fully capable of being reduced to practice (i.e., no technological problems, the resolution of which would require more than ordinary skill and reasonable time, remained in order to obtain an operative, useful process).” *Feldman v. Aunstrup*, 517 F.2d 1351, 1355, 186 USPQ 108, 113 (CCPA 1975), *cert. denied*, 424 U.S. 912 (1976).

2406.02 Deposit After Filing Date - Corroboration

When the original deposit is made after the effective filing date of an application for patent, an applicant is required to promptly submit a statement from a person in a position to corroborate that the biological material which is deposited is a biological material specifically identified in the application (the filing date of which is relied upon) as filed. The nature of this corroboration will depend on the circumstances in the particular application under consideration, including the length of time between the application filing date and the date of deposit. While few, if any, situations can be imagined where the description requirement of 35 U.S.C. 112 can be satisfied where the biological material was not in existence at the time of filing, the rules will not preclude such a situation as there is no requirement in the patent law that an actual reduction to practice occur as a condition precedent to filing a patent application.

2406.03 Possible Loss of U.S. Filing Date in Other Countries

Those applicants intending to file patent applications in a country foreign to the United States relying upon biological material that must be deposited to satisfy the requirements of 35 U.S.C. 112 when the application is filed in the United States are cautioned that in many countries the deposit must be made before the filing date of the priority application in order to obtain foreign priority rights. Thus, while the deposit of a biological material subsequent to the effective filing date of a United States application is sufficient to comply with 35 U.S.C. 112, an applicant may not be able to rely on the filing date of such a U.S. application if a patent is sought in certain countries foreign to the United States.

2407 Replacement or Supplement of Deposit

37 CFR 1.805. Replacement or supplement of deposit.

(a) A depositor, after receiving notice during the pendency of an application for patent, application for reissue patent or reexamination proceeding, that the depository possessing a deposit either cannot furnish samples thereof or can furnish samples thereof but the deposit has become contaminated or has lost its capability to function as described in the specification, shall notify the Office in writing, in each application for patent or patent affected. In such a case, or where the Office otherwise learns, during the pendency of an application for patent, application for reissue patent or reexamination proceeding, that the depository possessing a deposit either cannot furnish samples thereof or can furnish samples thereof but the deposit has become contaminated or has lost its capability to function as described in the specification, the need for making a replacement or supplemental deposit will be governed by the same considerations governing the need for making an original deposit under the provisions set forth in § 1.802(b). A replacement or supplemental deposit made during the pendency of an application for patent shall not be accepted unless it meets the requirements for making an original deposit under these regulations, including the requirement set forth under § 1.804(b). A replacement or supplemental deposit made in connection with a patent, whether or not made during the pendency of an application for reissue patent or a reexamination proceeding or both, shall not be accepted unless a certificate of correction under § 1.323 is requested by the patent owner which meets the terms of paragraphs (b) and (c) of this section.

(b) A request for certificate of correction under this section shall not be granted unless the certificate identifies:

(1) The accession number for the replacement or supplemental deposit;

(2) The date of the deposit; and

(3) The name and address of the depository.

(c) A request for a certificate of correction under this section shall not be granted unless the request is made promptly after the replacement or supplemental deposit has been made and the request:

(1) Includes a statement of the reason for making the replacement or supplemental deposit;

(2) Includes a statement from a person in a position to corroborate the fact, and stating that the replacement or supplemental deposit is of a biological material which is identical to that originally deposited;

(3) Includes a showing that the patent owner acted diligently —

(i) In the case of a replacement deposit, in making the deposit after receiving notice that samples could no longer be furnished from an earlier deposit; or

(ii) In the case of a supplemental deposit, in making the deposit after receiving notice that the earlier deposit had become contaminated or had lost its capability to function as described in the specification;

(4) Includes a statement that the term of the replacement or supplemental deposit expires no earlier than the term of the deposit being replaced or supplemented; and

(5) Otherwise establishes compliance with these regulations.

(d) A depositor's failure to replace a deposit, or in the case of a patent, to diligently replace a deposit and promptly thereafter request a certificate of correction which meets the terms of paragraphs (b) and (c) of this section, after being notified that the depository possessing the deposit cannot furnish samples thereof, shall cause the application or patent involved to be treated in any Office proceeding as if no deposit were made.

(e) In the event a deposit is replaced according to these regulations, the Office will apply a rebuttable presumption of identity between the original and the replacement deposit where a patent making reference to the deposit is relied upon during any Office proceeding.

(f) A replacement or supplemental deposit made during the pendency of an application for patent may be made for any reason.

(g) In no case is a replacement or supplemental deposit of a biological material necessary where the biological material, in accordance with § 1.802(b), need not be deposited.

(h) No replacement deposit of a biological material is necessary where a depository can furnish samples thereof but the depository for national security, health or environmental safety reasons is unable to provide samples to requesters outside of the jurisdiction where the depository is located.

(i) The Office will not recognize in any Office proceeding a replacement deposit of a biological material made by a patent owner where the depository could furnish samples of the deposit being replaced.

37 CFR 1.805 relates to the deposit of a biological material to replace or supplement a previous deposit. The term "replacement" is directed to those situations where one deposit is being substituted for another. An applicant may have greater latitude in replacing a

deposit during the pendency of an application than after the patent is granted. Replacement will typically take place where the earlier deposit is no longer viable. The term "supplement" is directed to those situations where the earlier deposit is still viable in the sense that it is alive and capable of replication either directly or indirectly, but has lost a quality (e.g., purity, functionality) it allegedly possessed at the time the application was filed.

2407.01 In a Pending Application

37 CFR 1.805(a) relates to the procedure for replacing or supplementing a deposit with respect to a pending application or a patent. An applicant or patent owner is required to notify the Office when it obtains information that the depository possessing a deposit cannot furnish samples of the deposit to satisfy the requirements of 35 U.S.C. 112. When the Office is so informed or otherwise becomes aware that samples of the deposited material cannot be furnished by the depository, the examiner will treat the application or reexamination proceeding, whichever is applicable, as if no deposit existed. A replacement or supplemental deposit will be accepted if it meets all the requirements for making an original deposit.

It should be noted that in a pending application, an applicant need not replace the identical material previously deposited, but may make an original deposit of a biological material which is specifically identified and described in the application as filed. Whether this alternative deposit will meet the requirements of 35 U.S.C. 112 with respect to the claimed subject matter must be resolved by the examiner on a case-by-case basis. The conditions in 37 CFR 1.802(b) and 37 CFR 1.804(b) must be satisfied.

2407.02 After a Patent Has Issued

A replacement deposit made in connection with an application for reissue patent or a reexamination proceeding or both shall not be accepted unless a certificate of correction is requested which meets the terms of 37 CFR 1.805(b) and 37 CFR 1.805 (c) for replacement deposits. Any correction made to the original patent will be automatically incorporated into the reissued or reexamined patent unless changes are made during examination of the reissue application or reexamination proceeding.

37 CFR 1.805(b) and 37 CFR 1.805(c) specify the procedures that a patent owner may follow to ensure that a patent contains the appropriate information about a deposited biological material in the event that a replacement or supplemental deposit is made after the patent is granted. 37 CFR 1.805(b) describes the information which must be contained in the certificate of correction, whereas 37 CFR 1.805(c) describes the information which must be provided in the request to make the correction.

2407.03 Failure to Replace

37 CFR 1.805(d) sets forth the Office position that the failure to make a replacement deposit in a case pending before the Office, for example a reissue or reexamination proceeding, where a deposit is considered to be necessary to satisfy the requirements of 35 U.S.C. 112, shall cause the application or patent involved to be treated in any Office proceeding as if no deposit were made. The provisions of 37 CFR 1.805(g) indicate that a replacement need not be made where, at the point in time when replacement would otherwise be necessary, access to the necessary biological material was otherwise available. For example, a replacement deposit would not be required under the circumstances where access to the necessary biological material was established through commercial suppliers.

2407.04 Treatment of Replacement

37 CFR 1.805(e) indicates that the Office will apply a rebuttable presumption of identity between the replacement deposit and an original deposit where a patent making reference to the deposit is relied on during any Office proceeding. This means that where a replacement deposit is permitted and made, the examiner will assume that the same material as described in the patent is accessible from the identified depository unless evidence to the contrary comes to the attention of the Office.

An applicant for patent may make a replacement deposit during the pendency of the application for any reason. The provisions of 37 CFR 1.805(f) recognize that since an original deposit may be made during the pendency of the application subject to the conditions of 37 CFR 1.809, a replacement deposit logically cannot be held to any higher standard or any further requirements.

2407.05 Exemption From Replacement

The provisions of 37 CFR 1.805(h) indicate that a replacement deposit is not required even though the depository cannot furnish samples, under certain conditions, to those requesting a sample outside of the jurisdiction where the depository is located. The conditions are specified in this paragraph as being limited to national security, health or environmental safety reasons. See also Article 5 of the Budapest Treaty.

2407.06 Replacement May Not Be Recognized

Finally, 37 CFR 1.805(i) indicates that the Office will not recognize in any Office proceeding a replacement deposit made by the patent owner where the depository could furnish samples of the original deposit being replaced. The best evidence of what was originally deposited should not be lost through destruction or replacement if made in association with an existing patent. A supplemental deposit may be accepted in an Office proceeding, however, depending on the circumstances in each case.

2408 Term of Deposit

37 CFR 1.806. Term of deposit.

A deposit made before or during pendency of an application for patent shall be made for a term of at least thirty (30) years and at least five (5) years after the most recent request for the furnishing of a sample of the deposit was received by the depository. In any case, samples must be stored under agreements that would make them available beyond the enforceable life of the patent for which the deposit was made.

The term of deposit must satisfy the requirements of the Budapest Treaty which sets a term of at least 30 years from the date of deposit and at least 5 years after the most recent request for the furnishing of a sample of the deposit was received by the depository. In the event that the 30-year term covers the 17-year term or 20-year term of the patent plus 6 years to include the Statute of Limitations, no further requirement is necessary. Unless applicant indicates that the deposit has been made under the Budapest Treaty, applicant must indicate the term for which the deposit has been made. The mere possibility of patent term extension or extended litigation involving the patent should not be considered in this analysis.

In the event that the 30-year term of deposit measured from the date of deposit would necessarily terminate within the period of enforceability of the patent (the normal 17-year term or 20-year term plus 6 years to include the Statute of Limitations), samples must be stored under agreements that would make them available beyond the enforceable life of the patent (i.e., until 23 years after issuance or 26 years after application filing) for which the deposit was made. No requirement should be made as to any particular period of time beyond the enforceable life of the patent. The purpose of the requirement is to insure that a deposited biological material necessary for the practice of a patented invention would be available to the public after expiration of the patent for which the deposit was made. The term of the deposit must comply with the requirements of each sentence of 37 CFR 1.806 whether or not the deposit is made under the Budapest Treaty. A specific statement that the deposit complies with the second sentence of this section is required only where the 30-year term would terminate within the enforceable life of the patent.

2409 Viability of Deposit

37 CFR 1.807. Viability of deposit.

(a) A deposit of biological material that is capable of self-replication either directly or indirectly must be viable at the time of deposit and during the term of deposit. Viability may be tested by the depository. The test must conclude only that the deposited material is capable of reproduction. No evidence is necessarily required regarding the ability of the deposited material to perform any function described in the patent application.

(b) A viability statement for each deposit of a biological material defined in paragraph (a) of this section not made under the Budapest Treaty on the International Recognition of the Deposit of Microorganisms for the Purposes of Patent Procedure must be filed in the application and must contain:

(1) The name and address of the depository;

(2) The name and address of the depositor;

(3) The date of deposit;

(4) The identity of the deposit and the accession number given by the depository;

(5) The date of the viability test;

(6) The procedures used to obtain a sample if the test is not done by the depository; and

(7) A statement that the deposit is capable of reproduction.

(c) If a viability test indicates that the deposit is not viable upon receipt, or the examiner cannot, for scientific or other valid reasons, accept the statement of viability received from the applicant, the examiner shall proceed as if no deposit has been made.

The examiner will accept the conclusion set forth in a viability statement issued by a depository recognized under § 1.803(a).

37 CFR 1.807 requires that the deposit of biological material that is capable of self-replication either directly or indirectly must be viable at the time of deposit and during the term of deposit. This requirement for viability is essentially a requirement that the deposited material is capable of reproduction. For the purpose of making a deposit under these rules, there is no requirement that evidence be provided that the deposited material is capable or has the ability to perform any function described in the patent application. However, as with any other issue of description or enablement, if the examiner has evidence or reason to question the objective statements made in the patent application, applicants may be required to demonstrate that the deposited biological material will perform in the manner described.

Under the Budapest Treaty, there is a requirement that the deposit be tested for viability before it is accepted. Thus, a mere statement by an applicant, an authorized representative of applicant or the assignee that the deposit has been accepted under the Budapest Treaty would satisfy 37 CFR 1.807.

For each deposit which is not made under the Budapest Treaty, a viability statement must be filed in the patent application and contain the information listed in paragraph (b) of this section. Under 37 CFR 1.807(c), the examiner will accept the conclusion set forth in a viability statement which is issued by a depository recognized under 37 CFR 1.803(a). If the viability test indicates that the deposit is not viable upon receipt, or the examiner cannot, for scientific or other valid reasons, accept the statement of viability received from the applicant, the examiner shall so notify the applicant stating the reasons for not accepting the statement and proceed with the examination process as if no deposit had been made.

2410 Furnishing of Samples

37 CFR 1.808. Furnishing of samples.

(a) A deposit must be made under conditions that assure that:

(1) Access to the deposit will be available during pendency of the patent application making reference to the deposit to one determined by the Commissioner to be entitled thereto under § 1.14 and 35 U.S.C. 122, and

(2) Subject to paragraph (b) of this section, all restrictions imposed by the depositor on the availability to the public of the deposited material will be irrevocably removed upon the granting of the patent.

(b) The depositor may contract with the depository to require that samples of a deposited biological material shall be furnished only if a request for a sample, during the term of the patent:

(1) Is in writing or other tangible form and dated;

(2) Contains the name and address of the requesting party and the accession number of the deposit; and

(3) Is communicated in writing by the depository to the depositor along with the date on which the sample was furnished and the name and address of the party to whom the sample was furnished.

(c) Upon request made to the Office, the Office will certify whether a deposit has been stated to have been made under conditions which make it available to the public as of the issue date of the patent grant provided the request contains:

(1) The name and address of the depository;

(2) The accession number given to the deposit;

(3) The patent number and issue date of the patent referring to the deposit; and

(4) The name and address of the requesting party.

2410.01 Conditions of Deposit

37 CFR 1.808 requires that the deposit of biological material be made under two conditions:

(A) access to the deposit will be available during pendency of the patent application making reference to the deposit to one determined by the Commissioner to be entitled thereto under 37 CFR 1.14 and 35 U.S.C. 122, and

(B) with one exception, that all restrictions imposed by the depositor on the availability to the public of the deposited biological material be irrevocably removed upon the granting of the patent.

The one exception that is permitted is specified in 37 CFR 1.808(b) which permits the depositor to contract with the depository to require that samples of a deposited biological material shall be furnished only if a request for a sample, during the term of the patent, meets any one or all of the three conditions specified in this paragraph. These conditions are:

(A) the request is in writing or other tangible form and dated; and/or

(B) the request contains the name and address of the requesting party and the accession number of the deposit; and/or

(C) the request is communicated in writing by the depository to the depositor along with the date on which the sample was furnished and the name and

address of the party to whom the sample was furnished.

It should be noted that this exception to the general rule that all restrictions will be removed must be strictly followed and that no variations of this explicit exception will be accepted as meeting the conditions of this section. Although this exception is consistent with the provisions in the Budapest Treaty and its implementing regulations (Rule 11.4), other conditions on accessibility are permitted under the Budapest Treaty as prescribed by national law. Consequently, the mere indication that a deposit has been made under conditions prescribed by the Budapest Treaty would satisfy all conditions of these regulations except the requirement that all restrictions on access be removed on grant of the patent. *Ex parte Hildebrand*, 15 USPQ2d 1662 (Bd. Pat. App. & Int. 1990).

2410.02 Certification of Statement of Availability of Deposit

Since the mere description of a deposit or identity of a deposit in a patent specification is not necessarily an indication that a requirement for deposit was made or that a deposit which complies with these rules has been made, accessibility to a deposited material referenced in a patent may depend on the satisfaction of conditions not apparent on the face of the patent. For these reasons, and upon request made to the U.S. Patent and Trademark Office, the Office will certify whether a deposit has been stated to have been made under conditions which would make it available to the public as of the issue date of the patent grant provided the request is made to a Director of Technology Center (TC) 1600, and contains the following information:

(A) the name and address of the depository;

(B) the accession number given to the deposit;

(C) the patent number and issue date of the patent referring to the deposit; and

(D) the name and address of the requesting party.

See also MPEP § 2404.01.

For those deposits made pursuant to the Budapest Treaty, the World Intellectual Property Organization provides a form (Form BP-12) for requesting a certification of legal entitlement to receive samples of deposited microorganisms pursuant to Rule 11.3(a) of the Regulations under the Budapest Treaty. Copies of this form are available from a TC 1600 Director.

2411 Examination Procedures

37 CFR 1.809. Examination procedures.

(a) The examiner shall determine pursuant to § 1.104 in each application for patent, application for reissue patent or reexamination proceeding if a deposit is needed, and if needed, if a deposit actually made is acceptable for patent purposes. If a deposit is needed and has not been made or replaced or supplemented in accordance with these regulations, the examiner, where appropriate, shall reject the affected claims under the appropriate provision of 35 U.S.C. 112, explaining why a deposit is needed and/or why a deposit actually made cannot be accepted.

(b) The applicant for patent or patent owner shall reply to a rejection under paragraph (a) of this section by—

(1) In the case of an applicant for patent, either making an acceptable original, replacement, or supplemental deposit, or assuring the Office in writing that an acceptable deposit will be made; or, in the case of a patent owner, requesting a certificate of correction of the patent which meets the terms of paragraphs (b) and (c) of § 1.805, or

(2) Arguing why a deposit is not needed under the circumstances of the application or patent considered and/or why a deposit actually made should be accepted. Other replies to the examiner's action shall be considered nonresponsive. The rejection will be repeated until either paragraph (b)(1) of this section is satisfied or the examiner is convinced that a deposit is not needed.

(c) If an application for patent is otherwise in condition for allowance except for a needed deposit and the Office has received a written assurance that an acceptable deposit will be made, applicant will be notified and given a period of time within which the deposit must be made in order to avoid abandonment. This time period is not extendable under § 1.136(a) or (b) if set forth in a "Notice of Allowability" or in an Office action having a mail date on or after the mail date of a "Notice of Allowability" (see § 1.136(c)).

(d) For each deposit made pursuant to these regulations, the specification shall contain:

(1) The accession number for the deposit;

(2) The date of the deposit;

(3) A description of the deposited biological material sufficient to specifically identify it and to permit examination; and

(4) The name and address of the depository.

(e) Any amendment required by paragraphs (d)(1), (d)(2) or (d)(4) of this section must be filed before or with the payment of the issue fee (see § 1.312).

37 CFR 1.809 sets forth procedures that will be used by the examiner to address a deposit issue. The burden is initially on the Office to establish that access to a biological material is necessary for the satisfaction of the statutory requirements for patentability under 35 U.S.C. 112. Once the Office has met this burden, the burden shifts to the applicant or patent

owner to demonstrate that access to such biological material either is not necessary, or is already available, or that a deposit of such material will be made in accordance with these regulations.

2411.01 Rejections Based on Deposit Issue

Under 37 CFR 1.809(a), once the examiner has determined that access to a biological material is necessary, and there is no information that would support the conclusion that access is currently available in accordance with these regulations, the examiner should make an appropriate rejection under 35 U.S.C. 112 until such time as a deposit in accordance with these regulations is actually made or a written assurance is received in the patent application that such a deposit will be made upon an indication of allowability of the application. The examiner should clearly indicate the statutory basis for the rejection and the reasons that are relied upon by the examiner to conclude that the application does not comply with some requirement of 35 U.S.C. 112. Although not exhaustive, the following grounds of rejection may be applicable in appropriate circumstances:

(A) 35 U.S.C. 112, first paragraph - lack of an enabling disclosure without access to a specific biological material. This ground of rejection should be accompanied by evidence of scientific reasoning to support the conclusion that a person skilled in the art could not make or use the invention defined in and commensurate with the claims without access to the specific biological material.

(B) 35 U.S.C. 112, first paragraph - description requirement. This ground of rejection typically arises in the context that the application as filed does not contain a description to support an amendment to the specification or claims. An amendment to the claims that is not described in the application as filed would justify a rejection of the affected claims under 35 U.S.C. 112, first paragraph. If an amendment is made to the application, other than the claims, that is not described in the application as filed, this would justify an objection under 35 U.S.C. 112, first paragraph and/or 35 U.S.C. 132 (prohibition against the introduction of new matter) and a requirement that the amendment be canceled.

(C) 35 U.S.C. 112, first paragraph - best mode requirement. This ground of rejection will be rare in the *ex parte* examination process because it requires (1) a finding by the examiner that, at the time the application was filed, the inventor(s) knew of a specific material that was considered by the inventor(s) to be better than any other, and (2) if a best mode was contemplated at that time, that the inventor(s) concealed the best mode (accidentally or intentionally) by failing to adequately describe that best mode. See *Chemcast Corp. v. Arco Industries Corp.*, 913 F.2d 923, 16 USPQ2d 1033 (Fed. Cir. 1990). The Court of Appeals for the Federal Circuit has at least twice resolved a best mode issue arising in the context of a biotechnology invention in favor of the patentee. See *Scripps Clinic and Research Foundation v. Genentech Inc.*, 927 F.2d 1565, 18 USPQ2d 1001 (Fed. Cir. 1991) with respect to monoclonal antibodies, and *Amgen Inc. v. Chugai Pharmaceutical Co. Ltd.*, 927 F.2d 1200, 18 USPQ2d 1016 (Fed. Cir. 1991) with respect to mammalian host cells.

(D) 35 U.S.C. 112, second paragraph - indefiniteness. This ground of rejection, as applied to a deposit issue, requires the examiner to provide reasons why the terms in the claims and/or scope of the invention are unclear because of an incomplete or inaccurate description or the absence of a reference to a biological material.

(E) 35 U.S.C. 112, second paragraph - claims do not set forth what applicants regard as their invention. This ground of rejection requires the citation of some evidence, not contained in the application as filed, that the claims do not set forth what applicants regard as their invention. *In re Prater*, 415 F.2d 1393, 162 USPQ 541 (CCPA 1969). Any disagreement between the content of the application disclosure and the scope of the claims should be addressed under 35 U.S.C. 112, first paragraph. See *In re Ehrreich*, 590 F.2d 902, 200 USPQ 504 (CCPA 1979).

Where a deposit is required to satisfy 35 U.S.C. 112, a deposit must be made in accordance with these regulations. A deposit accepted in any IDA under the Budapest Treaty shall be accepted for patent purposes if made under conditions which comply with 37 CFR 1.806 and 37 CFR 1.808(a) concerning term of deposit and permissible conditions on access once the patent is granted.

2411.02 Replies to Rejections Based on Deposit Issue

Once a rejection under 35 U.S.C. 112 has been made by the examiner directed to the absence of access to a biological material, applicant may reply, pursuant to 37 CFR 1.809 (b)(1), by either making an acceptable original or replacement deposit in accordance with these regulations, or assuring the Office in writing that an acceptable deposit will be made on or before the date of payment of the issue fee, or by submitting an argument of why a deposit is not required under the circumstances of the application being considered. Other replies to such a rejection by the examiner shall be considered nonresponsive and may result in abandonment of the application. The rejection will be repeated and made final until the requirements of 37 CFR 1.809(b)(1) are satisfied or the examiner is convinced that a deposit is not required for the claimed subject matter. Once the rejection is made final, the requirements of 37 CFR 1.116 apply to further submissions. The written assurance will be accepted by the Office if it clearly states that an acceptable deposit will be made within the required time and under conditions which satisfy these rules. In the case that an acceptable written assurance has been made by the applicant, the rejection under 35 U.S.C. 112 directed to the absence of access to the biological material should be removed.

2411.03 Application in Condition for Allowance Except for Deposit

As set forth in 37 CFR 1.809(c), in the event that an application for patent is otherwise in condition for allowance except for a required deposit and the Office has received a written assurance that an acceptable deposit will be made, applicant will be notified and given a period of time within which the deposit must be made in order to avoid abandonment. This time period is not extendable under 37 CFR 1.136(a) or (b) if set forth in a "Notice of Allowability" or in an Office action having a mail date on or after the mail date of a "Notice of Allowability" (see 37 CFR 1.136(c). Failure to make the needed deposit in accordance with this requirement will be considered a failure to prosecute the application under 35 U.S.C. 133 and result in abandonment of the application.

Once the deposit has been made, information regarding the deposit, such as the name and address of the depository, the accession number and the date of the deposit, that is to be added to the specification must be added by means of filing an amendment under the provisions of 37 CFR 1.312. Such an amendment must be filed before or with the payment of the issue fee. Therefore, applicants need to make any necessary deposit of biological material well prior to payment of the issue fee such that the accession number is received with sufficient time remaining to amend the specification as required by 37 CFR 1.809(d) on or before the date the issue fee payment is paid. See 37 CFR 1.809(e).

2411.04 After a Patent Has Been Granted

In a proceeding involving a patent, it may not be possible to request a certificate of correction of the patent which meets the terms of 37 CFR 1.805(b) and 37 CFR 1.805(c). For example, if the patent owner is on notice that samples of an original deposit can no longer be furnished by the depository, failure to diligently make a replacement deposit will preclude grant of a certificate of correction. A replacement deposit subsequently made will not be recognized by the Office nor will a request for certificate of correction, even if made promptly thereafter, be granted. It would also not be possible to request a certificate of correction of the patent which meets the terms of 37 CFR 1.805(b) and 37 CFR 1.805(c) where no original deposit was made before or during the pendency of the application which matured into the patent.

A patent defective because of lack of a necessary deposit is necessarily fatally defective for failure to comply with the first paragraph of 35 U.S.C. 112. Reissue is not available in such cases. See *In re Hay*, 534 F.2d 917, 189 USPQ 790 (CCPA 1976). Whether reissue is available where a biological material necessary for compliance with 35 U.S.C. 112 was known and readily available at the time of issuance of the patent and subsequently ceased to be readily available is problematic. Nevertheless, the rules do not provide for post-issuance original deposits.

Where an applicant for patent has any doubt as to whether access to a biological material specifically identified in the specification is necessary to satisfy 35 U.S.C. 112 or whether such a material, while currently freely available, may become unavailable in the

future, the applicant would be well-advised to make a deposit thereof before any patent issues. Similarly, where a patent owner has any doubt whether a deposit referred to in the specification is a biological material necessary to satisfy 35 U.S.C. 112 and, if the material is necessary, whether it is otherwise known and readily available, the patent owner would be well-advised to follow the procedures set forth in 37 CFR 1.805(b) and 37 CFR 1.805(c) after receiving the notice specified in those paragraphs.

2411.05 Content of Application with Respect to Deposited Material

37 CFR 1.809(d) sets forth the requirements for the content of the specification with respect to a deposited biological material. Specifically, the specification shall contain the accession number for the deposit, the date of the deposit, the name and address of the depository, and a description of the deposited biological material sufficient to specifically identify it and to permit examination. The description also must be sufficient to permit verification that the deposited biological material is in fact that disclosed. Once the patent issues, the description must be sufficient to aid in the resolution of questions of infringement. As a general rule, the more information that is provided about a particular deposited biological material, the better the examiner will be able to compare the identity and characteristics of the deposited biological material with the prior art.

2420 The Requirements for Patent Applications Containing Nucleotide Sequence and/or Amino Acid Sequence Disclosures - the Sequence Rules

Prior to the effective date (October 1, 1990) and implementation of the sequence rules (37 CFR 1.821 through 1.825), applications for patents that included nucleotide or amino acid sequence information posed special problems for the Office. While not related to the disclosure requirements of an invention, problems existed in the presentation, examination and printing of nucleotide and amino acid sequence data that appeared in patent applications because of the lack of uniformity in submission of sequence data to the Office and the impracticality of properly searching and examining sequences submitted in paper form. In summary, the diversity and complexity of nucleotide and amino acid sequence data resulted in searching and analysis difficulties both within the Office and outside the Office, decreased accuracy of search and reproduction and increased costs. These difficulties made the development and implementation of the sequence rules a critical necessity for the Office. As such, the Office amended its regulations to establish a standardized format for descriptions of nucleotide and amino acid sequence data submitted as a part of patent applications, in conjunction with the required submission of that data in computer readable form. The final rules were published in the *Federal Register* at 55 FR 18230 (May 1, 1990) and in the *Official Gazette* at 1114 O.G. 29 (May 15, 1990). The sequence rules went into effect on October 1, 1990. The sequence rules were subsequently revised effective July 1, 1998. See 63 FR 29634 (June 1, 1998) and 1121 O.G. 82 (June 23, 1998).

The sequence rules were further revised on September 8, 2000 to allow submissions of the nucleotide and/or amino acid sequences and associated information on compact discs. See 65 FR 54604 (Sept. 8, 2000) and 1238 O.G. 145 (Sept. 19, 2000). See also MPEP § 608.05 and § 2422.03.

2421 Overview of the Sequence Rules

2421.01 Applications Affected

The sequence rules require the use of standard symbols and a standard format for sequence data in most sequence-type patent applications. They further require the submission of that data in computer readable form. Compliance is required for most disclosures of sequence data in new applications filed on or after October 1, 1990. The revised sequence rules apply to most new applications filed on or after July 1, 1998. See the final rule publications as cited in MPEP § 2420 for more detailed applicability information.

The Office encourages voluntary compliance for applications not subject to the rules, but all aspects of the rules must be complied with before data will be entered into the database. This includes submission of all statements required by the rules. In exceptional circumstances, it should be noted that the Office may waive the rules via a 37 CFR 1.183 petition.

2421.02 Summary of the Requirements of the Sequence Rules

Basically, the sequence rules define a set of symbols and procedures that are both mandatory and the only way that an applicant is permitted to describe information about a sequence that falls within the definitions used in the rules. Thus, 37 CFR 1.821 defines a "sequence" and a "Sequence Listing" for the purpose of the rules, the requirements for specific symbols, and formats for the "Sequence Listing," the requirement for a computer readable form (CRF) of the "Sequence Listing," and the deadlines for complying with the requirements. 37 CFR 1.822 to 37 CFR 1.824 set forth detailed descriptions of the requirements that are mandatory for the presentation of sequence data, and 37 CFR 1.825 sets forth procedures that are available to an applicant in the event that amendments to the sequence information or replacement of the computer readable copy become necessary.

The sequence rules embrace all unbranched nucleotide sequences with ten or more bases and all unbranched, non-D amino acid sequences with four or more amino acids, provided that there are at least 4 "specifically defined" nucleotides or amino acids. The rules apply to all sequences in a given application, whether claimed or not. All such sequences are relevant for the purposes of building a comprehensive database and properly assessing prior art. It is therefore essential that all sequences, whether only disclosed or also claimed, be included in the database.

2421.03 Notification of a Failure to Comply

With respect to the Office's determination of compliance with the sequence rules and the opportunities afforded applicants to satisfy the requirements of the rules, applicants will be notified of easily detectable deficiencies early in the application process. Applicants whose computer readable forms are damaged in the mail, are not readable, or are missing mandatory elements will be notified shortly after receipt of the application by the Office. Applications filed on or after November 29, 2000, will be retained in the Office of Initial Patent Examination (OIPE) until any noncompliant sequence listing that renders an application unsuitable for examination is corrected. Deficiencies of a more sophisticated nature will likely only be detected by the examiner to whom the application is assigned. Applicant will be notified of any errors or inconsistencies detected by the examiner early in the examination process. Other errors or inconsistencies will be noted by the examiner early in the examination process.

Upon detection of damage or a deficiency, a notice will be sent to the applicant detailing the damage or deficiency and setting at least a 30-day period for reply. The period for reply will usually be 2 months when sent during the preexamination processing of an application. However, if the notice is sent out with an Office communication having a longer period for reply, the period for reply may be longer than 2 months, e.g., where the notice is sent with an Office action on the merits setting a 3-month period for reply. Extensions of time in which to reply will be available pursuant to 37 CFR 1.136. When an action by the applicant, such as a reply to a Notice to Comply from the Office, is determined to be a *bona fide* attempt to comply with the rules and it is apparent that compliance with some requirement has inadvertently been omitted, the applicant may be given a new time period to correct the omission. See 37 CFR 1.135(c). The relevant form paragraphs and a copy of the Notice to Comply to be used in applications subject to the sequence rules are included in MPEP § 2427 through § 2427.02.

A notification of a failure to comply with the sequence rules will be accompanied by an analysis of any submitted computer readable form. Any inquiries regarding a specific computer readable form that has been processed by the Office should be directed to the Systems Branch of the Chemical/Biotechnology Division of the Scientific and Technical Information Center.

2421.04 Future Changes to the Sequence Rules

With general regard to the symbols and format to be used for nucleotide and/or amino acid sequence data set forth in 37 CFR 1.822 and the form and format for sequence submissions in computer readable form set forth in 37 CFR 1.824, the Office intends to accommodate progress in the areas of both standardization and computerization as they relate to sequence data by subsequently amending the rules to take into

account any such progress. This progress will probably be reflected in the refinement of or liberalization of the rules. For example, progress in the area of the standardization of sequence data will likely result in a more comprehensive rule. For example, the D-amino acids and branched sequences that are currently excluded from the rule may, in the future, be brought within the scope of the rule once the necessary standardization technology becomes available. As a further example, the computer readable form is currently limited to certain forms of electronic media, but it can readily be seen that progress in the technology for developing databases of the type the Office has envisioned will likely permit a broadening of the permissible types of computer readable forms that may be submitted. The same can be said for the computer/operating-system configurations that are currently permitted by the rules. As the Office becomes able to provide greater refinement and liberality in these areas, the Office will do so by the publication of notices in the *Official Gazette* or formal rulemaking proposals, as appropriate.

2422 Nucleotide and/or Amino Acid Sequence Disclosures in Patent Applications

37 CFR 1.821. Nucleotide and/or amino acid sequence disclosures in patent applications.

(a) Nucleotide and/or amino acid sequences as used in §§ 1.821 through 1.825 are interpreted to mean an unbranched sequence of four or more amino acids or an unbranched sequence of ten or more nucleotides. Branched sequences are specifically excluded from this definition. Sequences with fewer than four specifically defined nucleotides or amino acids are specifically excluded from this section. "Specifically defined" means those amino acids other than "Xaa" and those nucleotide bases other than "n" defined in accordance with the World Intellectual Property Organization (WIPO) Handbook on Industrial Property Information and Documentation, Standard ST.25: Standard for the Presentation of Nucleotide and Amino Acid Sequence Listings in Patent Applications (1998), including Tables 1 through 6 in Appendix 2, herein incorporated by reference. (Hereinafter "WIPO Standard ST.25 (1998)"). This incorporation by reference was approved by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. Copies of WIPO Standard ST.25 (1998) may be obtained from the World Intellectual Property Organization; 34 chemin des Colombettes; 1211 Geneva 20 Switzerland. Copies of ST.25 may be inspected at the Patent Search Room; Crystal Plaza 3, Lobby Level; 2021 South Clark Place; Arlington, VA 22202. Copies may also be inspected at the Office of the Federal Register, 800 North Capitol Street, NW, Suite 700, Washington, DC. Nucleotides and amino acids are further defined as follows:

(1) *Nucleotides:* Nucleotides are intended to embrace only those nucleotides that can be represented using the symbols set forth in WIPO Standard ST.25 (1998), Appendix 2, Table 1. Modifications, *e.g.*, methylated bases, may be described as set forth in WIPO Standard ST.25 (1998), Appendix 2, Table 2, but shall not be shown explicitly in the nucleotide sequence.

(2) *Amino acids:* Amino acids are those L-amino acids commonly found in naturally occurring proteins and are listed in WIPO Standard ST.25 (1998), Appendix 2, Table 3. Those amino acid sequences containing D-amino acids are not intended to be embraced by this definition. Any amino acid sequence that contains post-translationally modified amino acids may be described as the amino acid sequence that is initially translated using the symbols shown in WIPO Standard ST.25 (1998), Appendix 2, Table 3 with the modified positions; *e.g.*, hydroxylations or glycosylations, being described as set forth in WIPO Standard ST.25 (1998), Appendix 2, Table 4, but these modifications shall not be shown explicitly in the amino acid sequence. Any peptide or protein that can be expressed as a sequence using the symbols in WIPO Standard ST.25 (1998), Appendix 2, Table 3 in conjunction with a description in the Feature section to describe, for example, modified linkages, cross links and end caps, non-peptidyl bonds, etc., is embraced by this definition.

(b) Patent applications which contain disclosures of nucleotide and/or amino acid sequences, in accordance with the definition in paragraph (a) of this section, shall, with regard to the manner in which the nucleotide and/or amino acid sequences are presented and described, conform exclusively to the requirements of §§ 1.821 through 1.825.

(c) Patent applications which contain disclosures of nucleotide and/or amino acid sequences must contain, as a separate part of the disclosure, a paper copy disclosing the nucleotide and/or amino acid sequences and associated information using the symbols and format in accordance with the requirements of §§ 1.822 and 1.823. This paper copy is hereinafter referred to as the "Sequence Listing." Each sequence disclosed must appear separately in the "Sequence Listing." Each sequence set forth in the "Sequence Listing" shall be assigned a separate sequence identifier. The sequence identifiers shall begin with 1 and increase sequentially by integers. If no sequence is present for a sequence identifier, the code "000" shall be used in place of the sequence. The response for the numeric identifier <160> shall include the total number of SEQ ID NOs, whether followed by a sequence or by the code "000."

(d) Where the description or claims of a patent application discuss a sequence that is set forth in the "Sequence Listing" in accordance with paragraph (c) of this section, reference must be made to the sequence by use of the sequence identifier, preceded by "SEQ ID NO:" in the text of the description or claims, even if the sequence is also embedded in the text of the description or claims of the patent application.

(e) A copy of the "Sequence Listing" referred to in paragraph (c) of this section must also be submitted in computer readable form in accordance with the requirements of § 1.824. The computer readable form is a copy of the "Sequence Listing" and

will not necessarily be retained as a part of the patent application file. If the computer readable form of a new application is to be identical with the computer readable form of another application of the applicant on file in the Patent and Trademark Office, reference may be made to the other application and computer readable form in lieu of filing a duplicate computer readable form in the new application if the computer readable form in the other application was compliant with all of the requirements of these rules. The new application shall be accompanied by a letter making such reference to the other application and computer readable form, both of which shall be completely identified. In the new application, applicant must also request the use of the compliant computer readable "Sequence Listing" that is already on file for the other application and must state that the paper copy of the "Sequence Listing" in the new application is identical to the computer readable copy filed for the other application.

(f) In addition to the paper copy required by paragraph (c) of this section and the computer readable form required by paragraph (e) of this section, a statement that the content of the paper and computer readable copies are the same must be submitted with the computer readable form, *e.g.*, a statement that "the information recorded in computer readable form is identical to the written sequence listing."

(g) If any of the requirements of paragraphs (b) through (f) of this section are not satisfied at the time of filing under 35 U.S.C. 111(a) or at the time of entering the national stage under 35 U.S.C. 371, applicant will be notified and given a period of time within which to comply with such requirements in order to prevent abandonment of the application. Any submission in reply to a requirement under this paragraph must be accompanied by a statement that the submission includes no new matter.

(h) If any of the requirements of paragraphs (b) through (f) of this section are not satisfied at the time of filing an international application under the Patent Cooperation Treaty (PCT), which application is to be searched by the United States International Searching Authority or examined by the United States International Preliminary Examining Authority, applicant will be sent a notice necessitating compliance with the requirements within a prescribed time period. Any submission in reply to a requirement under this paragraph must be accompanied by a statement that the submission does not include matter which goes beyond the disclosure in the international application as filed. If applicant fails to timely provide the required computer readable form, the United States International Searching Authority shall search only to the extent that a meaningful search can be performed without the computer readable form and the United States International Preliminary Examining Authority shall examine only to the extent that a meaningful examination can be performed without the computer readable form.

37 CFR 1.821 incorporates by reference the World Intellectual Property Organization (WIPO) Handbook on Industrial Property Information and Documentation, Standard ST.25 (1998), including Tables 1 through 6 of Appendix 2. Copies may be obtained from the World Intellectual Property Organization; 34 chemin des Colombettes; 1211 Geneva 20 Switzerland. Copies may be inspected at the Patent Search Room; Crystal Plaza 3, Lobby Level; 2021 South Clark Place; Arlington, VA 22202. Copies may also be inspected at the Office of the Federal Register, 800 North Capitol Street, NW, Suite 700, Washington, DC 20408. These tables are reproduced below.

WIPO Standard ST.25 (1998), Appendix 2, Table 1, provides that the bases of a nucleotide sequence should be represented using the following one-letter code for nucleotide sequence characters:

Table 1: List of Nucleotides

Symbol	Meaning	Origin of designation
a	a	adenine
g	g	guanine
c	c	cytosine
t	t	thymine
u	u	uracil
r	g or a	purine
y	t/u or c	pyrimidine
m	a or c	amino
k	g or t/u	keto
s	g or c	strong interactions 3H-bonds
w	a or t/u	weak interactions 2H-bonds
b	g or c or t/u	not a
d	a or g or t/u	not c
h	a or c or t/u	not g
v	a or g or c	not t, not u
n	a or g or c or t/u, unknown, or other	any

WIPO Standard ST.25 (1998), Appendix 2, Table 2, provides that modified bases may be represented as

the corresponding unmodified bases in the sequence itself, if the modified base is one of those listed below and the modification is further described in the Feature section of the Sequence Listing. The codes from the list below may be used in the description (i.e., the specification and drawing, or in the Sequence Listing) but these codes may not be used in the sequence itself.

Table 2: List of Modified Nucleotides

Symbol	Meaning
ac4c	4-acetylcytidine
chm5u	5-(carboxyhydroxymethyl)uridine
cm	2'-O-methylcytidine
cmnm5s2u	5-carboxymethylaminomethyl-2-thiouridine
cmnm5u	5-carboxymethylaminomethyluridine
d	dihydrouridine
fm	2'-O-methylpseudouridine
gal q	beta, D-galactosylqueuosine
gm	2'-O-methylguanosine
i	inosine
i6a	N6-isopentenyladenosine
m1a	1-methyladenosine
m1f	1-methylpseudouridine
m1g	1-methylguanosine
m1i	1-methylinosine
m22g	2,2-dimethylguanosine
m2a	2-methyladenosine
m2g	2-methylguanosine
m3c	3-methylcytidine
m5c	5-methylcytidine
m6a	N6-methyladenosine
m7g	7-methylguanosine
mam5u	5-methylaminomethyluridine
mam5s2u	5-methoxyaminomethyl-2-thiouridine
man q	beta, D-mannosylqueuosine
mcm5s2u	5-methoxycarbonylmethyl-2-thiouridine
mcm5u	5-methoxycarbonylmethyluridine
mo5u	5-methoxyuridine
ms2i6a	2-methylthio-N6-isopentenyladenosine
ms2t6a	N-((9-beta-D-ribofuranosyl-2-methylthiopurine-6-yl)carbamoyl)threonine
mt6a	N-((9-beta-D-ribofuranosylpurine-6-yl)N-methylcarbamoyl)threonine
mv	uridine-5-oxyacetic acid-methylester
o5u	uridine-5-oxyacetic acid
osyw	wybutoxosine
p	pseudouridine
q	queuosine
s2t	5-methyl-2-thiouridine
s2c	2-thiocytidine
s2t	5-methyl-2-thiouridine
s2u	2-thiouridine
s4u	4-thiouridine
t	5-methyluridine
t6a	N-((9-beta-D-ribofuranosylpurine-6-yl)-carbamoyl)threonine
tm	2'-O-methyl-5-methyluridine
um	2'-O-methyluridine
yw	wybutosine
x	3-(3-amino-3-carboxy-propyl)uridine, (acp3)u

WIPO Standard ST.25 (1998), Appendix 2, Table 3, provides that the amino acids should be represented using the following three-letter code with the first letter as a capital.

Table 3: List of Amino Acids

Symbol	Meaning
Ala	Alanine
Cys	Cysteine
Asp	Aspartic Acid
Glu	Glutamic Acid
Phe	Phenylalanine
Gly	Glycine
His	Histidine
Ile	Isoleucine
Lys	Lysine
Leu	Leucine
Met	Methionine
Asn	Asparagine
Pro	Proline
Gln	Glutamine
Arg	Arginine
Ser	Serine
Thr	Threonine
Val	Valine
Trp	Tryptophan
Tyr	Tyrosine
Asx	Asp or Asn
Glx	Glu or Gln
Xaa	unknown or other

WIPO Standard ST.25 (1998), Appendix 2, Table 4, provides that modified and unusual amino acids may be represented as the corresponding unmodified amino acids in the sequence itself if the modified or unusual amino acid is one of those listed below and the modification is further described in the Feature section of the Sequence Listing. The codes from the list below may be used in the description (i.e., the specification and drawings, or in Sequence Listing) but these codes may not be used in the sequence itself.

Table 4: List of Modified and Unusual Amino Acids

Symbol	Meaning
Aad	2-Aminoadipic acid
bAad	3-Aminoadipic acid
bAla	beta-Alanine, beta-Aminopropionic acid
Abu	2-Aminobutyric acid
4Abu	4-Aminobutyric acid, piperidinic acid
Acp	6-Aminocaproic acid
Ahe	2-Aminoheptanoic acid
Aib	2-Aminoisobutyric acid
bAib	3-Aminoisobutyric acid
Apm	2-Aminopimelic acid
Dbu	2,4-Diaminobutyric acid
Des	Desmosine
Dpm	2,2' -Diaminopimelic acid
Dpr	2,3-Diaminopropionic acid
EtGly	N-Ethylglycine
EtAsn	N-Ethylasparagine
Hyl	Hydroxylysine
aHyl	allo-Hydroxylysine
3Hyp	3-Hydroxyproline
4Hyp	4-Hydroxyproline

Ide	Isodesmosine
aIle	allo-Isoleucine
MeGly	N-Methylglycine, sarcosine
MeIle	N-Methylisoleucine
MeLys	6-N-Methyllysine
MeVal	N-Methylvaline

Nva	Norvaline
Nle	Norleucine
Orn	Ornithine

WIPO Standard ST.25 (1998), Appendix 2, Table 5, provides for feature keys related to DNA sequences.

Table 5: List of Feature Keys Related to Nucleotide Sequences

Key	Description
allele	a related individual or strain contains stable, alternative forms of the same gene which differs from the presented sequence at this location (and perhaps others)
attenuator	(1) region of DNA at which regulation of termination of transcription occurs, which controls the expression of some bacterial operons; (2) sequence segment located between the promoter and the first structural gene that causes partial termination of transcription
C_region	constant region of immunoglobulin light and heavy chains, and T-cell receptor alpha, beta, and gamma chains; includes one or more exons depending on the particular chain
CAAT_signal	CAAT box; part of a conserved sequence located about 75 bp up-stream of the start point of eukaryotic transcription units which may be involved in RNA polymerase binding; consensus=GG (C or T) CAATCT
CDS	coding sequence; sequence of nucleotides that corresponds with the sequence of amino acids in a protein (location includes stop codon); feature includes amino acid conceptual translation
conflict	independent determinations of the “same” sequence differ at this site or region
D-loop	displacement loop; a region within mitochondrial DNA in which a short stretch of RNA is paired with one strand of DNA, displacing the original partner DNA strand in this region; also used to describe the displacement of a region of one strand of duplex DNA by a single stranded invader in the reaction catalyzed by RecA protein
D-segment	diversity segment of immunoglobulin heavy chain, and T-cell receptor beta chain
enhancer	a cis-acting sequence that increases the utilization of (some) eukaryotic promoters, and can function in either orientation and in any location (upstream or downstream) relative to the promoter

Key	Description
exon	region of genome that codes for portion of spliced mRNA; may contain 5'UTR, all CDSs, and 3'UTR
GC_signal	GC box; a conserved GC-rich region located upstream of the start point of eukaryotic transcription units which may occur in multiple copies or in either orientation; consensus=GGGCGG
gene	region of biological interest identified as a gene and for which a name has been assigned
iDNA	intervening DNA; DNA which is eliminated through any of several kinds of recombination
intron	a segment of DNA that is transcribed, but removed from within the transcript by splicing together the sequences (exons) on either side of it
J_segment	joining segment of immunoglobulin light and heavy chains, and T-cell receptor alpha, beta, and gamma chains
LTR	long terminal repeat, a sequence directly repeated at both ends of a defined sequence, of the sort typically found in retroviruses
mat_peptide	mature peptide or protein coding sequence; coding sequence for the mature or final peptide or protein product following post-translational modification; the location does not include the stop codon (unlike the corresponding CDS)
misc_binding	site in nucleic acid which covalently or non-covalently binds another moiety that cannot be described by any other Binding key (primer_bind or protein_bind)
misc_difference	feature sequence is different from that presented in the entry and cannot be described by any other Difference key (conflict, unsure, old_sequence, mutation, variation, allele, or modified_base)
misc_feature	region of biological interest which cannot be described by any other feature key; a new or rare feature
misc_recomb	site of any generalized, site-specific or replicative recombination event where there is a breakage and reunion of duplex DNA that cannot be described by other recombination keys (iDNA and virion) or qualifiers of source key (/insertion_seq, /transposon, /proviral)
misc_RNA	any transcript or RNA product that cannot be defined by other RNA keys (prim_transcript, precursor_RNA, mRNA, 5'clip, 3'clip, 5'UTR, 3'UTR, exon, CDS, sig_peptide, transit_peptide, mat_peptide, intron, polyA_site, rRNA, tRNA, scRNA, and snRNA)
misc_signal	any region containing a signal controlling or altering gene function or expression that cannot be described by other Signal keys (promoter, CAAT_signal, TATA_signal, -35_signal, -10_signal, GC_signal, RBS, polyA_signal, enhancer, attenuator, terminator, and rep_origin)

Key	Description
misc_structure	any secondary or tertiary structure or conformation that cannot be described by other Structure keys (stem_loop and D-loop)
modified_base	the indicated nucleotide is a modified nucleotide and should be substituted for by the indicated molecule (given in the mod_base qualifier value)
mRNA	messenger RNA; includes 5' untranslated region (5'UTR), coding sequences (CDS, exon) and 3' untranslated region (3'UTR)
mutation	a related strain has an abrupt, inheritable change in the sequence at this location
N_region	extra nucleotides inserted between rearranged immunoglobulin segments
old_sequence	the presented sequence revises a previous version of the sequence at this location
polyA_signal	recognition region necessary for endonuclease cleavage of an RNA transcript that is followed by polyadenylation; consensus=AATAAA
polyA_site	site on an RNA transcript to which will be added adenine residues by post-transcriptional polyadenylation
precursor_RNA	any RNA species that is not yet the mature RNA product; may include 5' clipped region (5'clip), 5' untranslated region (5'UTR), coding sequences (CDS, exon), intervening sequences (intron), 3' untranslated region (3'UTR), and 3' clipped region (3'clip)
prim_transcript	primary (initial, unprocessed) transcript; includes 5' clipped region (5'clip), 5' untranslated region (5'UTR), coding sequences (CDS, exon), intervening sequences (intron), 3' untranslated region (3'UTR), and 3' clipped region (3'clip)
primer_bind	non-covalent primer binding site for initiation of replication, transcription, or reverse transcription; includes site(s) for synthetic, for example, PCR primer elements
promoter	region on a DNA molecule involved in RNA polymerase binding to initiate transcription
protein_bind	non-covalent protein binding site on nucleic acid
RBS	ribosome binding site
repeat_region	region of genome containing repeating units
repeat_unit	single repeat element
rep_origin	origin of replication; starting site for duplication of nucleic acid to give two identical copies
rRNA	mature ribosomal RNA; the RNA component of the ribonucleoprotein particle (ribosome) which assembles amino acids into proteins

Key	Description
S_region	switch region of immunoglobulin heavy chains; involved in the rearrangement of heavy chain DNA leading to the expression of a different immunoglobulin class from the same B-cell
satellite	many tandem repeats (identical or related) of a short basic repeating unit; many have a base composition or other property different from the genome average that allows them to be separated from the bulk (main band) genomic DNA
scRNA	small cytoplasmic RNA; any one of several small cytoplasmic RNA molecules present in the cytoplasm and (sometimes) nucleus of a eukaryote
sig_peptide	signal peptide coding sequence; coding sequence for an N-terminal domain of a secreted protein; this domain is involved in attaching nascent polypeptide to the membrane; leader sequence
snRNA	small nuclear RNA; any one of many small RNA species confined to the nucleus; several of the snRNAs are involved in splicing or other RNA processing reactions
source	identifies the biological source of the specified span of the sequence; this key is mandatory; every entry will have, as a minimum, a single source key spanning the entire sequence; more than one source key per sequence is permissable
stem_loop	hairpin; a double-helical region formed by base-pairing between adjacent (inverted) complementary sequences in a single strand of RNA or DNA
STS	Sequence Tagged Site; short, single-copy DNA sequence that characterizes a mapping landmark on the genome and can be detected by PCR; a region of the genome can be mapped by determining the order of a series of STSs
TATA_signal	TATA box; Goldberg-Hogness box; a conserved AT-rich septamer found about 25 bp before the start point of each eukaryotic RNA polymerase II transcript unit which may be involved in positioning the enzyme for correct initiation; consensus=TATA(A or T)A(A or T)
terminator	sequence of DNA located either at the end of the transcript or adjacent to a promoter region that causes RNA polymerase to terminate transcription; may also be site of binding of repressor protein
transit_peptide	transit peptide coding sequence; coding sequence for an N-terminal domain of a nuclear-encoded organellar protein; this domain is involved in post-translational import of the protein into the organelle
tRNA	mature transfer RNA, a small RNA molecule (75-85 bases long) that mediates the translation of a nucleic acid sequence into an amino acid sequence
unsure	author is unsure of exact sequence in this region
V_region	variable region of immunoglobulin light and heavy chains, and T-cell receptor alpha, beta, and gamma chains; codes for the variable amino terminal portion; can be made up from V_segments, D_segments, N_regions, and J_segments

Key	Description
V_segment	variable segment of immunoglobulin light and heavy chains, and T-cell receptor alpha, beta, and gamma chains; codes for most of the variable region (V_region) and the last few amino acids of the leader peptide
variation	a related strain contains stable mutations from the same gene (for example, RFLPs, polymorphisms, etc.) which differ from the presented sequence at this location (and possibly others)
3'clip	3'-most region of a precursor transcript that is clipped off during processing
3'UTR	region at the 3' end of a mature transcript (following the stop codon) that is not translated into a protein
5'clip	5'-most region of a precursor transcript that is clipped off during processing
5'UTR	region at the 5' end of a mature transcript (preceding the initiation codon) that is not translated into a protein
-10_signal	pribnow box; a conserved region about 10 bp upstream of the start point of bacterial transcription units which may be involved in binding RNA polymerase; consensus=TAtAaT
-35_signal	a conserved hexamer about 35 bp upstream of the start point of bacterial transcription units; consensus=TTGACa [ ] or TGTTGACA [ ]

WIPO Standard ST.25 (1998), Appendix 2, Table 6 provides for feature keys related to protein sequences
.

Table 6: List of Feature Keys Related to Protein Sequences

Key	Description
CONFLICT	different papers report differing sequences
VARIANT	authors report that sequence variants exist
VARSPLIC	description of sequence variants produced by alternative splicing
MUTAGEN	site which has been experimentally altered
MOD_RES	post-translational modification of a residue
ACETYLATION	N-terminal or other
AMIDATION	generally at the C-terminal of a mature active peptide
BLOCKED	undetermined N- or C-terminal blocking group
FORMYLATION	of the N-terminal methionine

GAMMA-CARBOXYGLUTAMIC ACID HYDROXYLATION	of asparagine, aspartic acid, proline or lysine
METHYLATION	generally of lysine or arginine
PHOSPHORYLATION	of serine, threonine, tyrosine, aspartic acid or histidine
PYRROLIDONE CARBOXYLIC ACID	N-terminal glutamate which has formed an internal cyclic lactam
SULFATATION	generally of tyrosine
LIPID	covalent binding of a lipidic moiety
MYRISTATE	myristate group attached through an amide bond to the N-terminal glycine residue of the mature form of a protein or to an internal lysine residue
PALMITATE	palmitate group attached through a thioether bond to a cysteine residue or through an ester bond to a serine or threonine residue
FARNESYL	farnesyl group attached through a thioether bond to a cysteine residue
GERANYL-GERANYL	geranyl-geranyl group attached through a thioether bond to a cysteine residue
GPI-ANCHOR	glycosyl-phosphatidylinositol (GPI) group linked to the alpha-carboxyl group of the C-terminal residue of the mature form of a protein
N-ACYL DIGLYCERIDE	N-terminal cysteine of the mature form of a prokaryotic lipoprotein with an amide-linked fatty acid and a glyceryl group to which two fatty acids are linked by ester linkages
DISULFID	disulfide bond; the 'FROM' and 'TO' endpoints represent the two residues which are linked by an intra-chain disulfide bond; if the 'FROM' and 'TO' endpoints are identical, the disulfide bond is an interchain one and the description field indicates the nature of the cross-link
THIOLEST	thiolester bond; the 'FROM' and 'TO' endpoints represent the two residues which are linked by the thiolester bond
THIOETH	thioether bond; the 'FROM' and 'TO' endpoints represent the two residues which are linked by the thioether bond
CARBOHYD	glycosylation site; the nature of the carbohydrate (if known) is given in the description field
METAL	binding site for a metal ion; the description field indicates the nature of the metal

BINDING	binding site for any chemical group (co-enzyme, prosthetic group, etc.); the chemical nature of the group is given in the description field
SIGNAL	extent of a signal sequence (prepeptide)
TRANSIT	extent of a transit peptide (mitochondrial, chloroplastic, or for a microbody)
PROPEP	extent of a propeptide
CHAIN	extent of a polypeptide chain in the mature protein
PEPTIDE	extent of a released active peptide
DOMAIN	extent of a domain of interest on the sequence; the nature of that domain is given in the description field
CA_BIND	extent of a calcium-binding region
DNA_BIND	extent of a DNA-binding region
NP_BIND	extent of a nucleotide phosphate binding region; the nature of the nucleotide phosphate is indicated in the description field
TRANSMEM	extent of a transmembrane region
ZN_FING	extent of a zinc finger region
SIMILAR	extent of a similarity with another protein sequence; precise information, relative to that sequence is given in the description field
REPEAT	extent of an internal sequence repetition
HELIX	secondary structure: Helices, for example, Alpha-helix, 3(10) helix, or Pi-helix
STRAND	secondary structure: Beta-strand, for example, Hydrogen bonded beta-strand, or Residue in an isolated beta-bridge
TURN	secondary structure: Turns, for example, H-bonded turn (3-turn, 4-turn, or 5-turn)
ACT_SITE	amino acid(s) involved in the activity of an enzyme
SITE	any other interesting site on the sequence
INIT_MET	the sequence is known to start with an initiator methionine

NON_TER	the residue at an extremity of the sequence is not the terminal residue; if applied to position 1, this signifies that the first position is not the N-terminus of the complete molecule; if applied to the last position, it signifies that this position is not the C-terminus of the complete molecule; there is no description field for this key
NON_CONS	non consecutive residues; indicates that two residues in a sequence are not consecutive and that there are a number of unsequenced residues between them
UNSURE	uncertainties in the sequence; used to describe region(s) of a sequence for which the authors are unsure about the sequence - assignment

FILING INTERNATIONALLY

The revisions to 37 CFR 1.821 through 1.825 are the result of an effort to harmonize the PTO, PCT, EPO and JPO Sequence Listing requirements to the extent possible. The requirements of WIPO Standard ST.25 are substantially identical to the requirements of 37 CFR 1.821 through 1.825. PatentIn Version 3.1 software, now available (see MPEP § 2430), generates sequence listings that meet all of the requirements of WIPO Standard ST.25 (1998). The requirements of 37 CFR 1.821 through 1.825, however, are less stringent than the requirements of WIPO Standard ST.25 (1998). Thus, applicants who wish to file in countries which adhere to WIPO Standard ST.25 (1998) should consider the following when not using PatentIn Version 3.1:

(A) The WIPO Standard ST.25 (1998) does not permit submissions using a Macintosh computer;

(B) The WIPO Standard ST.25 (1998) does not accept the range of media permitted by 37 CFR 1.821 through 1.825;

(C) The answers in fields <221> and <222> must use selections from Tables 5 and 6 of WIPO Standard ST.25 (1998) to comply with that standard. The terms from these Tables are considered language neutral vocabulary;

(D) Any free text in numeric identifier <223> of a Sequence Listing will not be translated and thus must also appear in the specification of applications filed under WIPO Standard ST.25 (1998) for compliance;

(E) A CRF filed after the filing of an application under the PCT is not considered to be part of the disclosure and will not be published in the pamphlet;

(F) Paragraph 39 of WIPO Standard ST.25 (1998) requires the specific wording "the information recorded on the form is identical to the written sequence listing"; and

(G) WIPO Standard ST.25 (1998), paragraph 24, requires spaces between specified numeric identifiers in the Sequence Listing.

2422.01 Definitions of Nucleotide and/or Amino Acids for Purpose of Sequence Rules

37 CFR 1.821(a) presents a definition for "nucleotide and/or amino acid sequences." This definition sets forth limits, in terms of numbers of amino acids and/or numbers of nucleotides, at or above which compliance with the sequence rules is required. Nucleotide and/or amino acid sequences as used in 37 CFR 1.821 through 1.825 are interpreted to mean an unbranched sequence of four or more amino acids or an unbranched sequence of ten or more nucleotides. Branched sequences are specifically excluded from this definition. Sequences with fewer than four specifically defined nucleotides or amino acids are specifically excluded from this section. "Specifically defined" means those amino acids other than "Xaa" and those nucleotide bases other than "n" defined in accordance with the World Intellectual Property Organization (WIPO) Handbook on Industrial Property Information and Documentation, Standard ST.25: Standard for the Presentation of Nucleotide and Amino Acid Sequence Listings in Patent Applications (1998), including Tables 1 through 6 in Appendix 2 (see MPEP § 2422).

The limit of four or more amino acids was established for consistency with limits in place for industry database collections whereas the limit of ten or more nucleotides, while lower than certain industry database limits, was established to encompass those nucleotide sequences to which the smallest probe will bind in a stable manner. The limits for amino acids and nucleotides are also consistent with those established for sequence data exchange with the Japanese Patent Office and the European Patent Office.

37 CFR 1.821(a)(1) and 37 CFR 1.821(a)(2) present further definitions for those nucleotide and amino acid sequences that are intended to be embraced by the sequence rules. Situations in which the applicability of the rules are in issue will be resolved on a case-by-case basis.

Nucleotide sequences are further limited to those that can be represented by the symbols set forth in 37 CFR 1.822(b), which incorporates by reference WIPO Standard ST.25 (1998), Appendix 2, Table 1 (see MPEP § 2422). The presence of other than typical 5' to 3' phosphodiester linkages in a nucleotide sequence does not render the rules inapplicable. The Office does not want to exclude linkages of the type commonly found in naturally occurring nucleotides, e.g., eukaryotic end capped sequences.

Amino acid sequences are further limited to those listed in 37 CFR 1.822(b), which incorporates by reference WIPO Standard ST.25 (1998), Appendix 2, Table 3 (see MPEP § 2422), and those L-amino acids that are commonly found in naturally occurring proteins. The limitation to L-amino acids is based upon the fact that there currently exists no widely accepted standard nomenclature for representing the scope of amino acids encompassed by non-L-amino acids, and, as such, the process of meaningfully encoding these other amino acids for computerized searching and printing is not currently feasible. The presence of one or more D-amino acids in a sequence will exclude that sequence from the scope of the rules. (Voluntary compliance is, however, encouraged in these situations; the symbol “Xaa” can be used to represent D-amino acids.) The sequence rules embrace “[a]ny peptide or protein that can be expressed as a sequence using the symbols in WIPO Standard ST.25 (1998), Appendix 2, Table 3 in conjunction with a description in the Feature section to describe, for example, modified linkages, cross links and end caps, non-peptidyl bonds, etc.” 37 CFR 1.821(a)(2).

With regard to amino acid sequences, the use of the terms “peptide or protein” implies, however, that the amino acids in a given sequence are linked by at least three consecutive peptide bonds. Accordingly, an amino acid sequence is not excluded from the scope of the rules merely due to the presence of a single non-peptidyl bond. If an amino acid sequence can be represented by a string of amino acid abbreviations, with reference, where necessary, to a features table to explain modifications in the sequence, the sequence comes within the scope of the rules. However, the rules are not intended to encompass the subject matter that is generally referred to as synthetic resins.

2422.02 The Requirement for Exclusive Conformance; Sequences Presented in Drawing Figures

37 CFR 1.821(b) requires exclusive conformance, with regard to the manner in which the nucleotide and/or amino acid sequences are presented and described, with the sequence rules for all applications that include nucleotide and amino acid sequences that fall within the definitions. This requirement is necessary to minimize any confusion that could result if more than one format for representing sequence data was employed in a given application. It is also expected that the required standard format will be more readily and widely accepted and adopted if its use is exclusive, as well as mandatory.

In view of the fact that many significant sequence characteristics may only be demonstrated by a figure, the exclusive conformance requirement of this section may be relaxed for drawing figures. This is especially true in view of the fact that the representation of double stranded nucleotides is not permitted in the “Sequence Listing” and many significant nucleotide features, such as “sticky ends” and the like, will only be shown effectively by reference to a drawing figure. Further, the similarity or homology between/among sequences can only be depicted in an effective manner in a drawing figure. Similarly, drawing figures are recommended for use with amino acid sequences to depict structural features of the corresponding protein, such as finger regions and Kringle regions. The situations discussed herein are given by way of example only and there may be many other reasons for

relaxing the requirements of this section for the drawing figures. It should be noted, though, that when a sequence is presented in a drawing, regardless of the format or the manner of presentation of that sequence in the drawing, the sequence must still be included in the Sequence Listing and the sequence identifier ("SEQ ID NO:X") must be used, either in the drawing or in the Brief Description of the Drawings.

2422.03 The Requirements for a Sequence Listing and Sequence Identifiers; Sequences Embedded in Application Text; Variants of a Presented Sequence

37 CFR 1.821(c) requires that applications containing nucleotide and/or amino acid sequences that fall within the above definitions, contain, as a separate part of the disclosure on paper or compact disc, a disclosure of the nucleotide and/or amino acid sequences, and associated information, using the format and symbols that are set forth in 37 CFR 1.822 and 37 CFR 1.823. This separate part of the disclosure is referred to as the "Sequence Listing." The "Sequence Listing" submitted pursuant to 37 CFR 1.821(c), whether on paper or compact disc, is the official copy of the "Sequence Listing."

37 CFR 1.821(c) requires that each sequence disclosed in the application appear separately in the "Sequence Listing," with each sequence further being assigned a sequence identification number, referred to as "SEQ ID NO." The sequence identifiers must begin with 1 and increase sequentially by integers. The requirement for sequence identification numbers, at a minimum, requires that each sequence be assigned a different number for purposes of identification. However, where practical and for ease of reference, sequences should be presented in the separate part of the application in numerical order and in the order in which they are discussed in the application.

If submitted on paper, the "Sequence Listing" is a separate part of the disclosure which must begin on a new page within the specification. A plurality of sequences may, if feasible, be presented on a single page; the separate presentation of both nucleotide and amino acid sequences on the same page is also permitted.

If the "Sequence Listing" is submitted on compact disc, the specification must contain an incorporation by reference of the material on the compact disc in a separate paragraph, identifying each compact disc by the names of the files contained on each of the compact discs, their date of creation and their sizes in bytes (37 CFR 1.52(e)). The total number of compact discs including duplicates and the files on each compact disc shall be specified (37 CFR 1.77(b)(4)). The compact disc used to submit the sequence listing may also contain table information if the table has more than 50 pages of text. See 37 CFR 1.823(a)(2) and 1.52(e)(1)(iii). The compact disc and duplicate copy must be labeled "Copy 1" and "Copy 2," respectively, and a statement stating that the copies are identical must be included. If the two compact discs are not identical, the Office will use the disc labeled "Copy 1" for further processing (37 CFR 1.52(e)(4)). See also MPEP § 608.05.

The compact disc submitted under 37 CFR 1.821(c) may, if it contains no tables, be identical to the computer readable form (CRF) submitted under 37 CFR 1.821(e) and 37 CFR 1.824, if that CRF is submitted on a compact disc. Even if the compact discs submitted under both 37 CFR 1.821(c) and (e) are identical, each compact disc submitted under 37 CFR 1.821(c) must be submitted in duplicate, in addition to the CRF under 37 CFR 1.821(e).

The requirement for compliance in 37 CFR 1.821(c) is directed to "disclosures of nucleotide and/or amino acid sequences." (Emphasis added.) All sequence information, whether claimed or not, that meets the length thresholds in 37 CFR 1.821(a) is subject to the rules. The goal of the Office is to build a comprehensive database that can be used for, inter alia, the purpose of assessing the prior art. It is therefore essential that all sequence information, whether only disclosed or also claimed, be included in the database. In those instances in which prior art sequences are only referred to in a given application by name and a publication or accession reference, they need not be included as part of the "Sequence Listing," unless an examiner considers the referred- to sequence to be "essential material," per MPEP § 608.01(p). However, if the applicant presents the sequence as a string of particular bases or amino acids, it is necessary to include the sequence in the "Sequence Listing," regardless of whether the

applicant considers the sequence to be prior art. In general, any sequence that is disclosed and/or claimed as a sequence, i.e., as a string of particular bases or amino acids, and that otherwise meets the criteria of 37 CFR 1.821(a), must be set forth in the "Sequence Listing."

It is generally acceptable to present a single, general sequence in accordance with the sequence rules and to discuss and/or claim variants of that general sequence without presenting each variant as a separate sequence in the "Sequence Listing." By way of example only, the following types of sequence disclosures would be treated as noted herein by the Office. With respect to "conservatively modified variants thereof" of a sequence, the sequences may be described as SEQ ID NO:X and "conservatively modified variants thereof," if desired. With respect to a sequence that "may be deleted at the C-terminus by 1, 2, 3, 4, or 5 residues," all of the implied variations do not need to be included in the "Sequence Listing." If such a situation were encompassed by the rules, it would introduce far too much complexity into the "Sequence Listing" and the Office's database. The possible mathematical variations that could result from this type of language could reasonably require a "Sequence Listing" that would be thousands of pages in length. In this latter example, only the undeleted sequence needs to be included in the "Sequence Listing," and the sequences may be described as SEQ ID NO:X from which deletions have been made at the C-terminus by 1, 2, 3, 4, or 5 residues. The Office's database will only contain the undeleted sequence.

37 CFR 1.821(d) requires the use of the assigned sequence identifier in all instances where the description or claims of a patent application discuss sequences regardless of whether a given sequence is also embedded in the text of the description or claims of an application. This requirement is also intended to permit references, in both the description and claims, to sequences set forth in the "Sequence Listing" by the use of assigned sequence identifiers without repeating the sequence in the text of the description or claims. Sequence identifiers can also be used to discuss and/or claim parts or fragments of a properly presented sequence. For example, language such as "residues 14 to 243 of SEQ ID NO:23" is permissible and the fragment need not be separately presented in the "Sequence Listing." Where a sequence is embedded in the text of an application, it must be presented in a manner that complies with the requirements of the sequence rules.

The rules do not alter, in any way, the requirements of 35 U.S.C. 112. The implementation of the rules has had no effect on disclosure and/or claiming requirements. The rules, in general, or the use of sequence identifiers throughout the specification and claims, specifically, should not raise any issues under 35 U.S.C. 112, first or second paragraphs. The use of sequence identification numbers (SEQ ID NO:X) only provides a shorthand way for applicants to discuss and claim their inventions. These identification numbers do not in any way restrict the manner in which an invention can be claimed.

2422.04 The Requirement for a Computer Readable Copy of the Official Copy of the Sequence Listing

37 CFR 1.821(e) requires the submission of a copy of the "Sequence Listing" in computer readable form. The information on the computer readable form will be entered into the Office's database for searching and printing nucleotide and amino acid sequences. This electronic database will also enable the Office to exchange patented sequence data, in electronic form, with the Japanese Patent Office and the European Patent Office. It should be noted that the Office's database complies with the confidentiality requirement imposed by 35 U.S.C. 122. Pending application sequences are maintained in the database separately from published or patented sequences. That is, the Office will not exchange or make public any information on any sequence until the patent application containing that information is published or matures into a patent, or as otherwise allowed by 35 U.S.C. 122.

The "Sequence Listing" submitted pursuant to 37 CFR 1.821(c), whether on paper or compact disc, is the official copy of the "Sequence Listing." However, the Office may permit correction of the official copy, at the least, during the pendency of a given application by reference to the computer readable copy thereof submitted pursuant to 37 CFR 1.821(e) if both the official copy and computer readable form were submitted at the time of filing of the application and the totality of the circumstances otherwise

substantiate the proposed correction. A mere discrepancy between the official copy and the computer readable form may not, in and of itself, be sufficient to justify a proposed correction. In this regard, the Office will assume that the computer readable form has been incorporated by reference into the application when the official copy and computer readable form were submitted at the time of filing of the application. The Office will attempt to accommodate or address all correction issues, but it must be kept in mind that the real burden rests with the applicant to ensure that any discrepancies between the official copy and the computer readable form are eliminated or minimized. Applicants should be aware that there will be instances where the applicant may have to suffer the consequences of any discrepancies between the two.

The Office does not desire to be bound by a requirement to permanently preserve computer readable forms for support, priority or correction purposes. For example, the Office will make corrections, where appropriate, by reference to the computer readable form as long as the computer readable form is still available to the Office. However, once use of the computer readable form by the Office for processing has ended, i.e., once the Office has entered the data contained on the computer readable form into the appropriate database, the Office does not intend to further preserve the computer readable form submitted by the applicant.

2422.05 Reference to Previously Filed Identical Computer Readable Form; Continuing or Derivative Applications; Request for Transfer of Computer Readable Form

The last three sentences of 37 CFR 1.821(e) set forth the procedure to be followed when a computer readable form of a given application is identical with a computer readable form of another application. In that situation, an applicant may make reference to the other application and computer readable form therein in lieu of filing a duplicate computer readable form in the given application. That is, additional computer readable forms will not be required in derivative or continuing applications if the sequence information is exactly the same, i.e., with no additions or deletions, as that in a parent or previously filed application in which a complying computer readable form had been filed. If sequence information is deleted from or added to that submitted in a previously filed application, the procedure in this paragraph is not available and a new computer readable form is required. To take advantage of the procedure outlined in this section, applicants must request that the previously submitted sequence information be used in the given application. A letter must be submitted in the given application requesting use of the previously filed sequence information. The letter must completely identify the other application, by application number, and the computer readable form, by indicating whether it was the only computer readable form filed in that application or whether it was the second, or subsequent, computer readable form filed.

A sample letter requesting transfer of the previously filed sequence information is set forth below:

> The paper or compact disc copy of the Sequence Listing in this application [application number], is identical to the computer readable copy of the Sequence Listing filed in application [application number], filed [date]. In accordance with 37 CFR 1.821(e), please use the [first-filed, last-filed or only, whichever is applicable] computer readable form filed in that application as the computer readable form for the instant application. It is understood that the Patent and Trademark Office will make the necessary change in application number and filing date for the instant application. A paper or compact disc copy of the Sequence Listing is [included in the originally-filed specification of the instant application, included in a separately filed preliminary amendment for incorporation into the specification, whichever is applicable].

2422.06 Requirement for Statement Regarding Content of Official and Computer Readable Copies of Sequence Listing

37 CFR 1.821(f) requires that the official "Sequence Listing" (submitted on paper or compact disc pursuant to 37 CFR 1.821(c)) and computer readable copies of the "Sequence Listing" (submitted pursuant to 37 CFR 1.821(e)) be accompanied by a statement that the content of the official and computer readable copies are the same, at the time when the computer readable form is submitted. Such a statement may be made by the applicant. See MPEP

§ 2428 for further information and Sample Statements.

2422.07 Requirements for Compliance, Statements Regarding New Matter, and Sanctions for Failure to Comply

37 CFR 1.821(g) requires compliance with the requirements of 37 CFR 1.821(b) through (f), as discussed above, if they are not satisfied at the time of filing under 35 U.S.C. 111(a) or at the time of entering the national stage of an international application under 35 U.S.C. 371, within the period of time set in a notice requiring compliance. Failure to comply will result in the abandonment of the application. Submissions in reply to requirements under this paragraph must be accompanied by a statement that the submission includes no new matter. Such a statement may be made by the applicant. Extensions of time in which to reply to a requirement under this paragraph are available pursuant to 37 CFR 1.136. When an action by the applicant is a *bona fide* attempt to comply with these rules and it is apparent that compliance with some requirement has inadvertently been omitted, the applicant may be given a new time period to correct the omission. See 37 CFR 1.135(c).

Provisional applications filed under 35 U.S.C. 111(b) need not comply with 37 CFR 1.821 through 1.825, however, applicants are encouraged to file a Sequence Listing as defined in 37 CFR 1.821(c) for ease of identification of the sequence information contained in the provisional application.

37 CFR 1.821(h) requires compliance with the requirements of 37 CFR 1.821(b) through (f), as discussed above, within the time period prescribed in a notice requiring compliance in an international application filed in the United States Receiving Office under the Patent Cooperation Treaty (PCT), if the above noted requirements are not satisfied at the time of filing. Submissions in reply to requirements under this paragraph must be accompanied by a statement that the submission does not include matter which goes beyond the disclosure in the international application as filed. Such a statement may be made by an applicant. International applications that fail to comply with any of the requirements of 37 CFR 1.821(b)-(f) will be searched to the extent possible without the benefit of the information in computer readable form. See PCT Administrative Instructions Section 513(c).

The requirement to submit a statement that a submission in reply to the requirements of this section does not include new matter or matter which goes beyond the disclosure in the application as filed is not the first instance in which the applicant has been required to ensure that there is not new matter upon amendment. The requirement is analogous to that found in 37 CFR 1.125 regarding substitute specifications. When a substitute specification is required because the number or nature of amendments would make it difficult to examine the application, the applicant must include a statement that the substitute specification includes no new matter. The necessity of requiring a substitute "Sequence Listing," or pages thereof, is similar to the necessity of requiring a substitute specification and, likewise, the burden is on the applicant to ensure that no new matter is added. Applicants have a duty to comply with the statutory prohibition (35 U.S.C. 132 and 35 U.S.C. 251) against the introduction of new matter.

It should be noted that the treatment accorded errors in sequencing or any other errors prior to the implementation date of the sequence rules will be no different for those applications filed on or after the implementation date of these rules. The correction of errors in sequencing or any other errors that are made in describing an invention are, as they have always been, subject to the statutory prohibition (35 U.S.C. 132 and 35 U.S.C. 251) against the introduction of new matter.

2422.08 Presumptions Regarding Compliance

Neither the presence nor absence of information which is not required under the sequence rules will create a presumption that such information is necessary to satisfy any of the requirements of 35 U.S.C. 112. Further, the grant of a patent on an application that is subject to 37 CFR 1.821 through 37 CFR 1.825 constitutes a presumption that the granted patent complies with the requirements of these rules.

2422.09 Box Sequence; Hand Delivery of Sequence Listings and Computer Readable Forms

To facilitate administrative processing of all papers and compact discs associated with sequence rule compliance, all computer readable forms, compact discs, fees, and papers accompanying them filed in the Office should be marked "Box SEQUENCE."

Correspondence relating to the sequence rules may also be hand-delivered to the Technology Center (TC). In cases of hand delivery to the Customer Service Window or to the TC, the compact disc, floppy disk or tape should be placed in a protective mailer labeled with at least the application number, if available. The labeling requirements of 37 CFR 1.52(e) and 1.824(a)(6) must also be complied with. The use of staples and clips, if any, should be confined to carefully attaching the mailer to the submitted papers without contact or compression of the magnetic media which may cause the disk or tape to be unreadable. In no situations should additional or complimentary electronic copies be delivered to examiners or other Office personnel.

2423 Symbols and Format To Be Used for Nucleotide and/or Amino Acid Sequence Data

37 CFR 1.822. Symbols and format to be used for nucleotide and/or amino acid sequence data.

(a) The symbols and format to be used for nucleotide and/or amino acid sequence data shall conform to the requirements of paragraphs (b) through (e) of this section.

(b) The code for representing the nucleotide and/or amino acid sequence characters shall conform to the code set forth in the tables in WIPO Standard ST.25 (1998), Appendix 2, Tables 1 and 3. This incorporation by reference was approved by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. Copies of ST.25 may be obtained from the World Intellectual Property Organization; 34 chemin des Colombettes; 1211 Geneva 20 Switzerland. Copies of ST.25 may be inspected at the Patent Search Room; Crystal Plaza 3, Lobby Level; 2021 South Clark Place; Arlington, VA 22202. Copies may also be inspected at the Office of the Federal Register, 800 North Capitol Street, NW, Suite 700, Washington, DC. No code other than that specified in these sections shall be used in nucleotide and amino acid sequences. A modified base or modified or unusual amino acid may be presented in a given sequence as the corresponding unmodified base or amino acid if the modified base or modified or unusual amino acid is one of those listed in WIPO Standard ST.25 (1998), Appendix 2, Tables 2 and 4, and the modification is also set forth in the Feature section. Otherwise, each occurrence of a base or amino acid not appearing in WIPO Standard ST.25 (1998), Appendix 2, Tables 1 and 3, shall be listed in a given sequence as "n" or "Xaa," respectively, with further information, as appropriate, given in the Feature section, preferably by including one or more feature keys listed in WIPO Standard ST.25 (1998), Appendix 2, Tables 5 and 6.

(c) *Format representation of nucleotides.* (1) A nucleotide sequence shall be listed using the lower-case letter for representing the one-letter code for the nucleotide bases set forth in WIPO Standard ST.25 (1998), Appendix 2, Table 1.

(2) The bases in a nucleotide sequence (including introns) shall be listed in groups of 10 bases except in the coding parts of the sequence. Leftover bases, fewer than 10 in number, at the end of noncoding parts of a sequence shall be grouped together and separated from adjacent groups of 10 or 3 bases by a space.

(3) The bases in the coding parts of a nucleotide sequence shall be listed as triplets (codons). The amino acids corresponding to the codons in the coding parts of a nucleotide sequence shall be typed immediately below the corresponding codons. Where a codon spans an intron, the amino acid symbol shall be typed below the portion of the codon containing two nucleotides.

(4) A nucleotide sequence shall be listed with a maximum of 16 codons or 60 bases per line, with a space provided between each codon or group of 10 bases.

(5) A nucleotide sequence shall be presented, only by a single strand, in the 5 to 3 direction, from left to right.

(6) The enumeration of nucleotide bases shall start at the first base of the sequence with number 1. The enumeration shall be continuous through the whole sequence in the direction 5 to 3. The enumeration shall be marked in the right margin, next to the line containing the one-letter codes for the bases, and giving the number of the last base of that line.

(7) For those nucleotide sequences that are circular in configuration, the enumeration method set forth in paragraph (c)(6) of this section remains applicable with the exception that the designation of the first base of the nucleotide sequence may be made at the option of the applicant.

(d) *Representation of amino acids.* (1) The amino acids in a protein or peptide sequence shall be listed using the three-letter abbreviation with the first letter as an upper case character, as in WIPO Standard ST.25 (1998), Appendix 2, Table 3.

(2) A protein or peptide sequence shall be listed with a maximum of 16 amino acids per line, with a space provided between each amino acid.

(3) An amino acid sequence shall be presented in the amino to carboxy direction, from left to right, and the amino and carboxy groups shall not be presented in the sequence.

(4) The enumeration of amino acids may start at the first amino acid of the first mature protein, with the number 1. When presented, the amino acids preceding the mature protein, *e.g.*, pre-sequences, pro-sequences, pre-pro-sequences and signal sequences, shall have negative numbers, counting backwards starting with the amino acid next to number 1. Otherwise, the enumeration of amino acids shall start at the first amino acid at the amino terminal as number 1. It shall be marked below the sequence every 5 amino acids. The enumeration method for amino

acid sequences that is set forth in this section remains applicable for amino acid sequences that are circular in configuration, with the exception that the designation of the first amino acid of the sequence may be made at the option of the applicant.

(5) An amino acid sequence that contains internal terminator symbols (*e.g.*, "Ter", "*", or ".", etc.) may not be represented as a single amino acid sequence, but shall be presented as separate amino acid sequences.

(e) A sequence with a gap or gaps shall be presented as a plurality of separate sequences, with separate sequence identifiers, with the number of separate sequences being equal in number to the number of continuous strings of sequence data. A sequence that is made up of one or more noncontiguous segments of a larger sequence or segments from different sequences shall be presented as a separate sequence.

Tables 1-6 of WIPO Standard ST.25 (1998), Appendix 2, are reproduced in MPEP § 2422.

2423.01 Format and Symbols To Be Used in Sequence Listings

37 CFR 1.822 sets forth the format and symbols to be used for listing nucleotide and/or amino acid sequence data. The codes for representing the nucleotide and/or amino acid characters in the sequences are set forth in the tables of WIPO Standard ST.25 (1998), Appendix 2, Tables 1 and 3. See MPEP § 2422. No other symbols shall be used in nucleotide and amino acid sequences. The "modified base" and "modified and unusual amino acid" codes appearing in WIPO Standard ST.25 (1998), Appendix 2, Tables 2 and 4 (see 37 CFR 1.822 and MPEP § 2422) are not to be set forth in the sequences recited in the Sequence Listing. However, "modified base" or "modified and unusual amino acid" codes may be used in the written description and/or drawing portions of the specification. To properly enter notations for modified codes in the Sequence Listing, the Feature section of the Sequence Listing should be used. That is, a modified base or amino acid may be presented in a given sequence as the corresponding unmodified base or amino acid if the modified base or amino acid is one of those listed in WIPO Standard ST.25 (1998), Appendix 2, Table 2 or 4 and the modification is also set forth in the Feature section of the Sequence Listing. Otherwise, all bases or amino acids not appearing in WIPO Standard ST.25 (1998), Appendix 2, Table 1 or 3 must be listed in a given sequence as "n" or "Xaa," respectively, with further information given in the Feature section of the "Sequence Listing." See 37 CFR 1.823(b).

In 37 CFR 1.822(b) and 37 CFR 1.822(d), the use of three-letter codes for amino acids is required. The use of the three-letter codes for amino acids is preferred over the one-letter codes from the perspective of facilitating the examiner's review of the application papers, including the "Sequence Listing", and the public's, as well as the examiner's, use of the printed patents. The three-letter codes must be presented using the upper case for the first character and lower case for the remaining two characters.

37 CFR 1.822(c) through (e) set forth the format for presenting sequence data. These paragraphs set forth the manner in which the characters in sequences are to be grouped, spaced, presented and numbered.

2423.02 Depiction of Coding Regions

If applicant chooses to depict coding regions, 37 CFR 1.822 (c)(3) requires the amino acids corresponding to the codons in the coding parts of a nucleotide sequence to be typed immediately below the corresponding codons. Further, in 37 CFR 1.822 (c)(3), the situation in which a codon spans an intron has been addressed. In those situations, the "amino acid symbol shall be typed below the portion of the codon containing two nucleotides." This requirement clarifies the representation of an amino acid that corresponds to a codon that spans an intron.

It should be noted that the sequence rules do not, in any way, require the depiction of coding regions or the amino acids corresponding to the codons in those coding regions. 37 CFR 1.822 (d) only requires that where amino acids corresponding to the codons in the coding parts of a nucleotide sequence are depicted, they must be depicted below the corresponding codons. There is absolutely no requirement in the rules to depict coding regions. Nor is there a requirement to separately list the amino acids corresponding to the codons in the coding parts of a nucleotide sequence unless the applicant desires to discuss the amino acids as a separate sequence. That is, when the coding parts of a nucleotide sequence and their corresponding amino acids have been identified, if applicant desires to discuss those amino acids in the coding parts of the nucleotide as a separate sequence, those amino acids must also be set forth as a separate sequence. The separate submission of the amino acid

sequence that corresponds to the coding parts of a nucleotide sequence is, however, recommended and encouraged because the amino acid sequence may not be captured in the sequence database if it is only presented in the "Sequence Listing" as a mixed nucleotide and amino acid sequence.

2423.03 Presentation and Enumeration of Sequences

37 CFR 1.822(c)(5) provides that nucleotide sequences shall only be represented by a single strand, in the 5′ to 3′ direction, from left to right. That is, double stranded nucleotides shall not be represented in the "Sequence Listing." A double stranded nucleotide may be represented as two single stranded nucleotides, and any relationship between the two may be shown in the drawings.

The procedures for presenting and numbering amino acid sequences are set forth in 37 CFR 1.822(d). Two alternatives are presented for numbering amino acid sequences. Amino acid sequences may be numbered with respect to the identification of the first amino acid of the first mature protein or with respect to the first amino acid appearing at the amino terminal. The enumeration procedure for nucleotides is set forth in 37 CFR 1.822(c)(6). Sequences that are circular in configuration are intended to be encompassed by these rules, and numbering procedures for them are provided in 37 CFR 1.822(c)(7) and (d)(4). The numbering procedures set forth in 37 CFR 1.822(c) and (d) are not necessarily intended to be consistent with all currently employed numbering procedures. The objective here is to establish a reasonable numbering procedure that can readily be followed and adhered to. These formatting procedures also reflect those that have been agreed to for electronic data exchange with the JPO and the EPO.

In 37 CFR 1.822(e) the procedures for presenting and numbering hybrid and gapped sequences are set forth. A sequence that is made up of one or more noncontiguous segments of a larger sequence or segments from different sequences, i.e., a hybrid sequence, shall be presented as a separate sequence. A "gap" for the purpose of this section is not intended to embrace a gap or gaps that is/are introduced into the presentation of otherwise continuous sequence information in, e.g., a drawing figure, to show alignments or similarities with other sequences. The "gaps" referred to in this section are gaps representing unknown or undisclosed regions in a sequence between regions that are known or disclosed. In the situation where a contiguous fragment of a sequence that has already been properly set forth in a "Sequence Listing" is discussed and/or claimed, the fragment does not need to be separately included in the "Sequence Listing." It may be referred to in the specification, claims or drawings as, e.g., "residues 2 through 33 of SEQ ID NO:12," assuming that SEQ ID NO:12 has been properly included in the "Sequence Listing."

2424 Requirements for Nucleotide and/or Amino Acid Sequences as Part of the Application Papers

37 CFR 1.823. Requirements for nucleotide and/or amino acid sequences as part of the application.

(a)(1) If the "Sequence Listing" required by § 1.821(c) is submitted on paper: The "Sequence Listing," setting forth the nucleotide and/or amino acid sequence and associated information in accordance with paragraph (b) of this section, must begin on a new page and must be titled "Sequence Listing." The pages of the "Sequence Listing" preferably should be numbered independently of the numbering of the remainder of the application. Each page of the "Sequence Listing" shall contain no more than 66 lines and each line shall contain no more than 72 characters. A fixed-width font should be used exclusively throughout the "Sequence Listing."

(2) If the "Sequence Listing" required by § 1.821(c) is submitted on compact disc: The "Sequence Listing" must be submitted on a compact disc in compliance with § 1.52(e). The compact disc may also contain table information if the application contains table information that may be submitted on a compact disc (§ 1.52(e)(1)(iii)). The specification must contain an incorporation-by-reference of the Sequence Listing as required by § 1.52(e)(5). The presentation of the "Sequence Listing" and other materials on compact disc under § 1.821(c) does not substitute for the Computer Readable Form that must be submitted on disk, compact disc, or tape in accordance with § 1.824.

(b) The "Sequence Listing" shall, except as otherwise indicated, include the actual nucleotide and/or amino acid sequence, the numeric identifiers and their accompanying information as shown in the following table. The numeric identifier shall be used only in the "Sequence Listing." The order and presentation of the items of information in the "Sequence Listing" shall conform to the arrangement given below. Each item of information shall begin on a new line and shall begin with the numeric identifier enclosed in angle brackets as shown. The submission of those items of information designated with an "M" is mandatory. The submission of those items of information designated with an "O" is optional. Numeric identifiers <110> through <170> shall only

be set forth at the beginning of the "Sequence Listing." The following table illustrates the numeric identifiers.

Numeric Identifier	Definition	Comments and format	Mandatory (M) or Optional (O)
<110>	Applicant.....	Preferably max. of 10 names; one name per line; preferable format: Surname, Other Names and/or Initials.	M.
<120>	Title of Invention.....	.....	M.
<130>	File Reference.....	Personal file reference.....	M when filed prior to assignment or appl. number
<140>	Current Application Number.	Specify as: US 07/999,999 or PCT/US96/99999.	M, if available.
<141>	Current Filing Date.....	Specify as: yyyy-mm-dd.....	M, if available.
<150>	Prior Application Number.	Specify as: US 07/999,999 or PCT/US96/99999.	M, if applicable include priority documents under 35 U.S.C. 119 and 120
<151>	Prior Application Filing Date.	Specify as: yyyy-mm-dd	M, if applicable
<160>	Number of SEQ ID NOs.	Count includes total number of SEQ ID NOs..... .	M.
<170>	Software.....	Name of software used to create the Sequence Listing.	O.
<210>	SEQ ID NO:#:.....	Response shall be an integer representing the SEQ ID NO shown.	M.
<211>	Length.....	Respond with an integer expressing the number of bases or amino acid residues.	M.

Numeric Identifier	Definition	Comments and format	Mandatory (M) or Optional (O)
<212>	Type..... ...	Whether presented sequence molecule is DNA, RNA, or PRT (protein). If a nucleotide sequence contains both DNA and RNA fragments, the type shall be "DNA." In addition, the combined DNA/ RNA molecule shall be further described in the <220> to <223> feature section.	M.
<213>	Organism.....	Scientific name, i.e. Genus/ species, Unknown or Artificial Sequence. In addition, the "Unknown" or "Artificial Sequence" organisms shall be further described in the <220> to <223> feature section.	M.
<220>	Feature.....	Leave blank after <220>. <221-223> provide for a description of points of biological significance in the sequence.	M, under the following conditions: if "n," "Xaa," or a modified or unusual L-amino acid or modified base was used in a sequence; if ORGANISM is "Artificial Sequence" or "Unknown"; if molecule is combined DNA/RNA.
<221>	Name/ Key.....	Provide appropriate identifier for feature, preferably from WIPO Standard ST.25 (1998), Appendix 2, Tables 5 and 6.	M, under the following conditions: if "n," "Xaa," or a modified or unusual L-amino acid or modified base was used in a sequence.
Numeric Identifier	Definition	Comments and format	Mandatory (M) or Optional (O)
<222>	Location.....	Specify location within sequence; where appropriate state number of first and last bases/amino acids in feature.	M, under the following conditions: if "n," "Xaa," or a modified or unusual L-amino acid or modified base was used in a sequence.
<223>	Other Information.....	Other relevant information; four lines maximum.....	M, under the following conditions: if "n," "Xaa," or a modified or unusual L-amino acid or modified base was used in a sequence; if ORGANISM is "Artificial Sequence" or "Unknown"; if molecule is combined DNA/RNA.

Numeric Identifier	Definition	Comments and format	Mandatory (M) or Optional (O)
<300>	Publication Information	Leave blank after <300>	O.
<301>	Authors..... ...	Preferably max. of ten named authors of publication; specify one name per line; preferable format: Surname, Other Names and/or Initials.	O.
<302>	Title.....	....	O.
<303>	Journal.....	....	O.
<304>	Volume	....	O.
<305>	Issue	....	O.
<306>	Pages	....	O.
<307>	Date.....	Journal date on which data published; specify as yyyy- mm-dd, MMM-yyyy or Season- yyyy.	O.
<308>	Database Accession Number.	Accession number assigned by database including database name.	O.
<309>	Database Entry Date.....	Date of entry in database; specify as yyyy-mm-dd or MMM-yyyy.	O.
<310>	Patent Document Number.	Document number; for patent-type citations only. Specify as, for example, US 07/ 999,999.	O.
<311>	Patent Filing Date.....	Document filing date, for patent-type citations only; specify as yyyy-mm-dd.	O.
<312>	Publication Date.....	Document publication date, for patent-type citations only; specify as yyyy-mm-dd.	O.
<313>	Relevant Residues.....	FROM (position) TO (position).....	O.

Numeric Identifier	Definition	Comments and format	Mandatory (M) or Optional (O)
<400>	Sequence.....	SEQ ID NO should follow the numeric identifier and should appear on the line preceding the actual sequence.	M.

2424.01 Informational Requirements for the Sequence Listing

37 CFR 1.823 sets forth the informational requirements for inclusion in the separate part of the disclosure on paper or compact disc (the "Sequence Listing") that must be submitted in accordance with 37 CFR 1.821(c). 37 CFR 1.823(a)(1) sets forth page and line length requirements for any "Sequence Listing" submitted on paper. The requirement to use a fixed width font to present sequence data is also set forth therein. This latter requirement is made to ensure that the desired sequence character spacing and numbering is maintained. 37 CFR 1.823(a)(2) requires any "Sequence Listing" submitted on compact disc to be in compliance with 37 CFR 1.52(e). The compact disc "Sequence Listing" submitted under 37 CFR 1.821(c) may also contain table information if the application contains table information that is over 50 pages. See 37 CFR 1.52(e)(1)(iii). 37 CFR 1.823(b) lists the items of information that are to be included in the "Sequence Listing" in the order in which those items are to appear. The numeric identifier for each item of information shall not include the explanatory information included in 37 CFR 1.823(b).

2424.02 Sequence Listing Numeric Identifiers

37 CFR 1.823(b) sets forth the order and presentation of the items of information in the Sequence Listing. Each item of information in the Sequence Listing must include the appropriate numeric identifier and its accompanying information as shown in the table below. Each item of information must begin on a new line with the numeric identifier enclosed in angle brackets. The submission of those items of information designated with an "M" is mandatory. The submission of those items of information designated with an "O" is optional. Numeric identifiers <110> through <170> must be set forth at the beginning of the Sequence Listing.

The following table illustrates the numeric identifiers. See MPEP § 2431 for a sample Sequence Listing.

Numeric Identifier	Definition	Comments and format	Mandatory (M) or Optional (O)
<110>	Applicant.....	Preferably max. of 10 names; one name per line; preferable format: Surname, Other Names and/or Initials.	M.
<120>	Title of Invention.....	.....	M.
<130>	File Reference.....	Personal file reference.....	M when filed prior to assignment or appl. number
<140>	Current Application Number.	Specify as: US 07/999,999 or PCT/US96/99999.	M, if available.

Numeric Identifier	Definition	Comments and format	Mandatory (M) or Optional (O)
<141>	Current Filing Date.....	Specify as: yyyy-mm-dd.....	M, if available.
<150>	Prior Application Number.	Specify as: US 07/999,999 or PCT/US96/99999.	M, if applicable include priority documents under 35 U.S.C. 119 and 120
<151>	Prior Application Filing Date.	Specify as: yyyy-mm-dd	M, if applicable
<160>	Number of SEQ ID NOs.	Count includes total number of SEQ ID NOs..... .	M.
<170>	Software.....	Name of software used to create the Sequence Listing.	O.
<210>	SEQ ID NO:#:.....	Response shall be an integer representing the SEQ ID NO shown.	M.
<211>	Length.....	Respond with an integer expressing the number of bases or amino acid residues.	M.
<212>	Type..... ...	Whether presented sequence molecule is DNA, RNA, or PRT (protein). If a nucleotide sequence contains both DNA and RNA fragments, the type shall be “DNA.” In addition, the combined DNA/RNA molecule shall be further described in the <220> to <223> feature section.	M.
<213>	Organism.....	Scientific name, i.e. Genus/ species, Unknown or Artificial Sequence. In addition, the “Unknown” or “Artificial Sequence” organisms shall be further described in the <220> to <223> feature section.	M.

Numeric Identifier	Definition	Comments and format	Mandatory (M) or Optional (O)
<220>	Feature.....	Leave blank after <220>. <221-223> provide for a description of points of biological significance in the sequence.	M, under the following conditions: if "n," "Xaa," or a modified or unusual L-amino acid or modified base was used in a sequence; if ORGANISM is "Artificial Sequence" or "Unknown"; if molecule is combined DNA/RNA.
<221>	Name/ Key.....	Provide appropriate identifier for feature, preferably from WIPO Standard ST.25 (1998), Appendix 2, Tables 5 and 6.	M, under the following conditions: if "n," "Xaa," or a modified or unusual L-amino acid or modified base was used in a sequence.
Numeric Identifier	Definition	Comments and format	Mandatory (M) or Optional (O)
<222>	Location.....	Specify location within sequence; where appropriate state number of first and last bases/amino acids in feature.	M, under the following conditions: if "n," "Xaa," or a modified or unusual L-amino acid or modified base was used in a sequence.
<223>	Other Information.....	Other relevant information; four lines maximum.....	M, under the following conditions: if "n," "Xaa," or a modified or unusual L-amino acid or modified base was used in a sequence; if ORGANISM is "Artificial Sequence" or "Unknown"; if molecule is combined DNA/RNA.
<300>	Publication Information	Leave blank after <300>	O.
<301>	Authors.....	Preferably max. of ten named authors of publication; specify one name per line; preferable format: Surname, Other Names and/or Initials.	O.
<302>	Title.....	.....	O.
<303>	Journal.....	.....	O.
<304>	Volume	.....	O.
<305>	Issue	.....	O.

Numeric Identifier	Definition	Comments and format	Mandatory (M) or Optional (O)
<306>	Pages	....	O.
<307>	Date.....	Journal date on which data published; specify as yyyy- mm-dd, MMM-yyyy or Season- yyyy.	O.
<308>	Database Accession Number.	Accession number assigned by database including database name.	O.
<309>	Database Entry Date.....	Date of entry in database; specify as yyyy-mm-dd or MMM-yyyy.	O.
<310>	Patent Document Number.	Document number; for patent-type citations only. Specify as, for example, US 07/ 999,999.	O.
<311>	Patent Filing Date.....	Document filing date, for patent-type citations only; specify as yyyy-mm-dd.	O.
<312>	Publication Date.....	Document publication date, for patent-type citations only; specify as yyyy-mm-dd.	O.
<313>	Relevant Residues.....	FROM (position) TO (position).....	O.
<400>	Sequence.....	SEQ ID NO should follow the numeric identifier and should appear on the line preceding the actual sequence.	M.

2424.03 Additional Miscellaneous Requirements

Throughout 37 CFR 1.823(b), the items of information relating to patent applications and patent publications should be provided keeping in mind the appropriate standards that have been established by the World Intellectual Property Organization (WIPO). In general, an application should be identified by a country code, a number and a filing date, while a published patent document should be identified by a country code, a number and kind code. Proper citation of priority patent applications is covered in MPEP § 201.14(d). For published patent documents, the country code, number and kind code will appear on the front page of the document. Unpublished PCT applications are identified by the letters PCT, the country code of the Receiving Office, the last two digits of the year of filing and a number, e.g., PCT/AT81/00033, PCT/FR88/00100. A published PCT application is identified by the letters WO, the last two digits of the year of publication, a number and a kind code, e.g., WO82/02827A, WO88/06811A. Country codes from WIPO Standard ST.3 Annex A and kind codes from WIPO Standard ST.16 are reproduced in MPEP § 1851. Questions on proper citation of patent documents should be directed to the Search and Information Resources Administration, International Liaison Staff.

In 37 CFR 1.823(b), numeric identifier <110>, the item of information relating to "APPLICANT" should be limited to a maximum of the first ten named applicants in the application. Similarly, in numeric identifier <301>, the item of information relating to "AUTHORS" should be limited to a maximum of the first ten named authors in the publication.

In 37 CFR 1.823(b) "yyyy-mm-dd" is the format for the presentation of patent related date information in the "Sequence Listing." Other date information may also be presented as MMM-yyyy or Season-yyyy. The lower case letters designate numeric responses and the upper case letters designate alphabetical responses. As such, March 2, 1988, would be presented as 1988-03-02 or MAR 1988.

In numeric identifiers <220> - <223>, relating to "Features" or the description of the points of biological significance in a given sequence, it is recommended, but not required, that the information that is provided by the applicant conform to the controlled vocabulary that is set forth in GenBank's "Feature Representation in Nucleotide Sequence Data Libraries," Release 57.0, as may be amended. Further, the feature "LOCATION" should be specified using the syntax of the DDBJ/EMBL/GenBank Feature Table Definition. See MPEP § 2422 when filing in countries which adhere to WIPO Standard ST.25.

In numeric identifiers <300> - <312>, publication information for a given sequence is collected. The publication information encompasses both patent-type publications and non-patent literature publications. Numeric identifier <313>, Relevant Residues, is intended to collect information relating to the correspondence between a sequence set forth in the "Sequence Listing" and published sequence information. The starting (FROM) and end (TO) positions in the listed sequence that correspond to the published sequence information should be set forth.

2425 Form and Format for Nucleotide and/or Amino Acid Sequence Submissions in Computer Readable Form

37 CFR 1.824. Form and format for nucleotide and/or amino acid sequence submissions in computer readable form.

(a) The computer readable form required by § 1.821(e) shall meet the following requirements:

(1) The computer readable form shall contain a single "Sequence Listing" as either a diskette, series of diskettes, or other permissible media outlined in paragraph (c) of this section.

(2) The "Sequence Listing" in paragraph (a)(l) of this section shall be submitted in American Standard Code for Information Interchange (ASCII) text. No other formats shall be allowed.

(3) The computer readable form may be created by any means, such as word processors, nucleotide/amino acid sequence editors' or other custom computer programs; however, it shall conform to all requirements detailed in this section.

(4) File compression is acceptable when using diskette media, so long as the compressed file is in a self-extracting format that will decompress on one of the systems described in paragraph (b) of this section.

(5) Page numbering must not appear within the computer readable form version of the "Sequence Listing" file.

(6) All computer readable forms must have a label permanently affixed thereto on which has been hand-printed or typed: the name of the applicant, the title of the invention, the date on which the data were recorded on the computer readable form, the operating system used, a reference number, and an application number and filing date, if known. If multiple diskettes are submitted, the diskette labels must indicate their order (*e.g.,* "1 of X").

(b) Computer readable form submissions must meet these format requirements:

(1) Computer Compatibility: IBM PC/XT/AT or Apple Macintosh;

(2) Operating System Compatibility: MS-DOS, MS-Windows, Unix or Macintosh;

(3) Line Terminator: ASCII Carriage Return plus ASCII Line Feed; and

(4) Pagination: Continuous file (no "hard page break" codes permitted).

(c) Computer readable form files submitted may be in any of the following media:

(1) Diskette: 3.50 inch, 1.44 Mb storage; 3.50 inch, 720 Kb storage; 5.25 inch, 1.2 Mb storage; 5.25 inch, 360 Kb storage.

(2) Magnetic tape: 0.5 inch, up to 24000 feet; Density: 1600 or 6250 bits per inch, 9 track; Format: Unix tar command; specify blocking factor (not "block size"); Line Terminator: ASCII Carriage Return plus ASCII Line Feed.

(3) 8mm Data Cartridge: Format: Unix tar command; specify blocking factor (not "block size"); Line Terminator: ASCII Carriage Return plus ASCII Line Feed.

(4) Compact disc: Format: ISO 9660 or High Sierra Format.

(5) Magneto Optical Disk: Size/Storage Specifications: 5.25 inch, 640 Mb.

(d) Computer readable forms that are submitted to the Office will not be returned to the applicant.

37 CFR 1.824 sets forth the requirements for sequence submissions in computer readable form. Any computer operating system may be utilized to produce a sequence submission, provided that the system is capable of producing a file having the characteristics specified in 37 CFR 1.824, and is capable of

writing the properly formatted file to one of the acceptable electronic media. If a given sequence and its associated information cannot practically or possibly fit on the electronic media required in 37 CFR 1.824(c), an exception via a non-fee petition to waive this provision will normally be granted. As set forth in 37 CFR 1.824(d), the computer readable forms that are submitted in accordance with these rules will not be returned to the applicant. 37 CFR 1.824(a)(6) requires the labeling, with appropriate identifying information, of the computer readable forms that are submitted in accordance with these rules.

2426 Amendments to or Replacement of Sequence Listing and Computer Readable Copy Thereof

37 CFR 1.825. Amendments to or replacement of sequence listing and computer readable copy thereof.

(a) Any amendment to a paper copy of the "Sequence Listing" (§ 1.821(c)) must be made by the submission of substitute sheets and include a statement that the substitute sheets include no new matter. Any amendment to a compact disc copy of the "Sequence Listing" (§ 1.821(c)) must be made by the submission of a replacement compact disc (2 copies) in compliance with § 1.52(e). Amendments must also be accompanied by a statement that indicates support for the amendment in the application, as filed, and a statement that the replacement compact disc includes no new matter.

(b) Any amendment to the paper copy of the "Sequence Listing," in accordance with paragraph (a) of this section, must be accompanied by a substitute copy of the computer readable form (§ 1.821(e)) including all previously submitted data with the amendment incorporated therein, accompanied by a statement that the copy in computer readable form is the same as the substitute copy of the "Sequence Listing."

(c) Any appropriate amendments to the "Sequence Listing" in a patent; *e.g.*, by reason of reissue or certificate of correction, must comply with the requirements of paragraphs (a) and (b) of this section.

(d) If, upon receipt, the computer readable form is found to be damaged or unreadable, applicant must provide, within such time as set by the Commissioner, a substitute copy of the data in computer readable form accompanied by a statement that the substitute data is identical to that originally filed.

37 CFR 1.825 sets forth the procedures for amending the "Sequence Listing" and the computer readable copy thereof. The procedures that have been defined in 37 CFR 1.825 involve the submission of either substitute sheets or substitute compact discs of the "Sequence Listing" or substitute copies of the computer readable form, in conjunction with statements that indicate support for the amendment in the application, as filed, and that the substitute sheets or copies include no new matter. (See MPEP § 608.05 and § 2428 for further information.) An amendment to the material on a compact disc must be done by submitting a replacement compact disc with the amended file(s). The amendment should include a corresponding amendment to the description of the compact disc and the files contained thereon in the paper portion of the specification. ***A replacement compact disc containing the amended files also must contain all of the files of the original compact disc that were not amended.*** This will insure that the Office, printer, and public can quickly access all of the current files in an application or patent by referencing only the latest compact disc.The requirement for statements regarding the absence of new matter follows current practice relating to the submission of substitute specifications, as set forth in 37 CFR 1.125. 37 CFR 1.825 (c) addresses the situation where amendments to the "Sequence Listing" are made after a patent has been granted, e.g., by a certificate of correction, reissue or reexamination. 37 CFR 1.825 (d) addresses the possibility and presents a remedy for the situation where the computer readable form may be found by the Office to be damaged or unreadable.

2427 Form Paragraphs and Notice to Comply

2427.01 Form Paragraphs

See MPEP § 608.05 for form paragraphs which should be used when notifying applicant that a compact disc submitted in accordance with 37 CFR 1.52(e) (i.e., containing a computer program listing, Sequence Listing, and/or table) does not comply with all of the requirements of the 37 CFR 1.52(e). See also MPEP § 608.05(b) for form paragraphs which should be used when a table submitted on compact disc does not comply with 37 CFR 1.52(e).

In order to expedite the processing of applications, minor errors pertaining to compliance with the sequence rules may be handled with the first Office action. Examples of minor errors are: when the "Sequence Listing" under 37 CFR 1.821(c) is submitted on compact disc, missing statement in the transmittal letter stating that the two compact discs are identical, missing an incorporation-by-reference of

the "Sequence Listing" in the specification, or missing a listing of the files and required information in the transmittal letter; missing statement in the transmittal letter stating that the sequence listing information in computer readable form is identical to the written (on paper or compact disc) "Sequence Listing," etc. Since the application is ready for examination, the examiner may act on the application and include any objections to the application based on minor errors related to the "Sequence Listing" with his/her Office action. In addition to the form paragraphs reproduced in MPEP § 608.05 and § 608.05(b), the following form paragraphs are particular to Sequence Listings and should be used as appropriate when notifying applicant of errors in the Sequence Listing:

24.01 - This form paragraph should be used for the first mailing of a Notice to Comply.

24.02 - This form paragraph should be used for the first mailing of a CRF Diskette Problem Report.

24.03 - This form paragraph should be used when an applicant has made a *bona fide* attempt to comply but the reply generates an error listing from the Scientific and Technical Information Center (STIC). This should be used for a second mailing to applicant unless it is evident that there has been a deliberate omission; this form paragraph may also be used to extend the period for reply for the initially mailed notice.

24.04 - This form paragraph should be used when there has been a deliberate omission in the reply or where the reason the reply is incomplete cannot be characterized as an apparent oversight or instance of inadvertence.

24.05 – This form paragraph should be used whenever there is no statement in the transmittal letter that the sequence listing information recorded in computer readable form is identical to the written (on paper or compact disc) sequence listing.

24.05.01 – This form paragraph should be used whenever an amendment is filed with a CRF and there is no statement in the transmittal letter stating that the Sequence Listing information recorded in the CRF is identical to the written sequence listing.

¶ *24.01 Cover Letter for Use With Notice To Comply With Sequence Rules*

This application contains sequence disclosures that are encompassed by the definitions for nucleotide and/or amino acid sequences set forth in 37 CFR 1.821(a)(1) and (a)(2). However, this application fails to comply with the requirements of 37 CFR 1.821 through 1.825 for the reason(s) set forth below or on the attached Notice To Comply With Requirements For Patent Applications Containing Nucleotide Sequence And/Or Amino Acid Sequence Disclosures. **[1]**

Applicant is given ONE MONTH, or THIRTY DAYS, whichever is longer, from the mailing date of this letter within which to comply with the sequence rules, 37 CFR 1.821 - 1.825. Failure to comply with these requirements will result in ABANDONMENT of the application under 37 CFR 1.821(g). Extensions of time may be obtained by filing a petition accompanied by the extension fee under the provisions of 37 CFR 1.136(a). In no case may an applicant extend the period for reply beyond the SIX MONTH statutory period. Direct the reply to the undersigned. Applicant is requested to return a copy of the attached Notice to Comply with the reply.

Examiner Note:

1. Use this form paragraph **only for the initial communication to the applicant**. Use either form paragraph 24.03 or 24.04 for subsequent communications.
2. In bracket 1, insert how the application fails to comply with the requirements of 37 CFR 1.821 through 1.825.
3. Conclude action with appropriate form paragraph(s) 7.100-7.102.
4. When mailing the Office action, attach a Notice To Comply With Requirements for Patent Applications Containing Nucleotide And/Or Amino Acid Sequence Disclosures, along with a marked-up copy of the Raw Sequence Listing, if any.

¶ *24.02 Cover Letter for Use with CRF Diskette Problem Report*

This application contains sequence disclosures that are encompassed by the definitions for nucleotide and/or amino acid sequences set forth in 37 CFR 1.821(a)(1) and (a)(2). A computer readable form (CRF) of the sequence listing was submitted. However, the CRF could not be processed by the Scientific and Technical Information Center (STIC) for the reason(s) set forth on the attached CRF Diskette Problem Report.

Applicant is given ONE MONTH, or THIRTY DAYS, whichever is longer, from the mailing date of this letter within which to comply with the sequence rules, 37 CFR 1.821 - 1.825. Failure to comply with these requirements will result in ABANDONMENT of the application under 37 CFR 1.821(g). Extensions of time may be obtained by filing a petition accompanied by the extension fee under the provisions of 37 CFR 1.136(a). In no case may an applicant extend the period for reply beyond the SIX MONTH statutory period. Direct the reply to the undersigned. Applicant is requested to return a copy of the attached CRF Diskette Problem Report with the reply.

Examiner Note:

1. Use this form paragraph **only for the initial communication to the applicant**. Use either form paragraph 24.03 or 24.04 for subsequent communications.

2. Conclude action with appropriate form paragraph(s) 7.100-7.102.

3. When mailing the Office action, attach the CRF Diskette Problem Report.

¶ *24.03 Compact Disc/CRF Submission Is Not Fully Responsive, Bona Fide Attempt*

The reply filed **[1]** is not fully responsive to the Office communication mailed **[2]** for the reason(s) set forth below or on the attached Notice To Comply With The Sequence Rules or CRF Diskette Problem Report.

Since the above-mentioned reply appears to be *bona fide*, applicant is given a TIME PERIOD of **ONE (1) MONTH** or **THIRTY (30) DAYS** from the mailing date of this notice, whichever is longer, within which to supply the omission or correction in order to avoid abandonment. EXTENSIONS OF THIS TIME PERIOD MAY BE GRANTED UNDER 37 CFR 1.136(a).

Examiner Note:

1. This form paragraph may be used whether or not the six-month period for reply has expired. It is intended for use whenever a **bona fide** reply has been submitted. This practice does not apply where there has been a deliberate omission of some necessary part of a complete reply or where the reason the reply is incomplete cannot be characterized as an apparent oversight or apparent inadvertence. Under such cases the examiner has no authority to grant an extension if the six-month period for reply has expired. Use form paragraph 24.04 under such circumstances.

2. In bracket 1, insert the date of the reply and in bracket 2, insert the mail date of the communication requiring compliance.

3. When mailing the Office action, attach a Notice To Comply With Requirements For Patent Applications Containing Nucleotide Sequence And/Or Amino Acid Sequence Disclosures, if any, along with a marked-up copy of the Raw Sequence Listing, or CRF Diskette Problem Report.

4. See 37 CFR 1.135(c), 1.821(g); MPEP §§ 710.02(c), 711.02(a), 714.02 and 714.03.

¶ *24.04 Compact Disc/CRF Submission Is Not Fully Responsive*

The communication filed **[1]** is not fully responsive to the communication mailed **[2]** for the reason(s) set forth below or on the attached Notice To Comply With The Sequence Rules or CRF Diskette Problem Report.

If a complete reply has not been submitted by the time the shortened statutory period set in the communication mailed **[3]** has expired, this application will become abandoned unless applicant corrects the deficiency and obtains an extension of time under 37 CFR 1.136(a). In no case may an applicant extend the period for reply beyond the SIX MONTH statutory period.

Examiner Note:

1. This form paragraph may not be used when the six month period for reply has expired. Use this form paragraph in the situation where, in the reply (within the six-months), there has been a deliberate omission of some necessary part of a complete reply. When the reply appears to be bona fide, but through an apparent oversight or inadvertence failed to provide a complete reply, use form paragraph 24.03.

2. In bracket 1, insert the date of the reply and in brackets 2 and 3, insert the mail date of the communication requiring compliance.

3. When mailing the Office action, attach a Notice To Comply With Requirements For Patent Applications Containing Nucleotide Sequence And/Or Amino Acid Sequence Disclosures, if any, along with a marked-up copy of the Raw Sequence Listing, or CRF Diskette Problem Report.

¶ *24.05 CD-ROM/CD-R Requirements (Missing Sequence Listing/CRF Statement)*

This application is objected to because it does not include the statement "the sequence listing information recorded in computer readable form is identical to the written (on paper or compact disc) sequence listing" and, where applicable, a statement that the submission includes no new matter, as required by 37 CFR 1.821(e), 1.821(f), 1.821(g), 1.825(b) or 1.825(d). Correction is required.

Examiner Note:

Use this form paragraph when there is no statement in the transmittal letter stating that the sequence listing information recorded in the CRF is identical to the written sequence listing

¶ *24.05.01 CD-ROM/CD-R Requirements (Missing Sequence Listing/CRF Statement in an Amendment Filed with a CRF)*

The amendment filed **[1]** is objected to because it does not include the statement "the sequence listing information recorded in computer readable form is identical to the written (on paper or compact disc) sequence listing" and, where applicable, a statement that the submission includes no new matter, as required by 37 CFR 1.821(e), 1.821(f), 1.821(g), 1.825(b) or 1.825(d). A statement that the sequence listing information is identical is required.

Examiner Note:

1. Use this form paragraph when there is no statement in the transmittal letter stating that the sequence listing information recorded in the CRF is identical to the written sequence listing.

2. In bracket 1, insert the date of the amendment.

2427.02 Notice To Comply

The text of the Notice to Comply With Requirements For Patent Applications Containing Nucleotide Sequence and for Amino Acid Sequence Disclosures, Form PTO-1661, follows. The appropriate box on the notice should be checked depending upon the particular deficiencies that have been identified. In the alternative, a letter may be written notifying applicant of any deficiencies that have been identified. A copy of the "Raw Sequence Listing," where available, should also be sent to the applicant. The "Raw Sequence Listing" should also be entered into the application file upon receipt from STIC.

UNITED STATES DEPARTMENT OF COMMERCE

APPLICATION NUMBER	FILING/RECEIPT DATE	FIRST NAMED APPLICANT	ATTY. DOCKET NO./TITLE

DATE MAILED:

NOTICE TO COMPLY WITH REQUIREMENTS FOR PATENT APPLICATIONS CONTAINING NUCLEOTIDE SEQUENCE AND/OR AMINO ACID SEQUENCE DISCLOSURES

The nucleotide and/or amino acid sequence disclosure contained in this application does not comply with the requirements for such a disclosure as set forth in 37 CFR 1.821–1.825 for the following reason(s):

☐ 1. This application fails to comply with the requirements of 37 CFR 1.821–1.825.

☐ 2. This application does not contain, as a separate part of the disclosure on paper copy, a "Sequence Listing" as required by 37 CFR 1.821(c).

☐ 3. A copy of the "Sequence Listing" in computer readable form has not been submitted as required by 37 CFR 1.821(e).

☐ 4. A copy of the "Sequence Listing" in computer readable form has been submitted. The content of the computer readable form, however, does not comply with the requirements of 37 CFR 1.822 and/or 1.832, as indicated on the attached marked–up copy of the "Raw Sequence Listing."

☐ 5. The computer readable form that has been filed with this application has been found to be damaged and/or unreadable as indicated on the attached CRF Diskette Problem Report. A substitute computer readable form must be submitted as required by 37 CFR 1.825(d).

☐ 6. The paper copy of the "Sequence Listing" is not the same as the computer readable form of the "Sequence Listing" as required by 37 CFR 1.821(e).

☐ 7. OTHER:_____

_____

APPLICANT MUST PROVIDE:

☐ An initial or substitute computer readable form (CRF) copy of the "Sequence Listing."

☐ An initial or substitute paper copy of the "Sequence Listing," as well as an amendment directing its entry into the specification.

☐ A statement that the content of the paper and computer readable copies are the same and, where applicable, include no new matter, as required by 37 CFR 1.821(e), 1.821(f), 1.821(g), 1.825(b) or 1.825(d).

FOR QUESTIONS REGARDING COMPLIANCE WITH THESE REQUIREMENTS, PLEASE CONTACT:

☐ For Rules Interpretation, call (703) 308–1123.

☐ For CRF submission help, call (703) 308–4212.

☐ For PatentIn software help, call (703) 308–6856.

FORM **PTO–1661** (Rev. 7/97) **PART 1 – ATTORNEY/APPLICANT COPY**

2428 Sample Statements

Sample language for the statements required to support sequence rule submissions is provided below. These statements are given by way of example only; other language may, of course, be used. For the statements that relate to the assertion that the content of the paper or compact disc and computer readable copies are the "same," it is acknowledged that there may be some nonsubstantive differences between the two, e.g., page numbers and page breaks may be present in the paper copy but not in the computer readable copy thereof. This requirement for sameness relates to the informational content of the paper or compact disc and computer readable copies relevant to the requirements of the sequence rules.

37 CFR 1.821(f) - I hereby state that the information recorded in computer readable form is identical to the written (on paper or compact disc) sequence listing.

37 CFR 1.52(e)(4) - I hereby state that the two compact discs are identical.

37 CFR 1.821(g) [or (h)] - I hereby state that the submission, filed in accordance with 37 CFR 1.821(g) [or (h)], herein does not include new matter [or matter which goes beyond the disclosure in the international application].

37 CFR 1.825(a) - I hereby state that the amendments, made in accordance with 37 CFR 1.825(a), included in the substitute sheet(s) or compact disc(s) of the Sequence Listing are supported in the application, as filed, at _____. I hereby state that the substitute sheet(s) of the Sequence Listing does (do) not include new matter.

37 CFR 1.825(b) - I hereby state that the substitute copy of the computer readable form, submitted in accordance with 37 CFR 1.825(b), is the same as the amended Sequence Listing.

37 CFR 1.825(d) - I hereby state that the substitute copy of the computer readable form, submitted in accordance with 37 CFR 1.825(d), is identical to that originally filed.

2429 Helpful Hints for Compliance

The Office has now had a good deal of experience in the implementation of the sequence rules. The following list sets forth helpful hints, for both examiners and applicants, for compliance. For the most part, the list is a compilation of frequently asked questions.

—Compliance is not a filing date issue.

—Compliance is not a 35 U.S.C. 112 issue.

—Compliance is not a 35 U.S.C. 119/120 issue.

—Compliance is not *per se* a new matter issue. The standard for resolution of inconsistencies between the official "Sequence Listing" (submitted on paper or compact disc pursuant to 37 CFR 1.821(c)) and the computer readable form thereof and/or errors in the official copy of sequence information is based on the new matter standard. If there are inconsistencies in compact discs submitted in accordance with 37 CFR 1.52(e) between "Copy 1" and "Copy 2", the compact disc labeled "Copy 1" will be used for further processing.

—Compliance can be achieved via amendment.

—The paper or compact disc copy of the Sequence Listing is an integral part of the application. If submitted on paper, the Sequence Listing must begin on a new page, should appear at the end of the application, and preferably should be numbered independently of the numbering of the remainder of the application. The new page that begins the "Sequence Listing" should be entitled "Sequence Listing." If not submitted as such at filing, the Sequence Listing must be inserted into the application via amendment, e.g., by preliminary amendment. If submitted on compact disc, the specification must contain an incorporation by reference of the material on the compact disc in a separate paragraph identifying each compact disc.

—Substitute pages or replacement compact discs must be used for changes to the Sequence Listing for each respective format.

—Angle brackets and numeric identifiers listed in 37 CFR 1.823 are very important for our database. Extra punctuation should not be used in Sequence Listings.

—The computer readable form cannot contain page numbers. Page numbers should only be placed on the paper copy of the Sequence Listing. Page numbers should not be placed on the compact disc copy of the Sequence Listing.

—The PatentIn computer program is not the only means by which to comply with the rules. Any word processing program can be used to generate a Sequence Listing if it has the capability to convert a file into ASCII text.

—If a word processing program is used to generate a "Sequence Listing," hard page break controls should not be used and margins should be adjusted to the smallest setting.

—Word processing files should not be submitted to the Office; the Sequence Listing generated by a word processing file should be saved as an ASCII text file for submission. Most word processing programs provide this feature.

—Statements in accordance with 37 CFR 1.821(f), (g), (h) and 37 CFR 1.825 and proper labeling in accordance with 37 CFR 1.824(a)(6) should be noted. Sample statements to support filings and submissions in accordance with 37 CFR 1.821 through 1.825 are provided in MPEP § 2428 Sample Statements.

—Use Box SEQUENCE.

—Three and a half inch disks are less fragile than five and a quarter inch disks.

—On nucleotide sequences, since only single strands may be depicted in the "Sequence Listing," show strands in 5′ to 3′ direction.

—The single stranded nucleotide depicted in the "Sequence Listing" may represent a strand of a nucleotide sequence that may be single or double stranded which may be, further, linear or circular. An amino acid sequence or peptide may be linear or circular. In some instances, a sequence may be both single stranded and double stranded and/or both linear and circular. The response "not relevant" is also an acceptable response for both "Strandedness" and "Topology."

—Numeric identifiers "<140>, Current Application Number," "<141>, Current Filing Date," "<150>, Prior Application Number," and "<151>, Prior Application Filing Date," should appear in the "Sequence Listing" in all cases. If the information about the current application is not known or is unavailable at the time of completing the Sequence Listing, then the lines following numeric identifiers <140> and <141> should be left blank. This would normally be the case when the "Sequence Listing" is included in a newly filed application. Similarly, if information regarding prior applications is inapplicable, or not known at the time of completing the "Sequence Listing" but will be later filed, then the numeric identifiers <150> and <151> should appear with the line following the numeric identifiers left blank.

—If you receive a Notice to Comply that should not have been sent to you, send a letter in the form of a request for reconsideration of the notice to the organization sending the notice.

—There are a limited number of mandatory items of information. They are identified in MPEP § 2424.02 Sequence Listing Numeric Identifiers.

—Figures can be used to convey information not readily conveyed by the Sequence Listing. The exclusive conformance requirement of 37 CFR 1.821(b) will be relaxed for drawing figures. However, the sequence information so conveyed must still be included in a "Sequence Listing" and the sequence identifier ("SEQ ID NO:X") must be used, either in the drawing or in the "Brief Description of the Drawings."

—Extra copies of computer readable forms should not be sent to examiners.

—Inosine may be represented by the use of "I" in the features section, otherwise use "n."

—Stop codons, represented by an asterisk, are not permitted in amino acid sequences.

—Punctuation should not be used in a sequence to indicate unknown nucleotide bases or amino acid residues nor should punctuation be used to delimit active or functional regions of a sequence. These regions should be noted as Features of the sequence per 37 CFR 1.823(b) (see numeric identifiers <220> - <223>.

—The presence of an unnatural amino acid in a sequence does not have the same effect as the presence of a D-amino acid. The sequence may still be subject to the rules even though one or more of the amino acids is not naturally occurring.

—Cyclic and branched peptides are causing some confusion in the application of the rules. Specific questions should be directed to Group 1650 personnel.

—A cyclic peptide with a tail is regarded as a branched sequence, and thereby exempt from the rules, if all bonds adjacent to the amino acid from which the tail emanates are normal peptide bonds.

—Sequences that have variable-length regions depicted as, for example, Ala Ala Leu Leu $(Xaa\ Xaa)_n$ Ile Pro where n=0-234 or $agccttgggaca(nnnnn)_m gtcatt$ where m=0-354 or Ser Met Ala Xaa Ser where Xaa could be 1, 2, 3, 4 and/or 5 amino acids must still comply with the Sequence Rules. The method to use

is to repeat the variable-length region as many times as the maximum length and specify in the Features section that the amino acid (or nucleotide) at a specified position is either absent or present. The variables Xaa and n may stand for only one residue, hence the need to repeat the variable. The correct way to submit the third example is Ser Met Ala Xaa Xaa Xaa Xaa Xaa Ser combined with an explanation in the Features section of the listing that any one or all of amino acids 4-8 can either be present or absent.

—Single letter amino acid abbreviations are not acceptable within the Sequence Listing but may appear elsewhere in the application.

—Zero (0) is not used when the numbering of amino acids uses negative numbers to distinguish the mature protein.

—Subscripts or superscripts are not permitted in a Sequence Listing.

—If a "Sequence Listing" is amended, an entirely new computer readable form is required regardless of the triviality of the amendment. Amendments to the paper copy of the "Sequence Listing" must be made by replacement section in compliance with 37 CFR 1.121. Amendments to the compact disc copy of the "Sequence Listing" must be made by replacement discs.

—Note field length limitations. For specific instances, they may be waived, but compliance is encouraged.

—The exclusive conformance requirement of 37 CFR 1.821(b) requires that any amendment of the sequence information in a "Sequence Listing" be accompanied by an amendment to the corresponding information, if any, embedded in the text of the specification or presented in a drawing figure.

—Any inquiries regarding a specific computer readable form that has been processed by the Office should be directed to the Systems Branch of the Chemical/Biotechnology Division of the Scientific and Technical Information Center.

2430 PatentIn Information; Utilities Programs; Training

In those areas of biotechnology in which nucleotide and/or amino acid sequence information is significant, many patent applicants are accustomed to, or familiar with, the submission of such sequence information, in electronic form, to various sequence databases, such as GenBank, which is produced by the National Institutes of Health. In order to facilitate such submissions, or merely for the purpose of researching and developing sequence information, many eventual patent applicants also generate or encode sequence information in computer readable form. In order to further facilitate compliance with the sequence rules, the Office previously made available to the public an input program based on the AuthorIn program produced by GenBank. This input program, called PatentIn version 1.3, was specifically tailored to the requirements of the sequence rules which were in effect between October 1, 1990 and July 1, 1998.

The current sequence rules, which are embodied in 37 CFR 1.821-1.825 and World Intellectual Property Organization (WIPO) Standard ST.25, became effective July 1, 1998. The rules simplify the Sequence Listing requirements, and harmonize the format among all Trilateral Offices and many other patent offices around the world. The Office deployed PatentIn versions 2.0 and 2.1, in 1998 and 1999, respectively, incorporating changes in the required format for the Sequence Listing to ensure compliance with the sequence rules that became effective July 1, 1998. These versions operated under Microsoft Windows 3.1x, 95, 98 and NT. By using PatentIn version 2.0 or 2.1, customers were able to generate a Sequence Listing once and use that same listing to file at multiple patent offices worldwide. Applications filed in the U.S. after July 1, 1998 containing Sequence Listings prepared using PatentIn version 1.3 will not be in compliance with the U.S. sequence rules. Applications filed in the member countries of WIPO after July 1, 1998 containing Sequence Listings prepared using PatentIn version 1.3 will not be in compliance with ST.25.

In June 2000 another update of PatentIn was deployed, version 3.0. This version differs from earlier versions in that the capabilities have been extended. PatentIn 3.0 has several advantages over PatentIn 2.1. PatentIn 3.0 processes large sequences (over one million bases) and applications with a large number of sequences (over 100,000); it imports multiple sequences from a single file as well as multiple sequences from multiple files. Features defined for nucleic acid sequences are carried over to the supplemental amino acid sequences generated by the CDS feature. PatentIn 3.0 is more user-friendly than

PatentIn 2.1 and looks and feels more like other Windows-based programs. Unlike PatentIn 2.1, projects are portable from one computer to another provided PatentIn 3.0 is installed. From a programming viewpoint, the advantages include that the overall lines of code have been reduced to 25 percent of that required by PatentIn 2.1, maintenance of the code is easier since it is written in Visual C++ and it is easier to modify the code.

In March of 2001 PatentIn 3.1 was released. This newest version builds on the success of PatentIn 3.0 and expands its capabilities. One difference is that the capability to import a single sequence from a single file without a header has been added. The definition of variable characters has been enhanced in PatentIn 3.1. If the nucleotide sequence has the variable "n" and the CDS feature is selected, PatentIn 3.1 will calculate the position of the necessary Xaa in the supplemental protein sequence and provide the definition automatically based on the codon in which the "n" appears.

PatentIn version 3.1, and the companion User's Manual, are available on the Office World Wide Web site (www.uspto.gov) for free downloading. Copies of both the program and the user manual may also be purchased from the Office on 3 1/2-inch floppy diskette or compact disc. PatentIn 3.1 operates in a Windows 95/98/NT/2000 environment and has similar space, memory and system requirements as those for PatentIn version 3.0. A minimum of 64 MB of memory is recommended for smaller projects. Otherwise 128 MB is recommended. Even more additional memory may be required for larger sequence listings. The disk space required to install PatentIn 3.0 is 1.6 MB. Additional disk space is required to store project files and sequence listing files.

See MPEP § 1730 for additional information regarding ordering and using PatentIn.

While use of the PatentIn program is not required for compliance with the sequence rules, its use is highly recommended as Office experience has shown that submissions developed with PatentIn are far less likely to include errors than those developed without the program. The many automatic features of the PatentIn program also greatly ease the generation of Sequence Listings when compared to generating them by hand in a word processing environment. This is especially true for Sequence Listings that include many sequences and/or sequences having great lengths.

The Office provides hands-on training in the use of the PatentIn and associated utilities programs. The classes are held in Washington D.C. as demand warrants. In addition, on site training may be arranged at locations outside Washington, D.C. To express interest in such classes, please contact the Search and Information Resources Administration.

2434 Examination of Patent Applications Claiming Large Numbers of Nucleotide Sequences

The U.S. Patent and Trademark Office published its policy for the examination of patent applications that claim large numbers of nucleotide sequences in the *Official Gazette*, 1192 O.G. 68 (November 19, 1996). Nucleotide sequences encoding different proteins are structurally distinct chemical compounds and are unrelated to one another. These sequences are thus deemed to normally constitute independent and distinct inventions within the meaning of 35 U.S.C. 121. Absent evidence to the contrary, each such nucleotide sequence is presumed to represent an independent and distinct invention, subject to a restriction requirement pursuant to 35 U.S.C. 121 and 37 CFR 1.141. In establishing the new policy, the Commissioner has partially waived the requirements of 37 CFR 1.141 and will permit a reasonable number of such nucleotide sequences to be claimed in a single application. Under this policy, in most cases, up to 10 independent and distinct nucleotide sequences will be examined in a single application without restriction.Those sequences which are patentably indistinct from the sequences selected by the applicant will also be examined. Nucleotide sequences encoding the same protein are not considered to be independent and distinct and will continue to be examined together. In some exceptional cases, the complex nature of the claimed material may necessitate that the reasonable number of sequences to be selected be less than 10. In other cases, applicants may petition pursuant to 37 CFR 1.181 for examination of additional nucleotide sequences by providing evidence that the different nucleotide sequences do not cover independent and distinct inventions. For examples of typical nucleotide sequence claims and additional information on the search and examination procedures, see the above cited O.G. Notice. See also MPEP § 803.04.

2435 Publishing of Patents and Patent Application Publications with Lengthy Sequence Listings

Due to the high cost and limited usefulness of the printed paper or composed electronic image versions of nucleotide and/or amino acid sequences, if the "Sequence Listing" portion is lengthy (i.e., at least 600 Kb (about 300 typed pages)), it will no longer be printed with the paper and composed electronic image (page image) versions of patents and patent application publications. The "Sequence Listing" will only be published in electronic form and will be available on the USPTO sequence homepage (http://seqdata.uspto.gov) as an ASCII text file.

Neither the paper copies of patents and patent application publications that are in the search rooms nor those sold through the Office of Public Records, Certification Division, will include a sequence listing if the sequence listing is not included in the composed

electronic image (page image) version of the patent or patent application publication. Furthermore, any copy used as a reference in an Office action will include only the paper portion of the document. If an applicant requires an electronic copy of a "Sequence Listing" that was not printed in the document, applicant must specifically request and pay for the electronic copy. Both applicants and members of the general public can obtain an electronic copy of the "Sequence Listing" through the Certification Division for a separate fee as set forth in 37 CFR 1.19(b)(3). See the paragraph entitled "Copies of Documents" in MPEP § 1730 for contact information for Certification Division.

The patent mailed to applicant will include a copy of the patent on paper and a copy of the sequence listing on an electronic medium (e.g., compact disc), if the "Sequence Listing" is not printed in the patent.

If the "Sequence Listing" is not included in the page images of a patent or patent application publication, a standardized statement will appear. Additionally, in the electronic text version of the patent or patent application publication, the statement will include an active hyperlink to a web page containing the "Sequence Listing." The standardized statement for a patent will read, for example:

SEQUENCE LISTING

The patent contains a lengthy "Sequence Listing" section. A copy of the "Sequence Listing" is available in electronic form from the USPTO web site (http://seqdata.uspto.gov/sequence.html?DocID=6183957B1). An electronic copy of the "Sequence Listing" will also be available from the USPTO upon request and payment of the fee set forth in 37 CFR 1.19(b)(3).

The standardized statement for a patent application publication will read, for example:

SEQUENCE LISTING

The patent application contains a lengthy "Sequence Listing" section. A copy of the "Sequence Listing" is available in electronic form from the USPTO web site (http://seqdata.uspto.gov/sequence.html?DocID=20010000241). An electronic copy of the "Sequence Listing" will also be available from the USPTO upon request and payment of the fee set forth in 37 CFR 1.19(b)(3).

Sequence data may also be accessed in a more readily searchable manner from the National Center for Biotechnology Information (NCBI) at http://www.ncbi.nlm.nih.gov or from a commercial vendor. The USPTO forwards a copy of the sequence data to NCBI when a patent including a "Sequence Listing" is granted, and when an application containing a sequence is published pursuant to 35 U.S.C. 122(b). If NCBI elects to include the sequence data in one of its databases, NCBI indexes the sequence data according to patent or patent application publication number. There is currently no fee for the public to use the NCBI site.

Chapter 2500 Maintenance Fees

2501 Introduction [R-7]

35 U.S.C. 41. Patent fees; patent and trademark search systems.

*****

(b) MAINTENANCE FEES. — The Director shall charge the following fees for maintaining in force all patents based on applications filed on or after December 12, 1980:

(1) 3 years and 6 months after grant, $900.

(2) 7 years and 6 months after grant, $2,300.

(3) 11 years and 6 months after grant, $3,800.

Unless payment of the applicable maintenance fee is received in the United States Patent and Trademark Office on or before the date the fee is due or within a grace period of 6 months thereafter, the patent will expire as of the end of such grace period. The Director may require the payment of a surcharge as a condition of accepting within such 6-month grace period the payment of an applicable maintenance fee. No fee may be established for maintaining a design or plant patent in force.

(c)(1) The Director may accept the payment of any maintenance fee required by subsection (b) of this section which is made within twenty-four months after the six-month grace period if the delay is shown to the satisfaction of the Director to have been unintentional, or at any time after the six-month grace period if the delay is shown to the satisfaction of the Director to have been unavoidable. The Director may require the payment of a surcharge as a condition of accepting payment of any maintenance fee after the six-month grace period. If the Director accepts payment of a maintenance fee after the six-month grace period, the patent shall be considered as not having expired at the end of the grace period.

(2) A patent, the term of which has been maintained as a result of the acceptance of a payment of a maintenance fee under this subsection, shall not abridge or affect the right of any person or that person's successors in business who made, purchased, offered to sell, or used anything protected by the patent within the United States, or imported anything protected by the patent into the United States after the 6-month grace period but prior to the acceptance of a maintenance fee under this subsection, to continue the use of, to offer for sale, or to sell to others to be used, offered for sale, or sold, the specific thing so made, purchased, offered for sale, used, or imported. The court before which such matter is in question may provide for the continued manufacture, use, offer for sale, or sale of the thing made, purchased, offered for sale, or used within the United States, or imported into the United States, as specified, or for the manufacture, use, offer for sale, or sale in the United States of which substantial preparation was made after the 6-month grace period but before the acceptance of a maintenance fee under this subsection, and the court may also provide for the continued practice of any process that is practiced, or for the practice of which substantial preparation was made, after the 6-month grace period but before the acceptance of a maintenance fee under this subsection, to the extent and under such terms as the court deems equitable for the protection of investments made or business commenced after the 6-month grace period but before the acceptance of a maintenance fee under this subsection.

*****

Note: During fiscal years 2005 and 2006>, and extended through fiscal year 2008<, 35 U.S.C. 41(b) shall be administered as reproduced above.

Public Law 96-517, enacted December 12, 1980, established the requirement to pay maintenance fees for applications filed on or after that date. The statutory provisions regarding maintenance fees have been subsequently modified by Public Law 97-247, enacted August 27, 1982; Public Law 98-622, enacted November 8, 1984; Public Law 102-204, enacted December 10, 1991; Public Law 102-444, enacted October 23, 1992; Public Law 105-358, enacted November 10, 1998; Public Law 106-113, enacted November 29, 1999; * Public Law 108-447, enacted December 8, 2004>; Public Law 109-289, enacted September 29, 2006; Public Law 109-369, enacted November 17, 2006; Public Law 109-383, enacted December 9, 2006; Public Law 110-5, enacted February 15, 2007; Public Law 110-92, enacted September

29, 2007; Public Law 110-116, enacted November 13, 2007, Public Law 110-137, enacted December 14, 2007; Public Law 110-149, enacted December 21, 2007; and Public Law 110-161, enacted December 26, 2007.<

I. MAINTENANCE FEE BRANCH

The Maintenance Fee Branch of the Receipts Accounting Division of the Office of Finance provides specialized advice and guidance to the public on maintenance fee matters.

The Maintenance Fee Branch determines the proper status of issued patents which are subject to payment of maintenance fees, receives and processes fee transmittals, updates small entity status, responds to public inquiries on post-issuance status and maintenance fees, determines if patents have expired, and determines if maintenance fees are timely and properly computed. This Branch also generates the data necessary to produce *Official Gazette* notices of maintenance fees due and of expiration of patents due to failure to pay maintenance fees.

II. OFFICE OF **>PATENT APPLICATION PROCESSING<

The Office of **>Patent Application Processing (OPAP)< updates patent post issuance automated files with the following information:

(A) Changes of Correspondence Address
(B) Powers of Attorney and Revocations Thereof
(C) Withdrawals of Attorneys and Agents
(D) Changes to Entity Status

The official mailing address for submitting requests to update all post-issuance patent information is:

Director of the United States Patent and Trademark Office
Mail Stop Post Issue
P.O. Box 1450
Alexandria, Virginia 22313-1450

2504 Patents Subject to Maintenance Fees [R-7]

37 CFR 1.362. Time for payment of maintenance fees.

(a) Maintenance fees as set forth in §§ 1.20(e) through (g) are required to be paid in all patents based on applications filed on or after December 12, 1980, except as noted in paragraph (b) of this section, to maintain a patent in force beyond 4, 8 and 12 years after the date of grant.

(b) Maintenance fees are not required for any plant patents or for any design patents. Maintenance fees are not required for a reissue patent if the patent being reissued did not require maintenance fees.

(c) The application filing dates for purposes of payment of maintenance fees are as follows:

(1) For an application not claiming benefit of an earlier application, the actual United States filing date of the application.

(2) For an application claiming benefit of an earlier foreign application under 35 U.S.C. 119, the United States filing date of the application.

(3) For a continuing (continuation, division, continuation-in-part) application claiming the benefit of a prior patent application under 35 U.S.C. 120, the actual United States filing date of the continuing application.

(4) For a reissue application, including a continuing reissue application claiming the benefit of a reissue application under 35 U.S.C. 120, the United States filing date of the original non-reissue application on which the patent reissued is based.

(5) For an international application which has entered the United States as a Designated Office under 35 U.S.C. 371, the international filing date granted under Article 11(1) of the Patent Cooperation Treaty which is considered to be the United States filing date under 35 U.S.C. 363.

(d) Maintenance fees may be paid in patents without surcharge during the periods extending respectively from:

(1) 3 years through 3 years and 6 months after grant for the first maintenance fee,

(2) 7 years through 7 years and 6 months after grant for the second maintenance fee, and

(3) 11 years through 11 years and 6 months after grant for the third maintenance fee.

(e) Maintenance fees may be paid with the surcharge set forth in § 1.20(h) during the respective grace periods after:

(1) 3 years and 6 months and through the day of the 4th anniversary of the grant for the first maintenance fee.

(2) 7 years and 6 months and through the day of the 8th anniversary of the grant for the second maintenance fee, and

(3) 11 years and 6 months and through the day of the 12th anniversary of the grant for the third maintenance fee.

(f) If the last day for paying a maintenance fee without surcharge set forth in paragraph (d) of this section, or the last day for paying a maintenance fee with surcharge set forth in paragraph (e) of this section, falls on a Saturday, Sunday, or a federal holiday within the District of Columbia, the maintenance fee and any necessary surcharge may be paid under paragraph (d) or paragraph (e) respectively on the next succeeding day which is not a Saturday, Sunday, or Federal holiday.

(g) Unless the maintenance fee and any applicable surcharge is paid within the time periods set forth in paragraphs (d), (e) or (f) of this section, the patent will expire as of the end of the grace period set forth in paragraph (e) of this section. A patent which expires for the failure to pay the maintenance fee will expire at the end of the same date (anniversary date) the patent was granted in the 4th, 8th, or 12th year after grant.

(h) The periods specified in §§1.362 (d) and (e) with respect to a reissue application, including a continuing reissue application thereof, are counted from the date of grant of the original nonreissue application on which the reissued patent is based.

Maintenance fees are required to be paid on all patents based on applications filed on or after December 12, 1980, except for plant patents and design patents. Furthermore, maintenance fees are not required for a reissue patent if the patent being reissued did not require maintenance fees. Where there are multiple continuation/divisional reissues of an original patent, the maintenance fee must be directed to the *>latest< reissue patent. **>35 U.S.C. 41 does not provide for charging of more than one maintenance fee for the multiple reissues. Only one maintenance fee is required for all the multiple reissue patents that replaced the single original patent. See MPEP § 1415.01.<

Application filing dates for purposes of determining whether a patent is subject to payment of maintenance fees are as follows:

(A) For an application not claiming benefit of an earlier application, the actual United States filing date of the application.

(B) For an application claiming benefit of an earlier foreign application under 35 U.S.C. 119(a)-(d), the actual United States filing date of the application.

(C) For a continuing (continuation, division, continuation-in-part) application claiming the benefit of a prior patent application under 35 U.S.C. 120, the actual United States filing date of the continuing application.

(D) For a reissue application, including a continuing reissue application claiming the benefit of a reissue application under 35 U.S.C. 120, the United States filing date of the original nonreissue application on which the patent reissued is based.

(E) For an international application that has entered the United States as a Designated Office under 35 U.S.C. 371, the international filing date granted under Article 11(1) of the Patent Cooperation Treaty which is considered to be the United States filing date under 35 U.S.C. 363.

2506 Times for Submitting Maintenance Fee Payments [R-2]

>Maintenance fees cannot be paid in advance since 35 U.S.C. 41(f) permits maintenance fees to be adjusted every year on October 1 to reflect any fluctuations during the previous 12 months in the Consumer Price Index as determined by the Secretary of Labor.<

37 CFR 1.362(d) sets forth the time periods when the maintenance fees for a utility patent can be paid without surcharge. Those periods, referred to generally as the "window period," are the 6-month periods preceding each due date. The "due dates" are defined in 35 U.S.C. 41(b). The window periods are (1) 3 years to 3 1/2 years after the date of issue for the first maintenance fee payment, (2) 7 years to 7 1/2 years after the date of issue for the second maintenance fee payment, and (3) 11 years to 11 1/2 years after the date of issue for the third and final maintenance fee payment. A maintenance fee paid on the last day of a window period can be paid without surcharge. The last day of a window period is the same day of the month the patent was granted 3 years and 6 months, 7 years and 6 months, or 11 years and 6 months after grant of the patent.

37 CFR 1.362(e) sets forth the time periods when the maintenance fees for a utility patent can be paid with surcharge. Those periods, referred to generally as the "grace period," are the 6-month periods immediately following each due date. The grace periods are (1) 3 1/2 years and through the day of the 4th anniversary of the grant of the patent, (2) 7 1/2 years and through the day of the 8th anniversary of the grant of the patent and, (3) 11 1/2 years and through the day of the 12th anniversary of the grant of the patent. A maintenance fee may be paid with the surcharge on the same date (anniversary date) the patent was granted in the 4th, 8th, or 12th year after grant to prevent the patent from expiring.

Maintenance fees for a reissue patent are due based upon the schedule established for the original utility patent. The filing of a request for *ex parte* or *inter partes* reexamination and/or the publication of a reexamination certificate does not alter the schedule of maintenance fee payments of the original patent.

If the day for paying a maintenance fee falls on a Saturday, Sunday, or a Federal holiday within the Dis-

trict of Columbia, the maintenance fee may be paid on the next succeeding day that is not a Saturday, Sunday, or Federal holiday. For example, if the window period for paying a maintenance fee without a surcharge ended on a Saturday, Sunday, or a Federal holiday within the District of Columbia, the maintenance fee can be paid without surcharge on the next succeeding day that is not a Saturday, Sunday, or a Federal holiday within the District of Columbia. Likewise, if the grace period for paying a maintenance fee with a surcharge ended on a Saturday, Sunday, or a Federal holiday within the District of Columbia, the maintenance fee can be paid with surcharge on the next succeeding day that is not a Saturday, Sunday, or a Federal holiday within the District of Columbia. In the latter situation, the failure to pay the maintenance fee and surcharge on the next succeeding day that is not a Saturday, Sunday, or a Federal holiday within the District of Columbia will result in the patent expiring on a date (4, 8, or 12 years after the date of grant) earlier than the last date on which the maintenance fee and surcharge could be paid. This situation results from the provisions of 35 U.S.C. 21, but those provisions do not extend the expiration date of the patent if the maintenance fee and any required surcharge are not paid when required. For example, if the grace period for paying a maintenance fee with a surcharge ended on a Saturday, the maintenance fee and surcharge could be paid on the next succeeding business day, e.g., Monday, but the patent will have expired at midnight on Saturday if the maintenance fee and surcharge were not paid on the following Monday. Therefore, if the maintenance fee and any applicable surcharge are not paid, the patent will expire as of the end of the grace period as listed above. A patent that expires for failure of payment will expire on the anniversary date the patent was granted in the 4th, 8th, or 12th year after the grant.

2510 Submission of Maintenance Fee Payments and Documents [R-7]

I. SUBMISSION OVER THE INTERNET

Maintenance fee payments can be made quickly and easily over the Internet at www.uspto.gov by electronic funds transfer (EFT), credit card or deposit account payment methods. >Maintenance fee payments cannot be submitted by using EFS-Web.< For additional information regarding maintenance fee, go to www.uspto.gov, at the top of the page, click on the "Site Index" link, click on "M," and then click on "Maintenance **>Fee Branch<" link. See MPEP § 509 and § 2522 for additional information pertaining to payments by credit card and payments by deposit account.

II. SUBMISSION BY MAIL

**>Maintenance fee payments not electronically submitted over the Internet, and correspondence related to maintenance fees may be addressed to:

Director of the United States Patent and Trademark Office
Attn: Maintenance Fee
2051 Jamieson Avenue, Suite 300
Alexandria, Virginia 22314<

37 CFR 1.366(b) provides that the certificate of mailing procedures of 37 CFR 1.8 or the mailing by "Express Mail" provisions of 37 CFR 1.10 may be utilized in paying maintenance fees. The specific requirements of either 37 CFR 1.8 or 1.10 must be fully complied with if the benefits of either are desired. See MPEP § 512 and § 513.

III. SUBMISSION BY FACSIMILE

Payment of a maintenance fee is accepted via facsimile, when charged to a deposit account or to a credit card. Credit Card Payment Form (PTO-2038) should be used if payment is made by credit card. See MPEP § 509 and § 2522. In addition, requests pertaining to post-issuance documents, such as change of correspondence address, assignment of fee address, etc., may be submitted by facsimile.

37 CFR 1.366(b) provides that the certificate of transmission procedure of 37 CFR 1.8 may be utilized in paying maintenance fees. The specific requirements of 37 CFR 1.8 must be fully complied with if the benefits thereof are desired. See MPEP § 512.

IV. SUBMISSION BY HAND DELIVERY

Maintenance fee payments may be hand-carried to the Office of Finance receptionist in Suite 300 of the Carlyle Place Building, 2051 Jamieson Avenue, Alex-

andria, VA 22314. Although the receptionist will not process the maintenance fee payment, if the payment is delivered with an itemized postcard, the receptionist will provide a delivery receipt by date stamping the postcard. The maintenance fee payment should be placed in an envelope with MAINTENANCE FEE written in dark ink across the envelope.

2515 Information Required for Submission of Maintenance Fee Payment [R-7]

37 CFR 1.366. Submission of maintenance fees.

(a) The patentee may pay maintenance fees and any necessary surcharges, or any person or organization may pay maintenance fees and any necessary surcharges on behalf of a patentee. Authorization by the patentee need not be filed in the Patent and Trademark Office to pay maintenance fees and any necessary surcharges on behalf of the patentee.

(b) A maintenance fee and any necessary surcharge submitted for a patent must be submitted in the amount due on the date the maintenance fee and any necessary surcharge are paid. A maintenance fee or surcharge may be paid in the manner set forth in § 1.23 or by an authorization to charge a deposit account established pursuant to § 1.25. Payment of a maintenance fee and any necessary surcharge or the authorization to charge a deposit account must be submitted within the periods set forth in § 1.362(d), (e), or (f). Any payment or authorization of maintenance fees and surcharges filed at any other time will not be accepted and will not serve as a payment of the maintenance fee except insofar as a delayed payment of the maintenance fee is accepted by the Director in an expired patent pursuant to a petition filed under § 1.378. Any authorization to charge a deposit account must authorize the immediate charging of the maintenance fee and any necessary surcharge to the deposit account. Payment of less than the required amount, payment in a manner other than that set forth § 1.23, or in the filing of an authorization to charge a deposit account having insufficient funds will not constitute payment of a maintenance fee or surcharge on a patent. The procedures set forth in § 1.8 or § 1.10 may be utilized in paying maintenance fees and any necessary surcharges.

(c) In submitting maintenance fees and any necessary surcharges, identification of the patents for which maintenance fees are being paid must include the patent number, and the application number of the United States application for the patent on which the maintenance fee is being paid. If the payment includes identification of only the patent number (*i.e.*, does not identify the application number of the United States application for the patent on which the maintenance fee is being paid), the Office may apply the payment to the patent identified by patent number in the payment or may return the payment.

(d) Payment of maintenance fees and any surcharges should identify the fee being paid for each patent as to whether it is the 3 1/2-, 7 1/2-, or 11 1/2-year fee, whether small entity status is being changed or claimed, the amount of the maintenance fee and any surcharge being paid, and any assigned customer number. If the maintenance fee and any necessary surcharge is being paid on a reissue patent, the payment must identify the reissue patent by reissue patent number and reissue application number as required by paragraph (c) of this section and should also include the original patent number.

(e) Maintenance fee payments and surcharge payments relating thereto must be submitted separate from any other payments for fees or charges, whether submitted in the manner set forth in § 1.23 or by an authorization to charge a deposit account. If maintenance fee and surcharge payments for more than one patent are submitted together, they should be submitted on as few sheets as possible with the patent numbers listed in increasing patent number order. If the payment submitted is insufficient to cover the maintenance fees and surcharges for all the listed patents, the payment will be applied in the order the patents are listed, beginning at the top of the listing.

(f) Notification of any change in status resulting in loss of entitlement to small entity status must be filed in a patent prior to paying, or at the time of paying, the earliest maintenance fee due after the date on which status as a small entity is no longer appropriate. See § 1.27(g).

(g) Maintenance fees and surcharges relating thereto will not be refunded except in accordance with §§1.26 and 1.28(a).

37 CFR 1.366 establishes the guidelines and procedures for submission of maintenance fees, including any necessary surcharges. The patentee may pay maintenance fees and any necessary surcharges or any person or organization may pay maintenance fees and any necessary surcharges on behalf of the patentee without filing in the Office evidence of authorization by the patentee to pay maintenance fees. This will enable patentees to pay the maintenance fees and any necessary surcharges themselves or authorize some person or organization to pay maintenance fees and any necessary surcharges on their behalf. No verification of the authority to pay maintenance fees and any necessary surcharges in a particular patent will be made by the Office. While anyone may pay the maintenance fees and any necessary surcharges on a patent, if the payment is accepted by the Office, any Office notices relating to maintenance fees and any necessary surcharges will be mailed to the "fee address" set forth in 37 CFR 1.363. If the payment is not accepted by the Office, it will be returned to the person who submitted the payment if a return address is available. It is strongly recommended that the payor should include a return address along with his or her telephone number since the Office may contact the payor in some instances when it is unclear to which patent the fees are to be applied. See MPEP § 2530.

A maintenance fee and any necessary surcharge for a patent must be submitted in the amount due on the date the maintenance fee and any necessary surcharge are paid, and at the proper time, i.e., within the periods set forth in 37 CFR 1.362. If the amount of the maintenance fee is correct on the date it is paid and credited to the patent, a later change in the maintenance fees to reflect a new fee amount will not require a modification in the amount paid.

37 CFR 1.366(c) provides that a maintenance fee payment must include the patent number and the application number on which the maintenance fee is being paid. If the payment includes identification of only the patent number (i.e., does not identify the application number for the patent on which the maintenance fee is being paid), the Office may apply the payment to the patent identified by patent number in the payment or may return the payment. See MPEP § 2530. The application number required to be submitted is not that of a prior parent application, but rather the application number of the actual application that matured into the patent for which maintenance fees are to be paid. If the maintenance fee and any necessary surcharge is being paid on a reissue patent, the application number required is that of the reissue application.

If a patent expires because the maintenance fee and any necessary surcharge have not been paid in the manner required by 37 CFR 1.366, the patentee could proceed under 37 CFR 1.378 (see MPEP § 2590), if appropriate, or could file a petition under 37 CFR 1.377 (see MPEP § 2580) within the period set therein seeking to have the maintenance fee accepted as timely even though not all of the required identifying data was present prior to expiration of the grace period.

Under 37 CFR 1.366(d), the following information should also be submitted for each patent on which a maintenance fee or surcharge is paid (37 CFR 1.366(d)):

(A) the fee year (i.e., 3 1/2, 7 1/2, or 11 1/2 year fee);

(B) the amount of the maintenance fee and any surcharge being submitted;

(C) any assigned customer number; and

(D) whether small entity status is being changed or claimed with the payment.

Where the payment is a maintenance fee and any necessary surcharge on a reissue patent, in addition to the information requested for all payments, it is requested that the original patent number be furnished. Although the submission of the information requested under 37 CFR 1.366(d) is not mandatory, it would expedite the processing of maintenance fee payments.

The Maintenance Fee Transmittal Form, PTO/SB/45 should be used when submitting maintenance fees >by mail or by facsimile transmission<. This form is available, upon request, from the Maintenance Fee Branch. It is also available from the USPTO website (>http://www.uspto.gov/web/forms/index.html#patent<).

The Office processes fees in the order in which they are presented. If the payment submitted is insufficient to cover the maintenance fees and surcharges for all patents listed, and there is no general authorization to charge a deposit account, the payment will be applied in the order the patents are listed, beginning at the top of the listing.

2520 Maintenance Fee Amounts [R-5]

37 CFR 1.20(e)-(h) sets the fee amounts for the maintenance fees and the grace period surcharge. The maintenance fee amounts are subject to adjustment to reflect fluctuations occurring in the Consumer Price Index pursuant to 35 U.S.C. 41(f). The maintenance fee amounts (37 CFR 1.20(e)-(h)) are subject to a 50% reduction for small entities pursuant to 35 U.S.C. 41(h). The Maintenance Fee Branch and the USPTO website (www.uspto.gov) may be contacted for the current maintenance fee amounts.

The term of a patent might be shortened, e.g., by a terminal disclaimer. If a patent will expire part way between the due dates set in 35 U.S.C. 41(b), or between the latest due date and the term set in 35 U.S.C. 154, it is still required that the entire maintenance fee amount for the due date be paid. The maintenance fee amount is set by statute (subject to periodic adjustment), and cannot be prorated to cover only the amount of time past the due date before the patent expires.

37 CFR 1.366(g) provides that maintenance fees and surcharges relating thereto will not be refunded except in accordance with 37 CFR 1.26 and 1.28(a). A patentee cannot obtain a refund of a maintenance fee

*>that< was due and payable on the patent. Any duplicate payment will be refunded to the fee *>submitter<.

2522 Methods of Payment [R-5]

The method of payment for the maintenance fee and any necessary surcharge is set forth in 37 CFR 1.23. The payment shall be made in U.S. dollars and in the form of a cashier's or certified check, Treasury note, national bank notes, or United States Postal Service money order as provided in 37 CFR 1.23(a). If the maintenance fee and any necessary surcharge is sent in any other form, the Office may delay or cancel the credit until collection is made. For example, a personal or other uncertified check drawn on a U.S. bank that is not immediately negotiable, e.g., because it lacks a signature or due to insufficient funds, will not constitute payment of a maintenance fee and/or surcharge.

The maintenance fee can be charged to a credit card as set forth in 37 CFR 1.23(b), but credit for the payment is subject to actual receipt of the fee by the Office. Credit Card Payment Form (PTO-2038) should be used for payment of fees by credit card unless the payment is submitted over the Internet. If credit card information is provided on a form or document other than the form provided by the Office for the payment of fees by credit card, the Office will not be liable if the credit card number becomes public knowledge. See MPEP § 509.

Any remittance from a foreign country must be payable and immediately negotiable in the United States for the full amount of the maintenance fee and/or surcharge required.

37 CFR 1.366(b) provides that maintenance fees and any necessary surcharge may be paid by authorization to charge a deposit account established pursuant to 37 CFR 1.25. The authorization to charge the deposit account must be submitted within an appropriate window or grace period and must be limited to maintenance fees and surcharges payable on the date of submission. The authorization to charge the deposit account cannot be submitted prior to the third, seventh, or eleventh year after grant of the patent. If an authorization to charge a deposit account were submitted to pay the maintenance >fee< due at 3 years and 6 months after grant, a new authorization to charge a deposit account or other form of payment will have to be submitted at the appropriate time for each of the maintenance fees due at 7 years and 6 months and 11 years and 6 months. Any payment or authorization filed at any time other than that set forth in 37 CFR 1.362(d), (e), or (f) will not serve as a payment of the maintenance fee, except insofar as a delayed payment of the maintenance fee is accepted by the Commissioner pursuant to 37 CFR 1.378. See MPEP § 2590. A payment of less than the required amount, a payment in a manner other than that set forth in 37 CFR 1.23, or the filing of an authorization to charge a deposit account having insufficient funds, will not constitute payment of a maintenance fee on a patent. The authorization is required to permit the immediate charging of the maintenance fee to the deposit account. An authorization would be improper if it only authorized the maintenance fee to be charged at a later date, e.g., on the last possible day of payment without surcharge. Such an authorization would not serve as payment of the maintenance fee. Any payment which fails to result in the entire proper amount of the maintenance fee being present on the due date will not constitute payment of the maintenance fee.

Maintenance fee payments and any surcharges relating thereto must be submitted separately from any other payments for fees or charges, whether submitted in the manner set forth in 37 CFR 1.23 or by authorization to charge a deposit account. See 37 CFR 1.366(e). Maintenance fee payments and surcharge payments relating thereto that are commingled with payments for other fees or charges, e.g., application filing fees, issue fees, document supply fees, etc., will not be accepted. Maintenance fees require processing by a separate area of the Office and are not processed in the same manner as other fees and charges. Maintenance fees for a number of patents can be submitted together in one submission and one payment. 37 CFR 1.366(e) specifies that if maintenance fee payments for more than one patent are submitted together, they should be submitted on as few sheets as possible, listing the patent numbers in increasing patent number order. If the payment submitted is insufficient to cover the maintenance fees and any surcharges for all the listed patents, the payment will be applied in the order the patents are listed. In such a circumstance the maintenance fee and any surcharge for one or more of the last listed patents will not be paid.

Money orders and checks must be made payable to the Director of the United States Patent and Trademark Office. (Checks made payable to the Commissioner of Patents and Trademarks will continue to be accepted. See 37 CFR 1.23 (a)). Remittances from foreign countries must be payable and immediately negotiable in the United States for the full amount required.

It is not suggested that cash be sent by mail. However, if cash is sent it will be at the risk of the sender and should be sent via registered mail.

2530 Special Acceptance of Maintenance Fee Payments Containing Informalities [R-5]

It is strongly recommended that a maintenance fee submission >by mail or facsimile< include both a telephone number and a mailing address for the fee submitter because, provided the fee is sufficient, the Office **>may< attempt to contact the submitter by telephone and/or by mail to confirm the patent to which the fee is to be applied. >If the Office specially accepts a payment under any one of scenarios I – III below, a Notice of Special Acceptance of Patent Maintenance Fee (PTO-2143) will be mailed to the submitter that identifies the patent number and application number to which the maintenance fee was applied and requests the submitter to verify that the payment was applied as intended. If the payment was not applied to the intended patent, a petition (such as a petition under 37 CFR 1.377) must be filed. If the petition is not filed within 2 months of the date of the notice (PTO-2143), the petition may be dismissed as untimely, and relief may have to be pursued under 37 CFR 1.378(c).

I. PATENT NUMBER SUPPLIED BUT NO APPLICATION NUMBER SUPPLIED<

If a maintenance fee payment identifies only the patent number (i.e., does not identify the application number for the patent on which the maintenance fee is being paid), the Office may apply the payment to the patent identified by the patent number in the payment or may return the payment. See 37 CFR 1.366 (c). **

II. PATENT NUMBER AND APPLICATION NUMBER SUPPLIED BUT THEY DO NOT CORRESPOND

When a patent number and an application number are both supplied, but they do not correspond to the same patent, the Office will **> generally apply the payment to the patent identified by the patent number, if possible. Even if the payment is sufficient and timely to pay the maintenance fee due in the patent identified by the patent number, the Office may return the payment if additional information on the payment submission is inconsistent with the patent identified by the patent number. The Office may even apply the payment to the patent identified by the application number if the additional information corroborates that patent. Such may be the case, for example, where the fee submitter is the addressee named in the correspondence address or fee address of the patent identified by the application number.<

III. NO PATENT NUMBER SUPPLIED BUT APPLICATION NUMBER SUPPLIED

If a maintenance fee is due on the patent identified by the application number and the payment submitted is sufficient, the Office **>may apply the payment to the patent (provided additional corroborating information is present) or may return the payment.<

>

2531 Payment Late or Insufficient [R-2]

Examples of when a payment of maintenance fees and any necessary surcharges will be considered to be late or insufficient include instances when:

(A) Though a payment was received, additional funds are required due to surcharge or fee increase;

(B) Though a payment was received in an amount for small entity, the patented file records do not indicate that an assertion of small entity status was received; or

(C) The payment was received after the patent expired.

If the Office considers a payment to be late or insufficient, a notice (e.g., a Notice of Non-Acceptance of Patent Maintenance Fee (PTO-2142)) will be sent to the "fee submitter." Reply to the notice is required prior to expiration of the grace period pro-

vided by 37 CFR 1.362(e) in order to avoid the expiration of the patent. If a reply is not received prior to expiration of the patent, then an appropriate petition under 37 CFR 1.377 or 37 CFR 1.378 is required. See MPEP § 2580 and § 2590.

If a payment is deemed insufficient because the payment was submitted in the small entity amount but no written assertion of entitlement to small entity status has been filed, a Notice of Non-Acceptance of Small Entity Patent Maintenance Fee (PTO-2140) will be mailed to the fee submitter. See MPEP § 2550 for information on establishing or changing an entity status for the purpose of paying a maintenance fee.<

>

2532 Duplicate Payments [R-2]

In the event a maintenance fee is submitted (hereafter, duplicate payment) in the required amount (including any necessary surcharge) within the payment window for the patent identified for payment, but the same maintenance fee for that patent was already paid by a previous fee submitter (hereafter, first fee submitter), the Office intends to treat the duplicate from the second fee submitter as follows:

(A) If the duplicate payment does not comply with 37 CFR 1.366(c) by not containing both the patent number and the corroborating application number, the Office will return the duplicate payment to the second fee submitter with an indication that the maintenance fee for the patent was already paid.

(B) If the duplicate payment does comply with 37 CFR 1.366(c) by containing both the patent number and the corroborating application number, the Office will verify that the first payment was properly processed.

(1) If the first payment was properly processed, the Office will return the duplicate payment to the second fee submitter. In this event the returned payment will be accompanied by identification of the first fee submitter.

(2) If a review of the Office record of the first maintenance fee payment reveals that the first payment was not properly processed (e.g., did not comply with 37 CFR 1.366(c) or was not specially accepted in accordance with MPEP § 2530), the Office will attempt to determine whether the first payment should have been applied to a patent other than the patent identified under 37 CFR 1.366(c) by the second fee submitter. Based on this determination the Office will: (a) attempt to apply the duplicate payment (and retract the first payment); or (b) return the duplicate payment to the second fee submitter with identification of the first fee submitter.<

2540 Fee Address for Maintenance Fee Purposes [R-7]

37 CFR 1.363. Fee address for maintenance fee purposes.

(a) All notices, receipts, refunds, and other communications relating to payment or refund of maintenance fees will be directed to the correspondence address used during prosecution of the application as indicated in § 1.33(a) unless:

(1) A "fee address" for purposes of payment of maintenance fees is set forth when submitting the issue fee, or

(2) A change in the correspondence address for all purposes is filed after payment of the issue fee, or

(3) A "fee address" or a change in the "fee address" is filed for purposes of receiving notices, receipts and other correspondence relating to the payment of maintenance fees after the payment of the issue fee, in which instance, the latest such address will be used.

(b) An assignment of a patent application or patent does not result in a change of the "correspondence address" or "fee address" for maintenance fee purposes.

(c) A fee address must be an address associated with a Customer Number.

Generally, notices, receipts, and other communications relating to the payment of a maintenance fee will be directed to the correspondence address used during the prosecution of the application, unless a "fee address" for the purpose of payment of the maintenance fee has been designated or a change in the correspondence address has been made (see MPEP § 2542). 37 CFR 1.33(d) allows a correspondence address or change thereto to be filed during the enforceable life of the patent. Patentees should ensure that the Office is properly notified of the proper "fee address" to which all maintenance fee communications are to be directed.

Under the statutes and rules, the Office has no duty to notify patentee of the requirement to pay maintenance fees or to notify patentee when the maintenance fee is due. It is solely the responsibility of the patentee to ensure that the maintenance fee is paid timely to prevent expiration of the patent. The failure to receive the reminder notice will not shift the burden of monitoring the time for paying a maintenance fee from the patentee to the Office. The Office will attempt to assist patentees through the mailing of a

Maintenance Fee Reminder in the grace period. However, the failure to receive a Maintenance Fee Reminder will not relieve the patentee of the obligation to timely pay the appropriate maintenance fee to prevent expiration of the patent, nor will it constitute unavoidable delay if the patentee seeks to reinstate the patent under 37 CFR 1.378(b). See *In re Patent No. 4,409,763,* 7 USPQ2d 1798 (Comm'r Pat. 1988), *aff'd sub nom. Rydeen v. Quigg*, 748 F. Supp. 900, 16 USPQ2d 1876 (D.D.C. 1990), *aff'd*, 937 F.2d 623 (Fed. Cir. 1991) (table), *cert. denied*, 502 U.S. 1075 (1992). Maintenance fee correspondence will not be directed to more than one address.

37 CFR 1.363(c) states that "[a] fee address must be an address associated with a Customer Number." Only an address represented by a customer number can be established as the fee address for maintenance fee purposes. The use of the following form(s) is suggested when requesting establishment of a fee address: a current version of the "Fee Address" Indication Form (PTO/SB/47), and if necessary, a Request for Customer Number (PTO/SB/125). If a customer number was previously acquired from the Office for the address being designated as the fee address, that customer number should be entered on the "Fee Address" Indication Form (PTO/SB/47) to make the fee address designation. If no customer number was previously acquired from the Office< for the address being designated as the fee address, then the "Fee Address" Indication Form (PTO/SB/47) should be accompanied by a completed Request for Customer Number (form PTO/SB/125). See MPEP § 403 concerning customer number practice.

It is recommended that only a current version of the "Fee Address" Indication Form (PTO/SB/47) **>available from the USPTO website (www.uspto.gov/web/forms/index.html#patent)< be used when designating a fee address.

At the time of issue fee payment, applicants may designate a fee address by submitting a "Fee Address" Indication Form (PTO/SB/47) as an attachment to the Issue Fee Transmittal (PTOL-85B). After issue fee payment, applicants may designate a fee address by submitting a "Fee Address" Indication Form (PTO/SB/47), and if necessary, a Request for Customer Number (PTO/SB/125), to the address specified on the "Fee Address" Indication Form (PTO/SB/47).

All fee addresses established at the Office will be represented by a customer number, even if the fee address designation lacks an explicit request that a customer number be used for this purpose (e.g., in the event that an outdated "Fee Address" Indication Form (PTO/SB/47), or equivalent form, is submitted without an accompanying Request for Customer Number (PTO/SB/125)).

The current version of the "Fee Address" Indication Form (PTO/SB/47) is available upon request from the Maintenance Fee Branch and from the USPTO website (www.uspto.gov). The Request for Customer Number (PTO/SB/125) is available upon request from the Electronic Business Center and from the USPTO website (www.uspto.gov). Requests for the establishment of a fee address should be submitted to the Maintenance Fee Branch prior to or at the time of payment of maintenance fees in order to ensure that receipt of payment is directed to the fee address.

Additional patent numbers may be assigned to a customer number at any time, upon written request.

2542 Change of Correspondence Address [R-7]

Unless a fee address has been designated, notices, receipts, and other communications relating to the patent will generally be directed to the correspondence address (37 CFR 1.33) used during the prosecution of the application. Practitioners of record when the patent issues who do not wish to receive correspondence relating to maintenance fees must change the correspondence address in the patented file or provide a fee address to which such correspondence should be sent. It is not required that a practitioner file a request for permission to withdraw pursuant to 37 CFR 1.36 solely for the purpose of changing the correspondence address in a patented file.

The correspondence address should be updated or changed as necessary to ensure that all communications are received in a timely manner. A change of correspondence address may be made as provided in 37 CFR 1.33(a). The correspondence address may be changed as provided in 37 CFR 1.33(a)(1) prior to the filing of an oath or declaration. After an oath or declaration has been executed and filed by at least one inventor, the correspondence address may be changed as provided in 37 CFR 1.33(a)(2).

Requests for a change of the correspondence address may be sent to the Office of **>Patent Application Processing< during the enforceable life of the patent. To ensure accuracy and to expedite requests for change to the correspondence address, it is suggested that the request include both the patent number and the application number. The Office form, Change of Correspondence Address, Application (PTO/SB/122) may be used to request a change of correspondence address in a patent application. The Office form, Change of Correspondence Address, Patent (PTO/SB/123) may be used to request a change of correspondence address for an issued patent.

2550 Small Entity Status [R-2]

In order to establish small entity status for the purpose of paying a maintenance fee, a written assertion of entitlement to small entity status must be filed prior to or with the maintenance fee paid as a small entity. A written assertion is only required to be filed once and will remain effective until changed.

37 CFR 1.366(f) serves as a reminder to patentees of the necessity to check for the loss of small entity status prior to paying each maintenance fee on a patent. This is also a requirement of 37 CFR 1.27(g). The notification of any change in status resulting in loss of entitlement to small entity status must be filed in a patent prior to paying, or at the time of paying, the earliest maintenance fee due after the date on which status as a small entity is no longer appropriate. If status as a small entity has been previously established by filing an assertion of small entity status and such status is checked and found to be proper, no notification is required. It is not necessary to file a new assertion establishing small entity status at this point if the status as a small entity has been established and is still proper even if rights have been transferred to a small entity after the assertion of small entity status. The requirement is to notify the Office of the loss of entitlement and to pay the maintenance fee in the proper amount for other than a small entity where appropriate. The refund provisions of 37 CFR 1.28(a) for later submitted small entity assertions do apply to maintenance fees.

>If a payment is submitted that conflicts with the Office record of the patentee's entity status, a notice relating to entity status will be sent to the fee submitter. A Notice of Overpayment of Patent Maintenance Fee (PTO-211) will be sent if the payment was submitted in the large entity amount, but Office records indicate that the patentee is a small entity. A Notice of Non-Acceptance of Small Entity Patent Maintenance Fee (PTO-2140) will be sent if the payment was submitted in the small entity amount, but Office records indicate that the patentee is a large entity.

Where a Notice of Overpayment of Patent Maintenance Fee (PTO-211) is sent, the time period for reply depends on whether the reply requires additional money for sufficient payment of the large entity maintenance fee. Where no additional money is required, the fee submitter will be given a non-extendable ONE MONTH period from the mailing date of the notice to file a written notification of change in status from small to large entity. Note that if no additional money was required for sufficient payment of the large entity maintenance fee on the date the payment was received, no additional money will be required with the timely reply even if the patent entered the grace period under 37 CFR 1.362 (e) after the mailing date of the notice. Where additional money is required, the reply (including the additional money and the written notification of change in status from small to large entity) must be filed within the earlier of: (A) a non-extendable ONE MONTH period from the mailing date of the notice; or (B) any time remaining under 37 CFR 1.362, including the grace period provided by 37 CFR 1.362(e). Note that if a previously unpaid surcharge has come due by the time the reply requiring additional money is filed, sufficient payment will require payment of the surcharge as well as any additional money required to complete the large entity maintenance fee amount. Absent a timely reply to the Notice of Overpayment of Patent Maintenance Fee (PTO-211), the Office will apply the small entity maintenance fee payment amount to the patent and refund the overpayment amount. Accordingly, if the patentee is actually entitled to small entity status, no reply to the Notice of Overpayment of Patent Maintenance Fee (PTO-211) is necessary. In the event money was refunded by the Office as an "overpayment amount," but the patentee is a large entity, provided the patent has not already expired, the fee submitter must file a resubmission of the refunded money together with the required written notification of change in status from small to large entity within the time remaining under 37 CFR 1.362, including the

grace period provided by 37 CFR 1.362(e). In this situation, if the original payment amount received by the Office is less than the current amount required for sufficient payment of the large entity maintenance fee, the resubmitted money previously refunded by the Office as an "overpayment amount" must be accompanied by additional money.

Where a Notice of Non-Acceptance of Small Entity Patent Maintenance Fee (PTO-2140) is sent, the reply must be filed within the earlier of: (A) a non-extendable ONE MONTH period from the mailing date of the notice; or (B) any time remaining under 37 CFR 1.362, including the grace period provided by 37 CFR 1.362(e). The requirements of the reply depend on whether the patentee is entitled to small entity status. If the patentee is entitled to small entity status, a written assertion of entitlement to small entity status is required together with any additional money required for sufficient payment of the small entity maintenance fee. If the patentee is a large entity patentee, the reply must include payment of the additional money required for sufficient payment of the large entity maintenance fee. Note that if a previously unpaid surcharge under 37 CFR 1.362(e) has come due by the time the reply is filed, sufficient payment will require payment of the surcharge as well as any additional money required to complete the required maintenance fee amount. Absent a timely reply to the Notice of Non-Acceptance of Small Entity Patent Maintenance Fee (PTO-2140), the Office will refund the amount received. If the amount received was refunded and the patentee is a small entity, provided the patent has not already expired, sufficient payment of the small entity maintenance fee and the required written assertion of entitlement to small entity status must be filed within the time remaining under 37 CFR 1.362, including the grace period provided by 37 CFR 1.362(e). If the amount received was refunded and the patentee is a large entity, provided the patent has not already expired, sufficient payment of the large entity maintenance fee must be filed within the time remaining under 37 CFR 1.362, including the grace period provided by 37 CFR 1.362(e).<

2560 Revocation of Power of Attorney and Withdrawal of Attorney [R-7]

The revocation or withdrawal of an attorney may be submitted at any time; however, it is recommended that it be done well prior to the date a maintenance fee is due.

When processing a revocation of a power of attorney, the Office of **>Patent Application Processing< forwards copies of the completed action to the requester and the attorney being removed. Also, a copy is placed in the original file .

When processing a withdrawal of an attorney, the Office of **>Patent Application Processing< forwards copies of the completed action to the attorney and the patent owner.

It should be noted that an assignment does not act as a revocation of power of attorney for authorization previously given. However, the assignee may revoke a previous power of attorney. See 37 CFR 3.71 and 3.73.

2570 Maintenance Fee Payment Status Requests [R-7]

The Maintenance Fee Branch will respond to requests for the maintenance fee payment status of patents. Maintenance fee status can be requested by telephone. Telephone status requests are limited to two patent numbers per telephone call. In addition, maintenance fee status information is available over the Internet at www.uspto.gov. At the top of the site, click on the "Site Index" link, click on "M," and then click on the "Maintenance **>Fee Branch<" link for additional information. See MPEP § 1730 for the telephone number.

2575 Notices [R-5]

Under the statutes and the regulations, the Office has no duty to notify patentees when their maintenance fees are due. It is the responsibility of the patentee to ensure that the maintenance fees are paid to prevent expiration of the patent. The Office will, however, provide some notices as reminders that maintenance fees are due, but the notices, errors in the notices or in their delivery, or the lack or tardiness of notices will in no way relieve a patentee from the responsibility to make timely payment of each maintenance fee to prevent the patent from expiring by operation of law. The notices provided by the Office are courtesies in nature and intended to aid patentees. The Office's provision of notices in no way shifts the burden of monitoring the time for paying

maintenance fees on patents from the patentee to the Office.
>

I. < PREPRINTED STANDARD NOTICES

The patent grant currently includes a reminder notice that maintenance fees may be due. The Notice of Allowance currently includes a reminder notice that maintenance fees may be due.
>

II. < *OFFICIAL GAZETTE* NOTICE

A notice will appear in each issue of the *Official Gazette* which will indicate which patents have been granted 3, 7, and 11 years earlier, that the window period has opened, and that maintenance fee payments will now be accepted for those patents.

Another *Official Gazette* notice published after expiration of the grace period will indicate any patent which has expired due to nonpayment of maintenance fees and any patents which have been reinstated. An annual compilation of such expirations and reinstatements will also be published.
>

III. < MAINTENANCE FEE REMINDERS

Since patentees are expected to maintain their own record and docketing systems and since it is expected that most patentees will pay their maintenance fees during the window period to avoid payment of a surcharge, the Office will not send any reminder notices to the patentee until after the grace period has begun. This will reduce and simplify the mailing of notices but still give patentees an opportunity to pay their maintenance fee with surcharge during the grace period before expiration of their patents. The Office will mail any Maintenance Fee Reminder to the fee address as set forth in 37 CFR 1.363. See MPEP § 2540.
>

IV. < RECEIPT NOTICES

The Office will issue a receipt for payment of maintenance fees >submitted by mail or facsimile< after entry of the maintenance fee payment. Such a receipt, >which is sent to the fee address (if no fee address, then the correspondence address),< will provide an opportunity for the patentee >or fee submitter< to check if the Office has properly credited the payment.
**
>

V. < EXPIRATION NOTICES

The Office will mail a Notice of Patent Expiration to the fee address as set forth in 37 CFR 1.363 when Office records indicate that a patent has expired for failure to pay a required maintenance fee.

2580 Review of Decision Refusing to Accept and Record Payment of a Maintenance Fee Filed Prior to Expiration of Patent [R-5]

37 CFR 1.377. Review of decision refusing to accept and record payment of a maintenance fee filed prior to expiration of patent.

(a) Any patentee who is dissatisfied with the refusal of the Patent and Trademark Office to accept and record a maintenance fee which was filed prior to the expiration of the patent may petition the Director to accept and record the maintenance fee.

(b) **>Any petition under this section must be filed within two months of the action complained of, or within such other time as may be set in the action complained of, and must be accompanied by the fee set forth in § 1.17(g). The petition may include a request that the petition fee be refunded if the refusal to accept and record the maintenance fee is determined to result from an error by the Patent and Trademark Office.<

(c) Any petition filed under this section must comply with the requirements of § 1.181(b) and must be signed by an attorney or agent registered to practice before the Patent and Trademark Office, or by the patentee, the assignee, or other party in interest.

37 CFR 1.377 provides a mechanism for review of a decision refusing to accept and record payment of a maintenance fee filed prior to the expiration of a patent. 37 CFR 1.377(a) permits a patentee who is dissatisfied with the refusal of the Office to accept and record a maintenance fee which was filed prior to the expiration of the patent to petition the Director to accept and record the maintenance fee. This petition may be used, for example, in situations where an error is present in the identifying data required by 37 CFR 1.366(c) with the maintenance fee payment, i.e., either the patent number or the application number is incorrect. See MPEP § 2515 and § 2530. A petition under 37 CFR 1.377 would not be appropriate where there is a complete failure to include at least one correct mandatory identifier as required by 37 CFR

1.366(c) for the patent since no evidence would be present as to the patent on which the maintenance fee was intended to be paid. If the maintenance fee payment with an incorrect mandatory identifier was made near the end of the grace period, the patent might expire since the Office would not credit the fee to the patent. A petition under 37 CFR 1.377 would not be appropriate where the patentee paid a maintenance fee on one patent when the patentee intended to pay the maintenance fee on a different patent but through error identified the wrong patent number and application number. Likewise, a petition under 37 CFR 1.377 would not be appropriate where the entire maintenance fee payment, including any necessary surcharge, was not filed prior to expiration of the patent.

Any petition filed under 37 CFR 1.377 must be filed within 2 months of the action complained of, or within such other time as may be set in the action complained of. The petition must be accompanied by the proper petition fee >(37 CFR 1.17(g))<. The petition may include a request that the petition fee be refunded if the refusal to accept and record the maintenance fee is determined to have resulted from an error by the Office.

Any petition filed under 37 CFR 1.377 must comply with the requirements of 37 CFR 1.181(b) and must be signed by an attorney or agent registered to practice before the Office, or by the patentee, the assignee, or other party in interest. A person or organization whose only responsibility insofar as the patent is concerned is the payment of a maintenance fee is not a party in interest for purposes 37 CFR 1.377. If the petition is signed by a person not registered to practice before the Office, the petition must indicate whether the person signing the petition is the patentee, assignee, or other party in interest. An assignee must comply with the requirements of 37 CFR 3.73(b) which is discussed in MPEP § 324.

Any petition under 37 CFR 1.377 should be marked on the front page of the communication to the attention of the Office of Petitions and addressed as follows:

Mail Stop Petition

Commissioner for Patents

P.O. Box 1450

Alexandria, Virginia 22313-1450

2590 Acceptance of Delayed Payment of Maintenance Fee in Expired Patent to Reinstate Patent [R-7]

37 CFR 1.378. Acceptance of delayed payment of maintenance fee in expired patent to reinstate patent.

(a) The Director may accept the payment of any maintenance fee due on a patent after expiration of the patent if, upon petition, the delay in payment of the maintenance fee is shown to the satisfaction of the Director to have been unavoidable (paragraph (b) of this section) or unintentional (paragraph (c) of this section) and if the surcharge required by § 1.20(i) is paid as a condition of accepting payment of the maintenance fee. If the Director accepts payment of the maintenance fee upon petition, the patent shall be considered as not having expired, but will be subject to the conditions set forth in 35 U.S.C. 41(c)(2).

(b) Any petition to accept an unavoidably delayed payment of a maintenance fee filed under paragraph (a) of this section must include:

(1) the required maintenance fee set forth in §1.20 (e)-(g);

(2) the surcharge set forth in § 1.20(i)(1); and

(3) a showing that the delay was unavoidable since reasonable care was taken to ensure that the maintenance fee would be paid timely and that the petition was filed promptly after the patentee was notified of, or otherwise became aware of, the expiration of the patent. The showing must enumerate the steps taken to ensure timely payment of the maintenance fee, the date and the manner in which patentee became aware of the expiration of the patent, and the steps taken to file the petition promptly.

(c) Any petition to accept an unintentionally delayed payment of a maintenance fee filed under paragraph (a) of this section must be filed within twenty-four months after the six-month grace period provided in § 1.362(e) and must include:

(1) the required maintenance fee set forth in § 1.20 (e)-(g);

(2) the surcharge set forth in § 1.20(i)(2); and

(3) a statement that the delay in payment of the maintenance fee was unintentional.

(d) Any petition under this section must be signed by an attorney or agent registered to practice before the Patent and Trademark Office, or by the patentee, the assignee, or other party in interest.

(e) Reconsideration of a decision refusing to accept a maintenance fee upon petition filed pursuant to paragraph (a) of this section may be obtained by filing a petition for reconsideration within two months of, or such other time as set in the decision refusing to accept the delayed payment of the maintenance fee. Any such petition for reconsideration must be accompanied by the petition fee set forth in § 1.17(f). After the decision on the petition for reconsideration, no further reconsideration or review of the matter will be undertaken by the Director. If the delayed payment of the maintenance fee is not accepted, the maintenance fee and the surcharge set forth in § 1.20(i) will be refunded following the decision on the petition for reconsideration, or after the expiration of the time for filing such a petition for reconsideration, if none is filed. Any petition fee under this section will not be refunded

unless the refusal to accept and record the maintenance fee is determined to result from an error by the Patent and Trademark Office.

37 CFR 1.378(a) provides that the Director of the Office may accept the payment of any maintenance fee due on a patent based on an expiration of the patent if, upon petition, the delay in payment of the maintenance fee is shown to the satisfaction of the Director of the Office to have been unavoidable or unintentional. The appropriate surcharge set forth in § 1.20(i) must be paid as a condition of accepting payment of the maintenance fee. The surcharges set at 37 CFR 1.20(i) are established pursuant to 35 U.S.C. 41(c) and, therefore, are not subject to small entity provisions of 35 U.S.C. 41(h). No separate petition fee is required for this petition. If the Director of the Office accepts payment of the maintenance fee upon petition, the patent shall be considered as not having expired but will be subject to the intervening rights and provisions of 35 U.S.C. 41(c)(2).

Any petition under 37 CFR 1.378(b) or (c) should be marked on the front page of the communication to the attention of the Office of Petitions and addressed as follows:

Mail Stop Petition
Commissioner for Patents
P.O. Box 1450
Alexandria, Virginia 22313-1450

Any petition under 37 CFR 1.378 must be signed by an attorney or agent registered to practice before the U.S. Patent and Trademark Office, or by the patentee, the assignee, or other party in interest. A person or organization whose only responsibility insofar as the patent is concerned is the payment of a maintenance fee is not a party in interest for purposes of 37 CFR 1.378. If the petition is signed by a person not registered to practice before the Office, the petition must indicate that the person signing the petition is the patentee, assignee, or other party in interest. An assignee must comply with the requirements of 37 CFR 3.73(b) which is discussed in MPEP § 324.

37 CFR 1.378(e) provides a mechanism for obtaining reconsideration of a decision refusing to accept a maintenance fee upon petition filed pursuant to paragraph (a). This mechanism is a petition for reconsideration which may be filed within 2 months of, or such other time as set in, the decision refusing to accept the delayed payment of the maintenance fee. In contrast to petitions filed under paragraph (a), the petition for reconsideration requires the petition fee set forth in 37 CFR 1.17(f). After a decision on the petition for reconsideration, no further reconsideration or review of the matter will be undertaken by the Director of the Office. The maintenance fee and the surcharge submitted will be refunded if the delayed payment of the maintenance fee is not accepted. The refund will be made following the decision on the petition for reconsideration, or after the expiration of the time for filing such a petition for reconsideration, if none is filed. The petition fee for filing a petition for reconsideration will not be refunded unless, on reconsideration, the refusal to accept and record the maintenance fee is determined to result from an error by the Office.

I. UNAVOIDABLE DELAY

37 CFR 1.378(b) provides that a patent may be reinstated at any time following expiration of the patent for failure to timely pay a maintenance fee. A petition to accept late payment of a maintenance fee, where the delay was unavoidable, must include:

(A) the required maintenance fee set forth in 37 CFR 1.20(e)-(g);

(B) the surcharge set forth in 37 CFR 1.20(i)(1); and

(C) a showing that the delay was unavoidable since reasonable care was taken to ensure that the maintenance fee would be paid timely and that the petition was filed promptly after the patentee was notified of, or otherwise became aware of, the expiration of the patent.

The required showing must enumerate the steps taken to ensure timely payment of the maintenance fee, the date and the manner in which patentee became aware of the expiration of the patent, and the steps taken to file the petition promptly. Furthermore, an adequate showing requires a statement by all persons with direct knowledge of the cause of the delay, setting forth the facts as they know them. Copies of all documentary evidence referred to in a statement should be furnished as exhibits to the statement.

As language in 35 U.S.C. 41(c)(1) is identical to that in 35 U.S.C. 133 (i.e., “unavoidable” delay), a late maintenance fee for the unavoidable delay standard is considered under the same standard for reviv-

ing an abandoned application under 35 U.S.C. 133. See *Ray v. Lehman*, 55 F.3d 606, 608-09, 34 USPQ2d 1786, 1787 (Fed. Cir. 1995) (quoting *In re Patent No. 4,409,763*, 7 USPQ2d 1798, 1800 (Comm'r Pat. 1988), *aff'd sub nom. Rydeen v. Quigg*, 748 F. Supp. 900, 16 USPQ2d 1876 (D.D.C. 1990), *aff'd*, 937 F.2d 623 (Fed. Cir. 1991) (table), *cert. denied*, 502 U.S. 1075 (1992)). See MPEP § 711.03(c) for a general discussion of the "unavoidable" delay standard.

As 35 U.S.C. 41(b) requires the payment of fees at specified intervals to maintain a patent in force, rather than some response to a specific action by the Office under 35 U.S.C. 133, a reasonably prudent person in the exercise of due care and diligence would have taken steps to ensure the timely payment of such maintenance fees. *Ray*, 55 F.3d at 609, 34 USPQ2d at 1788. That is, an adequate showing that the delay in payment of the maintenance fee at issue was "unavoidable" within the meaning of 35 U.S.C. 41(c) and 37 CFR 1.378(b)(3) requires a showing of the steps taken to ensure the timely payment of the maintenance fees for this patent. *Id.* Thus, where the record fails to disclose that the patentee took reasonable steps, or discloses that the patentee took no steps, to ensure timely payment of the maintenance fee, 35 U.S.C. 41(c) and 37 CFR 1.378(b)(3) preclude acceptance of the delayed payment of the maintenance fee under 37 CFR 1.378(b).

In view of the requirement to enumerate the steps taken to ensure timely payment of the maintenance fee, the patentee's lack of knowledge of the need to pay the maintenance fee and the failure to receive the Maintenance Fee Reminder do not constitute unavoidable delay. See *Patent No. 4,409,763*, *supra*. See also Final Rule entitled "Final Rules for Patent Maintenance Fees," published in the *Federal Register* at 49 *Fed. Reg.* 34716, 34722-23 (August 31, 1984), and republished in the *Official Gazette* at 1046 *Off. Gaz. Pat. Office* 28, 34 (September 25, 1984). Under the statutes and rules, the Office has no duty to notify patentees of the requirement to pay maintenance fees or to notify patentees when the maintenance fees are due. It is solely the responsibility of the patentee to assure that the maintenance fee is timely paid to prevent expiration of the patent. The lack of knowledge of the requirement to pay a maintenance fee and the failure to receive the Maintenance Fee Reminder will not shift the burden of monitoring the time for paying a maintenance fee from the patentee to the Office.

Thus, evidence that despite reasonable care on behalf of the patentee and/or the patentee's agents, and reasonable steps to ensure timely payment, the maintenance fee was unavoidably not paid, could be submitted in support of an argument that the delay in payment was unavoidable. For example, an error in a docketing system could possibly result in a finding that a delay in payment was unavoidable if it were shown that reasonable care was exercised in designing and operating the system and that the patentee took reasonable steps to ensure that the patent was entered into the system to ensure timely payment of the maintenance fees.

II. UNINTENTIONAL DELAY

Under 35 U.S.C. 41(c)(1), the Director of the Office may accept late payment of any maintenance fee filed within 24 months after the 6-month grace period, if the delay in payment is shown to the satisfaction of the Director of the Office to have been unintentional. See MPEP § 711.03(c) for a general discussion of the "unintentional" delay standard.

In addition to the timeliness deadline set forth in the preceding paragraph, a petition filed under the unintentional standard of 37 CFR 1.378(c) must include:

(A) the required maintenance fee set forth in 37 CFR 1.20 (e) through (g);

(B) the surcharge for an unintentionally expired patent as set forth in 37 CFR 1.20(i)(2); and

(C) a statement that the delay in payment of the maintenance fee was unintentional.

A person seeking reinstatement of an expired patent should not make a statement that the delay in payment of the maintenance fee was unintentional unless the entire delay was unintentional, including the period from discovery that the maintenance fee was not timely paid until payment of the maintenance fee. For example, a statement that the delay in payment of the maintenance fee was unintentional would not be proper when the patentee becomes aware of an unintentional failure to timely pay the maintenance fee and then intentionally delays filing a petition for reinstatement of the patent under 37 CFR 1.378.

>Petitions to accept unintentionally delayed payment of a maintenance fee in an expired patent can be

processed electronically, and immediately, by the applicant using the EFS-Web SB/66 form found on the USPTO forms webpage at http://www.uspto.gov/web/forms/index.html#patent. An immediate decision regarding the petitions will be rendered. The EFS-Web SB/66 form should not be used if applicant wishes the petition to be processed by the Office of Petitions.

If applicant does not want immediate processing, but would prefer to submit the petition to the Office of Petitions for processing in due course, applicant should use PTO/SB/66 form found on the USPTO forms webpage at http://www.uspto.gov/web/forms/index.html#patent.<

2591 Intervening Rights in Reinstated Patents

Intervening rights in reinstated patents are provided by 35 U.S.C. 41(c)(2) which is reproduced in MPEP § 2501. No patent, the term of which has been maintained as a result of the acceptance of a late payment of a maintenance fee, shall abridge or affect the right of any person or his or her successors in business who made, purchased, imported, or used after the 6-month grace period but prior to the acceptance of the late maintenance fee anything protected by the patent, to continue the use or importation of, or to sell to others to be used or sold, the specific things made, purchased, imported, or used. A court before which such matter is in question may provide for the continued manufacture, use, importation, or sale of the thing made, purchased, imported, or used as specified, or for the manufacture, use, importation, or sale of which substantial preparation was made after the 6-month grace period but before the acceptance of the late maintenance fee, and it may also provide for the continued practice of any process, practiced, or for the practice of which substantial preparation was made, after the 6-month grace period but prior to the acceptance of the late maintenance fee, to the extent and under such terms as the court deems equitable for the protection of investments made or business commenced after the 6-month grace period but before the acceptance of the late maintenance fee.

2595 Forms [R-7]

The following forms are suggested when submitting a maintenance fee or establishing a fee address for maintenance fee purposes. “Maintenance Fee Transmittal Form,” Form PTO/SB 45; and “‘Fee Address’ Indication Form,” Form PTO/SB/47.

Form PTO/SB/125 (“Request for Customer Number”) may be used to request a customer number. Form PTO/SB/66 (“Petition to Accept Unintentionally Delay Payment of Maintenance Fee in an Expired Patent (37 CFR 1.378(c))”) may be used to file a petition under 37 CFR 1.378(c).

MAINTENANCE FEE TRANSMITTAL FORM

(Do not submit this form electronically via EFS-Web)

Address to:
U.S. Patent and Trademark Office
P.O. Box 979070
St. Louis, MO 63197-9000

- OR -

Fax to: 571-273-6500

I hereby certify that this correspondence is being deposited with the United States Postal Service with sufficient postage as first class mail in an envelope addressed to "United States Patent and Trademark Office, P.O. Box 979070, St. Louis, MO 63197-9000" on _____.

Signature _____.

Typed or printed name _____.

Enclosed herewith is the payment of the maintenance fee(s) for the listed patent(s).

1. ☐ A check for the amount of $ _____ for the full payment of the maintenance fee(s) and any necessary surcharge is enclosed.
2. ☐ Payment by credit card. Form PTO-2038 is enclosed.
3. ☐ The Director is hereby authorized to charge $ _____ to cover the payment of the fee(s) indicated below to Deposit Account No. _____.
4. ☐ The Director is hereby authorized to charge any deficiency in the payment of the required fee(s) or credit any overpayment to Deposit Account No. _____.

* Information required by 37 CFR 1.366(c) (columns 1 & 2). Information requested under 37 CFR 1.366(d) (columns 3, 4, & 5)

Privacy Act Statement

The **Privacy Act of 1974 (P.L. 93-579)** requires that you be given certain information in connection with your submission of the attached form related to a patent application or patent. Accordingly, pursuant to the requirements of the Act, please be advised that: (1) the general authority for the collection of this information is 35 U.S.C. 2(b)(2); (2) furnishing of the information solicited is voluntary; and (3) the principal purpose for which the information is used by the U.S. Patent and Trademark Office is to process and/or examine your submission related to a patent application or patent. If you do not furnish the requested information, the U.S. Patent and Trademark Office may not be able to process and/or examine your submission, which may result in termination of proceedings or abandonment of the application or expiration of the patent.

The information provided by you in this form will be subject to the following routine uses:

1. The information on this form will be treated confidentially to the extent allowed under the Freedom of Information Act (5 U.S.C. 552) and the Privacy Act (5 U.S.C 552a). Records from this system of records may be disclosed to the Department of Justice to determine whether disclosure of these records is required by the Freedom of Information Act.
2. A record from this system of records may be disclosed, as a routine use, in the course of presenting evidence to a court, magistrate, or administrative tribunal, including disclosures to opposing counsel in the course of settlement negotiations.
3. A record in this system of records may be disclosed, as a routine use, to a Member of Congress submitting a request involving an individual, to whom the record pertains, when the individual has requested assistance from the Member with respect to the subject matter of the record.
4. A record in this system of records may be disclosed, as a routine use, to a contractor of the Agency having need for the information in order to perform a contract. Recipients of information shall be required to comply with the requirements of the Privacy Act of 1974, as amended, pursuant to 5 U.S.C. 552a(m).
5. A record related to an International Application filed under the Patent Cooperation Treaty in this system of records may be disclosed, as a routine use, to the International Bureau of the World Intellectual Property Organization, pursuant to the Patent Cooperation Treaty.
6. A record in this system of records may be disclosed, as a routine use, to another federal agency for purposes of National Security review (35 U.S.C. 181) and for review pursuant to the Atomic Energy Act (42 U.S.C. 218(c)).
7. A record from this system of records may be disclosed, as a routine use, to the Administrator, General Services, or his/her designee, during an inspection of records conducted by GSA as part of that agency's responsibility to recommend improvements in records management practices and programs, under authority of 44 U.S.C. 2904 and 2906. Such disclosure shall be made in accordance with the GSA regulations governing inspection of records for this purpose, and any other relevant (*i.e.*, GSA or Commerce) directive. Such disclosure shall not be used to make determinations about individuals.
8. A record from this system of records may be disclosed, as a routine use, to the public after either publication of the application pursuant to 35 U.S.C. 122(b) or issuance of a patent pursuant to 35 U.S.C. 151. Further, a record may be disclosed, subject to the limitations of 37 CFR 1.14, as a routine use, to the public if the record was filed in an application which became abandoned or in which the proceedings were terminated and which application is referenced by either a published application, an application open to public inspection or an issued patent.
9. A record from this system of records may be disclosed, as a routine use, to a Federal, State, or local law enforcement agency, if the USPTO becomes aware of a violation or potential violation of law or regulation.

Time will vary depending upon the individual case. Any comments on the amount of time you require to complete this form and/or suggestions for reducing this burden, should be sent to the Chief Information Officer, U.S. Patent and Trademark Office, U.S. Department of Commerce, P.O. Box 1450, Alexandria, VA 22313-1450. DO NOT SEND FEES OR COMPLETED FORMS TO THIS ADDRESS. **SEND TO: Mail Stop CN, Commissioner for Patents, P.O. Box 1450, Alexandria, VA 22313-1450.**

If you need assistance in completing the form, call 1-800-PTO-9199 (1-800-786-9199) and select option 2.

Privacy Act Statement

The **Privacy Act of 1974 (P.L. 93-579)** requires that you be given certain information in connection with your submission of the attached form related to a patent application or patent. Accordingly, pursuant to the requirements of the Act, please be advised that: (1) the general authority for the collection of this information is 35 U.S.C. 2(b)(2); (2) furnishing of the information solicited is voluntary; and (3) the principal purpose for which the information is used by the U.S. Patent and Trademark Office is to process and/or examine your submission related to a patent application or patent. If you do not furnish the requested information, the U.S. Patent and Trademark Office may not be able to process and/or examine your submission, which may result in termination of proceedings or abandonment of the application or expiration of the patent.

The information provided by you in this form will be subject to the following routine uses:

1. The information on this form will be treated confidentially to the extent allowed under the Freedom of Information Act (5 U.S.C. 552) and the Privacy Act (5 U.S.C 552a). Records from this system of records may be disclosed to the Department of Justice to determine whether disclosure of these records is required by the Freedom of Information Act.
2. A record from this system of records may be disclosed, as a routine use, in the course of presenting evidence to a court, magistrate, or administrative tribunal, including disclosures to opposing counsel in the course of settlement negotiations.
3. A record in this system of records may be disclosed, as a routine use, to a Member of Congress submitting a request involving an individual, to whom the record pertains, when the individual has requested assistance from the Member with respect to the subject matter of the record.
4. A record in this system of records may be disclosed, as a routine use, to a contractor of the Agency having need for the information in order to perform a contract. Recipients of information shall be required to comply with the requirements of the Privacy Act of 1974, as amended, pursuant to 5 U.S.C. 552a(m).
5. A record related to an International Application filed under the Patent Cooperation Treaty in this system of records may be disclosed, as a routine use, to the International Bureau of the World Intellectual Property Organization, pursuant to the Patent Cooperation Treaty.
6. A record in this system of records may be disclosed, as a routine use, to another federal agency for purposes of National Security review (35 U.S.C. 181) and for review pursuant to the Atomic Energy Act (42 U.S.C. 218(c)).
7. A record from this system of records may be disclosed, as a routine use, to the Administrator, General Services, or his/her designee, during an inspection of records conducted by GSA as part of that agency's responsibility to recommend improvements in records management practices and programs, under authority of 44 U.S.C. 2904 and 2906. Such disclosure shall be made in accordance with the GSA regulations governing inspection of records for this purpose, and any other relevant (*i.e.*, GSA or Commerce) directive. Such disclosure shall not be used to make determinations about individuals.
8. A record from this system of records may be disclosed, as a routine use, to the public after either publication of the application pursuant to 35 U.S.C. 122(b) or issuance of a patent pursuant to 35 U.S.C. 151. Further, a record may be disclosed, subject to the limitations of 37 CFR 1.14, as a routine use, to the public if the record was filed in an application which became abandoned or in which the proceedings were terminated and which application is referenced by either a published application, an application open to public inspection or an issued patent.
9. A record from this system of records may be disclosed, as a routine use, to a Federal, State, or local law enforcement agency, if the USPTO becomes aware of a violation or potential violation of law or regulation.

PETITION TO ACCEPT UNINTENTIONALLY DELAYED PAYMENT OF MAINTENANCE FEE IN AN EXPIRED PATENT (37 CFR 1.378(c))

Docket Number (Optional)

Mail to: Mail Stop Petition
Commissioner for Patents
P.O. Box 1450
Alexandria, VA 22313-1450
Fax: (571) 273-8300

NOTE: If information or assistance is needed in completing this form, please contact Petitions Information at (571) 272-3282.

Patent No. _____ Application Number _____

Issue Date _____ Filing Date _____

CAUTION: Maintenance fee (and surcharge, if any) payment must correctly identify: (1) the patent number (or reissue patent number, if a reissue) and (2) the application number of the actual U.S. application (or reissue application) leading to issuance of that patent to ensure the fee(s) is/are associated with the correct patent. 37 CFR 1.366(c) and (d).

Also complete the following information, if applicable

The above - identified patent:

☐ is a reissue of original Patent No. _____, original issue date _____ ;
original application number _____ ,
original filing date _____.

☐ resulted from the entry into the U.S. under 35 U.S.C. 371 of international application _____ filed on _____ .

CERTIFICATE OF MAILING (37 CFR 1.8(a))

I hereby certify that this paper (along with any paper referred to as being attached or enclosed) is being deposited with the United States Postal Service on the date shown below with sufficient postage as first class mail in an envelope addressed to Mail Stop Petition, Commissioner for Patents, P.O. Box 1450, Alexandria, VA 22313-1450, or facsimile transmitted to the U.S. Patent and Trademark Office on the date shown below.

☐ Send refund check.

WARNING:

Petitioner/applicant is cautioned to avoid submitting personal information in documents filed in a patent application that may contribute to identity theft. Personal information such as social security numbers, bank account numbers, or credit card numbers (other than a check or credit card authorization form PTO-2038 submitted for payment purposes) is never required by the USPTO to support a petition or an application. If this type of personal information is included in documents submitted to the USPTO, petitioners/applicants should consider redacting such personal information from the documents before submitting them to the USPTO. Petitioner/applicant is advised that the record of a patent application is available to the public after publication of the application (unless a non-publication request in compliance with 37 CFR 1.213(a) is made in the application) or issuance of a patent. Furthermore, the record from an abandoned application may also be available to the public if the application is referenced in a published application or an issued patent (see 37 CFR 1.14). Checks and credit card authorization forms PTO-2038 submitted for payment purposes are not retained in the application file and therefore are not publicly available.

8. STATEMENT

The delay in payment of the maintenance fee to this patent was unintentional.

9. PETITIONER(S) REQUEST THAT THE DELAYED PAYMENT OF THE MAINTENANCE FEE BE ACCEPTED AND THE PATENT REINSTATED.

Privacy Act Statement

The **Privacy Act of 1974 (P.L. 93-579)** requires that you be given certain information in connection with your submission of the attached form related to a patent application or patent. Accordingly, pursuant to the requirements of the Act, please be advised that: (1) the general authority for the collection of this information is 35 U.S.C. 2(b)(2); (2) furnishing of the information solicited is voluntary; and (3) the principal purpose for which the information is used by the U.S. Patent and Trademark Office is to process and/or examine your submission related to a patent application or patent. If you do not furnish the requested information, the U.S. Patent and Trademark Office may not be able to process and/or examine your submission, which may result in termination of proceedings or abandonment of the application or expiration of the patent.

The information provided by you in this form will be subject to the following routine uses:

1. The information on this form will be treated confidentially to the extent allowed under the Freedom of Information Act (5 U.S.C. 552) and the Privacy Act (5 U.S.C 552a). Records from this system of records may be disclosed to the Department of Justice to determine whether disclosure of these records is required by the Freedom of Information Act.
2. A record from this system of records may be disclosed, as a routine use, in the course of presenting evidence to a court, magistrate, or administrative tribunal, including disclosures to opposing counsel in the course of settlement negotiations.
3. A record in this system of records may be disclosed, as a routine use, to a Member of Congress submitting a request involving an individual, to whom the record pertains, when the individual has requested assistance from the Member with respect to the subject matter of the record.
4. A record in this system of records may be disclosed, as a routine use, to a contractor of the Agency having need for the information in order to perform a contract. Recipients of information shall be required to comply with the requirements of the Privacy Act of 1974, as amended, pursuant to 5 U.S.C. 552a(m).
5. A record related to an International Application filed under the Patent Cooperation Treaty in this system of records may be disclosed, as a routine use, to the International Bureau of the World Intellectual Property Organization, pursuant to the Patent Cooperation Treaty.
6. A record in this system of records may be disclosed, as a routine use, to another federal agency for purposes of National Security review (35 U.S.C. 181) and for review pursuant to the Atomic Energy Act (42 U.S.C. 218(c)).
7. A record from this system of records may be disclosed, as a routine use, to the Administrator, General Services, or his/her designee, during an inspection of records conducted by GSA as part of that agency's responsibility to recommend improvements in records management practices and programs, under authority of 44 U.S.C. 2904 and 2906. Such disclosure shall be made in accordance with the GSA regulations governing inspection of records for this purpose, and any other relevant (*i.e.*, GSA or Commerce) directive. Such disclosure shall not be used to make determinations about individuals.
8. A record from this system of records may be disclosed, as a routine use, to the public after either publication of the application pursuant to 35 U.S.C. 122(b) or issuance of a patent pursuant to 35 U.S.C. 151. Further, a record may be disclosed, subject to the limitations of 37 CFR 1.14, as a routine use, to the public if the record was filed in an application which became abandoned or in which the proceedings were terminated and which application is referenced by either a published application, an application open to public inspection or an issued patent.
9. A record from this system of records may be disclosed, as a routine use, to a Federal, State, or local law enforcement agency, if the USPTO becomes aware of a violation or potential violation of law or regulation.

Chapter 2600 Optional Inter Partes Reexamination

2601 Introduction [Added R-2]

The reexamination statute was amended on November 29, 1999 by Public Law 106-113. Public Law 106-113 expanded reexamination by providing an "*inter partes*" option; it authorized the extension of reexamination proceedings via an optional *inter partes* reexamination procedure in addition to the existing *ex parte* reexamination procedure. See Title IV, subtitle F (§§ 4601 through 4608) of the "Intellectual Property and Communications Omnibus Reform Act of 1999," S. 1948 (106th Cong. 1st Sess. (1999)). Section 1000(a)(9), Division B, of Public Law 106-113 incorporated and enacted into law the "Intellectual Property and Communications Omnibus Reform Act of 1999" (S. 1948). As a result, new sections 311-318 of title 35 United States Code directed to the optional *inter partes* reexamination proceeding were added by Public Law 106-113.

The reexamination statute was again amended on November 2, 2002, by Public Law 107-273, 116 Stat. 1758, 1899-1906 (2002). Public Law 107-273 expanded the scope of what qualifies for a substantial new question of patentability upon which a reexamination may be based (see MPEP § 2642, POLICY IN SPECIFIC SITUATIONS, part A), expanded the third party requester's appeal rights to include appeal to the Court of Appeals for the Federal Circuit (see MPEP § 2679), and made technical corrections to the statute. See the 21st Century Department of Justice Appropriations Authorization Act, TITLE III - INTELLECTUAL PROPERTY, Subtitle A - Patent and Trademark Office, Section 13105, of the "Patent and Trademark Office Authorization Act of 2002" - Enacted as part of Public Law 107-273 on November 2, 2002.

The optional *inter partes* alternative provides third party requesters with a greater opportunity to participate in reexamination proceedings, while maintaining most of the features which make reexamination a desirable alternative to litigation in the Federal Courts (e.g., low cost relative to Court proceedings, expedited procedure).

The optional *inter partes* alternative also provides third party requesters with appeal rights to appeal to the Board of Patent Appeals and Interferences (Board) and to participate in the patent owner's appeal to the Board.

For any *inter partes* reexamination proceeding commenced on or after November 2, 2002, the third party requester also has the appeal rights to appeal to the Court of Appeals for the Federal Circuit and to

participate in the patent owner's appeal to the Federal Circuit. For an *inter partes* reexamination proceeding commenced prior to November 2, 2002, however, no appeal rights are provided for the third party requester to appeal to the Court of Appeals for the Federal Circuit, nor to participate in the patent owner's appeal to the Court. See MPEP § 2683.

Exercising the *inter partes* option is conditioned (by Public Law 106-113) on the third party requester accepting a statutory estoppel against subsequent review, either by the Office or by a Federal Court, of the issues that were or could have been raised in the reexamination proceeding. These limits, which will be discussed in this Chapter are aimed at preventing *inter partes* reexamination proceedings from being used to harass patent owners.

The final rules to implement the statutory *inter partes* reexamination option was published in the Federal Register on December 7, 2000 (65 Fed. Reg. 76756) and in the *Official Gazette* on January 2, 2001 (1243 O.G. 12). The final rule notice stated that the changes to the rules of practice to implement the optional *inter partes* reexamination provisions of the American Inventors Protection Act of 1999 would become effective on February 5, 2001. The notice includes not only the text of the final rules, but also a discussion of the rules and analysis of the comments received, which serve as guidance in the implementation of the rules.

Both the statutory *inter partes* reexamination option, 35 U.S.C., Chapter 31, and the new *inter partes* reexamination rules, 37 CFR, Sub-part H, apply to all reexamination proceedings for patents issuing from applications filed on or after November 29, 1999. For a patent issued from an application filed prior to November 29, 1999, the statutory *inter partes* reexamination option is not available, only the *ex parte* reexamination is available (see 37 CFR, Subpart D, 37 CFR 1.510 *et seq*.).

See MPEP Chapter 2200 (section 2209 *et seq*.) for guidance on the procedures for *ex parte* reexamination proceedings.

2601.01 Flowcharts [R-5]

The flowcharts show the general flow for the various stages of *inter partes* reexamination proceedings. The first flowchart shows the procedures before appeal. The second flowchart shows the appeal procedure with a single 3rd party requester. The third flowchart shows the procedures following a Board decision for reexamination proceedings commenced prior to November 2, 2002. The fourth flowchart shows the procedures following a Board decision for reexamination proceedings commenced on or after November 2, 2002.

2602 Citation of Prior Art [R-7]

35 U.S.C. 301. Citation of prior art.

Any person at any time may cite to the Office in writing prior art consisting of patents or printed publications which that person believes to have a bearing on the patentability of any claim of a particular patent. If the person explains in writing the pertinency and manner of applying such prior art to at least one claim of the patent, the citation of such prior art and the explanation thereof will become a part of the official file of the patent. At the written request of the person citing the prior art, his or her identity will be excluded from the patent file and kept confidential.

37 CFR 1.501. Citation of prior art in patent files.

(a) At any time during the period of enforceability of a patent, any person may cite, to the Office in writing, prior art consisting of patents or printed publications which that person states to be pertinent and applicable to the patent and believes to have a bearing on the patentability of any claim of the patent. If the citation is made by the patent owner, the explanation of pertinency and applicability may include an explanation of how the claims differ from the prior art. Such citations shall be entered in the patent file except as set forth in §§ 1.502 and 1.902.

(b) If the person making the citation wishes his or her identity to be excluded from the patent file and kept confidential, the citation papers must be submitted without any identification of the person making the submission.

(c) Citation of patents or printed publications by the public in patent files should either: (1) Reflect that a copy of the same has been mailed to the patent owner at the address as provided for in § 1.33(c); or in the event service is not possible (2) Be filed with the Office in duplicate.

37 CFR 1.902. Processing of prior art citations during an inter partes reexamination proceeding.

**>Citations by the patent owner in accordance with § 1.933 and by an *inter partes* reexamination third party requester under § 1.915 or § 1.948 will be entered in the *inter partes* reexamination file. The entry in the patent file of other citations submitted after the date of an order for reexamination pursuant to § 1.931 by persons other than the patent owner, or the third party requester under either § 1.913 or § 1.948, will be delayed until the *inter partes* reexamination proceeding has been concluded by the issuance and publication of a reexamination certificate. See § 1.502 for processing of prior art citations in patent and reexamination files during an *ex parte* reexamination proceeding filed under § 1.510.<

Public Law 106-113 did not affect the manner of the public's citation of prior art under 37 CFR 1.501 in a patent. Likewise, it did not affect the Office's handling of a 37 CFR 1.501 prior art citation in a patent where no reexamination proceeding is pending for that patent when the citation is filed.

Where an *inter partes* reexamination proceeding is pending when a prior art citation is filed, the following applies:

If the prior art citation satisfies 37 CFR 1.501 and is submitted prior to an order to reexamine, the cited documents (citations) will be considered in an *inter partes* reexamination proceeding as a prior art citation would be considered in an *ex parte* reexamination proceeding. See MPEP § 2206.

If the prior art citation satisfies 37 CFR 1.501 and is submitted **after an order to reexamine**, the citation will be treated as follows:

(A) A patent owner citation will normally be considered if it is submitted in time to do so before the reexamination certificate issues.

(B) A third party requester citation will be considered if it is submitted as part of a third party requester comments submission under 37 CFR 1.947 or 1.951(b) (made as required by 37 CFR 1.948), or in a properly filed request for reexamination under 37 CFR 1.915 or 1.510.

(C) Any other prior art citation satisfying 37 CFR 1.501 which is submitted after an order to reexamine will be retained (stored) in the Central Reexamination Unit or Technology Center (in which the reexamination proceeding is being examined) until the reexamination is concluded >by the issuance and publication of a reexamination certificate<, after which it will be placed in the file of the patent. 37 CFR 1.902.

See MPEP §§ 2202 through 2206 and 2208 for the manner of making such citations and Office handling of same.

2609 *Inter Partes* Reexamination [R-7]

The *inter partes* reexamination statute and rules permit any third party requester to request *inter partes* reexamination of a patent which issued from an original application was filed on or after November 29, 1999, where the request contains certain elements (see 37 CFR 1.915(b)) and is accompanied by the fee required under 37 CFR 1.20(c)(2). The Office initially determines if "a substantial new question of patentability" (35 U.S.C. 312(a)) is presented. If such a new question has been presented, reexamination will be ordered. The reexamination proceedings which follow the order for reexamination are somewhat similar to regular examination procedures in patent applications; however, there are notable differences. For example, there are certain limitations as to the kind of rejections which may be made, a third party requester

may participate throughout the proceeding, there is an "action closing prosecution" and a "right of appeal notice" rather than a final rejection, special reexamination forms are to be used, and time periods are set to provide "special dispatch." When the prosecution of an *inter partes* reexamination proceeding is terminated, an *inter partes* reexamination certificate is issued to indicate the status of all claims following the reexamination and concludes the reexamination proceeding.

The basic characteristics of *inter partes* reexamination are as follows:

(A) Any third party requester can request *inter partes* reexamination at any time during the period of enforceability of the patent (for a patent issued from an original application filed on or after November 29, 1999);

(B) Prior art considered during reexamination is limited to prior patents or printed publications applied under the appropriate parts of 35 U.S.C. 102 and 103;

(C) A substantial new question of patentability must be present for reexamination to be ordered;

(D) If ordered, the actual reexamination proceeding is essentially *inter partes* in nature;

(E) Decision on the request must be made not later than *three months* from its filing date, and the remainder of proceedings must proceed with "special dispatch" within the Office;

(F) If ordered, a reexamination proceeding will normally be conducted to its conclusion and the issuance of an *inter partes* reexamination certificate;

(G) The scope of the patent claims cannot be enlarged by amendment;

(H) Reexamination and patent files are open to the public, but see paragraph (I) below;

(I) The reexamination file is scanned to provide an electronic copy of the file. All public access to and copying of reexamination proceedings may be had from the electronic copy. The paper file is not available to the public.

>Patent owners and third party requesters are cautioned that the reexamination statute, regulations, and published examining procedures do not countenance so-called "litigation tactics" in reexamination proceedings. The parties are expected to conduct themselves accordingly. For example, it is expected that submissions of papers that are not provided for in the reexamination regulations and/or appear to be excluded by the regulation will either be filed with an appropriate petition to accept the paper and/or waive the regulation(s), or not filed at all. Parties are advised that multiple submissions, such as a reply to a paper opposing a petition and a sur-reply directed to such a reply are not provided for in the regulations or examining procedures governing *inter partes* reexamination. It is expected that the parties will adhere to the provisions of 37 CFR 10.18(b) throughout the course of a reexamination proceeding.<

2610 Request for *Inter Partes* Reexamination [R-7]

35 U.S.C. 311. Request for inter partes reexamination

(a) IN GENERAL.— Any third-party requester at any time may file a request for inter partes reexamination by the Office of a patent on the basis of any prior art cited under the provisions of section 301.

(b) REQUIREMENTS.— The request shall—

(1) be in writing, include the identity of the real party in interest, and be accompanied by payment of an inter partes reexamination fee established by the Director under section 41; and

(2) set forth the pertinency and manner of applying cited prior art to every claim for which reexamination is requested.

(c) COPY.— The Director promptly shall send a copy of the request to the owner of record of the patent.

37 CFR 1.913. Persons eligible to file request for inter partes reexamination.

Except as provided for in § 1.907, any person other than the patent owner or its privies may, at any time during the period of enforceability of a patent which issued from an original application filed in the United States on or after November 29, 1999, file a request for *inter partes* reexamination by the Office of any claim of the patent on the basis of prior art patents or printed publications cited under § 1.501.

37 CFR 1.915. Content of request for inter partes reexamination.

(a) The request must be accompanied by the fee for requesting *inter partes* reexamination set forth in § 1.20(c)(2).

(b) A request for *inter partes* reexamination must include the following parts:

(1) An identification of the patent by patent number and every claim for which reexamination is requested.

(2) A citation of the patents and printed publications which are presented to provide a substantial new question of patentability.

(3) A statement pointing out each substantial new question of patentability based on the cited patents and printed publications, and a detailed explanation of the pertinency and manner of applying the patents and printed publications to every claim for which reexamination is requested.

(4) A copy of every patent or printed publication relied upon or referred to in paragraphs (b)(1) through (3) of this section, accompanied by an English language translation of all the necessary and pertinent parts of any non-English language document.

(5) A copy of the entire patent including the front face, drawings, and specification/claims (in double column format) for which reexamination is requested, and a copy of any disclaimer, certificate of correction, or reexamination certificate issued in the patent. All copies must have each page plainly written on only one side of a sheet of paper.

(6) A certification by the third party requester that a copy of the request has been served in its entirety on the patent owner at the address provided for in § 1.33(c). The name and address of the party served must be indicated. If service was not possible, a duplicate copy of the request must be supplied to the Office.

(7) A certification by the third party requester that the estoppel provisions of § 1.907 do not prohibit the *inter partes* reexamination.

(8) A statement identifying the real party in interest to the extent necessary for a subsequent person filing an *inter partes* reexamination request to determine whether that person is a privy.

(c) **>If an *inter partes* request is filed by an attorney or agent identifying another party on whose behalf the request is being filed, the attorney or agent must have a power of attorney from that party or be acting in a representative capacity pursuant to § 1.34.<

(d) If the *inter partes* request does not include the fee for requesting *inter partes* reexamination required by paragraph (a) of this section and meet all the requirements of paragraph (b) of this section, then the person identified as requesting *inter partes* reexamination will be so notified and will generally be given an opportunity to complete the request within a specified time. Failure to comply with the notice will result in the *inter partes* reexamination request not being granted a filing date, and will result in placement of the request in the patent file as a citation if it complies with the requirements of § 1.501.

37 CFR 1.919. Filing date of request for inter partes reexamination.

(a) The filing date of a request for *inter partes* reexamination is the date on which the request satisfies all the requirements for the request set forth in § 1.915.

*****

Any third-party requester, at any time during the period of enforceability of a **patent issued from an original application filed on or after November 29, 1999**, may file a request for an *inter partes* reexamination by the Office of any claim of the patent based on prior patents or printed publications. (Note: "original application" is defined in MPEP § 2611.)

The request must include the elements set forth in 37 CFR 1.915(b) (see MPEP § 2614) and must be accompanied by the fee as set forth in 37 CFR 1.20(c)(2). See MPEP § 2612 for situations where a party may be barred from filing a request for *inter partes* reexamination.

After the request for *inter partes* reexamination, including the entire fee for requesting reexamination, is received in the Office, no abandonment, withdrawal, or striking, of the request is possible, regardless of who requests the same. In some limited circumstances, such as after a final court decision where all of the claims are held invalid, a reexamination order may be vacated. See MPEP § 2686.04.

2611 Time for Requesting *Inter Partes* Reexamination [R-7]

An *inter partes* reexamination can be filed for a patent issued from an original application filed on or after November 29, 1999. For a patent which issued from an original application filed prior to November 29, 1999, the statutory *inter partes* reexamination option is **not available**, only the *ex parte* reexamination is available. See Chapter 2200, section 2209 *et seq*. as to *ex parte* reexamination.

Public Law 106-113 >(the American Inventor's Protection Act of 1999)<, see section 4608 of S.1948, states the effective date and applicability of the Optional *Inter Partes* Reexamination Procedure established by Subtitle F of the Act. Specifically, Section 4608 states that the changes in Subtitle F... "shall take effect on the date of enactment of this Act and shall apply to any patent that issues from an original application filed in the United States on or after that date." The phrase "original application" is interpreted to encompass utility, plant and design applications, including first filed applications, continuations, divisionals, continuations-in-part, continued prosecution applications (CPAs) and the national stage phase of international applications. This interpretation is consistent with the use of the phrase in 35 U.S.C. 251 and the federal rules pertaining to reexamination. In addition, MPEP § 201.04(a) defines an original application as "... an application which is not a reissue application." MPEP § 201.04(a) further states that "[a]n original application may be a first filing or a continuing application". Therefore, the optional *inter partes* reexamination is available to patents which issued from all applications (except for reissues) filed on or after November 29, 1999. A patent which issued from an application filed prior to November 29, 1999, in which a request for continued examination (RCE)

under 37 CFR 1.114 was filed on or after May 29, 2000, however, is not eligible for optional *inter partes* reexamination. An RCE is not considered a filing of an original application; rather it is a continuation of the prosecution of the application in which it is filed. See 35 U.S.C. 132(b), 37 CFR 1.114 and MPEP § 706.07(h).

Under 37 CFR 1.913, any third-party requester may, during the period of enforceability of a patent, file a request for *inter partes* reexamination. This period of enforceability was set by rule since no useful purpose was seen for expending Office resources on deciding patent validity questions in patents which cannot be enforced. In this regard, see *Patlex Corporation v. Mossinghoff*, 758 F.2d 594, 225 USPQ 243, 249 (Fed. Cir. 1985). The period of enforceability is determined by adding 6 years to the date on which the patent expires. The patent expiration date for a utility patent, for example, is determined by taking into account the term of the patent, whether maintenance fees have been paid for the patent, whether any disclaimer was filed as to the patent to shorten its term, any patent term extensions or adjustments for delays within the Office under 35 U.S.C. 154 (see MPEP § 2710, *et seq*.), and any patent term extensions available under 35 U.S.C. 156 for premarket regulatory review (see MPEP § 2750 *et. seq*.). Any other relevant information should also be taken into account. In addition, if litigation is instituted within the period of the statute of limitations, requests for *inter partes* reexamination may be filed after the statute of limitations has expired, as long as the patent is still enforceable against someone.

2612 Persons Who May File a Request [R-7]

37 CFR 1.913. Persons eligible to file request for inter partes reexamination.

Except as provided for in § 1.907, any person other than the patent owner or its privies may, at any time during the period of enforceability of a patent which issued from an original application filed in the United States on or after November 29, 1999, file a request for *inter partes* reexamination by the Office of any claim of the patent on the basis of prior art patents or printed publications cited under § 1.501.

37 CFR 1.907. Inter partes reexamination prohibited.

(a) Once an order to reexamine has been issued under § 1.931, neither the third party requester, nor its privies, may file a subsequent request for *inter partes* reexamination of the patent until an *inter partes* reexamination certificate is issued under § 1.997, unless authorized by the Director.

(b) Once a final decision has been entered against a party in a civil action arising in whole or in part under 28 U.S.C. 1338 that the party has not sustained its burden of proving invalidity of any patent claim-in-suit, then neither that party nor its privies may thereafter request *inter partes* reexamination of any such patent claim on the basis of issues which that party, or its privies, raised or could have raised in such civil action, and an *inter partes* reexamination requested by that party, or its privies, on the basis of such issues may not thereafter be maintained by the Office.

(c) If a final decision in an *inter partes* reexamination proceeding instituted by a third party requester is favorable to patentability of any original, proposed amended, or new claims of the patent, then neither that party nor its privies may thereafter request *inter partes* reexamination of any such patent claims on the basis of issues which that party, or its privies, raised or could have raised in such *inter partes* reexamination proceeding.

As stated in 37 CFR 1.913, except as provided in 37 CFR 1.907, any person other than the patent owner may file a request for *inter partes* reexamination of a patent. The patent owner is precluded from initiating an *inter partes* reexamination of its patent because 35 U.S.C. 311(a)(as technically corrected by Section 13202 of Public Law 107-273) provides that "[a]ny third party requester at any time may file a request for *inter partes* reexamination by the Office of a patent on the basis of any prior art cited under the provisions of section 301." *Ex parte* reexamination (see Chapter 2200) and reissue (see Chapter 1400) are available to the patent owner to have its patent reviewed.

37 CFR 1.907 defines specific situations where a third party is prohibited from filing a request for an *inter partes* reexamination. 37 CFR 1.915(b)(7) requires the third party requester to certify that the estoppel provisions of 37 CFR 1.907 do not prohibit the filing of the *inter partes* reexamination request >by the real party in interest (note that it is the real party in interest that is subject to the estoppel provisions and not the party who actually files the request)<. The certification identified in 37 CFR 1.915(b)(7) will constitute a *prima facie* showing that the party requesting the *inter partes* reexamination is not barred from doing so under 37 CFR 1.907. The Office does not intend to look beyond this required certification. It is only in the rare instance where a challenge to the accuracy of the certification is raised by the patent owner, that the question would then need to be addressed. >A challenge to the accuracy of the certification must facially establish that the third party requesting the *inter partes* reexamination is barred

from doing so under 37 CFR 1.907. Thus, for example, the challenger cannot rely on an argument that the third party requesting reexamination was, at one point, involved with a party barred under 37 CFR 1.907, and should thus be considered as a real party in interest (and barred from filing the request). Involvement *per se* does not facially establish that the other party is a real party in interest. The fact that a second party may benefit from an earlier reexamination request filed by a first party or a civil action conducted by the first party, or that the second party may have collaborated with the first party in a matter, does not facially evidence the second party was a real party in interest with the first party. With respect to the Office conducting an investigation to uncover whether the second party was a "real party in interest," the statute does not require, nor does it provide the tools, for the Office to investigate such matter. Further, Congress has not provided the Office with subpoena power or discovery tools and has not provided the Office with the ability to conduct hearings for eliciting testimony and cross-examination. The Office has not been authorized to impose punitive sanctions for non-compliance. Such evidentiary tools are, however, available to the courts, which are the appropriate vehicle to make a factual investigation as to the accuracy of the identification of a "real party in interest."<

Some of the persons likely to use *inter partes* reexamination are: licensees, potential licensees, infringers, potential exporters, patent litigants, interference applicants, and International Trade Commission respondents. The name of the person who files the request will not be maintained in confidence, and pursuant to 37 CFR 1.915(b)(8), the filing of the request must include a "statement identifying the real party in interest to the extent necessary for a subsequent person filing an *inter partes* reexamination request to determine whether that person is a privy."

2613 Representative of Requester [R-7]

37 CFR 1.915. Content of request for inter partes reexamination.

*****

(c) **>If an *inter partes* request is filed by an attorney or agent identifying another party on whose behalf the request is being filed, the attorney or agent must have a power of attorney from that party or be acting in a representative capacity pursuant to § 1.34.<

Where an attorney or agent files a request for an *inter partes* reexamination for an identified client (the third party requester), he or she may act under a power of attorney from the client or may act in a representative capacity under 37 CFR 1.34*. See 37 CFR 1.915(c). While the filing of the power of attorney is desirable, processing of the reexamination request will not be delayed due to its absence.

>In order to act in a representative capacity under 37 CFR 1.34, an attorney or agent must set forth his or her registration number, his or her name and signature. In order to act under a power of attorney from a requester, an attorney or agent must be provided with a power of attorney. 37 CFR 1.32(c) provides that a "power of attorney may only name as representative" the inventors or registered patent practitioners. Thus, an attorney or agent representing a requester must be a registered patent practitioner.<

If any question of authority to act is raised, proof of authority may be required by the Office.

All correspondence for a third party requester **>is< addressed to the representative of the requester, unless a specific indication is made to forward correspondence to another address.

A third party requester may not be represented during a reexamination proceeding by an attorney or other person who is not registered to practice before the Office.

2614 Content of Request for *Inter Partes* Reexamination [R-7]

37 CFR 1.915. Content of request for inter partes reexamination.

(a) The request must be accompanied by the fee for requesting *inter partes* reexamination set forth in § 1.20(c)(2).

(b) A request for *inter partes* reexamination must include the following parts:

(1) An identification of the patent by patent number and every claim for which reexamination is requested.

(2) A citation of the patents and printed publications which are presented to provide a substantial new question of patentability.

(3) A statement pointing out each substantial new question of patentability based on the cited patents and printed publications, and a detailed explanation of the pertinency and manner of applying the patents and printed publications to every claim for which reexamination is requested.

(4) A copy of every patent or printed publication relied upon or referred to in paragraphs (b)(1) through (3) of this section, accompanied by an English language translation of all the necessary and pertinent parts of any non-English language document.

(5) A copy of the entire patent including the front face, drawings, and specification/claims (in double column format) for which reexamination is requested, and a copy of any disclaimer, certificate of correction, or reexamination certificate issued in the patent. All copies must have each page plainly written on only one side of a sheet of paper.

(6) A certification by the third party requester that a copy of the request has been served in its entirety on the patent owner at the address provided for in § 1.33(c). The name and address of the party served must be indicated. If service was not possible, a duplicate copy of the request must be supplied to the Office.

(7) A certification by the third party requester that the estoppel provisions of § 1.907 do not prohibit the *inter partes* reexamination.

(8) A statement identifying the real party in interest to the extent necessary for a subsequent person filing an *inter partes* reexamination request to determine whether that person is a privy.

(c) **>If an *inter partes* request is filed by an attorney or agent identifying another party on whose behalf the request is being filed, the attorney or agent must have a power of attorney from that party or be acting in a representative capacity pursuant to § 1.34.<

(d) If the *inter partes* request does not include the fee for requesting *inter partes* reexamination required by paragraph (a) of this section and meet all the requirements of paragraph (b) of this section, then the person identified as requesting *inter partes* reexamination will be so notified and will generally be given an opportunity to complete the request within a specified time. Failure to comply with the notice will result in the *inter partes* reexamination request not being granted a filing date, and will result in placement of the request in the patent file as a citation if it complies with the requirements of § 1.501.

I. FEE FOR REQUEST FOR *INTER PARTES* REEXAMINATION

37 CFR 1.915(a) requires the payment of a fee specified in 37 CFR 1.20(c)(2). See MPEP § 2615 for a discussion of the fee to be paid. It is noted that, unlike a request for *ex parte* reexamination, a request for an *inter partes* reexamination cannot be filed by the patent owner; thus, there will be no proposed amendment to generate excess claims fees under 37 CFR 1.20(c)(3) and (c)(4) at the filing of a request for *inter partes* reexamination.

II. REQUIRED ELEMENTS OF REQUEST FOR *INTER PARTES* REEXAMINATION

37 CFR 1.915(b) sets forth the required elements of a request for *inter partes* reexamination. The elements are as follows:

> "(1) An identification of the patent by patent number and every claim for which reexamination is requested."

The request should identify the patent by stating the patent number. Although not required by rule, it is strongly suggested that the request should also state the patentee and the title of the patent, so that they are available for comparison, in the event there is an error in the typing of the patent number. The patentee who would be stated is the first named inventor on the patent.

The request should clearly identify every claim that requester wants reexamined.

> "(2) A citation of the patents and printed publications which are presented to provide a substantial new question of patentability."

The patents and printed publications which are presented in the request to provide a substantial new question of patentability must be listed. A form PTO/SB/08A or 08B, or PTO/SB/42 (or on a form having a format equivalent to one of these forms), should be provided by the requester as part of the request, and all the art (patents and printed publications) cited would be listed thereon.

> "(3) A statement pointing out each substantial new question of patentability based on the cited patents and printed publications, and a detailed explanation of the pertinency and manner of applying the patents and printed publications to every claim for which reexamination is requested."

The request must assert a substantial new question of patentability. A statement which clearly points out what the requester considers to be the substantial new question of patentability based on cited patents and publications (the prior art or double patenting art) which would warrant a reexamination must be included. **>The request must identify **each** substantial new question of patentability raised and **each** proposed ground of rejection separately. For each identified substantial new question of patentability and each identified proposed ground of rejection, the request must explain how the cited documents identi-

fied for that substantial new question of patentability/proposed ground of rejection raise a substantial new question of patentability. The request must apply all of the cited prior art to the claims for which reexamination is requested. For each identified substantial new question of patentability and each identified proposed ground of rejection, the request must explain how the cited documents identified for that substantial new question of patentability/proposed ground of rejection are applied to meet or teach the patent claim limitations to thus establish the identified substantial new question of patentability or proposed ground of rejection.< See also MPEP § 2616 and § 2617.

> "(4) A copy of every patent or printed publication relied upon or referred to in paragraphs (b)(1) through (3) of this section, accompanied by an English language translation of all the necessary and pertinent parts of any non-English language document."

A copy of each cited patent or printed publication, as well as a translation of each non-English document (or a translation of at least the portion(s) relied upon), is required so that all materials will be available to the examiner for full consideration. See MPEP § 2618. >A listing of the patents and printed publications as provided for in 37 CFR 1.98 must also be provided. A comprehensive listing is required, since the identification of the cited art in reexamination by the requester is no less important than that of a patent owner or applicant, and furthers the statutory mandate of 35 U.S.C. 305 that reexamination proceedings must be "conducted with special dispatch within the Office."<

> "(5) A copy of the entire patent including the front face, drawings, and specification/claims (in double column format) for which reexamination is requested, and a copy of any disclaimer, certificate of correction, or reexamination certificate issued in the patent. All copies must have each page plainly written on only one side of a sheet of paper."

A copy of the patent, for which reexamination is requested, should be provided with the specification and claims submitted in a **double** column format. The drawing pages of the printed patent should be presented as they appear in the printed patent; the same is true for the front page of the patent. Thus, a full copy of the printed patent (including the front page) can be used to provide the abstract, drawings, specification, and claims of the patent for the reexamination request. The printed patent is to be reproduced on only one side of the paper; a two-sided copy of the patent is not proper.

A copy of any prior disclaimer, certificate of correction, or reexamination certificate issued for the patent should also be included with the request; since these are a part of the patent. Again, the copy must have each page plainly written on only one side of a sheet of paper. See also MPEP § 2619.

> "(6) A certification by the third party requester that a copy of the request has been served in its entirety on the patent owner at the address provided for in § 1.33(c). The name and address of the party served must be indicated. If service was not possible, a duplicate copy of the request must be supplied to the Office."

The request must include a certification that a copy of the request papers has been served on the patent owner. The certification must set forth the name and address employed in serving patent owner. If service was not possible >after a reasonable effort to do so<, a duplicate copy of the request must be supplied to the Office together with >a **cover letter** including< an explanation of what effort was made to effect service, and why that effort was not successful. >To avoid the possibility of the Office erroneously charging a duplicate filing fee, requesters are strongly encouraged to clearly word the cover letter by stating, for example, in bold print in the heading "**Duplicate Copy of Request Filed under 37 CFR 1.915(b)(6) When Service on the Patent Owner Was Not Possible**."<

> "(7) A certification by the third party requester that the estoppel provisions of § 1.907 do not prohibit the *inter partes* reexamination."

The third party requester must make the certification required by 37 CFR 1.915(b)(7) in order to certify that the requester is not precluded from filing the request for reexamination by: 37 CFR 1.907 and the statute upon which those rules are based (35 U.S.C. 317). See MPEP § 2612.

> "(8) A statement identifying the real party in interest to the extent necessary for a subsequent person filing an *inter partes* reexamination request to determine whether that person is a privy."

The reexamination request must identify the real party in interest who is responsible for filing the reexamination request. This information will be used by future parties requesting reexamination of the same

patent, in making the certifications required by 37 CFR 1.915(b)(8).

37 CFR 1.915(c) states that if the request is filed by an attorney or agent and identifies another party on whose behalf the request is being filed, a power of attorney must be attached, or the attorney or agent must be acting in a representative capacity pursuant to 37 CFR 1.34.

The request should be as complete as possible, since there is no guarantee that the examiner will consider other art (patents and printed publications) when making the decision on the request.

37 CFR 1.919. Filing date of request for inter partes reexamination.

(a) The filing date of a request for *inter partes* reexamination is the date on which the request satisfies all the requirements for the request set forth in § 1.915.

*****

In order to obtain a reexamination filing date, the request papers must include the fee for requesting *inter partes* reexamination required by 37 CFR 1.915(a) and must satisfy all the requirements set forth in 37 CFR 1.915. 37 CFR 1.919(a). Request papers that fail to satisfy all the requirements of 37 CFR 1.915 are incomplete and will not be granted a filing date. See MPEP § 2627.

>An application data sheet (ADS) under 37 CFR 1.76 cannot be submitted in a reexamination proceeding since a reexamination proceeding is not an "application."<

Form PTO/SB/58, reproduced following this page, is encouraged for use as the transmittal form and cover sheet of a request for *inter partes* reexamination. The use of this form is encouraged; however, its use is not a requirement of the law nor of the rules. Immediately following is a Form PTO/SB/58 and a sample of a request for reexamination that would be attached to the Form PTO/SB/58 cover sheet (that would be filled out by requester).

REQUEST FOR *INTER PARTES* REEXAMINATION TRANSMITTAL FORM

Address to:
Mail Stop *Inter Partes* Reexam
Commissioner for Patents
P.O. Box 1450
Alexandria, VA 22313-1450

Attorney Docket No.:

Date:

1. ☐ This is a request for *inter partes* reexamination pursuant to 37 CFR 1.913 of patent number _____ issued _____ . The request is made by a third party requester, identified herein below.

2. ☐ a. The name and address of the person requesting reexamination is:

_____

_____

_____

b. The real party in interest (37 CFR 1.915(b)(8)) is: _____

3. ☐ a. A check in the amount of $ _____ is enclosed to cover the reexamination fee, 37 CFR 1.20(c)(2);

☐ b. The Director is hereby authorized to charge the fee as set forth in 37 CFR 1.20(c)(2) to Deposit Account No. _____ (submit duplicative copy for fee processing); or

☐ c. Payment by credit card. Form PTO-2038 is attached.

4. ☐ Any refund should be made by ☐ check or ☐ credit to Deposit Account No. _____. 37 CFR 1.26(c). If payment is made by credit card, refund must be made to credit card account.

5. ☐ A copy of the patent to be reexamined having a double column format on one side of a separate paper is enclosed. 37 CFR 1.915(b)(5)

6. ☐ CD-ROM or CD-R in duplicate, Computer Program (Appendix) or large table
☐ Landscape Table on CD

7. ☐ Nucleotide and/or Amino Acid Sequence Submission
If applicable, items a. – c. are required.

a. ☐ Computer Readable Form (CRF)
b. Specification Sequence Listing on:
i ☐ CD-ROM (2 copies) or CD-R (2 copies); **or**
ii ☐ paper
c. ☐ Statements verifying identity of above copies

8. ☐ A copy of any disclaimer, certificate of correction or reexamination certificate issued in the patent is included.

9. ☐ Reexamination of claim(s) _____ is requested.

10. ☐ A copy of every patent or printed publication relied upon is submitted herewith including a listing thereof on Form PTO/SB/08, PTO-1449, or equivalent.

11. ☐ An English language translation of all necessary and pertinent non-English language patents and/or printed publications is included.

[Page 1 of 2]

This collection of information is required by 37 CFR 1.915. The information is required to obtain or retain a benefit by the public which is to file (and by the USPTO to process) an application. Confidentiality is governed by 35 U.S.C. 122 and 37 CFR 1.11 and 1.14. This collection is estimated to take 2 hours to complete, including gathering, preparing, and submitting the completed application form to the USPTO. Time will vary depending upon the individual case. Any comments on the amount of time you require to complete this form and/or suggestions for reducing this burden, should be sent to the Chief Information Officer, U.S. Patent and Trademark Office, U.S. Department of Commerce, P.O. Box 1450, Alexandria, VA 22313-1450. DO NOT SEND FEES OR COMPLETED FORMS TO THIS ADDRESS. **SEND TO: Mail Stop *Inter Partes* Reexam, Commissioner for Patents, P.O. Box 1450, Alexandria, VA 22313-1450.**

If you need assistance in completing the form, call 1-800-PTO-9199 and select option 2.

Privacy Act Statement

The **Privacy Act of 1974 (P.L. 93-579)** requires that you be given certain information in connection with your submission of the attached form related to a patent application or patent. Accordingly, pursuant to the requirements of the Act, please be advised that: (1) the general authority for the collection of this information is 35 U.S.C. 2(b)(2); (2) furnishing of the information solicited is voluntary; and (3) the principal purpose for which the information is used by the U.S. Patent and Trademark Office is to process and/or examine your submission related to a patent application or patent. If you do not furnish the requested information, the U.S. Patent and Trademark Office may not be able to process and/or examine your submission, which may result in termination of proceedings or abandonment of the application or expiration of the patent.

The information provided by you in this form will be subject to the following routine uses:

1. The information on this form will be treated confidentially to the extent allowed under the Freedom of Information Act (5 U.S.C. 552) and the Privacy Act (5 U.S.C 552a). Records from this system of records may be disclosed to the Department of Justice to determine whether disclosure of these records is required by the Freedom of Information Act.
2. A record from this system of records may be disclosed, as a routine use, in the course of presenting evidence to a court, magistrate, or administrative tribunal, including disclosures to opposing counsel in the course of settlement negotiations.
3. A record in this system of records may be disclosed, as a routine use, to a Member of Congress submitting a request involving an individual, to whom the record pertains, when the individual has requested assistance from the Member with respect to the subject matter of the record.
4. A record in this system of records may be disclosed, as a routine use, to a contractor of the Agency having need for the information in order to perform a contract. Recipients of information shall be required to comply with the requirements of the Privacy Act of 1974, as amended, pursuant to 5 U.S.C. 552a(m).
5. A record related to an International Application filed under the Patent Cooperation Treaty in this system of records may be disclosed, as a routine use, to the International Bureau of the World Intellectual Property Organization, pursuant to the Patent Cooperation Treaty.
6. A record in this system of records may be disclosed, as a routine use, to another federal agency for purposes of National Security review (35 U.S.C. 181) and for review pursuant to the Atomic Energy Act (42 U.S.C. 218(c)).
7. A record from this system of records may be disclosed, as a routine use, to the Administrator, General Services, or his/her designee, during an inspection of records conducted by GSA as part of that agency's responsibility to recommend improvements in records management practices and programs, under authority of 44 U.S.C. 2904 and 2906. Such disclosure shall be made in accordance with the GSA regulations governing inspection of records for this purpose, and any other relevant (*i.e.*, GSA or Commerce) directive. Such disclosure shall not be used to make determinations about individuals.
8. A record from this system of records may be disclosed, as a routine use, to the public after either publication of the application pursuant to 35 U.S.C. 122(b) or issuance of a patent pursuant to 35 U.S.C. 151. Further, a record may be disclosed, subject to the limitations of 37 CFR 1.14, as a routine use, to the public if the record was filed in an application which became abandoned or in which the proceedings were terminated and which application is referenced by either a published application, an application open to public inspection or an issued patent.
9. A record from this system of records may be disclosed, as a routine use, to a Federal, State, or local law enforcement agency, if the USPTO becomes aware of a violation or potential violation of law or regulation.

<

Attachment to Form PTO/SB/58

REQUEST FOR REEXAMINATION OF U.S. PATENT 9,999,999

Identification of Claims for Which Reexamination Is Requested

In accordance with 35 U.S.C. 311 and 37 CFR 1.913, reexamination of claims 1-5 of U.S. Patent 9,999,999 is requested, in view of the following references:

Smith, U.S. Patent 8,999,999
Jones, U.S. Patent 8,555,555
Cooper, U.S. Patent 8,333,333

Reexamination of claim 1 is requested in view of the Smith patent. Reexamination of claim 2 is requested in view of the combination of Smith in view of Jones. Reexamination of claims 3-5 is requested in view of the combination of Smith in view of Jones, and further in view of Cooper. U.S. Patent 9,999,999 is still enforceable.

Statement Pointing Out Each Substantial New Question of Patentability

The Smith and Jones references were not of record in the file of U.S. Patent 9,999,999. Smith discloses a filter comprising a housing containing activated carbon, where the housing has an outer wall, a closed end, an open end, and a lid attachable to the open end as recited in claim 1 (see col. 6, lines 2-3; Figure 3; col. 12, lines 1-3). Jones teaches the activated carbon and ion exchange resin mixture of claim 2 in lines 4-5 column 9. Because these teachings of Smith and Jones provide subject matter of the U.S. Patent 9,999,999 claims that was not taught in any prior art cited during the prosecution of U.S. Patent 9,999,999, the teachings of Smith and Jones each raise a substantial new question of patentability. The Cooper reference was cited in the prosecution of U.S. Patent 9,999,999, but was never relied upon in any rejection of the claims. Cooper discloses the iodinated exchange resin of claims 3-5 in lines 8-10 of column 5. Because this teaching of Cooper was not applied in any rejection of the claims during the prosecution of U.S. Patent 9,999,999, a substantial new question of patentability is raised by Cooper.

Detailed Explanation Under 37 CFR 1.915(b)

1. Claim 1 of U.S. Patent 9,999,999 is unpatentable under 35 U.S.C. 102(b) as being anticipated by Smith, as shown by the following claim chart:

U.S. Patent 9,999,999	Smith
Claim 1. A filter comprising a housing, the housing having an outer wall, a closed end, an open end, and a lid attachable to the open end. . .	Smith teaches "the filter housing having an outer wall **1**, a closed end **2**, an open end **3**, and a hinged lid **4** that is securable to the open end **3** via clamp **5**." (col. 6, lines 2-3; Figure 3). The hinged lid **4** of Smith is attachable to the outer rim of the open end **3** via clamp **5**.
. . .wherein the housing contains a filter material, the filter material comprising activated carbon. . . .	Smith teaches activated carbon as a filter material: "the filter housing containing filter materials, wherein the filter materials include any mixture of known filter materials such as clay, activated carbon, and any other known filter materials." (col. 12, lines 1-3).

2. Claim 2 of U.S. Patent 9,999,999 is unpatentable under 35 U.S.C. 103 as being obvious over Smith in view of Jones, as shown by the following claim chart:

U.S. Patent 9,999,999	Jones
Claim 2. The filter of claim 1, wherein the filter material further comprises a mixture of activated carbon and ion exchange resin.	Jones teaches "preferably, the filter material mixture includes activated carbon and ion exchange resin." (col. 9, lines 4-5). Smith teaches that the filter materials include "any mixture of known filter materials", including activated carbon (col. 12, lines 1-3). It would have been obvious to utilize the activated carbon and ion exchange mixture of Jones in the housing of Smith since the mixture of Jones is a "mixture of known filter materials" as taught by Smith.

3. Claims 3-5 of U.S. Patent 9,999,999 are unpatentable under 35 U.S.C. 103 as being obvious over Smith in view of Jones, and further in view of Cooper, as shown by the following claim chart:

U.S. Patent 9,999,999	Cooper
Claim 3. The filter of claim 2, wherein the ion exchange resin is iodinated exchange resin.	Cooper teaches "the use of iodinated exchange resin in filter material mixtures for its sterilization properties is preferred." (col. 5, lines 8-10). The substitution of the iodinated exchange resin of Cooper for the ion exchange resin of the Smith/Jones combination would have been obvious to provide sterilization properties as taught by Cooper.
U.S. Patent 9,999,999	Smith
Claim 4. The filter of claim 3, wherein the housing is made of metal. **Claim 5.** The filter of claim 3, wherein the housing is red.	Smith teaches a metal housing (col. 7, line 8) and a red-colored housing (col. 11, line 3).

Conclusion

For the reasons given above, reexamination of claims 1-5 of U.S. Patent 9,999,999 is requested.

Signed,

John Q. Attorney, Reg. No. 29760
Attorney for Requester

2615 Fee for Requesting *Inter Partes* Reexamination [R-5]

37 CFR 1.915. Content of request for inter partes reexamination.

(a) The request must be accompanied by the fee for requesting *inter partes* reexamination set forth in § 1.20(c)(2).

*****

**

In order for a request to be accepted, given a filing date, and published in the *Official Gazette*, **>the request papers must satisfy all the requirements of 37 CFR 1.915 and the entire< fee required under 37 CFR 1.20(c)(2) for filing a request for *inter partes* reexamination >must be paid<. If the entire filing fee is not paid, the request will be considered to be incomplete.

If the entire fee for requesting reexamination has not been paid after requester has been given an opportunity to do so, no determination on the request will be made. The request papers will ordinarily be placed in the patent file as a prior art citation if they comply with the requirements of 37 CFR 1.501. See MPEP § 2206 for handling of prior art citations.

**>If the request for *inter partes* reexamination is denied (see MPEP § 2647 and § 2648), or if an ordered reexamination is vacated (see MPEP § 2627 and § 2646, subsection I), a refund in accordance with 37 CFR 1.26(c) will be made to the identified requester. If the request for *inter partes* reexamination is found to be incomplete and the defect is not cured (see MPEP § 2627), a refund in accordance with 37 CFR 1.26(a) will be made to the identified requester.<

See MPEP § 2634 for processing of the filing fee.

2616 Substantial New Question of Patentability [R-7]

Under 35 U.S.C. 312 and 313, the Office must determine whether "a substantial new question of patentability" affecting any claim of the patent has been raised. 37 CFR 1.915(b)(3) requires that the request include "a statement pointing out each substantial new question of patentability based on the cited patents and printed publications...." Accordingly, it is extremely important that the request clearly set forth in detail exactly what the third party requester considers the "substantial new question of patentability" to be. The request *>must< point out how any questions of patentability raised are substantially different from those raised in the previous examination of the patent before the Office. **

>It is not sufficient that a request for reexamination merely proposes one or more rejections of a patent claim or claims as a basis for reexamination. It must first be demonstrated that a patent or printed publication that is relied upon in a proposed rejection presents a new, non-cumulative technological teaching that was not previously considered and discussed on the record during the prosecution of the application that resulted in the patent for which reexamination is requested, and during the prosecution of any other prior proceeding involving the patent for which reexamination is requested. See also MPEP § 2642.

The legal standard for ordering *inter partes* reexamination, as set forth in 35 U.S.C. 312(a), requires a substantial new question of patentability. The substantial new question of patentability may be based on art previously considered by the Office if the reference is presented in a new light or a different way that escaped review during earlier examination. The clarification of the legal standard for determining obviousness under 35 U.S.C. 103 in *KSR International Co. v. Teleflex Inc.(KSR)*, 550 U.S. ____, 82 USPQ2d 1385 (2007) does not alter the legal standard for determining whether a substantial new question of patentability exists. The requirement for a substantial new question of patentability remains in place even if it is clear from the record of a patent for which reexamination is requested that the patent was granted because the Office did not show "motivation" to combine, or otherwise satisfy the teaching, suggestion, or motivation (TSM) test. Thus, a reexamination request relying on previously applied prior art that asks the Office to look at the art again based solely on the Supreme Court's clarification of the legal standard for determining obviousness under 35 U.S.C. 103 in *KSR*, without presenting the art in new light or different way, will not raise a substantial new question of patentability as to the patent claims, and reexamination will not be ordered.

After the enactment of the Patent and Trademark Office Authorization Act of 2002 ("the 2002 Act"), a substantial new question of patentability can be raised by patents and printed publications "previously cited

by or to the Office or considered by the Office" ("old art"). The 2002 Act did not negate the statutory requirement for a substantial new question of patentability that requires raising new questions about pre-existing technology. In the implementation of the 2002 Act, MPEP § 2642, subsection II.A. was revised. The revision permits raising a substantial new question of patentability based solely on old art, but only if the old art is "presented/viewed in a new light, or in a different way, as compared with its use in the earlier concluded examination(s), in view of a material new argument or interpretation presented in the request." Thus, a request may properly raise an substantial new question of patentability by raising a material new analysis of previously considered reference(s) under the rationales authorized by *KSR*.<

Questions relating to grounds of rejection other than those based on prior art patents or printed publications should not be included in the request and will not be considered by the examiner if included. Examples of such questions that will not be considered are questions as to public use, on sale, *>conduct<, and compliance of the claims with 35 U.S.C. 112.

Affidavits or declarations which explain the contents or pertinent dates of prior art patents or printed publications in more detail may be considered in reexamination. See MPEP § 2258.

See MPEP § 2617 for a discussion of the statement in the request which applies the prior art patents or printed publications (the art) to establish the substantial new question(s) of patentability upon which the request for reexamination is based.

2617 Statement in the Request Applying Prior Art [R-7]

35 U.S.C. 311(b)(2) states that the request for *inter partes* reexamination must "set forth the pertinency and manner of applying cited prior art to every claim for which reexamination is requested." 37 CFR 1.915(b)(3) requires that the request include "[a] statement pointing out each substantial new question of patentability based on the cited patents and printed publications, and a detailed explanation of the pertinency and manner of applying the patents and printed publications to every claim for which reexamination is requested."

The prior art applied may only consist of prior art patents or printed publications. Substantial new questions of patentability may be based upon the following portions of 35 U.S.C. 102:

35 U.S.C. 102. Conditions for patentability; novelty and loss of right to patent.

A person shall be entitled to a patent unless —

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for patent, or

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of the application for patent in the United States, or

*****

(d) the invention was first patented or caused to be patented, or was the subject of an inventor's certificate, by the applicant or his legal representatives or assigns in a foreign country prior to the date of the application for patent in this country on an application for patent or inventor's certificate filed more than twelve months before the filing of the application in the United States, or

(e) the invention was described in — (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for the purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language; or

*****

(g) **>...< (2) before such person's invention thereof, the invention was made in this country by another inventor who had not abandoned, suppressed, or concealed it. In determining priority of invention under this subsection, there shall be considered not only the respective dates of conception and reduction to practice of the invention, but also the reasonable diligence of one who was first to conceive and last to reduce to practice, from a time prior to conception by the other.

Similarly, substantial new questions of patentability may also be made under 35 U.S.C. 103 which are based on the above-indicated portions of 35 U.S.C. 102. See also Chapter 2100.

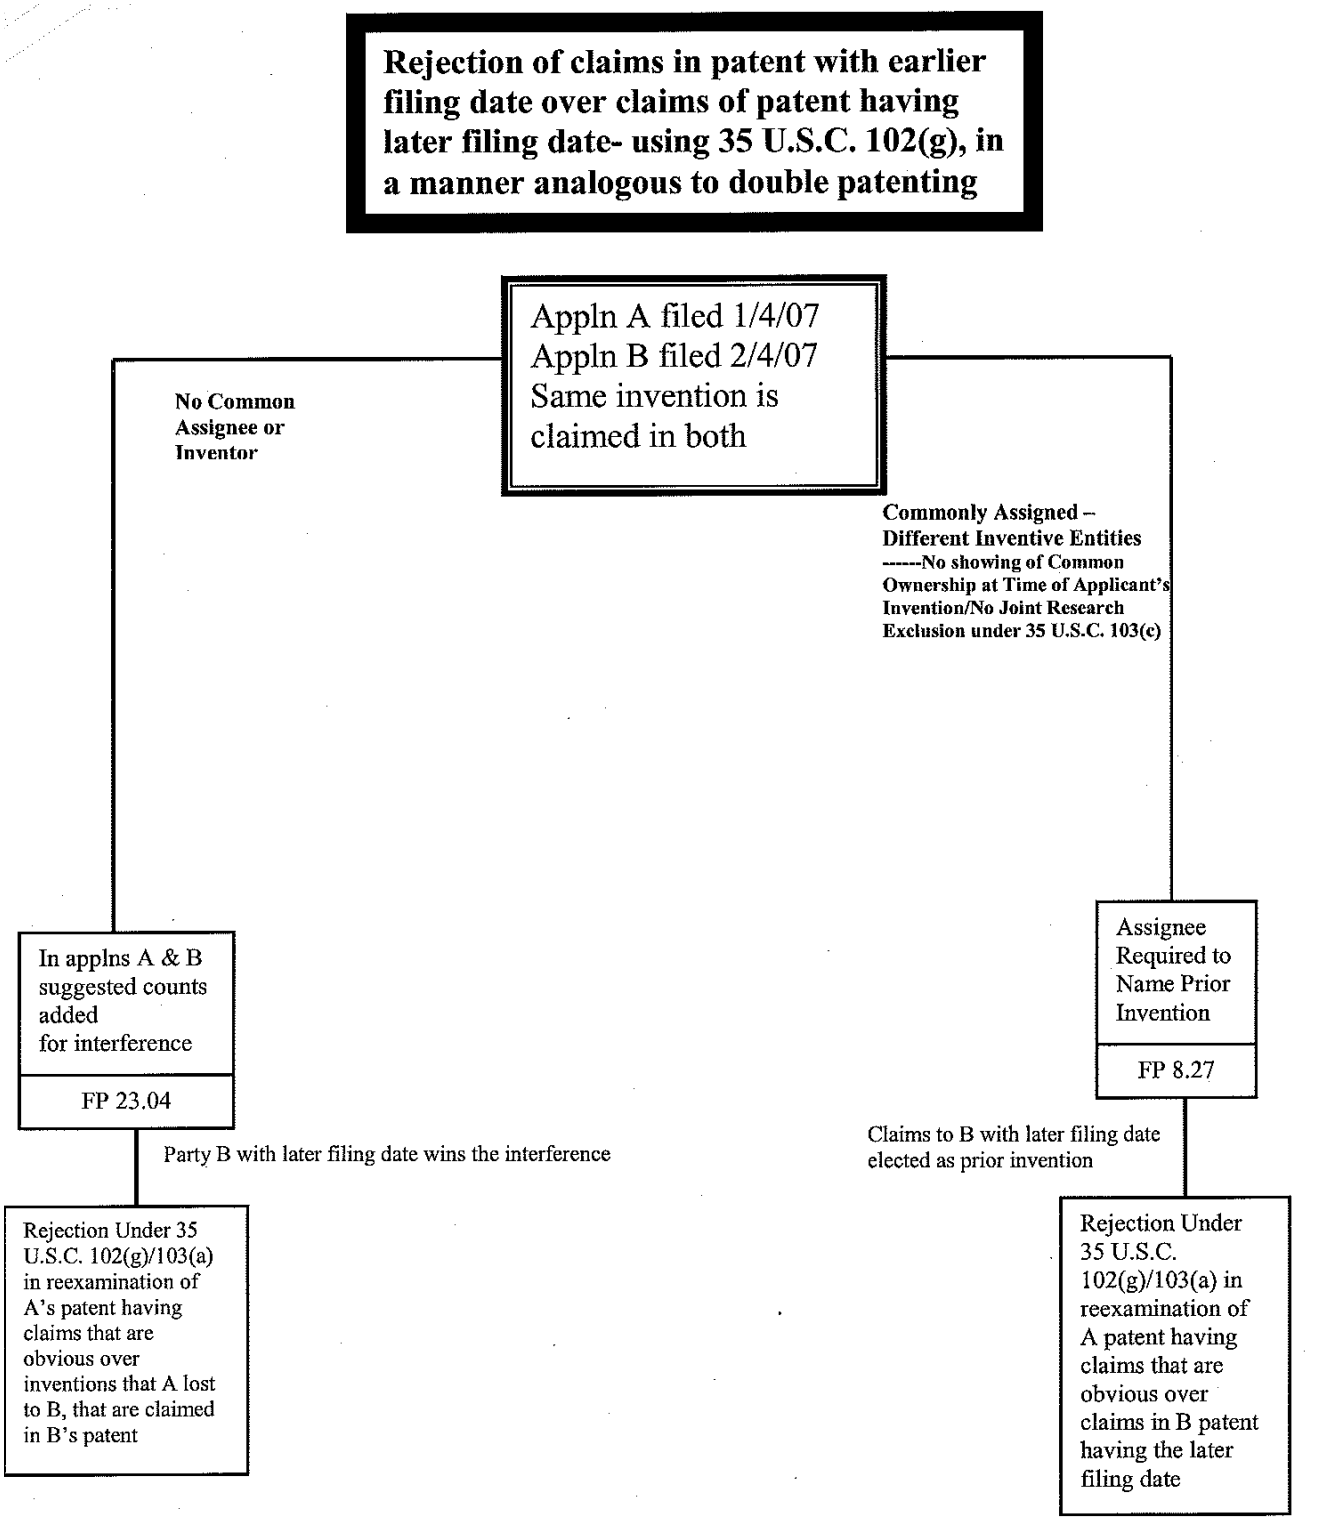
Substantial new questions of patentability must be based on prior art patents or printed publications. Other matters, such as public use or sale, inventorship, 35 U.S.C. 101, 35 U.S.C. 112, fraud, etc., will not be considered when making the determination on

the request and should not be presented in the request. Further, a prior art patent or printed publication cannot be properly applied as a ground for reexamination if it is merely used as evidence of alleged prior public use or on sale. The prior art patent or printed publication must be applied directly to claims under 35 U.S.C. 103 and/or an appropriate portion of 35 U.S.C. 102 or relate to the application of other prior art patents or printed publications to claims on such grounds.

The statement applying the prior art may, where appropriate, point out that claims in the patent for which reexamination is requested are entitled only to the filing date of that patent and are not supported by an earlier foreign or United States patent application whose filing date is claimed. For example, even where a patent is a continuing application under 35 U.S.C. 120, the effective date of some of the claims could be the filing date of the child application which resulted in the patent, because those claims were not supported in the parent application. Therefore, any intervening patents or printed publications would be available as prior art. See *In re Ruscetta*, 255 F.2d 687, 118 USPQ 101 (CCPA 1958), *In re van Langenhoven*, 458 F.2d 132, 173 USPQ 426 (CCPA 1972). See also MPEP § 201.11.

**>Typically, substantial new questions of patentability in a reexamination proceeding are based on "prior art" patents and publications. There are exceptions, however. For example, in In re Lonardo, 119 F.3d 960, 43 USPQ2d 1262 (Fed. Cir. 1997), the Federal Circuit upheld a nonstatutory double patenting rejection in which the patent upon which the rejection was based and the patent under reexamination shared the same effective filing date. See also the discussion as to double patenting in MPEP § 2258 . Analogously, a 35 U.S.C. 102 (g)(2) rejection may be asserted in a reexamination proceeding based on the examples illustrated in the chart below:<

>



Rejection of claims in patent with earlier filing date over claims of patent having later filing date- using 35 U.S.C. 102(g), in a manner analogous to double patenting
Appln A filed 1/4/07
Appln B filed 2/4/07
Same invention is claimed in both
No Common Assignee or Inventor
Commonly Assigned – Different Inventive Entities ------No showing of Common Ownership at Time of Applicant's Invention/No Joint Research Exclusion under 35 U.S.C. 103(c)
In applns A & B suggested counts added for interference
FP 23.04
Party B with later filing date wins the interference
Rejection Under 35 U.S.C. 102(g)/103(a) in reexamination of A's patent having claims that are obvious over inventions that A lost to B, that are claimed in B's patent
Assignee Required to Name Prior Invention
FP 8.27
Claims to B with later filing date elected as prior invention
Rejection Under 35 U.S.C. 102(g)/103(a) in reexamination of A patent having claims that are obvious over claims in B patent having the later filing date

<

I. EXPLANATION MUST BE COMPLETE

The mere citation of new patents or printed publications without an explanation does not comply with 37 CFR 1.915(b)(3). Requester should present *an explanation of how* the cited patents or printed publications are *applied* to all claims which the requester considers to merit reexamination based on patents or printed publications. This not only sets forth the requester's position to the Office, but also to the patent owner.

Thus, for example, once the request has cited documents (patents and printed publications) and proposed combinations of the documents as to patent claims 1-10 (for example), the request must explain how **>each of the proposed combinations specifically applies to each claim that it is asserted against (i.e., claims 1 – 10), explaining how each document (reference) identified for the combination is used.<

Ideally, the required explanation can be provided using an appropriately detailed claim chart that compares, limitation by limitation, each claim for which reexamination is requested with the relevant teachings of each reference cited in the request. See the sample request for reexamination in MPEP § 2614.

For proposed obviousness rejections, requester **must provide** at least one **>basis for combining< the cited references, and a statement of why the claim(s) under reexamination would have been obvious over the proposed reference combination. Preferably, the requester should quote the pertinent teachings in the reference, referencing each quote by page, column and line number and any relevant figure numbers. The explanation **must not** lump together the proposed rejections or proposed combinations of references.

Examples of inappropriate language:

- Claim 1 is unpatentable under 35 U.S.C. 102(b) as being anticipated by, **or in the alternative**, under 35 U.S.C. 103 as being obvious over the Smith reference.

- Claim 1 is unpatentable under 35 U.S.C. 103 as being obvious over Smith **and/or** Charles.

- Claim 2 is unpatentable under 35 U.S.C. 103 as being obvious over Smith in view of Jones **or** Harvey. (This could however be used if both Jones and Harvey provide a minor teaching which can be articulated in a sentence or two.)

- Claims 3 - 10 are unpatentable under 35 U.S.C. 103 as being obvious over Smith in view of either Jones **and** Cooper **or** Harvey **and** Cooper.

- Claims 3 - 10 are unpatentable under 35 U.S.C. 103 as being obvious over Smith in view of Harvey, **taken alone or further in view of** Cooper.

Examples of appropriate language:

- Claim 1 is unpatentable under 35 U.S.C. 102(b) as being anticipated by Smith.

- Claim 1 is unpatentable under 35 U.S.C. 103 as being obvious over Smith.

- Claim 1 is unpatentable under 35 U.S.C. 103 as being obvious over Charles.

- Claim 2 is unpatentable under 35 U.S.C. 103 as being obvious over Smith in view of Jones.

- Claim 2 is unpatentable under 35 U.S.C. 103 as being obvious over Smith in view of Harvey.

- Claims 3 - 10 are unpatentable under 35 U.S.C. 103 as being obvious over Smith in view of Jones, and further in view of Cooper.

- Claims 3 - 10 are unpatentable under 35 U.S.C. 103 as being obvious over Smith in view of Harvey, and further in view of Cooper.

Any failure to provide the required explanation for any document, combination, or claim will be identified in a "Notice of Failure to Comply with *Inter Partes* Reexamination Request Filing Requirements" (see MPEP § 2627). If a requester receives such a notice that identifies one or more documents, combinations, or claims for which an explanation was not given, the requester has the option to respond by either:

(A) providing a separate explanation for each combination, document, and claim identified in the notice as lacking explanation; or

(B) explicitly withdrawing any document, combination, or claim for which reexamination was requested for which there is no explanation. Obviously, once this is done, requester need not provide an explanation for the withdrawn document, combination, or claim. Thus, for example, if the requester's response to the notice explicitly withdraws the request as to claims 6-10, then the documents and their combinations need only be applied separately as to claims 1-5 of the patent. Likewise, if the requester's response to the notice explicitly withdraws the Jones patent from the request, then no explanation is required as to

the Jones reference, and all combinations advanced in the request that contained Jones are deemed to be withdrawn.

Even if the request fails to comply with one of the above-identified requirements, the request may be accepted if it is readily understood from the explanation provided in the request as to how the cited patents or printed publications are applied to all claims which requester considers to merit reexamination.

II. AFFIDAVITS/DECLARATIONS/OTHER WRITTEN EVIDENCE

Affidavits or declarations or other written evidence which explain the contents or pertinent dates of prior art patents or printed publications in more detail may be considered in any reexamination. See MPEP § 2258.

III. ADMISSIONS

The consideration under 35 U.S.C. 312 of a request for reexamination is limited to prior art patents and printed publications. See *Ex parte McGaughey*, 6 USPQ2d 1334, 1337 (Bd. Pat. App. & Inter. 1988). An admission by the patent owner of record in the file or in a court record may be utilized in combination with a patent or printed publication, for establishing a substantial new question of patentability. An admission, *per se*, may not be the basis for establishing a substantial new question of patentability.

For handling of admissions during the examination stage of a reexamination proceeding (i.e., after reexamination has been ordered), see MPEP § 2258.

The admission can reside in the patent file (made of record during the prosecution of the patent application) or may be presented during the pendency of the reexamination proceeding or in litigation. Admissions by the patent owner as to any matter affecting patentability may be utilized to determine the scope and content of the prior art **in conjunction with patents and printed publications**, whether such admissions are found in patents or printed publications or in some other source. An admission relating to any prior art established in the record of the file or in a court record may be used by the examiner in combination with patents or printed publications in a reexamination proceeding. Information supplementing or further defining the admission would be improper.

Any admission submitted by the patent owner is proper. A third party, however, may not submit admissions of the patent owner made outside the record of the file or a court record>, unless such admissions were entered into a court record. If an admission made outside the record of the file or the court record is entered into a court record and a copy thereof is then filed in a reexamination (as a copy of a paper filed in the court), such paper could be admitted pursuant to MPEP § 2686, however, such would not be given weight as an admission with respect to use in establishing a substantial new question of patentability, or as a basis in rejecting claims<. Such a submission would be outside the scope of reexamination.

2618 Copies of Prior Art (Patents and Printed Publications) [R-7]

It is required that a copy of each patent or printed publication relied upon, or referred to, in the request be filed with the request (37 CFR 1.915(b)(4)). If the copy provided is not legible, or is such that its image scanned into the Image File Wrapper system (IFW) will not be legible, it is deemed to not have been provided. >The appropriate "Notice of Failure to Comply with *Inter Partes* Reexamination Request Filing Requirements" (see MPEP § 2627) will identify this defect.< An exception is color photographs and like color submissions, which, if legible as presented, will be retained in an "artifact" file and used as such. If any of the documents are not in the English language, an English language translation of all necessary and pertinent parts is also required. See MPEP § 609.04(a), subsection III. An English language summary, or abstract of a non-English language document, is usually **not** sufficient. There is no assurance that the Office will consider the non-English language patent or printed publication beyond the translation matter that is submitted.

It is also helpful to include copies of the prior art considered (via a 37 CFR 1.555 information disclosure statement – separate from the listing of the patents or printed publications relied upon as raising a substantial new question of patentability) during earlier prosecution of the patent for which reexamination is requested. The presence of both the old and the new prior art allows a comparison to be made to determine whether a substantial new question of patentability is indeed present.

**>As to the requirement for a copy of every patent or printed publication relied upon or referred to in the request, or submitted under 37 CFR 1.98, this requirement is not currently being enforced to require copies of U.S. patents and U.S. patent publications; and the requirement is deemed waived to that extent. In addition, it is not required nor is it permitted that parties submit copies of copending reexamination proceedings and applications (which copies can be mistaken for a new request/filing); rather, submitters may provide the application/proceeding number and its status (note that a submission that is not permitted entry will be returned, expunged or discarded, at the sole discretion of the Office). For example, where the patent for which reexamination is requested is a continuation in part of a parent application, the requester would notify the Office of the application number of the parent application and its status if the asserted substantial new question of patentability relates to a proposed rejection based on an intervening art and the question of whether the claimed subject matter in the patent has support in the parent application is relevant.<

2619 Copy of Printed Patent [Added R-2]

The Office will prepare a separate file wrapper for each reexamination request, which will become part of the patent file. Since in some instances it may not be possible to obtain the patent file promptly, requesters are required under 37 CFR 1.915(b)(5) to include a copy of the printed patent for which reexamination is requested. The copy of the patent for which reexamination is requested should be provided in a double column format. The full copy of the printed patent (including the front page) is employed to provide the abstract, drawings, specification, and claims of the patent for the reexamination request and resulting reexamination proceeding.

A copy of any disclaimer, certificate of correction, or reexamination certificate issued in the patent must also be included, so that a complete history of the patent (for which reexamination is requested) is before the Office for consideration. A copy of any Federal Court decision, complaint in a pending civil action, or interference decision should also be submitted.

2620 Certificate of Service [R-7]

The third party requester must serve the owner of the patent with a copy of the request in its entirety. See 37 CFR 1.915(b)(6). The service *>must< be made **>on the patent owner's< correspondence address >in the patent file< as indicated in 37 CFR 1.33(c). The name and address of the person served and the certificate of service should be indicated on the request.

** See also MPEP §2666.06 regarding service on the requester and patent owner.

It is required that third party requester set forth the name and address of the party served and the mode method of service on the certificate of service attached to the request. Further, the requester must include a copy of the certificate of service with the copy of the request served on the patent owner. If service was not possible >after a reasonable effort to do so<, a duplicate copy of the request papers must be supplied to the Office together with >a **cover letter** including< an explanation of what effort was made to effect service, and why that effort was not successful. >To avoid the possibility of the Office erroneously charging a duplicate filing fee, requesters are strongly encouraged to clearly word the cover letter by stating, for example, in bold print in the heading "**Duplicate Copy of Request Filed under 37 CFR 1.915(b)(6) When Service on the Patent Owner Was Not Possible**."<

2622 Address of Patent Owner [R-7]

37 CFR 1.33. Correspondence respecting patent applications, reexamination proceedings, and other proceedings.

*****

(c) **>All notices, official letters, and other communications for the patent owner or owners in a reexamination proceeding will be directed to the correspondence address. Amendments and other papers filed in a reexamination proceeding on behalf of the patent owner must be signed by the patent owner, or if there is more than one owner by all the owners, or by an attorney or agent of record in the patent file, or by a registered attorney or agent not of record who acts in a representative capacity under the provisions of § 1.34. Double correspondence with the patent owner or owners and the patent owner's attorney or agent, or with more than one attorney or agent, will not be undertaken.<

*****

**>Address of Patent Owner: The correspondence address for the patent to be reexamined, or being reexamined is the correct address for all notices, official letters, and other communications for patent owners in reexamination proceedings. See 37 CFR 1.33(c).

Representative of Patent Owner:< As a general rule, the attorney-client relationship terminates when the purpose for which the attorney was employed is accomplished; e.g., the issuance of a patent to the client. However, apart from the attorney-client relationship, the Office has, by regulation, 37 CFR 10.23(c)(8), made it the responsibility of every "practitioner," by virtue of his/her registration, "to inform a client or former client... of correspondence received from the Office... when the correspondence (i) could have a significant effect on a matter pending before the Office, (ii) is received by the practitioner on behalf of a client or former client, and (iii) is correspondence of which a reasonable practitioner would believe under the circumstances the client or former client should be notified." (Emphasis added.) This responsibility of a practitioner to a former client manifestly is not eliminated by withdrawing as an attorney or agent of record. The practitioner if he/she so desires, can minimize the need for forwarding correspondence concerning issued patents by having the correspondence address changed after the patent issues if the correspondence address is the practitioner's address, which frequently is the case where the practitioner is the attorney or agent of record.

Further, 37 CFR 10.23(c)(8) requires a practitioner to "timely notify the Office of an inability to notify a client or former client of correspondence received from the Office." (Emphasis added.) As the language of this requirement clearly indicates, the duty to notify the Office is a consequence, not of any attorney-client relationship, but rather arises by virtue of the practitioner's status as a registered patent attorney or agent.

If the patent owner desires that a different attorney or agent receive correspondence, then a new power of attorney must be filed. **>See MPEP § 324 for establishing an assignee's right to take action when submitting a power of attorney.<

Submissions to the Office to change the correspondence address or power of attorney in the record of the patent should be addressed as follows:

Where a request for *inter partes* reexamination has been filed and a reexamination proceeding is accordingly pending as to a patent.

Mail Stop "*Inter Partes* Reexam"
Attn: Central Reexamination Unit
Commissioner for Patents
P.O. Box 1450
Alexandria, VA 22313-1450

Where no request for reexamination has been filed and the patent is in storage:

Mail Stop Document Services
Director of the U.S. Patent and Trademark Office
P.O. Box 1450
Alexandria, VA 22313-1450

It is strongly recommended that the Mail Stop information be placed in a prominent position on the first page of each paper being filed utilizing a sufficiently large font size that will direct attention to it.

A sample form for changing correspondence address or power of attorney is set forth below.

PTO/SB/81 (07-08)
Approved for use through 12/31/2008. OMB 0651-0035
U.S. Patent and Trademark Office; U.S. DEPARTMENT OF COMMERCE
Under the Paperwork Reduction Act of 1995, no persons are required to respond to a collection of information unless it displays a valid OMB control number.

POWER OF ATTORNEY OR REVOCATION OF POWER OF ATTORNEY WITH A NEW POWER OF ATTORNEY AND CHANGE OF CORRESPONDENCE ADDRESS		
	Application Number	
	Filing Date	
	First Named Inventor	
	Title	
	Art Unit	
	Examiner Name	
	Attorney Docket Number	

I hereby revoke all previous powers of attorney given in the above-identified application.

☐ A Power of Attorney is submitted herewith.

OR

☐ I hereby appoint Practitioner(s) associated with the following Customer Number as my/our attorney(s) or agent(s) to prosecute the application identified above, and to transact all business in the United States Patent and Trademark Office connected therewith:

OR

☐ I hereby appoint Practitioner(s) named below as my/our attorney(s) or agent(s) to prosecute the application identified above, and to transact all business in the United States Patent and Trademark Office connected therewith:

Practitioner(s) Name	Registration Number

Please recognize or change the correspondence address for the above-identified application to:

☐ The address associated with the above-mentioned Customer Number.

OR

☐ The address associated with Customer Number:

OR

☐ Firm or Individual Name					
Address					
City		State		Zip	
Country					
Telephone		Email			

I am the:

☐ Applicant/Inventor.

OR

☐ Assignee of record of the entire interest. See 37 CFR 3.71.
Statement under 37 CFR 3.73(b) (Form PTO/SB/96) submitted herewith or filed on _____.

SIGNATURE of Applicant or Assignee of Record

Signature		Date	
Name		Telephone	
Title and Company			

NOTE: Signatures of all the inventors or assignees of record of the entire interest or their representative(s) are required. Submit multiple forms if more than one signature is required, see below*.

☐ *Total of _____ forms are submitted.

This collection of information is required by 37 CFR 1.31, 1.32 and 1.33. The information is required to obtain or retain a benefit by the public which is to file (and by the USPTO to process) an application. Confidentiality is governed by 35 U.S.C. 122 and 37 CFR 1.11 and 1.14. This collection is estimated to take 3 minutes to complete, including gathering, preparing, and submitting the completed application form to the USPTO. Time will vary depending upon the individual case. Any comments on the amount of time you require to complete this form and/or suggestions for reducing this burden, should be sent to the Chief Information Officer, U.S. Patent and Trademark Office, U.S. Department of Commerce, P.O. Box 1450, Alexandria, VA 22313-1450. DO NOT SEND FEES OR COMPLETED FORMS TO THIS ADDRESS. **SEND TO: Commissioner for Patents, P.O. Box 1450, Alexandria, VA 22313-1450.**

If you need assistance in completing the form, call 1-800-PTO-9199 and select option 2.

Privacy Act Statement

The **Privacy Act of 1974 (P.L. 93-579)** requires that you be given certain information in connection with your submission of the attached form related to a patent application or patent. Accordingly, pursuant to the requirements of the Act, please be advised that: (1) the general authority for the collection of this information is 35 U.S.C. 2(b)(2); (2) furnishing of the information solicited is voluntary; and (3) the principal purpose for which the information is used by the U.S. Patent and Trademark Office is to process and/or examine your submission related to a patent application or patent. If you do not furnish the requested information, the U.S. Patent and Trademark Office may not be able to process and/or examine your submission, which may result in termination of proceedings or abandonment of the application or expiration of the patent.

The information provided by you in this form will be subject to the following routine uses:

1. The information on this form will be treated confidentially to the extent allowed under the Freedom of Information Act (5 U.S.C. 552) and the Privacy Act (5 U.S.C 552a). Records from this system of records may be disclosed to the Department of Justice to determine whether disclosure of these records is required by the Freedom of Information Act.
2. A record from this system of records may be disclosed, as a routine use, in the course of presenting evidence to a court, magistrate, or administrative tribunal, including disclosures to opposing counsel in the course of settlement negotiations.
3. A record in this system of records may be disclosed, as a routine use, to a Member of Congress submitting a request involving an individual, to whom the record pertains, when the individual has requested assistance from the Member with respect to the subject matter of the record.
4. A record in this system of records may be disclosed, as a routine use, to a contractor of the Agency having need for the information in order to perform a contract. Recipients of information shall be required to comply with the requirements of the Privacy Act of 1974, as amended, pursuant to 5 U.S.C. 552a(m).
5. A record related to an International Application filed under the Patent Cooperation Treaty in this system of records may be disclosed, as a routine use, to the International Bureau of the World Intellectual Property Organization, pursuant to the Patent Cooperation Treaty.
6. A record in this system of records may be disclosed, as a routine use, to another federal agency for purposes of National Security review (35 U.S.C. 181) and for review pursuant to the Atomic Energy Act (42 U.S.C. 218(c)).
7. A record from this system of records may be disclosed, as a routine use, to the Administrator, General Services, or his/her designee, during an inspection of records conducted by GSA as part of that agency's responsibility to recommend improvements in records management practices and programs, under authority of 44 U.S.C. 2904 and 2906. Such disclosure shall be made in accordance with the GSA regulations governing inspection of records for this purpose, and any other relevant (*i.e.*, GSA or Commerce) directive. Such disclosure shall not be used to make determinations about individuals.
8. A record from this system of records may be disclosed, as a routine use, to the public after either publication of the application pursuant to 35 U.S.C. 122(b) or issuance of a patent pursuant to 35 U.S.C. 151. Further, a record may be disclosed, subject to the limitations of 37 CFR 1.14, as a routine use, to the public if the record was filed in an application which became abandoned or in which the proceedings were terminated and which application is referenced by either a published application, an application open to public inspection or an issued patent.
9. A record from this system of records may be disclosed, as a routine use, to a Federal, State, or local law enforcement agency, if the USPTO becomes aware of a violation or potential violation of law or regulation.

<

2623 Withdrawal of Attorney or Agent [R-7]

Any request by an attorney or agent of record to withdraw from a patent will normally be approved only if at least 30 days remain in any running period for response. See also MPEP § 402.06.

A sample form for a request by an attorney or agent of record to withdraw from a patent is set forth below.

**>

Doc Code: PET.POA.WDRW
Document Description: Petition to withdraw attorney or agent (SB83)

PTO/SB/83 (04-08)
Approved for use through 12/31/2008. OMB 0651-0035
U.S. Patent and Trademark Office, U.S. DEPARTMENT OF COMMERCE
Under the Paperwork Reduction Act of 1995, no persons are required to respond to a collection of information unless it displays a valid OMB control number.

REQUEST FOR WITHDRAWAL AS ATTORNEY OR AGENT AND CHANGE OF CORRESPONDENCE ADDRESS

Application Number	
Filing Date	
First Named Inventor	
Art Unit	
Examiner Name	
Attorney Docket Number	

To: Commissioner for Patents
P.O. Box 1450
Alexandria, VA 22313-1450

Please withdraw me as attorney or agent for the above identified patent application, and

☐ all the practitioners of record;

☐ the practitioners (with registration numbers) of record listed on the attached paper(s); or

☐ the practitioners of record associated with Customer Number: _____

NOTE: The immediately preceding box should only be marked when the practitioners were appointed using the listed Customer Number.

The reason(s) for this request are those described in 37 CFR :

☐ 10.40(b)(1)	☐ 10.40(b)(2)	☐ 10.40(b)(3)	☐ 10.40(b)(4)
☐ 10.40(c)(1)(i)	☐ 10.40(c)(1)(ii)	☐ 10.40(c)(1)(iii)	☐ 10.40(c)(1)(iv)
☐ 10.40(c)(1)(v)	☐ 10.40(c)(1)(vi)	☐ 10.40(c)(2)	☐ 10.40(c)(3)
☐ 10.40(c)(4)	☐ 10.40(c)(5)	☐ 10.40(c)(6) Please explain below:	

Certifications

Check each box below that is factually correct. WARNING: If a box is left unchecked, the request will likely not be approved.

1. ☐ I/We have given reasonable notice to the client, prior to the expiration of the response period, that the practitioner(s) intend to withdraw from employment.

2. ☐ I/We have delivered to the client or a duly authorized representative of the client all papers and property (including funds) to which the client is entitled.

3. ☐ I/We have notified the client of any responses that may be due and the time frame within which the client must respond.

Please provide an explanation, if necessary:

Date		Telephone No.	

NOTE: ***Withdrawal is effective when approved rather than when received.***

Privacy Act Statement

The **Privacy Act of 1974 (P.L. 93-579)** requires that you be given certain information in connection with your submission of the attached form related to a patent application or patent. Accordingly, pursuant to the requirements of the Act, please be advised that: (1) the general authority for the collection of this information is 35 U.S.C. 2(b)(2); (2) furnishing of the information solicited is voluntary; and (3) the principal purpose for which the information is used by the U.S. Patent and Trademark Office is to process and/or examine your submission related to a patent application or patent. If you do not furnish the requested information, the U.S. Patent and Trademark Office may not be able to process and/or examine your submission, which may result in termination of proceedings or abandonment of the application or expiration of the patent.

The information provided by you in this form will be subject to the following routine uses:

1. The information on this form will be treated confidentially to the extent allowed under the Freedom of Information Act (5 U.S.C. 552) and the Privacy Act (5 U.S.C. 552a). Records from this system of records may be disclosed to the Department of Justice to determine whether disclosure of these records is required by the Freedom of Information Act.
2. A record from this system of records may be disclosed, as a routine use, in the course of presenting evidence to a court, magistrate, or administrative tribunal, including disclosures to opposing counsel in the course of settlement negotiations.
3. A record in this system of records may be disclosed, as a routine use, to a Member of Congress submitting a request involving an individual, to whom the record pertains, when the individual has requested assistance from the Member with respect to the subject matter of the record.
4. A record in this system of records may be disclosed, as a routine use, to a contractor of the Agency having need for the information in order to perform a contract. Recipients of information shall be required to comply with the requirements of the Privacy Act of 1974, as amended, pursuant to 5 U.S.C. 552a(m).
5. A record related to an International Application filed under the Patent Cooperation Treaty in this system of records may be disclosed, as a routine use, to the International Bureau of the World Intellectual Property Organization, pursuant to the Patent Cooperation Treaty.
6. A record in this system of records may be disclosed, as a routine use, to another federal agency for purposes of National Security review (35 U.S.C. 181) and for review pursuant to the Atomic Energy Act (42 U.S.C. 218(c)).
7. A record from this system of records may be disclosed, as a routine use, to the Administrator, General Services, or his/her designee, during an inspection of records conducted by GSA as part of that agency's responsibility to recommend improvements in records management practices and programs, under authority of 44 U.S.C. 2904 and 2906. Such disclosure shall be made in accordance with the GSA regulations governing inspection of records for this purpose, and any other relevant (*i.e.*, GSA or Commerce) directive. Such disclosure shall not be used to make determinations about individuals.
8. A record from this system of records may be disclosed, as a routine use, to the public after either publication of the application pursuant to 35 U.S.C. 122(b) or issuance of a patent pursuant to 35 U.S.C. 151. Further, a record may be disclosed, subject to the limitations of 37 CFR 1.14, as a routine use, to the public if the record was filed in an application which became abandoned or in which the proceedings were terminated and which application is referenced by either a published application, an application open to public inspection or an issued patent.
9. A record from this system of records may be disclosed, as a routine use, to a Federal, State, or local law enforcement agency, if the USPTO becomes aware of a violation or potential violation of law or regulation.

<

2624 Correspondence [R-7]

All requests for *inter partes* reexamination (original request papers) and all subsequent *inter partes* reexamination correspondence mailed to the U.S. Patent and Trademark Office via the U.S. Postal Service Mail, other than correspondence to the Office of the General Counsel pursuant to 37 CFR 1.1(a)(3) and 1.302(e), should be addressed:

Mail Stop "*Inter Partes* Reexam"
Attn: Central Reexamination Unit
Commissioner for Patents
P.O. Box 1450
Alexandria, VA 22313-1450

All such correspondence hand carried to the Office, or submitted by delivery service (e.g., Federal Express, DHL, etc., which are commercial mail or delivery services) should be carried to:

Customer Service Window
Randolph Building
401 Dulany Street
Alexandria, VA 22314

Hand-carried correspondence and correspondence submitted by delivery service should also be marked "Mail Stop *Inter Partes* Reexam." Whether the correspondence is mailed via the U.S. Postal Service mail or is hand-carried to the Office, it is strongly recommended that the Mail Stop information be placed in a prominent position on the first page of each paper being filed utilizing a sufficiently large font size that will direct attention to it.

A request for *inter partes* reexamination may not be sent by facsimile transmission (FAX). See 37 CFR 1.6(d)(5). >This is also true for a corrected/completed request sent in response to a notice that the original request was not filing date compliant, since the corrected/completed request stands in place of, or is a completion of, the original request papers.< All subsequent *inter partes* reexamination correspondence, however, may be FAXed to:

Central Reexamination Unit
(571) 273-9900.

>Effective July 9, 2007, the U.S. Patent and Trademark Office began accepting requests for reexamination, and "follow-on" papers (i.e., subsequent correspondence in reexamination proceedings) submitted via the Office's Web-based electronic filing system (EFS-Web). The Office has updated the Legal Framework for EFS-Web to set forth that requests for reexamination, and reexamination "follow-on" papers are permitted to be submitted using EFS-Web. The current version of the Legal Framework for EFS-Web may be accessed at: http://www.uspto.gov/ebc/portal/efs/legal.htm.<

After the filing of the request for *inter partes* reexamination, any letters sent to the Office relating to the reexamination proceeding should identify the proceeding by the number of the patent undergoing reexamination, the reexamination request control number assigned, the name of the examiner, and the examiner's Art Unit. **

>The certificate of mailing and transmission procedures (37 CFR 1.8) may be used to file any paper in an *inter partes* reexamination proceeding, except for a request for reexamination and a corrected/replacement request for reexamination. See MPEP § 512 as to the use of the certificate of mailing and transmission procedures. The "Express Mail" mailing procedure (37 CFR 1.10) may be used to file any paper in an *inter partes* reexamination proceeding. See MPEP § 513 as to the use of the "Express Mail" mailing procedure.<

Communications from the Office to the patent owner will be directed to the **>correspondence address for the patent being reexamined. See< 37 CFR 1.33(c).

Amendments and other papers filed on behalf of patent owners must be signed by the patent owners, or the registered attorney or agent of record in the patent file, or any registered attorney or agent acting in a representative capacity under 37 CFR 1.34*.

Double correspondence with the patent owners and the attorney or agent normally will not be undertaken by the Office.

Where no correspondence address is otherwise specified, correspondence will be with the most recent attorney or agent made of record by the patent owner.

Note MPEP § 2620 for certificate of service.

See MPEP § 2224 for correspondence in *ex parte* reexamination proceedings.

2625 Untimely Paper Filed Prior to First Office Action [R-7]

37 CFR 1.939. Unauthorized papers in inter partes reexamination

(a) If an unauthorized paper is filed by any party at any time during the *inter partes* reexamination proceeding it will not be considered and may be returned.

(b) Unless otherwise authorized, no paper shall be filed prior to the initial Office action on the merits of the *inter partes* reexamination.

37 CFR 1.902. Processing of prior art citations during an inter partes reexamination proceeding.

**>Citations by the patent owner in accordance with § 1.933 and by an *inter partes* reexamination third party requester under § 1.915 or § 1.948 will be entered in the *inter partes* reexamination file. The entry in the patent file of other citations submitted after the date of an order for reexamination pursuant to § 1.931 by persons other than the patent owner, or the third party requester under either § 1.913 or § 1.948, will be delayed until the *inter partes* reexamination proceeding has been concluded by the issuance and publication of a reexamination certificate. See § 1.502 for processing of prior art citations in patent and reexamination files during an *ex parte* reexamination proceeding filed under § 1.510.<

Pursuant to 37 CFR 1.939, after filing of a request for *inter partes* reexamination, no papers directed to the merits of the reexamination other than (A) citations of patents or printed publications under 37 CFR 1.501 and 1.933, (B) another complete request under 37 CFR 1.510 or 37 CFR 1.915, or (C) notifications pursuant to MPEP § 2686, should be filed with the Office prior to the date of the first Office action in the reexamination proceeding. Any papers directed to the merits of the reexamination, other than those under 37 CFR 1.501, 1.933, 1.510 or 1.915, or under MPEP § 2686, filed prior to the date of the first Office action will be returned to the sender without consideration. >If the papers are entered prior to discovery of the impropriety, such papers will be expunged from the record.< A copy of the letter *>providing notification of< the returned papers >or expungement< will be made of record in the patent file. However, no copy of the *>returned/expunged< papers will be retained by the Office. If the submission of the *>returned/expunged< papers is appropriate later in the proceedings, they may be filed, and accepted by the Office, at that time. See *Patlex Corp. v. Mossinghoff*, 771 F.2d 480, 226 USPQ 985 (Fed. Cir. 1985); *In re Knight*, 217 USPQ 294 (Comm'r Pat.1982); and *In re Amp*, 212 USPQ 826 (Comm'r Pat. 1981) which addressed the situation analogous to the present situation for *ex parte* reexamination proceedings.

2626 Initial Processing of Request for *Inter Partes* Reexamination [Added R-2]

The opening of all mail marked "Mail Stop *Inter Partes* Reexam" and all initial clerical processing of requests for *inter partes* reexamination will be performed by the reexamination preprocessing staff in the Office of Patent Legal Administration, Central Reexamination Unit.

2627 Incomplete Request for *Inter Partes* Reexamination [R-7]

37 CFR 1.915. Content of request for inter partes reexamination.

*****

(d) If the *inter partes* request does not include the fee for requesting *inter partes* reexamination required by paragraph (a) of this section and meet all the requirements of paragraph (b) of this section, then the person identified as requesting *inter partes* reexamination will be so notified and will generally be given an opportunity to complete the request within a specified time. Failure to comply with the notice will result in the *inter partes* reexamination request not being granted a filing date, and will result in placement of the request in the patent file as a citation if it complies with the requirements of § 1.501.

*****

37 CFR 1.919. Filing date of request for inter partes reexamination.

(a) The filing date of a request for *inter partes* reexamination is the date on which the request satisfies all the requirements for the request set forth in § 1.915.

*****

Request papers that fail to satisfy all the requirements of 37 CFR 1.915 are incomplete and will not be granted a filing date.

OFFICE PROCEDURE WHERE THE REQUEST FAILS TO COMPLY WITH REQUIREMENTS FOR A FILING DATE

A. Discovery of Non-Compliance with Filing Date Requirement(s) Prior to Assigning a Filing Date

1. Notice of Failure to Comply with Reexamination Request Filing Requirements

The Central Reexamination Unit (CRU) Legal Instrument Examiner (LIE) and CRU Paralegal check the request for compliance with the reexamination filing date requirements. If it is determined that the request fails to meet one or more of the filing date requirements (see MPEP § 2614), the person identified as requesting reexamination will be so notified and will be given an opportunity to complete the requirements of the request within a specified time (generally 30 days). Form PTOL-2076, "Notice of Failure to Comply with *Inter Partes* Reexamination Request Filing Requirements," is used to provide the notification for *inter partes* reexamination. If explanation is needed as to a non-compliance item, the box at the bottom of the form will be checked. An attachment will then be completed to specifically explain why the request does not comply. If there is a filing fee deficiency, a form, PTOL-2057, is completed and attached to form PTOL-2077.

2. Failure to Remedy Defect(s) in "Notice of Failure to Comply with *Inter Partes* Reexamination Request Filing Requirements"

If after receiving a "Notice of Failure to Comply with *Inter Partes* Reexamination Request Filing Requirements," the requester does not remedy the defects in the request papers that are pointed out, then the request papers will not be given a filing date, but *>the assigned< control number will be *>retained<. Examples of a failure to remedy the defect(s) in the notice are (A) where the third party requester does not timely respond to the notice, and (B) where requester does respond, but the response does not cure the defect(s) identified to requester and/or introduces a new defect or deficiency.

If the third party requester timely responds to the "Notice of Failure to Comply with *Inter Partes* Reexamination Request Filing Requirements," the CRU LIE and CRU Paralegal will check the request, as supplemented by the response, for correction of all non-compliance items identified in the notice. If any identified non-compliance item has not been corrected, a filing date will not be assigned to the request papers. It is to be noted that a single failure to comply with the "Notice of Failure to Comply with *Inter Partes* Reexamination Request Filing Requirements" will ordinarily result in the reexamination request not being granted a filing date. 37 CFR 1.915(d) provides that "[f]ailure to comply with the notice may result in the *inter partes* reexamination request not being granted a filing date." Thus, absent extraordinary circumstances, requester will be given only one opportunity to correct the non-compliance. Similarly, if the response introduces a new defect or deficiency into the request papers, the *inter partes* reexamination request will not be granted a filing date absent extraordinary circumstances. **

If the request papers are not made filing-date-compliant in response to the Office's "Notice of Failure to Comply with *Inter Partes* Reexamination Request Filing Requirements," the CRU LIE will prepare a "Notice of Disposition of *Inter Partes* Reexamination Request," form PTOL-2078, identifying what defects have not been corrected.

B. Non-Compliance with Filing Date Requirement(s) Discovered After Initial Issuance of Notice of Reexamination Request Filing Date

1. Decision Vacating Filing Date

After a filing date and control number are assigned to the request papers, the examiner reviews the request to decide whether to grant or deny *>reexamination<. If, in the process of reviewing the request, the examiner notes a non-compliance item not earlier recognized, the examiner will forward a memo to his/her *>CRU Supervisory Patent Examiner (SPE)< detailing any such non-compliance item(s); a "cc" of the e-mail is provided to the Director of the CRU and to a Senior Legal Advisor in the Office of Patent Legal Administration (OPLA) overseeing reexamination. The *>CRU SPE< will screen the memo and discuss the case with an appropriate OPLA Legal Advisor. Upon confirmation of the existence of any such non-compliant item(s), OPLA will issue a decision vacating the assigned reexamination filing date.

In OPLA's decision, the requester will be notified of the non-compliant item(s) and given time to correct the non-compliance. As noted above, 37 CFR 1.915(d) provides that "[f]ailure to comply with the notice may result in the *inter partes* reexamination request not being granted a filing date." Thus, absent extraordinary circumstances, requester will only be given one opportunity to correct the non-compliant item(s) identified in the Decision Vacating Filing Date. This category also includes instances where the Office becomes aware of a check returned for insufficient fund or a stopped payment of a check after a filing date has been assigned, and prior to the decision on the request for reexamination.

2. Failure to Remedy Defect in Decision Vacating Filing Date

If the third party requester does not timely respond to the Office's notice, the CRU LIE will so inform a Senior Legal Advisor in the OPLA overseeing reexamination, and OPLA will issue a Decision Vacating the Proceeding.

If the requester timely responds to the Decision Vacating Filing Date, but the response fails to satisfy all the non-compliance items identified in the decision or introduces a new defect into the request papers, the examiner will prepare a memo to that effect. In the memo, the examiner will point out why the defect(s) have not been appropriately dealt with, and whether the non-compliant request papers qualify as a 37 CFR 1.501 submission or not (and why). The examiner will forward the memo to his/her *>CRU SPE<; a "cc" of the memo is provided to the Director of the CRU and to a Senior Legal Advisor in the OPLA overseeing reexamination. The *>CRU SPE< will screen the memo and discuss the case with an appropriate OPLA Legal Advisor. Where the defects are not remedied or a new defect has been added, OPLA will issue a Decision Vacating the Proceeding.

The Decision Vacating the Proceeding will identify the items that do not comply with the filing date requirements which were not rectified, or are newly added, using the content of the examiner's memo to explain why the defects are present. The decision will also point out the disposition of the request papers (treated as a 37 CFR 1.501 submission or discarded) and why.

2629 Notice of Request for *Inter Partes* Reexamination in *Official Gazette* [R-7]

Notice of filing of all complete requests for *inter partes* reexamination will be published in the *Official Gazette*, approximately 4-5 weeks after filing.

Reexamination requests that have been assigned a filing date will be announced in the *Official Gazette*. The reexamination preprocessing staff of the Office of Patent Legal Administration, Central Reexamination Unit (CRU) will complete a form with the information needed to print the notice. The forms are forwarded at the end of each week to the Office of *>Data Management< for printing in the *Official Gazette*. The *Official Gazette* notice will appear in the notice section of the *Official Gazette* under the heading of Requests for *Inter Partes* Reexamination Filed and will include the name of any requester along with the other items set forth in 37 CFR 1.11(c).

In addition, a record of requests filed will be located in the Patent Search Room and in the reexamination preprocessing area of the CRU. Office personnel may use the PALM system to determine if a request for reexamination has been filed in a particular patent. See MPEP § 2632.

2630 Constructive Notice to Patent Owner [Added R-2]

In some instances, it may not be possible to deliver mail to the patent owner because no current address is available. If all efforts to correspond with the patent owner fail, the reexamination proceeding will proceed without the patent owner. The publication in the Official Gazette of the notice of the filing of the *inter partes* reexamination request will serve as constructive notice to the patent owner in such an instance.

2631 Processing of Request Corrections [R-5]

**>All processing of submissions to cure an incomplete request for *inter partes* reexamination (see MPEP § 2627) is carried out in the preprocessing area of the Central Reexamination Unit (CRU). Any such submission should be marked "Mail Stop *Inter Partes* Reexam" in the manner discussed in MPEP § 2624 so

that the submission may be promptly forwarded to the reexamination preprocessing staff of the CRU.<

2632 Public Access [R-7]

Reexamination files are open to inspection by the general public by way of the Public PAIR via the USPTO Internet site. In viewing the images of the reexamination proceedings, members of the public will be able to view the entire content of the reexamination file >with the exception of non-patent literature<. To access Public PAIR, a member of the public would (A) go to the USPTO web site at http://www.uspto.gov, (B) click on the "Site Index" link, (C) click on the letter "E" in the index, (D) click on the link to the Electronic Business Center, (E) in the "Patents" column, click on the "? Status & View Documents" link, (F) under "Patent Application Information Retrieval" in the "**>Search for Application<" box, change the item to "Control Number," (G) enter the control number of the reexamination proceeding in the "Enter Number" box, and (H) click on "*>SEARCH<."

If a copy of the reexamination file is requested, it may be ordered from the Document Services Division of the Office of Public Records (OPR). Orders for such copies must indicate the control number of the reexamination proceeding. Orders should be addressed as follows:

Mail Stop Document Services

Director of the U.S. Patent and Trademark Office

P.O. Box 1450

Alexandria, VA 22313-1450

Requests for a copy of a request may also be sent via e-mail to: dsd@uspto.gov, and the cost of the copy may be charged to a credit card or deposit account. Alternatively, a copy may be obtained from IFW via PAIR.

To obtain a "certified copy" of a reexamination file, a CD-ROM may be purchased from Document Services Division of OPR.

2632.01 Determining If a Reexamination >Request< Was Filed for a Patent [R-7]

DETERMINING ON PALM IF A REEXAMINATION REQUEST HAS BEEN FILED FOR A GIVEN PATENT NUMBER

Both the Internet and the USPTO Intranet can be accessed to determine if a reexamination request has been filed for a particular patent.

A. Using the Internet

- Log on to the Internet.
- Go to USPTO Website located at http://www.uspto.gov.
- Click on the "Site Index" link.
- Click on the letter "E" in the index.
- Click on the link to the Electronic Business Center.
- Click on the "? Status & View Documents" link.
- Under "Patent Application Information Retrieval" in the "**>Search for Application<" box, change the item to "Patent Number" and enter the patent number (e.g., 5806063 – no commas are to be inserted) in the "Enter Number" box.
- Click on "*>SEARCH<."
- Click the "Continuity Data" button.
- Scroll to "Child Continuity Data" where any related reexamination will be listed. *Ex parte* reexaminations are identified by the unique "90" series code, e.g., 90/005,727. *Inter partes* reexaminations are identified by the unique "95" series code, e.g., 95/000,001.
- Clicking on the underlined (hyper linked) reexamination number will reveal the "Contents" for the reexamination file.

B. Using the USPTO Intranet

- From the USPTO Intranet site http://ptoweb/ptointranet/index.htm, Office personnel can click on "PALM" and then "General Information" which opens the PALM INTRANET General Information Display.
- From here, enter the patent number in the box labeled Patent #.

- Click on "Search" and when the "Patent Number Information" appears, click on "Continuity Data" to obtain the reexamination number.

Any reexamination for the patent number will be listed.

There will be about a ten (10) day lag between filing and data entry into the PALM database.

2633 Workflow [R-7]

After the reexamination file has been reviewed in the Central Reexamination Unit (CRU) to ensure that it is ready for examination, the reexamination proceeding will be assigned to an examiner.

In the event the **>CRU Supervisory Patent Examiner (SPE)< believes that another Art Unit within the CRU should examine the reexamination >file<, see MPEP § 2637 for procedures for transferring the reexamination >file<.

After the examiner receives the new *inter partes* reexamination file, the examiner will, no later than one week after receipt of the *inter partes* reexamination file, prepare for an initial consultation conference with the Reexamination Legal Advisor (RLA) and notify the *>CRU SPE< that he/she is ready for the conference and specify the days and times that he/she is available. The *>CRU SPE< will schedule the consultation conference with the RLA. At the scheduled conference, the consultation will be conducted with the examiner, a *>CRU SPE<, and the RLA being present. At the consultation conference, the RLA will provide instructions as to preparation of the decision on the request for *inter partes* reexamination and (where reexamination is granted) a first action which would accompany an order granting reexamination. The RLA provides guidance regarding the formalities governing the structure of the examiner's decision on the request for *inter partes* reexamination and accompanying first action. In the rare circumstances where a first action is not to be provided with the order granting reexamination (see MPEP § 2660), the RLA will so instruct the examiner. The consultation conference should be completed within two weeks of when the case was initially forwarded to the examiner.

After the consultation conference, the examiner will prepare a decision on the request for reexamination, and, where applicable, a first Office action to accompany the decision no later than two weeks from the date of the consultation conference (unless otherwise authorized by the CRU Director or a RLA). ** After the primary examiner signs the decision and/or action, the appropriate materials, e.g., copies of references as needed and a copy of the Office action for the patent owner and the third party requester, will be compiled and any needed copying will be performed by the CRU support staff. Thereafter, the reexamination file will be forwarded to the *>CRU SPE< for review. The *>CRU SPE< will then arrange for the decision and/or action to be **hand-carried** directly to the RLA.

The *>CRU SPE< will have one (1) week from the SPRE's receipt of the reexamination file from the examiner to perform the review, to obtain needed corrections, and to forward the reexamination file to the RLA. **At the very latest**, the decision and action prepared by the examiner must be forwarded to the RLA within nine (9) weeks of the filing date of the request (unless otherwise authorized by the CRU Director or a RLA). After the *>CRU SPE< approves the Office action, the examiner's decision and action are **hand-carried** directly to the RLA for a final review. The RLA performs a general review of the decision and action, and then the decision and action are mailed from the CRU. A transmittal form PTOL-501 with the third party requester's address will be completed, if a copy for mailing is not already available. The transmittal form PTOL-501 is used to forward copies of Office actions (and any references cited in the actions) to the third party requester. Whenever an Office action is issued, a copy of this form will be made and attached to a copy of the Office action. The use of this form removes the need to retype the third party requester's address each time a mailing is required. In conjunction with the mailing, any appropriate processing (e.g., PALM work, update scanning) is carried out by the staff of the CRU. Ordinarily, there is no counting of actions in a reexamination proceeding; all time spent on reexamination is reported as set forth in MPEP § 2638. Where the reexamination has been merged with a reissue (see MPEP § 2686.03), the merged proceeding will generally be conducted in the TC, and reissue counting will be done by the TC.

Upon receipt of a patent owner response to the action (and third party requester comments where permitted) by the CRU, or upon the expiration of the time to submit same, the examiner will be notified and the

reexamination file is messaged to the examiner. The examiner will review the response and comments, decide on a proposed course of action, consult with the RLA (with the *>CRU SPE or Technology Center (TC) Quality Assurance Specialist (QAS)< being present) and then prepare the appropriate action for the reexamination. The action will be reviewed and mailed as discussed above. Further prosecution and examination will follow in a similar manner. See MPEP § 2671.03 for panel review prior to issuing Office actions. See MPEP § 2676 for appeal conferences and MPEP § 2677 for Examiner's Answers.

2634 Fee Processing and Procedure [R-5]

All fees in an *inter partes* reexamination proceeding (including the fee for filing the request for *inter partes* reexamination (see MPEP § 2615)) are processed by the Central Reexamination Unit (CRU)**. The fees will be posted by the CRU via the Revenue Accounting and Managing (RAM) program.

In an *inter partes* reexamination proceeding, fees are due for the request (37 CFR 1.915(a)), for the addition of claims by the patent owner during the proceeding (excess claims fees under 37 CFR 1.20(c)(3) and (c)(4)), for an extension of time under 37 CFR 1.956, and for any appeal, brief, and oral hearing under 37 CFR 41.20(b). Any petitions filed under 37 CFR 1.137, 37 CFR 1.182 or 37 CFR 1.183 relating to a reexamination proceeding require fees (37 CFR1.17(f), (l) and (m)).

No fee is required for the issuance of a reexamination certificate.

Small entity reductions under 35 U.S.C. 41(h)(1) are available to the patent owner for appeal fees, brief fees, oral hearing fees, excess claims fees, and the petition fee under 37 CFR 1.958. Small entity reductions are available to the third party requester for appeal fees, brief fees, and oral hearing fees. Small entity reductions in fees are not available for the reexamination filing fee, for extension of time fees, nor for petition fees for petitions filed under 37 CFR 1.182 and 1.183.

When a fee is required in a merged proceeding, only a single fee is needed, even though multiple copies of the submissions (one for each file) are required. See MPEP § 2686.01.

2635 Record Systems [R-7]

The Patent Application Locating and Monitoring (PALM) system is used to support the reexamination process. The sections below delineate PALM related activities.

(A) *Reexamination File Data on PALM* - The routine PALM retrieval transactions are used to obtain data on reexamination files. From the USPTO Intranet site http://ptoweb/ptointranet/index.htm "PALM" and then "General Information" which opens the PALM INTRANET General Information Display. From here, enter the patent number in the box labeled Patent #. Then click on "Search" and when the "Patent Number Information" appears, click on "Continuity Data" to obtain the reexamination number.

(B) *Reexamination e-File* – The papers of a reexamination proceeding may be viewed on IFW. PALM provides information for the reexamination proceeding as to the patent owner and requester, contents, status, and related Office proceedings (applications, patents and reexamination proceedings). Some of the data entry for reexamination in PALM is different from that of a regular patent application. There are also differences in the status codes – all reexamination proceedings have status codes in the "400" or "800" range, while patent applications have status codes ranging from "020" to over "100."

(C) *Patent File Location Control for Patents Not Available on IFW, i.e., Available Only in Paper File* - The movement of paper patent files related to requests for reexamination throughout the Office is monitored by the PALM system in the normal fashion. The patent file will be charged to the examiner assigned the reexamination file, and the patent file will be kept in the examiner's office until the proceeding is concluded. After the reexamination proceeding has been concluded, the patent file should be forwarded by the examiner, via the **>Technology Center (TC) Quality Assurance Specialist (QAS) or the Central Reexamination Unit (CRU) Supervisory Patent Examiner (SPE) to the CRU support staff<. After review and processing in the CRU and by the Office of Patent Legal Administration as appropriate, the patent *>file< will be forwarded to the Office of *>Data Management<. The Office of *>Data Management< will forward the patent file to the Record Room after printing of the certificate.

(D) *Reporting Events to PALM* - The PALM system is used to monitor major events that take place in processing reexamination proceedings. All major examination events are reported. The mailing of examiner's actions are reported, as well as owner's responses and third party requester comments. The CRU support staff is responsible for reporting these events using the reexamination icon and window initiated in the PALM EXPO program. Events that will be reported include the following:

(1) Determination Mailed-Denial of request for reexamination;

(2) Determination Mailed-Grant of request for reexamination;

(3) Petition for reconsideration of determination received;

(4) Decision on petition mailed-Denied;

(5) Decision on petition mailed-Granted;

(6) Mailing of all examiner actions;

(7) Patent owner responses to Office Actions

(8) Third party requester comments after a patent owner response.

All events will be permanently recorded and displayed in the "Contents" portion of PALM. In addition, status representative of these events will also be displayed.

(E) *Status Reports* - Various weekly "tickler" reports can be generated for each TC, given the event reporting discussed above. The primary purpose of these computer outputs is to assure that reexaminations are, in fact, processed with "special dispatch".

2636 Assignment of Reexamination [R-7]

I. EXAMINER ASSIGNMENT OF THE REEXAMINATION PROCEEDING

Reexamination requests will normally be assigned to the Central Reexamination Unit (CRU) art unit which examines the technology (Chemical, Electrical, Mechanical, etc.) in which the patent to be reexamined is currently classified as an original. In that art unit, the **>Supervisory Patent Examiner (SPE)< assigns the reexamination request to a primary examiner, other than the examiner that originally examined the patent (see "Examiner Assignment Policy" below), who is most familiar with the claimed subject matter of the patent. **>In an extremely rare situation, where a proceeding is still in a Technology Center (TC) rather than the CRU, the reexamination may be assigned to an assistant examiner if no knowledgeable primary examiner is available.< In such an instance a primary examiner must sign all actions and take responsibility for all actions taken.

(A) Examiner Assignment Policy

It is the policy of the Office that the CRU *>SPE< will assign the reexamination request to an examiner different from the examiner(s) who examined the patent application. Thus, under normal circumstances, the reexamination request will not be assigned to a primary examiner or assistant examiner who was involved in any part of the examination of the patent for which reexamination is requested (e.g., by preparing/signing an action), or was so involved in the examination of the parent of the patent. This would preclude assignment of the request to an examiner who was a conferee in an appeal conference or panel review conference in an earlier concluded examination of the patent (e.g., the application for patent, a reissue, or a prior concluded reexamination proceeding). The conferee is considered to have participated in preparing the Office action which is preceded by the conference.

Exceptions to this general policy include cases where the original examiner is the only examiner with adequate knowledge of the relevant technology to examine the case. In the unusual case where there is a need to assign the request to the original examiner, the assignment must be approved by the CRU Director, and the fact that such approval was given by the CRU Director must be stated (by the examiner) in the decision on the request for reexamination.

It should be noted that while an examiner who examined an earlier **concluded** reexamination proceeding is generally excluded from assignment of a newly filed reexamination, *if the earlier reexamination is still **ongoing**, the same examiner **will be** assigned the new reexamination.*

Copending reissue and reexamination proceeding:

(1) When a reissue application is pending for a patent, and a reexamination request is filed for the same patent, the reexamination request is generally assigned to an examiner who did not examine the original patent application even though the examiner

who examined the patent application is handling the reissue application. If the reexamination request is granted and the reissue and reexamination proceedings are merged (see MPEP § 2686.03), the merged proceeding will be handled by *>a< TC examiner other than the examiner who examined the original patent application. *>In that instance<, the reissue application would be transferred (reassigned) from the originally assigned examiner.

(2) When a reexamination proceeding is pending for a patent, and a reissue application is filed for the same patent:

(a) Where reexamination has already been ordered (granted) in the reexamination proceeding, the Office of Patent Legal Administration (OPLA) should be notified, as promptly as possible after the reissue application reaches the TC, that the proceedings are ready for consideration of merger. If any of the reexamination file, the reissue application, and the patent file are paper files, they should be hand delivered to OPLA at the time of the notification to OPLA (see MPEP § 2686.03). If the reissue and reexamination proceedings are merged by OPLA, the reissue will generally be assigned in the TC having the reissue (upon return of the files from OPLA) to the TC examiner who would ordinarily handle the reissue application. However, if that examiner was involved in any part of the examination of the patent for which reexamination is requested (e.g., by preparing/signing an action), or was so involved in the examination of the parent application of the patent, a different TC examiner will be assigned. If the reissue and reexamination proceedings are not merged by OPLA, the decision will provide guidance as to assignment of the reissue proceeding depending on the individual fact situation.

(b) If reexamination has not yet been ordered (granted) in the reexamination proceeding, **>a TC Quality Assurance Specialist (QAS)< will ensure that the reissue application is not assigned nor acted on, and the decision on the reexamination request will be made. If reexamination is denied, the reexamination proceeding will be concluded pursuant to MPEP § 2694, and the reissue application assigned in accordance with MPEP § 1440. If reexamination is granted, a first Office action will not accompany the order granting reexamination. The signed order should be (after review by the CRU *>SPE<) promptly forwarded to the OPLA for mailing. At the same time, the OPLA should be notified that the proceedings are ready for consideration of merger. If any of the reexamination file, the reissue application, and the patent file are paper files, they should be hand delivered to OPLA at the time of the e-mail notification to OPLA (see MPEP § 2686.03). If the reissue and reexamination proceedings are merged by OPLA, the reissue application will generally be assigned in the TC having the reissue (upon return of the files from OPLA) to the TC examiner who ordinarily handle the reissue application. However, if that examiner was involved in any part of the examination of the patent for which reexamination is requested (e.g., by preparing/signing the action), or was so involved in examination of the parent application of the patent, a different TC examiner will be assigned. If the reissue and reexamination proceedings are not merged by OPLA, the decision will provide guidance as to assignment of the reissue proceeding depending on the individual fact situation.

(B) Consequences of Inadvertent Assignment to an "Original Examiner"

Should a reexamination be inadvertently assigned to an "original examiner" (in a situation where the TC or CRU Director's approval is not stated in the decision on the request), the patent owner or the third party requester who objects must promptly file a paper alerting the Office of this fact. Any request challenging the assignment of an examiner to the case must be made within two months of the first Office action or other Office communication indicating the examiner assignment, or reassignment will not be considered. Reassignment of the reexamination to a different examiner will be addressed on a case-by-case basis. In no event will the assignment to the original examiner, by itself, be grounds for vacating any Office decision(s) or action(s) and "restarting" the reexamination.

A situation may arise where a party timely (i.e., within the two months noted above) files a paper alerting the Office to the assignment of a reexamination to the "original examiner," but that paper does not have a right of entry under the rules (e.g., where an order granting reexamination was issued by the "original examiner" but a first action on the merits did not accompany the order, the patent owner timely files a paper alerting the Office of the fact that the "original

examiner" has been assigned the reexamination proceeding. Pursuant to 37 CFR 1.939(b), that paper does not have a right of entry since a first Office action on the merits has not yet been issued.) In such situations, the Office may waive the rules to the extent that the paper directed to the examiner assignment will be entered and considered.

II. MECHANICS OF ASSIGNMENT

When a request for reexamination is received in the Office, it will be processed by the CRU support staff. After the case file has been reviewed in the CRU to ensure it is ready for examination, the CRU support staff will docket the case to the examiner assigned to the reexamination proceeding by the *>CRU SPE<.

In the event the *>CRU SPE< believes that another Art Unit should examine the case, see MPEP § 2637 for procedures for transferring the case.

2637 Transfer Procedure [R-7]

Although the number of reexamination requests which must be transferred should be very small, the following procedures have been established for an expeditious resolution of any such problems.

An *inter partes* reexamination request is normally assigned to the Central Reexamination (CRU) art unit which examines the technology (Chemical, Electrical, Mechanical, etc.) in which the patent to be reexamined is currently classified as an original. If the CRU **>Supervisory Patent Examiner (SPE)< (to whose art unit the reexamination has been assigned) believes that the reexamination should be assigned to another art unit, he or she must obtain the consent of the CRU *>SPE< of the art unit to which a transfer is desired. Pursuant to 35 U.S.C. 314(c), all *inter partes* reexamination proceedings must be conducted with special dispatch within the Office. This applies to the transfer of reexamination proceedings. Accordingly, the CRU *>SPE< to whose art unit the reexamination has been assigned should expeditiously make any request for transfer of a reexamination proceeding to the CRU *>SPE< of the art unit to which a transfer is desired (the "new" art unit). Further, the CRU *>SPE< to whose art unit the reexamination has been assigned should hand-carry any paper patent file for the reexamination proceeding to the SPE of the art unit to which a transfer is desired. Any conflict which cannot be resolved by the *>SPEs< will be resolved by the CRU Director.

If the "new" art unit accepts assignment of the reexamination request, the "new" CRU *>SPE< assigns the request to an examiner in that unit.

2638 Time Reporting [R-7]

**>Reexamination fees are based on full cost recovery, and it is essential that all time expended on reexamination activities be reported accurately. Thus, all USPTO personnel should report all time spent on reexamination on their individual Time and Attendance Reports. Even activities such as supervision, copying, typing, and docketing should be included.<

2640 Decision on Request [R-7]

35 U.S.C. 312. Determination of issue by Director

(a) REEXAMINATION.— Not later than 3 months after the filing of a request for inter partes reexamination under section 311, the Director shall determine whether a substantial new question of patentability affecting any claim of the patent concerned is raised by the request, with or without consideration of other patents or printed publications. The existence of a substantial new question of patentability is not precluded by the fact that a patent or printed publication was previously cited by or to the Office or considered by the Office.

(b) RECORD.— A record of the Director's determination under subsection (a) shall be placed in the official file of the patent, and a copy shall be promptly given or mailed to the owner of record of the patent and to the third-party requester.

(c) FINAL DECISION.— A determination by the Director under subsection (a) shall be final and non-appealable. Upon a determination that no substantial new question of patentability has been raised, the Director may refund a portion of the inter partes reexamination fee required under section 311.

37 CFR 1.923. Examiner's determination on the request for inter partes reexamination.

**>Within three months following the filing date of a request for *inter partes* reexamination under § 1.915, the examiner will consider the request and determine whether or not a substantial new question of patentability affecting any claim of the patent is raised by the request and the prior art citation. The examiner's determination will be based on the claims in effect at the time of the determination, will become a part of the official file of the patent, and will be mailed to the patent owner at the address as provided for in § 1.33(c) and to the third party requester. If the examiner determines that no substantial new question of patentability is present, the examiner shall refuse the request and shall not order *inter partes* reexamination.<

37 CFR 1.925. Partial refund if request for inter partes reexamination is not ordered.

Where *inter partes* reexamination is not ordered, a refund of a portion of the fee for requesting *inter partes* reexamination will be made to the requester in accordance with § 1.26(c).

37 CFR 1.927. Petition to review refusal to order inter partes reexamination

The third party requester may seek review by a petition to the Director under § 1.181 within one month of the mailing date of the examiner's determination refusing to order *inter partes* reexamination. Any such petition must comply with § 1.181(b). If no petition is timely filed or if the decision on petition affirms that no substantial new question of patentability has been raised, the determination shall be final and nonappealable.

Prior to making a determination on the request for reexamination, the examiner must request a litigation * search by the Scientific and Technical Information Center (STIC) to check if the patent has been, or is, involved in litigation. A copy of the STIC search is scanned into the IFW reexamination file history. The "Litigation Review" box on the reexamination IFW file jacket form is completed to indicate that the review was conducted and the results thereof, and the reexamination file jacket form is then scanned into the IFW reexamination file history. In the rare instance where the record of the reexamination proceeding or the STIC search indicates that additional information is desirable, guidance as to making an additional litigation search may be obtained from the library of the Office of the Solicitor. If the patent is or was involved in litigation, and a paper referring to the Court proceeding has been filed, reference to the paper by number should be made in the "Litigation Review" box of the IFW file jacket form as, for example, "litigation; see paper filed 7-14-2005." If a litigation records search is already noted on the file, the examiner need not repeat or update it.

If litigation has concluded or is taking place in the patent on which a request for reexamination has been filed, the request must be promptly brought to the attention of the Reexamination Legal Advisor assigned to the case who should review the decision on the request and any examiner's action to ensure conformance to the current Office litigation policy and guidelines. See MPEP § 2686.04.

35 U.S.C. 312 requires that the Director of the Office determine whether or not a "substantial new question of patentability" affecting any claim of the patent of which reexamination is desired, is raised in the request not later than 3 months after the filing date of a request. See also MPEP § 2641. Such a determination may be made with or without consideration of other patents or printed publications in addition to those cited in the request. No input from the patent owner is considered prior to the determination. See *Patlex v. Mossinghoff*, 771 F.2d 480, 226 USPQ 985 (Fed. Cir. 1985).

The patent claims in effect at the time of the determination will be the basis for deciding whether a substantial new question of patentability has been raised (37 CFR 1.923). See MPEP § 2643. Amendments which (A) have been filed in a copending reexamination proceeding in which the reexamination certificate has not been issued, or (B) have been submitted in a reissue application on which no reissue patent has been issued, will not be considered or commented upon when deciding a request for reexamination.

The decision on the request for reexamination has as its main object either the granting or denial of the request for reexamination. This decision is based on whether or not "a substantial new question of patentability" is found. A **>determination as to patentability/unpatentability< of the claims is **not** made in the decision >on the request<; rather, it is made later, during the examination stage of the reexamination proceeding >if reexamination is ordered<. Accordingly, no *prima facie* case of unpatentability need be found to grant an order for reexamination. >If a decision to deny an order for reexamination is made, the requester may seek review by a petition under 37 CFR 1.181. See 37 CFR 1.927.< It should be noted that a decision to deny the request for reexamination is equivalent to a final holding (subject >only< to a petition pursuant to 37 CFR 1.927 for review of the denial), that the **>request failed to raise a substantial new question of patentability based on< the cited art (patents and printed publications).

Where there have been prior decisions relating to the patent, see MPEP § 2642.

It is only necessary to establish that a substantial new question of patentability exists as to one of the patent claims in order to grant reexamination. The Office's determination in both the order for reexamination and the examination stage of the reexamination will generally be limited solely to a review of the claim(s) for which reexamination was requested. If the requester was interested in having all of the claims

reexamined, requester had the opportunity to include them in its request for reexamination. However, if the requester chose not to do so, those claim(s) for which reexamination was not requested will generally not be reexamined by the Office. It is further noted that 35 U.S.C. 311(b)(2) requires that a requester "set forth the pertinency and manner of applying cited prior art to every claim for which reexamination is requested." If the requester fails to apply the art to certain claims, then the requester is not statutorily entitled to reexamination of such claims. If a request fails to set forth the pertinency and manner of applying the cited art to any claim for which reexamination is requested as required by 37 CFR 1.915(b), that claim will generally not be reexamined. The decision to reexamine any claim for which reexamination has not been requested lies within the sole discretion of the Office, to be exercised based on the individual facts and situation of each individual case. If the Office chooses to reexamine any claim for which reexamination has not been requested, it is permitted to do so. In addition, the Office may always initiate a reexamination on its own initiative of the non-requested claim (35 U.S.C. 303(a)). See *Sony Computer Entertainment America Inc. v. Dudas*, **>85 USPQ2d 1594 (E.D. Va 2006). It is to be noted that if a request fails to set forth the pertinency and manner of applying the cited art to any claim for which reexamination is requested as required by 37 CFR 1.915, a filing date will not be awarded to the request. See MPEP § 2617 and § 2627.<

One instance where reexamination was carried out only for the claims requested occurred in reexamination control numbers 95/000,093 and 95/000,094, where reexamination was requested for patent claims which were being litigated, but not for claims which were not being litigated. In that instance, the entirety of the reexamination was limited to the claims which were being litigated, for which reexamination was requested. The Office's authority to carry out reexamination only for the claims for which reexamination was requested in reexamination control numbers 95/000,093 and 95/000,094 was confirmed by the court in *Sony*, *supra*. See MPEP § 2642 for the situation where there was a prior final federal court decision as to the invalidity/unenforceability of some of the claims, as another example of non-examination of some of the patent claims in a reexamination proceeding.

The decision on the request for reexamination should discuss all of the patent claims requested for reexamination. The examiner should limit the discussion of those claims in the order for reexamination as to whether a substantial new question of patentability has been raised. The examiner SHOULD NOT reject claims in the order for reexamination. Rather, any rejection of the claims will be made in the first Office action that normally will accompany the order for reexamination. See MPEP § 2660.

The Director of the Office has the authority to order reexamination only for a request which raises a substantial new question of patentability. The substantial new question of patentability requirement protects patentees from having to respond to, or participate in, unjustified reexaminations. See *Patlex v. Mossinghoff*, 771 F.2d 480, 226 USPQ 985, 989 (Fed. Cir. 1985).

I. REQUEST FOR REEXAMINATION OF THE PATENT AFTER REISSUE OF THE PATENT

Where a request for reexamination is filed on a patent after a reissue patent for that patent has already issued, reexamination will be denied, because the patent on which the request for reexamination is based has been surrendered. Should reexamination of the reissued patent be desired, a new request for reexamination, including and based on the specification and claims of the reissue patent, must be filed. Where the reissue patent issues after the filing of a request for reexamination, see MPEP § 2686.03.

II. SECOND OR SUBSEQUENT REQUEST FILED DURING REEXAMINATION

See MPEP § 2686.01 for a comprehensive discussion of the situation where a first reexamination is pending at the time a second or subsequent request for reexamination is to be decided, and one of the two is an *inter partes* reexamination. The present subsection merely provides guidance on the standard for the substantial new question of patentability to be applied in the decision on the second or subsequent request.

If a second or subsequent request for reexamination is filed (by any party permitted to do so) while a first reexamination is pending, the presence of a substantial new question of patentability depends on the art

(patents and printed publications) cited by the second or subsequent request. The cited art will be reviewed for a substantial new question of patentability based on the following guidelines:

A. If one of the two reexaminations is an inter partes reexamination, the following possibilities exist:

(1) An ordered *inter partes* reexamination is pending, and an *ex parte* reexamination request is subsequently filed.

(2) An ordered *inter partes* reexamination is pending, and an *inter partes* reexamination request is subsequently filed.

(3) An ordered *ex parte* reexamination is pending, and an *inter partes* reexamination request is subsequently filed.

In all three instances, if the subsequent request includes the art which raised a substantial new question in the earlier pending reexamination, then reexamination should be ordered only if the art cited raises a substantial new question of patentability which is different from that raised in the earlier pending reexamination. If the art cited in the subsequent request raises the same substantial new question of patentability as that raised in the earlier pending reexamination, the subsequent request should be denied. Where the request raises a different substantial new question of patentability as to some patent claims, but not as to others, the request would be granted in part; see the order issued in reexamination control number 90/007,843 and 90/007,844. If the subsequent request does **not** include the art which raised the substantial new question of patentability in the earlier pending reexamination, reexamination may or may not be ordered, depending on whether the different art cited raises a substantial new question of patentability.

The second or subsequent request for reexamination may *>provide information raising< a substantial new question of patentability with respect to any new or amended claim which has been proposed in the first (or prior) pending reexamination proceeding. **>However, in order for the second or subsequent request for reexamination to be granted, the second or subsequent requester must independently provide a substantial new question of patentability which is **different from** that raised in the pending reexamination for **the claims in effect at the time of the determination**. The decision on the second or subsequent request is thus based on the claims in effect at the time of the determination (37 CFR 1.923). If a "different" substantial new question of patentability is not provided by the second or subsequent request for the claims in effect at the time of the determination, the second or subsequent request for reexamination must be denied since the Office is only authorized by statute to grant a reexamination proceeding based on a substantial new question of patentability "affecting any claim of the patent." See 35 U.S.C. 312(a). Accordingly, there must be at least one substantial new question of patentability established for the existing claims in the patent in order to grant reexamination.

Once the second or subsequent request has provided a "different" substantial new question of patentability based on the claims in effect at the time of the determination, the second or subsequent request for reexamination may also provide information< directed to any proposed new or amended claim in the pending reexamination, to permit examination of the entire patent package. *>The information directed to a proposed new or amended claim in the pending reexamination is addressed during the later filed reexamination (where a substantial new question of patentability is raised in the later filed request for reexamination for the existing claims in the patent), in order to permit examination of the entire patent package. When a proper basis for the second or subsequent request for reexamination is established, it< would be a waste of resources to prevent addressing the proposed new or amended claims, by requiring parties to wait until the certificate issues for the proposed new or amended claims, and only then to file a new reexamination request challenging the claims as revised via the certificate. This also prevents a patent owner from simply amending all the claims in some nominal fashion to preclude a subsequent reexamination request during the pendency of the reexamination proceeding.

Where reexamination is granted on a second or subsequent request, but the patent owner can clearly show that the second or subsequent request was filed for purposes of harassment, the patent owner *can petition under* 37 CFR 1.182 that the second or subsequent request should be suspended. If such a petition is granted, prosecution on the second or subsequent

reexamination would be suspended until conclusion of proceedings in the first reexamination. In such an instance, merger of the second (or subsequent) reexamination with the first would unduly prolong the conclusion of the pending reexamination and be inconsistent with the requirement that the reexamination proceeding be conducted with special dispatch.

Where an ordered *inter partes* reexamination is pending, and an *inter partes* reexamination request is subsequently filed, the prohibition provision of 37 CFR 1.907(a) must be borne in mind. Once an order for *inter partes* reexamination has been issued, neither the third party requester of the *inter partes* reexamination, nor its privies, may file a subsequent request for *inter partes* reexamination of the same patent until an *inter partes* reexamination certificate has been issued, unless expressly authorized by the Director of the Office. Note that 37 CFR 1.907(a) tracks the statutory provision of 35 U.S.C. 317(a). A petition for such express authorization is a request for extraordinary relief and will not be granted where there is a more conventional avenue to accomplish the same purpose and provide relief analogous to that requested. See also *Cantello v. Rasmussen*, 220 USPQ 664 (Comm'r Pat. 1982) for the principle that extraordinary relief will not normally be considered if the rules provide an avenue for obtaining the relief sought.

>For additional treatment of cases in which either the first or subsequent request for examination, or both, is/are an *inter partes* reexamination proceeding, see MPEP § 2640 and § 2686.01.

For additional treatment of cases in which a first *ex parte* reexamination is pending at the time a second or subsequent request for *ex parte* reexamination is to be decided, see MPEP § 2283.<

2641 Time for Deciding Request [R-7]

The determination of whether or not to reexamine must be made (completed and mailed) not later than three (3) months after the filing date of a request. See 35 U.S.C. 312(a) and 37 CFR 1.923. *If the 3-month period ends on a Saturday, Sunday or Federal holiday within the District of Columbia*, then the determination must be mailed by the ***preceding*** business day.

Generally, the Central Reexamination Unit (CRU) forwards the *inter partes* reexamination case to the examiner within two (2) weeks of the filing date of the request.

(A) The examiner has one (1) week from his/her receipt of the reexamination to prepare for an initial consultation conference with a Reexamination Legal Advisor (RLA).

After the consultation with the RLA, the examiner has two (2) weeks from the date of the consultation conference to prepare the decision on the request and an Office action (if reexamination is granted), and forwards the reexamination to the **>CRU Supervisory Patent Examiner (SPE)<.

The decision and the action will be reviewed by the *>CRU SPE< and the reexamination file along with the decision and action will be forwarded (hand carried) to the RLA.

(B) **At the very latest**, the decision and action prepared by the examiner must be hand carried by the SPRE to the RLA within nine (9) weeks from the filing date of the request (unless otherwise authorized by the CRU Director or a RLA).

(C) It should be noted that the first Office action ordinarily accompanies an order for reexamination; however, if the issuance of the first Office action would delay the order to the extent that a critical deadline will not be met, the order will be mailed and the first action will follow in due course, as per the guidance set forth in MPEP § 2660.

2642 Criteria for Deciding Request [R-7]

I. SUBSTANTIAL NEW QUESTION OF PATENTABILITY

The presence or absence of "a substantial new question of patentability" determines whether or not reexamination is ordered. The meaning and scope of the term "a substantial new question of patentability" is not defined in the statute and must be developed to some extent on a case-by-case basis, using the case law to provide guidance as will be discussed in this section.

If the prior art patents and printed publications raise a substantial question of patentability of at least one claim of the patent, then a substantial new question of patentability is present, unless the same question of patentability has already been decided by (A) a final holding of invalidity, after all appeals, or (B) by the Office in a previous examination or pending reexamination of the patent. A "previous examination" of the patent is: (A) the original examination of the

application which matured into the patent; (B) the examination of the patent in a reissue application that has resulted in a reissue of the patent; or (C) the examination of the patent in an earlier pending or concluded reexamination. The answer to the question of whether a "substantial new question of patentability" exists, and therefore whether reexamination may be had, is decided by the Director of the Office, and as 35 U.S.C. 312(c) provides, that determination is final, i.e., not subject to appeal on the merits of the decision. See *In re Etter*, 756 F.2d 852, 225 USPQ 1 (Fed. Cir. 1985) which was decided for the *ex parte* reexamination statute (note that 35 U.S.C. 312(c) for the *inter partes* reexamination statute contains the same language as 35 U.S.C. 303(c) for *ex parte* reexamination). But see *Heinl v. Godici*, 143 F.Supp.2d 593, 596-98 (E.D. Va. 2001) (35 U.S.C. 303 addresses only USPTO decisions to deny a request for reexamination and does not bar review of *ultra vires* USPTO decisions to grant reexamination requests. However, a decision to grant a reexamination request is not a final agency decision and is not ordinarily subject to judicial review.).

A prior art patent or printed publication raises a substantial question of patentability where there is a substantial likelihood that a reasonable examiner would consider the prior art patent or printed publication **important** in deciding whether or not the claim is patentable. If the prior art patents and/or publications would be considered important, then the examiner should find "a substantial new question of patentability" unless the same question of patentability has already been decided as to the claim in a final holding of invalidity by the Federal court system or by the Office in a previous examination. For example, the same question of patentability may have already been decided by the Office where the examiner finds the additional (newly provided) prior art patents or printed publications to be merely cumulative to similar prior art already fully considered by the Office in a previous examination of the claim.

Accordingly, for "a substantial new question of patentability" to be present, it is only necessary that:

(A) The prior art patents and/or printed publications raise a substantial question of patentability regarding at least one claim, i.e., the teaching of the prior art patents and printed publications is such that a reasonable examiner would consider the teaching to be **important** in deciding whether or not the claim is patentable; and

(B) The same question of patentability as to the claim has not been decided by the Office in a previous examination or pending reexamination of the patent or in a final holding of invalidity by the Federal Courts in a decision on the merits involving the claim.

It is not necessary that a *"prima facie"* case of unpatentability exist as to the claim in order for "a substantial new question of patentability" to be present as to the claim. Thus, "a substantial new question of patentability" as to a patent claim could be present even if the examiner would not necessarily reject the claim as either anticipated by, or obvious in view of, the prior art patents or printed publications. The difference between "a substantial new question of patentability" and a *"prima facie"* case of unpatentability is important. See generally *In re Etter*, 756 F.2d 852, 857 n.5, 225 USPQ 1, 4 n.5 (Fed. Cir. 1985).

>Note that the clarification of the legal standard for determining obviousness under 35 U.S.C. 103 in *KSR International Co. v. Teleflex Inc.(KSR)*, 550 U.S. ____, 82 USPQ2d 1385 (2007) does not alter the legal standard for determining whether a substantial new question of patentability exists. See the discussion in MPEP § 2616.< It should be >also< noted that the "substantial new question of patentability" standard for granting reexamination on a request for an *inter partes* reexamination is the same as the "substantial new question of patentability" standard for granting reexamination on a request for an *ex parte* reexamination.

Where a >second or subsequent< request for reexamination of a patent is made before the conclusion of an earlier filed reexamination proceeding pending (ongoing) for that patent, **>the second or subsequent request for reexamination may provide information raising a substantial new question of patentability with respect to any new or amended claim which has been proposed under 37 CFR 1.530(d) in the ongoing pending reexamination proceeding. However, in order for the second or subsequent request for reexamination to be granted, the second or subsequent requester must independently provide a substantial new question of patentability which is **different from** that raised in the pending reexamination for **the claims in effect at the time of the determination**. The decision

on the second or subsequent request is thus based on the claims in effect at the time of the determination (37 CFR 1.923). If a "different" substantial new question of patentability is not provided by the second or subsequent request for the claims in effect at the time of the determination, the second or subsequent request for reexamination must be denied since the Office is only authorized by statute to grant a reexamination proceeding based on a substantial new question of patentability "affecting any claim of the patent." See 35 U.S.C. 312. Accordingly, there must be at least one substantial new question of patentability established for the existing claims in the patent in order to grant reexamination.

Once the second or subsequent request has provided a "different" substantial new question of patentability based on the claims in effect at the time of the determination, the second or subsequent request for reexamination may also provide information directed to any proposed new or amended claim in the pending reexamination, to permit examination of the entire patent package. The information directed to a proposed new or amended claim in the pending reexamination is addressed during the later filed reexamination (where a substantial new question is raised in the later reexamination for the existing claims in the patent), in order to permit examination of the entire patent package. When a proper basis for the subsequent reexamination is established, it would be a waste of resources to prevent addressing the proposed new or amended claims, by requiring parties to wait until the certificate issues for the proposed new or amended claims, and only then to file a new reexamination request challenging the claims as revised via the certificate. This also prevents a patent owner from simply amending all the claims in some nominal fashion to preclude a subsequent reexamination request during the pendency of the reexamination proceeding.<

II. POLICY IN SPECIFIC SITUATIONS

In order to further clarify the meaning of "a substantial new question of patentability," certain situations are outlined below which, if present, should be considered when making a decision as to whether or not "a substantial new question of patentability" is present.

A. Prior Favorable Decisions by the U.S. Patent and Trademark Office on the Same or Substantially Identical Prior Art in Relation to the Same Patent.

A "substantial new question of patentability" is not raised by the prior art if the Office has previously considered (in an earlier examination of the patent) the same question of patentability as to a patent claim favorable to the patent owner based on the same prior art patents or printed publications. *In re Recreative Technologies*, 83 F.3d 1394, 38 USPQ2d 1776 (Fed. Cir. 1996).

In deciding whether to grant a request for reexamination of a patent, the examiner should check the patent's file history to ascertain whether any of the prior art now advanced by requester *was* previously cited/considered in an earlier Office examination of the patent (e.g., in the examination of the application for the patent, or in a concluded or pending reexamination proceeding). For the sake of expediency, such art is referred to as "old art" throughout, since the term "old art" was coined by the Federal Circuit in its decision of *In re Hiniker Co.*, 150 F.3d 1362, 1365-66, 47 USPQ2d 1523, 1526 (Fed. Cir. 1998).

In a decision to order reexamination made on or after November 2, 2002, reliance on old art does not necessarily preclude the existence of a substantial new question of patentability * that is based exclusively on that old art. See Public Law 107-273, 116 Stat. 1758, 1899-1906 (2002), which expanded the scope of what qualifies for a substantial new question of patentability upon which a reexamination may be based. Determinations on whether a *>substantial new question of patentability< exists in such an instance shall be based upon a fact-specific inquiry done on a case-by-case basis. For example, a *>substantial new question of patentability< may be based solely on old art where the old art is being presented/viewed in a new light, or in a different way, as compared with its use in the earlier * examination(s), in view of a material new argument or interpretation presented in the request.

When it is determined that a *>substantial new question of patentability< based solely on old art is raised, form paragraph 22.01.01 should be included in the order for reexamination.

¶ *22.01.01 Criteria for Applying "Old Art" as Sole Basis for Reexamination*

The above **[1]** is based solely on patents and/or printed publications already cited/considered in an earlier concluded examination of the patent being reexamined. On November 2, 2002, Public Law 107-273 was enacted. Title III, Subtitle A, Section 13105, part (a) of the Act revised the reexamination statute by adding the following new last sentence to 35 U.S.C. 303(a) and 312(a):

> "The existence of a substantial new question of patentability is not precluded by the fact that a patent or printed publication was previously cited by or to the Office or considered by the Office."

For any reexamination ordered on or after November 2, 2002, the effective date of the statutory revision, reliance on previously cited/considered art, i.e., "old art," does not necessarily preclude the existence of a substantial new question of patentability (SNQ) that is based exclusively on that old art. Rather, determinations on whether a SNQ exists in such an instance shall be based upon a fact-specific inquiry done on a case-by-case basis.

In the present instance, there exists a SNQ based solely on **[2]**. A discussion of the specifics now follows:

[3]

Examiner Note:

1. In bracket 1, insert "substantial new question of patentability" if the present form paragraph is used in an order granting reexamination (or a TC or CRU Director's decision on petition of the denial of reexamination). If this form paragraph is used in an Office action, insert "ground of rejection".

2. In bracket 2, insert the old art that is being applied as the sole basis of the SNQ. For example, "the patent to Schor" or "the patent to Schor when taken with the Jones publication" or "the combination of the patent to Schor and the Smith publication" could be inserted. Where more than one SNQ is presented based solely on old art, the examiner would insert all such bases for SNQ.

3. In bracket 3, for each basis identified in bracket 2, explain how and why that fact situation applies in the proceeding being acted on. The explanation could be for example that the old art is being presented/viewed in a new light, or in a different way, as compared with its use in the earlier concluded examination(s), in view of a material new argument or interpretation presented in the request. See *Ex parte Chicago Rawhide Mfg. Co.*, 223 USPQ 351 (Bd. Pat. App. & Inter. 1984).

4. This form paragraph is only used the first time the "already cited/considered" art is applied, and is not repeated for the same art in subsequent Office actions.

See MPEP § 2258.01 for a discussion of the use of "old art" in the examination stage of an ordered reexamination (as a basis for rejecting patent claims).

B. Prior Adverse Decisions by the Office on the Same or Substantially Identical Prior Art in the Same Patent.

A prior decision adverse to the patentability of a claim of a patent by the Office based upon prior art patents or printed publications would usually mean that "a substantially new question of patentability" is present. Such an adverse decision by the Office could arise from a reissue application which was abandoned after rejection of the claim and without disclaiming the patent claim.

C. Prior Adverse Reissue Application Final Decision by the Director of the Office or the Board of Patent Appeals and Interferences Based Upon Grounds Other Than Patents or Printed Publications.

Any prior adverse final decision by the Director of the Office, or the Board of Patent Appeals and Interferences, on an application seeking to reissue the same patent on which reexamination is requested will be considered by the examiner when determining whether or not a "substantial new question of patentability" is present. *>However, to< the extent that such prior adverse final decision was based upon grounds other than patents or printed publications, the prior adverse final decision will not be considered in determining whether or not a "substantial new question of patentability" is present.

D. Prior Favorable or Adverse Decisions on the Same or Substantially Identical Prior Art Patents or Printed Publications in Other Cases not Involving the Patent.

While the Office would consider decisions involving substantially identical patents or printed publications in determining whether a "substantial new question of patentability" is raised, the weight to be given such decisions will depend upon the circumstances.
*>

III. < POLICY WHERE A FEDERAL COURT DECISION HAS BEEN ISSUED ON THE PATENT

As to A - C which follow, see *Ethicon v. Quigg*, 849 F.2d 1422, 7 USPQ2d 1152 (Fed. Cir. 1988).

A. Final Holding of Validity by the Courts.

When the initial question as to whether the prior art raises a substantial new question of patentability as to a patent claim is under consideration, the existence of a final court decision of claim *validity* in view of the same or different prior art does not necessarily mean that no new question is present, because of the different standards of proof employed by the Federal District Courts and the Office. While the Office may accord deference to factual findings made by the court, the determination of whether a substantial new question of patentability exists will be made independently of the court's decision on validity, because it is not controlling on the Office.

B. Non-final Holding of Invalidity or Unenforceability by the Courts.

A *non-final* holding of claim invalidity or unenforceability will not be controlling on the question of whether a substantial new question of patentability is present.

C. Final Holding of Invalidity or Unenforceability by the Courts.

A final holding of claim invalidity or unenforceability, after all appeals, is controlling on the Office. In such cases, a substantial new question of patentability would not be present as to the claims finally held invalid or unenforceable.

Note: Any situations requiring clarification should be brought to the attention of the Office of Patent Legal Administration.

2643 Claims Considered in Deciding Request [R-7]

The claims >of the patent< in effect at the time of the determination will be the basis for deciding whether "a substantial new question of patentability" is present. 37 CFR 1.923. The Office's determination in both the order for reexamination and the examination stage of the reexamination will generally be limited solely to a review of the claim(s) for which reexamination was requested. If the requester was interested in having all of the claims reexamined, requester had the opportunity to include them in its request for reexamination. However, if the requester chose not to do so, those claim(s) for which reexamination was not requested will generally not be reexamined by the Office. It is further noted that 35 U.S.C. 311(b)(2) requires that a requester "set forth the pertinency and manner of applying cited prior art to every claim for which reexamination is requested." If requester fails to apply the art to certain claims, requester is not statutorily entitled to reexamination of such claims. If a request fails to set forth the pertinency and manner of applying the cited art to any claim for which reexamination is requested as required by 37 CFR 1.915(b), that claim will generally not be reexamined. The decision to reexamine any claim for which reexamination has not been requested lies within the sole discretion of the Office, to be exercised based on the individual facts and situation of each individual case. If the Office chooses to reexamine any claim for which reexamination has not been requested, it is permitted to do so, since the Office may always initiate a reexamination on its own initiative of the non-requested claim (35 U.S.C. 303(a)). Thus, while the examiner will ordinarily concentrate on those claims for which reexamination is requested, the finding of "a substantial new question of patentability" can be based upon a claim of the patent other than the ones for which reexamination is requested. For example, the request might seek reexamination of particular claims only (i.e., claims 1-4), but the examiner is not limited to those claims. The examiner can make a determination that "a substantial new question of patentability" is present as to other claims in the patent (i.e., claims 5-7), without necessarily finding "a substantial new question" with regard to the claims requested (i.e., claims 1-4).

The decision on the request for reexamination should discuss all of the patent claims requested for reexamination. The examiner should limit the discussion of those claims in the order for reexamination as to whether a substantial new question of patentability has been raised.

See MPEP § 2642 for a discussion of patent claims which have been the subject of a prior decision.

Amendments and/or new claims present in any copending reexamination or reissue proceeding for the patent to be reexamined will *>not< (see MPEP § 2640, subsection II.(A)) * be considered nor commented upon when deciding a request for reexamination. Where a request for reexamination is granted and reexamination is ordered, the first Office action

(which ordinarily accompanies the order) and any subsequent reexamination prosecution should be on the basis of the claims as amended by any copending reexamination or reissue proceeding.

2644 Prior Art on Which the Determination Is Based [Added R-2]

The determination of whether or not "a substantial new question of patentability" is present can be based upon any prior art patents or printed publications. 35 U.S.C. 312(a) provides that the determination on a request will be made "with or without consideration of other patents or printed publications," i.e., other than those relied upon in the request. The examiner is not limited in making the determination based on the patents and printed publications relied upon in the request. The examiner can find "a substantial new question of patentability" based upon the prior art patents or printed publications relied upon in the request, a combination of the prior art relied upon in the request and other prior art found elsewhere, or based entirely on different patents or printed publications. The primary source of patents and printed publications used in making the determination are those relied on in the request. For reexamination ordered on or after November 2, 2002, see MPEP § 2642, subsection II.A. for a discussion of "old art." The examiner can also consider any patents and printed publications of record in the patent file from submissions under 37 CFR 1.501 which are in compliance with 37 CFR 1.98 in making the determination. If the examiner believes that additional prior art patents and publications can be readily obtained by searching to supply any deficiencies in the prior art cited in the request, the examiner can perform such an additional search. Such a search should be limited to that area most likely to contain the deficiency of the prior art previously considered and should be made only where there is a reasonable likelihood that prior art can be found to supply any deficiency necessary to "a substantial new question of patentability."

The determination should be made on the claims in effect at the time the determination is made. 37 CFR 1.923.

2646 Decision Ordering Reexamination [R-7]

35 U.S.C. 313. Inter partes reexamination order by Director

If, in a determination made under section 312(a), the Director finds that a substantial new question of patentability affecting a claim of a patent is raised, the determination shall include an order for inter partes reexamination of the patent for resolution of the question. The order may be accompanied by the initial action of the Patent and Trademark Office on the merits of the inter partes reexamination conducted in accordance with section 314.

37 CFR 1.931. Order for inter partes reexamination

(a) If a substantial new question of patentability is found, the determination will include an order for *inter partes* reexamination of the patent for resolution of the question.

(b) If the order for *inter partes* reexamination resulted from a petition pursuant to § 1.927, the *inter partes* reexamination will ordinarily be conducted by an examiner other than the examiner responsible for the initial determination under § 1.923.

If a request for reexamination is granted, the examiner's decision granting the request will conclude that a substantial new question of patentability has been raised by (A) identifying all claims and issues, (B) identifying the patents and/or printed publications relied upon, and (C) providing a brief statement of the rationale supporting each new question.

In the examiner's decision, the examiner must identify at least one substantial new question of patentability and explain how the prior art patents and/or printed publications raise that question. In a simple case, this may entail adoption of the reasons provided by the third party requester. The references relied on by the examiner should be cited on a PTO-892 form, unless already listed on a form PTO/SB/08A or 08B, or PTO/SB/42 (or on a form having a format equivalent to one of these forms) submitted by the third party requester. A copy of the reference should be supplied only where it has not been previously supplied to the patent owner and third party requester.

As to each substantial new question of patentability identified in the decision, the decision should point out:

(A) The prior art patents and printed publications which add some new teaching as to at least one claim;

(B) What that new teaching is;

(C) The claims that the new teaching is directed to;

(D) That the new teaching was not previously considered nor addressed in the prior examination of the patent or a final holding of invalidity by the Federal Courts;

(E) That the new teaching is such that a reasonable examiner would consider the new teaching to be important in deciding to allow the claim being considered; and

(F) Where the question is raised, or where it is not clear that a patent or printed publication pre-dates the patent claims, a discussion should be provided as to why the patent or printed publication is deemed to be available against the patent claims.

If arguments are raised by the third party requester as to grounds not based on patents or printed publications, such as those based on public use or on sale under 35 U.S.C. 102(b), or abandonment under 35 U.S.C. 102(c), the examiner should note that such grounds are improper for reexamination and are not considered or commented upon. See 37 CFR 1.906(c).

In the decision on the request, the examiner will not decide, and no statement should be made as to, whether the claims are rejected over the patents and printed publications. The examiner does not decide on the question of patentability of the claims in the decision on the request. The examiner only decides whether there is a substantial new question of patentability to grant the request to order reexamination.

The decision granting the request is made using form PTOL-2063 as a cover sheet. See MPEP § 2647.01 for an example of a decision granting a request for *inter partes* reexamination.

Form Paragraph 26.01 should be used at the beginning of each decision letter granting reexamination.

¶ *26.01 New Question of Patentability*

A substantial new question of patentability affecting claim **[1]** of United States Patent Number **[2]** is raised by the present request for *inter partes* reexamination.

Extensions of time under 37 CFR 1.136(a) will not be permitted in *inter partes* reexamination proceedings because the provisions of 37 CFR 1.136 apply only to "an applicant" and not to the patent owner in a reexamination proceeding. Additionally, 35 U.S.C. 314(c) requires that *inter partes* reexamination proceedings "will be conducted with special dispatch" (37 CFR 1.937). Patent owner extensions of time in *inter partes* reexamination proceedings are provided for in 37 CFR 1.956. Extensions of time are not available for third party requester comments, because a comment period of 30 days from service of patent owner's response is set by statute. 35 U.S.C. 314(b)(3).

Form paragraph 26.73 should be used at the end of each decision letter granting reexamination that is not being mailed concurrently with the first Office action on patentability (see MPEP § 2660).

¶ *26.73 Correspondence and Inquiry as to Office Actions*

All correspondence relating to this *inter partes* reexamination proceeding should be directed:

By Mail to: Mail Stop *Inter Partes* Reexam
Attn: Central Reexamination Unit
Commissioner for Patents
United States Patent & Trademark Office
P.O. Box 1450
Alexandria, VA 22313-1450

By FAX to: (571) 273-9900
Central Reexamination Unit

By hand: Customer Service Window
Randolph Building
401 Dulany Street
Alexandria, VA 22314

Any inquiry concerning this communication or earlier communications from the examiner, or as to the status of this proceeding, should be directed to the Central Reexamination Unit at telephone number (571) 272-7705.

I. PANEL REVIEW CONFERENCE

After an examiner has determined that the reexamination proceeding is ready for granting reexamination, the examiner will formulate a draft preliminary order granting reexamination. The examiner will then inform his/her **>Central Reexamination Unit (CRU) Supervisory Patent Examiner (SPE)< of his/her intent to issue an order granting reexamination. The *>CRU SPE< will convene a panel review conference, and the conference members will review the matter. See MPEP § 2671.03 for the make-up of the panel. If the conference confirms the examiner's preliminary decision to grant reexamination, the proposed order granting reexamination shall be issued and signed by the examiner, with the two other conferees initialing the action (as "conferee") to indicate their presence in the conference. If the conference does not confirm the examiner's preliminary decision, the examiner will reevaluate and issue an appropriate communication.

II. PETITION TO VACATE THE ORDER GRANTING REEXAMINATION

A substantive determination by the Director of the Office to institute reexamination pursuant to a finding

that the prior art patents or printed publications raise a substantial new question of patentability is not subject to review by petition or otherwise. See *Joy Mfg. Co. v. Nat'l Mine Serv. Co., Inc.*, 810 F.2d 1127, 1 USPQ2d 1627 (Fed. Cir. 1987); *Heinl v. Godici*, 143 F.Supp. 2d 593 (E.D. Va. 2001). Note further the decision of *Patlex Corp. v. Quigg*, 680 F.Supp. 33, 6 USPQ2d 1296, 1298 (D.D.C. 1988) (the legislative scheme leaves the Director's 35 U.S.C. 303 determination entirely to his discretion and not subject to judicial review). These decisions were rendered for *ex parte* reexamination; however, the holdings of these decisions apply equally in *inter partes* reexamination proceedings, since the language of 35 U.S.C. 302(c) (i.e., the *ex parte* reexamination statute) is also found in 35 U.S.C. 312(c) (i.e., the *inter partes* reexamination statute). Because the substantive determination is not subject to review by petition or otherwise, neither the patent owner nor the third party requester has a right to petition, or request reconsideration of, a finding that the prior art patents or printed publications raise a substantial new question. There is no right to petition such a finding even if the finding of a substantial new question is based on reasons other than those urged by the third party requester (or based on less than all the grounds urged by the third party requester). Where the examiner determines that a date of a reference is early enough such that the reference constitutes prior art, that determination is not petitionable (with respect to vacating the examiner's finding of a substantial new question). Where the examiner determines that a reference is a printed publication (i.e., that the criteria for publication has been satisfied), that determination is also not petitionable. These matters cannot be questioned with respect to vacating the order granting reexamination until a final agency decision on the reexamination proceeding has issued. Rather, these matters can be argued by the patent owner and appealed during the examination phase of the reexamination proceeding.

A petition under 37 CFR 1.181 may, however, be filed to vacate an *ultra vires* reexamination order, such as where the order for reexamination is not based on prior art patents and printed publications. In cases where no discretion to grant a request for reexamination exists, a petition to vacate the decision to grant, or a request for reconsideration, will be entertained. "Appropriate circumstances" under 37 CFR 1.181(a)(3) exist to vacate the order granting reexamination where, for example:

(A) the reexamination order is not based on prior art patents or printed publications;

(B) reexamination is prohibited under 37 CFR 1.907;

(C) all claims of the patent were held to be invalid by a final decision of a Federal Court after all appeals;

(D) reexamination was ordered for the wrong patent;

(E) reexamination was ordered based on a duplicate copy of the request; or

(F) the reexamination order was based **wholly** on the same question of patentability raised by the prior art *previously considered* in an earlier concluded examination of the patent by the Office (e.g., the application which matured into the patent, a prior reexamination, an interference proceeding).

As to (F), the decision of *In re Recreative Technologies Corp.*, 83 F.3d 1394, 38 USPQ2d 1776 (Fed. Cir. 1996) is to be noted. See the discussion in MPEP § 2642, subsection II.A. as to the criteria for vacating a reexamination order in view of the decision.

When a petition under 37 CFR 1.181 is filed to vacate a reexamination order, the third party requester may file a single submission in opposition to the petition. Because reexamination proceedings are conducted with special dispatch, 35 U.S.C. 314(c), any such opposition by the third party requester must be filed within two weeks of the date upon which a copy of the original 37 CFR 1.181 petition was served on the third party requester to ensure consideration. It is advisable that, upon receipt and review of the served copy of such a 37 CFR 1.181 petition which the third party requester intends to oppose, the requester should immediately place a courtesy telephone call to the **>CRU SPE< to notify the Office that an opposition to the 37 CFR 1.181 petition will be filed. Whenever possible, filing of the opposition should be submitted by facsimile transmission.

The filing of a 37 CFR 1.181 petition to vacate an *ultra vires* reexamination order is limited to a single submission, even if an opposition thereto is filed by a third party requester.

III. PRIOR ART SUBMITTED AFTER THE ORDER

Any prior art citations under 37 CFR 1.501 submitted after the date of the decision ordering *inter partes* reexamination should be retained in a separate file by the **>Technology Center (TC) (usually the TC Quality Assurance Specialist (QAS))< and stored until the reexamination proceeding is concluded, at which time the prior art citation is then entered of record in the patent file. See MPEP § 2206. Note that 37 CFR 1.902 governs submissions of prior art that can be made by *patent owners* and *third party requesters* after reexamination has been ordered.

2647 Decision Denying Reexamination [R-7]

The request for reexamination will be denied if a substantial new question of patentability is not found based on patents or printed publications.

If the examiner concludes that no substantial new question of patentability has been raised, the examiner should prepare a decision denying the reexamination request. Form paragraph 26.02 should be used as the introductory paragraph in a decision denying reexamination.

¶ *26.02 No New Question of Patentability*

No substantial new question of patentability is raised by the present request for *inter partes* reexamination and the prior art cited therein for the reasons set forth below.

The decision denying the request will then indicate, for each patent or publication cited in the request, why the citation:

(A) Is cumulative to the teachings of the art cited in the earlier concluded examination of the patent;

(B) Is not available against the claims (e.g., the reference is not available as prior art because of its date or the reference is not a publication);

(C) Would not be important to a reasonable examiner. Even if the citation is available against the claims and it is not cumulative, it still cannot be the basis for a substantial new question of patentability if the additional teaching of the citation would not be important to a reasonable examiner in deciding whether any claim (of the patent for which reexamination is requested) is patentable; or

(D) Is one which was cited in the record of the patent and is barred by the guidelines set forth in MPEP § 2642, subsection II.A.

The examiner should also, in the decision, respond to the substance of each argument raised by the third party requester which is based on patents or printed publications.

If arguments are presented as to grounds not based on prior art patents or printed publications, such as those based on public use or on sale under 35 U.S.C. 102(b), or abandonment under 35 U.S.C. 102(c), the examiner should note that such grounds are improper for reexamination and are not considered or commented upon. See 37 CFR 1.906(c).

See MPEP § 2647.01 for an example of a decision denying a request for *inter partes* reexamination.

The decision denying the request is mailed by the Central Reexamination Unit (CRU), and jurisdiction over the reexamination proceeding is retained by the CRU to await any petition seeking review of the examiner's determination refusing reexamination. If such a petition is not filed within one (1) month of the examiner's determination denying reexamination, the CRU then processes the reexamination file to provide the partial refund set forth in 37 CFR 1.26(c) (the Office of Finance no longer processes reexamination proceedings for a refund).

The reexamination proceeding is then given a 420 status. A copy of the PALM "Application Number Information" screen and the "Contents" screen is printed, the printed copy is annotated by adding the comment "PROCEEDING CONCLUDED," and the annotated copy is then scanned into IFW using the miscellaneous letter document code.

The concluded reexamination file (electronic or paper) containing the request and the decision denying the request becomes part of the patent's record.

PANEL REVIEW CONFERENCE

After an examiner has determined that the reexamination proceeding is ready for denying reexamination, the examiner will formulate a draft preliminary order denying reexamination. The examiner will then inform his/her **>CRU Supervisory Patent Examiner (SPE)< of his/her intent to issue an order denying reexamination. The *>CRU SPE< will convene a panel review conference, and the conference members will review the matter. See MPEP § 2671.03 for the

make-up of the panel. If the conference confirms the examiner's preliminary decision to deny reexamination, the proposed order denying reexamination shall be issued and signed by the examiner, with the two other conferees initialing the action (as "conferee") to indicate their presence in the conference. If the conference does not confirm the examiner's preliminary decision, the examiner will reevaluate and issue an appropriate communication.

2647.01 Examples of Decisions on Requests [R-7]

Examples of decisions on requests for *inter partes* reexamination are provided below. The first example is a **grant** of an *inter partes* reexamination. The second example is a **denial** of an *inter partes* reexamination. The examiner should leave the paper number blank, since IFW files do not have a paper number.

ORDER GRANTING/DENYING REQUEST FOR *INTER PARTES* REEXAMINATION

The request for *inter partes* reexamination has been considered. Identification of the claims, the references relied on, and the rationale supporting the determination are attached.

Attachment(s): ☐ PTO-892 ☒ PTO-1449 ☐ Other: _____

1. ☒ The request for *inter partes* reexamination is GRANTED.

☒ An Office action is attached with this order.

☐ An Office action will follow in due course.

2. ☐ The request for *inter partes* reexamination is DENIED.

This decision is not appealable. 35 U.S.C. 312(c). Requester may seek review of a denial by petition to the Director of the USPTO within ONE MONTH from the mailing date hereof. 37 CFR 1.927. EXTENSIONS OF TIME ONLY UNDER 37 CFR 1.183. In due course, a refund under 37 CFR 1.26(c) will be made to requester.

All correspondence relating to this *inter partes* reexamination proceeding should be directed to the **Central Reexamination Unit** at the mail, FAX, or hand-carry addresses given at the end of this Order.

PTOL-2063 (5/03)

DECISION GRANTING *INTER PARTES* REEXAMINATION

A substantial new question of patentability affecting claims 1-3 of United States Patent Number 9,999,999 to Key is raised by the present request for *inter partes* reexamination.

Extensions of time under 37 CFR 1.136(a) will not be permitted in *inter partes* reexamination proceedings because the provisions of 37 CFR 1.136 apply only to "an applicant" and not to parties in a reexamination proceeding. Additionally, 35 U.S.C. 314(c) requires that *inter partes* reexamination proceedings "will be conducted with special dispatch" (37 CFR 1.937). Patent owner extensions of time in *inter partes* reexamination proceedings are provided for in 37 CFR 1.956. Extensions of time are not available for third party requester comments, because a comment period of 30 days from service of patent owner's response is set by statute. 35 U.S.C. 314(b)(3).

The patent owner is reminded of the continuing responsibility under 37 CFR 1.985(a), to apprise the Office of any litigation activity, or other prior or concurrent proceeding, involving Patent 9,999,999 throughout the course of this reexamination proceeding. The third party requester is also reminded of the ability to similarly apprise the Office of any such activity or proceeding throughout the course of this reexamination proceeding. See MPEP § 2686 and 2686.04.

The request *>sets forth< that the third party requester considers claims 1-3 of the Key patent to be unpatentable over Smith taken with Jones.

The request further *>sets forth< that the requester considers claim 4 of the Key patent to be unpatentable over the Horn publication.

It is agreed that the consideration of Smith raises a substantial new question of patentability as to claims 1-3 of the Key patent. As pointed out on pages 2-3 of the request, Smith teaches using an extruder supported on springs at a 30 degree angle to the horizontal but does not teach the specific polymer of claims 1-3 which is extruded. The teaching as to spring-supporting the extruder at 30 degrees was not present in the prosecution of the application which became the Key patent. Further, there is a substantial likelihood that a reasonable examiner would consider this teaching important in deciding whether or not the claim is patentable. Accordingly, Smith raises a substantial new question of patentability as to claims 1-3, which question has not been decided in a previous examination of the Key patent.

The Horn publication does not raise a new question of patentability as to claim 4 because its teaching as to the extrusion die is a substantial equivalent of the teaching of the die by the Dorn patent which was considered in the prosecution of the application which became the Key patent. Further, the request does not present any other new question of patentability as to claim 4, and none has been found. **>Accordingly, claim 4 will not be reexamined.

Finally, reexamination has not been requested for claims 5 – 20 of the Key patent. Accordingly, claims 5 – 20 will not be reexamined.

Claims 1 – 3 of the Key patent will be reexamined.<

All correspondence relating to this **>*inter partes*< reexamination proceeding should be directed:

By Mail to:	Mail Stop *Inter Partes* Reexam ** Attn: Central Reexamination Unit United States Patent & Trademark Office P.O. Box 1450 Alexandria, VA 22313-1450

ORDER GRANTING/DENYING REQUEST FOR *INTER PARTES* REEXAMINATION

The request for *inter partes* reexamination has been considered. Identification of the claims, the references relied on, and the rationale supporting the determination are attached.

Attachment(s): ☐ PTO-892 ☒ PTO-1449 ☐ Other: _____

1. ☐ The request for *inter partes* reexamination is GRANTED.

☐ An Office action is attached with this order.

☐ An Office action will follow in due course.

2. ☒ The request for *inter partes* reexamination is DENIED.

This decision is not appealable. 35 U.S.C. 312(c). Requester may seek review of a denial by petition to the Director of the USPTO within ONE MONTH from the mailing date hereof. 37 CFR 1.927. EXTENSIONS OF TIME ONLY UNDER 37 CFR 1.183. In due course, a refund under 37 CFR 1.26(c) will be made to requester.

All correspondence relating to this *inter partes* reexamination proceeding should be directed to the **Central Reexamination Unit** at the mail, FAX, or hand-carry addresses given at the end of this Order.

PTOL-2063 (5/03)

DECISION DENYING *INTER PARTES* REEXAMINATION

No substantial new question of patentability is raised by the present request for *inter partes* reexamination for the reasons set forth below

The request indicates that Requester considers that a substantial new question of patentability is raised as to claims 1-2 of the Key patent (Patent # 9,999,999) based on Smith taken with Jones.

The request further indicates that Requester considers that a substantial new question of patentability is raised as to claim 3 of the Key patent based on Smith taken with Jones and when further taken with the Horn publication.

The claims of the Key patent, for which reexamination is requested, require that an extruder be supported on springs at an angle of 30 degrees to the horizontal, while a specific chlorinated polymer is extruded through a specific extrusion die.

The Smith patent does not raise a substantial new question of patentability as to the Key claims. Smith's teaching as to the extruder being spring-supported at 30 degrees is a substantial equivalent of the teaching of same by the Dorn patent which was considered in the prosecution of the application which became the Key patent.

In the request for reexamination, it is argued that Jones teaches the extrusion die. However, Jones was previously used, in the prosecution of the Key application, to teach the extrusion die. Further, there is no argument in the reexamination request that Jones is being applied in a manner different than it was applied in the prosecution of the Key application.

The Horn publication has been argued to show the connection of the support means to the extruder via bolts, as recited in claim 3 of the Key patent. Although this teaching was not provided in the prosecution of the Key application, the teaching would not be considered to be important to a reasonable examiner in deciding whether or not the Key claims are patentable.

The Horn publication has been argued to show the connection of the support means to the extruder via bolts, as recited in claim 3 of the Key patent. Although this teaching was not provided in the prosecution of the Key application, the teaching would not be considered to be important to a reasonable examiner in deciding whether or not the Key claims are patentable.

The references set forth in the request have been considered both alone and in combination.They fail to raise a substantial new question of patentability as to any one of the Key patent claims.

In view of the above, the request for reexamination is DENIED.

All correspondence relating to this *inter partes* reexamination proceeding should be directed:

By Mail to: Mail Stop *Inter Partes* Reexam

2647.02 Processing of Decision [R-7]

After the examiner has prepared the decision (and any Office action to accompany the decision) and signed the typed decision, the case is forwarded to the Central Reexamination Unit (CRU) clerical staff. The clerical staff prepares the decision (and any Office action) for mailing, but does not mail it. See MPEP § 2670.

The clerical staff will make a copy of the decision and any Office action for the patent owner and for the third party requester. The clerical staff will also make any copies of references which are needed. Thus, the clerical staff makes 2 copies of any prior art documents not already supplied by the third party requester, one for the patent owner, and one for the third party requester.

After the case is prepared for mailing, the file will be forwarded to the **>CRU Supervisory Patent Examiner (SPE)< for review. The file and the decision and any Office action are forwarded to the Reexamination Legal Advisor (RLA) for review within nine (9) weeks of the filing date of the request (unless otherwise authorized by the CRU Director or a RLA). The decision (and any Office action) is given a general review by a RLA and (if proper) mailed by the CRU support staff. The CRU support staff prints the heading on the cover page (PTOL-2063) of the decision by using the computer terminal, attaches all parts of the decision, and mails it. Where the first Office action accompanies the decision, the heading is also printed on the cover page (PTOL-2064) of the first Office action, and the first Office action is mailed with the decision.

A transmittal form PTOL-501 with the third party requester's address will be completed (if a copy for mailing is not already in the case file). The transmittal form PTOL-501 is used to forward copies of Office actions and other communications to the third party requester. Whenever an Office action is issued, a copy of this form will be made and attached to a copy of the Office action. The use of this form removes the need to retype the third party requester's address each time a mailing is made.

The original signed copy of the decision, the original signed copy of any first Office action accompanying the decision, and a copy of any prior art enclosed are made of record in the reexamination e-file (file history).

Where the decision is a grant of reexamination, the first Office action on the merits will ordinarily be prepared and mailed with the order granting reexamination. See MPEP § 2660.

After the CRU mails the decision, the file will be appropriately annotated, update scanning will be effected, and appropriate PALM entries will be made.

2648 Petition From Denial of Request [R-7]

37 CFR 1.927. Petition to review refusal to order inter partes reexamination.

The third party requester may seek review by a petition to the Director under § 1.181 within one month of the mailing date of the examiner's determination refusing to order *inter partes* reexamination. Any such petition must comply with § 1.181(b). If no petition is timely filed or if the decision on petition affirms that no substantial new question of patentability has been raised, the determination shall be final and nonappealable.

PROCESSING OF PETITION UNDER 37 CFR 1.927

Once a request for *inter partes* reexamination has been denied, jurisdiction over the reexamination proceeding is retained by the Central Reexamination Unit (CRU) to await any petition seeking review of the examiner's determination refusing reexamination. If no petition is filed within one (1) month, the CRU will process the reexamination as a concluded reexamination file. See MPEP § 2647 and § 2694. If a petition is timely filed, the petition (together with the reexamination file) is forwarded to the office of the CRU Director for decision. The CRU Director will then review the examiner's determination that a substantial new question of patentability has not been raised. The CRU Director's review will be *de novo*. Each decision by the CRU Director will conclude with the following paragraph:

> This decision is final and nonappealable. See 35 U.S.C. 312(c) and 37 CFR 1.927. No further communication on this matter will be acknowledged or considered.

If the petition is granted, the decision of the CRU Director should include a sentence stating that an Office action will be mailed in due course.

The CRU Director will sign the decision granting the petition, and then forward the reexamination file, together with the decision, to the CRU support staff for mailing of the decision, update scanning and

PALM processing. The **>CRU Supervisory Patent Examiner (SPE)< will ordinarily reassign the reexamination to another examiner pursuant to 37 CFR 1.931(b), notify the CRU support staff of the assignment so that the new assignment can be entered in the PALM records, and forward the file to the new examiner to prepare a first Office action.

Reassignment to another examiner will be the general rule. Only in exceptional circumstances where no other examiner is available and capable to give a proper examination, will the case remain with the examiner who denied the request.

Under normal circumstances, the reexamination proceeding will not be reassigned to a primary examiner or assistant examiner who was involved in any part of the examination of the patent for which reexamination is requested, or was so-involved in the examination of the parent of the patent. The CRU Director can make an exception to this practice and reassign the reexamination proceeding to an examiner involved with the original examination (of the patent) only where unusual circumstances are found to exist. For example, where there are no examiners other than an original examiner of the patent and the examiner who issued the denial with adequate knowledge of the relevant technology, the CRU Director may permit reassignment of the reexamination proceeding to an examiner that originally examined the patent.

**>The< requester may seek review of a denial of a request for reexamination only by petitioning the Director of the *>USPTO< under 37 CFR 1.927 and 1.181 within one (1) month of the mailing date of the decision denying the request for reexamination. Additionally, any request for an extension of the time period to file such a petition from the >examiner's< denial of a request for reexamination can only be entertained by filing a petition under 37 CFR 1.183 with the appropriate fee to waive the time provisions of 37 CFR 1.927.

After the time for petition has expired without a petition having been filed, or a petition has been filed and the decision thereon affirms the denial of the request, a partial refund of the filing fee for the request for reexamination will be made to the third party requester. 35 U.S.C. 312(c) and 37 CFR 1.26(c). A decision on a petition under 37 CFR 1.927 and 1.181 is final and is not appealable.

Except for the limited *ultra vires* exception described in MPEP § 2646, no petition may be filed requesting review of a decision **granting** a request for reexamination even if the decision grants the request as to a specific claim for reasons other than those advanced by the third party requester. No right to review exists as to that claim, because it will be reexamined in view of all prior art during the reexamination under 37 CFR 1.937.

2654 Conduct of *Inter Partes* Reexamination Proceedings [Added R-2]

35 U.S.C. 314. Conduct of inter partes reexamination proceedings

(a) IN GENERAL.— Except as otherwise provided in this section, reexamination shall be conducted according to the procedures established for initial examination under the provisions of sections 132 and 133. In any inter partes reexamination proceeding under this chapter, the patent owner shall be permitted to propose any amendment to the patent and a new claim or claims, except that no proposed amended or new claim enlarging the scope of the claims of the patent shall be permitted.

(b) RESPONSE.—

(1) With the exception of the inter partes reexamination request, any document filed by either the patent owner or the third-party requester shall be served on the other party. In addition, the Office shall send to the third-party requester a copy of any communication sent by the Office to the patent owner concerning the patent subject to the inter partes reexamination proceeding.

(2) Each time that the patent owner files a response to an action on the merits from the Patent and Trademark Office, the third-party requester shall have one opportunity to file written comments addressing issues raised by the action of the Office or the patent owner's response thereto, if those written comments are received by the Office within 30 days after the date of service of the patent owner's response.

(c) SPECIAL DISPATCH.— Unless otherwise provided by the Director for good cause, all inter partes reexamination proceedings under this section, including any appeal to the Board of Patent Appeals and Interferences, shall be conducted with special dispatch within the Office.

37 CFR 1.937. Conduct of inter partes reexamination.

(a) All *inter partes* reexamination proceedings, including any appeals to the Board of Patent Appeals and Interferences, will be conducted with special dispatch within the Office, unless the Director makes a determination that there is good cause for suspending the reexamination proceeding.

(b) The *inter partes* reexamination proceeding will be conducted in accordance with §§ 1.104 through 1.116, the sections governing the application examination process, and will result in the issuance of an *inter partes* reexamination certificate under § 1.997, except as otherwise provided.

(c) All communications between the Office and the parties to the *inter partes* reexamination which are directed to the merits of the proceeding must be in writing and filed with the Office for entry into the record of the proceeding.

Once *inter partes* reexamination is ordered, a first Office action on the merits will be given (the first Office action will ordinarily be mailed with the order; see MPEP § 2660), and prosecution will proceed. Each time the patent owner responds to an Office action, the third party requester may comment on the Office action and the patent owner response, and thereby participate in the proceeding.

Reexamination will proceed even if the order is returned undelivered. As pointed out in MPEP § 2630, the notice under 37 CFR 1.11(c) is constructive notice to the patent owner, and lack of response from the patent owner will not delay reexamination.

The examination will be conducted in accordance with 37 CFR 1.104, 1.105, 1.110-1.113, 1.115, and 1.116 (35 U.S.C. 132 and 133) and will result in the issuance of a reexamination certificate under 37 CFR 1.997. The proceeding shall be conducted with special dispatch within the Office pursuant to 35 U.S.C. 314(c). The patent owner and the third party requester will be sent copies of all Office actions. Also, the patent owner and the third party requester must serve copies of all their submissions to the Office on each other. Citations of art submitted in the patent file prior to issuance of an order for reexamination will be considered by the examiner during the reexamination.

2655 Who Reexamines [R-5]

The examination will ordinarily be conducted by the same patent examiner ** who made the decision on whether the reexamination request should be granted. See MPEP § 2636.

However, if a petition under 37 CFR 1.927 is granted, the reexamination will normally be conducted by another examiner. See MPEP § 2648.

2656 Prior Art Patents and Printed Publications Reviewed by Examiner in Reexamination [R-7]

Typically, the primary source of prior art will be the patents and printed publications cited in the request for *inter partes* reexamination.

Subject to the discussion provided below in this section, the examiner must also consider patents and printed publications:

(A) cited by another reexamination requester under 37 CFR 1.510 or 37 CFR 1.915;

(B) cited by the patent owner under a duty of disclosure (37 CFR 1.933) in compliance with 37 CFR 1.98;

(C) discovered by the examiner in searching;

(D) of record in the patent file from earlier examination;

(E) of record in the patent file from any 37 CFR 1.501 submission prior to date of an order if it complies with 37 CFR 1.98; and

(F) cited by the third party requester under appropriate circumstances pursuant to 37 CFR 1.948.

** Where patents, publications, and other such items of information are submitted by a party (patent owner or requester) in compliance with the requirements of the rules, the requisite degree of consideration to be given to such information will be normally limited by the degree to which the party filing the information citation has explained the content and relevance of the information. The initials of the examiner placed adjacent to the citations on the form PTO/SB/08A and 08B or its equivalent, without an indication to the contrary in the record, do not signify that the information has been considered by the examiner any further than to the extent noted above.

As to (D) above, it is pointed out that ** the degree of consideration of information from the patent file and its parent files is dependent on the availability of the information. Thus, for example, *>as to< a reference other than a U.S. *>patent< and U.S. patent publication **>that is< not scanned into the Image File Wrapper (IFW) ** what was said about *>that< reference in the patent's record is the full extent of consideration, unless otherwise indicated>, or unless parties appropriately supply a copy< .

As to **>(B) and (E) above, 37 CFR 1.98(a)(2) requires a legible copy of:

(1) each foreign patent;

(2) each publication or that portion which caused it to be listed, other than U.S. patents and U.S. patent application publications unless required by the Office;

(3) for each cited pending unpublished U.S. application, the application specification including the

claims, and any drawing of the application, or that portion of the application which caused it to be listed including any claims directed to that portion;

(4) all other information or that portion which caused it to be listed.

It is not required nor is it permitted that parties submit copies of copending reexamination proceedings and applications (which copies can be mistaken for a new request/filing); rather, submitters may provide the application/proceeding number and its status. A submission that is not permitted entry will be returned, expunged, or discarded at the sole discretion of the Office.<

The exception to the requirement for reference copies noted in 37 CFR 1.98(d)(1) does not apply to reexamination proceedings since a reexamination proceeding does not receive 35 U.S.C. 120 benefit from the patent.

AFTER THE NOTICE OF INTENT TO ISSUE *INTER PARTES* REEXAMINATION CERTIFICATE (NIRC):

Once the NIRC has been mailed, the reexamination proceeding must proceed to publication of the Reexamination Certificate as soon as possible. Thus, when the patent owner provides a submission of patents and printed publications, or other information described in 37 CFR 1.98(a), after the NIRC has been mailed, the submission must be accompanied by (A) a factual accounting providing a sufficient explanation of why the information submitted could not have been submitted earlier, and (B) an explanation of the relevance of the information submitted with respect to the claimed invention in the reexamination proceeding. This is provided via a petition under 37 CFR 1.182 (with petition fee) for entry and consideration of the information submitted after NIRC. The requirement in item (B) above is for the purpose of facilitating the Office's compliance with the statutory requirement for "special dispatch," when the requirement in item (A) above is satisfied to provide a basis for interrupting the proceeding after the NIRC.

Once the reexamination has entered the Reexamination Certificate **>printing cycle (452 status)<, pulling the proceeding from that process provides an even greater measure of delay. 37 CFR 1.313 states for an application (emphasis added):

> "(c) Once the issue fee has been paid, **the application will not be withdrawn from issue upon petition by the applicant for any reason except:**
>
> (1) Unpatentability of one of more claims, which petition must be accompanied by an unequivocal statement that one or more claims are unpatentable, an amendment to such claim or claims, and an explanation as to how the amendment causes such claim or claims to be patentable;"

The **>printing cycle< for an application occurs after the payment of the issue fee (there is no issue fee in reexamination), and thus 37 CFR 1.313(c) applies during the *>printing< cycle for an application. Based on the statutory requirement for "special dispatch," the requirements for withdrawal of a reexamination proceeding from its *>printing< cycle are at least as burdensome as those set forth in 37 CFR 1.313(b) and (c). Accordingly, where a submission of patents and printed publications, or other information described in 37 CFR 1.98(a), is made while a proceeding is in its *>printing< cycle, the patent owner must provide an unequivocal statement as to why the art submitted makes at least one claim unpatentable, an amendment to such claim or claims, and an explanation as to how the amendment causes such claim or claims to be patentable. This is in addition to the above-discussed **>(see item (A) above)< factual accounting providing a sufficient explanation of why the information submitted could not have been submitted earlier. The submission of patents and printed publications must be accompanied by a petition under 37 CFR 1.182 (with petition fee) for withdrawal of the reexamination proceeding from the **>printing cycle< for entry and consideration of the information submitted by patent owner. A grantable petition must provide the requisite showing discussed in this paragraph.

2657 Listing of Prior Art [R-7]

**

>The reexamination request must provide a listing of the patents and printed publications (discussed in the request) as provided for in 37 CFR 1.98. See MPEP § 2614.< The examiner must * list on a form PTO-892, if not already listed on a form PTO/SB/08A or 08B, or PTO/SB/42 (or on a form having a format equivalent to one of these forms), all prior art patents or printed publications which have been cited in the decision on the request, applied in making rejections or cited as being pertinent during the reexamina-

tion proceedings. Such prior art patents or printed publications may have come to the examiner's attention because they were:

(A)of record in the patent file due to a prior art submission under 37 CFR 1.501 which was received prior to the date of the order;

(B) of record in the patent file as result of earlier examination proceedings as to the patent;

(C) discovered by the examiner during a prior art search; or

(D) submitted pursuant to 37 CFR 1.948.

All citations listed on form PTO-892, and all citations not lined-through on any form PTO/SB/08A or 08B, or PTO/SB/42 (or on a form having a format equivalent to one of these forms), will be printed on the reexamination certificate under "References cited."

2658 Scope of *Inter Partes* Reexamination [R-7]

37 CFR 1.906. Scope of reexamination in inter partes reexamination proceeding.

(a) Claims in an *inter partes* reexamination proceeding will be examined on the basis of patents or printed publications and, with respect to subject matter added or deleted in the reexamination proceeding, on the basis of the requirements of 35 U.S.C. 112.

(b) Claims in an *inter partes* reexamination proceeding will not be permitted to enlarge the scope of the claims of the patent.

(c) Issues other than those indicated in paragraphs (a) and (b) of this section will not be resolved in an *inter partes* reexamination proceeding. If such issues are raised by the patent owner or the third party requester during a reexamination proceeding, the existence of such issues will be noted by the examiner in the next Office action, in which case the patent owner may desire to consider the advisability of filing a reissue application to have such issues considered and resolved.

Inter partes reexamination differs from *ex parte* reexamination in matters of procedure, such as when the third party requester can participate, the types of Office actions and the timing of issuance of the Office actions, and the requirement for identification of the real party in interest. *Inter partes* reexamination also differs from *ex part*e reexamination in the estoppel effect it provides as to the third party requesters and when the initiation of a reexamination is prohibited.

Inter partes reexamination **does not**, however, differ from *ex part*e reexamination as to the substance to be considered in the proceeding.

I. PRIOR ART PATENTS OR PRINTED PUBLICATIONS, AND DOUBLE PATENTING

Rejections on art in reexamination proceedings may only be made on the basis of prior art patents or printed publications, or double patenting. See MPEP § 2258 and § 2258.01 for a discussion of art rejections in reexamination proceedings based on prior art patents or printed publications. The discussion there includes making double patenting rejections and the use of admissions.

It is to be noted that the decisions cited in MPEP §§ 2258 and 2258.01 for determining the presence or absence of "a substantial new question of patentability" in *ex parte* reexamination proceedings apply equally in *inter partes* reexamination proceedings, since the statutory language relied upon in those decisions, which is taken from the *ex parte* reexamination statute, is also found in the *inter partes* reexamination statute.

II. COMPLIANCE WITH 35 U.S.C. 112

Where new or amended claims are presented or where any part of the disclosure is amended, the claims of the reexamination proceeding are to be examined for compliance with 35 U.S.C. 112. See MPEP § 2258 for a discussion of the examination in a reexamination proceeding based upon 35 U.S.C. 112>, which discussion applies to *inter partes* reexamination in the same way it applies to *ex parte* reexamination<.

III. CLAIMS IN PROCEEDING MUST NOT ENLARGE SCOPE OF THE CLAIMS OF THE PATENT

Where new claims are presented, or where any part of the disclosure is amended, the claims of the *inter partes* reexamination proceeding should be examined under 35 U.S.C. 314, to determine whether they enlarge the scope of the original claims. 35 U.S.C. 314(a) states that "no proposed amended or new claim enlarging the scope of the claims of the patent shall be permitted" in an *inter partes* reexamination proceeding.

A. Criteria for Enlargement of the Scope of the Claims

A claim presented in a reexamination proceeding **enlarges the scope** of the claims of the patent being reexamined where the claim is broader than each and every claim of the patent. See MPEP § 1412.03 for guidance as to when the presented claim is considered to be a broadening claim as compared with the claims of the patent, i.e., what is broadening and what is not. If a claim is considered to be a broadening claim for purposes of reissue, it is likewise considered to be a broadening claim in reexamination.

B. Amendment of the Specification

Where the specification is amended in a reexamination proceeding, the examiner should make certain that the amendment to the specification does not enlarge the scope of the claims of the patent. An amendment to the specification can enlarge the scope of the claims by redefining the scope of the terms in a claim, even where the claims are not amended in any respect.

C. Rejection of Claims Where There Is Enlargement

Any claim which enlarges the scope of the claims of the patent should be rejected under 35 U.S.C. 314(a). Form paragraph 26.03.01 is to be employed in making the rejection.

¶ *26.03.01 Rejection, 35 U.S.C. 314(a), Claim Enlarges Scope of Patent*

Claim **[1]** rejected under 35 U.S.C. 314(a) as enlarging the scope of the claims of the patent being reexamined. 35 U.S.C. 314(a) states that "no proposed amended or new claim enlarging the scope of the claims of the patent shall be permitted" in an *inter partes* reexamination proceeding. A claim presented in a reexamination "enlarges the scope" of the patent claims where the claim is broader than the claims of the patent. A claim is broadened if it is broader in any one respect, even though it may be narrower in other respects. **[2]**.

Examiner Note:

The claim limitations which are considered to broaden the scope should be identified and explained in bracket 2. See MPEP § 2658.

IV. OTHER MATTERS

A. Patent Under Reexamination Subject of a Prior Office or Court Decision

Where some of the patent claims in a patent being reexamined have been the subject of a prior Office or court decision, see MPEP § 2642. Where other proceedings involving the patent are copending with the reexamination proceeding, see MPEP § 2686 - § 2686.04.

Patent claims not subject to reexamination because of their prior adjudication by a court should be identified. See MPEP § 2642. For handling a "live" claim dependent on a patent claim not subject to reexamination, see MPEP § 2660.03. All added claims will be examined.

Where grounds set forth in a prior Office or Federal Court decision, are not based on patents or printed publications, yet clearly raise questions as to the claims, the examiner's Office action should clearly state that the claims have not been examined as to those grounds not based on patents or printed publications nor applicable portions of 35 U.S.C. 112 stated in the prior decision. See 37 CFR 1.906(c). See *In re Knight*, 217 USPQ 294 (Comm'r Pat. 1982).

B. "Live" Claims That Are Reexamined During Reexamination

The Office's determination in both the order for reexamination and the examination stage of the reexamination will generally be limited solely to a review of the "live" claims (i.e., existing claims not held invalid by a final decision, after all appeals) for which reexamination has been requested. If the requester was interested in having all of the claims reexamined, requester had the opportunity to include them in its request for reexamination. However, if the requester chose not to do so, those claim(s) for which reexamination was not requested will generally not be reexamined by the Office. It is further noted that 35 U.S.C. 311(b)(2) requires that a requester "set forth the pertinency and manner of applying cited prior art to every claim for which reexamination is requested." If the requester fails to apply the art to certain claims, then the requester is not statutorily entitled to reexamination of such claims. If a request fails to set forth the pertinency and manner of applying the cited art to any claim for which reexamination is requested as

required by 37 CFR 1.915(b), that claim will generally not be reexamined.

The decision to reexamine any claim for which reexamination has not been requested lies within the sole discretion of the Office, to be exercised based on the individual facts and situation of each individual case. If the Office chooses to reexamine any claim for which reexamination has not been requested, it is permitted to do so. In addition, the Office may always initiate a reexamination on its own initiative of the non-requested claim (35 U.S.C. 303(a)). Similarly, if prior art patents or printed publications are discovered during reexamination which raise a substantial new question of patentability as to one or more patent claims for which reexamination has not been ordered (while reexamination has been ordered for other claims in the patent), and these documents in turn raise a compelling rejection of such claims, then such claims may be added, within the sole discretion of the Office, during the examination phase of the proceeding.

C. Restriction Not Proper in Reexamination

Restriction requirements cannot be made in a reexamination proceeding since no statutory basis exists for restriction in a reexamination proceeding. Note also that the addition of claims to a "separate and distinct" invention to the patent would be considered as being an enlargement of the scope of the patent claims. See *Ex parte Wikdahl*, 10 USPQ2d 1546 (Bd. Pat. App. & Inter. 1989). See MPEP § 1412.03.

D. Ancillary Matters

There are matters ancillary to reexamination which are necessary and incident to patentability which will be considered. Amendments may be made to the specification to correct, for example, an inadvertent failure to claim foreign priority or the continuing status of the patent relative to a parent application if such correction is necessary to overcome a reference applied against a claim of the patent.

E. Claiming Foreign and Domestic Priority in Reexamination

The patent owner may obtain the right of foreign priority under 35 U.S.C. 119 (a)-(d) where a claim for priority had been made before the patent was granted, and it is only necessary for submission of the certified copy in the reexamination proceeding to perfect priority. Likewise, patent owner may obtain the right of foreign priority under 35 U.S.C. 119 (a)-(d) where it is necessary to submit for the first time both the claim for priority and the certified copy. However, where it is necessary to submit for the first time both the claim for priority and the certified copy, and the patent to be reexamined matured from **a utility or plant application filed on or after November 29, 2000**, then the patent owner will have to also file a grantable petition for an unintentionally delayed priority claim under 37 CFR 1.55(c). See MPEP § 201.14(a).

Also, patent owner may correct the failure to adequately claim (in the application for the patent to be reexamined) benefit under 35 U.S.C. 120 of an earlier filed copending U.S. patent application. For a patent to be reexamined which matured from a utility or plant applications filed on or after November 29, 2000, the patent owner will have to file a petition for an unintentionally delayed benefit claim under 37 CFR 1.78(a)(3). See MPEP § 201.11.

For a patent to be reexamined which matured from a utility or plant application filed **before** November 29, 2000, the patent owner can correct via reexamination the failure to adequately claim benefit under 35 U.S.C. 119(e) of an earlier filed provisional application. Under no circumstances can a reexamination proceeding be employed to correct or add a benefit claim under 35 U.S.C. 119(e) for a patent matured from a utility or plant application filed on or after November 29, 2000.

No renewal of previously made claims for foreign priority under 35 U.S.C. 119 or domestic benefit under 35 U.S.C. 119(e) or 120, is necessary during reexamination.

F. Correction of Inventorship

Correction of inventorship may also be made during reexamination. See 37 CFR 1.324 and MPEP § 1481 for petition for correction of inventorship in a patent. If a petition filed under 37 CFR 1.324 is granted, a Certificate of Correction indicating the change of inventorship will not be issued, because the reexamination certificate that will ultimately issue will contain the appropriate change-of-inventorship information (i.e., the Certificate of Correction is in effect merged with the reexamination certificate).

G. Affidavits in Reexamination

Affidavits under 37 CFR 1.131 and 1.132 may be utilized in a reexamination proceeding. Note, however, that an affidavit under 37 CFR 1.131 may not be used to "swear back" of a reference patent if the reference patent is claiming the same invention as the patent undergoing reexamination. In such a situation, the patent owner may, if appropriate, seek to raise this issue via an affidavit under 37 CFR 1.130 (see MPEP § 718) or in an interference proceeding via an appropriate reissue application if such a reissue application may be filed (see MPEP § 1449.02).

H. Issues Not Considered in Reexamination

If questions other than those indicated above (for example, questions of patentability based on public use or on sale, *>conduct issues<, abandonment under 35 U.S.C. 102(c), etc.) are raised by the third party requester or the patent owner during a reexamination proceeding, the existence of such questions will be noted by the examiner in the next Office action, in which case the patent owner may desire to consider the advisability of filing a reissue application to have such questions considered and resolved. Such questions could arise in a reexamination requester's 37 CFR 1.915 request or in 37 CFR 1.947 comments by the third party requester.

Note form paragraph 26.03.

**>

¶ *26.03 Issue Not Within Scope of Inter Partes Reexamination*

It is noted that an issue not within the scope of reexamination proceedings has been raised. **[1]**.The issue will not be considered in a reexamination proceeding. 37 CFR 1.906(c). While this issue is not within the scope of reexamination, the patentee is advised that it may be desirable to consider filing a reissue application provided that the patentee believes one or more claims to be partially or wholly inoperative or invalid.

Examiner Note:

1. In bracket 1, identify the issues.

2. This paragraph may be used either when the patent owner or the third party requester raises issues such as (but not limited to) public use or on sale, conduct, or abandonment of the invention. Such issues should <u>not</u> be raised independently by the patent examiner.

<

If questions of patentability based on public use or on sale, *>conduct issues<, abandonment under 35 U.S.C. 102(c), etc. are independently discovered by the examiner during a reexamination proceeding but were not raised by the third party requester or the patent owner, the existence of such questions will not be noted by the examiner in an Office action, because 37 CFR 1.906(c) is only directed to such questions "raised by the patent owner or the third party requester."

I. Request for Reexamination Filed on Patent after it Has Been Reissued

Where a request for reexamination is filed on a patent after it has been reissued, reexamination will be denied because the patent on which the request for reexamination is based has been surrendered. Should reexamination of the reissued patent be desired, a new request for reexamination including, and based on, the specification and claims of the reissue patent must be filed.

Any amendment made by the patent owner in the prosecution of the reexamination proceeding, should treat the changes made by the granted reissue patent as the text of the patent, and all bracketing and underlining made with respect to the patent as changed by the reissue.

Where the reissue patent issues after the filing of a request for reexamination, see MPEP § 2686.03.

2659 *Res Judicata* and Collateral Estoppel in Reexamination Proceedings [Added R-2]

MPEP § 2642 and § 2686.04 relate to the Office policy controlling the determination on a request for reexamination and the subsequent examination phase of the reexamination, where there has been a Federal Court decision on the merits as to the patent for which reexamination is requested.

Since claims finally held invalid by a Federal Court, after all appeals, will be withdrawn from consideration and not reexamined during a reexamination proceeding, **a rejection** on the grounds of *res judicata* will not be appropriate in reexamination. In situations, where the issue decided in Court did not invalidate claims, but applies in one or more respects to the claims being reexamined, the doctrine of collateral

estoppel may be applied in reexamination to resolve the issue. Thus, for example, where a finding that reference X meets a limitation of a claim was necessary to the final decision of the Court invalidation of claim 5, collateral estoppel would attach to the same limitation in claim 2, which was not invalidated (e.g., because claim 2 contained additional limitations not found in claim 5).

2660 First Office Action [R-7]

37 CFR 1.935. Initial Office action usually accompanies order for inter partes reexamination.

The order for *inter partes* reexamination will usually be accompanied by the initial Office action on the merits of the reexamination.

37 CFR 1.104. Nature of examination.

(a) *Examiner's action.*

(1) On taking up an application for examination or a patent in a reexamination proceeding, the examiner shall make a thorough study thereof and shall make a thorough investigation of the available prior art relating to the subject matter of the claimed invention. The examination shall be complete with respect both to compliance of the application or patent under reexamination with the applicable statutes and rules and to the patentability of the invention as claimed, as well as with respect to matters of form, unless otherwise indicated.

(2) The applicant, or in the case of a reexamination proceeding, both the patent owner and the requester, will be notified of the examiner's action. The reasons for any adverse action or any objection or requirement will be stated in an Office action and such information or references will be given as may be useful in aiding the applicant, or in the case of a reexamination proceeding the patent owner, to judge the propriety of continuing the prosecution.

(3) An international-type search will be made in all national applications filed on and after June 1, 1978.

(4) Any national application may also have an international-type search report prepared thereon at the time of the national examination on the merits, upon specific written request therefor and payment of the international-type search report fee set forth in § 1.21(e). The Patent and Trademark Office does not require that a formal report of an international-type search be prepared in order to obtain a search fee refund in a later filed international application.

(b) *Completeness of examiner's action*. The examiner's action will be complete as to all matters, except that in appropriate circumstances, such as misjoinder of invention, fundamental defects in the application, and the like, the action of the examiner may be limited to such matters before further action is made. However, matters of form need not be raised by the examiner until a claim is found allowable.

(c) *Rejection of claims.*

(1) If the invention is not considered patentable, or not considered patentable as claimed, the claims, or those considered unpatentable will be rejected.

(2) In rejecting claims for want of novelty or for obviousness, the examiner must cite the best references at his or her command. When a reference is complex or shows or describes inventions other than that claimed by the applicant, the particular part relied on must be designated as nearly as practicable. The pertinence of each reference, if not apparent, must be clearly explained and each rejected claim specified.

(3) In rejecting claims the examiner may rely upon admissions by the applicant, or the patent owner in a reexamination proceeding, as to any matter affecting patentability and, insofar as rejections in applications are concerned, may also rely upon facts within his or her knowledge pursuant to paragraph (d)(2) of this section.

(4) Subject matter which is developed by another person which qualifies as prior art only under 35 U.S.C. 102(e), (f) or (g) may be used as prior art under 35 U.S.C. 103 against a claimed invention unless the entire rights to the subject matter and the claimed invention were commonly owned by the same person or subject to an obligation of assignment to the same person at the time the claimed invention was made.

(i) Subject matter developed by another person and a claimed invention shall be deemed to have been commonly owned by the same person or subject to an obligation of assignment to the same person in any application and in any patent granted on or after December 10, 2004, if:

(A) The claimed invention and the subject matter was made by or on behalf of parties to a joint research agreement that was in effect on or before the date the claimed invention was made;

(B) The claimed invention was made as a result of activities undertaken within the scope of the joint research agreement; and

(C) The application for patent for the claimed invention discloses or is amended to disclose the names of the parties to the joint research agreement.

(ii) For purposes of paragraph (c)(4)(i) of this section, the term "joint research agreement" means a written contract, grant, or cooperative agreement entered into by two or more persons or entities for the performance of experimental, developmental, or research work in the field of the claimed invention.

(iii) To overcome a rejection under 35 U.S.C. 103(a) based upon subject matter which qualifies as prior art under only one or more of 35 U.S.C. 102(e), (f) or (g) via 35 U.S.C. 103(c)(2), the applicant must provide a statement to the effect that the prior art and the claimed invention were made by or on the behalf of parties to a joint research agreement, within the meaning of 35 U.S.C. 103(c)(3) and paragraph (c)(4)(ii) of this section, that was in effect on or before the date the claimed invention was made, and that the claimed invention was made as a result of activities undertaken within the scope of the joint research agreement.

(5) The claims in any original application naming an inventor will be rejected as being precluded by a waiver in a published statutory invention registration naming that inventor if the

same subject matter is claimed in the application and the statutory invention registration. The claims in any reissue application naming an inventor will be rejected as being precluded by a waiver in a published statutory invention registration naming that inventor if the reissue application seeks to claim subject matter:

(i) Which was not covered by claims issued in the patent prior to the date of publication of the statutory invention registration; and

(ii) Which was the same subject matter waived in the statutory invention registration.

(d) *Citation of references*.

(1) If domestic patents are cited by the examiner, their numbers and dates, and the names of the patentees will be stated. If domestic patent application publications are cited by the examiner, their publication number, publication date, and the names of the applicants will be stated. If foreign published applications or patents are cited, their nationality or country, numbers and dates, and the names of the patentees will be stated, and such other data will be furnished as may be necessary to enable the applicant, or in the case of a reexamination proceeding, the patent owner, to identify the published applications or patents cited. In citing foreign published applications or patents, in case only a part of the document is involved, the particular pages and sheets containing the parts relied upon will be identified. If printed publications are cited, the author (if any), title, date, pages or plates, and place of publication, or place where a copy can be found, will be given.

(2) When a rejection in an application is based on facts within the personal knowledge of an employee of the Office, the data shall be as specific as possible, and the reference must be supported, when called for by the applicant, by the affidavit of such employee, and such affidavit shall be subject to contradiction or explanation by the affidavits of the applicant and other persons.

(e) *Reasons for allowance*. If the examiner believes that the record of the prosecution as a whole does not make clear his or her reasons for allowing a claim or claims, the examiner may set forth such reasoning. The reasons shall be incorporated into an Office action rejecting other claims of the application or patent under reexamination or be the subject of a separate communication to the applicant or patent owner. The applicant or patent owner may file a statement commenting on the reasons for allowance within such time as may be specified by the examiner. Failure by the examiner to respond to any statement commenting on reasons for allowance does not give rise to any implication.

I. PREPARATION AND MAILING OF FIRST OFFICE ACTION

The first Office action on the merits will ordinarily be mailed together with the order granting reexamination. In some instances, however, it may not be practical or possible to mail the first Office action together with the order. For example, the reexamination file may have been provided to the examiner too late to include an Office action together with the order and still meet the deadline of ten weeks from the filing date of the request for mailing the order granting the request. Another example is where certain information or copies of prior art may not be available until after the ten week time-deadline. In these situations, the order would be prepared and mailed, and the Office action would be mailed at a later date. In addition, a first Office action is not mailed with the order where the files will be forwarded for decision on merger of a reexamination proceeding with another reexamination proceeding and/or a reissue application. Rather, an Office action would be issued after the merger decision, as a single action for the merged proceeding. See MPEP § 2686.01 and MPEP § 2686.02.

Where the order will be mailed **without** the first Office action, the order must indicate that an Office action will issue in due course. Form paragraph 26.04 should be used to inform patent owner and requester that the action was not inadvertently left out or separated from the order.

¶ *26.04 First Action Not Mailed With Order*

An Office action on the merits does not accompany this order for *inter partes* reexamination. An Office action on the merits will be provided in due course.

Where the Office action cannot be mailed with the order, the Office action should, in any event, be issued within **two months** from the mailing of the order, unless the case is awaiting merger, in which case the Office action should be issued within **one month** from the mailing of the merger decision.

II. TYPES OF FIRST ACTION ON THE MERITS

Where all of the patent claims are found patentable in the first action, the examiner will issue an Action Closing Prosecution (ACP). The ACP is discussed in MPEP § 2671.02.

Where the examiner determines that one or more of the patent claims are to be rejected, the first Office action on the merits will be similar to a first action on the merits in an application (or *ex parte* reexamination) where a rejection is made. In this situation, even though the action will follow the format of an action in an application, *inter partes* reexamination practice must be followed. Accordingly, *inter partes* reexamination forms will be used, special *inter partes* reexamination time periods will be set, *inter partes* reexamination form paragraphs will be used, and the

patent owner and the third party requester must be sent a copy of the action.

III. FORM AND CONTENT OF FIRST OFFICE ACTION ON THE MERITS THAT IS NOT AN ACP

The examiner's first Office action will be a statement of the examiner's position, and it should be so complete that the second Office action can properly be made an Action Closing Prosecution (ACP). See MPEP § 2671.02. Accordingly, it is intended that the first Office action be the primary action to establish the issues which exist, such that the patent owner response and any third party comments can place the proceeding in condition for the issuance of an ACP.

The examiner's first action should be comprehensive and address all issues as to the prior art patents and/or printed publications. The action will clearly set forth each ground of rejection and/or ground of objection, and the reasons supporting the ground. The action will also clearly set forth each determination favorable to the patentability of claims, i.e., each rejection proposed by the third party requester that the examiner refuses to adopt. Reasons why the rejection proposed by the third party requester is not appropriate (i.e., why the claim cannot be rejected under the ground proposed by the third party requester) must be clearly stated for each rejection proposed by the third party requester that the examiner refuses to adopt. Comprehensive reasons for patentability must be given for each determination favorable to patentability of claims. See MPEP § 1302.14 for examples of suitable statements of reasons. It is to be noted that the examiner is not to refuse to adopt a rejection properly proposed by the requester as being cumulative to other rejections applied. Rather, any such proposed rejection must be adopted to preserve parties' appeal rights as to such proposed rejections.

In addition to the grounds and determinations set forth in the action, the first action should respond to the substance of each argument raised in the request by the third party requester pursuant to 37 CFR 1.915. Also, it should address any issues proper for reexamination that the examiner becomes aware of independent of the request.

Where the request for reexamination includes material such as a claim chart to explain a proposed rejection in order to establish the existence of a substantial new question of patentability, the examiner may cut and paste the claim chart (or other material) to incorporate it within the body of the Office action. The examiner must, however, carefully review the claim chart (or other material) to ensure that any items incorporated in a statement of the rejection clearly and completely address the patentability of the claims. For actions subsequent to the first Office action, the examiner must be careful to additionally address all patent owner responses to previous actions and third party requester comments.

Ordinarily, there will be no patent owner amendment to address in the first Office action of the *inter partes* reexamination, because 37 CFR 1.939(b) prohibits a patent owner amendment prior to first Office action. Thus, the first Office action will ordinarily contain no rejection based on 35 U.S.C. 112; a rejection based on 35 U.S.C. 112 is proper in reexamination only when it is raised by an amendment of the patent. The only exception is where the newly requested and granted reexamination is merged with an existing reexamination proceeding which already contains an amendment. In such a case, the first Office action for the new reexamination would be a subsequent action for the existing reexamination, and the amendment in the merged proceeding would be examined for any 35 U.S.C. 112 issues raised by the amendment and any improper broadening of the claims under 35 U.S.C. 314.

In view of the requirement for "special dispatch" in *inter partes* reexamination proceedings (35 U.S.C. 314(c)), it is intended that the examiner will issue an ACP at the earliest possible time. Accordingly, the first action should include a statement cautioning the patent owner that a complete response should be made to the action, since the next action is expected to be an ACP. The first action should further caution the patent owner that the requirements of 37 CFR 1.116(b) will be strictly enforced after an ACP and that any amendment after the ACP must include "a showing of good and sufficient reasons why they are necessary and were not earlier presented" in order to be considered. Form paragraph 26.05 should be inserted at the end of the first Office action followed by form paragraph 26.73.

¶ *26.05 Papers To Be Submitted in Response to Action*

In order to ensure full consideration of any amendments, affidavits or declarations, or other documents as evidence of patentability, such documents must be submitted in response to this Office action. Submissions after the next Office action, which is intended to be an Action Closing Prosecution (ACP), will be governed by 37 CFR 1.116(b) and (d), which will be strictly enforced.

¶ *26.73 Correspondence and Inquiry as to Office Actions*

All correspondence relating to this *inter partes* reexamination proceeding should be directed:

By Mail to: Mail Stop *Inter Partes* Reexam
Attn: Central Reexamination Unit
Commissioner for Patents
United States Patent & Trademark Office
P.O. Box 1450
Alexandria, VA 22313-1450

By FAX to: (571) 273-9900
Central Reexamination Unit

By hand: Customer Service Window
Randolph Building
401 Dulany Street
Alexandria, VA 22314

Any inquiry concerning this communication or earlier communications from the examiner, or as to the status of this proceeding, should be directed to the Central Reexamination Unit at telephone number (571) 272-7705.

The Office action cover sheet is PTOL-2064. Where the Office action is a first Office action, the space on the PTOL-2064 for the date of the communication to which the Office action is responsive to should not be filled in, since it is the order for reexamination that responds to the request for reexamination, not the first Office action.

As with all other Office correspondence on the merits in a reexamination proceeding, the first Office action must be signed by a primary examiner.

IV. PANEL REVIEW CONFERENCE

After an examiner has determined that the reexamination proceeding is ready for an Office action, the examiner will formulate a draft preliminary Office action. The examiner will then inform his/her **>Central Reexamination Unit (CRU) Supervisory Patent Examiner (SPE) or Technology Center (TC) Quality Assurance Specialist (QAS)< of his/her intent to issue the Office action. The *>CRU SPE/TC QAS< will convene a panel review conference, and the conference members will review the patentability of the claim(s) pursuant to MPEP § 2671.03. If the conference confirms the examiner's preliminary decision to reject and/or allow the claims, the proposed Office action shall be issued and signed by the examiner, with the two other conferees initialing the action (as "conferee") to indicate their presence in the conference. If the conference does not confirm the examiner's treatment of the claims, the examiner will reevaluate and issue an appropriate Office action.

V. SAMPLE FIRST OFFICE ACTION

A sample of a first Office action in an *inter partes* reexamination proceeding is set forth below. The examiner should leave the paper number blank, since IFW files do not have a paper number.

OFFICE ACTION IN* INTER PARTES *REEXAMINATION	**Control No.** 95/999,999	**Patent Under Reexamination** 9,999,999

U.S. Patent and Trademark Office
PTOL-2064 (5/04)

Paper No.

This first Office action on the merits is being mailed together with the order granting reexamination. 37 CFR 1.935.

Claims 1-3:

Claims 1-3 of the Smith patent are not being reexamined in view of the final decision in the *ABC Corp. v. Smith*, 999 USPQ2d 99 (Fed. Cir. 2008). Claims 1-3 were held invalid by the Court of Appeals for the Federal Circuit.

Claims 4 and 6:

The following is a quotation of 35 U.S.C. 103 which forms the basis for all obviousness rejections set forth in this Office action:

> 35 U.S.C. 103. Conditions for patentability, non-obvious subject matter.
>
> (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 4 and 6 are rejected under 35 U.S.C. 103 as being unpatentable over Berridge in view of McGee.

Berridge teaches extruding a chlorinated polymer using the same extrusion structure recited in Claims 4 and 6 of the Smith patent. However, Berridge does not show supporting the extrusion barrel at an angle of 25-35 degrees to the horizontal, using spring supports. McGee teaches spring supporting an extrusion barrel at an angle of 30 degrees, in order to decrease imperfections in extruded chlorinated polymers. It would have been obvious to one of ordinary skill in the polymer extrusion art to support the extrusion barrel of Berridge on springs and at an angle of 30 degrees because McGee teaches this to be known in the polymer extrusion art for decreasing imperfections in extruded chlorinated polymers.

This rejection was proposed by the third party requester in the request for reexamination, and it is being adopted essentially as proposed in the request.

Claim 5:

Claim 5 is patentable over the prior art patents and printed publications because of the recitation of the specific octagonal extrusion die used with the Claim 4 spring-supported barrel. This serves to reduce imperfections in the extruded chlorinated polymers and is not taught by the art of record, alone or in combination.

Proposed third party requester rejection:

In the request, at pages 10-14, the third party requester proposes the claim 5 be rejected based upon Berridge in view of McGee, and further taken with Bupkes or Gornisht. The third party requester points out that both Bupkes and Gornisht teach the use of an octagonal extrusion die to provide a smooth unified extrusion product.

This rejection of claim 5 proposed by the third party requester is not adopted.

While Bupkes and Gornisht do in fact teach the use of an octagonal extrusion die to provide smooth unified extrusion product, Bupkes teaches such for glass making and Gornisht teaches such for a food product. Despite the argument presented at pages 12-13 of the request and the demonstration of exhibit A, the skilled artisan would not equate the advantages obtained by Bupkes and Gornisht for glass and food, respectively, to the removal of imperfections in a polymer melt being extruded to a solid plastic product. Thus, Bupkes and Gornisht are not deemed to be combinable with Berridge and McGee for purposes of rejecting claim 5.

Issue not within the scope of reexamination proceedings:

It is noted that an issue not within the scope of reexamination proceedings has been raised. In the above-cited final Court decision, a question is raised as to the possible public use of the invention of Claim 4. This was pointed out by the third party requester in the request for reexamination. The issue will not be considered in a reexamination proceeding (37 CFR 1.906(c)). While this issue is not within the scope of reexamination, the patentee is advised that it may be desirable to consider filing a reissue application provided that the patentee believes one or more claims to be partially or wholly inoperative or invalid based upon the issue.

Other art made of record:

Swiss Patent 80555 and the American Machinist article are cited to show cutting and forming extruder apparatus somewhat similar to that claimed in the Smith patent.

Conclusion:

In order to ensure full consideration of any amendments, affidavits or declarations, or other documents as evidence of patentability, such documents must be submitted in response to this Office action. Submissions after the next Office action, which is intended to be an action closing prosecution (ACP), will be governed by 37 CFR 1.116, which will be strictly enforced.

All correspondence relating to this *inter partes* reexamination proceeding should be directed:

By Mail to:	Mail Stop *Inter Partes* Reexam Attn: Central Reexamination Unit Commissioner for Patents United States Patent & Trademark Office P.O. Box 1450 Alexandria, VA 22313-1450
By FAX to:	(571) 273-9900 Central Reexamination Unit
By hand (or delivery service):	Customer Service Window Randolph Building 401 Dulany Street Alexandria, VA 22314

Any inquiry concerning this communication or earlier communications from the examiner, or as to the status of this proceeding, should be directed to the Central Reexamination Unit at telephone number (571) 272-7705.

VI. ACTIVITY AFTER THE DRAFT (TEXT) OF THE FIRST OFFICE ACTION HAS BEEN PREPARED

The examiner will prepare the action, ensure that clerical processing is done, and forward the reexamination to the **>CRU SPE< no later than two (2) weeks from the date of the consultation conference. The action is reviewed by the *>CRU SPE< (see MPEP § 2633), who then hand carries the action to the Reexamination Legal Advisor (RLA) within three (3) days of the *>CRU SPE's< receipt of the reexamination from the examiner.

2660.02The Title [R-3]

Normally, the title of the patent will not need to be changed during reexamination. In those very rare instances where a change of the title does become necessary, the examiner should point out the need for the change as early as possible in the prosecution, as a part of an Office action. This will give the patent owner an opportunity to comment on the change prior to the examiner's formal change in the title via an examiner's amendment accompanying the Notice of Intent to Issue *Inter Partes* Reexamination Certificate (NIRC) at the time that the >prosecution of the reexamination< proceeding is to be terminated. A change in the title in a reexamination can only be effected via a formal examiner's amendment accompanying the NIRC. Changing the title and merely initialing the change is not permitted in reexamination.

While a change in the title may be commented on by the patent owner, the final decision as to the change is that of the examiner, and the examiner's decision is not subject to review. Accordingly, where the examiner notes the need for a change at the time of issuing the NIRC, the examiner may make the change at that point, even though the patent owner will not have an opportunity to comment on the change.

An example of a situation where it would be appropriate to change the title is where all the claims directed to one of the categories of invention (in the patent) are canceled via the reexamination proceeding, it would be appropriate to change the title to delete reference to that category.

2660.03Dependent Claims [Added R-2]

If an unamended base patent claim (i.e., a claim appearing in the patent) has been rejected or canceled, any claim which is directly or indirectly dependent thereon should be indicated as patentable if it is otherwise patentable. The dependent claim should not be objected to nor rejected merely because it depends upon a rejected or canceled original patent claim. *No requirement should be made for rewriting the dependent claim in independent form*. As the original patent claim numbers are not changed in a reexamination proceeding, the content of the canceled base claim would remain in the printed patent and would be available to be read as a part of the dependent claim.

If a new base claim has been canceled in a reexamination proceeding, a claim which depends thereon should be rejected as indefinite. If an *amended* base patent claim or a new base claim is rejected, a claim dependent thereon should be objected to if it is otherwise patentable, and a requirement should be made for rewriting the dependent claim in independent form.

2661 Special Status for Action [Added R-2]

35 U.S.C. 314. Special Status For Action

*****

(c) SPECIAL DISPATCH.— Unless otherwise provided by the Director for good cause, all inter partes reexamination proceedings under this section, including any appeal to the Board of Patent Appeals and Interferences, shall be conducted with special dispatch within the Office.

In view of the requirement for "special dispatch," all reexamination proceedings will be "special" throughout their pendency in the Office. In order to further the requirement for special dispatch, the examiner's first Office action on the merits in an *inter partes* reexamination should ordinarily be mailed together with the order for reexamination. See MPEP § 2660.

Any cases involved in litigation, whether they are reexamination proceedings or reissue applications, will have priority over all other cases. Reexamination proceedings not involved in litigation will have priority over all other cases except for reexaminations or reissues involved in litigation.

2662 Time for Response and Comments [R-5]

The time periods for response and comments for the various stages of an *inter partes* reexamination proceeding are as follows:

(A) After an Office action that is not an Action Closing Prosecution (non-ACP Office action).

(1) Patent owner may file a patent owner's response within the time for response set in the non-ACP Office action. The time period set for response will normally be two (2) months from the mailing date of the action.

(2) Where patent owner files a timely response to the non-ACP Office action, the third party requester may once file written comments addressing issues raised by the Office action or by the patent owner response to the action. The third party requester's written comments must be submitted within 30 days from the date of service of the patent owner's response on the third party requester. The date of service can be found on the Certificate of Service that accompanies the patent owner's response.

(B) After an Office letter indicating that a response by the patent owner is not proper.

After an Office letter indicates that a response filed by the patent owner is not completely responsive to a prior Office action (i.e., an incomplete response), the patent owner is required to complete the response within the time period set in the Office letter. 37 CFR 1.957(d). A time period of 30 days or one month (whichever is longer) is normally set. Any third party requester comments on a supplemental patent owner response that completes the initial response must be filed within 30 days from the date of service of the patent owner's supplemental response on the third party requester.

(C) After an Action Closing Prosecution (ACP).

The patent owner may once file written comments and/or present a proposed amendment to the claims within the time period set in the ACP. 37 CFR 1.951(a). Normally, the ACP will set a period of 30 days or one month (whichever is longer) from the mailing date of the ACP. Where the patent owner files comments and/or a proposed amendment, the third party requester may once file comments responsive to the patent owner's submission within 30 days from the date of service of the patent owner's submission on the third party requester. 37 CFR 1.951(b).

(D) Appeal to the Board of Patent Appeals and Interferences (Board) after the examiner issues Right of Appeal Notice.

(1) After the examiner issues a Right of Appeal Notice (RAN), the patent owner and the third party requester may each file a notice of appeal within 30 days or one month (whichever is longer) from the mailing date of the RAN. 37 CFR 1.953(c). The time for filing a notice of appeal cannot be extended. 37 CFR 41.61(e).

(2) A patent owner who has not filed a timely notice of appeal may file a notice of cross appeal (with respect to any decision adverse to the patentability of any claim) within fourteen days of service of a third party requester's notice of appeal. 37 CFR 41.61(b)(1).

A third party requester who has not filed a timely notice of appeal may file a notice of cross appeal (with respect to any final decision favorable to the patentability of any claim) within fourteen days of service of a patent owner's notice of appeal. 37 CFR 41.61(b)(2).

The time for filing a notice of cross-appeal cannot be extended. 37 CFR 41.61(e).

(E) After an Office notification of defective notice of appeal or notice of cross appeal (to the Board).

A party who is notified of a defective notice of appeal, or defective notice of cross appeal, must cure the defect within one month from the mail date of the Office letter notifying the party. (Form PTOL-2067 should be used to notify the parties.)

The time for curing a defective notice of appeal or cross-appeal cannot be extended, since the paper curing the defect is in-effect a substitute notice of appeal or cross-appeal.

(F) Filing of briefs after notice of appeal or notice of cross appeal (to the Board).

(1) Each party that filed a notice of appeal or notice of cross appeal may file an appellant brief and fee within two months after the last-filed notice of appeal or cross appeal. Additionally, if any party to the reexamination is entitled to file an appeal or cross appeal but fails to timely do so, the appellant brief and

fee may be filed within two months after the expiration of time for filing (by the last party entitled to do so) of the notice of appeal or cross appeal. 37 CFR 41.66(a).

(2) Once an appellant brief has been properly filed, an opposing party may file a respondent brief and fee within one month from the date of service of the appellant brief. 37 CFR 41.66(b).

(3) The times for filing appellant and respondent briefs may not be extended. 37 CFR 41.66(a) and (b).

(G) After an Office notification of non-compliance of appellant brief or respondent brief.

A party who is notified of non-compliance of an appellant brief or respondent brief must file an amended brief within a non-extendable time period of one month from the date of the Office letter notifying the party of the non-compliance of the brief.

(H) Rebuttal brief after the examiner issues an examiner's answer.

A third-party requester appellant and/or a patent owner appellant may each file a rebuttal brief within one month of the date of the examiner's answer. The time for filing a rebuttal brief may not be extended. 37 CFR 41.66(d).

(I) Oral Hearing.

If an appellant or a respondent (who has filed a respondent brief) desires an oral hearing by the Board, he or she must file a written request for an oral hearing accompanied by the fee set forth in 37 CFR 41.20(b)(3) within two months after the date of the examiner's answer. The time for filing a request for oral hearing may not be extended. 37 CFR 41.73(b).

(J) Appeal to Court.

The time for the patent owner and/or the third party requester to file a notice of appeal to the U.S. Court of Appeals for the Federal Circuit is two months from the date of the Board decision. If a timely request for rehearing (37 CFR 41.79) is filed, the time for the patent owner and/or the third party requester to file a notice of appeal to the Federal Circuit is two months from final Board action on the request for rehearing. 37 CFR 1.304(a)(1).

(K) Extensions of Time.

See MPEP § 2665 as to extensions of time in *inter partes* reexamination.

>

(L) Litigation.

Where the reexamination results from a court order or litigation is stayed for purposes of reexamination, the shortened statutory period will generally be set at one month or thirty days, whichever is longer. In addition, if (1) there is litigation concurrent with an *inter partes* reexamination proceeding and (2) the reexamination proceeding has been pending for more than one year, the Director of the Office of Patent Legal Administration (OPLA), Director of the Central Reexamination Unit (CRU), Director of the Technology Center (TC) in which the reexamination is being conducted, or a Senior Legal Advisor of the OPLA, may approve Office actions in such reexamination proceeding setting a one-month or thirty days, whichever is longer, shortened statutory period for response rather than the two months usually set in reexamination proceedings. A statement at the end of the Office action – "One month or thirty days, whichever is longer, shortened statutory period approved," followed by the signature of one of these officials, will designate such approval. See MPEP § 2686.04.<

2664 Mailing of Office Action [R-7]

After an Office action is completed and processed and has been approved by the **>Central Reexamination Unit (CRU) Supervisory Patent Examiner (SPE) or Technology Center (TC) Quality Assurance Specialist (QAS)< and the Reexamination Legal Advisor (RLA), the action is mailed by the **>CRU< support staff. In conjunction with mailing, any appropriate processing (e.g., PALM work, update scanning) is carried out.

Inter partes reexamination forms are structured so that the PALM printer can be used to print the identifying information for the reexamination file and the mailing address (usually the address of the patent owner's attorney or agent of record). Where there is no attorney or agent of record, the patent owner's address is printed. Only the first owner's address is printed where there are multiple partial owners; a transmittal form PTOL-2070 is also provided for each partial owner in addition to the one named on the top of the Office action.

All actions in an *inter partes* reexamination proceeding will have a copy mailed to the third party requester. A transmittal form PTOL-2070 must be

used in providing the third party requester with a copy of each Office action.

A completed transmittal form PTOL-2070 will be provided for each requester (there can be multiple requesters in a merged reexamination proceeding; see MPEP § 2686.01) and each additional partial owner as discussed above, and the appropriate address will be entered on the transmittal form(s). The number of transmittal forms provides a ready reference for the number of copies of each Office action to be made, and the transmittal form permits use of the window envelopes in mailing the copies of the action to parties other than the patent owner.

2665 Extension of Time for Patent Owner Response [R-5]

37 CFR 1.956. Patent owner extensions of time in inter partes reexamination.

The time for taking any action by a patent owner in an *inter partes* reexamination proceeding will be extended only for sufficient cause and for a reasonable time specified. Any request for such extension must be filed on or before the day on which action by the patent owner is due, but in no case will the mere filing of a request effect any extension. Any request for such extension must be accompanied by the petition set forth in § 1.17(g). See § 1.304(a) for extensions of time for filing a notice of appeal to the U.S. Court of Appeals for the Federal Circuit.

The provisions of 37 CFR 1.136(a) and 1.136(b) are NOT applicable to *inter partes* reexamination proceedings under any circumstances. Public Law 97-247 amended 35 U.S.C. 41 to authorize the Director of the USPTO to provide for extensions of time to take action which do not require a reason for the extension of time in an "application." An *inter partes* reexamination proceeding does not involve an "application." The provisions of 37 CFR 1.136 authorize extensions of the time period only in an application in which an applicant must respond or take action. There is neither an "application," nor an "applicant" involved in an *inter partes* reexamination proceeding.

The times for filing a notice of appeal or cross-appeal, an appellant brief, a respondent brief, submissions curing a defective appeal or brief, a rebuttal brief, and a request for oral hearing **cannot** be extended.

A request for an extension of time for filing an appeal to the U.S. Court of Appeals for the Federal Circuit is governed by 37 CFR 1.304(a). A request for an extension of time to petition from the denial of a request for reexamination can be obtained only by filing a grantable petition under 37 CFR 1.183 (with fee) to waive the time provisions of 37 CFR 1.927.

Extensions of time in an *inter partes* reexamination proceeding are otherwise governed by 37 CFR 1.956. It should be noted that **extensions of time under 37 CFR 1.956 are not available to the third party requester**.

An extension of time in an *inter partes* reexamination proceeding is requested, where applicable, pursuant to 37 CFR 1.956. Any request for extension of time pursuant to 37 CFR 1.956 will be decided by the **>Central Reexamination Unit (CRU) Director<. The request (A) must be filed on or before the day on which action by the patent owner is due, (B) must set forth sufficient cause for the extension, and (C) must be accompanied by the petition fee set forth in 37 CFR 1.17(g).

Requests for an extension of time in an *inter partes* reexamination proceeding will be considered only after the first Office action on the merits in the reexamination is mailed. Any request for an extension of time filed prior to the first action will be denied.

The certificate of mailing and the certificate of transmission procedures (37 CFR 1.8), and the "Express Mail" mailing procedure (37 CFR 1.10), may be used to file a request for extension of time, as well as any other paper in an existing *inter partes* reexamination proceeding (see MPEP § 2666).

As noted above, a request for extension of time under 37 CFR 1.956 will be granted only for sufficient cause, and *the request must be filed on or before the day on which action by the patent owner is due.* In no case, will the mere filing of a request for extension of time automatically effect any extension, because the showing of cause may be insufficient or incomplete. In the prosecution of an *ex parte* reexamination, an automatic 1-month extension of time to take further action is granted upon filing a first timely response to a final Office action (see MPEP § 2272). The automatic extension given in *ex parte* reexamination does not apply to the first response to an Action Closing Prosecution (ACP) in an *inter partes* reexamination. The reason is that in *inter partes* reexamination, parties do not file an appeal in response to an ACP, and a further Office action (Right of Appeal Notice) will issue even if the parties make no

response at all. Thus, there is no time period to appeal running against the parties after the ACP is issued, unlike *ex parte* reexamination where an appeal is due after final rejection and the time is thus automatically extended one month to provide time for the patent owner to review the Office's response to the amendment before deciding whether to appeal.

Evaluation of whether "sufficient cause" has been shown for an extension must be made by **balancing** the desire to provide the patent owner with a fair opportunity to respond, **against** the requirement of the statute, 35 U.S.C. 314(c), that the proceedings be conducted with special dispatch.

Any request for an extension of time in a reexamination proceeding must fully state the reasons therefor. The reasons **>must include (A) a statement of what action the patent owner has taken to provide a response, to date as of the date the request for extension is submitted, and (B) why, in spite of the action taken thus far, the requested additional time is needed. The statement of (A) must provide a factual accounting of reasonably diligent behavior by all those responsible for preparing a response to the outstanding Office action within the statutory time period.<

Prosecution will be conducted by initially setting a time period of at least 30 days or one month (whichever is longer), see MPEP § 2662. First requests for extensions of these time periods will be granted for sufficient cause, and for a reasonable time specified-usually 1 month. The reasons stated in the request will be evaluated, and the request will be favorably considered where there is a factual accounting of reasonably diligent behavior by all those responsible for preparing a response or comments within the statutory time period. Second or subsequent requests for extensions of time, or requests for more than one month, will be granted only in extraordinary situations.

EXTENSIONS OF TIME TO SUBMIT AFFIDAVITS AFTER ACTION CLOSING PROSECUTION

Frequently, a request for an extension of time is made, stating as a reason therefor, that more time is needed in which to submit an affidavit. When such a request is filed after an ACP, the granting of the request for extension of time is without prejudice to the right of the examiner to question why the affidavit is now necessary and why it was not earlier presented. If the showing by the patent owner is insufficient, the examiner may deny entry of the affidavit, notwithstanding the previous grant of an extension of time to submit it. The grant of an extension of time in these circumstances serves merely to give the patent owner an extended opportunity to present the affidavit or to take other appropriate action.

Affidavits submitted after an ACP are subject to the same treatment as amendments submitted after an ACP. This is analogous to the treatment of affidavits submitted after a final rejection in an application. See *In re Affidavit Filed After Final Rejection*, 152 USPQ 292, 1966 C.D. 53 (Comm'r Pat. 1966).

2666 Patent Owner Response to Office Action [R-7]

37 CFR 1.111. Reply by applicant or patent owner to a non-final Office action.

(a)(1) If the Office action after the first examination (§ 1.104) is adverse in any respect, the applicant or patent owner, if he or she persists in his or her application for a patent or reexamination proceeding, must reply and request reconsideration or further examination, with or without amendment. See §§ 1.135 and 1.136 for time for reply to avoid abandonment.

(2) *Supplemental replies.* (i) A reply that is supplemental to a reply that is in compliance with § 1.111(b) will not be entered as a matter of right except as provided in paragraph (a)(2)(ii) of this section. The Office may enter a supplemental reply if the supplemental reply is clearly limited to:

(A) Cancellation of a claim(s);

(B) Adoption of the examiner suggestion(s);

(C) Placement of the application in condition for allowance;

(D) Reply to an Office requirement made after the first reply was filed;

(E) Correction of informalities (*e.g.*, typographical errors); or

(F) Simplification of issues for appeal.

(ii) A supplemental reply will be entered if the supplemental reply is filed within the period during which action by the Office is suspended under § 1.103(a) or (c).

(b) In order to be entitled to reconsideration or further examination, the applicant or patent owner must reply to the Office action. The reply by the applicant or patent owner must be reduced to a writing which distinctly and specifically points out the supposed errors in the examiner's action and must reply to every ground of objection and rejection in the prior Office action. The reply must present arguments pointing out the specific distinctions believed to render the claims, including any newly presented claims, patentable over any applied references. If the reply is with respect to an application, a request may be made that objections or requirements as to form not necessary to further consideration of the claims be held in abeyance until allowable

subject matter is indicated. The applicant's or patent owner's reply must appear throughout to be a *bona fide* attempt to advance the application or the reexamination proceeding to final action. A general allegation that the claims define a patentable invention without specifically pointing out how the language of the claims patentably distinguishes them from the references does not comply with the requirements of this section.

(c) In amending in reply to a rejection of claims in an application or patent under reexamination, the applicant or patent owner must clearly point out the patentable novelty which he or she thinks the claims present in view of the state of the art disclosed by the references cited or the objections made. The applicant or patent owner must also show how the amendments avoid such references or objections.

37 CFR 1.945. Response to Office action by patent owner in inter partes reexamination.

**>

(a) The patent owner will be given at least thirty days to file a response to any Office action on the merits of the inter partes reexamination.

(b) Any supplemental response to the Office action will be entered only where the supplemental response is accompanied by a showing of sufficient cause why the supplemental response should be entered. The showing of sufficient cause must include:

(1) An explanation of how the requirements of § 1.111(a)(2)(i) are satisfied;

(2) An explanation of why the supplemental response was not presented together with the original response to the Office action; and

(3) A compelling reason to enter the supplemental response.<

I. SUBSTANCE OF THE RESPONSE

Pursuant to 37 CFR 1.937(b):

> "The *inter partes* reexamination proceeding will be conducted in accordance with §§ 1.104 through 1.116, the sections governing the application examination process…"

Accordingly, the provisions of 37 CFR 1.111 apply to the response by a patent owner in a reexamination proceeding.

The patent owner may request reconsideration of the position stated in the Office action, with or without amendment to the claims and/or specification. As to amendments in reexamination proceedings, see MPEP § 2666.01.

Any request for reconsideration must be in writing and must distinctly and specifically point out each supposed error in the examiner's action. A general allegation that the claims define a patentable invention, without specifically pointing out how the language of the claims patentably distinguishes them over the references, is inadequate and is not in compliance with 37 CFR 1.111(b).

Reasons must be given as to how and why the claims define over the references, and why any rejections made under 35 U.S.C. 112 are incorrect or inapplicable.

Affidavits under 37 CFR 1.131 and 1.132 may be utilized in a reexamination proceeding. Note, however, that an affidavit under 37 CFR 1.131 may not be used to "swear back" of a reference patent if the reference patent is claiming the same invention as the patent undergoing reexamination. In such a situation, the patent owner may, if appropriate, seek to raise this issue via an affidavit under 37 CFR 1.130 (see MPEP § 718) or in an interference proceeding via an appropriate reissue application if such a reissue application may be filed (see MPEP § 1449.02).

The patent owner cannot file papers on behalf of a third party. If a third party paper accompanies or is submitted as part of a timely filed response, the response and third party paper are considered to be an improper (i.e., informal) submission, and the **entire** submission shall be returned to the patent owner since the Office will not determine which portion of the submission is the third party paper. The third party paper filed as part of the patent owner's response will not be considered. The improper response with the third party paper in it should be returned to patent owner as a defective (informal) response, using form PTOL-2069 as the cover letter. See MPEP § 2666.50. The appropriate box on the form should be checked and an explanation for the return of the paper given. The patent owner should be provided an appropriate period of time to refile the patent owner response without the third party paper.

II. PROCEDURAL CONSIDERATIONS OF THE RESPONSE

The certificate of mailing and the certificate of transmission procedures (37 CFR 1.8), and the 'Express Mail' mailing procedure (37 CFR 1.10), may be used to file a patent owner's response, as well as any other paper in an existing *inter partes* reexamination proceeding.

A copy of the response must be served on the third party requester in accordance with 37 CFR 1.248, - see also MPEP § 2666.06. Lack of service poses a problem, since a third party requester must file written

comments within a period of 30 days from the date of service of the patent owner's response, in order to be timely. Where the record does not show the response to have been served on the third party requester, see MPEP § 2666.06.

The patent owner will normally be given a period of two months to respond to an Office action. An extension of time can be obtained only in accordance with 37 CFR 1.956. Note that 37 CFR 1.136 does not apply in reexamination proceedings.

See MPEP § 2666.10 for the consequences of the failure by the patent owner to respond to the Office action.

III. SUPPLEMENTAL RESPONSE TO OFFICE ACTION

**>Pursuant to 37 CFR 1.945(b), any supplemental response to the Office action in an *inter partes* reexamination proceeding must be accompanied by a showing of sufficient cause why the supplemental response should be entered. If such a showing is not provided, the supplemental response will not be entered, and may be sealed from public view in the Image File Wrapper (IFW), if it has already been scanned into the IFW for the proceeding.

The showing of sufficient cause why the supplemental response should be entered must include:

(A) an explanation of how the requirements of 37 CFR 1.111(a)(2)(i) are satisfied;

(B) an explanation of why the supplemental response was not presented together with the original response to the Office action; and

(C) a compelling reason to enter the supplemental response.

Pursuant to 37 CFR 1.111(a)(2)(i), the Office may enter a supplemental response if the supplemental response is clearly limited to: (1) cancellation of a claim(s); (2) adoption of the examiner suggestion(s); (3) placement of the proceeding in condition for Notice of Intent to Issue Reexamination Certificate (NIRC); (4) a response to an Office requirement made after the first response was filed; (5) correction of informalities (e.g., typographical errors); or (6) simplification of issues for appeal.

In some instances, where there is a clear basis for the supplemental response, the three-prong showing may be easily satisfied. Thus, for example, the patent claim text may have been incorrectly reproduced, where a patent claim is amended in the original response. In such an instance, the patent owner need only point to the provision of 37 CFR 1.111(a)(2)(i)(E) for the correction of the informalities (e.g., typographical errors), and state that the incorrect reproduction of the claim was not noted in the preparation of the original response. The compelling reason to enter the supplemental response is implicit in such a statement, as the record for the proceeding certainly must be corrected as to the incorrect reproduction of the claim.

Any requester comments filed after a patent owner response to an Office action must be filed "within 30 days after the date of service of the patent owner's response," to satisfy 35 U.S.C. 314(b)(2). Thus, where the patent owner files a supplemental response to an Office action, the requester would be well advised to file any comments deemed appropriate within 30 days after the date of service of the patent owner's supplemental response to preserve requester's comment right, in the event the Office exercises its discretion to enter the supplemental response. The requester's comments may address whether the patent owner showing is adequate, in addition to addressing the merits of the supplemental response. If the patent owner's supplemental response is not entered by the Office, then both the supplemental response, and any comments following that supplemental response, will either be returned to the parties or discarded at the sole discretion of the Office. If the supplemental response and/or comments were scanned into the IFW for the reexamination proceeding, and thus, the papers cannot be physically returned or discarded, then the supplemental response and/or comments entries will be marked "closed" and "non-public," and they will not constitute part of the record of the reexamination proceeding. Such papers will not be displayed in the Office's image file wrapper that is made available to the public, patent owners, and representatives of patent owners, i.e., they will not be displayed in the Patent Application Information Retrieval (PAIR) at the Office's website.<

A supplemental response, which has not been approved for entry, will not be entered when a response to a subsequent Office action is filed, even if ** a specific request for its entry >is made< in the

subsequent response. If a patent owner wishes to have the unentered supplemental response considered by the examiner, the patent owner must include the contents of the unentered supplemental response in a proper response to a subsequent Office action. If the next Office action is an Action Closing Prosecution under 37 CFR 1.949, or an action that otherwise closes prosecution, the entry of the response is governed by 37 CFR 1.116 (see 37 CFR 1.951(a)).

>Patent owner cannot submit an application data sheet (ADS) in a reexamination proceeding since a reexamination proceeding is not an "application" (see 37 CFR 1.76). An ADS is an improper paper in a reexamination proceeding.<

2666.01 Amendment by Patent Owner [R-7]

37 CFR 1.941. Amendments by patent owner in inter partes reexamination.

Amendments by patent owner in *inter partes* reexamination proceedings are made by filing a paper in compliance with §§ 1.530(d)-(k) and 1.943.

37 CFR 1.121. Manner of making amendments in applications.

*****

(j) *Amendments in reexamination proceedings.* Any proposed amendment to the description and claims in patents involved in reexamination proceedings must be made in accordance with § 1.530.

*****

37 CFR 1.530. Statement by patent owner in ex parte reexamination; amendment by patent owner in ex parte or inter partes reexamination; inventorship change in ex parte or inter partes reexamination.

*****

(d) *Making amendments in a reexamination proceeding*. A proposed amendment in an *ex parte* or an *inter partes* reexamination proceeding is made by filing a paper directing that proposed specified changes be made to the patent specification, including the claims, or to the drawings. An amendment paper directing that proposed specified changes be made in a reexamination proceeding may be submitted as an accompaniment to a request filed by the patent owner in accordance with § 1.510(e), as part of a patent owner statement in accordance with paragraph (b) of this section, or, where permitted, during the prosecution of the reexamination proceeding pursuant to § 1.550(a) or § 1.937.

(1) *Specification other than the claims.* Changes to the specification, other than to the claims, must be made by submission of the entire text of an added or rewritten paragraph including markings pursuant to paragraph (f) of this section, except that an entire paragraph may be deleted by a statement deleting the paragraph, without presentation of the text of the paragraph. The precise point in the specification must be identified where any added or rewritten paragraph is located. This paragraph applies whether the amendment is submitted on paper or compact disc (*see* §§ 1.96 and 1.825).

(2) *Claims*. An amendment paper must include the entire text of each patent claim which is being proposed to be changed by such amendment paper and of each new claim being proposed to be added by such amendment paper. For any claim changed by the amendment paper, a parenthetical expression "amended," "twice amended," *etc.*, should follow the claim number. Each patent claim proposed to be changed and each proposed added claim must include markings pursuant to paragraph (f) of this section, except that a patent claim or proposed added claim should be canceled by a statement canceling the claim, without presentation of the text of the claim.

(3) *Drawings.* Any change to the patent drawings must be submitted as a sketch on a separate paper showing the proposed changes in red for approval by the examiner. Upon approval of the changes by the examiner, only new sheets of drawings including the changes and in compliance with § 1.84 must be filed. Amended figures must be identified as "Amended," and any added figure must be identified as "New." In the event a figure is canceled, the figure must be surrounded by brackets and identified as "Canceled."

(4) The formal requirements for papers making up the reexamination proceeding other than those set forth in this section are set out in § 1.52.

(e) *Status of claims and support for claim changes.* Whenever there is an amendment to the claims pursuant to paragraph (d) of this section, there must also be supplied, on pages separate from the pages containing the changes, the status (*i.e.*, pending or canceled), as of the date of the amendment, of all patent claims and of all added claims, and an explanation of the support in the disclosure of the patent for the changes to the claims made by the amendment paper.

(f) *Changes shown by markings*. Any changes relative to the patent being reexamined which are made to the specification, including the claims, must include the following markings:

(1) The matter to be omitted by the reexamination proceeding must be enclosed in brackets; and

(2) The matter to be added by the reexamination proceeding must be underlined.

(g) *Numbering of patent claims p*. Patent claims may not be renumbered. The numbering of any claims added in the reexamination proceeding must follow the number of the highest numbered patent claim.

(h) *Amendment of disclosure may be required*. The disclosure must be amended, when required by the Office, to correct inaccuracies of description and definition, and to secure substantial correspondence between the claims, the remainder of the specification, and the drawings.

(i) *Amendments made relative to patent.* All amendments must be made relative to the patent specification, including the

claims, and drawings, which are in effect as of the date of filing the request for reexamination.

(j) *No enlargement of claim scope*. No amendment may enlarge the scope of the claims of the patent or introduce new matter. No amendment may be proposed for entry in an expired patent. Moreover, no amendment, other than the cancellation of claims, will be incorporated into the patent by a certificate issued after the expiration of the patent.

**>

(k) *Amendments not effective until certificate*. Although the Office actions will treat proposed amendments as though they have been entered, the proposed amendments will not be effective until the reexamination certificate is issued and published.

(l) *Correction of inventorship in an ex parte or inter partes reexamination proceeding*.

(1) When it appears in a patent being reexamined that the correct inventor or inventors were not named through error without deceptive intention on the part of the actual inventor or inventors, the Director may, on petition of all the parties set forth in § 1.324(b)(1)-(3), including the assignees, and satisfactory proof of the facts and payment of the fee set forth in § 1.20(b), or on order of a court before which such matter is called in question, include in the reexamination certificate to be issued under § 1.570 or § 1.997 an amendment naming only the actual inventor or inventors. The petition must be submitted as part of the reexamination proceeding and must satisfy the requirements of § 1.324.

(2) Notwithstanding paragraph (1)(1) of this section, if a petition to correct inventorship satisfying the requirements of § 1.324 is filed in a reexamination proceeding, and the reexamination proceeding is concluded other than by a reexamination certificate under § 1.570 or § 1.997, a certificate of correction indicating the change of inventorship stated in the petition will be issued upon request by the patentee.<

Amendments to the patent being reexamined (where the patent has not expired) may be filed by the patent owner in the reexamination proceeding. Such amendments may be provided by the patent owners after the first Office action on the merits has been issued. The first Office action on the merits will ordinarily be mailed with the order. In some instances, however, it may not be practical or possible to mail the first Office action together with the order. In the event that the first Office action is mailed after the order, it would not be proper to provide an amendment prior to the first Office action. Such an amendment would not be considered, and it would be returned to the patent owner as an improper paper.

If an amendment is submitted to add claims to the patent being reexamined (i.e., to provide new claims), then excess claims fees pursuant to 37 CFR 1.20(c)(3) and (c)(4) may be applicable to the presentation of the added claims. See MPEP § 2666.04. Amendments proposed in a reexamination will normally be entered if timely, and will be considered to be entered for purposes of prosecution before the Office (if they are timely and comply with the rules); however, amendments do not become effective in the patent until the certificate under 35 U.S.C. 316 is issued >and published<.

Amendments must not enlarge the scope of a claim of the patent nor introduce new matter. Amended or new claims which broaden or enlarge the scope of a claim of the patent should be rejected under 35 U.S.C. 314(a). The test for when an amended or "new claim enlarges the scope of an original claim under 35 U.S.C. 314(a) is the same as that under the 2-year limitation for reissue applications adding enlarging claims under 35 U.S.C. 251, last paragraph." *In re Freeman*, 30 F.3d 1459, 1464, 31 USPQ2d 1444, 1447 (Fed. Cir. 1994). See MPEP § 2658 for a discussion of enlargement of the claim scope. For handling of new matter, see MPEP § 2670.

If the patent expires during the reexamination procedure, and the patent claims have been amended, the Office will hold the amendments as being improper and all subsequent reexamination will be on the basis of the unamended patent claims. This procedure is necessary since no amendments will be incorporated into the patent by certificate after the expiration of the patent. See 37 CFR 1.941 and 37 CFR 1.530(j). The patent expiration date for a utility patent, for example, is determined by taking into account the term of the patent, whether maintenance fees have been paid for the patent, whether any disclaimer was filed as to the patent to shorten its term, any patent term extensions or adjustments for delays within the USPTO under 35 U.S.C. 154 (see MPEP § 2710, *et seq*.), and any patent term extensions available under 35 U.S.C. 156 for premarket regulatory review (see MPEP § 2750 *et. seq*.). Any other relevant information should also be taken into account.

Once the patent expires, a narrow claim construction is applied. See MPEP § 2258, **>subsection I.G.< "Claim Interpretation and Treatment."

Amendment Entry - Amendments which comply with 37 CFR 1.530(d)-(j) and 37 CFR 1.943 (and are formally presented pursuant to 37 CFR 1.52(a) and (b), and contain fees required by 37 CFR 1.20(c)) will be entered in the reexamination file pursuant to the guidelines set forth in MPEP § 2234.

Manner of Making Amendments - Amendments in an *inter partes* reexamination proceeding are made in the same manner that amendments in an *ex parte* reexamination proceeding are made. See MPEP § 2250 for guidance as to the manner of making amendments in a reexamination proceeding.

Form paragraph 22.12 may be used to advise the patent owner of the proper manner of making amendments in an *inter partes* reexamination proceeding.

¶ *22.12 Amendments Proposed in a Reexamination - 37 CFR 1.530(d)-(j)*

Patent owner is notified that any proposed amendment to the specification and/or claims in this reexamination proceeding must comply with 37 CFR 1.530(d)-(j), must be formally presented pursuant to 37 CFR 1.52(a) and (b), and must contain any fees required by 37 CFR 1.20(c).

Examiner Note:

This paragraph may be used in the order granting reexamination and/or in the first Office action to advise patent owner of the proper manner of making amendments in a reexamination proceeding.

Form paragraph 26.05.01 may be used to notify patent owner in an *inter partes* reexamination proceeding that a proposed amendment in the proceeding does not comply with 37 CFR 1.530(d)-(j).

¶ *26.05.01 Improper Amendment in an Inter Partes Reexamination - 37 CFR 1.530(d)-(j)*

The amendment filed **[1]** proposes amendments to **[2]** that do not comply with 37 CFR 1.530(d)-(j), which sets forth the manner of making amendments in reexamination proceedings. A supplemental paper correctly proposing amendments in the present *inter partes* reexamination proceeding is required.

A shortened statutory period for response to this letter is set to expire ONE MONTH or THIRTY DAYS, whichever is longer, from the mailing date of this letter. If the patent owner fails to timely correct this informality, the amendment will be held not to be an appropriate response, and the consequences set forth in 37 CFR 1.957(b) or (c) will result. See MPEP § 2666.10

Examiner Note:

This paragraph may be used for any 37 CFR 1.530(d)-(j) informality as to a proposed amendment submitted in a reexamination proceeding.

The cover sheet to be used for mailing the notification to the patent owner will be PTOL-2069.

As an alternative to using form paragraph 26.05.01, it would also be appropriate to use form PTOL-2069, box 4.

For clerical handling of amendments, see MPEP § 2670. For entry of an amendment in a merged reexamination proceeding, see MPEP § 2686.01 and § 2686.03. For handling of a dependent claim in reexamination proceedings, see MPEP § 2660.03.

2666.02 Correction of Patent Drawings [Added R-2]

37 CFR 1.941. Amendments by patent owner in inter partes reexamination.

Amendments by patent owner in *inter partes* reexamination proceedings are made by filing a paper in compliance with §§ 1.530(d)-(k) and 1.943.

37 CFR 1.530. Statement by patent owner in ex parte reexamination; amendment by patent owner in ex parte or inter partes reexamination; inventorship change in ex parte or inter partes reexamination.

*****

(d) *Making amendments in a reexamination proceeding.* A proposed amendment in an *ex parte* or an *inter partes* reexamination proceeding is made by filing a paper directing that proposed specified changes be made to the patent specification, including the claims, or to the drawings. An amendment paper directing that proposed specified changes be made in a reexamination proceeding may be submitted as an accompaniment to a request filed by the patent owner in accordance with § 1.510(e), as part of a patent owner statement in accordance with paragraph (b) of this section, or, where permitted, during the prosecution of the reexamination proceeding pursuant to § 1.550(a) or § 1.937.

*****

(3) *Drawings.* Any change to the patent drawings must be submitted as a sketch on a separate paper showing the proposed changes in red for approval by the examiner. Upon approval of the changes by the examiner, only new sheets of drawings including the changes and in compliance with § 1.84 must be filed. Amended figures must be identified as "Amended," and any added figure must be identified as "New." In the event a figure is canceled, the figure must be surrounded by brackets and identified as "Canceled."

*****

In the reexamination proceeding, the copy of the patent drawings submitted pursuant to 37 CFR 1.915(b)(5) will be used for reexamination purposes, provided no change is made to the drawings. If there is **any** change in the drawings, a new sheet of drawing for each sheet changed must be submitted. The change may **not** be made on the original patent drawings. Drawing changes in an *inter partes* reexamination proceeding are made in the same manner that drawing changes in an *ex parte* reexamination proceeding are made. 37 CFR 1.530(d)(3) sets forth the

manner of making amendments to the drawings. Any amended figure(s) must be identified as "Amended" and any added figure(s) must be identified as "New." In the event a figure is canceled, the figure must be surrounded by brackets and identified as "Canceled."

Where the patent owner wishes to change/amend the drawings, the patent owner should submit a sketch in permanent ink showing the proposed change(s)/amendment(s) in red, for approval by the examiner. The submitted sketch should be presented as a separate paper, and it will be made part of the record. Once the sketch is approved, sheets of substitute formal drawings must be submitted for each drawing sheet that is to be changed/amended. After receiving the new sheets of drawings from the patent owner, the examiner may have the draftsperson review the new sheets of drawings if the examiner would like the draftsperson's assistance in identifying errors in the drawings. If a draftsperson reviews the drawings, and finds the drawings to be unacceptable, the draftsperson should complete a PTO-948 for the examiner to include with the next Office action. A draftsperson's "stamp" to indicate approval is no longer required on patent drawings, and these stamps are no longer to be used by draftspersons. The new sheets of drawings should be entered in the reexamination file.

2666.03 Correction of Inventorship [Added R-2]

Correction of inventorship in an *inter partes* reexamination proceeding is effected in the same manner that correction of inventorship in an *ex parte* reexamination proceeding is effected. See MPEP § 2250.02 for the manner of correcting inventorship in both *inter partes* and *ex parte* reexamination proceedings.

2666.04 Fees for Adding Claims [R-7]

37 CFR 1.20. Post issuance fees

*****

(c) In reexamination proceedings

(1) For filing a request for *ex parte* reexamination (§ 1.510(a))....$2,520.00

(2) For filing a request for *inter partes* reexamination (§ 1.915(a))....$8,800.00

**>

(3) For filing with a request for reexamination or later presentation at any other time of each claim in independent form in excess of 3 and also in excess of the number of claims in independent form in the patent under reexamination:

By a small entity (§ 1.27(a))....$105.00

By other than a small entity $210.00

(4) For filing with a request for reexamination or later presentation at any other time of each claim (whether dependent or independent) in excess of 20 and also in excess of the number of claims in the patent under reexamination (note that § 1.75(c) indicates how multiple dependent claims are considered for fee calculation purposes):

By a small entity (§ 1.27(a))....$25.00

By other than a small entity $50.00

<

(5) If the excess claims fees required by paragraphs (c)(3) and (c)(4) are not paid with the request for reexamination or on later presentation of the claims for which the excess claims fees are due, the fees required by paragraphs (c)(3) and (c)(4) must be paid or the claims canceled by amendment prior to the expiration of the time period set for reply by the Office in any notice of fee deficiency in order to avoid abandonment.

*****

Excess claims fees as specified in 35 U.S.C. 41(a)(2) as amended by the Consolidated Appropriations Act of 2005 are applicable to excess claims proposed to be added to a patent by their presentation during a reexamination proceeding. Under "former" 35 U.S.C. 41, excess claims fees were included as part of the "application" filing fee under 35 U.S.C. 41(a)(1), and thus did not apply during reexamination proceedings. The Consolidated Appropriations Act does not include the excess claims as part of the "application" filing fee under 35 U.S.C. 41(a)(1), but separately provides for excess claims fees in 35 U.S.C. 41(a)(2) (as being in addition to the filing fee in 35 U.S.C. 41(a)(1)). 35 U.S.C. 41(a)(2) provides that an excess claims fee is due "on filing or on presentation at any other time" (e.g., during a reexamination proceeding) of an independent claim in excess of three or of a claim (whether independent or dependent) in excess of twenty.

37 CFR 1.20 was amended, effective December 8, 2004, to provide for excess claims fees in a reexamination proceeding. The excess claims fees specified in 37 CFR 1.20(c) apply to all patents eligible for *inter partes* reexamination. The fees must be submitted for any excess claims presented in a reexamination proceeding on or after December 8, 2004 (no excess claims fee was due under 35 U.S.C. 41 for any claim presented during a reexamination proceeding before December 8, 2004). Even though a reexamination proceeding was commenced prior to December 8,

2004, the excess claims fees are due for any amendment filed on or after December 8, 2004.

When a patent owner presents an amendment to the claims (on or after December 8, 2004) during an *inter partes* reexamination proceeding, excess claims fees may be applicable. If the amendment is limited to revising the existing claims, i.e., it does not provide any new claim, there is no claim fee. The excess claims fees apply only to the submission of new, i.e., "excess" claims.

The excess claims fees specified in 37 CFR 1.20(c) apply to excess claims that result from an amendment as follows:

(A) The fee designated in 37 CFR 1.20(c)(3) as the independent claims fee must be paid for each independent claim in excess of three and also in excess of the number of independent claims in the patent being reexamined. The amendment must increase the number of independent claims to be more than both of these limits, in order for the "independent excess claims fee" to apply;

(B) The fee designated in 37 CFR 1.20(c)(4) as the total claims fee must be paid for each claim (whether independent or dependent) in excess of twenty and also in excess of the number of claims in the patent being reexamined. The amendment must increase the total number of claims to be more than both of these limits, in order for the "total excess claims fee" to apply.

The following examples illustrate the application of the excess claims fees in a patent (non-small entity) to be reexamined containing six independent claims and thirty total claims:

(A) No excess claims fee is due if the patent owner cancels ten claims, two of which are independent, and adds ten claims, two of which are independent.

(B) The 37 CFR 1.20(c)(3) excess independent claims fee for a seventh independent claim is due if the patent owner cancels ten claims, two of which are independent, and adds ten claims, three of which are independent.

(C) The 37 CFR 1.20(c)(4) excess total claims fee for a thirty-first claim is due if the patent owner cancels ten claims, two of which are independent, and adds eleven claims, two of which are independent.

(D) The 37 CFR 1.20(c)(3) excess independent claims fee for a seventh independent claim and the 37 CFR 1.20(c)(4) excess total claims fee for a thirty-first claim are due if the patent owner cancels ten claims, two of which are independent, and adds eleven claims, three of which are independent.

A claim that has been disclaimed under 35 U.S.C. 253 and 37 CFR 1.321(a) as of the date of filing of the request for reexamination is not considered to be a claim in the patent under reexamination for purposes of excess claims fee calculations. The same applies to a claim canceled via a prior Reexamination Certificate, reissue patent, or Certificate of Correction.

If the excess claims fees required by 37 CFR 1.20(c)(3) and (c)(4) are not paid with the presentation of the excess claims, a notice of fee deficiency will be issued as a Notice of Defective Paper In *Inter Partes* Reexamination, PTOL-2069. A one-month time period will be set in the form PTOL-2069 for correction of the defect, i.e., the fee deficiency. An extension of time to correct the fee deficiency may be requested under 37 CFR 1.956. If the unpaid excess claims fees required by 37 CFR 1.20(c)(3) and (c)(4) are not paid within the time period set for response to the Notice, the prosecution of the reexamination proceeding will be terminated under 37 CFR 1.957(b) or limited under 37 CFR 1.957(c) (as is appropriate for the particular case), to effect the "abandonment" set forth in 37 CFR 1.20(c)(5).

2666.05 Third Party Comments After Patent Owner Response [R-7]

37 CFR 1.947. Comments by third party requester to patent owner's response in inter partes reexamination.

Each time the patent owner files a response to an Office action on the merits pursuant to § 1.945, a third party requester may once file written comments within a period of 30 days from the date of service of the patent owner's response. These comments shall be limited to issues raised by the Office action or the patent owner's response. The time for submitting comments by the third party requester may not be extended. For the purpose of filing the written comments by the third party requester, the comments will be considered as having been received in the Office as of the date of deposit specified in the certificate under § 1.8.

37 CFR 1.948. Limitations on submission of prior art by third party requester following the order for inter partes reexamination.

(a) After the *inter partes* reexamination order, the third party requester may only cite additional prior art as defined under § 1.501 if it is filed as part of a comments submission under § 1.947 or § 1.951(b) and is limited to prior art:

(1) which is necessary to rebut a finding of fact by the examiner;

(2) which is necessary to rebut a response of the patent owner; or

(3) which for the first time became known or available to the third party requester after the filing of the request for *inter partes* reexamination proceeding. Prior art submitted under paragraph (a)(3) of this section must be accompanied by a statement as to when the prior art first became known or available to the third party requester and must include a discussion of the pertinency of each reference to the patentability of at least one claim.

(b) [Reserved].

I. TIMELINESS

A third party requester may once file written comments on any patent owner response to an Office action, during the examination stage of an *inter partes* reexamination proceeding. The third party requester comments must be filed within a period of 30 days from the **date of service** of the patent owner's response on the third party requester. 37 CFR 1.947. The date that the Office receives the patent owner's response has no bearing on the time period for which the third party requester must file the comments.

The certificate of mailing and the certificate of transmission procedures (37 CFR 1.8), and the "Express Mail" mailing procedure (37 CFR 1.10), may be used to file comments. Any comments by the third party requester must be served upon the patent owner in accordance with 37 CFR 1.248, - see also MPEP § 2666.06.

If the third party requester comments are filed after 30 days from the **date of service** of the patent owner's response on the third party requester, the comments will not be considered. See 37 CFR 1.957(a).

>The following special circumstance is to be noted. In unique circumstances, it may happen that a patent owner files a response to an Office action and the page length of the response exceeds the page length set by 37 CFR 1.943(b). Accompanying the response is a petition under 37 CFR 1.183 requesting waiver of the 37 CFR 1.943(b) requirement. Until such a 37 CFR 1.183 petition to waive the page length is granted, or a page length compliant response is filed (if the 37 CFR 1.183 petition is not granted), the patent owner response is incomplete. Pursuant to MPEP § 2666.40, "[a]fter the owner completes the response, the examiner will wait two months from the date of service of the patent owner's completion of the response, and then take up the case for action, since the 30 days for the third party requester comments on the response as completed will have expired by that time. The third party requester may file comments on the response as completed …The response as completed is treated as a new response on-the-merits to the Office action; thus, the third party requester is entitled to file comments and has 30 days to do so." Based on the above, at the time the 37 CFR 1.183 petition is granted, the patent owner response becomes complete with its content being set in place, and the requester has 30 days from the date of the decision granting the 37 CFR 1.183 petition to file a comment paper pursuant to 37 CFR 1.947.

When the requester takes issue with the page length of the patent owner's response and there the patent owner has not filed a petition requesting waiver of the page length requirement, the requester may file a petition to strike under 37 CFR 1.182 (with the appropriate fee) along with its comments on patent owner's response (which must be filed within 30 days from the date of service of the response). The 37 CFR 1.182 petition may request that (A) if the patent owner response is struck, then the accompanying comments should not be entered, and the requester's comment period be re-set to run 30 days from the date of service of a corrected patent owner response, and (B) if the petition to strike is denied/dismissed, then the comments accompanying the petition should be entered and that 37 CFR 1.943(b) be waived to the extent that entry of the accompanying comment paper is permitted.<

II. CONTENT

The third party requester comments must be directed to points and issues covered by the Office action and/or the patent owner's response. The written comments filed by a third party requester should specify the issues and points in the Office action or the patent owner's response to which each comment is directed. Thus, the third party requester should (*>1<) set forth the point or issue, (*>2<) state the page of the Office action and/or the patent owner response where the point or issue is recited, and (*>3<) then present the third party requester's discussion and argument as to the point or issue. If this is not done by the third party requester, the comments should not be held defective if the examiner can ascertain that all of the comments filed by the third party requester are

directed to the issues and points in the Office action and/or the patent owner's response.

Third party requester comments are limited to issues covered by the Office action or the patent owner's response. New prior art can be submitted with the comments **only** where the prior art (A) is necessary to rebut a finding of fact by the examiner, (B) is necessary to rebut a response of the patent owner, or (C) for the first time became known or available to the third party requester after the filing of the request for *inter partes* reexamination. **

>As to item (A) above, 37 CFR 1.948(a)(1) permits the requester to provide new prior art rebutting the examiner's interpretation/finding of what the art of record shows. However, a statement in an Office action that a particular claimed feature is not shown by the prior art of record (which includes references that were cited by requester) does NOT permit the requester to then cite new art to replace the art originally advanced by requester. Such a substitution of a new art for the art of record is not a rebuttal of the examiner's finding that a feature in question is not taught by the art of record. Rather, such a substitution would amount to a rebuttal of a finding that a feature in question is not taught by any art in existence. A finding that the feature in question is not taught by any art in existence could not realistically be made for the reexamination proceeding, since the proceeding does not include a comprehensive validity search, and such was not envisioned by Congress as evidenced by the 35 U.S.C. 314(c) mandate that reexamination proceedings are to be conducted in the Office with special dispatch.

As to item (B) above, 37 CFR 1.948(a)(2) permits the requester to provide a new proposed rejection, where such new proposed rejection is necessitated by patent owner's amendment of the claims.

As to item (C) above, prior art submitted under 37 CFR 1.948(a)(3) must be accompanied by a statement that explains the circumstances as to when the prior art first became known or available to the third party requester, including the date and manner that the art became known or available, and why it was not available earlier. The submission must also include a discussion of the pertinency of each reference to the patentability of at least one claim.

As to items (A) – (C) above where a newly proposed rejection is based on the newly presented prior patents and printed publications (art), the third party requester must present the newly proposed rejection in compliance with the guidelines set forth in MPEP § 2617, since any such new proposed rejection stands on the same footing as a proposed rejection presented with the request for reexamination, and is treated the same way as to future Office actions and any appeal. See MPEP § 2617 as to the required discussion of the pertinency of each reference to the patentability of at least one claim presented for the newly submitted prior art. An explanation pursuant to the requirements of 35 U.S.C. 311 of how the art is applied is no less important at this stage of the prosecution, than it is when filing the request.<

Where the third party requester written comments are directed to matters other than issues and points covered by the Office action or the patent owner's response, or where the prior art submitted with the comments does not satisfy at least one of (A) - (C) above, the written comments are improper. If the written comments are improper, the examiner should return the written comments (the entire paper) with an explanation of what is not proper**>; if the comments have been scanned into the Image File Wrapper (IFW) for the reexamination proceeding prior to the discovery of the impropriety, they should be expunged from the record, with notification being sent to the third party requester. The notification to the third party requester is to provide a time period of fifteen (15)< days for the third party requester to rectify and refile the comments. If, upon the second submission, the comments are still not proper, the comments will be returned to third party >requester< with an explanation of what is not proper, and at that point the comments can no longer be resubmitted. The loss of right to submit further comments applies only to the patent owner response at hand. See MPEP § 2666.20. >To the extent that 37 CFR 1.947 provides that the third party requester "may once" file written comments, that provision is hereby waived to the extent of providing the third party requester the one additional opportunity to remedy a comments paper containing merits-content that goes beyond what is permitted by the rules; 37 CFR 1.947 is not waived to provide any further opportunity in view of the statutory requirement for special dispatch in reexamination.

Any replacement comments submitted in response to the notification must be strictly limited to (i.e.,

must not go beyond) the comments in the original (returned) comments submission. No comments that add to those in the returned paper will be considered for entry.<

The >above< practice of giving the third party requester a time period of *>15< days to rectify and refile comments that are **>responsive but go beyond the regulatory requirements to the extent discussed above< should not be confused with the situation where the third party requester files comments that are late (untimely), or such comments are "inappropriate" within the meaning of 37 CFR 1.957(a) and the time for response has expired. Where the comments are late or inappropriate, an additional 30 days is not given; rather, the comments must be refused consideration pursuant to 37 CFR 1.957(a).

The third party requester is not permitted to file further papers to supplement the third party requester's written comments. Any such improper supplemental comments will not be considered, and will be returned. A third party requester may, however, file written comments to any supplemental response filed by the patent owner.

See MPEP § 2666.20 for the situation where a third party requester elects not to file written comments on a patent owner response.

Where the patent owner does not respond to an Office action, the third party requester is prohibited from filing written comments under 37 CFR 1.947.

Note that a prior art citation which is proper under 37 CFR 1.501 and is submitted by any party as a separate paper and does not include argument and comments and does not go to the merits of the case, will not be returned, but rather will be stored until the ongoing reexamination proceeding is concluded. See MPEP § 2204 and 2206. Also note that prior art returned by the examiner in connection with the third party requester comments as discussed above can be resubmitted as a separate prior art citation under 37 CFR 1.501, and it will be stored until the ongoing reexamination proceeding is concluded.

III. EXAMINER WITHDRAWS A GROUND OF REJECTION

If the examiner withdraws a ground of rejection at any time in the prosecution of the *inter partes* reexamination proceeding, the following guidelines apply:

(A) Where the examiner withdraws a ground of rejection originally initiated by the examiner, such withdrawal should be clearly stated in the Office action as a decision favorable to patentability with respect to the withdrawn rejection. The third party requester's next set of comments that may be filed (after a patent owner response to an action) may propose the withdrawn rejection as a "rejection proposed by the third party requester." In the event the patent owner fails to respond to all actions leading to the Right of Appeal Notice (RAN), including the Action Closing Prosecution (ACP), and a RAN is then issued, the third party requester may appeal this withdrawal of rejection as a final decision favorable to patentability. See 37 CFR 41.61(a)(2). Likewise, where the rejection is first withdrawn in the RAN, there will be no requester opportunity to comment prior to appeal, and the requester may appeal this withdrawal of rejection in the RAN as a final decision favorable to patentability.

(B) Where the claims have not been amended and the examiner withdraws a ground of rejection previously proposed by the third party requester (e.g., based on patent owner's argument or evidence submitted), the examiner should treat the issue as a rejection proposed by the third party requester that the examiner refuses to adopt.

(C) Generally (subject to the below-stated exception), where the claims have been amended and the examiner withdraws a ground of rejection previously proposed by the third party requester, this is not a refusal of the examiner to adopt the rejection proposed by the requester, since the rejection was never proposed as to the amended claims. The third party requester's next set of comments that may be filed (after a patent owner response to an action) may propose the withdrawn rejection as a "rejection proposed by the third party requester" as to the amended claims. In the event the patent owner fails to respond to all actions leading to the RAN, including the ACP, and a RAN is then issued, the third party requester may appeal this withdrawal of rejection as a final decision favorable to patentability. See 37 CFR 41.61(a)(2). Likewise, where the rejection is first withdrawn in the RAN, there will be no requester opportunity to comment prior to appeal, and the requester may appeal this withdrawal of rejection in the RAN as a final decision favorable to patentability.

(D) If a claim is amended merely to include a dependent claim that was previously subjected to a proposed requester rejection, and the examiner withdraws that ground of rejection as to the newly amended claim, such would be a refusal to adopt the third party requester's previously proposed rejection of the dependent claim. Thus, the examiner would treat the issue as a rejection proposed by the third party requester that the examiner refuses to adopt.

2666.06Service of Papers [R-7]

37 CFR 1.915. Content of request for inter partes reexamination.

*****

(b) A request for *inter partes* reexamination must include the following parts:

*****

(6) A certification by the third party requester that a copy of the request has been served in its entirety on the patent owner at the address provided for in § 1.33(c). The name and address of the party served must be indicated. If service was not possible, a duplicate copy of the request must be supplied to the Office.

*****

37 CFR 1.903. Service of papers on parties in inter partes reexamination.

The patent owner and the third party requester will be sent copies of Office actions issued during the *inter partes* reexamination proceeding. After filing of a request for *inter partes* reexamination by a third party requester, any document filed by either the patent owner or the third party requester must be served on every other party in the reexamination proceeding in the manner provided in § 1.248. Any document must reflect service or the document may be refused consideration by the Office. The failure of the patent owner or the third party requester to serve documents may result in their being refused consideration.

Any paper filed with the Office, i.e., any submission made, by either the patent owner or the third party requester must be served on every other party in the reexamination proceeding including any other third party requester that is part of the proceeding due to merger of reexamination proceedings.

As proof of service, the party submitting the paper to the Office must attach a certificate of service to the paper. It is required that the certificate of service set forth the name and address of the party served and the method of service. Further, a copy of the certificate of service must be attached with the copy of the paper that is served on the other party.

**>Lack of service poses a problem, since, by statute (35 U.S.C. 314(b)(2)), a third party requester must file written comments within a period of 30 days from the date of service of the patent owner's response, in order to be timely. In any instance where proof of service is not attached to a paper<, a Notice of Defective Paper (PTOL-2069) will be mailed to the party, providing the party with a time period of one month or 30 days, whichever is longer, to complete the paper via a supplemental paper indicating the manner and date of service.

If it is known that service of a submission was not made, form paragraph 26.68 should be used to give notice to the party that made the submission of the requirement for service under 37 CFR 1.903.

¶ *26.68 Lack of Service in inter partes examination-37 CFR 1.903*

The submission filed **[1]** is defective because it appears that the submission was not served on **[2]**. After the filing of a request for *inter partes* reexamination by a third party requester, any document filed by either the patent owner or the third party requester must be served on the other party (or parties where two third party requester proceedings are merged) in the *inter partes* reexamination proceeding in the manner provided in 37 CFR 1.248. See 37 CFR 1.903.

It is required that service of the submission be made, and a certificate of service be provided to the Office, within ONE MONTH from the date of this letter or within the time remaining in the response period of the last Office action (if applicable), whichever is longer.

Examiner Note:

1. This paragraph may be used where a submission to the Office was not served as required in an *inter partes* reexamination proceeding.
2. In bracket 2, insert "patent owner" or "third party requester," whichever is appropriate.

PTOL-2071 should be used as the cover sheet for mailing the notice.

See MPEP § 2620 for service of the initial request on the patent owner.

>As pointed out above, the service provision of the statute poses a problem, since, 35 U.S.C. 314(b)(2) mandates that, in order to be timely, a third party requester must file any written comments to the patent owner's response (to an Office action on the merits) within a period of 30 days from the date of service of such patent owner's response. Accordingly, if a patent owner's response to an Office action on the

merits that is served on a third party requester is received by the third party requester more than 5 business days after the date of service set forth on the certificate of service, the third party requester may submit a verified statement, specifying the date of actual receipt, as an attachment to the third party requester's comments. The date of service will then be deemed by the Office to be the date of actual receipt by the third party requester of the patent owner's response.<

2666.10 Patent Owner Does Not Respond to Office Action [R-7]

37 CFR 1.957. Failure to file a timely, appropriate or complete response or comment in inter partes reexamination.

(a) If the third party requester files an untimely or inappropriate comment, notice of appeal or brief in an *inter partes* reexamination, the paper will be refused consideration.

(b) **>If no claims are found patentable, and the patent owner fails to file a timely and appropriate response in an *inter partes* reexamination proceeding, the prosecution in the reexamination proceeding will be a terminated prosecution and the Director will proceed to issue and publish a certificate concluding the reexamination proceeding under § 1.997 in accordance with the last action of the Office.<

(c) If claims are found patentable and the patent owner fails to file a timely and appropriate response to any Office action in an *inter partes* reexamination proceeding, further prosecution will be limited to the claims found patentable at the time of the failure to respond, and to any claims added thereafter which do not expand the scope of the claims which were found patentable at that time.

(d) When action by the patent owner is a *bona fide* attempt to respond and to advance the prosecution and is substantially a complete response to the Office action, but consideration of some matter or compliance with some requirement has been inadvertently omitted, an opportunity to explain and supply the omission may be given.

I. OFFICE ACTION PRIOR TO ACTION CLOSING PROSECUTION

If the patent owner fails to file a timely response to any Office action prior to an Action Closing Prosecution (ACP), it will result in the following consequences set forth in 37 CFR 1.957(b) or (c):

(A) Where there were no claims found patentable in the Office action, the examiner will issue a Notice of Intent to Issue *Inter Partes* Reexamination Certificate (NIRC) terminating prosecution and indicating the status of the claims as canceled. See MPEP § 2687.

(B) Where at least one claim is found patentable, all future prosecution will be limited to the claim(s) found patentable at the time of the failure to respond and to claims which do not expand the scope of the claim(s) found patentable at that time. The patent owner will not be permitted to add claims broader in the scope than the patentable claims which remain in the proceeding at the time of the patent owner's failure to timely respond. The examiner will proceed to issue an ACP indicating that:

(1) Any claims under rejection or objection are withdrawn from consideration and will be canceled upon publication of the certificate; and

(2) Prosecution will be limited to the claim(s) found patentable at the time of the failure to respond and to claims which do not expand the scope of the claim(s) found patentable at that time.

The ACP will set a period for the patent owner response and the third party requester comments under 37 CFR 1.951. See also MPEP § 2671.02 and § 2671.03.

II. ACTION CLOSING PROSECUTION

A response to an ACP is not required. Where the patent owner does not respond to an ACP, the Office will issue an Right of Appeal Notice (see MPEP § 2673.02) in due course. Accordingly, the consequences of 37 CFR 1.957(b) and (c), do NOT apply to the patent owner's failure to respond to an ACP.

III. RIGHT OF APPEAL NOTICE AND APPEAL

Where the patent owner fails to make a timely appeal after the issuance of a Right of Appeal Notice, or where a timely patent owner's appeal is subsequently dismissed, the following consequences would result:

(A) If no claim was found patentable at the time that the patent owner fails to take the timely action, a NIRC will immediately be issued. See MPEP § 2687.

(B) Where at least one claim was found patentable and the third party requester does not appeal, or fails to continue its appeal, the prosecution of the reexamination proceeding should be terminated in

accordance with 37 CFR 1.957(b). In order to do so, a NIRC will be issued. See MPEP § 2687.

(C) Where at least one claim was found patentable and the third party appellant continues its appeal, the claims in the proceeding will be limited to the claim(s) found patentable at the time that the patent owner fails to take the timely action, and all other claims will be withdrawn from consideration pending cancellation of same when the NIRC is issued. Any future prosecution is limited to the claims that do not expand the scope of the claim(s) found patentable at that time.

IV. FAILURE OF THIRD PARTY REQUESTER TO TIMELY SUBMIT PAPER

See MPEP § 2666.20 for a discussion of the consequences where the third party requester fails to timely submit a paper where a time period is set for same.

2666.20 Third Party Does Not Comment After Patent Owner Response [R-3]

37 CFR 1.957. Failure to file a timely, appropriate or complete response or comment in inter partes reexamination.

(a) If the third party requester files an untimely or inappropriate comment, notice of appeal or brief in an *inter partes* reexamination, the paper will be refused consideration.

*****

Where a third party requester does not timely file written comments on a patent owner response, any subsequent submission of comments on **that response** will be refused consideration. The third party requester does not, however, lose any rights as to commenting on *future* patent owner responses. The failure to file the comments applies only to the specific response which the third party requester elects not to comment upon.

Note that where the third party requester did not file comments on a response that was determined by the Office to be incomplete, the third party requester may file comments on the response once it is completed (by patent owner's submission of a supplemental response). However, where only a fee >(other than an excess claims fee to support an amendment)< is needed to complete the response, the third party requester may not file comments after the fee is submitted; see MPEP § 2666.40 for a detailed discussion.

Where the third party requester fails to make a timely appeal or the third party requester's appeal is dismissed, the third party requester loses further rights as **the appellant** in the appeal. However, where a patent owner appellant continues its appeal, the third party requester as the respondent can file a respondent brief. Also, the third party requester can enter the appeal pursuant to 37 CFR *>41.77(c) and (e)< (submission after a Board of Patent Appeals and Interferences decision). In addition, the third party requester can comment on any subsequent patent owner response to any Office action, where the action is issued after the appeal.

Where the third party requester fails to timely appeal, or the requester's appeal is dismissed, and *no other appeal is pending in the proceeding*, the >prosecution of the reexamination< proceeding should be terminated by the issuance of a NIRC.

2666.30 Submission Not Fully Responsive to Non-final Office Action [R-3]

37 CFR 1.957. Failure to file a timely, appropriate or complete response or comment in inter partes reexamination.

*****

(d) When action by the patent owner is a *bona fide* attempt to respond and to advance the prosecution and is substantially a complete response to the Office action, but consideration of some matter or compliance with some requirement has been inadvertently omitted, an opportunity to explain and supply the omission may be given.

A response by the patent owner will be considered not fully responsive to a non-final Office action where a bona fide response to an examiner's Office action is filed before the expiration of the permissible response period but through an apparent oversight or inadvertence, some point necessary to a full response has been omitted (i.e., appropriate consideration of a matter that the action raised, or compliance with some requirement, has been omitted). In this situation, >the prosecution of< the reexamination proceeding should not be terminated. Rather, the examiner may, pursuant to 37 CFR 1.957(d), treat the patent owner submission which is not fully responsive to an Office action by:

(A) waiving the deficiencies (if not serious) in the response and acting on the patent owner submission;

(B) treating the amendment/response as an incomplete response to the Office action and notifying the patent owner (via a written notification action pursuant to 37 CFR 1.957(d)) that the response must be completed within the period for response set in the notification action (or within any extension pursuant to 37 CFR 1.956)) to avoid *>termination< of the prosecution (pursuant to 37 CFR 1.957(b)) or limiting prosecution of the claims to those found patentable (pursuant to 37 CFR 1.957(c)).

Discussion of Option (A). Where a patent owner submission responds to the rejections, objections, or requirements in an Office action and is a *bona fide* attempt to advance the reexamination proceeding to final action, but contains a minor deficiency (e.g., fails to treat every rejection, objection, or requirement), the examiner may simply act on the amendment and issue a new Office action. The new Office action may simply reiterate the rejection, objection, or requirement not addressed by the patent owner submission, or the action may indicate that such rejection, objection, or requirement is no longer applicable. In the new Office action, the examiner will identify the part of the previous Office action which was not responded to and clearly indicate what is needed. This course of action would not be appropriate in instances in which a patent owner submission contains a serious deficiency (e.g., the patent owner submission does not appear to have been filed in response to the Office action).

Discussion of Option (B). Where the patent owner's submission contains a serious deficiency, i.e., omission, to be dealt with prior to issuing an action on the merits and the period for response has expired, or there is insufficient time remaining to take corrective action before the expiration of the period for response, *the patent owner should be notified of the deficiency and the correction needed, and given a new time period for response (usually 1 month)* pursuant to 37 CFR 1.957(d). The patent owner must then supply the omission within the new time period for response or any extensions under 37 CFR 1.956 thereof to avoid *>termination< of the prosecution (pursuant to 37 CFR 1.957(b)) or limiting prosecution of the claims to those found patentable (pursuant to 37 CFR 1.957(c)).

Form paragraph 26.06 may be used where option (B) is employed by the examiner to obtain correction of the deficiency.

**>

¶ *26.06 Submission Not Fully Responsive to Office Action*

The communication filed on **[1]** is not fully responsive to the prior Office action. **[2]**. The response appears to be *bona fide*, but through an apparent oversight or inadvertence, consideration of some matter or compliance with some requirement has been omitted. Patent owner is required to supply the omission or correction to thereby provide a full response to the prior Office action.

A shortened statutory period for response to this letter is set to expire (a) ONE MONTH, or THIRTY DAYS (whichever is longer), from the mailing date of this letter, or (b) after the due date for response to the last Office action, whichever of (a) or (b) is longer. THE PERIOD FOR RESPONSE SET IN THIS LETTER MAY BE EXTENDED UNDER 37 CFR 1.956.

If patent owner fails to timely supply the omission or correction and thereby provide a full response to the prior Office action, the consequences set forth in 37 CFR 1.957(b) or (c) will result. See MPEP § 2666.10.

Examiner Note:

1. In bracket 2, the examiner should explain the nature of the omitted point necessary to complete the response, i.e., what part of the Office action was not responded to. The examiner should also clearly indicate what is needed to correct the omission.
2. This paragraph may be used for a patent owner communication that is not completely responsive to the outstanding (i.e., prior) Office action. See MPEP § 2666.30.
3. This practice does not apply where there has been a deliberate omission of some necessary part of a complete response. See MPEP § 2666.30.

<

I. NO NOTIFICATION BY TELEPHONE

It should be noted that the patent owner cannot simply be notified by telephone that the omission must be supplied within the remaining time period for response. This notification would be an interview, and interviews are prohibited in *inter partes* reexamination. 37 CFR 1.955.

II. FURTHER DISCUSSION

The practice of giving the patent owner a time period to supply an omission in a *bona fide* response (pursuant to 37 CFR 1.957(d)) does not apply where there has been a deliberate omission of some necessary part of a complete response. It is applicable **only** when the missing matter or lack of compliance is considered by the examiner as being "inadvertently omit-

ted" pursuant to 37 CFR 1.957(d). Once an inadvertent omission is brought to the attention of the patent owner, the question of inadvertence no longer exists. Therefore, a second written notification action giving another new (1 month) time period to supply the omission would not be appropriate. However, if the patent owner's response to the notification of the omission raises a **different** issue of a different inadvertently omitted matter, a second written notification action may be given.

This practice authorizes, but does not require, an examiner to give the patent owner a new time period to supply an omission. Thus, where the examiner concludes that the patent owner is attempting to abuse the practice to obtain additional time for filing a response, the practice should not be followed.

2666.40 Patent Owner Completion of Response and Third Party Comments Thereon [R-3]

In most cases, the patent owner will have 30-days or one month (whichever is longer) to complete the response. After the owner completes the response, the examiner will wait two months from the date of service of the patent owner's completion of the response, and then take up the case for action, since the 30 days for the third party requester comments on the response as completed will have expired by that time.

The third party requester may file comments on the response as completed. This is true whether or not the third party requester filed comments on the response that was incomplete. The response as completed is treated as a new response on-the-merits to the Office action; thus, the third party requester is entitled to respond and has 30 days to do so.

In some instances, only a fee will be needed for the patent owner to complete the response. In these instances >(other than a failure to pay excess claims fees)<, any third party requester comments must be filed within 30 days from the date of service of the patent owner's original response (which was indicated by the Office as incomplete due to the omission of the necessary fee). The third party requester is not permitted to file comments in response to the submission of the fee, because the submission of a fee clearly adds nothing on the merits. An example of this would be where a terminal disclaimer is newly required in a reexamination proceeding and is submitted, but the fee is inadvertently omitted. The response would then be incomplete only as to the omitted fee. Any third party requester comments on the terminal disclaimer must be filed within 30 days from the date of service of the patent owner's terminal disclaimer on the third party requester. Where the patent owner then completes the response by filing the fee, the third party requester is not permitted to then comment. However, if the patent owner's response is not limited to the bare submission of the fee, i.e., if the response also includes argument, then the third party can comment since the patent owner has addressed the merits of the case.

>In those instances where there is a failure to pay an excess claims fee by the patent owner, the third party requester does not have the new claim "package" to comment on. Thus, the third party requester comments may be filed within 30 days from the date of service of the patent owner's response correcting the excess claims fee deficiency.<

2666.50 Examiner Issues Notice of Defective Paper in *Inter Partes* Reexamination [R-5]

Even if the substance of a submission is complete, the submission can still be defective, i.e., an "informal submission." Defects in the submission can be, for example:

(A) The paper filed does not include proof of service;

(B) The paper filed is unsigned;

(C) The paper filed is signed by a person who is not of record;

(D) The amendment filed by the patent owner does not comply with 37 CFR 1.530(d)-(j); or

(E) The amendment filed by the patent owner does not comply with 37 CFR 1.20(c)(3) and/or (c)(4).

Where a submission made is defective (informal), form PTOL-2069 is used to provide notification of the defects present in the submission. Form PTOL-2069 is reproduced below. In many cases, it is only necessary to check the appropriate box on the form and fill in the blanks. However, if the defect denoted by one of the entries on form PTOL-2069 needs further clarification (such as the specifics of why the amendment does not comply with 37 CFR 1.530(d)-(j)), the

additional information should be set forth on a separate sheet of paper which is then attached to the form PTOL-2069.

The defects identified in (A) through (E) above are specifically included in form PTOL-2069. If the submission contains a defect other than those specifically included on the form, the "Other" box on the form is to be checked and the defect explained in the space provided for the explanation. For example, a response might be presented on easily erasable paper, and thus, a new submission would be needed.

Where both the patent owner response and the third party comments are defective, a first form PTOL-2069 should be completed for the patent owner (setting forth the defects in the patent owner response), and a second form PTOL-2069 completed for the third party requester (setting forth the defects in the third party requester's comments). A copy of both completed forms would then be sent to all parties.

A time period of one month or thirty days, whichever is longer, from the mailing date of the PTOL-2069 letter will be set in the letter for correcting the defect(s). The patent owner may request an extension of time to correct the defect(s) under 37 CFR 1.956. The third party requester, however, is barred from requesting an extension of time by statute. 35 U.S.C. 314(b)(2). >If, in response to the notice, the defect still is not corrected, the submission will not be entered. If the failure to comply with the notice results in a patent owner failure to file a timely and appropriate response to any Office action, the prosecution of the reexamination proceeding generally will be terminated or limited under 37 CFR 1.957 (whichever is appropriate).<

If the defect in the patent owner response or the third party requester comments is limited to a problem with the signature, claim format, or some other obvious defect (easily corrected), and such is noted by the staff of the Office of Patent Legal Administration (OPLA) processing the papers, then the staff of OPLA may, in some instances, issue form PTOL-2069 to notify parties of the defect, and obtain a response to the form, prior to forwarding the case to the examiner. Otherwise, the responsibility is with the examiner to obtain the needed correction of the defects in the papers, which defects are either identified to the examiner by the staff of OPLA in an informal memo, or noted independently by the examiner.

NOTICE RE DEFECTIVE PAPER IN INTER PARTES REEXAMINATION	**Control No.**	**Patent Under Reexamination**	
	Examiner	**Art Unit**	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address. --

1. ☐ No proof of service is included with the paper filed by ☐ owner ☐ requester on _____. 37 CFR 1.248 and 1.903. Proof of service is required within a time period of 30-days or one month from the date of this letter, whichever is longer. Failure to serve the paper may result in the paper being refused consideration. If the failure to comply with this requirement results in a patent owner failure to file a timely and appropriate response to any Office action, the prosecution of the reexamination proceeding will be terminated under 37 CFR 1.957(b) or limited under 37 CFR 1.957(c) (as is appropriate for the case).

2. ☐ The paper filed on _____ by the ☐ owner ☐ requester is unsigned. A duplicate paper or ratification, properly signed, is required within a time period of 30-days or one month from the date of this letter, whichever is longer. Failure to comply with this requirement will result in the paper not being considered. If the failure to comply results in a patent owner failure to file a timely and appropriate response to any Office action, the prosecution of the reexamination proceeding will be terminated under 37 CFR 1.957(b) or limited under 37 CFR 1.957(c) (as is appropriate for the case).

3. ☐ The paper filed on _____ by the ☐ owner ☐ requester is signed by _____ who is not of record. A ratification or a new power of attorney with a ratification, or a duplicate paper signed by a person of record, is required within a time period of 30-days or one month from the date of this letter, whichever is longer. Failure to comply with this requirement will result in the paper not being considered. If the failure to comply results in a patent owner failure to file a timely and appropriate response to any Office action, the prosecution of the reexamination proceeding will be terminated under 37 CFR 1.957(b) or limited under 37 CFR 1.957(c) (as is appropriate for the case).

4. ☐ The amendment filed by owner on _____, does not comply with 37 CFR 1.530. Patent owner is given a time period of 30-days or one month from the date of this letter, whichever is longer, to correct this informality, or the prosecution of the reexamination proceeding will be terminated under 37 CFR 1.957(b) or limited under 37 CFR 1.957(c) (as is appropriate for the case). The amendment will not be entered, although the argument therein will be considered as it applies to the proceeding without the amendment, should the prosecution be limited under 37 CFR 1.957(c).

5. ☐ The amendment filed by owner on _____, does not comply with 37 CFR ☐1.20(c)(3) and/or ☐1.20(c)(4), as to excess claim fees. Patent owner is given a time period of 30-days or one month from the date of this letter, whichever is longer, to correct this fee deficiency, or the prosecution of the reexamination proceeding will be terminated under 37 CFR 1.957(b) or limited under 37 CFR 1.957(c) (as is appropriate for the case), to effect the "abandonment" set forth in 37 CFR 1.20(c)(5).

6. ☐ Other: _____

NOTE: PATENT OWNER EXTENSIONS OF TIME ARE GOVERNED BY 37 CFR 1.956. NO EXTENSION OF TIME IS PERMITTED FOR THIRD PARTY REQUESTER. 35 U.S.C. § 314(b)(2).

All correspondence relating to this *inter partes* reexamination proceeding should be directed to the **Central Reexamination Unit** at the mail, FAX, or hand-carry addresses given at the end of this Office action.

U.S. Patent and Trademark Office
PTOL-2069 (7/05)

Paper No.

2666.60 Response by Patent Owner/ Third Party to Notice of Defective Paper [R-3]

The patent owner and/or the third party requester will be given a time period of **>one month or thirty days, whichever is longer,< from the mailing date of the notice of defective paper or the time remaining in the response/comments period set in the last Office action** to correct the defect in a submission. If, in response to the notice, the defect still is not corrected, the submission will not be entered. **>If the failure to comply with the notice results in a patent owner failure to file a timely and appropriate response to any Office action, the prosecution of the reexamination proceeding will be terminated under 37 CFR 1.957(b) or limited under 37 CFR 1.957(c) (as is appropriate for the case).<

After the patent owner or the third party requester has provided a submission directed solely to correcting the defect, the other party is not permitted to comment on the submission correcting the defect, since the submission correcting the defect is directed to form and does not go to the merits of the case. This would be the case, for example, where the failure to provide a signature or a certificate of service is corrected, or where a permanent copy is submitted to replace an "easily erasable" paper that was originally submitted.

In the case of correcting a defective amendment, however, other issues come into play. Where for example, new claims 10-20 are improperly presented in a patent owner response (e.g., not properly underlined), they generally will not be entered and form PTOL-2069 (Box 4) will be used to notify the patent owner of the need to correct this defect. Until the defect is corrected, claims 10-20 do not yet exist in the proceeding for the third party requester to comment on. Likewise, any argument that was directed to such claims is not truly ripe for the third party requester comment. After the patent owner corrects the defect, claims 10-20 come into existence in the proceeding, and the argument presented by the patent owner becomes relevant. At this point, the third party requester has a right to provide comments in response to the patent owner's argument, whether or not the argument that was included in the original patent owner submission is re-presented with the paper correcting the defect. Thus, any third party requester comments submitted either in response to the patent owner's initial paper (presenting the informal claims) or in response to the patent owner's supplemental paper (correcting the informality) will be considered by the examiner.

Any submission correcting the defect which provides a discussion of the merits should (A) set forth that discussion separately from the portion of the response that corrects the defect, and (B) clearly identify the additional discussion as going to the merits. The additional discussion going to the merits must, in and of itself, have an entry right, or the entire submission will be returned to the party that submitted it, and **one** additional opportunity (30-days or one month, whichever is longer) will be provided, to correct the defect without a discussion of the merits. If the portion directed to the merits is not clearly delineated and identified, the entire submission may be returned to the party that submitted it, and **one** additional opportunity (30-days or one month, whichever is longer) is then given for that party to correct the defect without intermixed discussion of the merits. The examiner may, however, choose to permit entry of such a paper.

2667 Handling of Inappropriate or Untimely Filed Papers [R-7]

37 CFR 1.939. Unauthorized papers in inter partes reexamination.

(a) If an unauthorized paper is filed by any party at any time during the *inter partes* reexamination proceeding it will not be considered and may be returned.

(b) Unless otherwise authorized, no paper shall be filed prior to the initial Office action on the merits of the *inter partes* reexamination.

The applicable regulations (such as 37 CFR 1.501, 1.902 and 1.905, 1.948 and 1.939) provide that certain types of correspondence will not be considered. Whenever reexamination correspondence is received, a decision is required of the Office as to the action to be taken on the correspondence based on what type of paper it is and whether it is timely. In certain instances, the submitted correspondence (submission) will be entered into the reexamination file and be considered. In other instances, the correspondence will be entered into the reexamination file, but will not be considered. In still other instances,

the correspondence will not be entered into the reexamination file and will be returned to the party that sent it. The return of certain inappropriate submissions, not being considered, reduces the amount of paper which would ultimately have to be scanned into the record. >Where an inappropriate (unauthorized, improper) paper has already been scanned into the Image File Wrapper (IFW) of the reexamination proceeding before discovery of the inappropriate nature of the paper, the paper cannot be physically returned to the party that submitted it. Instead, the paper will be "returned" by expunging it, i.e., by marking the paper as "non-public" and "closed" so that the paper does not appear in the active IFW record with the other active papers that comprise the public record of the reexamination proceeding.<

Where papers are filed during reexamination proceedings which are inappropriate because of some defect, such papers will either be returned to the sender or be forwarded to one of three places: the reexamination file (paper file or IFW file history); the patent file (paper file or IFW file history); or the storage area (paper file). Any papers returned to the sender must be accompanied by a letter as to the return. The letter is prepared by the Central Reexamination Unit (CRU) Director (or in some instances, by the Office of Patent Legal Administration (OPLA)) and is forwarded to the CRU support staff for mailing. The original of the letter returning the paper will be retained in the file and given a paper number.

I. TYPES OF PAPERS RETURNED WITH CENTRAL REEXAMINATION UNIT DIRECTOR OR REEXAMINATION LEGAL ADVISOR APPROVAL REQUIRED

A. Filed by Patent Owner

1. Premature Response/Comments by Patent Owner

Any response/comments as to materials of record or any amendment filed by the patent owner prior to the first Office action is premature and will be returned and will not be considered. 37 CFR 1.939. Where a paper is to be returned based on the above reason, and the paper is not accompanied by a petition under 37 CFR 1.182 or 1.183, the CRU Director or the Reexamination Legal Advisor (RLA) will return the paper. Where the submission is accompanied by a petition under 37 CFR 1.182 or 1.183, the reexamination proceeding should be addressed in the OPLA, to issue a decision on the petition.

Any petition requesting merger of a reexamination with a reexamination or reissue, or a stay of a reexamination or reissue in place of merger, that is filed prior the order to reexamine (37 CFR 1.931) will be returned and will not be considered. See MPEP § 2686.01 and § 2686.03. The reexamination proceeding should be addressed in the OPLA, to issue a decision on the petition.

2. Response Is Too Long

Where the length of the patent owner submission exceeds that permitted by 37 CFR 1.943, the submission is improper. Accordingly, pursuant to 37 CFR 1.957(d), a Notice will be mailed to the patent owner. The Notice will be issued by the examiner and will permit the patent owner to exercise one of the following two options:

(A) Submit a re-drafted response that does not exceed the page limit set by 37 CFR 1.943; or

(B) File a copy of the supplemental response with pages redacted to satisfy the 37 CFR 1.943 page limit requirement.

The Notice will set a period of 15 days from the date of the notice to respond. If no response is received, the improper patent owner submission will not be considered. If the submission was necessary to respond to an outstanding Office action, the prosecution of the reexamination proceeding is either terminated pursuant to 37 CFR 1.957(b) or limited pursuant to 37 CFR 1.957(c). Any previously submitted third party comments in response to this improper patent owner submission would also not be considered, as being moot, since the patent owner did not in fact respond to the Office action in accordance with the rules.

If a response to the Notice is received, then under 37 CFR 1.947, the third party requester may once file written comments, limited to issues raised by the Office action or the patent owner's response to the Notice, within 30 days from the date of service of the patent owner's response to the Notice.

>With respect to the length of the papers, the following additional information is to be noted. Similar to the Federal Rules of Appellate Procedure, the pro-

visions of 37 CFR 1.943(c) are waived to the extent that the table of contents pages, the table of case law pages, and the pages of the claims (but not claim charts applying the art to the claims) are excluded from the thirty (30) page limit required by 37 CFR 1.943(c).

Any affidavit or declaration (or a clearly defined portion thereof) that contains opinon(s) of the affiant/declarant, or argument(s) that the art either does or does not anticipate or render obvious the claims, or specific claim elements, of the patent under reexamination, is considered to be part of the comments submitted by the patent owner, or by the third party requester, and is subject to the page limit requirements of 37 CFR 1.943. Affidavits or declarations that are excluded from the page limit requirements include, for example, declarations attempting to swear behind (antedate) the filing date of a reference, or to establish the date of a printed publication, or declarations that provide comparative test data and an analysis of same. However, if the patent owner's affidavit or declaration includes any argument as to how an outstanding/proposed rejection is overcome, then the page(s) of the affidavit or declaration upon which the argument appears would be included against of the page limit count. Likewise, if a third party requester affidavit or declaration includes any argument as to how a rejection is supported, then the page(s) of the affidavit or declaration upon which the argument appears would be included against of the page limit count. Similarly, attached exhibits presenting data or drawings are not included against the page limit count, unless an exhibit or drawing includes argument as to how the outstanding rejection is overcome. Any page(s) of the exhibit or sheet(s) of drawings that include such argument would be included against the page limit count.<

3. Improper Patent Owner Response

The patent owner can only file once under 37 CFR 1.951(a). Any second or supplemental submission after ACP by the patent owner will be returned, unless prosecution has been reopened. See MPEP § 2672.

Where a paper is to be returned based on the above reason or other appropriate reasons, and the paper is not accompanied by a petition under 37 CFR 1.182 or 1.183, the CRU Director or the RLA will return the paper. Where a petition under 37 CFR 1.182 or 1.183 has been filed, the reexamination proceeding should be addressed in the OPLA, to issue a decision on the petition.

B. Filed by Third Party Requester

1. Premature Comments by Third Party Requester

Any comments filed by a third party requester subsequent to the request for reexamination (i.e., not part of it) and prior to the first Office action is premature, and it will be returned and will not be considered. 37 CFR 1.939. Any petition to stay a reexamination proceeding because of an interference (MPEP § 2686.02), which is filed prior to the first Office action in the reexamination proceeding will be returned and will not be considered.

Any submission of comments filed by a third party requester where the patent owner has not responded to the outstanding Office action is premature, and it will be returned and will not be considered. 37 CFR 1.947.

Where a paper is to be returned based on the above reason, and the paper is not accompanied by a petition under 37 CFR 1.182 or 1.183, the CRU Director or the RLA will return the paper. Where the premature submission is accompanied by a petition under 37 CFR 1.182 or 1.183, the reexamination proceeding should be addressed in the OPLA, to issue a decision on the petition.

2. Response Is Too Long

Where the length of the third party requester submission exceeds that permitted by 37 CFR 1.943, the submission is improper. Accordingly, a Notice will be issued by the examiner and mailed to the third party requester permitting the third party requester to exercise one of the following two options:

(A) Submit a re-drafted response that does not exceed the page limit set by 37 CFR 1.943; or

(B) File a copy of the supplemental response with pages redacted to satisfy the 37 CFR 1.943 page limit requirement.

The Notice will set a period of 15 days from the date of the notice to respond. If no response is received, the improper third party requester submission will not be considered.

>For additional information with respect to the length of the papers, see subsection I.A.2. above.<

3. Improper Comments

Where the third party requester comments are not limited to the scope provided by the rules, they are improper and will be returned by the examiner (or the Reexamination Legal Advisor) and will not be considered. 37 CFR 1.947 and 1.951(b). For example, comments following the patent owner's response to a first Office action must be limited to issues and/or points covered by the first action and/or the patent owner's response (in accordance with 37 CFR 1.947); if they are not, they will be returned. See MPEP § 2666.05 for action to be taken by the examiner.

For any third party requester comments containing a submission of prior art, the prior art must be limited solely to prior art which is necessary to rebut a finding of fact by the examiner, which is necessary to rebut a response of the patent owner, or, which for the first time became known or available to the third party requester after the filing of the request for *inter partes* reexamination. Prior art submitted for the reason that it became known or available to the third party requester for the first time after the filing of the request for *inter partes* reexamination must be accompanied by a statement as to when the prior art first became known or available to the third party requester and must include a discussion of the pertinency of each reference to the patentability of at least one claim. If the prior art submission does not satisfy at least one of the criteria noted above, the comments are improper and will be returned and will not be considered. See MPEP § 2666.05 for action to be taken by the examiner.

Supplemental third party requester comments are improper since 37 CFR 1.947 states that comments can "once" be filed. Such supplemental comments are improper, will not be considered, and will be returned. However, supplemental third party comments are permitted in response to the patent owner's completion of a response, even where the initial third party comments were provided after the incomplete patent owner response. Supplemental third party comments are also permitted in response to a supplemental patent owner response.

The third party requester can only respond to a patent owner submission after an Action Closing Prosecution (ACP), and may only do so once under 37 CFR 1.951(b). Any original third party requester comments (where the patent owner does not respond) or any second or supplemental responsive comments after ACP are improper and will be returned. See MPEP § 2672.

Third party comments in response to a patent owner submission which does not respond to an Office action are not permitted, since 37 CFR 1.947 only permits comments in response to the patent owner's response to an Office action. For example, where the patent owner submits a new power of attorney, the third party requester is not permitted to submit a set of comments, because the patent owner submission is not a response to an Office action. If the third party requester does comment, it will be returned.

4. Improper Petition

Any petition to stay a reexamination proceeding because of an interference (MPEP § 2686.02), which is filed prior to the first Office action in the reexamination proceeding will be returned and will not be considered. 37 CFR 1.939.

Any petition by a third party requester to stay a reexamination proceeding because of an interference where the third party is not a party to the interference will be returned and will not be considered. See MPEP § 2686.02.

Any petition requesting merger of a reexamination with a reexamination or reissue, or a stay of a reexamination or reissue in place of merger, that is filed prior the order to reexamine (37 CFR 1.931) will be returned and will not be considered. See MPEP § 2686.01 and § 2686.03. Note, also, that a petition by the third party requester requesting that a later-filed case should not be merged (see MPEP § 2640 "Second Or Subsequent Request...") will be returned and will not be considered, where it is filed prior the order to reexamine. Prior to the order, such a petition is not ripe for decision because it is possible that reexamination will not be granted and there will be nothing to merge.

In all these situations, the reexamination proceeding should be addressed in the OPLA, to issue a decision on the petition.

>Note that after an opposition to any patent owner petition is filed by a third party requester (regardless of whether such opposition has an entry right or not),

any further paper in opposition/rebuttal/response to the third party opposition paper will not be considered and will be returned. There must be a limitation on party iterations of input, especially given the statutory mandate for special dispatch in reexamination. Likewise, after an opposition to any requester petition is filed by the patent owner (regardless of whether such opposition has an entry right or not), any further paper in opposition/rebuttal/response to the patent owner opposition paper will not be considered and will be returned. There must be a limitation on party iterations of input, especially given the statutory mandate for special dispatch in reexamination. Further, any petition requesting that an extension of time be denied will be returned, since a requester does not have a statutory right to challenge this discretionary procedural process in the reexamination proceeding; whether or not the time is extended clearly does not go to the merits of the reexamination proceeding. The same would apply to oppositions as to petitions for revival of a terminated prosecution, petitions challenging the finality of an Office action, and the like.<

C. Filed by Third Party Other Than Third Party Requester

No submissions on behalf of any third parties other than third party requesters as defined in 35 U.S.C. 100(e) will be considered unless such submissions are in accordance with 37 CFR 1.915 or are one of the exceptions noted below. Thus, a petition to merge a reexamination, or stay one of them because of the other, which is filed by a party other than the patent owner or the third party requester of reexamination will not be considered, but will be returned to that party as being improper under 37 CFR 1.905. See also MPEP § 2686.01 and MPEP § 2686.03.

A paper submitted by a third party other than a third party requester must be (1) a 37 CFR 1.501 art citation limited to the citation of patents and printed publications and an explanation of the pertinency and applicability of the patents and printed publications, or (2) bare notice of suits and other proceedings involving the patent (see MPEP § 2686 and § 2686.04) which may include copies of decisions or other court papers, or papers filed in the court, from litigations or other proceedings involving the patent. Such submissions must be without additional comment and cannot include further arguments or information. If the submission by the third party is not one of the above-described two types of papers, it will be returned to an identified third party or destroyed if the submitter is unidentified. If a submission by the third party of either of the above-described two types of papers contains additional material that goes beyond the scope of what is permitted, the paper will be returned to an identified third party, or destroyed if the third party submitter is unidentified. If a proper 37 CFR 1.501 submission is filed by a third party after the order to reexamine, it will be stored in the storage area-see below.

II. TYPES OF DEFECTIVE PAPERS TO BE LOCATED IN THE "REEXAMINATION FILE"

A. Filed by Patent Owner

1. Unsigned Papers

Papers filed by the patent owner which are unsigned, or signed by less than all of the patent owners where no attorney or agent is of record or acting in representative capacity, will be denied consideration, but will be retained in the file. 37 CFR 1.33.

2. No Proof of Service

Papers filed by the patent owner in which no proof of service is included, and proof of service is required, may be denied consideration. Such papers should be denied consideration where it cannot be determined that service was in fact made and the third party requester's response/comment/appeal/brief period is to be set by the date of service. See 37 CFR 1.248 and MPEP § 2666.06.

3. Late Papers

Where patent owner has filed a paper which was filed after the period for response set by the Office, the paper will be retained in the file but will not be considered.

A patent owner submission following a third party requester submission, where the patent owner submission is filed subsequent to the permitted time from the date of service of third party requester's submission, will be retained in the file but will not be considered. The date that the Office actually receives the third party requester's submission has no bearing here; it is

the date of service on the patent owner which is critical.

4. Defective Amendment

A proposed amendment to the description and claims which does not comply with 37 CFR 1.530(d)-(k) will be retained in the file, but the amendment will not be considered. An exception to this is where the only defect in the amendment is that it enlarges the scope of the claims of the patent or introduces new matter. Such an amendment *will be considered*, and a rejection will be made in the next Office action.

5. Premature Appeal

Where a notice of appeal or notice of cross appeal is filed before a Right of Appeal Notice (RAN) has been issued, the paper will be retained in the file but will not be considered (other than to inform the parties that the appeal is not acceptable).

B. Filed by Third Party Requester

1. Unsigned Papers

Papers filed by a third party requester which are unsigned or not signed by the third party requester or requester's attorney/agent of record or attorney/agent acting in representative capacity will be denied consideration. 37 CFR 1.33.

2. No Proof of Service

Papers filed by a third party requester in which no proof of service is included as to the patent owner and/or any other third party requester, and proof of service is required, may be denied consideration. Such papers should be denied consideration where it cannot be determined that service was in fact made and another party's response/comment/appeal/brief period is to be set by the date of service. 37 CFR 1.248.

3. Late Papers

Any third party requester submission following a patent owner's submission, where the third party requester submission is filed subsequent to the permitted time from the date of service of the patent owner's submission, will be retained in the file, but will not be considered. Note, for example, a 37 CFR 1.947 submission of third party comments following the patent owner's response. Where the third party comments are submitted subsequent to 30 days from the date of service of the patent owner's response, they will be retained in the file but will not be considered. The date that the Office actually receives the patent owner's response has no bearing here; it is the date of service on the third party requester which is critical.

Where the third party requester has filed a paper which is untimely, that is, it was filed after the period set by the Office for response, the paper will be retained in the file, but will not be considered.

>Thus, for example, in instances where there is a right to file an opposition to a petition, any such opposition must be filed within two weeks of the date upon which a copy of the original petition was served on the opposing party, to ensure consideration. Any such opposition that is filed after the two-week period will remain in the record, even though it is not considered.<

4. Premature Appeal

Where a notice of appeal or notice of cross appeal is filed before a Right of Appeal Notice (RAN) has been issued, the paper will be retained in the file, but will not be considered (other than to inform the parties that the appeal is not acceptable). 37 CFR 41.61.

III. PAPERS LOCATED IN THE "STORAGE AREA"

A storage area for submissions of art citations in an *inter partes* reexamination will be maintained separate and apart from the reexamination and patent files, and at a location in the CRU.

Submission of art citations in an *inter partes* reexamination is permitted by the patent owner and the third party requester to the extent stated in the regulations. 37 CFR 1.501 and 1.902. All other submissions of art citations based solely on prior patents or publications filed after the date of the order to reexamine are retained in the storage area. Such citations are not entered into the patent file, but rather are delayed until the reexamination proceedings have been concluded. See MPEP § 2602. (Proper timely filed submissions of art citations made prior to the order to reexamine are placed in the reexamination file.)

2668 Petition for Entry of Late Papers for Revival of Reexamination Proceeding [R-7]

35 U.S.C. 41. Patent fees; patent and trademark search systems.

*****

(7) On filing each petition for the revival of an unintentionally abandoned application for a patent, for the unintentionally delayed payment of the fee for issuing each patent, or for an unintentionally delayed response by the patent owner in any reexamination proceeding, $1,210, unless the petition is filed under section 133 or 151 of this title, in which case the fee shall be $110.

*****

35 U.S.C. 133. Time for prosecuting application.

Upon failure of the applicant to prosecute the application within six months after any action therein, of which notice has been given or mailed to the applicant, or within such shorter time, not less than thirty days, as fixed by the Director in such action, the application shall be regarded as abandoned by the parties thereto, unless it be shown to the satisfaction of the Director that such delay was unavoidable.

37 CFR 1.137. Revival of abandoned application, terminated reexamination proceeding, or lapsed patent.

(a) **>*Unavoidable*. If the delay in reply by applicant or patent owner was unavoidable, a petition may be filed pursuant to this paragraph to revive an abandoned application, a reexamination prosecution terminated under §§ 1.550(d) or 1.957(b) or limited under § 1.957(c), or a lapsed patent. A grantable petition pursuant to this paragraph must be accompanied by:<

(1) The reply required to the outstanding Office action or notice, unless previously filed;

(2) The petition fee as set forth in § 1.17(l);

(3) A showing to the satisfaction of the Director that the entire delay in filing the required reply from the due date for the reply until the filing of a grantable petition pursuant to this paragraph was unavoidable; and

(4) Any terminal disclaimer (and fee as set forth in § 1.20(d)) required pursuant to paragraph (d) of this section.

(b) **>*Unintentional*. If the delay in reply by applicant or patent owner was unintentional, a petition may be filed pursuant to this paragraph to revive an abandoned application, a reexamination prosecution terminated under §§ 1.550(d) or 1.957(b) or limited under § 1.957(c), or a lapsed patent. A grantable petition pursuant to this paragraph must be accompanied by:<

(1) The reply required to the outstanding Office action or notice, unless previously filed;

(2) The petition fee as set forth in § 1.17(m);

(3) A statement that the entire delay in filing the required reply from the due date for the reply until the filing of a grantable petition pursuant to this paragraph was unintentional. The Director may require additional information where there is a question whether the delay was unintentional; and

(4) Any terminal disclaimer (and fee as set forth in § 1.20(d)) required pursuant to paragraph (d) of this section.

*****

(e) **>*Request for reconsideration.* Any request for reconsideration or review of a decision refusing to revive an abandoned application, a terminated or limited reexamination prosecution, or lapsed patent upon petition filed pursuant to this section, to be considered timely, must be filed within two months of the decision refusing to revive or within such time as set in the decision. Unless a decision indicates otherwise, this time period may be extended under:

(1) The provisions of § 1.136 for an abandoned application or lapsed patent;

(2) The provisions of § 1.550(c) for a terminated *ex parte* reexamination prosecution, where the *ex parte* reexamination was filed under § 1.510; or

(3) The provisions of § 1.956 for a terminated *inter partes* reexamination prosecution or an *inter partes* reexamination limited as to further prosecution, where the *inter partes* reexamination was filed under § 1.913.<

*****

If the patent owner in an *inter partes* reexamination proceeding fails to file a timely and appropriate response to any Office action and no claims are allowable, then pursuant to 37 CFR 1.957(b), the prosecution of the reexamination proceeding is terminated, and a certificate under 37 CFR 1.997 is issued canceling all claims of the patent.

An *inter partes* reexamination prosecution terminated under 37 CFR 1.957(b) can be revived if the delay in response by the patent owner was unavoidable in accordance with 37 CFR 1.137(a), or unintentional in accordance with 37 CFR 1.137(b).

If the patent owner in an *inter partes* reexamination proceeding fails to file a timely and appropriate response to any Office action and at least one claim is allowable, then pursuant to 37 CFR 1.957(c), the proceeding continues but is limited to the claim(s) found allowable at the time of the failure to respond (i.e., in the Office action).

Rejected claims terminated under 37 CFR 1.957(c) can be revived if the delay in response by the patent owner was unavoidable in accordance with 37 CFR 1.137(a), or unintentional in accordance with 37 CFR 1.137(b).

All petitions in reexamination proceedings to accept late papers and revive will be decided in the Office of Patent Legal Administration (OPLA).

I. PETITION BASED ON UNAVOIDABLE DELAY

The unavoidable delay provisions of 35 U.S.C. 133 are imported into, and are applicable to, reexamination proceedings by 35 U.S.C. 305 and 314. See *In re Katrapat*, 6 USPQ2d 1863 (Comm'r Pat. 1988). Accordingly, the Office will consider, in appropriate circumstances, a petition showing unavoidable delay under 37 CFR 1.137(a) where untimely papers are filed by the patent owner subsequent to the order for reexamination. Any such petition must provide an adequate showing of the cause of unavoidable delay, including the details of the circumstances surrounding the unavoidable delay and evidence to support the showing. Additionally, the petition must be accompanied by a proposed response to continue prosecution (unless it has been previously filed) and by the petition fee required by 37 CFR 1.17(l).

II. PETITION BASED ON UNINTENTIONAL DELAY

The unintentional delay fee provisions of 35 U.S.C. 41(a)(7) are imported into, and are applicable to, any reexamination proceeding by Sec. 4605(a) of the American Inventors Protection Act of 1999. Accordingly, the Office will consider, in appropriate circumstances, a petition showing unintentional delay under 37 CFR 1.137(b) where untimely papers are filed by the patent owner subsequent to the order for reexamination. Any such petition must provide a verified statement that the delay was unintentional, a proposed response to continue prosecution (unless it has been previously filed), and the petition fee required by 37 CFR 1.17(m).

III. RENEWED PETITION

Reconsideration may be requested of a decision dismissing or denying a petition under 37 CFR 1.137(a) or (b) to revive a terminated reexamination prosecution. The request for reconsideration must be submitted within one (1) month from the mail date of the decision for which reconsideration is requested. An extension of time may be requested only under 37 CFR 1.956; extensions of time under 37 CFR 1.136 are not available in reexamination proceedings. Any reconsideration request which is submitted should include a cover letter entitled "Renewed Petition under 37 CFR 1.137(a)" (for an "unavoidable" petition) or "Renewed Petition under 37 CFR 1.137(b)" (for an "unintentional" petition).

IV. PETITION REQUIREMENTS

See also MPEP § 711.03(c), *>subsection< III, for a detailed discussion of the requirements of petitions filed under 37 CFR 1.137(a) and 37 CFR 1.137(b).

2670 Clerical Handling [R-7]

Central Reexamination Unit (CRU) support staff, will carry out clerical handling and processing of *inter partes* reexamination cases. The clerical staff will perform all PALM matters needed for the case, e.g., PALMing in the file and PALMing it to the examiner. After the examiner has completed a decision on the request for *inter partes* reexamination and/or an Office action, the clerical staff will make a copy of the decision and/or Office action for the patent owner and for the third party requester(s). The clerical staff will also make copies of any references which are needed. A transmittal form PTOL-2070 with the third party requester's address will be completed. The clerical staff will coordinate its activities with those of the examiner and the **>CRU Supervisory Patent Examiners (SPEs) or Technology Center (TC) Quality Assurance Specialists (QASs) and the< paralegals.

Amendments in an *inter partes* reexamination proceeding (which comply with 37 CFR 1.941) are entered by the CRU clerical staff.

See MPEP § 2234 and § 2250 for manner of entering amendments.

For entry of amendments in a merged *inter partes* reexamination proceeding (i.e., an *inter partes* reexamination proceeding merged with another reexamination proceeding or with a reissue application), see MPEP § 2686.01 and § 2686.03.

Where an amendment is submitted in proper form and it is otherwise appropriate to enter the amendment, the amendment will be entered for purposes of the reexamination proceeding, even though the amendment does not have legal effect until the certificate is issued. Any "new matter" amendment to the disclosure (35 U.S.C. 132) will be required to be canceled, and claims containing new matter will be rejected under 35 U.S.C. 112. A "new matter" amendment to the drawing is ordinarily not entered. See MPEP § 608.04, § 608.04(a) and § 608.04(c). Where

an amendment enlarges the scope of the claims of the patent, the claims will be rejected under 35 U.S.C. 314(a).

2671 Examiner Action Following Response/Comments or Expiration of Time for Same [R-7]

I. RECONSIDERATION

After response by the patent owner and any third party comments, the patent under reexamination will be reconsidered. The patent owner and the third party requester will be notified as to any claims rejected, any claims found patentable and any objections or requirements made. The patent owner may respond to such Office action with or without amendment, and the third party requester may provide comments after the patent owner's response. If the patent owner response contains an amendment, the examiner will consider the amendment to determine whether the amendment raises issues of 35 U.S.C. 112 and/or broadening of the claims under 35 U.S.C. 314. The patent under reexamination will be reconsidered until the proceeding is ready for closing prosecution, at which point the examiner will issue an Action Closing Prosecution (ACP). See MPEP § 2671.02.

II. CASE IS TAKEN UP FOR ACTION

The case should be acted on promptly, in accordance with the statutory requirement for "special dispatch within the Office" (35 U.S.C. 314(c)).

After the examiner receives the case file (having the patent owner's response to the Office action and any third party requester comments on that response), he/she will prepare for a pre-action consultation conference with a Reexamination Legal Adviser (RLA). At the consultation conference, the RLA will provide instructions as to preparation of the Office action addressing the patent owner's response and any third party requester comments on that response. The consultation should be completed within two (2) weeks of when the case was initially forwarded to the examiner.

After the consultation conference, the examiner will promptly take up the case for action. The examiner will prepare an Office action no later than two weeks from the date of the consultation conference (unless otherwise authorized by the Central Reexamination Unit (CRU) Director or a RLA of the Office of the Patent Legal Administration (OPLA)). The case, with the completed action, will be forwarded to the **>CRU Supervisory Patent Examiner (SPE) or Technology Center (TC) Quality Assurance Specialist (QAS)< for review. If the *>CRU SPE/TC QAS< returns the case to the examiner for correction/revision, the correction/revision must be handled expeditiously and returned to the *>CRU SPE/TC QAS< within the time set for such by the *>CRU SPE/TC QAS<.

III. OPTIONS AS TO OFFICE ACTION TO ISSUE

At this point in the proceeding, the examiner will have the following options as to the next Office action to issue:

(A) There is **no** timely response by the patent owner (since the patent owner did not respond, no third party requester comments may be filed):

(1) If **all** claims are under rejection, the examiner will issue a Notice of Intent to Issue *Inter Partes* Reexamination Certificate (NIRC). See MPEP § 2687. All claims will be canceled by formal examiner's amendment (attached as part of the NIRC).

(2) If at least one claim is free of rejection and objection, the examiner will issue an Action Closing Prosecution (ACP). In the ACP, it will be stated that any claims under rejection or objection are withdrawn from consideration and will be canceled upon issuance of a NIRC. It will further be stated that the proceeding will be limited to the claims found patentable at the time of the failure to respond, and to claims (added or amended) which do not expand the scope of the claims found patentable at that time. See MPEP § 2666.10.

It should be noted that even in a situation where there has been no patent owner response, the examiner is always free to issue a supplemental Office action providing a new rejection of claims **previously found patentable**, where new information comes to the attention of the examiner warranting the new rejection. Of course, such an action would ordinarily not be made an ACP.

(B) There is a timely response by the patent owner, and the third party requester does **not** timely provide comments:

(1) If the response by the patent owner is incomplete, the examiner may issue an incomplete-response action. See MPEP § 2666.30.

(2) If there is a formality defect in the response by the patent owner, the examiner will issue a Notice of Defective Paper in Reexam. See MPEP § 2666.50.

(3) If the patent owner's response is complete and defect-free, and the proceeding is ready for closing prosecution, the examiner will issue an ACP. See MPEP § 2671.02. This is true if all claims are determined to be patentable, all claims are determined to be rejected, or if some claims are determined to be patentable and some claims are determined to be rejected. After the ACP has been issued, the patent owner can submit comments with or without a proposed amendment in accordance with MPEP § 2672, and the third party requester can then file comments responsive to the patent owner's submission.

(4) If the patent owner's response is complete and defect-free, and the proceeding is **not** ready for closing prosecution, the examiner will issue a new office action that does not close prosecution. See MPEP § 2671.01.

(C) There is a timely response by the patent owner, and the third party requester does provide timely comments:

(1) If the response by the patent owner is incomplete, the examiner may issue an incomplete-response action. See MPEP § 2666.30.

(2) If the comments by third party requester go beyond the scope of what is permitted for the third party comments, the examiner will follow the procedures set forth in MPEP § 2666.05 for improper comments.

(3) If there is a formality defect in the response by the patent owner, the examiner will issue a Notice of Defective Paper in Reexam. See MPEP § 2666.50.

(4) If there is a formality defect in the comments by the third party requester, the examiner will issue a Notice of Defective Paper in Reexam. See MPEP § 2666.50.

(5) If the response and comments are in order, and the proceeding is ready for closing prosecution, the examiner will issue an ACP. See MPEP § 2671.02. This is true if all claims are determined to be patentable, all claims are determined to be rejected, or if some claims are determined to be patentable and some claims are determined to be rejected. After the ACP has been issued, the patent owner can submit comments with or without a proposed amendment in accordance with MPEP § 2672 and the third party requester can then file comments responsive to the patent owner's submission.

(6) If the response and comments are in order and the proceeding is **not** ready for closing prosecution, the examiner will issue a new office action that does not close prosecution. See MPEP § 2671.01.

(D) There is a timely request for issuance of an Expedited Right of Appeal Notice:

37 CFR 1.953(b) provides for the issuance of an expedited Right of Appeal Notice (RAN), where the criteria for the same is satisfied. At any time after the patent owner's response to the first Office action on the merits in an *inter partes* reexamination, the patent owner and third party requester(s) may request the immediate issuance of a RAN. Where such a request is presented in the proceeding, see MPEP § 2673.02 for guidance as to whether an expedited Right of Appeal Notice will be issued.

2671.01 Examiner Issues Action on Merits That Does Not Close Prosecution [R-7]

37 CFR 1.949. Examiner's Office action closing prosecution in inter partes reexamination.

Upon consideration of the issues a second or subsequent time, or upon a determination of patentability of all claims, the examiner shall issue an Office action treating all claims present in the *inter partes* reexamination, which may be an action closing prosecution. The Office action shall set forth all rejections and determinations not to make a proposed rejection, and the grounds therefor. An Office action will not usually close prosecution if it includes a new ground of rejection which was not previously addressed by the patent owner, unless the new ground was necessitated by an amendment.

I. WHEN A NON-ACP ACTION IS ISSUED

After reviewing the patent owner's response and third party requester comments (if such comments are filed), the examiner may determine that the proceeding is not ready for issuing an Action Closing Prosecution (ACP). Such a determination would be based upon the following:

(A) In accordance with 37 CFR 1.949, an action will not normally close prosecution if it includes a new ground of rejection which was not previously addressed by the patent owner, unless the new ground was necessitated by an amendment. The examiner will not close prosecution where a new ground of rejection not necessitated by an amendment is made, because the patent owner's right to amend the claims becomes limited after prosecution is closed.

(B) Where an ACP would be proper, but the examiner feels that the issues are not yet clearly defined, it is always within the discretion of the examiner to issue an Office action that does not close prosecution (rather than an ACP).

II. OVERALL CONTENT

Where the examiner determines that the proceeding is not ready for issuing an ACP, the examiner will issue an Office action that will be similar in form to a first Office action, but will differ in that it addresses the positions and argument set forth in the patent owner's response and the third party requester comments (if such comments are filed). This Office action will be a statement of the examiner's position, so complete that the next Office action can properly be made an action closing prosecution.

The action should be comprehensive. It should address all issues as to the patents or printed publications. The action will clearly set forth each ground of rejection and/or ground of objection, and the reasons supporting the ground(s). The action will also clearly set forth each rejection proposed by the third party requester that the examiner refuses to adopt. Reasons why the rejection proposed by the third party is not appropriate (i.e., why the claim cannot be rejected under the ground proposed by the third party requester) must be clearly stated for each rejection proposed by the third party requester that the examiner refuses to adopt. Comprehensive reasons for patentability must be given for each determination favorable to patentability of claims. See MPEP § 1302.14 for examples of suitable statements of reasons for allowance.

III. REVIEW OF AMENDATORY MATTER UNDER 35 U.S.C. 112

Where an amendment has been submitted in the patent owner's response, the amendatory matter (i.e., matter revised or newly added) should be reviewed for compliance with 35 U.S.C. 112. As to the content of the patent that has not been revised, a review based upon 35 U.S.C. 112 is not proper in reexamination, and no such review should be made.

IV. WITHDRAWAL OF REJECTION

Where the examiner withdraws a ground of rejection originally initiated by the examiner, such withdrawal should be clearly stated in the Office action as a decision favorable to patentability with respect to the withdrawn rejection. The third party requester's next set of comments that may be filed (after a patent owner response to an action) may propose the withdrawn rejection as a "rejection proposed by the third party requester." In the event the patent owner fails to respond to all actions leading to the Right of Appeal Notice (RAN), including the ACP, and a RAN is then issued, the third party requester may appeal this withdrawal of rejection as a final decision favorable to patentability - see 37 CFR 41.61(a)(2).

Where the claims have not been amended and the examiner withdraws a ground of rejection previously proposed by the third party requester (e.g., based on the patent owner's argument or evidence submitted), the examiner should treat the issue as a rejection proposed by the third party requester that the examiner refuses to adopt.

Generally (subject to the below-stated exception), where the claims have been amended and the examiner withdraws a ground of rejection previously proposed by the third party requester, this is not a refusal of the examiner to adopt the rejection that was proposed by the requester, since the rejection was never proposed as to the amended claims. The third party requester's next set of comments that may be filed (after a patent owner response to an action) may propose the withdrawn rejection as a "rejection proposed by the third party requester" as to the amended claims. In the event the patent owner fails to respond to all actions leading to the RAN, including the ACP, and a RAN is then issued, the third party requester may appeal this withdrawal of rejection as a final decision favorable to patentability. See 37 CFR 41.61(a)(2).

If a claim is amended merely to include a dependent claim that was previously subjected to a proposed requester rejection, and the examiner withdraws that ground of rejection as to the newly

amended claim, such would be a refusal to adopt the third party requester's previously proposed rejection of the dependent claim. Thus, the examiner would treat the issue as a rejection proposed by the third party requester that the examiner refuses to adopt.

V. ISSUES NOT WITHIN SCOPE OF REEXAMINATION

If questions not within the scope of reexamination proceedings (for example, questions of patentability based on public use or on sale, *>conduct issues<, abandonment under 35 U.S.C. 102(c)) have been **newly** raised by the **patent owner response** or the **third party requester comments** being addressed by the present Office action, the existence of such questions will be noted by the examiner in the Office action, using form paragraph 26.03.

**>

¶ *26.03 Issue Not Within Scope of Inter Partes Reexamination*

It is noted that an issue not within the scope of reexamination proceedings has been raised. **[1]**.The issue will not be considered in a reexamination proceeding. 37 CFR 1.906(c). While this issue is not within the scope of reexamination, the patentee is advised that it may be desirable to consider filing a reissue application provided that the patentee believes one or more claims to be partially or wholly inoperative or invalid.

Examiner Note:

1. In bracket 1, identify the issues.

2. This paragraph may be used either when the patent owner or the third party requester raises issues such as (but not limited to) public use or on sale, conduct, or abandonment of the invention. Such issues should not be raised independently by the patent examiner.

<

Note that if questions of patentability based on public use or on sale, *>conduct issues<, abandonment under 35 U.S.C. 102(c), etc., have been independently discovered by the examiner during a reexamination proceeding but were not raised by the third party requester or the patent owner, the existence of such questions will not be noted by the examiner in any Office action, because 37 CFR 1.906(c) is only directed to such questions "raised by the patent owner or the third party requester."

VI. COVER SHEET

Form PTOL-2064 should be used as the Office action cover sheet. Since the Office action is responsive to a patent owner response, and possibly the third party requester comments, the space on the PTOL-2064 for the date of the communication(s) to which the Office action is responsive to should be filled in. Generally, the patent owner is given two months to respond to the action, and thus "Two" should be inserted in the appropriate space.

VII. SIGNATORY AUTHORITY

As with all other Office correspondence on the merits in a reexamination proceeding, the action must be signed by a primary examiner.

VIII. CONCLUDING PARAGRAPHS

In view of the requirement for "special dispatch" in *inter partes* reexamination proceedings (35 U.S.C. 314(c)), it is intended that the examiner be able to close prosecution at the earliest possible time. Accordingly, the Office action should include a statement cautioning the patent owner that a complete response should be made to the action, since the next action is expected to be an ACP. The action should further caution the patent owner that the requirements of 37 CFR 1.116(b) will be strictly enforced after an ACP and that any amendment after an ACP must include "a showing of good and sufficient reasons why they are necessary and were not earlier presented" in order to be considered. Form paragraph 26.05 should be inserted at the end of the Office action followed by form paragraph 26.73.

¶ *26.05 Papers To Be Submitted in Response to Action*

In order to ensure full consideration of any amendments, affidavits or declarations, or other documents as evidence of patentability, such documents must be submitted in response to this Office action. Submissions after the next Office action, which is intended to be an Action Closing Prosecution (ACP), will be governed by 37 CFR 1.116(b) and (d), which will be strictly enforced.

¶ *26.73 Correspondence and Inquiry as to Office Actions*

All correspondence relating to this *inter partes* reexamination proceeding should be directed:

By Mail to: Mail Stop *Inter Partes* Reexam
Attn: Central Reexamination Unit
Commissioner for Patents
United States Patent & Trademark Office
P.O. Box 1450
Alexandria, VA 22313-1450

By FAX to: (571) 273-9900
Central Reexamination Unit

By hand: Customer Service Window
Randolph Building
401 Dulany Street
Alexandria, VA 22314

Any inquiry concerning this communication or earlier communications from the examiner, or as to the status of this proceeding, should be directed to the Central Reexamination Unit at telephone number (571) 272-7705.

IX. PANEL REVIEW CONFERENCE

After an examiner has determined that the reexamination proceeding is ready for the Office action, the examiner will formulate a draft preliminary Office action. The examiner will then inform his/her **>Central Reexamination Unit (CRU) Supervisory Patent Examiner (SPE) or Technology Center (TC) Quality Assurance Specialist (QAS)< of his/her intent to issue the Office action. The *>CRU SPE/TC QAS< will convene a panel review conference, and the conference members will review the patentability of the claim(s) pursuant to MPEP § 2671.03. If the conference confirms the examiner's preliminary decision to reject and/or allow the claims, the proposed Office action shall be issued and signed by the examiner, with the two other conferees initialing the action (as "conferee") to indicate their presence in the conference. If the conference does not confirm the examiner's treatment of the claims, the examiner will reevaluate and issue an appropriate Office action.

X. NO RESPONSE BY PATENT OWNER

Where the patent owner fails to timely respond to an action requiring a response and there are no patentable claims, a Notice of Intent to Issue *Inter Parte* Reexamination Certificate (NIRC) will be issued as the action that does not close prosecution. No panel review conference is needed in this instance, as the issuance of the NIRC is essentially ministerial.

2671.02 Examiner Issues Action Closing Prosecution (ACP) [R-7]

37 CFR 1.949. Examiner's Office action closing prosecution in inter partes reexamination.

Upon consideration of the issues a second or subsequent time, or upon a determination of patentability of all claims, the examiner shall issue an Office action treating all claims present in the *inter partes* reexamination, which may be an action closing prosecution. The Office action shall set forth all rejections and determinations not to make a proposed rejection, and the grounds therefor. An Office action will not usually close prosecution if it includes a new ground of rejection which was not previously addressed by the patent owner, unless the new ground was necessitated by an amendment.

Although an Action Closing Prosecution (ACP) has many attributes similar to a "final rejection" made in an *ex parte* reexamination proceeding or in a non-provisional application, it is not a final action, and, as such, **it cannot be appealed from**. An appeal can only be taken after the examiner issues a Right of Appeal Notice (RAN). See MPEP § 2673.02.

Before an ACP is in order, a clear issue should be developed. When all claims are found patentable in the first action, the examiner will, at that point, issue an ACP, since the patent owner has nothing to respond to. Otherwise, it is intended that the second Office action in the reexamination proceeding will ordinarily be an ACP. The criteria for issuing an ACP is analogous to that set forth in MPEP § 706.07(a) for making a rejection final in an application.

>All< parties to the reexamination should recognize that a reexamination proceeding may result in the final cancellation of claims from the patent **and that the patent owner does not have the right to continue the proceeding by refiling under 37 CFR 1.53(b) or 1.53(d) nor by filing a Request for Continued Examination under 37 CFR 1.114, and the patent owner cannot file an *inter partes* reexamination request (see MPEP § 2612). Complete and thorough actions by the examiner, coupled with complete responses by the patent owner and complete comments by the third party requester (including early presentation of evidence under 37 CFR 1.131 or 1.132) will go far in reaching a desirable early termination of the prosecution of the reexamination proceeding.

In making an ACP (A) all outstanding grounds of rejection of record should be carefully reviewed, (B) all outstanding determinations of patentability (decisions to not make a proposed rejection) of record should be carefully reviewed, and (C) any grounds of rejection relied upon and any determinations of patentability relied upon should be reiterated.

I. CONTENT

The grounds of rejection and determinations of patentability must (in the ACP) be clearly developed to such an extent that the patent owner and the third party requester may readily judge the advisability of filing comments after an ACP pursuant to 37 CFR 1.951(a) and (b), respectively.

The ACP should address all issues as to the patents or printed publications. The ACP will clearly set forth each rejection proposed by the third party requester that the examiner refuses to adopt. Reasons why the rejection proposed by the third party requester is not appropriate (i.e., why the claim cannot be rejected under the ground proposed by the third party requester) must be clearly stated for each rejection proposed by the third party requester that the examiner refuses to adopt. Comprehensive reasons for patentability must be given for each determination favorable to patentability of claims. See MPEP § 1302.14 for examples of suitable statements of reasons for allowance.

Where a single previous Office action contains a complete statement of a ground of rejection or of reasons for not making a proposed rejection, the ACP may incorporate by reference that statement. In any event, the ACP must also include a rebuttal of any arguments raised in the patent owner's response and must reflect consideration of any comments made by the third party requester.

II. REVIEW OF AMENDATORY MATTER UNDER 35 U.S.C. 112

Where an amendment has been submitted in the patent owner's response, the amendatory matter (i.e., matter revised or newly added) should be reviewed for compliance with 35 U.S.C. 112. As to the content of the patent that has not been revised, a review based upon 35 U.S.C. 112 is not proper in reexamination, and no such review should be made.

III. WITHDRAWAL OF REJECTION

Where the examiner withdraws a ground of rejection originally initiated by the examiner, such withdrawal should be clearly stated in the ACP as a decision favorable to patentability with respect to the withdrawn rejection. The third party requester's next set of comments that may be filed (after a patent owner response to an action) may propose the withdrawn rejection as a "rejection proposed by the third party requester." In the event the patent owner fails to respond to the ACP and a Right of Appeal Notice (RAN) is then issued, the third party requester may appeal this withdrawal of rejection as a final decision favorable to patentability - see 37 CFR 41.61(a)(2). Where the examiner withdraws a ground of rejection previously proposed by the third party requester, the examiner should treat the issue as rejection proposed by the third party requester that the examiner refuses to adopt.

IV. ISSUES NOT WITHIN SCOPE OF REEXAMINATION

If questions not within the scope of reexamination proceedings (for example, questions of patentability based on public use or on sale, *>conduct issues<, abandonment under 35 U.S.C. 102(c)) have been **newly** raised by the **patent owner** response or the **third party requester** comments being addressed by the ACP, the existence of such questions will be noted by the examiner in the ACP, using form paragraph 26.03.

**>

¶ *26.03 Issue Not Within Scope of Inter Partes Reexamination*

It is noted that an issue not within the scope of reexamination proceedings has been raised. **[1]**.The issue will not be considered in a reexamination proceeding. 37 CFR 1.906(c). While this issue is not within the scope of reexamination, the patentee is advised that it may be desirable to consider filing a reissue application provided that the patentee believes one or more claims to be partially or wholly inoperative or invalid.

Examiner Note:

1. In bracket 1, identify the issues.
2. This paragraph may be used either when the patent owner or the third party requester raises issues such as (but not limited to) public use or on sale, conduct, or abandonment of the invention. Such issues should not be raised independently by the patent examiner.

<

V. COVER SHEET

Form PTOL-2065 should be used as the cover sheet for the ACP. Since the Office action is responsive to a patent owner response, and possibly the third party requester comments, the space on the PTOL-2065 for

the date of the communication(s) to which the Office action is responsive to should be filled in. Generally, the patent owner is given one month to respond to the action, and thus "One" should be inserted in the appropriate space for such.

VI. SIGNATORY AUTHORITY

As with all other Office correspondence on the merits in a reexamination proceeding, the ACP must be signed by a primary examiner.

VII. CONCLUDING PARAGRAPHS

The ACP should conclude with the following form paragraphs:

¶ *26.07 Action Closing Prosecution*

This is an ACTION CLOSING PROSECUTION (ACP); see MPEP § 2671.02.

(1) Pursuant to 37 CFR 1.951(a), the patent owner may once file written comments limited to the issues raised in the reexamination proceeding and/or present a proposed amendment to the claims which amendment will be subject to the criteria of 37 CFR 1.116 as to whether it shall be entered and considered. Such comments and/or proposed amendments must be filed within a time period of 30 days or one month (whichever is longer) from the mailing date of this action. Where the patent owner files such comments and/or a proposed amendment, the third party requester may once file comments under 37 CFR 1.951(b) responding to the patent owner's submission within 30 days from the date of service of the patent owner's submission on the third party requester

(2) If the patent owner does not timely file comments and/or a proposed amendment pursuant to 37 CFR 1.951(a), then the third party requester is precluded from filing comments under 37 CFR 1.951(b).

(3) Appeal **cannot** be taken from this action, since it is not a final Office action.

¶ *26.73 Correspondence and Inquiry as to Office Actions*

All correspondence relating to this *inter partes* reexamination proceeding should be directed:

By Mail to: Mail Stop *Inter Partes* Reexam
Attn: Central Reexamination Unit
Commissioner for Patents
United States Patent & Trademark Office
P.O. Box 1450
Alexandria, VA 22313-1450

By FAX to: (571) 273-9900
Central Reexamination Unit

By hand: Customer Service Window
Randolph Building
401 Dulany Street
Alexandria, VA 22314

Any inquiry concerning this communication or earlier communications from the examiner, or as to the status of this proceeding, should be directed to the Central Reexamination Unit at telephone number (571) 272-7705.

VIII. PANEL REVIEW CONFERENCE

After an examiner has determined that the reexamination proceeding is ready for the ACP action, the examiner will formulate a draft preliminary ACP action. The examiner will then inform his/her **>Central Reexamination Unit (CRU) Supervisory Patent Examiner (SPE) or Technology Center (TC) Quality Assurance Specialist (QAS)< of his/her intent to issue the action. The CRU *>SPE/TC QAS< will convene a panel review conference, and the conference members will review the patentability of the claim(s) pursuant to MPEP § 2671.03. If the conference confirms the examiner's preliminary decision to reject and/or allow the claims, the proposed ACP action shall be issued and signed by the examiner, with the two other conferees initialing the action (as "conferee") to indicate their presence in the conference. If the conference does not confirm the examiner's treatment of the claims, the examiner will reevaluate and issue an appropriate Office action.

IX. WHERE PATENT OWNER FAILS TO RESPOND AND CLAIMS HAVE BEEN FOUND PATENTABLE

Where the patent owner fails to respond to the first Office action (or any subsequent Office action which is prior to ACP) and any claims have been found patentable in the first action (or a subsequent action), the examiner will issue an ACP (see MPEP § 2671). The ACP should repeat all determinations of patentability (decisions to not make a proposed rejection) applicable to the patentable claims and incorporate by reference the reasons for each determination (the reasons for not making each proposed rejection). If the examiner realizes that more explanation would be helpful, the examiner should include it. Since the patent owner failed to respond to the first Office action, the proceeding will be limited to the claims found patentable and to new claims which do not expand the scope of the claims found patentable (if the new claims have an entry right or are otherwise entered at the option of the examiner). See MPEP § 2666.10. A panel review conference pursuant to MPEP § 2671.03 will be held.

2671.03 *>Panel< Review * [R-5]

**>A panel review will be conducted at each stage of the examiner's examination in an *inter partes* reexamination proceeding, other than for actions such as notices of informality or incomplete response. Matters requiring decision outside of the examiner's jurisdiction (e.g., decisions on petitions or extensions of time, or Central Reexamination Unit (CRU) support staff notices) will not be reviewed by a panel.

The panel review is carried out for each Office action. The panel reviews the examiner's preliminary decision to reject and/or allow the claims in the reexamination proceeding, prior to the issuance of each Office action.

I. MAKE-UP OF THE PANEL

The panel will consist of three members, one of whom will be a manager. The second member will be the examiner in charge of the proceeding. The manager will select the third member. The examiner-conferees will be primary examiners, or examiners who are knowledgeable in the technology of the invention claimed in the patent being reexamined and/or who are experienced in reexamination practice. The majority of those present at the conference will be examiners who were not involved in the examination or issuance of the patent. An "original" examiner (see MPEP § 2636) should be chosen as a conferee only if that examiner is the most knowledgeable in the art, or there is some other specific and justifiable reason to choose an original examiner as a participant in the conference.<

II. **>PANEL< PROCESS

The examiner must inform his/her *>manager< of his/her intent to issue an **>Office action. The manager< will then convene a **>panel and the members will confer and< review the patentability of the claim(s). If the conference confirms the examiner's preliminary decision to reject and/or allow the claims, the Office action ** shall be issued and signed by the examiner, with the two other conferees initialing the action (as "conferee") to indicate their *>participation< in the conference. Both conferees will initial, even though one of them may have dissented from the 3-party conference decision as to the patentability of claims. If the conference does not confirm the examiner's preliminary decision, ** the examiner **>will reevaluate and issue an< appropriate Office action **.

Where the examiner in charge of the proceeding is not in agreement with the conference decision, the *>manager< will generally assign the proceeding to another examiner**.

**

III. WHAT THE CONFERENCES SHOULD ACCOMPLISH

Each conference will provide a forum to consider all issues of patentability as well as procedural issues having an impact on patentability. Review of the patentability of the claims by more than one primary examiner should diminish any perception that the patent owner can disproportionately influence the examiner in charge of the proceeding. The conferences will also provide greater assurance that all matters will be addressed appropriately. All issues in the proceeding will be viewed from the perspectives of three examiners. What the examiner in charge of the proceeding might have missed, one of the other two conference members would likely detect. The conference will provide for a comprehensive discussion of, and finding for, each issue.

IV. CONSEQUENCES OF FAILURE TO HOLD CONFERENCE

Should the examiner issue **>Office action without panel review<, the patent owner or the third party requester who wishes to object must promptly file a paper alerting the Office of this fact. (The failure to hold a *>panel< review conference would be noted by the parties where there are no conferees' initials at the end of the ** Office action.) Any challenge of the failure to hold a *>panel< review conference must be made within two *>weeks of receipt< of the Office action issued, or the challenge will not be considered. ** In no event will the failure to hold a patentability review conference, by itself, be grounds for vacating any Office decision(s) or action(s) and "restarting" the reexamination proceeding.

2672 Patent Owner Comments/Amendment After ACP and Third Party Requester Responsive Comments [R-7]

37 CFR 1.951. Options after Office action closing prosecution in inter partes reexamination.

(a) After an Office action closing prosecution in an *inter partes* reexamination, the patent owner may once file comments limited to the issues raised in the Office action closing prosecution. The comments can include a proposed amendment to the claims, which amendment will be subject to the criteria of § 1.116 as to whether or not it shall be admitted. The comments must be filed within the time set for response in the Office action closing prosecution.

(b) When the patent owner does file comments, a third party requester may once file comments responsive to the patent owner's comments within 30 days from the date of service of patent owner's comments on the third party requester.

I. ONE OPPORTUNITY TO MAKE SUBMISSIONS UNDER 37 CFR 1.951(a) AND (b)

After an Action Closing Prosecution (ACP), the patent owner may once file (pursuant to 37 CFR 1.951(a)) written comments limited to the issues raised in the reexamination proceeding and/or present a proposed amendment to the claims. Where the patent owner does so, the third party requester may once file (pursuant to 37 CFR 1.951(b)) comments responsive to the patent owner's comments. Any second or supplemental submission after ACP by either the patent owner or the third party requester will thus be returned.

II. TIME FOR MAKING PATENT OWNER SUBMISSION UNDER 37 CFR 1.951(a)

The patent owner submission under 37 CFR 1.951(a) of comments and/or proposed amendment must be filed within the time period set for response to the ACP. Normally, the ACP will set a period of 30 days or one month (whichever is longer) from the mailing date of the ACP.

An extension of the time period for filing the patent owner's submission under 37 CFR 1.951(a) may be requested under 37 CFR 1.956. The time period may not, however, be extended to run past 6 months from the date of the ACP.

The examiner and all other parties to the reexamination should recognize that a reexamination proceeding may result in the final cancellation of claims from the patent **and** that the patent owner does not have the right to continue the proceeding by refiling under 37 CFR 1.53(b) or 1.53(d), nor by filing a Request for Continued Examination under 37 CFR 1.114, and the patent owner cannot file an *inter partes* reexamination request (see MPEP § 2612). Accordingly, the examiner and other parties should identify and develop all issues prior to the ACP, including the presentation of evidence under 37 CFR 1.131 and 1.132.

III. PATENT OWNER MAKES SUBMISSION AFTER ACP; LIMITATION ON PATENT OWNER'S SUBMISSION

Once an ACP that is not premature has been entered in a reexamination proceeding, the patent owner no longer has a right to unrestricted further prosecution. Consideration of the proposed amendments submitted after ACP (pursuant to 37 CFR 1.951(a)) will be governed by the strict standards of 37 CFR 1.116. The patent owner's submission of comments under 37 CFR 1.951(a) must be limited to the issues raised in the ACP. If the submission addresses issues not already raised in the ACP, then the comments will be returned >as improper; if the comments have been scanned into the Image File Wrapper (IFW) for the reexamination proceeding prior to the discovery of the impropriety, they should be expunged from the record, with notification being sent to the party that submitted the comments<. No additional opportunity will be given for the patent owner to correct the defect unless a petition under 37 CFR 1.183 is granted to waive 37 CFR 1.951 as to its one opportunity limitation for the patent owner comment. If such a petition under 37 CFR 1.183 is granted and the patent owner submits corrected comments under 37 CFR 1.951(a), the third party requester may then once file supplemental comments responding to the patent owner's corrected comments within one month from the **date of service** of the patent owner's corrected comments on the third party requester. >Any replacement patent owner comments under 37 CFR 1.951(a) that are submitted in the rare instance where a petition is granted must be strictly limited to (i.e., must not go beyond) the content of the original comments submission.<

IV. PATENT OWNER MAKES SUBMISSION AFTER ACP; THIRD PARTY REQUESTER COMMENTS ARE LIMITED **

Where the patent owner files comments and/or a proposed amendment pursuant to 37 CFR 1.951(a), the third party requester may once file comments (pursuant to 37 CFR 1.951(b)) responding to the patent owner's comments>,< and/or proposed amendment>, and/or the issues raised in the ACP. See 35 U.S.C. 314(b)(2)<. Such third party requester comments must be filed within 30 days from the **date of service** of the patent owner's comments>,< and/or proposed amendment>, and/or the issues raised in the ACP< on the third party requester. If the third party requester's comments go beyond the scope of responding to the patent owner's comments>,< and/or proposed amendments>, and/or the issues raised in the ACP<, then the third party requester's comments will be returned >as improper; if the comments have been scanned into the Image File Wrapper (IFW) for the reexamination proceeding prior to the discovery of the impropriety, they should be expunged from the record, with notification being sent to the party that submitted the comments<. No additional opportunity will be given for the third party requester to correct the defect unless a petition under 37 CFR 1.183 is granted to waive 37 CFR 1.951 as to its one opportunity limitation. >Any replacement third party requester comments under 37 CFR 1.951 (that are submitted in the rare instance where a petition is granted must be strictly limited to (i.e., must not go beyond) the content of the original comments submission.<

V. PATENT OWNER DOES NOT MAKE SUBMISSION AFTER ACP

If the patent owner does not timely file comments and/or a proposed amendment pursuant to 37 CFR 1.951(a), then the third party requester is precluded from filing comments under 37 CFR 1.951(b). Accordingly, a Right of Appeal Notice (RAN) will be issued where the time for filing the patent owner comments and/or amendment has expired and no patent owner paper containing comments and/or amendment has been received. It should be noted that where the patent owner chooses not to file a submission pursuant to 37 CFR 1.951(a), no rights of appeal are lost.

VI. ACTION CLOSING PROSECUTION - PREMATURE

If the patent owner is of the opinion that the Office action closing prosecution in the *inter partes* reexamination proceeding is premature, the patent owner may, in addition to the comments submitted under 37 CFR 1.951(a), file a petition under 37 CFR 1.181 within the time period for filing the comments under 37 CFR 1.951(a). The third party requester may then once file, as a paper separate from any submission under 37 CFR 1.951(b), comments responsive to the patent owner's petition under 37 CFR 1.181 within 30 days from the date of service of the patent owner's petition under 37 CFR 1.181 on the third party requester.

2673 Examiner Consideration of Submissions After ACP and Further Action [Added R-2]

I. WHEN THE CASE IS TAKEN UP FOR ACTION

The patent owner is given 30 days or one month, whichever is longer, to make the 37 CFR 1.951(a) submission after Action Closing Prosecution (ACP). If no patent owner submission under 37 CFR 1.951(a) is received after two months from the ACP, the examiner will take up the case for action. The case should be acted on promptly, in accordance with the statutory requirement for "special dispatch within the Office" (35 U.S.C. 314(c)). Where a patent owner obtained an extension of time under 37 CFR 1.956, the examiner will wait until the extended time plus one month expires before taking up the case for action.

If the patent owner submission under 37 CFR 1.951(a) is received, the third party requester will then have 30 days from service of the patent owner's submission to file the third party requester's 37 CFR 1.951(b) submission. If no third party requester submission under 37 CFR 1.951(b) is received after two months from the date of service of the patent owner's 37 CFR 1.951(a) submission, the examiner will take up the case for action.

Where both the 37 CFR 1.951(a) and (b) submissions have been received, the case should be taken up for action as soon as possible.

II. OPTIONS AS TO WHICH ACTION TO ISSUE

(A) Right of Appeal Notice - Where no 37 CFR 1.951(a) submission has been filed by the patent owner, or where a submission under 37 CFR 1.951(a) (and 37 CFR 1.951(b)) has been filed and the examiner will not modify his/her position; the examiner should issue a Right of Appeal Notice (RAN). See MPEP § 2673.02. If the patent owner's submission included a proposed amendment, the RAN will indicate whether or not it was entered.

Where a submission has been filed under 37 CFR 1.951(a) (or 37 CFR 1.951(b)) and that submission is incomplete or is defective, the examiner should notify the parties, in the RAN, that the submission has not been considered, and that no additional opportunity is available to correct the defect(s) in the submission, because 37 CFR 1.951(a) and (b) provide that comments may only be filed "once."

(B) Office action reopening of prosecution - See MPEP § 2673.01 for a discussion of when the examiner should issue an action reopening prosecution.

III. ACTION TAKEN BY EXAMINER

It should be kept in mind that a patent owner cannot, as a matter of right, amend claims rejected in the ACP, add new claims after an ACP, nor reinstate previously canceled claims. A showing under 37 CFR 1.116(b) is required and will be evaluated by the examiner for all proposed amendments after the ACP, except where an amendment merely cancels claims, adopts examiner's suggestions, removes issues for appeal, or in some other way requires only a cursory review by the examiner.

Where the entry of the proposed amendment (after the ACP) would result in any ground of rejection being withdrawn or any additional claim indicated as patentable, the proposed amendment generally raises new issues requiring more than cursory review by the examiner. The examiner would need to indicate new grounds for patentability for any claim newly found patentable and/or the reason why the rejection was withdrawn and would also need to deal with any third party requester's comments on the proposed amendment (made pursuant to 37 CFR 1.951(b) in response to owner's proposed amendment). Thus, the examiner is not required to enter the proposed amendment.

In view of the fact that the patent owner cannot continue the proceeding by refiling under 37 CFR 1.53(b) or 1.53(d) nor by filing a Request for Continued Examination under 37 CFR 1.114 and the patent owner cannot file an *inter partes* reexamination request (see MPEP § 2612), the examiner should consider the feasibility of entering a proposed amendment paper, where the entirety of the amendment would result *only* in an additional claim (or claims) being indicated as patentable. The examiner is encouraged to enter such an amendment unless the entry would cause an "undue burden" on the examiner. Where the examiner does not enter the amendment, the examiner should explain the "undue burden." Where the examiner does enter the amendment, see MPEP § 2673.01 as to whether a Right of Appeal Notice (RAN) can be issued or whether there is a need to reopen prosecution.

Where multiple amendments are submitted after the ACP, all amendments except for the first one will be returned without consideration, since they are improper submissions. Thus, if prosecution is reopened, only the first amendment will be present for entry.

An amendment filed at any time after the ACP and prior to the RAN may be entered (where appropriate for entry). An amendment filed *after* the RAN will not be entered at all, in the absence of a grantable petition under 37 CFR 1.183 because 37 CFR 1.953(c) prohibits an amendment after the RAN in *inter partes* reexamination. If the examiner wishes to have the patent owner provide an amendment after the RAN, the examiner can reopen prosecution, enter the amendment, and issue a new ACP.

Where a proposed amendment is not entered, the examiner will provide a detailed explanation of the reasons for not entering the proposed amendment. For example, if the claims as amended would present a new issue requiring further consideration or search, the new issue should be identified, and an explanation provided as to why a new search is necessary and/or why more than nominal consideration is necessary.

The parties to the reexamination will be notified in the RAN, or the Office action issued in lieu of the RAN (e.g., action reopening prosecution), as to whether the proposed amendment will be entered or will not be entered.

2673.01 Reopening Prosecution After ACP [Added R-2]

I. MANDATORY REOPENING

Where a submission after Action Closing Prosecution (ACP) has been filed pursuant 37 CFR 1.951(a) (and 37 CFR 1.951(b)) and the examiner decides to modify his/her position, the examiner should ordinarily reopen prosecution, in accordance with the following guidelines.

The patent owner must be given an opportunity to adequately address any change in position adverse to the patent owner's position. A Right of Appeal Notice (RAN) cannot be issued until the patent owner has had the opportunity to address each and every rejection prior to the appeal stage. Thus, the examiner should reopen prosecution where any new ground of rejection is made or any additional claim is rejected.

Prosecution is ordinarily reopened in this situation by issuing a non-ACP action, i.e., an Office action prior to the ACP stage. If prosecution were reopened at the ACP stage, the patent owner loses rights as to amending the claims in response to the change in the examiner's position, because the patent owner's amendment rights are limited after ACP, - see MPEP § 2673.

As opposed to the examiner making a new ground of rejection, if a new finding of patentability is made (i.e., a ground of rejection is withdrawn or an additional claim is indicated as patentable), prosecution need not be reopened. The third party requester has no right to comment on and address a finding of patentability made during the reexamination proceeding *until the appeal stage*, unless the patent owner responds (after which the third party requester may file comments). Thus, the third party requester may address any new finding of patentability at the appeal stage in the same manner that it would address a finding of patentability made during the reexamination proceeding where the patent owner does not respond (e.g., all claims are allowed on the first Office action and the patent owner sees no reason to respond).

II. DISCRETIONARY REOPENING

In addition to the above situation which *requires* reopening of prosecution, the examiner should be liberal in reopening prosecution where the equities of the situation make such appropriate, because patent owner cannot continue the proceeding by refiling under 37 CFR 1.53(b) or 1.53(d), nor by filing a Request for Continued Examination under 37 CFR 1.114.

An example of this would be as follows. Patent owner might submit an amendment after the ACP which would make at least one claim patentable, except for one or two minor changes needed to obviate a rejection. The examiner **cannot** telephone the owner to obtain the minor change(s) and then issue a RAN because interviews are not permitted in an *inter partes* reexamination proceeding. Also, the examiner **cannot** make the changes by issuing an examiner's amendment coupled with a Notice of Intent to Issue *Inter Partes* Reexamination Certificate (NIRC) because of the presence of the third party requester, i.e., the third party requester is entitled to a RAN so that the claims found patentable can be appealed. Yet, in this situation, it would be inequitable to send the claims to appeal based on the minor points that could be easily corrected. Accordingly, the examiner would reopen prosecution (since 37 CFR 1.953 requires reopening where a RAN is not issued) and issue a new ACP suggesting the amendment which will make the claims patentable. The third party requester would then have an opportunity to comment on the newly-found-patentable claims after the patent owner submits the suggested amendment pursuant to 37 CFR 1.951(a).

See MPEP § 2673 for a discussion of the examiner not exercising his/her discretion to reopen prosecution in those situations where an "undue burden" on the Office would result if prosecution were reopened.

2673.02 Examiner Issues Right of Appeal Notice (RAN) [R-7]

37 CFR 1.953. Examiner's Right of Appeal Notice in inter partes reexamination.

(a) Upon considering the comments of the patent owner and the third party requester subsequent to the Office action closing prosecution in an *inter partes* reexamination, or upon expiration of the time for submitting such comments, the examiner shall issue a Right of Appeal Notice, unless the examiner reopens prosecution and issues another Office action on the merits.

(b) **>Expedited Right of Appeal Notice: At any time after the patent owner's response to the initial Office action on the merits in an *inter partes* reexamination, the patent owner and all third party requesters may stipulate that the issues are appropriate for a final action, which would include a final rejection and/or a final

determination favorable to patentability, and may request the issuance of a Right of Appeal Notice. The request must have the concurrence of the patent owner and all third party requesters present in the proceeding and must identify all of the appealable issues and the positions of the patent owner and all third party requesters on those issues. If the examiner determines that no other issues are present or should be raised, a Right of Appeal Notice limited to the identified issues shall be issued.

(c) The Right of Appeal Notice shall be a final action, which comprises a final rejection setting forth each ground of rejection and/or final decision favorable to patentability including each determination not to make a proposed rejection, an identification of the status of each claim, and the reasons for decisions favorable to patentability and/or the grounds of rejection for each claim. No amendment can be made in response to the Right of Appeal Notice. The Right of Appeal Notice shall set a one-month time period for either party to appeal. If no notice of appeal is filed, prosecution in the *inter partes* reexamination proceeding will be terminated, and the Director will proceed to issue and publish a certificate under § 1.997 in accordance with the Right of Appeal Notice.<

A Right of Appeal Notice (RAN) is a final Office action which presents a final decision to reject the claims (i.e., a final decision that the claims are rejected) and/or a final decision favorable to patentability as to the claims (i.e., a final decision not to make a proposed rejection).

The RAN will identify the status of each claim. It will set forth:

(A) the grounds of rejection for all claims rejected in the RAN;

(B) the reasons why a proposed rejection is not made for all decisions favorable to patentability as to claims that were contested by the third party requester; and

(C) the reasons for patentability for all claims "allowed" and not contested by the third party requester.

The RAN will also advise parties of their rights of appeal at this stage in the reexamination proceeding, and the consequences of failure to appeal.

See MPEP § 2673 as to matters that should be taken into account by the examiner before deciding to issue a RAN. Before the examiner actually issues a RAN, all outstanding grounds of rejection of record and findings of patentability that are of record should be carefully reviewed, after consideration of all submissions of record by the parties. Where it is appropriate to retain the grounds of rejection and findings of patentability, and the examiner's position will not be changed, the examiner is permitted to issue a RAN. Any grounds of rejection and findings of patentability relied upon should be restated in the RAN. The reasons for each rejection and finding should be set forth in detail. The grounds of rejection and findings of patentability should, at this point, be clearly developed to such an extent that the patent owner and the third party requester may readily judge the advisability of filing an appeal. The examiner's position as to any arguments and comments raised by the patent owner and the third party requester should be clearly set forth, so that any appeal taken can address the examiner's position as to the arguments and comments.

In the RAN, it should also be point out which submissions after the Action Closing Prosecution (ACP) have been entered and considered, and which have not. At this point, the examiner should check the record to ensure that parties have been made aware of which amendments, evidence (affidavits, declarations, exhibits, etc.), references and argument are before the examiner for consideration. The case should be ready for appeal after the RAN issues.

In the event that an amendment submitted by the patent owner after the ACP has not been entered because the amendment does not comply with the requirements of 37 CFR 1.116 (see 37 CFR 1.951(a)), the patent owner may file a petition under 37 CFR 1.181 requesting entry of the amendment. The petition under 37 CFR 1.181 must be filed within the time period for filing a notice of appeal or cross appeal, if appropriate (see 37 CFR 1.953(c)). Note that the filing of a petition under 37 CFR 1.181 does **not** toll the time period for filing a notice of appeal or cross appeal, if appropriate. Thus, in addition to the petition under 37 CFR 1.181, the patent owner is encouraged to file (1) a petition under 37 CFR 1.183 requesting waiver of the prohibition of an extension of time for filing an appeal brief (37 CFR 41.66(a)), and (2) a request for an extension of the period to file the appeal brief until after a decision on the petition under 37 CFR 1.181. The third party requester may once file comments responsive to the patent owner's petition under 37 CFR 1.181 within 30 days from the date of service of the patent owner's petition under 37 CFR 1.181 on the third party requester. When rendering a decision on the petition under 37 CFR 1.181, the deciding official should be mindful that a patent owner in an *inter partes* reexamination proceeding

may not be able to proceed effectively if the amendment submitted after the ACP is not entered since the patent owner in an *inter partes* reexamination proceeding does not have the right to continue the proceeding by refiling under 37 CFR 1.53(b) or 1.53(d) nor by filing a Request for Continued Examination under 37 CFR 1.114, and the patent owner cannot file an *inter partes* reexamination.

Form PTOL-2066 should be used as the cover sheet for the RAN. The RAN should conclude with form paragraph 26.08 advising the parties of their right to appeal and correspondence and inquiry form paragraph 26.73:

¶ *26.08 Right of Appeal Notice*

This is a RIGHT OF APPEAL NOTICE (RAN); see MPEP § 2673.02 and § 2674. The decision in this Office action as to the patentability or unpatentability of any original patent claim, any proposed amended claim and any new claim in this proceeding is a FINAL DECISION.

No amendment can be made in response to the Right of Appeal Notice in an *inter partes* reexamination. 37 CFR 1.953(c). Further, no affidavit or other evidence can be submitted in an *inter partes* reexamination proceeding after the right of appeal notice, except as provided in 37 CFR 1.981 or as permitted by 37 CFR 41.77(b)(1). 37 CFR 1.116(f).

Each party has a **thirty-day or one-month time period, whichever is longer**, to file a notice of appeal. The patent owner may appeal to the Board of Patent Appeals and Interferences with respect to any decision adverse to the patentability of any original or proposed amended or new claim of the patent by filing a notice of appeal and paying the fee set forth in 37 CFR 41.20(b)(1). The third party requester may appeal to the Board of Patent Appeals and Interferences with respect to any decision favorable to the patentability of any original or proposed amended or new claim of the patent by filing a notice of appeal and paying the fee set forth in 37 CFR 41.20(b)(1).

In addition, a patent owner who has not filed a notice of appeal may file a notice of cross appeal within **fourteen days of service** of a third party requester's timely filed notice of appeal and pay the fee set forth in 37 CFR 41.20(b)(1). A third party requester who has not filed a notice of appeal may file **a notice of cross appeal within fourteen days of service** of a patent owner's timely filed notice of appeal and pay the fee set forth in 37 CFR 41.20(b)(1).

Any appeal in this proceeding must identify the claim(s) appealed, and must be signed by the patent owner (for a patent owner appeal) or the third party requester (for a third party requester appeal), or their duly authorized attorney or agent.

Any party that does not file a timely notice of appeal or a timely notice of cross appeal will lose the right to appeal from any decision adverse to that party, but will not lose the right to file a respondent brief and fee where it is appropriate for that party to do so. If no party files a timely appeal, the reexamination prosecution will be terminated, and the Director will proceed to issue and publish a certificate under 37 CFR 1.997 in accordance with this Office action.

¶ *26.73 Correspondence and Inquiry as to Office Actions*

All correspondence relating to this *inter partes* reexamination proceeding should be directed:

By Mail to: Mail Stop *Inter Partes* Reexam
Attn: Central Reexamination Unit
Commissioner for Patents
United States Patent & Trademark Office
P.O. Box 1450
Alexandria, VA 22313-1450

By FAX to: (571) 273-9900
Central Reexamination Unit

By hand: Customer Service Window
Randolph Building
401 Dulany Street
Alexandria, VA 22314

Any inquiry concerning this communication or earlier communications from the examiner, or as to the status of this proceeding, should be directed to the Central Reexamination Unit at telephone number (571) 272-7705.

An amendment filed *after* the RAN will not be entered at all, in the absence of a grantable petition under 37 CFR 1.183, because 37 CFR 1.953(c) prohibits an amendment after the RAN in an *inter partes* reexamination. If the examiner wishes to have the patent owner provide an amendment after the RAN, the examiner can reopen prosecution, accept the amendment (for entry), and issue a new Action Closing Prosecution (ACP). See MPEP § 2673.01 for discussion as to discretionary reopening of prosecution.

Note that 37 CFR 1.116(d)(1) states that no amendment other than canceling claims, where such cancellation does not affect the scope of any other pending claims in the proceeding, can be made in an *inter partes* reexamination proceeding after the RAN except as provided in 37 CFR 1.981 or as permitted by 37 CFR 41.77(b)(1). Furthermore, no affidavit or other evidence can be submitted in an *inter partes* reexamination proceeding after the RAN except as provided in 37 CFR 1.981 or as permitted by 37 CFR 41.77(b)(1). See 37 CFR 1.116(f).

I. EXAMINER NEVER ISSUES A NIRC AFTER ACP

Once an ACP has been issued, there is no requirement for the patent owner to respond; where the patent owner does not respond to the rejection of the

patent claims, a RAN will still be issued and the patent owner can appeal at that point to the Board of Patent Appeals and Interferences. Because there is no requirement for the patent owner to respond, there is no situation in which a Notice of Intent to Issue *Inter Partes* Reexamination Certificate (NIRC) can be issued after an ACP and prior to the RAN. Even if (after an ACP has been issued) the examiner finds the patent owner's subsequent argument to be persuasive as to all of the claims, a NIRC would still not be issued, but rather, a RAN would be issued to provide the third party requester with an opportunity to appeal the "allowed" claims to the Board of Patent Appeals and Interferences.

II. EXPEDITED RIGHT OF APPEAL NOTICE

37 CFR 1.953(b) provides for an expedited RAN. At any time after the patent owner's response to the first Office action on the merits in an *inter partes* reexamination, the patent owner and the third party requester (all third party requesters, if there is more than one due to a merged proceeding) may request the immediate issuance of a RAN.

The request for an expedited RAN must:

(A) stipulate that the issues are appropriate for a final action, which would include a final rejection and/or a final determination favorable to patentability;

(B) state that the patent owner and the third party requester (all third party requesters, if there is more than one) join in making the request;

(C) identify all of the appealable issues; and

(D) identify and discuss the positions of the patent owner and the third party requester(s) on the identified issues.

If the examiner determines that no other issues are present or should be raised in the proceeding, a RAN limited to the identified issues will be issued.

If the examiner determines that other issues are in fact present, or that other issues need to be raised in the proceeding, the examiner should deny the request, and examination and prosecution will continue as if the request had not been submitted.

In no event will the request for an expedited RAN be construed to extend the time for any response/comments due at the time the request is made.

III. PANEL REVIEW CONFERENCE

After an examiner has determined that the reexamination proceeding is ready for the RAN action, the examiner will formulate a draft preliminary RAN action. The examiner will then inform his/her **>Central Reexamination Unit (CRU) Supervisory Patent Examiner (SPE) or Technology Center (TC) Quality Assurance Specialist (QAS)< of his/her intent to issue the action. The *>CRU SPE/TC QAS< will convene a panel review conference, and the conference members will review the patentability of the claim(s) pursuant to MPEP § 2671.03. If the conference confirms the examiner's preliminary decision to reject and/or allow the claims, the proposed RAN action shall be issued and signed by the examiner, with the two other conferees initialing the action (as "conferee") to indicate their presence in the conference. If the conference does not confirm the examiner's treatment of the claims, the examiner will reevaluate and issue an appropriate Office action.

2674 Appeal in Reexamination [R-3]

35 U.S.C. 315. Appeal.

(a) PATENT OWNER.— The patent owner involved in an inter partes reexamination proceeding under this chapter—

(1) may appeal under the provisions of section 134 and may appeal under the provisions of sections 141 through 144, with respect to any decision adverse to the patentability of any original or proposed amended or new claim of the patent; and

(2) may be a party to any appeal taken by a third-party requester under subsection (b).

(b) THIRD-PARTY REQUESTER.— A third-party requester—

(1) may appeal under the provisions of section 134, and may appeal under the provisions of sections 141 through 144, with respect to any final decision favorable to the patentability of any original or proposed amended or new claim of the patent; and

(2) may, subject to subsection (c), be a party to any appeal taken by the patent owner under the provisions of section 134 or sections 141 through 144.

(c) CIVIL ACTION.— A third-party requester whose request for an inter partes reexamination results in an order under section 313 is estopped from asserting at a later time, in any civil action arising in whole or in part under section 1338 of title 28, the invalidity of any claim finally determined to be valid and patentable on any ground which the third-party requester raised or could have raised during the inter partes reexamination proceedings. This subsection does not prevent the assertion of invalidity based on newly discovered prior art unavailable to the third-party requester and the Patent and Trademark Office at the time of the inter partes reexamination proceedings.

**>

37 CFR 1.959. Appeal in inter partes reexamination.

Appeals to the Board of Patent Appeals and Interferences under 35 U.S.C. 134(c) are conducted according to part 41 of this title.

37 CFR 41.61. Notice of appeal and cross appeal to Board.

(a)(1)Upon the issuance of a Right of Appeal Notice under § 1.953 of this title, the owner may appeal to the Board with respect to the final rejection of any claim of the patent by filing a notice of appeal within the time provided in the Right of Appeal Notice and paying the fee set forth in § 41.20(b)(1).

(2) Upon the issuance of a Right of Appeal Notice under § 1.953 of this title, the requester may appeal to the Board with respect to any final decision favorable to the patentability, including any final determination not to make a proposed rejection, of any original, proposed amended, or new claim of the patent by filing a notice of appeal within the time provided in the Right of Appeal Notice and paying the fee set forth in § 41.20(b)(1).

(b)(1)Within fourteen days of service of a requester's notice of appeal under paragraph (a)(2) of this section and upon payment of the fee set forth in § 41.20(b)(1), an owner who has not filed a notice of appeal may file a notice of cross appeal with respect to the final rejection of any claim of the patent.

(2) Within fourteen days of service of an owner's notice of appeal under paragraph (a)(1) of this section and upon payment of the fee set forth in § 41.20 (b)(1), a requester who has not filed a notice of appeal may file a notice of cross appeal with respect to any final decision favorable to the patentability, including any final determination not to make a proposed rejection, of any original, proposed amended, or new claim of the patent.

(c) The notice of appeal or cross appeal in the proceeding must identify the appealed claim(s) and must be signed by the owner, the requester, or a duly authorized attorney or agent.

(d) An appeal or cross appeal, when taken, must be taken from all the rejections of the claims in a Right of Appeal Notice which the patent owner proposes to contest or from all the determinations favorable to patentability, including any final determination not to make a proposed rejection, in a Right of Appeal Notice which a requester proposes to contest. Questions relating to matters not affecting the merits of the invention may be required to be settled before an appeal is decided.

(e) The time periods for filing a notice of appeal or cross appeal may not be extended.

(f) If a notice of appeal or cross appeal is timely filed but does not comply with any requirement of this section, appellant will be notified of the reasons for non-compliance and given a non-extendable time period within which to file an amended notice of appeal or cross appeal. If the appellant does not then file an amended notice of appeal or cross appeal within the set time period, or files a notice which does not overcome all the reasons for non-compliance stated in the notification of the reasons for non-compliance, that appellant's appeal or cross appeal will stand dismissed.<

An appeal cannot be taken by parties to the reexamination until a Right of Appeal Notice (RAN) has been issued. Once a RAN has been issued, the patent owner and any third party requester will have, in accordance with 37 CFR 1.953, a time period of one month or thirty days (whichever is longer) to file a notice of appeal (with the fee set forth in 37 CFR *>41.20(b)(1)<. Pursuant to 37 CFR *>41.61(e)<, the time for filing a notice of appeal may not be extended.

In the event that no party to the reexamination files a timely notice of appeal, the >prosecution of the reexamination< proceeding will be terminated, with the examiner issuing a Notice of Intent to Issue *Inter Partes* Reexamination Certificate (NIRC); see MPEP § 2687. However, if **one** of the parties does file a notice of appeal within the one month/thirty day period, an **opposing party** can enter into the appeal by filing a notice of cross appeal pursuant to 37 CFR *>41.61(b)< within fourteen (14) days from service of the first party's notice of appeal, see MPEP § 2674.01. Pursuant to 37 CFR *>41.61(e)<, the time for filing a notice of cross appeal may not be extended.

The procedure for taking appeal is **>referenced< in 37 CFR 1.959 >and set forth in 37 CFR 41.61<.

(A) The notice of appeal must identify the appealed claim(s).

(B) The appeal must be taken from (1) the rejection(s) of the claims in the Right of Appeal Notice (RAN) which the *patent owner* proposes to contest, or (2) the finding(s) of patentability of claims in the RAN which the *third party requester* proposes to contest. Therefore:

- A notice of appeal by the patent owner must identify each claim rejected by the examiner that the patent owner intends to contest;

- A notice of appeal by a third party requester must identify each rejection *that was previously proposed by that third party requester* which the third party requester intends to contest. It is not sufficient to merely appeal from the allowance of a claim (i.e., the examiner's finding of a claim patentable); the third party requester must identify each previously proposed rejection to be contested.

(C) The notice of appeal must be signed by the patent owner or the third party requester, or their duly authorized attorney or agent.

"Appellant" and "respondent" are defined in 37 CFR *>41.60<. Where the patent owner appeals from the rejection of the claims, a third party requester responding to the patent owner's appeal is termed the respondent as to the rejected claims. Where a third party requester appeals from a favorable determination with respect to the claims, the patent owner responding to the third party requester's appeal is termed the respondent as to the favorable determination.

Where a party fails to file a timely notice of appeal or notice of cross appeal, that party may no longer file an appellant brief to appeal a claim determination adverse to that party; however, that party *is permitted to file a respondent brief* in accordance with 37 CFR *>41.66(b) and 41.68< (with the fee as required by 37 CFR *>41.68(a)<), to respond to issues raised by an opposing party's appellant brief.

Where a notice of appeal or notice of cross appeal is timely filed but is defective, e.g., missing fee or missing portion of the fee, no proof of service is included, it is signed by an inappropriate party or is unsigned, failure to identify the appealed claims; 37 CFR *>41.61(f)< provides the appropriate party one opportunity to file, within a nonextendable period of one month, an amended notice of appeal or cross appeal that corrects the defect(s). Form PTOL-2067 should be used to provide the notification.

Where a notice of appeal or notice of cross appeal is filed before a RAN has been issued, the appropriate party will be notified in writing that the appeal is not acceptable. The paper will be placed in the file ** but it will not be considered at all in the proceeding, other than to inform the party that the appeal is not acceptable.

It should be noted that under 37 CFR **>41.63(a), amendments filed after the date of filing an appeal (under 37 CFR 41.61) canceling claims may be admitted, where such cancellation does not affect the scope of any other pending claim in the proceeding. However, as to all other amendments filed after the date of filing an appeal, 37 CFR 41.63(b) states that such amendments will not be admitted except as permitted where the patent owner takes action for reopening prosecution under 37 CFR 41.77(b)(1). Also, under 37 CFR 41.63(c), affidavits, declarations, or exhibits submitted after the date of filing an appeal will not be admitted except as permitted by reopening prosecution under 37 CFR 41.77(b)(1).<

2674.01 Cross Appeal After Original Appeal [R-3]

**>

37 CFR 41.61. Notice of appeal and cross appeal to Board.

*****

(b)(1)Within fourteen days of service of a requester's notice of appeal under paragraph (a)(2) of this section and upon payment of the fee set forth in § 41.20(b)(1), an owner who has not filed a notice of appeal may file a notice of cross appeal with respect to the final rejection of any claim of the patent.

(2) Within fourteen days of service of an owner's notice of appeal under paragraph (a)(1) of this section and upon payment of the fee set forth in § 41.20 (b)(1), a requester who has not filed a notice of appeal may file a notice of cross appeal with respect to any final decision favorable to the patentability, including any final determination not to make a proposed rejection, of any original, proposed amended, or new claim of the patent.

*****

<

The cross appeal provision of 37 CFR *>41.61(b)< permits a party to the reexamination to wait and see if an opposing party will appeal, before committing to the appeal process.

Within fourteen days of service of a third party requester's notice of appeal, a patent owner who has not filed a notice of appeal, may file a notice of cross appeal, the cross appeal being with respect to any final decision (i.e., decision in the RAN) **adverse** to the patentability of any claim of the patent. Pursuant to 37 CFR *>41.61(e)<, the time for filing the patent owner's notice of cross appeal may not be extended.

Within fourteen days of service of a patent owner's notice of appeal, a third party requester who has not filed a notice of appeal may file a notice of cross appeal, the cross appeal being with respect to any final decision (i.e., decision in the RAN) **favorable** to the patentability of any claim of the patent. Pursuant to 37 CFR *>41.61(e)<, the time for filing the requester's notice of cross appeal may not be extended.

Where the notice of cross appeal is timely filed but is defective, e.g., missing fee or missing portion of the

fee, no proof of service, signed by an inappropriate party or unsigned, failure to identify the appealed claims; 37 CFR *>41.61(f)< provides the appropriate party one opportunity to file, within a non-extendable period of one month, an amended cross appeal that corrects the defect(s).

Where there are more than two parties to the proceeding, i.e., the patent owner and more than one *inter partes* third party requester in a merged proceeding, then a third party cross appeal must be filed within fourteen days of service of a patent owner's notice of appeal. If a first third party requester filed an appeal later than the patent owner's appeal, then the second third party requester's time for cross appeal runs from the earlier-in-time patent owner appeal, **not** from the later-in-time first requester appeal.

In addition, 37 CFR *>41.61(b)< only provides for a cross appeal from a "notice of appeal," not from a "notice of cross appeal." Thus, if the patent owner files a notice of cross appeal after the original one month/thirty days period for appeal has expired, but within the fourteen days of a first requester's appeal (which was filed within the original period); a second third party requester does **not** have fourteen days from the patent owner's cross appeal. In such a situation, the time for the second requester to appeal (the original one month/thirty days) has expired and the second requester cannot appeal.

The content of a notice of cross appeal is the same as that for a notice of appeal, except that the notice of cross appeal is titled as such and identifies the original appeal from which the cross appeal is taken. Where a party inadvertently fails to title or identify a notice of cross appeal as such (i.e., the format for an *original* appeal is used), in an appeal filed after the original one month/thirty days has expired but before the "fourteen days" have expired, the examiner will construe the notice of appeal as the filing of a notice of cross appeal timely filed within the fourteen days.

2675 Appellant Brief [R-5]

37 CFR 41.66. Time for filing briefs.

(a) An appellant's brief must be filed no later than two months from the latest filing date of the last-filed notice of appeal or cross appeal or, if any party to the proceeding is entitled to file an appeal or cross appeal but fails to timely do so, no later than two months from the expiration of the time for filing (by the last party entitled to do so) such notice of appeal or cross appeal. The time for filing an appellant's brief or an amended appellant's brief may not be extended.

*****

37 CFR 41.67. Appellant's brief.

(a)(1)Appellant(s) may once, within time limits for filing set forth in § 41.66, file a brief and serve the brief on all other parties to the proceeding in accordance with § 1.903 of this title.

(2) The brief must be signed by the appellant, or the appellant's duly authorized attorney or agent and must be accompanied by the requisite fee set forth in § 41.20(b)(2).

(b) An appellant's appeal shall stand dismissed upon failure of that appellant to file an appellant's brief, accompanied by the requisite fee, within the time allowed under § 41.66(a).

(c)(1)The appellant's brief shall contain the following items under appropriate headings and in the order indicated in paragraphs (c)(1)(i) through (c)(1)(xi) of this section.

(i) *Real party in interest*. A statement identifying by name the real party in interest.

(ii) *Related appeals and interferences*. A statement identifying by application, patent, appeal or interference number all other prior and pending appeals, interferences or judicial proceedings known to appellant, the appellant's legal representative, or assignee which may be related to, directly affect or be directly affected by or have a bearing on the Board's decision in the pending appeal. Copies of any decisions rendered by a court or the Board in any proceeding identified under this paragraph must be included in an appendix as required by paragraph (c)(1)(xi) of this section.

(iii) *Status of claims*. A statement of the status of all the claims in the proceeding (e.g., rejected, allowed or confirmed, withdrawn, objected to, canceled). If the appellant is the owner, the appellant must also identify the rejected claims whose rejection is being appealed. If the appellant is a requester, the appellant must identify the claims that the examiner has made a determination favorable to patentability, which determination is being appealed.

(iv) *Status of amendments*. A statement of the status of any amendment filed subsequent to the close of prosecution.

(v) *Summary of claimed subject matter*. A concise explanation of the subject matter defined in each of the independent claims involved in the appeal, which shall refer to the specification by column and line number, and to the drawing(s), if any, by reference characters. For each independent claim involved in the appeal and for each dependent claim argued separately under the provisions of paragraph (c)(1)(vii) of this section, every means plus function and step plus function as permitted by 35 U.S.C. 112, sixth paragraph, must be identified and the structure, material, or acts described in the specification as corresponding to each claimed function must be set forth with reference to the specification by page and line number, and to the drawing, if any, by reference characters.

(vi) *Issues to be reviewed on appeal*. A concise statement of each issue presented for review. No new ground of rejection can be proposed by a third party requester appellant, unless such ground was withdrawn by the examiner during the prosecution of the proceeding, and the third party requester has not yet had an

opportunity to propose it as a third party requester proposed ground of rejection.

(vii)*Argument*. The contentions of appellant with respect to each issue presented for review in paragraph (c)(1)(vi) of this section, and the basis therefor, with citations of the statutes, regulations, authorities, and parts of the record relied on. Any arguments or authorities not included in the brief permitted under this section or §§ 41.68 and 41.71 will be refused consideration by the Board, unless good cause is shown. Each issue must be treated under a separate heading. If the appellant is the patent owner, for each ground of rejection in the Right of Appeal Notice which appellant contests and which applies to two or more claims, the claims may be argued separately or as a group. When multiple claims subject to the same ground of rejection are argued as a group by appellant, the Board may select a single claim from the group of claims that are argued together to decide the appeal with respect to the group of claims as to the ground of rejection on the basis of the selected claim alone. Notwithstanding any other provision of this paragraph, the failure of appellant to separately argue claims which appellant has grouped together shall constitute a waiver of any argument that the Board must consider the patentability of any grouped claim separately. Any claim argued separately should be placed under a subheading identifying the claim by number. Claims argued as a group should be placed under a subheading identifying the claims by number. A statement which merely points out what a claim recites will not be considered an argument for separate patentability of the claim.

(viii)*Claims appendix*. An appendix containing a copy of the claims to be reviewed on appeal.

(ix) *Evidence appendix*. An appendix containing copies of any evidence submitted pursuant to §§ 1.130, 1.131, or 1.132 of this title or of any other evidence entered by the examiner and relied upon by appellant in the appeal, along with a statement setting forth where in the record that evidence was entered in the record by the examiner. Reference to unentered evidence is not permitted in the brief. See § 41.63 for treatment of evidence submitted after appeal. This appendix may also include copies of the evidence relied upon by the examiner in any ground of rejection to be reviewed on appeal.

(x) *Related proceedings appendix*. An appendix containing copies of decisions rendered by a court or the Board in any proceeding identified pursuant to paragraph (c)(1)(ii) of this section.

(xi) *Certificate of service*. A certification that a copy of the brief has been served in its entirety on all other parties to the reexamination proceeding. The names and addresses of the parties served must be indicated.

(2) A brief shall not include any new or non-admitted amendment, or any new or non-admitted affidavit or other evidence. See § 1.116 of this title for amendments, affidavits or other evidence filed after final action but before or on the same date of filing an appeal and § 41.63 for amendments, affidavits or other evidence after the date of filing the appeal.

(d) If a brief is filed which does not comply with all the requirements of paragraph (a) and paragraph (c) of this section, appellant will be notified of the reasons for non-compliance and given a non-extendable time period within which to file an amended brief. If appellant does not file an amended brief within the set time period, or files an amended brief which does not overcome all the reasons for non-compliance stated in the notification, that appellant's appeal will stand dismissed.

In order to file an appellant brief, it is necessary to have first filed a timely and proper notice of appeal or notice of cross appeal; see MPEP § 2674 and § 2674.01. Each party that filed a timely and proper notice of appeal or notice of cross appeal must then file its appellant brief with fee (set forth in 37 CFR 41.20(b)(2)) by the later of:

(A) within two months from the date of the last-filed notice of appeal or cross appeal; or

(B) if a patent owner or third party requester is entitled to file an appeal or cross appeal but fails to timely do so, until the expiration of time for filing (by the last party entitled to do so) such notice of appeal or cross appeal.

The time for filing an appellant brief may not be extended. 37 CFR 41.66(a).

Pursuant to 37 CFR 41.67(d), if a brief is filed which does not comply with all the requirements of 37 CFR 41.67(a) and (c), appellant will be notified and given a nonextendable period of one month within which to file an amended brief to correct the defect(s). Failure to timely file the appellant brief and fee within the time allowed will result in dismissal of the appeal of the party that failed to take the timely action. Note that if an appellant brief is late, or if an amended appellant brief is not submitted after a requirement to correct the defect(s), the respondent brief will be placed in the file; however, it will be marked as "not entered" since it is not formally received into the record, and it will not be considered. The same is true for an amended appellant brief which is late.

Where all parties who filed an appeal or cross appeal fail to timely file an appellant brief and fee within the time allowed, the prosecution of the reexamination proceeding is terminated by a Notice of Intent to Issue *Inter Partes* Reexamination Certificate (NIRC), and a certificate is issued indicating the status of the claims at the time of appeal.

The appellant brief, as well as every other paper relating to an appeal, should indicate the number of the **>Central Reexamination Unit (CRU)< Art Unit to which the reexamination is assigned and the

reexamination control number. When an appellant brief is received, it is scanned and then entered into the file by the **>CRU support staff< and then forwarded to the *>examiner<.

A fee as set forth in 37 CFR 41.20(b)(2) is required when the appellant brief is filed for the first time in a particular reexamination proceeding, 35 U.S.C. 41(a). 37 CFR 41.67(c)(1) requires that the appellant shall provide, in the appellant brief, the authorities and arguments on which the appellant will rely to maintain the appeal, a concise explanation of subject matter defined in each of the independent claims involved in the appeal which explanation must refer to the specification by column and line number (and to the drawing, if any, by reference characters), an evidence appendix, a related proceedings appendix, and a copy of the claims involved. The copy of the claims (involved in the appeal) required in the claim appendix by 37 CFR 41.67(c)(1)(viii) should be a clean copy. The clean copy ***must include*** all brackets and underlining as required by 37 CFR 1.530(d) *et seq.*>; thus, the copy of the claims on appeal must include all underlining and bracketing necessary to reflect the changes made to the original patent claims throughout the prosecution of the reexamination. In addition, any new claims added in the reexamination must be completely underlined.< For the sake of convenience, the copy of the claims involved should start on a new page, and it should be double spaced.

The provisions of 37 CFR 41.67(c) should be carefully reviewed to ensure that a complete appellant brief is provided. Patent owners are reminded that their briefs in appeal cases must be responsive to every ground of rejection stated by the examiner which the patent owner-appellant contests. Third party requesters are reminded that their briefs in appeal cases must be responsive to each examiner determination of patentability (determination of inapplicability of a proposed rejection) which the third party requester-appellant contests. Oral argument at the hearing will not remedy such a deficiency in the appellant brief.

Where the appellant brief is not complete as to the provisions of 37 CFR 41.67(a) and (c), appellant will be notified (in accordance with 37 CFR 41.67(d) by the examiner that he/she is given one (1) month to correct the defect(s) by filing a supplemental appellant brief. Where this procedure has not been followed, the Board of Patent Appeals and Interferences should remand the reexamination file to the examiner for appropriate action.

When the record clearly indicates an *intentional* failure to respond by appellant brief to any ground of rejection or determination of patentability, the examiner should so inform the Board of Patent Appeals and Interferences in his/her answer and specify the claim(s) affected. Where the failure to respond by appellant brief appears to be intentional, the Board of Patent Appeals and Interferences may dismiss the appeal (of the appropriate party) as to the claims involved. Oral argument at a hearing will not remedy such a deficiency in a brief.

It is essential that the Board of Patent Appeals and Interferences should be provided with a brief fully stating the position of the appellant with respect to each issue involved in the appeal so that no search of the record is required in order to determine that position. The fact that appellant may consider a ground or determination to be clearly improper does not justify a failure on the part of the appellant to point out to the Board the argument, i.e., reasons, for that view. A distinction must be made between the lack of any argument and the presentation of arguments which carry no conviction. In the former case, dismissal is in order, while in the latter case a decision on the merits is made, although it may well be merely an affirmance based on the grounds or determination relied upon by the examiner.

Ignoring or acquiescing in any rejection or determination, even one based upon formal matters which could be corrected by subsequent amendments, will invite a dismissal of the appeal as to the appropriate party. The prosecution of the reexamination proceedings will be considered terminated as of the date of the dismissal of the appeal of all parties who filed an appeal or cross appeal.

AMENDMENTS, AFFIDAVITS, DECLARATIONS, OR EXHIBITS

Pursuant to 37 CFR 41.67(c)(2), the brief is not to include any (A) new or non-admitted (non-entered) amendment, or (B) new or non-admitted (non-entered) affidavit or other evidence.

Pursuant to 37 CFR 41.63:

(A) Amendments filed after the date of filing an appeal (under 37 CFR 41.61) canceling claims may be

admitted, where such cancellation does not affect the scope of any other pending claim in the proceeding;

(B) All other amendments filed after the date of filing an appeal will not be admitted, except as permitted where the patent owner takes action for reopening prosecution under 37 CFR 41.77(b)(1);

(C) Affidavits or other evidence filed after the date of filing an appeal will not be admitted, except as permitted where the patent owner takes action for reopening prosecution under 37 CFR 41.77(b)(1).

If the examiner wishes to have the patent owner provide an amendment (other than cancellation of claims as discussed above) or evidence during the appeal stage, the examiner must (A) reopen prosecution, (B) accept the amendment or evidence for entry, (C) permit timely comment on the new amendment or evidence by the third party requester, and (D) then issue a new Action Closing Prosecution (ACP). See MPEP § 2673.01.

2675.01 Respondent Brief [R-5]

37 CFR 41.66. Time for filing briefs.

*****

(b) Once an appellant's brief has been properly filed, any brief must be filed by respondent within one month from the date of service of the appellant's brief. The time for filing a respondent's brief or an amended respondent's brief may not be extended.

*****

37 CFR 41.68. Respondent's brief.

(a)(1)Respondent(s) in an appeal may once, within the time limit for filing set forth in § 41.66, file a respondent brief and serve the brief on all parties in accordance with § 1.903 of this title.

(2) The brief must be signed by the party, or the party's duly authorized attorney or agent, and must be accompanied by the requisite fee set forth in § 41.20(b)(2).

(3) The respondent brief shall be limited to issues raised in the appellant brief to which the respondent brief is directed.

(4) A requester's respondent brief may not address any brief of any other requester.

(b)(1)The respondent brief shall contain the following items under appropriate headings and in the order here indicated, and may include an appendix containing only those portions of the record on which reliance has been made.

(i) *Real Party in Interest*. A statement identifying by name the real party in interest.

(ii) *Related Appeals and Interferences.* A statement identifying by application, patent, appeal or interference number all other prior and pending appeals, interferences or judicial proceedings known to respondent, the respondent's legal representative, or assignee which may be related to, directly affect or be directly affected by or have a bearing on the Board's decision in the pending appeal. Copies of any decisions rendered by a court or the Board in any proceeding identified under this paragraph must be included in an appendix as required by paragraph (b)(1)(ix) of this section.

(iii) *Status of claims.* A statement accepting or disputing appellant's statement of the status of claims. If appellant's statement of the status of claims is disputed, the errors in appellant's statement must be specified with particularity.

(iv) *Status of amendments*. A statement accepting or disputing appellant's statement of the status of amendments. If appellant's statement of the status of amendments is disputed, the errors in appellant's statement must be specified with particularity.

(v) *Summary of claimed subject matter*. A statement accepting or disputing appellant's summary of the subject matter defined in each of the independent claims involved in the appeal. If appellant's summary of the subject matter is disputed, the errors in appellant's summary must be specified.

(vi) *Issues to be reviewed on appeal*. A statement accepting or disputing appellant's statement of the issues presented for review. If appellant's statement of the issues presented for review is disputed, the errors in appellant's statement must be specified. A counter statement of the issues for review may be made. No new ground of rejection can be proposed by a requester respondent.

(vii)*Argument.* A statement accepting or disputing the contentions of appellant with each of the issues presented by the appellant for review. If a contention of the appellant is disputed, the errors in appellant's argument must be specified, stating the basis therefor, with citations of the statutes, regulations, authorities, and parts of the record relied on. Each issue must be treated under a separate heading. An argument may be made with each of the issues stated in the counter statement of the issues, with each counter-stated issue being treated under a separate heading.

(viii)*Evidence appendix*. An appendix containing copies of any evidence submitted pursuant to §§ 1.130, 1.131, or 1.132 of this title or of any other evidence entered by the examiner and relied upon by respondent in the appeal, along with a statement setting forth where in the record that evidence was entered in the record by the examiner. Reference to unentered evidence is not permitted in the respondent's brief. See § 41.63 for treatment of evidence submitted after appeal.

(ix) *Related proceedings appendix*. An appendix containing copies of decisions rendered by a court or the Board in any proceeding identified pursuant to paragraph (b)(1)(ii) of this section.

(x) *Certificate of service.* A certification that a copy of the respondent brief has been served in its entirety on all other parties to the reexamination proceeding. The names and addresses of the parties served must be indicated.

(2) A respondent brief shall not include any new or non-admitted amendment, or any new or non-admitted affidavit or

other evidence. See § 1.116 of this title for amendments, affidavits or other evidence filed after final action but before or on the same date of filing an appeal and § 41.63 for amendments, affidavits or other evidence filed after the date of filing the appeal.

(c) If a respondent brief is filed which does not comply with all the requirements of paragraph (a) and paragraph (b) of this section, respondent will be notified of the reasons for non-compliance and given a non-extendable time period within which to file an amended brief. If respondent does not file an amended respondent brief within the set time period, or files an amended respondent brief which does not overcome all the reasons for non-compliance stated in the notification, the respondent brief and any amended respondent brief by that respondent will not be considered.

After an appellant brief has been properly filed, a party opposing the appellant may file a respondent brief in support of the claim determination(s) made in the Right of Appeal Notice (RAN) which are in favor of the opposing party. The respondent brief must, however, be limited to issues raised in the appellant brief to which the respondent brief is directed. 37 CFR 41.68(a)(3).

The respondent brief must be accompanied by the requisite fee set forth in 37 CFR 41.20(b)(2), and it must be filed within one month from the date of service of the appellant brief on the opposing party.

Pursuant to 37 CFR 41.66(b), the time for filing a respondent brief may not be extended. If a respondent brief is filed which does not comply with all the requirements of 37 CFR 41.68(a) and (b), respondent will be notified and given a nonextendable period of one month within which to file an amended brief to correct the defect(s). See 37 CFR 41.68(c). Failure to timely file a respondent brief and fee (or failure to timely complete the respondent brief, where it is noted by the examiner as being incomplete under 37 CFR 41.68(c)) will result in the respondent brief not being considered. Note that if the respondent brief is late, or if an amended respondent brief is not submitted after a requirement to correct the defect(s) (following a timely respondent brief), the respondent brief will be placed in the file; however, it will be marked as "not entered" since it is not formally received into the record, and it will not be considered. The same is true for an amended respondent brief which is late.

It should be noted that where a party fails to file a timely notice of appeal or notice of cross appeal, that party may no longer file ***an appellant brief*** to appeal a claim determination adverse to that party; **however**, that party is permitted to file a ***respondent brief*** in accordance with 37 CFR 41.66(b).

A fee as set forth in 37 CFR 41.20(b)(2) is required when the respondent brief is filed for the first time in a particular reexamination proceeding, 35 U.S.C. 41(a). The respondent brief should indicate the number of the **>Central Reexamination Unit (CRU)< Art Unit to which the reexamination is assigned and the reexamination control number. A statement of what in the appellant brief is accepted and what is disputed must be provided in the respondent brief. Respondent must set forth the authorities and arguments upon which he/she will rely to dispute the contentions of the appellant with respect to the issues.

The provisions of 37 CFR 41.68(a) and (b) should be carefully reviewed to ensure that a complete respondent brief is provided. Where the respondent brief is not complete as to the provisions of 37 CFR 41.68(a) and (b), respondent will be notified (in accordance with 37 CFR 41.68(c)) by the examiner that respondent is given a non-extendable period of one month to correct the defect(s) by filing an amended respondent brief. Where this procedure has not been followed, the Board of Patent Appeals and Interferences should remand the reexamination file to the examiner for appropriate action.

2675.02 Informalities in One or More of the Briefs [R-3]

**>

37 CFR 41.67. Appellant's brief.

*****

(d) If a brief is filed which does not comply with all the requirements of paragraph (a) and paragraph (c) of this section, appellant will be notified of the reasons for non-compliance and given a non-extendable time period within which to file an amended brief. If appellant does not file an amended brief within the set time period, or files an amended brief which does not overcome all the reasons for non-compliance stated in the notification, that appellant's appeal will stand dismissed.

*****

37 CFR 41.68. Respondent's brief.

*****

(c) If a respondent brief is filed which does not comply with all the requirements of paragraph (a) and paragraph (b) of this section, respondent will be notified of the reasons for non-compliance and given a non-extendable time period within which to file

an amended brief. If respondent does not file an amended respondent brief within the set time period, or files an amended respondent brief which does not overcome all the reasons for non-compliance stated in the notification, the respondent brief and any amended respondent brief by that respondent will not be considered.

<

Where an appellant or respondent brief does not comply with all the requirements of 37 CFR *>41.67(a)< and (c) or 37 CFR *>41.68(a)< and (b), respectively, such as missing fee or missing portion of the fee, a missing signature, inappropriate signature, less than three copies of the brief, no proof of service on a party; the appropriate party should be notified of the reasons for non-compliance and provided with a nonextendable period of one month within which to file an amended brief. The reasons for non-compliance and/or the defect(s) will be pointed out to the appropriate party in *one comprehensive action* (notification). Form PTOL-2067 will be used as the cover sheet for the notification action. A separate PTOL-2067 with notification action will be sent to each party, where the brief(s) of more than one party are non-compliant and/or defective. Where the same party's appellant and respondent briefs are both informal, the examiner may combine the notifications for both into one notification action with PTOL-2067.

If an appellant does not file an *amended* appellant brief during the one-month period, or files an amended brief which does not overcome all the reasons for non-compliance or does not correct all defects stated in the notification, the appeal will stand dismissed **as to that party**.

If a respondent does not file an amended respondent brief during the one-month period, or files an amended brief which does not overcome all the reasons for non-compliance or does not correct all defects stated in the notification, the respondent brief will not be formally received into the record and will not be considered (though it will be placed in the file **).

Where a party does timely file an amended brief and overcomes all the reasons for non-compliance and corrects all defects stated in the notification, the amended brief will be entered and will be considered along with the original appellant or respondent brief, when the case is taken up by the examiner.

The following form paragraphs should be used in drafting the notification:
**>

¶ *26.09 Brief is Defective and/or is Not Complete*

The **[1]** brief filed **[2]** by **[3]** is defective and/or is not complete as to the provisions of 37 CFR 41.67(a) and (c) (for appellant brief) or 37 CFR 41.68(a) and (b) (for respondent brief) for the following reasons:

Examiner Note:

1. In bracket 1, fill in either "appellant" or "respondent".
2. In bracket 2, fill in the date the brief was filed.
3. In bracket 3, fill in either "the patent owner" or "the third party requester".
4. This form paragraph should be followed by a statement of all instances of non-compliance and all defects, and an explanation detailed enough for the party to understand how to deal with each non-compliance and defect noted in the letter.
5. One of form paragraphs 26.10 or 26.11 should be used at the end of this action.

¶ *26.10 Informal Appellant Brief-Period for Response Under 37 CFR 41.67(d)*

Appellant, **[1]** is required to comply with the provisions of 37 CFR 41.67(a) and (c) and to correct all defects noted in this letter as to the appellant brief. Appellant, **[2]** is given a period of ONE MONTH from the date of this letter or the time remaining in the original two month period (whichever is the longer) for filing an amended complete appellant brief. If an amended complete brief that fully complies with the requirements of this letter is not timely submitted, the appellant's appeal will be dismissed as of the date of expiration of the presently set time period. THE PERIOD FOR RESPONSE SET IN THIS LETTER CANNOT BE EXTENDED. 37 CFR 41.67(d).

Examiner Note:

In brackets 1 and 2, fill in either "the patent owner" or "the third party requester".

¶ *26.11 Informal Respondent Brief-Period for Response Under 37 CFR 41.68(c)*

Respondent, **[1]** is required to comply with the provisions of 37 CFR 41.68(a) and (b) and to correct all defects noted in this letter as to the respondent brief. Respondent **[2]** is given a period of ONE MONTH from the date of this letter for filing an amended complete respondent brief. If an amended complete brief that fully complies with the requirements of this letter is not timely submitted, the respondent brief will not be formally received into the record and will not be considered. THE PERIOD FOR RESPONSE SET IN THIS LETTER CANNOT BE EXTENDED. 37 CFR 41.68(c).

Examiner Note:

1. In brackets 1 and 2, fill in either "the patent owner" or "the third party requester".
2. In the case of the respondent brief, the new one month period will always extend longer than the original one month period, thus

the longer of the two need not be given, as was done in form paragraph 26.10 where the original period for the appellant brief is two months.

<

2676 Appeal Conference [R-7]

All appellant and respondent briefs will be processed in the Central Reexamination Unit (CRU). The CRU will forward the reexamination file to the examiner after all appellant and respondent briefs have been filed or after the time for filing them has expired.

As long as one timely appellant brief has been filed, the case must be considered for appeal by the examiner. The examiner will consult with the Reexamination Legal Advisor (RLA) as to the procedural considerations and should then formulate an initial opinion as to whether an examiner's answer should be prepared, or prosecution should be reopened and a non-final Office action issued.

If the examiner reaches the conclusion that the appeal should **go forward** and an examiner's answer should be prepared, the examiner will arrange (via the **>CRU Supervisory Patent Examiner (SPE) or Technology Center (TC) Quality Assurance Specialist (QAS)<) for an appeal conference to be conducted pursuant to the procedures set forth in MPEP § 1208. The *>CRU SPE/TC QAS< will notify the RLA of the appeal conference, which the RLA will attend to ensure that all issues are properly addressed in the examiner's answer. In preparing for the appeal conference, the examiner should review the case so that he/she will be prepared to discuss the issues raised in all the briefs. The examiner should be prepared to propose to the conferees how he/she will address each issue raised in the appellant and respondent briefs. The appeal conference will be held in accordance with the procedures as set forth in MPEP § 1208 **. The examiner will have two weeks following the appeal conference to prepare the examiner's answer.

If the examiner reaches the conclusion that the appeal should **not go forward**, no appeal conference is held. Prosecution is reopened, and the examiner issues of a new non-final Office action. The examiner should, at this point, consult with the RLA to discuss at what point in the prosecution the prosecution should be reopened, and then the examiner will prepare an appropriate Office action.

See MPEP § 2638 for the appropriate code to use for reporting time spent with respect to the appeal conference.

2677 Examiner's Answer [R-7]

37 CFR 41.69. Examiner's answer.

(a) The primary examiner may, within such time as directed by the Director, furnish a written answer to the owner's and/or requester's appellant brief or respondent brief including, as may be necessary, such explanation of the invention claimed and of the references relied upon, the grounds of rejection, and the reasons for patentability, including grounds for not adopting any proposed rejection. A copy of the answer shall be supplied to the owner and all requesters. If the primary examiner determines that the appeal does not comply with the provisions of §§ 41.61, 41.66, 41.67 and 41.68 or does not relate to an appealable action, the primary examiner shall make such determination of record.

(b) An examiner's answer may not include a new ground of rejection.

(c) An examiner's answer may not include a new determination not to make a proposed rejection of a claim.

(d) Any new ground of rejection, or any new determination not to make a proposed rejection, must be made in an Office action reopening prosecution.

Where the term "brief" is used in this section, it shall refer to any appellant briefs and/or respondent briefs in the reexamination proceeding, unless specific identification of an "appellant brief" or a "respondent brief" is made.

Before preparing an examiner's answer, the examiner should make certain that all amendments approved for entry have in fact been physically entered by the Central Reexamination Unit (CRU). The clerk of the Board will return to the CRU any reexamination proceeding in which approved amendments have not been entered.

The examiner should furnish each party to the reexamination (even a party that has not filed an appellant nor respondent brief) with a comprehensive examiner's answer that provides a written statement in answer to each appellant brief and each respondent brief. The examiner's answer is to be completed by the examiner within two weeks after the appeal conference. After the answer is completed (and signed), the examiner obtains the initials of the appeal conference participants (the conferees) and then forwards the reexamination file with the answer to the **>CRU Supervisory Patent Examiner (SPE) or Technology Center (TC) Quality Assurance Specialist (QAS)<. The *>CRU SPE/TC QAS< reviews the answer, and

if the answer is in order, forwards the reexamination file with the answer to the CRU support staff.

The examiner's answer may incorporate from any of the briefs the most accurate and most comprehensive information. It should contain a response to the allegations or arguments made in all of the briefs and should call attention to any errors in an appellant's copy of the claims. If a ground of rejection or reason for patentability is not addressed in the examiner's answer, the proceeding will be remanded by the Board of Appeals and Patent Interferences (Board) to the examiner.

The examiner should report his/her conclusions on any affidavits, declarations, or exhibits that were admitted to the record. Any affidavits or declarations in the file swearing behind a patent should be clearly identified by the examiner as being considered under either 37 CFR 1.131 or 37 CFR 41.154(a). The distinction is important since the Board will usually consider holdings on 37 CFR 1.131 affidavits or declarations but not holdings on 37 CFR 41.154(a) affidavits or declarations in appeal cases.

If the appellant brief fails to respond (in the patent owner's brief) to any or all grounds of rejection or (in the third party requester's brief) to any or all determinations of patentability made by the examiner, or otherwise fails to comply with 37 CFR 41.67(c), the procedure for handling such briefs set forth in MPEP § 2675.02 should be followed. If the respondent brief fails to give reasons for disputing any or all contentions of an appellant that are disputed in the respondent brief, or otherwise fails to comply with 37 CFR 41.68(b), the procedure for handling such briefs is also set forth in MPEP § 2675.02.

It sometimes happens that an examiner will state a position (e.g., reasoning) in the answer in a manner that represents a shift from the position stated in the Right of Appeal Notice (RAN). In such a case, the answer must indicate that the last stated position supersedes the former. Failure to do this confuses the issue since it is not clear exactly what the examiner's ultimate position is.

If there is a complete and thorough development of the issues at the time of the RAN, it is possible to save time in preparing the examiner's answer. Examiners may incorporate in the answer their statement of the grounds of rejection or determinations of patentability merely by reference to the RAN. An examiner's answer should not refer, either directly or indirectly, to more than one prior Office action. Thus, if a statement of the ground of rejection or a determination of patentability set forth in the RAN refers back to a prior action it cannot be incorporated by reference. The page(s) and paragraph(s) of the RAN which it is desired to incorporate by reference should be explicitly identified. If the examiner feels that further explanation is necessary, he/she should include it in the answer. The examiner's answer should also include rebuttal of any and all arguments presented in all of the briefs.

All correspondence with the Board, whether by the examiner or an appellant or respondent, must be on the record. No unpublished decisions which are unavailable to the general public by reason of 35 U.S.C. 122 can be cited by the examiner or the parties.

The examiner should reevaluate his/her position in the light of the arguments presented in the briefs, and should expressly withdraw any rejections or determinations of patentability not adhered to. Such a withdrawal would be a new finding of patentability (determination not to make a rejection) or new ground of rejection, respectively. Pursuant to 37 CFR 41.69(b), an examiner's answer "may not include a new ground of rejection." Pursuant to 37 CFR 41.69(c), an examiner's answer "may not include a new determination not to make a proposed rejection of a claim." Accordingly, prosecution must be reopened for any withdrawal of a rejection or of a determination of patentability. Before issuing the action reopening prosecution, the examiner will consult with the Reexamination Legal Advisor (RLA) to discuss at what point in the prosecution the prosecution should be reopened, and then the examiner will prepare an appropriate Office action. Note that the examiner may withdraw the Action Closing Prosecution (ACP) and reopen prosecution at any time prior to the mailing of the examiner's answer.

If the examiner requests to be present at the oral hearing, the request must be set forth in a separate letter as noted in MPEP § 1209.

MPEP § 1207 - § 1207.05 relate to preparation of examiner's answers on appeal in patent applications and *ex parte* reexamination proceedings.

All examiner's answers in *inter partes* reexamination proceedings must comply with the guidelines set forth below.

I. REQUIREMENTS FOR EXAMINER'S ANSWER

The examiner may incorporate from any of the briefs information required for the examiner's answer, as needed to provide accurate and comprehensive information. The examiner's answer must include, in the order indicated, the following items. Again, the term "brief" or "briefs" shall refer to any appellant briefs and/or respondent briefs in the reexamination proceeding, unless specific identification of an "appellant brief" or a "respondent brief" is made.

(A) *Real Party in Interest.* For each appellant and respondent brief, a statement by the examiner acknowledging the identification by name of the real party in interest.

(B) *Related Appeals and Interferences*. A statement identifying by application, patent, appeal or interference number all other prior and pending appeals, interferences or judicial proceedings known to the examiner which may be related to, directly affect or be directly affected by or have a bearing on the Board's decision in the pending appeal. Copies of any decisions rendered by a court or the Board in any proceeding identified under this paragraph should be included in the *"Related Proceedings Appendix"* section.

(C) *Status of Claims*. A statement of whether the examiner agrees or disagrees with the statement of the status of claims contained in the briefs. If the examiner disagrees with the statement of the status of claims contained in the briefs, the examiner must set forth a correct statement of the status of all the claims in the proceeding.

(D) *Status of Amendments*. A statement of whether the examiner agrees or disagrees with the statement of the status of amendments contained in any of the briefs, and an explanation of any disagreement with any of the briefs. If there are no amendments, the examiner shall so state.

(E) *Summary of Claimed Subject Matter*. A statement of whether the examiner agrees or disagrees with the summary of claimed subject matter contained in the briefs and an explanation of any disagreement.

(F)(1) *Grounds of Rejection to be Reviewed on Appeal*. A statement of whether the examiner agrees or disagrees with the statement of the grounds of rejection to be reviewed set forth in the briefs and an explanation of any disagreement. In addition, the examiner must include the following subheadings (*>and state "None" where< appropriate):

(a) "Grounds of Rejection Not On Review" - a listing of all grounds of rejection that have not been withdrawn and have not been presented by an appellant for review in the brief; and

(b) "Non-Appealable Issues" - a listing of any non-appealable issues in the briefs.

(2) *Findings of Patentability to be Reviewed on Appeal*. A statement of whether the examiner agrees or disagrees with the statement of the findings of patentability to be reviewed set forth in the briefs and an explanation of any disagreement. In addition, the examiner must include the following subheadings (*>and state "None" where< appropriate):

(a) "Findings of Patentability Not On Review" - a listing of all **>findings of patentability< that ** have not been presented by an appellant for review in the brief; and

(b) "Non-Appealable Issues" - a listing of any non-appealable issues >raised by the requester< in the briefs.

(G) *Claims Appendix.* A statement of whether the copy of the appealed claims contained in the appendix to the appellant briefs is correct, and if any claim is not correct in any of the briefs, a copy of the correct claim.

(H) *Evidence Relied Upon*. A listing of the evidence relied on (e.g., patents, publications, Official Notice, admitted prior art), and, in the case of non-patent references, the relevant page or pages. Note that new references cannot be applied in an examiner's answer. 37 CFR 41.69(b). If new references are to be applied, prosecution must be reopened. Also note that both the art relied upon by the examiner in making rejections, and the art relied upon by the third party requester in the proposed rejections, will be listed by the examiner.

(I) *Grounds of Rejection.* For each ground of rejection maintained by the examiner applicable to the appealed claims, an explanation of the ground of rejection.

(1) For each rejection under 35 U.S.C. 112, first paragraph, the examiner's answer must explain how the first paragraph of 35 U.S.C. 112 is not complied with, including, as appropriate, how the specification and drawings, if any,

(a) do not describe the subject matter defined by each of the rejected claims, and

(b) would not enable any person skilled in the art to make and use the subject matter defined by each of the rejected claims without undue experimentation including a consideration of the undue experimentation factors set forth in MPEP § 2164.01(a).

(2) For each rejection under 35 U.S.C. 112, second paragraph, the examiner's answer must explain how the claims do not particularly point out and distinctly claim the subject matter which "applicant" regards as the invention.

(3) For each rejection under 35 U.S.C. 102, the examiner's answer must explain why the rejected claims are anticipated or not patentable under 35 U.S.C. 102, pointing out where all of the specific limitations recited in the rejected claims are found in the prior art relied upon in the rejection.

(4) For each rejection under 35 U.S.C. 103, the examiner's answer must:

(a) state the ground of rejection and point out where each of the specific limitations recited in the rejected claims is found in the prior art relied on in the rejection,

(b) identify the differences between the rejected claims and the prior art relied on (i.e., the primary reference), and

(c) explain why it would have been obvious at the time the invention was made to a person of ordinary skill in the art to have modified the primary reference to arrive at the claimed subject matter.

(5) For each rejection under 35 U.S.C. 102 or 103 where there are questions as to how limitations in the claims correspond to features in the art even after the examiner complies with the requirements of paragraphs (I)(3) and (4) above, the examiner must compare at least one of the rejected claims feature-by-feature with the art relied upon in the rejection. The comparison shall align the language of the claim side-by-side with a reference to the specific page or column, line number, drawing reference number, and quotation from the reference, as appropriate.

(6) For each rejection, other than those referred to in paragraphs (I)(1) to (I)(5), the examiner's answer must specifically explain the basis for the particular rejection.

(J) *Determinations of Patentability.* For each determination of patentability, **i.e., each determination of inapplicability of a proposed rejection to the appealed claims,** a clear explanation of the determination.

(1) For each determination of inapplicability of a proposed rejection of the appealed claims under 35 U.S.C. 112, first paragraph; the examiner's answer must explain how the first paragraph of 35 U.S.C. 112 is complied with, including, as appropriate, how the specification and drawings, if any, do *describe* the subject matter defined by each of the proposed-for-rejection claims, and/or would in fact enable a person skilled in the art to make and use the subject matter defined by each of the proposed-for-rejection claims without undue experimentation.

(2) For each determination of inapplicability of a proposed rejection of the appealed claims under 35 U.S.C. 112, second paragraph; the examiner's answer must explain how the claims do particularly point out and distinctly claim the subject matter which "applicant" regards as the invention.

(3) For each determination of inapplicability of a proposed rejection of the appealed claims under 35 U.S.C. 102; the examiner's answer must explain why the proposed-for-rejection claims are not anticipated and why they are patentable under 35 U.S.C. 102, pointing out which limitations recited in the patentable claims are not found in the art relied upon by the third party requester for the proposed rejection.

(4) For each determination of inapplicability of a proposed rejection of the appealed claims under 35 U.S.C. 103; the examiner's answer must point out which limitations recited in the proposed-for-rejection claims are not found in the art relied upon by the third party requester for the proposed rejection, shall identify the difference between the claims and the art relied upon by the third party requester and must explain why the claimed subject matter is patentable over the art relied on by the third party requester. If the third party requester's proposed rejection is based upon a combination of references, the examiner's answer must explain the rationale for not making the combination.

(5) For each rejection proposed under 35 U.S.C. 102 or 103 where there are questions as to how limitations in the claims define over features in the art even after the examiner complies with the requirements of paragraphs (J)(3) and (J)(4) above, the examiner must compare at least one of the proposed-for-rejection claims feature-by-feature with the art relied on in the proposed rejection. The comparison must align the language of the claim side-by-side with a reference to the specific page or column, line number, drawing reference number, and quotation from the reference, as appropriate.

(6) For each determination of inapplicability of a proposed rejection, other than those referred to in paragraphs (J)(1) to (J)(5), the examiner's answer must specifically explain why there is insufficient basis for making that particular proposed rejection.

(K) *No New Ground of Rejection or New Finding of Patentability.* The examiner's answer must provide an explicit statement that it does not contain any new ground of rejection, and it does not contain any new finding of patentability (i.e., no new determination of inapplicability of a proposed rejection). This statement will serve as a reminder to the examiner that if a new ground of rejection or new finding of patentability is made, prosecution must be reopened. It will also provide appropriate notification to parties that no new ground of rejection or new finding of patentability was made.

(L) *Response to Argument.* A statement of whether the examiner disagrees with each of the contentions of appellants and respondents in their briefs with respect to the issues presented, and an explanation of the reasons for disagreement with any such contentions. If any ground of rejection or inapplicability of proposed rejection is not argued and responded to by the appropriate party, the examiner must point out each claim affected.

(M) *Related Proceedings Appendix*. Copies of any decisions rendered by a court or the Board in any proceeding identified by the examiner in the Related Appeals and Interferences section of the answer.

(N) *Period for Providing a Rebuttal Brief.* The examiner will set forth the period for the appropriate appellant party, or appellant parties, to file a rebuttal brief after the examiner's answer, and that no further papers will be permitted subsequent to the rebuttal brief.

II. PROCESSING OF COMPLETED ANSWER

When the examiner's answer is complete, the examiner will sign it. On the examiner's answer, each conferee who was present at the appeal conference will place his/her initials below the signature of the examiner who prepared the answer. Thus: "John Smith (conferee)" should be typed, and "JS" should be initialed. (The initialing by the conferee does not necessarily indicate concurrence with the position taken in the examiner's answer.)

The clerical staff will make a copy of the examiner's answer for the patent owner and for the third party requester(s). The clerical staff should attach form PTOL-2070 to the copy of the answer to be mailed to the third party requester by the CRU.

The examiner must prepare the examiner's answer, ensure that the clerical processing is done, and forward the case to the *>CRU SPE/TC QAS< no later than two weeks from the date of the appeal conference (unless otherwise authorized by the CRU Director or a Reexamination Legal Advisor (RLA) of the Office of Patent Legal Administration (OPLA)). The examiner's answer is reviewed by the *>CRU SPE/TC QAS< and the case is forwarded to the RLA within three days of the *>CRU SPE's/TC QAS's< receipt of the case from the examiner.

If an examiner's answer is believed to contain a new interpretation or application of the existing patent law, the examiner's answer, the case file, and an explanatory memorandum should be forwarded to the CRU Director for consideration. See MPEP § 1003 which applies to the CRU Director as it does to TC Directors. If approved by the CRU Director, the examiner's answer should be forwarded by the *>CRU SPE/TC QAS< to the RLA for final approval, prior to mailing the examiner's answer.

III. FORM PARAGRAPHS

The following form paragraphs may be used to prepare an examiner's answer in an *inter partes* reexamination proceeding:

¶ *26.50 Heading for Examiner's Answer*

EXAMINER'S ANSWER

This is in response to the following appellant (and respondent) brief(s) on appeal: **[1]**

Examiner Note:

In bracket 1, identify for each brief (a) the party (patent owner or third party requester), (b) the type of brief (appellant or respondent), and (c) the date it was filed. Where there is one third party requester (the usual situation), indicate "third party requester"; where there are two or more third party requesters (a merged proceeding), indicate "third party requester" followed by the name of the third party requester (e.g., "third party requester Smith" or "third party requester XYZ Corporation").

¶ *26.50.01 Real Party in Interest*

(1) Real Party in Interest

Examiner Note:

Follow this paragraph with one or more of form paragraphs 26.50.02 and/or 26.50.03.

¶ *26.50.02 Acknowledgment of Identification of a Real Party in Interest in a Brief*

A statement identifying the real party in interest is contained in **[1]** brief(s).

Examiner Note:

In bracket 1, identify the brief or briefs containing a statement identifying the real party in interest. For example, "the appellant third party requester Jones" or "the appellant patent owner and the respondent third party requester Smith" or "all of the" can be used where appropriate.

¶ *26.50.03 No Identification of a Real Party in Interest in the Briefs*

In the present appeal, **[1]** brief(s) does/do not contain a statement identifying the real party in interest. It is presumed that the party named in the caption of the brief(s) is the real party in interest at the time the brief was filed. The Board of Patent Appeals and Interferences, however, may subsequently exercise its discretion to require an explicit statement as to the real party in interest.

Examiner Note:

In bracket 1, identify the brief or briefs not containing a statement identifying the real party in interest. For example, "the appellant third party requester Jones" or "the appellant patent owner and the respondent third party requester Smith" or "all of the" can be used where appropriate.

¶ *26.50.04 Related Appeals and Interferences*

(2) Related appeals and interferences

Examiner Note:

Follow this paragraph with form paragraph 26.50.05 or 26.50.06.

¶ *26.50.05 Identification of the Related Appeals and Interferences*

The following are the related appeals, interferences, and judicial proceedings known to the examiner which may be related to, directly affect or be directly affected by or have a bearing on the Board's decision in the pending appeal:

Examiner Note:

1. Follow this form paragraph with an identification by application, patent, appeal or interference number of all other prior and pending appeals, interferences or judicial proceedings known to the examiner which may be related to, directly affect or be directly affected by or have a bearing on the Board's decision in the pending appeal.
2. Include a copy of all court and Board decisions identified in this section in a related proceeding(s) appendix using form paragraphs 26.61.01 and 26.61.03.

¶ *26.50.06 No Related Appeals and Interferences Identified*

The examiner is not aware of any related appeals, interferences, or judicial proceedings which will directly affect or be directly affected by or have a bearing on the Board's decision in the pending appeal.

¶ *26.51 Status of Claims*

(3) Status of claims

Examiner Note:

Follow form paragraph 26.51 with one or more of form paragraphs 26.51.01 and/or 26.51.02.

¶ *26.51.01 Agreement With Statement of Status of Claims*

The statement of the status of claims contained in the **[1]** brief(s) is correct.

Examiner Note:

1. In bracket 1, identify the brief or briefs containing the correct status of the claims. For example, "appellant third party requester Jones" or "appellant patent owner and respondent third party requester Smith" can be used where appropriate.
2. Use form paragraph 26.51.02 where there is a disagreement with the statement of status of the claims stated in the brief(s).

¶ *26.51.02 Disagreement With Statement of Status of Claims Stated in Briefs*

The statement of the status of claims contained in the **[1]** briefs is incorrect. **[2]**.

A correct statement of the status of the claims is as follows: **[3]**

Examiner Note:

1. In bracket 1, identify the brief or briefs containing the incorrect statement of the status of the claims. For example, "appellant third party requester Jones" or "appellant patent owner and respondent third party requester Smith" can be used where appropriate.
2. In bracket 2, identify the area of disagreement with each brief and the reasons for the disagreement.
3. For bracket 3, see form paragraphs 12.151.03 - 12.151.10 for the type of material that should be included. Remember that a "final rejection" is not made in a reexamination. Thus, use "Action Closing Prosecution" and "Right of Appeal Notice" where each is appropriate.

¶ *26.52 Status of Amendments*

(4) Status of Amendments After Action Closing Prosecution

Examiner Note:

Identify status of all amendments submitted after Action Closing Prosecution. Use one or more of form paragraphs 26.52.01 - 26.52.05, if appropriate.

¶ *26.52.01 Agreement With Statement of the Status of Amendments After Action Closing Prosecution*

The statement of the status of amendments after Action Closing Prosecution contained in the **[1**] brief(s) is correct.

Examiner Note:

1. In bracket 1, identify the brief or briefs containing the correct statement of the status of amendments after Action Closing Prosecution. For example, "appellant third party requester Jones" or "appellant patent owner and respondent third party requester Smith" can be used where appropriate.
2. Use form paragraph 26.52.02 where there is a disagreement with the statement of the status of the amendments after ACP stated in the brief(s).

¶ *26.52.02 Disagreement With Statement of the Status of Amendments After Action Closing Prosecution Stated in Briefs*

The statement of the status of amendments after Action Closing Prosecution contained in the **[1]** brief(s) is incorrect. **[2]**

Examiner Note:

1. In bracket 1, identify the brief or briefs containing the incorrect statement of the status of amendments after Action Closing Prosecution. For example, "appellant third party requester Jones" or "appellant patent owner and respondent third party requester Smith" can be used where appropriate.
2. In bracket 2, identify the area of disagreement with each brief and the reasons for the disagreement.

¶ *26.52.03 Amendment After Action Closing Prosecution Entered*

The amendment after Action Closing Prosecution filed on **[1]** has been entered.

Examiner Note:

In bracket 1, insert the date of any entered amendment.

¶ *26.52.04 Amendment After Action Closing Prosecution Not Entered*

The amendment after Action Closing Prosecution filed on **[1]** has not been entered.

Examiner Note:

In bracket 1, insert the date of any amendment denied entry.

¶ *26.52.05 No Amendment After Action Closing Prosecution*

No amendment after Action Closing Prosecution has been filed.

¶ *26.53 Summary of Claimed Subject Matter*

(5) Summary of Claimed Subject Matter

Examiner Note:

Follow form paragraph 26.53 with either form paragraphs 26.53.01 or 26.53.02.

¶ *26.53.01 Agreement With the Summary of Claimed Subject Matter in Brief(s)*

The summary of claimed subject matter contained in the **[1]** brief(s) is correct.

Examiner Note:

1. In bracket 1, identify the brief or briefs containing the incorrect summary of claimed subject matter. For example, "appellant third party requester Jones" or "appellant patent owner and respondent third party requester Smith" can be used where appropriate.
2. Use form paragraph 26.53.02 where there is disagreement as to the summary.

¶ *26.53.02 Disagreement With the Summary of Claimed Subject Matter in Brief(s)*

The summary of claimed subject matter contained in the **[1]** brief(s) is deficient because **[2]**.

Examiner Note:

1. In bracket 1, identify the brief or briefs containing the incorrect summary of invention. For example, "appellant third party requester Jones" or "appellant patent owner and respondent third party requester Smith" can be used where appropriate.
2. In bracket 2, explain the deficiency of the summary of claimed subject matter. Include a correct summary of the invention if necessary for a clear understanding of the claimed invention.

¶ *26.54 Grounds of Rejection to be Reviewed on Appeal*

(6) Grounds of Rejection to be Reviewed on Appeal

Examiner Note:

Follow form paragraph 26.54 with form paragraph 26.54.01 or 26.54.02.

¶ *26.54.01 Agreement With Statement of the Grounds of Rejection on Appeal*

The statement of the grounds of rejection contained in the **[1]** brief(s) is correct.

Examiner Note:

1. In bracket 1, identify the brief or briefs containing the correct statement of the grounds of rejection on appeal. For example, "appellant third party requester Jones" or "appellant patent owner and respondent third party requester Smith" can be used where appropriate.
2. Follow this form paragraph with form paragraph 26.54.011 if there are grounds of rejection that have not been withdrawn and that have not been presented by an appellant for review.

3. Follow this form paragraph with form paragraph 26.54.012 to list any non-appealable issues in the brief(s).
4. Use form paragraph 26.54.02 where there is disagreement as to the statement of the grounds of rejection on appeal.

¶ *26.54.011 Grounds of Rejection Not on Review*

GROUNDS OF REJECTION NOT ON REVIEW

The following grounds of rejection have not been withdrawn by the examiner, and they have not been presented by an appellant for review. **[1]**.

Examiner Note:

In bracket 1, identify each ground of rejection that has not been withdrawn and has not been presented by an appellant for review.

¶ *26.54.012 Nonappealable Issue in Brief*

NON-APPEALABLE ISSUE(S)

The **[1]** brief presents arguments relating to **[2]**. This issue relates to petitionable subject matter under 37 CFR 1.181 and not to appealable subject matter. See MPEP § 1002 and § 1201.

Examiner Note:

1. In bracket 1, identify the brief containing the petitionable issues. For example, "appellant third party requester Jones" or "appellant patent owner" can be used where appropriate.
2. When more than one brief has a petitionable issue, this form paragraph should be used for each of these briefs.

¶ *26.54.02 Disagreement With Statement of the Grounds of Rejection on Appeal*

The **[1]** brief(s) does/do not provide a correct statement of the grounds of rejection to be reviewed on appeal. **[2]** The grounds of rejection to be reviewed on appeal are as follows: **[3]**.

Examiner Note:

1. In bracket 1, identify the brief or briefs containing the incorrect statement of the grounds of rejection on appeal.
2. In bracket 2, indicate the area of disagreement and the reasons for the disagreement.
3. In bracket 3 set forth the correct statement of the grounds of rejection on appeal.

¶ *26.55 Findings of Patentability to be Reviewed on Appeal*

(7) Findings of Patentability to be Reviewed on Appeal

Examiner Note:

Follow form paragraph 26.55 with form paragraph 26.55.01 or 26.55.02.

¶ *26.55.01 Agreement With Statement of the Findings of Patentability on Appeal*

The statement of the findings of patentability contained in the **[1]** brief(s) is correct.

Examiner Note:

1. In bracket 1, identify the brief or briefs containing the correct statement of the findings of patentability on appeal. For example "appellant third party requester Jones" or "appellant patent owner and respondent third party requester Smith" can be used where appropriate.
2. Follow this form paragraph with form paragraph 26.55.011 if there are findings of patentability that have not been withdrawn and that have not been presented by an appellant for review.
3. Form paragraph 26.54.012 may be used to list any non-appealable issues in the brief(s).
4. Use form paragraph 26.55.02 where there is disagreement as to the statement of the findings of patentability on appeal.

¶ *26.55.011 Findings of Patentability Not on Review*

FINDINGS OF PATENTABILITY NOT ON REVIEW

The following grounds of rejection have not been withdrawn by the examiner, and they have not been presented by an appellant for review. **[1]**.

Examiner Note:

1. In bracket 1, identify each ground of rejection that has not been withdrawn and has not been presented by an appellant for review.

¶ *26.55.02 Disagreement With Statement of the Findings of Patentability on Appeal*

The **[1]** brief(s) does/do not provide a correct statement of the findings of patentability to be reviewed on appeal. **[2]** The findings of patentability to be reviewed on appeal are as follows: **[3]**.

Examiner Note:

1. In bracket 1, identify the brief or briefs containing the incorrect statement of the findings patentability on appeal.
2. In bracket 2, indicate the area of disagreement and reasons for the disagreement.
3. In bracket 3, set forth the correct statement of the patentability to be reviewed on appeal.

¶ *26.56 Claims Appendix*

(8) Claims Appendix

Examiner Note:

Follow form paragraph 26.56 with form paragraphs 26.56.01, 26.56.02, and/or 26.56.03, as is appropriate.

¶ *26.56.01 Copy of the Appealed Claims in the Appendix of Appellant Brief is Correct*

The copy of the appealed claims **[1]** is contained in the Appendix to the appellant brief of **[2]** is correct.

Examiner Note:

1. In bracket 1, identify the claims appealed found in the appellant brief.
2. In bracket 2, identify the appellant brief containing the claims appealed. For example,"third party requester," "third party requester Smith" or "patent owner" can be used where appropriate.
3. This paragraph is for appellant briefs; not for respondent briefs.
4. Where there is more than one appellant brief, the patent examiner may choose any appellant brief that has a correct copy of claims appealed. The examiner may use this form paragraph

more than once, as needed to set forth each claim or group of claims appealed by the appellants. Where a claim is correct in one appellant brief but is incorrect in another appellant brief, the examiner will draw a diagonal line in pencil through the incorrect claim in the Appendix of the incorrect appellant brief, and place the date, the word "Incorrect," and the examiner's initials in the margin.

¶ *26.56.02 Copy of the Appealed Claims in the Appendix of Appellant Brief is Substantially Correct*

A substantially correct copy of the appealed claim(s) is contained in the Appendix of the appellant brief of **[1]**. Claim(s) **[2]** appear on pages **[3]** of the appendix contain minor errors. The minor errors are as follows: **[4]**

Examiner Note:

1. Use this paragraph where all appellant briefs contain errors in the claim(s) but at least one appellant brief is substantially correct and contains only minor errors.
2. In bracket 1, identify the appellant brief containing the substantially correct copy of the appealed claims. For example, "third party requester Smith" or "patent owner" can be used where appropriate.
3. In bracket 2, indicate the claim or claims with the minor errors.
4. In bracket 3, identify the page(s) in the Appendix where the substantially correct appealed claims appear.
5. In bracket 4, indicate the nature of the errors.
6. This paragraph is for appellant briefs; not for respondent briefs.
7. Where there is more than one appellant brief having the same claim recited incorrectly but at least one appellant brief is substantially correct and contains only minor errors, the examiner can apply the present form paragraph to the brief that has only minor errors in the appealed claim. If the application is still a paper file, the examiner should draw a diagonal line in pencil through the incorrect claim in any other (incorrect) appellant brief, and place the date, the word "Incorrect," and the examiner's initials in the margin.

¶ *26.56.03 Copy of the Appealed Claims in the Appendix Contains Substantial Errors*

Claim(s) **[1]** contain(s) substantial errors as presented in the Appendix to all the appellant briefs. Accordingly, claim(s) **[2]** is/are correctly written in the Appendix to the examiner's answer.

Examiner Note:

1. This form paragraph is used where all appellants fail to include a correct copy of an appealed claim or claims in the Appendix to the brief.
2. Attach a correct copy of the claims incorrect in all the appellant briefs as an Appendix to the examiner's answer; and if the application is still a paper file, draw a diagonal line in pencil through the incorrect claim in the Appendix of each appellant's appeal brief, and place the date, the word "Incorrect," and the examiner's initials in the margin.
3. In brackets 1 and 2, identify the claims that contain substantial errors.
4. Rather than using this form paragraph, if the errors in the claim(s) are significant, appellant(s) should be required to submit a corrected brief (amended brief). Where the brief includes arguments based upon the incorrect version of the claims (i.e., argument directed toward the errors in the claims), a corrected brief should always be required.

¶ *26.57 Evidence Relied Upon - Heading*

(9) Evidence Relied Upon

Examiner Note:

Follow form paragraph 26.57 with one or more of form paragraphs 26.57.01 - 26.57.03.

¶ *26.57.01 No Evidence Relied Upon in the Examiner's Answer*

No evidence is relied upon by the examiner in this appeal.

¶ *26.57.02 Listing of the Evidence Relied Upon by Examiner*

The following is a listing of the evidence (e.g., patents, publications, official notice, and admitted prior art) relied upon by the examiner in the rejection of claims under appeal.

Examiner Note:

1. Use the following format for providing information on each reference cited:

Number Name Date

2. The following are example formats for listing reference citations:

2,717,847 VARIAN 9-1955
1,345,890 MUTHER (Fed. Rep. of Germany) 7-1963
(Figure 2 labeled as Prior Art in this document)

3. See MPEP § 707.05(e) for additional examples.

¶ *26.57.03 Listing of the Art of Record Relied Upon by Requester*

The following is a listing of the evidence relied upon by the third party requester(s) in the proposed rejection of claims which were not made by the examiner, and are now under appeal.

Examiner Note:

1. Use the following format for providing information on each reference cited:

Number Name Date

2. The following are example formats for listing reference citations:

2,717,847 VARIAN 9-1955
1,345,890 MUTHER (Fed. Rep. of Germany) 7-1963
(Figure 2 labeled as Prior Art in this document)

3. See MPEP § 707.05(e) for additional examples.

¶ *26.59 Grounds of Rejection*

(10) Grounds of rejection

The following ground(s) of rejection are applicable to the appealed claims. **[1]**.

Examiner Note:

In bracket 1, explain each ground of rejection clearly and completely as set forth in the appropriate paragraphs i-vi below:

(i) For each rejection under 35 U.S.C. 112, first paragraph, the examiner's answer shall explain why the first paragraph of 35 U.S.C. 112 is not complied with, including, as appropriate, how the specification and drawings, if any, (a) do not describe the subject matter defined by each of the rejected claims, and/or (b) would not enable a person skilled in the art to make and use the subject matter defined by each of the rejected claims without undue experimentation including a consideration of the undue experimentation factors set forth in MPEP § 2164.01(a).

(ii) For each rejection under 35 U.S.C. 112, second paragraph, the examiner's answer shall explain why the claims do not particularly point out and distinctly claim the subject matter which "applicant" regards as the invention.

(iii) For each rejection under 35 U.S.C. 102, the examiner's answer shall explain why the rejected claims are anticipated or not patentable under 35 U.S.C. 102, pointing out where all of the specific limitations recited in the rejected claims are found in the art relied upon in the rejection.

(iv) For each rejection under 35 U.S.C. 103, the examiner's answer shall state the ground of rejection and point out where each of the specific limitations recited in the rejected claims is found in the prior art relied on in the rejection, shall identify any difference between the rejected claims and the prior art relied on (i.e., the primary reference) and shall explain why it would have been obvious at the time the invention was made to a person of ordinary skill in the art to have modified the primary reference to arrive at the claimed subject matter.

(v) For each rejection under 35 U.S.C. 102 or 103 where there may be questions as to how limitations in the claims correspond to features in the prior art, the examiner, in addition to the requirements of (iii) and (iv) above, shall compare at least one of the rejected claims feature-by-feature with the prior art relied upon in the rejection. The comparison shall align the language of the claim side-by-side with a reference to the specific page or column, line number, drawing reference number and quotation from the reference, as appropriate.

(vi) For each rejection, other than those referred to in paragraphs (i) to (v) of this section, the examiner's answer shall specifically explain the basis for the particular rejection.

¶ *26.59.01 Findings of Patentability*

(11) Findings of Patentability

The following findings of patentability, i.e., determinations of inapplicability of a proposed rejection, are applicable to the appealed claims.

[1]

Examiner Note:

In bracket 1, explain each determination of inapplicability of a proposed rejection, or refer to the RAN if it clearly and completely sets forth the determination of inapplicability of a proposed rejection and complies with appropriate paragraphs i-vi below:

(i) For each determination of inapplicability of a proposed rejection of the appealed claims under 35 U.S.C. 112, first paragraph; the examiner's answer shall explain how the first paragraph of 35 U.S.C. 112 is complied with, including, as appropriate, how the specification and drawings, if any, (a) do describe the subject matter defined by each of the claims proposed for rejection, and/or (b) would in fact enable any person skilled in the art to make and use the subject matter defined by each of the claims proposed for rejection without undue experimentation.

(ii) For each determination of inapplicability of a proposed rejection of the appealed claims under 35 U.S.C. 112, second paragraph; the examiner's answer shall explain how the claims do particularly point out and distinctly claim the subject matter which "applicant" regards as the invention.

(iii) For each determination of inapplicability of a proposed rejection of the appealed claims under 35 U.S.C. 102; the examiner's answer shall explain why the claims proposed for rejection are not anticipated and patentable under 35 U.S.C. 102, pointing out which limitations recited in the claims proposed for rejection are not found in the prior art relied upon in the proposed rejection.

(iv) For each determination of inapplicability of a proposed rejection of the appealed claims under 35 U.S.C. 103; the examiner's answer shall point out which limitations recited in the patentable claims are not found in the prior art relied upon in the proposed rejection, shall identify the difference between the patentable claims and the prior art relied upon by the third party requester and shall explain why the claimed subject matter is patentable over the prior art relied on by the third party requester. If the third party requester's proposed rejection is based upon a combination of references, the examiner's answer shall explain the rationale for not making the combination.

(v) For each third party requester proposed rejection under 35 U.S.C. 102 or 103 where there are questions as to how limitations in the claims define over features in the prior art even after the examiner complies with the requirements of (iii) and (iv) above, the examiner shall compare at least one of the claims proposed for rejection feature-by-feature with the prior art relied on in the proposed rejection. The comparison shall align the language of the claim side-by-side with a reference to the specific page or column, line number, drawing reference number, and quotation from the reference, as appropriate.

(vi) For each determination of inapplicability of a proposed rejection, other than those referred to in paragraphs (i) to (v) of this section, the examiner's answer shall specifically explain why there is insufficient basis for making the particular proposed rejection.

¶ *26.60 No New Ground of Rejection; No New Finding of Patentability*

(12) No new ground of rejection; no new finding of patentability

This examiner's answer does not contain any new ground of rejection. This examiner's answer does not contain any new finding of patentability (i.e., no new determination of inapplicability of a proposed rejection).

Examiner Note:

An examiner's answer may not include a new ground of rejection. See 37 CFR 41.69(b). An examiner's answer also may not include a new determination not to make a proposed rejection. See 37 CFR 41.69(c). If a new ground of rejection or new determina-

tion not to make a proposed rejection is made, prosecution must be reopened. See 37 CFR 41.69(d). See also MPEP § 2677.

¶ *26.61 Response to Argument*
(13) Response to argument

Examiner Note:

A statement of whether the examiner disagrees with each of the contentions of appellants and respondents in their briefs with respect to the issues presented, and an explanation of the reasons for disagreement with any such contentions. If any ground of rejection or inapplicability of proposed rejection is not argued and responded to by the appropriate party, the examiner shall point out each claim affected.

¶ *26.61.01 Related Proceeding(s) Appendix*
(14) Related Proceeding(s) Appendix

Examiner Note:

Follow form paragraph with either form paragraph 26.62.01 or 26.62.02.

¶ *26.61.02 No Related Proceeding Identified*

No decision rendered by a court or the Board is identified by the examiner in the Related Appeals and Interferences section of this examiner's answer.

¶ *26.61.03 Copies Related to Proceeding*

Copies of the court or Board decision(s) identified in the Related Appeals and Interferences section of this examiner's answer are provided herein.

¶ *26.62 Notification Regarding Rebuttal Brief*
(15) Period for providing a Rebuttal Brief

Appellant(s) is/are given a period of ONE MONTH from the mailing date of this examiner's answer within which to file a rebuttal brief in response to the examiner's answer. Prosecution otherwise remains closed.

The rebuttal brief of the patent owner may be directed to the examiner's answer and/or any respondent brief. The rebuttal brief of the third party requester(s) may be directed to the examiner's answer and/or the respondent brief of the patent owner. The rebuttal brief must (1) clearly identify each issue, and (2) point out *where* the issue was raised in the examiner's answer and/or in the respondent brief. In addition, the rebuttal brief must be limited to issues raised in the examiner's answer or in the respondent brief.

The time for filing the rebuttal brief may not be extended. No further submission (other than the rebuttal brief(s)) will be considered, and any such submission will be treated in accordance with 37 CFR 1.939.

¶ *26.63 Request to Present Oral Arguments*

The examiner requests the opportunity to present arguments at the oral hearing.

Examiner Note:

1. Use this form paragraph only if:

a. an oral hearing has been requested by a party to the appeal; and

b. the primary examiner intends to present an oral argument.

2. This form paragraph must be included as a separate letter on a form PTOL-90. See MPEP § 1209.

¶ *26.64 Examiner's Answer, Conclusion*
(16) Conclusion

For the above reasons, it is believed that the rejections and/or findings of patentability discussed above should be sustained.

Respectfully submitted,

2678 Rebuttal Briefs [R-3]

**>

37 CFR 41.66. Time for filing briefs.

*****

(d) Any appellant may file a rebuttal brief under § 41.71 within one month of the date of the examiner's answer. The time for filing a rebuttal brief or an amended rebuttal brief may not be extended.

(e) No further submission will be considered and any such submission will be treated in accordance with § 1.939 of this title.<

**>

37 CFR 41.71. Rebuttal brief.

(a) Within one month of the examiner's answer, any appellant may once file a rebuttal brief.

(b)(1)The rebuttal brief of the owner may be directed to the examiner's answer and/or any respondent brief.

(2) The rebuttal brief of the owner shall not include any new or non-admitted amendment, or an affidavit or other evidence. See § 1.116 of this title for amendments, affidavits or other evidence filed after final action but before or on the same date of filing an appeal and § 41.63 for amendments, affidavits or other evidence filed after the date of filing the appeal.

(c)(1)The rebuttal brief of any requester may be directed to the examiner's answer and/or the respondent brief of the owner.

(2) The rebuttal brief of a requester may not be directed to the respondent brief of any other requester.

(3) No new ground of rejection can be proposed by a requester.

(4) The rebuttal brief of a requester shall not include any new or non-admitted affidavit or other evidence. See § 1.116(d) of this title for affidavits or other evidence filed after final action but before or on the same date of filing an appeal and § 41.63(c) for affidavits or other evidence filed after the date of filing the appeal.

(d) The rebuttal brief must include a certification that a copy of the rebuttal brief has been served in its entirety on all other parties to the proceeding. The names and addresses of the parties served must be indicated.

(e) If a rebuttal brief is timely filed under paragraph (a) of this section but does not comply with all the requirements of paragraphs (a) through (d) of this section, appellant will be notified of the reasons for non-compliance and provided with a non-extendable period of one month within which to file an amended rebuttal brief. If the appellant does not file an amended rebuttal brief during the one-month period, or files an amended rebuttal brief which

does not overcome all the reasons for non-compliance stated in the notification, that appellant's rebuttal brief and any amended rebuttal brief by that appellant will not be considered.<

In the examiner's answer, each appellant is given a period of one month from the mailing date of the examiner's answer within which to file a rebuttal brief in response to the issues raised in the examiner's answer and/or in the respondent brief of an opposing party. The one month period may not be extended. 37 CFR *>41.66(d)<.

The rebuttal brief must (A) clearly identify each issue, and (B) point out where the issue was raised in the examiner's answer and/or in the respondent brief. In addition, the rebuttal brief must be limited to issues raised in the examiner's answer or in any respondent brief. A rebuttal brief will not be entered if it does not clearly identify each issue and/or is not limited to issues raised in the examiner's answer or in any respondent brief. Such a rebuttal brief will remain in the file, but it will not be addressed nor considered, except to inform the appropriate party that it was not entered and why.

The rebuttal brief of a third party requester may not be directed to the respondent brief or any other third party requester. No new ground of rejection may be proposed by a third party requester.

After the examiner's answer, only a rebuttal brief (or an amended rebuttal brief, where appellant is given one opportunity to correct a defective original rebuttal brief (MPEP § 2679)) will be received into the reexamination proceeding. No other submission will be considered, and any such other submission will be returned as an improper paper. 37 CFR 1.939.

If no rebuttal brief is received within the one month period set in the examiner's answer, the Central Reexamination Unit (CRU) will issue a notification letter to parties using form paragraph 26.67, and will then forward the reexamination proceeding to the Board of Patent Appeals and Interferences for decision on the appeal(s).

¶ *26.67 No Receipt of Rebuttal Brief(s)*

Appellant(s) was given a period of one month from the mailing date of the examiner's answer within which to file a rebuttal brief in response to the examiner's answer. No rebuttal brief has been received within that time period. Accordingly, the reexamination proceeding is being forwarded to the Board of Patent Appeals and Interferences for decision on the appeal(s).

Prosecution remains closed. Any further reply/comments by any party will not be considered, and may be returned to the party that submitted it.

Central Reexamination Unit

If one or more rebuttal briefs is/are timely received, see MPEP § 2679 for treatment of the rebuttal brief(s).

2679 Office Treatment of Rebuttal Brief [R-5]

When a rebuttal brief is received in response to an examiner's answer, it is entered by the Central Reexamination Unit (CRU). The reexamination case file is retained in the CRU until all potential rebuttal briefs are submitted and entered, or the time for filing a rebuttal brief has expired. The case file is then forwarded to the examiner, who will then review the submission(s) and consult with the Reexamination Legal Advisor (RLA) of the CRU. If the examiner determines that the rebuttal brief (A) does not clearly identify each issue raised in the examiner's answer or in the respondent brief of an opposing party (and point out *where* the issue was raised in those papers), or (B) is not limited to the issues raised in the examiner's answer or the respondent brief; the examiner may *refuse* entry of the rebuttal brief. If entry is approved, the examiner will issue a notification letter to that effect. If entry is refused, the examiner will issue a notification letter that appellant is given a non-extendable period of one month to correct the defect in the rebuttal brief by filing an amended rebuttal brief. If the amended rebuttal brief filed in response to the examiner's letter does not overcome all the reasons for noncompliance with 37 CFR 41.71(a)-(d) stated in the examiner's letter, appellant will be so notified, but will not be given a second opportunity to file an amended rebuttal brief. That appellant's amended rebuttal brief will not be considered. 37 CFR 41.71(e). The examiner's notification letter will be mailed from the CRU.

After all rebuttal briefs and amended rebuttal briefs (where appellant is given an opportunity to correct a defective original rebuttal brief) have been received and the appropriate notification letters mailed, or the time for filing such briefs has expired, the proceeding

will be forwarded by the CRU to the Board of Patent Appeals and Interferences.

In a very rare situation, where the examiner finds that it is essential to address a rebuttal brief, the examiner must reopen prosecution. In order to reopen prosecution after an examiner's answer, the **>CRU< Director must approve the same in writing, at the end of the action that reopens prosecution.

Form paragraphs 26.65 and 26.65.01 may be used to notify the parties of receipt and entry of the rebuttal brief(s).

¶ *26.65 Acknowledgment of Rebuttal Brief*

The rebuttal brief filed **[1]** by **[2]** has been entered.

Examiner Note:

1. Use a separate form paragraph 26.65 for each rebuttal brief that is received.

2. In bracket 1, insert the date the rebuttal brief was filed.

3. In bracket 2, insert the party that filed the rebuttal brief.

¶ *26.65.01 No Further Response*

No further response by the examiner is appropriate. Any further reply/comments by any party will be not be considered, and may be returned to the party that submitted it. The reexamination proceeding is being forwarded to the Board of Patent Appeals and Interferences for decision on the appeal(s).

Form paragraph 26.66 may be used to notify the parties of receipt of the rebuttal brief(s) that are defective.

¶ *26.66 Defective Rebuttal Brief-Opportunity to Correct*

A rebuttal brief must (1) clearly identify each issue and (2) point out *where* the issue was raised in the examiner's answer and/or in the respondent brief. In addition, the rebuttal brief must be limited to issues raised in the examiner's answer or in the respondent brief. The rebuttal brief of Appellant **[1]** is defective because **[2]**.

Appellant **[3]** is given a period of ONE MONTH from the mailing date of this examiner's answer within which to file an amended rebuttal brief in response to this letter. Prosecution otherwise remains closed. The time for filing the amended rebuttal brief may not be extended.

If the amended rebuttal brief filed in response to the this letter does not remedy the defect or raises a new one, appellant will be so notified, but will not be given a second opportunity to file an amended rebuttal brief.

Examiner Note:

1. In brackets 1 and 3, insert the "patent owner" or the appropriate third party requester. Where there is one third party requester (the usual situation) insert "third party requester"; where there are two or more third party requesters (a merged proceeding), insert "third party requester" followed by the name of the third party requester (e.g., "third party requester Smith" or "third party requester XYZ Corporation").

2. This form paragraph is to be used once for each appellant filing a defective **original** rebuttal brief, to provide notification thereof.

3. For an appellant filing a defective **amended** rebuttal brief, use form paragraph 26.66.01.

Form paragraph 26.66.01 may be used to notify the appellant that the amended rebuttal brief is defective.

¶ *26.66.01 Defective Amended Rebuttal Brief-No Opportunity to Correct*

A rebuttal brief must (1) clearly identify each issue and (2) point out *where* the issue was raised in the examiner's answer and/or in the respondent brief. In addition, the rebuttal brief must be limited to issues raised in the examiner's answer or in the respondent brief. The amended rebuttal brief of Appellant **[1]** is defective because **[2]**.

The original and amended rebuttal briefs have been placed in the file but will not be considered. There is **no** opportunity to file a second amended rebuttal brief, and any such submission will be returned.

Examiner Note:

1. In bracket 1, insert the "patent owner" or the appropriate third party requester. Where there is one third party requester (the usual situation) insert "third party requester"; where there are two or more third party requesters (a merged proceeding), insert "third party requester" followed by the name of the requester (e.g., "third party requester Smith" or "third party requester XYZ Corporation").

2. This form paragraph is to be used once for each defective **amended** rebuttal brief, to provide notification thereof. The notification letter should conclude with form paragraph 26.66.02, unless such is inappropriate for some reason.

3. For an appellant filing a defective **original** rebuttal brief, use form paragraph 26.66.

Form paragraph 26.66.02 may be used to notify the parties that the proceeding is being forwarded to the Board of Appeals and Interferences for decision on the appeal(s).

¶ *26.66.02 Forward to the Board for Decision*

The reexamination proceeding is being forwarded to the Board of Patent Appeals and Interferences for decision on the appeal(s).

2680 Oral Hearing [R-3]

**>

37 CFR 41.73. Oral hearing.

(a) An oral hearing should be requested only in those circumstances in which an appellant or a respondent considers such a hearing necessary or desirable for a proper presentation of the appeal. An appeal decided on the briefs without an oral hearing will receive the same consideration by the Board as an appeal decided after an oral hearing.

(b) If an appellant or a respondent desires an oral hearing, he or she must file, as a separate paper captioned "REQUEST FOR ORAL HEARING," a written request for such hearing accompanied by the fee set forth in § 41.20(b)(3) within two months after the date of the examiner's answer. The time for requesting an oral hearing may not be extended. The request must include a certification that a copy of the request has been served in its entirety on all other parties to the proceeding. The names and addresses of the parties served must be indicated.

(c) If no request and fee for oral hearing have been timely filed by appellant or respondent as required by paragraph (b) of this section, the appeal will be assigned for consideration and decision on the briefs without an oral hearing.

(d) If appellant or respondent has complied with all the requirements of paragraph (b) of this section, a hearing date will be set, and notice given to the owner and all requesters. If an oral hearing is held, an oral argument may be presented by, or on behalf of, the primary examiner if considered desirable by either the primary examiner or the Board. The notice shall set a non-extendable period within which all requests for oral hearing shall be submitted by any other party to the appeal desiring to participate in the oral hearing. A hearing will be held as stated in the notice, and oral argument will be limited to thirty minutes for each appellant or respondent who has requested an oral hearing, and twenty minutes for the primary examiner unless otherwise ordered. No appellant or respondent will be permitted to participate in an oral hearing unless he or she has requested an oral hearing and submitted the fee set forth in § 41.20(b)(3).

(e)(1) At the oral hearing, each appellant and respondent may only rely on evidence that has been previously entered and considered by the primary examiner and present argument that has been relied upon in the briefs except as permitted by paragraph (e)(2) of this section. The primary examiner may only rely on argument and evidence relied upon in an answer except as permitted by paragraph (e)(2) of this section. The Board will determine the order of the arguments presented at the oral hearing.

(2) Upon a showing of good cause, appellant, respondent and/or the primary examiner may rely on a new argument based upon a recent relevant decision of either the Board or a Federal Court.

(f) Notwithstanding the submission of a request for oral hearing complying with this rule, if the Board decides that a hearing is not necessary, the Board will so notify the owner and all requesters.<

If an appellant or a respondent desires an oral hearing in an appeal of an *inter partes* reexamination proceeding, he/she must file a written request for such hearing, accompanied by the fee set forth in 37 CFR *>41.20(b)(3)<, within two months after the date of the examiner's answer. There is no extension of the time for requesting a hearing. 37 CFR *>41.73(b)<. No appellant or respondent will be permitted to participate in an oral hearing, unless he or she has requested an oral hearing and submitted the fee set forth in 37 CFR *>41.20(b)(3)<.

**>Where the appeal involves reexamination proceedings, oral hearings are open to the public as observers (subject to the admittance procedures established by the Board), unless one of the appellants and/or the respondents (A) petitions under 37 CFR 41.3 that the hearing not be open to the public, (B) presents sufficient reasons for such a request, (C) pays the petition fee set forth in 37 CFR 41.20(a), and (D) the petition is granted.<

2681 Board of Patent Appeals and Interferences Decision [R-3]

**>

37 CFR 41.77. Decisions and other actions by the Board.

(a) The Board of Patent Appeals and Interferences, in its decision, may affirm or reverse each decision of the examiner on all issues raised on each appealed claim, or remand the reexamination proceeding to the examiner for further consideration. The reversal of the examiner's determination not to make a rejection proposed by the third party requester constitutes a decision adverse to the patentability of the claims which are subject to that proposed rejection which will be set forth in the decision of the Board of Patent Appeals and Interferences as a new ground of rejection under paragraph (b) of this section. The affirmance of the rejection of a claim on any of the grounds specified constitutes a general affirmance of the decision of the examiner on that claim, except as to any ground specifically reversed.

(b) Should the Board reverse the examiner's determination not to make a rejection proposed by a requester, the Board shall set forth in the opinion in support of its decision a new ground of rejection; or should the Board have knowledge of any grounds not raised in the appeal for rejecting any pending claim, it may include in its opinion a statement to that effect with its reasons for so holding, which statement shall constitute a new ground of rejection of the claim. Any decision which includes a new ground of rejection pursuant to this paragraph shall not be considered final for judicial review. When the Board makes a new ground of rejection, the owner, within one month from the date of the decision, must exercise one of the following two options with respect to the new ground of rejection to avoid termination of the appeal proceeding as to the rejected claim:

(1) *Reopen prosecution.* The owner may file a response requesting reopening of prosecution before the examiner. Such a response must be either an amendment of the claims so rejected or new evidence relating to the claims so rejected, or both.

(2) *Request rehearing*. The owner may request that the proceeding be reheard under § 41.79 by the Board upon the same record. The request for rehearing must address any new ground of rejection and state with particularity the points believed to have been misapprehended or overlooked in entering the new ground of rejection and also state all other grounds upon which rehearing is sought.

(c) Where the owner has filed a response requesting reopening of prosecution under paragraph (b)(1) of this section, any requester, within one month of the date of service of the owner's response, may once file comments on the response. Such written comments must be limited to the issues raised by the Board's opinion reflecting its decision and the owner's response. Any requester that had not previously filed an appeal or cross appeal and is seeking under this subsection to file comments or a reply to the comments is subject to the appeal and brief fees under § 41.20 (b)(1) and (2), respectively, which must accompany the comments or reply.

(d) Following any response by the owner under paragraph (b)(1) of this section and any written comments from a requester under paragraph (c) of this section, the proceeding will be remanded to the examiner. The statement of the Board shall be binding upon the examiner unless an amendment or new evidence not previously of record is made which, in the opinion of the examiner, overcomes the new ground of rejection stated in the decision. The examiner will consider any owner response under paragraph (b)(1) of this section and any written comments by a requester under paragraph (c) of this section and issue a determination that the rejection is maintained or has been overcome.

(e) Within one month of the examiner's determination pursuant to paragraph (d) of this section, the owner or any requester may once submit comments in response to the examiner's determination. Within one month of the date of service of comments in response to the examiner's determination, the owner and any requesters may file a reply to the comments. No requester reply may address the comments of any other requester reply. Any requester that had not previously filed an appeal or cross appeal and is seeking under this subsection to file comments or a reply to the comments is subject to the appeal and brief fees under § 41.20 (b)(1) and (2), respectively, which must accompany the comments or reply.

(f) After submission of any comments and any reply pursuant to paragraph (e) of this section, or after time has expired, the proceeding will be returned to the Board which shall reconsider the matter and issue a new decision. The new decision is deemed to incorporate the earlier decision, except for those portions specifically withdrawn.

(g) The time period set forth in paragraph (b) of this section is subject to the extension of time provisions of § 1.956 of this title when the owner is responding under paragraph (b)(1) of this section. The time period set forth in paragraph (b) of this section may not be extended when the owner is responding under paragraph (b)(2) of this section. The time periods set forth in paragraphs (c) and (e) of this section may not be extended.<

After consideration of the record of the *inter partes* reexamination proceeding, including all briefs and the examiner's answer, the Board of Patent Appeals and Interferences (Board) issues its decision, affirming the examiner in whole or in part, or reversing the examiner's decision, sometimes also setting forth a new ground of rejection. Where there is reason to do so, the Board will sometimes remand the reexamination proceeding to the examiner for further consideration, prior to rendering a decision.

On occasion, the Board has refused to consider an appeal until after the conclusion of a pending civil action or appeal to the United States Court of Appeals for the Federal Circuit involving issues identical with, or similar to, those presented in the later appeal. Such suspension of action, postponing consideration of the appeal until the Board has the benefit of a court decision which may be determinative of the issues involved, has been recognized as sound practice.

I. BOARD DECISION MAY CONTAIN NEW GROUND OF REJECTION

37 CFR *>41.77(b)< provides express authority for the Board to include, in its decision, a recommendation for rejecting any claim found patentable by the examiner that the Board believes should be again considered by the examiner. 37 CFR *>41.77(b)< is not intended as an instruction to the Board to revisit every patentable claim in every appealed proceeding. It is, rather, intended to give the Board express authority to act when it becomes apparent, during the consideration of the claims, that one or more patentable claims may be subject to rejection on either the same grounds or on different grounds from those applied against the rejected claims.

It should be noted that, pursuant to 37 CFR *>41.77(a)<, the reversal of the examiner's determination not to make a rejection proposed by the requester constitutes a decision adverse to the patentability of the claims which are subject to that proposed rejection. Accordingly, such reversal will be set forth in the Board's decision as a new ground of rejection under 37 CFR *>41.77(b)<.

II. NON-FINAL BOARD DECISIONS

A decision of the Board which includes a new ground of rejection or a remand will not be considered as a final decision in the case. The Board, following conclusion of the proceedings before the examiner, will either adopt its earlier decision as final or will render a new decision based on all appealed claims, as it considers appropriate. In either case, final action by the Board will give rise to the alternatives available to a party to the appeal following a decision by the Board.

III. NO BOARD RECOMMENDATION OF AMENDMENT TO MAKE CLAIM PATENTABLE

It should be noted that, unlike the practice for applications and *ex parte* reexaminations, the decision of the Board of Patent Appeals and Interferences **cannot** include an explicit statement that a claim may be allowed in amended form, whereby the patent owner would have the right to amend in conformity with that statement and it would be binding on the examiner in the absence of new references or grounds of rejection. The reason that the Board decision cannot make such a recommendation is that to permit the patent owner and the third party comment on a Board determination of the patentability of a hypothetical amended claim would be unduly complicated so late in the proceedings.

Additionally, in the absence of an express recommendation, a remark by the Board that a certain feature does not appear in a claim is **not** to be taken as a recommendation that the claim be allowed if the feature is supplied by amendment. *Ex parte Norlund*, 1913 C.D. 161, 192 O.G. 989 (Comm'r Pat. 1913).

IV. REVIEW OF BOARD DECISION BY PETITION

Since review of the decisions of the Board is committed by statute to the Court of Appeals for the Federal Circuit, the Board's decisions are properly reviewable on petition **only to the extent of** determining whether they involve a convincing showing of error, abuse of discretion, or policy issue appropriate for higher level determination. Reasonable rulings made by the Board on matters resting in its discretion will not be disturbed upon petition. Thus, for example, the Board's opinion as to whether it has employed a new ground of rejection will not be set aside on petition unless said opinion is found to be clearly unwarranted.

V. PUBLICATION OF BOARD DECISIONS

Decisions of the Board may be published at the discretion of the ** Office. >See 37 CFR 41.6(a).< Requests by members of the public or parties to the reexamination proceeding to publish a decision of the Board should be referred to the Office of the Solicitor.

2682 Action Following Decision [R-5]

37 CFR 41.79. Rehearing.

(a) Parties to the appeal may file a request for rehearing of the decision within one month of the date of:

(1) The original decision of the Board under § 41.77(a),

(2) The original § 41.77(b) decision under the provisions of § 41.77(b)(2),

(3) The expiration of the time for the owner to take action under § 41.77(b)(2), or

(4) The new decision of the Board under § 41.77(f).

(b)(1)The request for rehearing must state with particularity the points believed to have been misapprehended or overlooked in rendering the Board's opinion reflecting its decision. Arguments not raised in the briefs before the Board and evidence not previously relied upon in the briefs are not permitted in the request for rehearing except as permitted by paragraphs (b)(2) and (b)(3) of this section.

(2) Upon a showing of good cause, appellant and/or respondent may present a new argument based upon a recent relevant decision of either the Board or a Federal Court.

(3) New arguments responding to a new ground of rejection made pursuant to § 41.77(b) are permitted.

(c) Within one month of the date of service of any request for rehearing under paragraph (a) of this section, or any further request for rehearing under paragraph (d) of this section, the owner and all requesters may once file comments in opposition to the request for rehearing or the further request for rehearing. The comments in opposition must be limited to the issues raised in the request for rehearing or the further request for rehearing.

(d) If a party to an appeal files a request for rehearing under paragraph (a) of this section, or a further request for rehearing under this section, the Board shall render a decision on the request for rehearing. The decision on the request for rehearing is deemed to incorporate the earlier opinion reflecting its decision for appeal, except for those portions specifically withdrawn on rehearing and is final for the purpose of judicial review, except when noted otherwise in the decision on rehearing. If the Board opinion reflecting its decision on rehearing becomes, in effect, a new decision, and the Board so indicates, then any party to the appeal may, within one month of the new decision, file a further request for rehearing of the new decision under this subsection. Such further

request for rehearing must comply with paragraph (b) of this section.

(e) The times for requesting rehearing under paragraph (a) of this section, for requesting further rehearing under paragraph (c) of this section, and for submitting comments under paragraph (b) of this section may not be extended.

37 CFR 41.81. Action following decision.

The parties to an appeal to the Board may not appeal to the U.S. Court of Appeals for the Federal Circuit under § 1.983 of this title until all parties' rights to request rehearing have been exhausted, at which time the decision of the Board is final and appealable by any party to the appeal to the Board.

37 CFR 1.981. Reopening after a final decision of the Board of Patent Appeals and Interferences.

When a decision by the Board of Patent Appeals and Interferences on appeal has become final for judicial review, prosecution of the *inter partes* reexamination proceeding will not be reopened or reconsidered by the primary examiner except under the provisions of § 41.77 of this title without the written authority of the Director, and then only for the consideration of matters not already adjudicated, sufficient cause being shown.

The provisions of 37 CFR 41.77 through 41.79 and 37 CFR 1.979 through 1.983 deal with action by the parties and the examiner following a decision by the Board of Patent Appeals and Interferences (Board) in an *inter partes* reexamination proceeding.

After an appeal to the Board has been decided, a copy of the decision is mailed to all parties to the reexamination proceeding, and the original of the decision is placed in the file. The clerk of the Board notes the decision in the file history of the reexamination proceeding and in the record of appeals. The clerk then forwards the file to the Central Reexamination Unit (CRU), immediately, if the examiner is reversed, and after about 6 weeks if the examiner is affirmed or after a decision on a request for rehearing is rendered. The decision is processed *>by< the CRU >support staff<, and the file is then forwarded to the examiner through the office of the **>CRU< Director.

The Board, in its decision, may affirm or reverse the decision of the examiner, in whole or in part, on the grounds of rejection specified by the examiner and/or on the proposed grounds presented by a third party requester but not adopted by the examiner. A rejection of claims by the examiner may also be affirmed on the basis of the argument presented by the third party requester, and a finding of patentability may also be affirmed on the basis of the arguments presented by the patent owner. Further handling of the reexamination proceeding will depend upon the nature of the Board's decision.

I. THE BOARD AFFIRMS, REVERSES A REJECTION, OR AFFIRMS-IN-PART (AND REVERSES ONLY AS TO REJECTION(S))

Where the Board decision (A) affirms the examiner in whole, (B) reverses the examiner in whole where only rejections were appealed, or (C) affirms in part and reverses in part, where the only examiner decision overturned is that of rejecting claims, in these situations, the case is forwarded to the CRU which processes the decision and then stores the case file. The CRU will retain the case file until the expiration of **both** the period for requesting rehearing of the decision by the Board (in accordance with 37 CFR 41.79), and the period for the patent owner seeking court review of the decision of the Board (in accordance with 37 CFR 1.983) - with no further action having been taken by any party to the appeal. The time period for seeking review of a decision of the Board by the Court of Appeals for the Federal Circuit is 2 months from the date of the decision of the Board plus any extension obtained under 37 CFR 1.304. See MPEP § 1216. The time period for requesting rehearing under 37 CFR 41.79 is one month and the one month period may not be extended. 37 CFR 41.79(e).

A. No Action Taken by Parties to the Appeal

Two weeks after the time for action by any party (to the appeal) has expired, the CRU >support staff< will forward the case (via the *>CRU< Director) to the examiner. The two week delay is to permit any information as to requesting rehearing, or the filing of an appeal, to reach the CRU. Upon receipt of the reexamination, the examiner will take up the reexamination proceeding for action so that a Notice of Intent to Issue *Inter Partes* Reexamination Certificate (NIRC) can be issued in accordance with MPEP § 2687, to terminate the prosecution of the reexamination proceeding.

The following form paragraph should be used where the NIRC is issued:

¶ *26.67.01 Periods for Seeking Court Review or Rehearing Have Lapsed*

The periods for seeking court review of, or a rehearing of, the decision of the Board of Patent Appeals and Interferences rendered **[1]** have expired and no further action has been taken by any

party to the appeal. Accordingly, the appeal in this reexamination proceeding is considered terminated; see 37 CFR 1.979(b). The present Notice of Intent to Issue *Inter Partes* Reexamination Certificate (NIRC) is issued in accordance with MPEP § 2687 in order to terminate the present reexamination prosecution.

Examiner Note:

In bracket 1, enter the date of the Board decision.

The NIRC will indicate the status of all the claims in the case as a result of the Board decision. A red-ink line should be drawn by the examiner through any refused claims, and the notation "Board Decision" written in the margin in red ink. A statement will be included in the NIRC that "Claims ____ have been canceled as a result of the decision of the Board of Patent Appeals and Interferences dated _____."

Claims indicated as patentable prior to appeal except for their dependency from rejected claims *not in the original patent* will be treated as if they were rejected. See MPEP § 1214.06. The following two examples should be noted:

- Claim 10 has been added to the patent during the reexamination, or claim 10 is a patent claim that was amended during the reexamination. Claim 11 depends on claim 10. If the Board affirms a rejection of claim 10 and claim 11 was objected to prior to appeal as being patentable except for its dependency from claim 10, the examiner should cancel both claims 10 and 11 by formal examiner's amendment attached as part of the NIRC.

- On the other hand, if both claims 10 and 11 were rejected prior to the appeal, then the patent owner was never put on notice that claim 11 could be made allowable by placing it in independent form. Thus, where the Board affirms a rejection against claim 10 but reverses the rejections against dependent claim 11, the examiner should convert dependent claim 11 into independent form by formal examiner's amendment and cancel claim 10 (for which the rejection was affirmed) in the NIRC. In this instance, the examiner could also set a time period of one month or 30 days (whichever is longer) in which the patent owner may rewrite dependent claim 11 in independent form. Extensions of time under 37 CFR 1.956 will be permitted. If no timely response is received, the examiner will cancel both claims 10 and 11 in the NIRC.

See MPEP § 2687 for further guidance in issuing the NIRC and terminating the prosecution of the reexamination proceeding.

B. A Request for Rehearing of the Decision

Any party to the appeal not satisfied with the Board decision may file a single request for rehearing of the decision. The request must be filed within one month from the date of the original decision under 37 CFR 41.77(a) or a new decision under 37 CFR 41.77(f). The one month period may not be extended. 37 CFR 41.79(e). The provisions of 37 CFR 41.79(b) require that any request must specifically state the points believed to have been misapprehended or overlooked in the Board's decision, as well as all other grounds which rehearing is sought.

If a party does file a request for rehearing of the decision, any opposing party appellant or opposing party respondent may, within one month from the date of *service* of the request for rehearing, file responsive comments on the request for rehearing. 37 CFR 41.79(c). This one month period may not be extended. 37 CFR 41.79(e).

Where at least one request for rehearing of the decision is granted, the Board's decision on the request for rehearing is deemed to incorporate the earlier opinion reflecting its decision for appeal, except for those portions specifically withdrawn on rehearing, and the decision is final for the purpose of judicial review, except when noted otherwise in the decision on rehearing. If the Board opinion reflecting its decision on rehearing indicates that the decision is a new decision, then any party to the appeal may, within one month of the new decision, file a further request for rehearing of the new decision. Such further request for rehearing must comply with 37 CFR 41.79(b). If the Board's final decision on the request for rehearing is not timely appealed to the Court, the case is returned to the CRU for processing and subsequent forwarding to the examiner. When the examiner receives the reexamination from the CRU, the examiner will proceed to issue a NIRC and terminate the prosecution of the reexamination proceeding. 37 CFR 1.979(b).

II. NEW GROUND OF REJECTION BY BOARD

Pursuant to 37 CFR 41.77(b), the Board may, in its decision on appeal, make a new rejection of one or more appealed claims on grounds not raised in the appeal, in which case the patent owner has the option of:

(A) requesting rehearing under 37 CFR 41.79(a); or

(B) submitting an appropriate amendment of the rejected claims, and/or new evidence (e.g., a showing of facts) relating to the claim.

The parties do not have the option of an immediate appeal to the U.S. Court of Appeals for the Federal Circuit because the decision under 37 CFR 41.77(b) is not a final decision.

A. A Request for Rehearing of the Decision Which Includes a New Ground of Rejection

A patent owner's request for rehearing by the Board must be filed within a nonextendable one month period set by 37 CFR 41.79(a). By proceeding in this manner, the patent owner waives his or her right to further prosecution before the examiner. *In re Greenfield*, 40 F.2d 775, 5 USPQ 474 (CCPA 1930). If the patent owner does file a request for rehearing of the decision, any third party requester that is a party to the appeal may, within a non-extendable one month period from the date of service of the request for rehearing, file responsive comments on the request. 37 CFR 41.79(c).

B. Submission of Amendment or Showing of Facts After Decision Which Includes a New Ground of Rejection

If the patent owner elects to proceed before the examiner, the patent owner must take action within the one month period for response which will be set in the Board's decision. Extensions of time under 37 CFR 1.956 are available to extend the period. 37 CFR 41.77(g). The extension(s) may not, however exceed six months from the Board's decision.

When the patent owner submits a response pursuant to 37 CFR 41.77(b)(1), prosecution and examination will then be carried out under 37 CFR 41.77(c) through 37 CFR 41.77(f). Under 37 CFR 41.77(b)(1), the patent owner may amend the claims involved, or substitute new claims to avoid the art or reasons stated by the Board. *Ex parte Burrowes*, 110 O.G. 599, 1904 C.D. 155 (Comm'r Pat. 1904). Such amended or new claims must be directed to the same subject matter as the appealed claims, *Ex parte Comstock*, 317 O.G. 4, 1923 C.D. 82 (Comm'r Pat. 1923). The patent owner may also submit evidence or a showing of facts under 37 CFR 1.131 or 1.132, as may be appropriate. Argument without either amendment (of the claims so rejected) or the submission of evidence or a showing of facts (as to the claims so rejected) can result only in the examiner's determination to maintain the Board's rejection of the claims, since the examiner is without authority to find the claims patentable unless the claims are amended or unless the rejection is overcome by a showing of facts not before the Board. The new ground of rejection raised by the Board does not "reopen the prosecution" (under 37 CFR 41.77(b)(1) and 37 CFR 41.77(c) through 37 CFR 41.77(f) *except as to that subject matter to which the new rejection was applied*. Accordingly, any amendment or showing of facts **not** directed to that subject matter to which the new rejection was applied will be refused entry and will not be considered.

III. BOARD DECISION REVERSES EXAMINER'S DETERMINATION NOT TO MAKE PROPOSED REJECTION

Where the Board decision reverses the examiner in whole (or affirms in part and reverses in part, with at least one examiner decision overturned as to the proposed rejections the examiner refused to adopt) as to the proposed rejections the examiner refused to adopt, pursuant to 37 CFR 41.77(a), the Board's reversal of the examiner's determination not to adopt a rejection proposed by the third party requester constitutes a decision adverse to the patentability of the claims (which are subject to that proposed rejection). Accordingly, such reversal will be set forth in the Board's decision as a new ground of rejection under 37 CFR 41.77(b). See subsection II. above for the action taken after a new ground of rejection.

IV. REMAND BY BOARD

In accordance with 37 CFR 41.77(a), the Board, in its decision, may remand the reexamination proceeding to the examiner for further consideration. A Board decision which includes a remand in accordance with 37 CFR 41.77(a) will not be considered a "final decision" in the case.

The Board may remand the case to an examiner where appropriate procedure has not been followed, where further information is needed, or where the examiner is to consider something which the

examiner did not yet consider (or it is not clear that the examiner had considered it).

After the examiner has addressed the remand, the examiner will either return the case to the Board (via the CRU) or reopen prosecution as appropriate. The Board, following conclusion of the proceedings before the examiner, will either adopt its earlier decision as final (if the remand decision lends itself to same) or will render a new decision based on all appealed claims, as it considers appropriate. In either case, final action by the Board will give rise to the alternatives available following a decision by the Board.

A. Reopening Prosecution of Case

Reopening prosecution of a case after decision by the Board should be a rare occurrence. Cases which have been decided by the Board will not be reopened or reconsidered by the primary examiner, unless the provisions of 37 CFR 41.77 apply, or the written consent of the Director of the USPTO is obtained for the consideration of matters not already adjudicated, where sufficient cause has been shown. See 37 CFR 1.981.

A rejection under 37 CFR 41.77(b)(1) in effect nullifies the ACP and RAN and automatically reopens the prosecution of the subject matter of the claims so rejected by the Board. Accordingly, the written consent of the *>CRU< Director is not required on the next Office action.

The written consent of the *>CRU< Director is, however, required for an action reopening prosecution where the reexamination proceeding has been remanded to the examiner for a failure to follow appropriate procedure, to provide more information, or to consider something not yet considered, and the examiner then concludes after consideration of all the evidence and argument that a decision as to patentability made in the RAN should be changed. If so, the prosecution would be reopened with the written consent of the *>CRU< Director and an ACP issued, so that any party adversely affected by the change in the examiner's position will have an opportunity to consider it and subsequently appeal the examiner's new decision.

The *>CRU< Director will decide any petition to reopen prosecution of an *inter partes* reexamination proceeding after decision by the Board, where no court action has been filed. MPEP § 1002.02(c), item 1. In addition, the Director of the USPTO entertains petitions to reopen certain cases in which an appellant has sought review by the court. This procedure is restricted to cases which have been decided by the Board and which are amenable to settlement without the need for going forward with the court proceeding. See MPEP § 1214.07.

2683 Appeal to Courts [R-3]

35 U.S.C. 141. Appeal to the Court of Appeals for the Federal Circuit.

*****

A patent owner, or a third-party requester in an inter partes reexamination proceeding, who is in any reexamination proceeding dissatisfied with the final decision in an appeal to the Board of Patent Appeals and Interferences under section 134 may appeal the decision only to the United States Court of Appeals for the Federal Circuit.

*****

37 CFR 1.983. Appeal to the United States Court of Appeals for the Federal Circuit in inter partes reexamination.

(a) The patent owner or third party requester in an inter partes reexamination proceeding who is a party to an appeal to the Board of Patent Appeals and Interferences and who is dissatisfied with the decision of the Board of Patent Appeals and Interferences may, subject to § 1.979(e), appeal to the U.S. Court of Appeals for the Federal Circuit and may be a party to any appeal thereto taken from a reexamination decision of the Board of Patent Appeals and Interferences.

(b) The appellant must take the following steps in such an appeal:

(1) In the U.S. Patent and Trademark Office, timely file a written notice of appeal directed to the Director in accordance with §§ 1.302 and 1.304;

(2) In the U.S. Court of Appeals for the Federal Circuit, file a copy of the notice of appeal and pay the fee, as provided for in the rules of the U.S. Court of Appeals for the Federal Circuit; and

(3) Serve a copy of the notice of appeal on every other party in the reexamination proceeding in the manner provided in § 1.248.

(c) If the patent owner has filed a notice of appeal to the U.S. Court of Appeals for the Federal Circuit, the third party requester may cross appeal to the U.S. Court of Appeals for the Federal Circuit if also dissatisfied with the decision of the Board of Patent Appeals and Interferences.

(d) If the third party requester has filed a notice of appeal to the U.S. Court of Appeals for the Federal Circuit, the patent owner may cross appeal to the U.S. Court of Appeals for

the Federal Circuit if also dissatisfied with the decision of the Board of Patent Appeals and Interferences.

(e) A party electing to participate in an appellant's appeal must, within fourteen days of service of the appellant's notice of appeal under paragraph (b) of this section, or notice of cross appeal under paragraphs (c) or (d) of this section, take the following steps:

(1) In the U.S. Patent and Trademark Office, timely file a written notice directed to the Director electing to participate in the appellant's appeal to the U.S. Court of Appeals for the Federal Circuit by mail to, or hand service on, the General Counsel as provided in § 104.2;

(2) In the U.S. Court of Appeals for the Federal Circuit, file a copy of the notice electing to participate in accordance with the rules of the U.S. Court of Appeals for the Federal Circuit; and

(3) Serve a copy of the notice electing to participate on every other party in the reexamination proceeding in the manner provided in § 1.248.

(f) Notwithstanding any provision of the rules, in any reexamination proceeding commenced prior to November 2, 2002, the third party requester is precluded from appealing and cross appealing any decision of the Board of Patent Appeals and Interferences to the U.S. Court of Appeals for the Federal Circuit, and the third party requester is precluded from participating in any appeal taken by the patent owner to the U.S. Court of Appeals for the Federal Circuit.

I. APPEAL TO UNITED STATES COURT OF APPEALS FOR THE FEDERAL CIRCUIT IS AVAILABLE

A. For Any Inter Partes Reexamination Proceeding "Commenced" on or After November 2, 2002

Section 13106 of Public Law 107-273, 116 Stat. 1758, 1899-1906 (2002), newly granted the *inter partes* reexamination **third party requester** the right to appeal an adverse decision of the Board of Patent Appeals and Interferences (Board) to the Court of Appeals for the Federal Circuit (Federal Circuit). 35 U.S.C. 315(b)(1). It further authorized the third party requester to be a party to any appeal taken by the patent owner to the Federal Circuit. 35 U.S.C. 315(b)(2). Also, section 13106 of Public Law 107-273 implicitly permitted the patent owner to be a party to the newly provided for appeal taken by the third party requester to the Federal Circuit. This is because 35 U.S.C. 315(a)(2) states that the patent owner involved in an *inter partes* reexamination proceeding "may be a party to any appeal taken by a third party requester under subsection (b)." The effective date for this revision to the statute is provided in section 13106 of Public Law 107-273 as follows: "The amendments made by this section apply with respect to any reexamination proceeding commenced on or after the date of enactment of this Act."

1. Appeal to the Federal Circuit

A patent owner and/or a third party requester in an *inter partes* reexamination proceeding who is a party to an appeal to the Board and who is dissatisfied with the decision of the Board may, subject to 37 CFR *>41.81<, appeal to the Federal Circuit. Pursuant to 37 CFR *>41.81<, the patent owner and/or third party requester may **not** appeal to the Federal Circuit until all parties' rights to request rehearing have been exhausted, at which time the decision of the Board is final and appealable to the Federal Circuit.

A patent owner or a third party requester appellant must take the following steps in such an appeal to the Federal Circuit (37 CFR 1.983(b)):

(A) In the Office, timely file a written notice of appeal directed to the Director of the USPTO in accordance with 37 CFR 1.302 and 1.304;

(B) In the Federal Circuit, file a copy of the notice of appeal and pay the fee, as provided for in the rules of the Federal Circuit; and

(C) Serve a copy of the notice of appeal on every other party in the reexamination proceeding in the manner provided in 37 CFR 1.248.

2. Cross Appeal

If the patent owner has filed a notice of appeal to the Federal Circuit, the third party requester may cross appeal to the Federal Circuit if also dissatisfied with the decision of the Board. 37 CFR 1.983(c).

If the third party requester has filed a notice of appeal to the Federal Circuit, the patent owner may cross appeal to the Federal Circuit if also dissatisfied with the decision of the Board. 37 CFR 1.983(d).

Such cross appeals would be taken under the rules of the Federal Circuit for cross appeals.

3. Participation in Other Party's Appeal

The patent owner and the third party requester may each be a party to, i.e., participate in, each other's appeal to the Federal Circuit from an *inter partes*

reexamination decision of the Board (37 CFR 1.983(e)).

A party electing to participate in an appellant's appeal must, within fourteen days of service of the appellant's notice of appeal (37 CFR 1.983(b)(3)) or notice of cross appeal (37 CFR 1.983(c) or (d)), take the following steps:

(A) In the Office, timely file a written notice directed to the Director of the USPTO electing to participate in the appellant's appeal to the Federal Circuit;

(B) In the Federal Circuit, file a copy of the notice electing to participate; and

(C) Serve a copy of the notice electing to participate on every other party in the reexamination proceeding in the manner provided in 37 CFR 1.248.

B. For Any Inter Partes Reexamination Proceeding "Commenced" Prior to November 2, 2002

In any reexamination proceeding commenced **prior** to November 2, 2002, only the patent owner can appeal to the U.S. Court of Appeals for the Federal Circuit. Pursuant to 35 U.S.C. 134(c), as it existed **prior** to its November 2, 2002 revision via Public Law 107-273, the third party requester is expressly precluded from appealing (and cross appealing) any decision of the Board in an *inter partes* reexamination proceeding commenced **prior** to November 2, 2002, to the Federal Circuit. The third party requester is also precluded from participating in any appeal taken by the patent owner to the Federal Circuit.

Pursuant to 37 CFR 1.983, a patent owner in a reexamination proceeding commenced **prior** to November 2, 2002, who is dissatisfied with the decision of the Board may, subject to 37 CFR *>41.81<, appeal to the Federal Circuit. Under 37 CFR *>41.81<, the patent owner may **not** appeal to the Federal Circuit until all parties' rights to request rehearing of the Board's decision have been exhausted, at which time the decision of the Board is final and appealable by the patent owner to the Federal Circuit.

The patent owner must take the following steps in such an appeal:

(A) In the Office, timely file a written notice of appeal directed to the Director of the USPTO in accordance with 37 CFR 1.302 and 1.304;

(B) In the Federal Circuit, file a copy of the notice of appeal and pay the fee, as provided for in the rules of the Federal Circuit; and

(C) Serve a copy of the notice of appeal on the third party requester(s) in the reexamination proceeding in the manner provided in 37 CFR 1.248.

II. APPEAL TO U.S. DISTRICT COURT FOR THE DISTRICT OF COLUMBIA IS NOT AVAILABLE

The remedy by civil action under 35 U.S.C. 145 is not available to the patent owner and the third party requester in an *inter partes* reexamination proceeding. Patent owners and third party requesters dissatisfied with a decision of the Board in an *inter partes* reexamination proceeding are not permitted to file a civil action against the Director of the USPTO in the U.S. District Court for the District of Columbia. Instead, they are limited to appealing decisions of the Office to the Federal Circuit.

When the optional *inter partes* reexamination alternative was added to the reexamination statute, the legislation did not provide the parties an avenue of judicial review by civil action under 35 U.S.C. 145 in *inter partes* reexamination proceedings (nor is this avenue available for *ex parte* reexamination of a patent that issued from an original application filed on or after November 29, 1999; see MPEP § 2279). Federal District Court proceedings are generally complicated and time consuming and, therefore, are contrary to the goal of expeditious resolution of reexamination proceedings. Accordingly, the first sentence of 35 U.S.C. 145 was amended to read: "An **applicant** dissatisfied with the decision of the Board of Patent Appeals and Interferences in an appeal under **134(a)** of this title may, unless appeal has been taken to the United States Court of Appeals for the Federal Circuit, have remedy by civil action against the Director in the United States District Court for the District of Columbia if commenced within such time after such decision, not less than sixty days, as the Director appoints." (emphasis added). Note that 35 U.S.C. 134 part (a), which **is** included by 35 U.S.C. 145 is limited to applicants and applications, while 35 U.S.C. 134 parts (b) and (c) which **are not** included by 35 U.S.C. 145 are directed to reexamination and the patent owner and the third party requester, respectively.

2684 Information Material to Patentability in Reexamination Proceeding [Added R-2]

37 CFR 1.933. Patent owner duty of disclosure in inter partes reexamination proceedings.

(a) Each individual associated with the patent owner in an *inter partes* reexamination proceeding has a duty of candor and good faith in dealing with the Office, which includes a duty to disclose to the Office all information known to that individual to be material to patentability in a reexamination proceeding as set forth in § 1.555(a) and (b). The duty to disclose all information known to be material to patentability in an *inter partes* reexamination proceeding is deemed to be satisfied by filing a paper in compliance with the requirements set forth in § 1.555(a) and (b).

(b) The responsibility for compliance with this section rests upon the individuals designated in paragraph (a) of this section, and no evaluation will be made by the Office in the reexamination proceeding as to compliance with this section. If questions of compliance with this section are raised by the patent owner or the third party requester during a reexamination proceeding, they will be noted as unresolved questions in accordance with § 1.906(c).

Duty of disclosure considerations as to *inter partes* reexamination proceedings parallel those of *ex parte* reexamination proceedings. In this regard, 37 CFR 1.933 incorporates the provisions of 37 CFR 1.555(a) and (b). See MPEP § 2280 for a discussion of the duty of disclosure in reexamination.

Any fraud practiced or attempted on the Office or any violation of the duty of disclosure through bad faith or intentional misconduct results in noncompliance with 37 CFR 1.555(a). This duty of disclosure is consistent with the duty placed on patent applicants by 37 CFR 1.56. Any such issues raised by the patent owner or the third party requester during an *inter partes* reexamination proceeding will merely be noted as unresolved questions under 37 CFR 1.906(c).

2685 No Interviews on Merits in *Inter Partes* Reexamination Proceedings [R-7]

37 CFR 1.955. Interviews prohibited in inter partes reexamination proceedings.

There will be no interviews in an *inter partes* reexamination proceeding which discuss the merits of the proceeding.

Pursuant to 37 CFR 1.955, an interview which discusses the merits of a proceeding will not be permitted in *inter partes* reexamination proceedings. Thus, in an *inter partes* reexamination proceeding, there will be no *inter partes* interview as to the substance of the proceeding. Also, there will be no separate *ex parte* interview as to the substance of the proceeding with either the patent owner or the third party requester. Accordingly, where a party requests any information as to the merits of a reexamination proceeding, the examiner will not conduct a personal or telephone interview with that party to provide the information. Further, an informal amendment by the patent owner will not be accepted, because that would be tantamount to an *ex parte* interview. All communications between the Office and the patent owner (and the third party requester) which are directed to the merits of the proceeding must be in writing and filed with the Office for entry into the record of the proceeding.

Questions on strictly procedural matters may be discussed with the parties. The guidance to follow is that any information which a person could obtain *by reading the file* (which is open to the public) is procedural, and it *may be discussed*. Matters *not available from a reading of the file* are considered as relating to the merits of the proceeding, and *may not be discussed*. Thus, for example, a question relating to when the next Office action will be rendered is improper as it relates to the merits of the proceeding (because this information cannot be obtained from a reading of the file).

>The Office may, **in its sole discretion**, telephone a party as to matters of completing or correcting the record of a file, where the subject matter discussed does not go to the merits of the reexamination proceeding. This informal telephone call may take the form of inquiring as to whether a timely response, timely appeal, etc., was filed with the Office, so as to make certain that a timely response, timely appeal, etc. has not been misdirected within the Office. This may also take the form of telephoning to obtain a paper stated to have been attached to, or included in, a filing, but not found to be present in the record. Likewise, calls to obtain a certificate of service, or to have a party re-submit a paper (e.g., where it was submitted via an improper means), may be made by the Office. Any such telephone call IS NOT TO BE MADE by the examiner, or any other Office employee who addresses the proceeding on its merits. Thus, a paralegal or Legal Instruments Examiner (or support staff in general), may make such a telephone call. If the

party is reached by telephone and the matter is resolved, then the next Office communication as may be appropriate (e.g., Office action, NIRC) *>should< will make the telephone call of record. Any statement of the telephone call in the next communication must provide that "the content of the telephone call was limited solely to" the non-merits matter discussed, and "nothing else was discussed." Such a telephone call is not to be recorded on an interview summary record form.

It is also permitted for a paralegal or Legal Instruments Examiner (or support staff in general) to call a requester to discuss a request that fails to comply with the filing date requirements for filing a reexamination request, because there is no reexamination proceeding yet, and 37 CFR 1.955 proscribes interviews in "*inter partes* reexamination proceedings."<

2686 Notification of Existence of Prior or Concurrent Proceedings and Decisions Thereon [R-7]

37 CFR 1.985. Notification of prior or concurrent proceedings in inter partes reexamination.

(a) In any *inter partes* reexamination proceeding, the patent owner shall call the attention of the Office to any prior or concurrent proceedings in which the patent is or was involved, including but not limited to interference, reissue, reexamination, or litigation and the results of such proceedings.

(b) Notwithstanding any provision of the rules, any person at any time may file a paper in an *inter partes* reexamination proceeding notifying the Office of a prior or concurrent proceedings in which the same patent is or was involved, including but not limited to interference, reissue, reexamination, or litigation and the results of such proceedings. Such paper must be limited to merely providing notice of the other proceeding without discussion of issues of the current *inter partes* reexamination proceeding. Any paper not so limited will be returned to the sender.

It is important for the Office to be aware of any prior or concurrent proceedings in which a patent undergoing *inter partes* reexamination is or was involved, such as interferences, reissues, reexaminations or litigations, and any results of such proceedings. In accordance with 37 CFR 1.985, the patent owner is required to provide the Office with information regarding the existence of any such proceedings, and the results thereof, if known. Ordinarily, while an *inter partes* reexamination proceeding is pending, third party submissions filed after the date of the order are not entered into the reexamination file or the patent file, unless the third party is a third party reexamination requester. However, in order to ensure a complete file, with updated status information regarding prior or concurrent proceedings regarding the patent under reexamination, the Office will, at any time, accept from any parties, for entry into the reexamination file, copies of notices of suits and other proceedings involving the patent and copies of decisions or papers filed in the court from litigations or other proceedings involving the patent. >Such decisions include final court decisions (even if the decision is still appealable), decisions to vacate, decisions to remand, and decisions as to the merits of the patent claims. Non-merit decisions on motions such as for a new venue, a new trial/discovery date, or sanctions will not be entered into the patent file, and will be expunged from the patent file by closing the appropriate paper if they were entered before discovery of their nature. Further, papers filed in the court from litigations or other proceedings involving the patent will not be entered into the record (and will be expunged if already entered) if they provide a party's arguments, such as a memorandum in support of summary judgment. If the argument has an entry right in the reexamination proceeding, it must be submitted via the vehicle (provision(s) of the rules) that provides for that entry right. It is not required nor is it permitted that parties submit copies of copending reexamination proceedings and applications (which copies can be mistaken for a new request/filing); rather, submitters may provide a notice identifying the application/proceeding number and its status. Any submission that is not permitted entry will be returned, expunged, or discarded, at the sole discretion of the Office.<

It is to be noted that if the Office, in its sole discretion, deems the volume of the papers filed from litigations or other proceedings to be too extensive/lengthy, the Office may return>, expunge or discard, at its sole discretion,< all or part of the submission. In such an instance, a party may limit the submission in accordance with what is deemed relevant, and resubmit the papers. Persons making such submissions must limit the submissions to the notification, and must not include further arguments or information. Where a submission is not limited to bare notice of the prior or concurrent proceedings (in which a patent undergoing reexamination is or was involved), the submission will be returned by the Office. It is to

be understood that highlighting of certain text by underlining, fluorescent marker, etc., goes beyond bare notice of the prior or concurrent proceedings. Any proper submission pursuant to 37 CFR 1.985 will be promptly entered into the record of the reexamination file. See MPEP § 2686.04 for Office investigation for prior or concurrent litigation.

2686.01 Multiple Copending Reexamination Proceedings [R-7]

37 CFR 1.989. Merger of concurrent reexamination proceedings.

(a) **>If any reexamination is ordered while a prior *inter partes* reexamination proceeding is pending for the same patent and prosecution in the prior *inter partes* reexamination proceeding has not been terminated, a decision may be made to merge the two proceedings or to suspend one of the two proceedings. Where merger is ordered, the merged examination will normally result in the issuance and publication of a single reexamination certificate under § 1.997.<

(b) An *inter partes* reexamination proceeding filed under § 1.913 which is merged with an *ex parte* reexamination proceeding filed under § 1.510 will result in the merged proceeding being governed by §§ 1.902 through 1.997, except that the rights of any third party requester of the *ex parte* reexamination shall be governed by §§ 1.510 through 1.560.

This section discusses multiple copending reexamination requests which are filed on the same patent, where at least one of the multiple copending reexamination requests is an *inter partes* request. If all of the multiple copending reexamination requests are *ex parte* requests, see MPEP § 2283.

Initially, it is appropriate to point out who can file a second or subsequent request for reexamination while a first reexamination proceeding is pending.

Case (1) - The earlier (pending) reexamination is an *inter partes* reexamination:

(1)(a) The subsequent request is an *inter partes* reexamination request. Pursuant to 35 U.S.C. 317(a), once an order for *inter partes* reexamination has been issued in a first reexamination proceeding, neither the third party requester, nor its privy, may file a subsequent request for an *inter partes* reexamination of the patent until an *inter partes* reexamination certificate is issued, unless authorized by the Director of the USPTO. In addition, the patent owner is not entitled to file any *inter partes* reexamination request (see MPEP § 2612). Thus, only a third party who is not a party to the earlier pending *inter partes* reexamination proceeding (nor a privy) can file the subsequent *inter partes* reexamination request.

(1)(b) The subsequent request is an *ex parte* reexamination request. Any party (including the patent owner) can file the subsequent *ex parte* reexamination request.

Case (2) - The earlier (pending) reexamination is an *ex parte* reexamination:

(2)(a) The subsequent request is an *inter partes* reexamination request. Any party other than the patent owner can file the subsequent *inter partes* reexamination request.

(2)(b) The subsequent (later) request is an *ex parte* reexamination request. Any party (including the patent owner) can file the subsequent *ex parte* reexamination request.

In order for the second or subsequent request to be granted, a substantial new question of patentability must be raised by the art (patents and/or printed publications) cited in the second or subsequent request for reexamination. See MPEP § 2640 regarding whether a substantial new question of patentability is raised by the art cited in a second or subsequent request filed while a first reexamination proceeding is pending.

If the second or subsequent request is granted, the decision on whether or not to merge the proceedings will be made by the Office of Patent Legal Administration. (OPLA). No decision on merging the reexaminations should be made until such time as reexamination **>has been ordered for both proceedings, and there is no longer an opportunity for filing a patent owner's statement and/or requester's reply (if an *ex parte* reexamination is one of the proceedings).<

I. WHEN PROCEEDINGS ARE MERGED

**>Where a second request for reexamination is filed and reexamination is ordered, and a first reexamination proceeding is pending, the proceedings will be merged where the Office (in its discretion) deems it appropriate to do so, to facilitate the orderly handling of the proceedings. However, a decision not to merge is within the sole discretion of the Office to facilitate/carry out the statutory mandate of 35 U.S.C. 314(c) to conduct reexamination proceedings with "special dispatch."

Where a second request for reexamination is filed while a first reexamination proceeding is pending, the second request is decided based on the claims in effect

at the time of the determination (see 37 CFR 1.923), and if reexamination is ordered (and the statement-reply period expires for any *ex parte* reexamination proceeding), the question of merger will then be considered. If the proceedings are merged, the< prosecution will be conducted at the most advanced point possible for the first proceeding. Thus, if a final rejection (a Right of Appeal Notice) has been issued in the first proceeding, prosecution will ordinarily be reopened to consider the substantial new question of patentability presented in the second request unless the examiner concludes that no new rejection or change of position is warranted. Also, the patent owner will be provided with an opportunity to respond to any new rejection in a merged reexamination proceeding prior to an Action Closing Prosecution (ACP) being issued. See MPEP § 2671.02.

Where the reexamination proceedings are merged, a single certificate will be issued >and published< based upon the merged proceedings, 37 CFR 1.989(a).

II. WHEN PROCEEDING IS SUSPENDED

It may also be desirable in certain situations to suspend one of the proceedings for a short and specified period of time. For example, a suspension of a first reexamination proceeding may be issued to allow time for the decision on the second request. Further, after the second proceeding has been ordered, it may be desirable to suspend the second proceeding prior to merging, where the first proceeding is presently on appeal before a Federal court to await the court's decision prior to merging. A suspension will only be granted in exceptional (extraordinary) instances because of the statutory requirements that examination proceed with "special dispatch", and the express written approval by the OPLA must be obtained. Suspension will not be granted when there is an outstanding Office action.

III. MERGER OF REEXAMINATIONS

The following guidelines should be observed when two requests for reexamination directed to a single patent have been filed:

The second request (i.e., Request 2) should be processed as quickly as possible, and assigned to the same examiner to whom the first request (i.e., Request 1) is assigned. Request 2 should be decided immediately after consultation with the Reexamination Legal Advisor (RLA). If Request 2 is denied, prosecution of Request 1 should continue. If Request 2 is granted, a first Office action on the merits will not be sent with the order granting reexamination in the second proceeding. Instead, the order will indicate that an Office action will follow in due course. MPEP § 2660. The order granting the second proceeding will be prepared, reviewed by the **>Central Reexamination Unit (CRU) Supervisory Patent Examiner (SPE)< and then **hand-carried** directly to the **>CRU support staff. The< order will be mailed specially, and the two proceedings will be forwarded to OPLA for preparation of a decision whether to merge the two proceedings.

A decision to merge the reexamination proceedings should include a requirement that the patent owner maintain identical claims in both files. It will further require that responses/comments by the patent owner and the third party requester(s) must consist of a single response/comment paper, addressed to both files, filed in duplicate each bearing a signature, for entry in both files. The same applies to any other paper filed in the merged proceeding. The decision will point out that both files will be maintained as separate complete files. Where the claims are already the same in both reexamination files, the decision on merger will indicate at its conclusion that an Office action will be mailed in due course, and that the patent owner need not take any action at present. Where the claims are not the same in both files, the decision will state at its conclusion that patent owner is given one month to provide an amendment to make the claims the same in each file. After the decision of merger is prepared and signed, the decision will be hand-carried directly to the CRU, where the decision will be mailed specially.

Where the merger decision indicates that an Office action will follow, the merged proceeding is immediately returned to the examiner, to issue an Office action, after the CRU mailing and processing of the decision. Where the merger decision indicates that the patent owner is given one month to provide an amendment to make the claims the same in each file (identical amendments to be placed in all files), the CRU will retain jurisdiction over the merged reexamination proceeding to await submission of the amendment or the expiration of the time to submit the amendment. After the amendment is received and

processed by the CRU, or the time for submitting the amendment expires, the merged proceeding will be returned to the examiner, to issue an Office action.

Once the merged proceeding is returned to the examiner for issuance of an Office action, the examiner should after consultation with the RLA, prepare the action at the most advanced point possible for the first proceeding. Thus, if the first proceeding is ready for an Action Closing Prosecution (ACP) and the second proceeding does not provide any new information which would call for a new ground of rejection, the examiner should issue an ACP for the merged proceeding using the guidance for the prosecution stage set forth below.

If the decision on the reexamination request has not yet been made in Request 1 and Request 1 is grantable, it should be processed to the point where an order granting reexamination is mailed. *An Office action should not be mailed with the order.* Then, Request 1 is normally held until Request 2 is ready for the prosecution stage following an order granting reexamination, or until Request 2 is denied. Request 2 should be determined on its own merits *without reference* in the decision to Request 1. As before, an Office action should not be mailed with the order in Request 2.

A. The Prosecution Stage, After Merger

>Where merger is ordered, the patent owner is required to maintain identical amendments in the merged reexamination files for purposes of the merged proceeding. The maintenance of identical amendments in the files is required as long as the reexamination proceedings remain merged. Where identical amendments are not present in the reexamination files at the time merger is ordered, the patent owner will be required to submit an appropriate "housekeeping" amendment placing the same amendments in the proceedings. This may be accomplished by amending one or more of the proceedings, as appropriate. The patent owner must not address any issue of patentability in the housekeeping amendment. In the event that an amendment to make the claims the same in each file is required by the merger decision (identical amendments to be placed in all files) but is not timely submitted, any claim that does not contain identical text in all of the merged proceedings should be rejected under 35 U.S.C. 112, paragraph 2, as being indefinite as to the content of the claim, and thus failing to particularly point out the invention.<

When prosecution is appropriate in merged proceedings, a single combined examiner's action will be prepared. Each action will contain the control number of the two proceedings on every page. A single action cover form (having both control numbers penned in at the top) will be provided by the examiner to the clerical staff. The clerical staff will copy the action cover form, and then use the PALM printer to print the appropriate data on the original for the first request, and on the copy for the second request. Each requester will receive a copy of the action and both action cover forms, with the transmission form PTOL-2070 placed on top of the package. The patent owner will get a copy of both action cover forms and the action itself.

When a "Notice of Intent To Issue *Inter Partes* Reexamination Certificate" (NIRC) is appropriate, plural notices will be printed. Both reexamination files will then be processed. The CRU should prepare the file of the concurrent proceedings in the manner specified in MPEP § 2687, before release to Office of *>Data Management< (via the CRU).

The above guidance should be extended to situations where more than two requests for reexamination are filed for a single patent. The guidance should also be extended to situations where one of the requests is a request for *ex parte* reexamination. However, where an *ex parte* reexamination is to be included in the merger, allowance must be made for the statement and reply periods provided for in an *ex parte* reexamination after the order granting reexamination is issued. If all the reexamination proceedings to be merged are *ex parte* reexaminations, the present section does not apply, but rather see MPEP § 2283.

IV. PROCEEDINGS NOT MERGED

Pursuant to 35 U.S.C. 314(c), "[u]nless otherwise provided by the Director for good cause, all *inter partes* reexamination proceedings under this section…shall be conducted with special dispatch within the Office." This statutory provision is grounded on the need for certainty and finality as to the question of patentability raised by the request for reexamination. Thus, if a second request for reexamination **>will unduly delay< the first reexamination proceeding, the two proceedings generally will not be merged. If the Office were to merge the two proceedings, the first

reexamination proceeding would need to be withdrawn from its **>place in the process,< thus delaying, instead of advancing, prosecution. This would run contrary to the statutory "special dispatch" requirement of 35 U.S.C. 314 and its intent. On the other hand, if the Office does not merge, the first reexamination proceeding can be concluded, and any substantial new question of patentability raised by the second reexamination request can be resolved in the second proceeding, with no delay resulting. The second request is then considered based on the claims in the patent as indicated in the issued reexamination certificate, rather than the original claims of the patent. However, the Office always retains the authority to merge because in some instances, it may be more efficient to merge the two proceedings, which would foster "special dispatch." >The instances where the Office may, or may not, merge an ongoing reexamination proceeding with a subsequent reexamination proceeding, are addressed on a case-by-case basis.<

**

For processing of the second reexamination proceeding, see MPEP § 2295 and § 2695.

V. FEES IN MERGED PROCEEDINGS

Where the proceedings have been merged and a paper is filed which requires payment of a fee (e.g., excess claims fee, extension of time fee, petition fee, appeal fee, brief fee, oral hearing fee), only a single fee need be paid. For example, only one fee need be paid for the patent owner's appellant brief (or that of the third party requester), even though the brief relates to merged multiple proceedings and copies must be filed for each file in the merged proceeding.

VI. PETITION TO MERGE MULTIPLE COPENDING REEXAMINATION PROCEEDINGS

No petition to merge multiple reexamination proceedings is necessary since the Office will generally, *sua sponte*, make a decision as to whether or not it is appropriate to merge the multiple reexamination proceedings. If any petition to merge the proceedings is filed prior to the order to reexamine the second request, it will not be considered but will be returned to the party submitting the same by the OPLA. The decision returning such a premature petition will be made of record in both reexamination files, but no copy of the petition will be retained by the Office. See MPEP § 2667.

The patent owner can file a petition to merge the proceedings at any time after the order to reexamine the second request. A requester of any of the multiple reexamination proceedings may also petition to merge the proceedings at any time after the order to reexamine the second request. A petition to merge the multiple proceedings which is filed by a party other than the patent owner or one of the third party requesters of the reexaminations will not be considered but will be returned to that party by the OPLA. Note that the acceptance of a petition to merge the multiple proceedings at any time after the order to reexamine the second request is contrary to 37 CFR 1.939 since such acceptance can be prior to the issuance of the first Office action. Accordingly, the requirement of 37 CFR 1.939 is hereby waived to the extent that a petition for merger of a reexamination proceeding with a reexamination proceeding or with a reissue (see MPEP § 2686.03) can be submitted after the order to reexamine has been issued in all the reexamination proceedings to be merged. This waiver is made to assure merger at the earliest possible stage.

All decisions on the merits of petitions to merge multiple reexamination proceedings, where at least one of the proceedings is an *inter partes* reexamination, will be made by the OPLA.

Decisions on the merits of petitions to merge multiple reexamination proceedings, where none of the proceedings is an *inter partes* reexamination, will be made by the CRU Director (or by the *>CRU SPE<, if the CRU Director delegates such to the *>CRU SPE<); see MPEP § 2283.

2686.02 Copending Reexamination and Interference Proceedings [R-3]

**>

37 CFR 1.993. Suspension of concurrent interference and inter partes reexamination proceeding.

If a patent in the process of inter partes reexamination is or becomes involved in an interference, the Director may suspend the inter partes reexamination or the interference. The Director will not consider a request to suspend an interference unless a motion under § 41.121(a)(3) of this title to suspend the interference has been presented to, and denied by, an administrative patent judge and the request is filed within ten (10) days of a decision by an administrative patent judge denying the motion

for suspension or such other time as the administrative patent judge may set.

37 CFR 41.8. Mandatory notices.

(a) In an appeal brief (§§ 41.37, 41.67, or 41.68) or at the initiation of a contested case (§ 41.101), and within 20 days of any change during the proceeding, a party must identify:

(1) Its real party-in-interest, and

(2) Each judicial or administrative proceeding that could affect, or be affected by, the Board proceeding.

(b) For contested cases, a party seeking judicial review of a Board proceeding must file a notice with the Board of the judicial review within 20 days of the filing of the complaint or the notice of appeal. The notice to the Board must include a copy of the complaint or notice of appeal. See also §§ 1.301 to 1.304 of this title.

37 CFR 41.102. Completion of examination.

Before a contested case is initiated, except as the Board may otherwise authorize, for each involved application and patent:

(a) Examination or reexamination must be completed, and

(b) There must be at least one claim that:

(1) Is patentable but for a judgment in the contested case, and

(2) Would be involved in the contested case.

37 CFR 41.103. Jurisdiction over involved files.

The Board acquires jurisdiction over any involved file when the Board initiates a contested case. Other proceedings for the involved file within the Office are suspended except as the Board may order.<

A patent being reexamined in an *inter partes* reexamination proceeding may be involved in an interference proceeding with at least one application, where the patent and the application are claiming the same patentable invention, and at least one of the application's claims to that invention are patentable to the applicant. See MPEP *>Chapter 2300<.

The general policy of the Office is that a reexamination proceeding will not be delayed, or stayed, because of an interference or the possibility of an interference. The *>reason< for this policy **>is< the requirement of 35 U.S.C. 314(c) that all reexamination proceedings be conducted with "special dispatch" within the Office. **

In general, the Office will follow the practice of making the required and necessary decisions in the *inter partes* reexamination proceeding and, at the same time, going forward with the interference to the extent desirable. >(See *Shaked v. Taniguchi*, 21 USPQ2d 1289 (Bd. Pat. App. & Inter. 1991), where it was pointed out that neither the reexamination nor the interference will ordinarily be stayed where both proceedings are before the Office.) It is to be noted that 37 CFR 41.103 provides the Board with the flexibility to tailor a specific solution to occurrences where reexamination and interference proceedings for the same patent are copending, as such occurrences may arise.< Decisions in the interference will take into consideration the status of the reexamination proceeding and what is occurring therein. The decision as to what actions are taken in the interference will, in general, be taken in accordance with normal interference practice.

**>Although< a patent being reexamined via a reexamination proceeding may become involved in an interference proceeding, the reexamination proceeding itself can never be involved in an interference proceeding. See 35 U.S.C. 135(a) which states that "[w]henever an application is made for a patent which, in the opinion of the Director, would interfere with any pending application, or with any unexpired patent, an interference may be declared" (emphasis added). The reexamination proceeding is neither an application nor a patent.

I. ATTEMPTING TO PROVOKE AN INTERFERENCE WITH A PATENT INVOLVED IN A REEXAMINATION PROCEEDING

See MPEP § 2284 for a discussion of the situation where an amendment seeking to provoke an interference with a patent involved in a reexamination proceeding is filed in a pending application. The practice and procedure in this area as to *inter partes* reexamination proceedings parallels that of *ex parte* reexamination proceedings.

II. MOTION TO SUSPEND INTERFERENCE UNDER 37 CFR *>41.121(a)(3)< PENDING THE OUTCOME OF A REEXAMINATION PROCEEDING

A >miscellaneous< motion under 37 CFR *>41.121(a)(3)< to suspend an interference pending the outcome of a reexamination proceeding may be made at any time during the interference by any party thereto. >See 37 CFR 41.123(b) for the proper procedure.< The motion must be presented to the Administrative Patent Judge (APJ) who will decide the motion based on the particular fact situation. However, >suspension is not favored. Normally,< no consideration will be given such a motion unless and

until a reexamination order is issued, nor will suspension of the interference normally be permitted until after any motions have been disposed of >in the interference proceeding<. If the motion under 37 CFR *>41.121(a)(3)< is denied by the APJ, a request to stay the interference may be made to the Director of the USPTO under 37 CFR 1.993. >A request to stay an interference under 37 CFR 1.993 will be decided by the Chief Administrative Patent Judge of the Board.<
**>

III. < REQUEST FOR REEXAMINATION FILED DURING INTERFERENCE

In view of the provisions of 37 CFR 1.913, "[a]ny person may, at any time during the period of enforceability of a patent" file a request for *inter partes* reexamination. Under 37 CFR *>41.8(a)<, the patent owner must notify the Board that a request for reexamination was filed within ***>twenty<** days of receiving notice of the request having been filed. Such requests for reexamination will be processed in the normal manner. No delay, or stay, of the reexamination will occur where the third party requester is not a party to the interference, or where the requester is a party to the interference but does not timely petition for a stay or delay. If the examiner orders reexamination pursuant to 37 CFR 1.931 and subsequently, in the reexamination proceeding, rejects a patent claim corresponding to a count in the interference, the attention of the *>Board< shall be called to the rejection **.
*>

IV. < PETITION TO STAY REEXAMINATION PROCEEDING BECAUSE OF INTERFERENCE

Any petition to stay an *inter partes* reexamination proceeding, because of an interference, which is filed prior to the first Office action in the reexamination proceeding will not be considered, but will be returned to the party submitting the petition. See 37 CFR 1.939 and MPEP § 2625. The decision returning such a premature petition will be made of record in the reexamination file, but no copy of the petition will be retained by the Office. A petition to stay the reexamination proceeding because of the interference may be filed by the patent owner after the first Office action in the reexamination proceeding. If a party to the interference, other than the patent owner, is also a requester of the reexamination, that party may also petition to stay the reexamination proceeding after the first Office action. If the party to the interference other than patent owner is not the reexamination requester, any petition by that party is improper under 37 CFR 1.905 and will not be considered. Any such improper petitions will be returned to the party submitting the same. Premature petitions to stay the reexamination proceedings, i.e., those filed prior to the first Office action in the reexamination proceeding, will be returned by a Legal Advisor of the Office of Patent Legal Administration (OPLA) as premature. Petitions to stay filed subsequent to the date of the first Office action in the reexamination proceeding will be referred to the OPLA for decision by a Senior Legal Advisor of that Office. All decisions on the merits of petitions to stay a reexamination proceeding because of an interference will be made in the OPLA.
*>

V. < ACTION IN INTERFERENCE FOLLOWING REEXAMINATION

If one or more claims of a patent which is involved in an interference are canceled or amended by the issuance >and publication< of a reexamination certificate, **>the Board must be promptly notified<.

Upon issuance >and publication< of the reexamination certificate, the patent owner must notify the *>Board< of such issuance.

2686.03 Copending Reexamination and Reissue Proceedings [R-7]

37 CFR 1.991. Merger of concurrent reissue application and inter partes reexamination proceeding.

**>If a reissue application and an *inter partes* reexamination proceeding on which an order pursuant to § 1.931 has been mailed are pending concurrently on a patent, a decision may be made to merge the two proceedings or to suspend one of the two proceedings. Where merger of a reissue application and an *inter partes* reexamination proceeding is ordered, the merged proceeding will be conducted in accordance with §§ 1.171 through 1.179, and the patent owner will be required to place and maintain the same claims in the reissue application and the *inter partes* reexamination proceeding during the pendency of the merged proceeding. In a merged proceeding the third party requester may participate to the extent provided under §§ 1.902 through 1.997 and 41.60 through 41.81, except that such participation shall be limited to

issues within the scope of *inter partes* reexamination. The examiner's actions and any responses by the patent owner or third party requester in a merged proceeding will apply to both the reissue application and the *inter partes* reexamination proceeding and be physically entered into both files. Any *inter partes* reexamination proceeding merged with a reissue application shall be concluded by the grant of the reissued patent. <

37 CFR 1.937. Conduct of inter partes reexamination.

(a) All *inter partes* reexamination proceedings, including any appeals to the Board of Patent Appeals and Interferences, will be conducted with special dispatch within the Office, unless the Director makes a determination that there is good cause for suspending the reexamination proceeding.

*****

37 CFR 1.995. Third party requester's participation rights preserved in merged proceeding.

When a third party requester is involved in one or more proceedings, including an *inter partes* reexamination proceeding, the merger of such proceedings will be accomplished so as to preserve the third party requester's right to participate to the extent specifically provided for in these regulations. In merged proceedings involving different requesters, any paper filed by one party in the merged proceeding shall be served on all other parties of the merged proceeding.

*37 CFR 1.997. **>Issuance and publication of inter partes reexamination certificate concludes inter partes reexamination proceeding.<*

(a) **>To conclude an *inter partes* reexamination proceeding, the Director will issue and publish an *inter partes* reexamination certificate in accordance with 35 U.S.C. 316 setting forth the results of the *inter partes* reexamination proceeding and the content of the patent following the *inter partes* reexamination proceeding.<

*****

(d) **>If a certificate has been issued and published which cancels all of the claims of the patent, no further Office proceedings will be conducted with that patent or any reissue applications or any reexamination requests relating thereto.<

(e) If the *inter partes* reexamination proceeding is terminated by the grant of a reissued patent as provided in § 1.991, the reissued patent will constitute the reexamination certificate required by this section and 35 U.S.C. 316.

*****

37 CFR 1.176. Examination of reissue.

(a) A reissue application will be examined in the same manner as a non-reissue, non-provisional application, and will be subject to all the requirements of the rules related to non-reissue applications. Applications for reissue will be acted on by the examiner in advance of other applications.

*****

The general policy of the Office is that the examination of a reissue application and an *inter partes* reexamination proceeding will not be conducted separately at the same time as to a particular patent. The reason for this policy is to permit timely resolution of both the reissue and the reexamination to the extent possible and to prevent inconsistent, and possibly conflicting, amendments from being introduced into the two files on behalf of the patent owner. **>If< both a reissue application and a reexamination proceeding are pending concurrently on a patent, a decision will normally be made to merge the reissue application examination and the reexamination or to stay one of the two. See *In re Onda*, 229 USPQ 235 (Comm'r Pat. 1985). The decision as to whether the reissue application examination and the reexamination proceeding are to be merged, or which of the two (if any) is to be stayed, is made in the Office of Patent Legal Administration (OPLA).

Where a reissue application and a reexamination proceeding are pending concurrently on a patent, the patent owner, i.e., the reissue applicant, has a responsibility to notify the Office of such. 37 CFR 1.178(b), 1.565(a), and 1.985. The patent owner should file in the reissue application, as early as possible, a Notification of Concurrent Proceedings pursuant to 37 CFR 1.178(b) in order to notify the Office in the reissue application of the existence of the reexamination proceeding on the same patent. See MPEP § 1418. In addition, the patent owner should file in the reexamination proceeding, as early as possible, a Notification of Concurrent Proceedings pursuant to 37 CFR 1.565(a) or 1.985 (depending on whether the reexamination proceeding is an *ex parte* reexamination proceeding or an *inter partes* reexamination proceeding) to notify the Office in the reexamination proceeding of the existence of the two concurrent proceedings.

I. TIME FOR MAKING DECISION ON MERGING OR STAYING THE PROCEEDINGS

A decision whether or not to merge the examination of a reissue application and an *inter partes* reexamination proceeding, or to stay one of the two, will not be made prior to the mailing of the order to reexamine the patent pursuant to 37 CFR 1.931. Until such time as the reexamination is ordered, the examination of the reissue application will proceed. A determination

on the request for reexamination should not be delayed despite the existence of a copending reissue application, since 35 U.S.C. 312(a) requires a determination within 3 months following the filing date of the request. See MPEP § 2641. If the decision on the request denies reexamination (MPEP § 2647), the examination of the reissue application should be continued. If reexamination is to be ordered (MPEP § 2646), the signed order should be (after review by the **>Central Reexamination Unit (CRU) Supervisory Patent Examiner (SPE)< promptly forwarded to the **>CRU< support staff for mailing; no first Office action will accompany the decision ordering reexamination. At the same time that the signed order is forwarded to OPLA, (A) OPLA should be notified that the proceedings are ready for consideration of merger, and (B) if any of the reexamination file, the reissue application, and the patent file are paper files, they should be hand delivered to the OPLA.

If a reissue application is filed during the pendency of a reexamination proceeding, the OPLA should be notified, as promptly as possible after the reissue application reaches the *>Technology Center (TC)<, that the proceedings are ready for consideration of merger. If any of the reexamination file, the reissue application, and the patent file are paper files, they should be hand delivered to the OPLA at the time of the notification to OPLA.

The decision on whether or not to merge the reissue application examination and the reexamination proceeding or which (if any) is to be stayed (suspended), will generally be made as promptly as possible after receipt of the notification to OPLA, and delivery of all the paper files to the OPLA.

Until a decision is mailed merging the reissue application examination and the reexamination proceeding, or staying one of them, prosecution in the reissue application and the reexamination proceeding will continue and be conducted simultaneously, but separately.

The Office may in certain situations issue a certificate at the termination of the prosecution of a reexamination proceeding, even if a copending reissue application or another reexamination request has already been filed.

II. CONSIDERATIONS IN DECIDING WHETHER TO MERGE THE REISSUE AND REEXAMINATION OR WHETHER TO STAY ONE OF THEM

The decision on whether to merge the reissue application examination and reexamination proceeding, or stay one of them, will be made on a case-by-case basis. **>The decision to merge, or not to merge, is within the sole discretion of the Office to facilitate/carry out the orderly operation of the Office in addressing the proceedings. The status of the reissue application and the reexamination proceeding will be taken into account in the decision as to whether merger will be ordered, or one of the two proceedings stayed.< Where there is "good cause" to stay the reexamination proceeding, the Director may do so pursuant to 35 U.S.C. 314(c). **

A. Reissue About To Issue, Reexamination Requested

If the reissue patent will issue before the determination on the reexamination request must be made, the determination on the request should normally be made after the granting of the reissue patent; and then the determination should be made on the basis of the claims in the reissue patent. The reexamination, if ordered, would then be based on the reissue patent claims rather than the original patent claims. Since the reissue application would no longer be pending, the reexamination would be processed in a normal manner.

Where a reissue patent has been issued, the determination on the request for reexamination should specifically point out that the determination has been made on the claims of the reissue patent and not on the claims of the original patent. Any amendment made in the reexamination proceeding should treat the changes made by the reissue as the text of the patent, and all bracketing and underlining made with respect to the patent **as changed by the reissue**. Note that the reissue claims used as the starting point in the reexamination proceeding must be presented in the reexamination proceeding as a "clean copy." Thus, words bracketed in the reissue patent claim(s) would not appear at all in the reexamination clean copy of the claim(s). Also, words that were added via the reissue patent will appear in italics in the reissue patent, but

must appear in plain format in the reexamination clean copy of the claim(s).

If a reissue patent issues on the patent under reexamination after reexamination is ordered, the next action from the examiner in the reexamination should point out that further proceedings in the reexamination will be based on the claims of the reissue patent and not on the patent surrendered. Form paragraph 22.05 may be used in the Office action.

¶ *22.05 Reexamination (Ex Parte or Inter Partes) Based on Reissue Claims*

In view of the surrender of original Patent No. **[1]** and the granting of Reissue Patent No. **[2]** which issued on **[3]**, all subsequent proceedings in this reexamination will be based on the reissue patent claims.

Where the reissue patent has issued prior to the filing of a request for reexamination of the original patent, see MPEP § 2640.

B. Reissue Pending, Reexamination Request Filed

Where a reissue patent will not be granted prior to the expiration of the 3-month period for making the determination on the reexamination request, a decision will be made *after an order to reexamine is issued* as to whether the reissue application examination and the reexamination proceeding are to be merged, or which of the two (if any) is to be stayed. In this situation, no first Office action will have accompanied the order for reexamination.

In making a decision on whether or not to merge the reissue application examination and the reexamination proceeding, consideration will be given as to whether issues are raised in the reissue application that would not be proper for consideration in reexamination and/or not be proper for comment by the reexamination third party requester. If such issues are raised, merger would ordinarily **not** be ordered, and one of the two proceedings stayed. Consideration will also be given to the status of the reissue application examination at the time the order to reexamine the patent pursuant to 37 CFR 1.931 is mailed. For example, if the reissue application is on appeal to the Board of Patent Appeals and Interferences (Board) or to the courts, that fact would be considered in making a decision whether to merge the reissue application examination and the reexamination proceeding or stay one of them. See *In re Scragg*, 215 USPQ 715 (Comm'r Pat. 1982), *In re Stoddard*, 213 USPQ 386 (Comm'r Pat. 1982).

If merger of the reissue application examination and the reexamination proceeding is ordered, the order merging them will also require that the patent owner place the same claims in the reissue application and in the reexamination proceeding for purposes of the merger. The decision to merge may require an amendment to be filed by the patent owner to provide identical sets of claims, within a specified time set in the decision to merge.

If merger would be appropriate, but the examination of the reissue application has progressed to a point where a merger is not desirable at that time, then the reexamination proceeding will generally be stayed until the reissue application examination is complete on the issues then pending. After completion of the examination on the issues then pending in the reissue application examination, the stay of the reexamination proceeding will be removed. The proceedings would be merged if the reissue application is pending, or the reexamination proceeding will be conducted separately if the reissue application has become abandoned. The reissue application examination would be reopened, if necessary, for merger of the reexamination proceeding therewith. If a stay of a reexamination proceeding has been removed following a reissue application examination, the first Office action will set a shortened statutory period for response of one month or thirty days (whichever is longer) unless a longer period for response clearly is warranted by the nature of the examiner's action. The second Office action will normally be final and will also set a one month or thirty days period for response. These shortened periods are considered necessary to prevent undue delay in concluding the proceedings and also to proceed with "special dispatch" in view of the earlier stay.

If the reissue application examination and reexamination proceedings are merged, the issuance of the reissue patent will also serve as the *inter partes* reexamination certificate under 37 CFR 1.997, and the reissue patent will so indicate.

C. Reexamination Proceedings Underway, Reissue Application Filed

When a reissue application is filed after an *inter partes* reexamination request has been filed, the

OPLA should be notified, as promptly as possible after the reissue application reaches the TC. A determination will be made as to whether reexamination should be ordered. If reexamination is ordered, no first Office action will accompany the decision ordering reexamination. The order and any of the files that are paper files should then be hand delivered to the OPLA.

Where reexamination has already been ordered prior to the filing of a reissue application, the OPLA should be notified, as promptly as possible after the reissue application reaches the TC, that the proceedings are ready for consideration of merger. If any of the reexamination file, the reissue application, and the patent file are paper files, they should be hand delivered to the OPLA at the time of the e-mail notification to OPLA.

In making a decision on whether or not to merge the reissue application examination and the reexamination proceeding, consideration will be given as to whether issues are raised in the reissue application that would not be proper for consideration in reexamination and/or not be proper for comment by the reexamination third party requester. If such issues are raised, merger would ordinarily **not** be ordered, and one of the two proceedings stayed. In addition, consideration will also be given to the status of the reexamination proceeding. For example, if the reexamination proceeding is on appeal to the Board or to the Court of Appeals for the Federal Circuit, or a Notice of Intent to Issue a Reexamination Certificate was issued for the reexamination proceeding, that fact would be considered in making a decision whether to merge the reissue application examination and the reexamination proceeding or stay one of them.

D. Examiner Assignment

With respect to the appropriate examiner assignment of the merged reexamination proceeding and the reissue application examination, see MPEP § 2636.

III. CONDUCT OF MERGED REISSUE AND REEXAMINATION PROCEEDING

The decision ordering merger will set forth the practice and procedure to be followed in the examination and prosecution of the merged reissue and *inter partes* reexamination proceeding. Any questions as to the practice and procedure set forth should be referred to the OPLA Reexamination Legal Advisor (RLA) assigned to the *inter partes* reexamination proceeding that is merged with the reissue application. In addition, the examiner will consult with the RLA assigned to the *inter partes* reexamination prior to issuing any Office action in the merged proceeding, in the same manner as he or she would consult with the RLA in an *inter partes* reexamination proceeding that has not been merged.

>Where merger is ordered, the patent owner is required to maintain identical amendments in the reissue application and the reexamination file for purposes of the merged proceeding. The maintenance of identical amendments in both files is required as long as the reissue and reexamination proceedings remain merged. Where identical amendments are not present in both files at the time merger is ordered, the patent owner will be required to submit an appropriate "housekeeping" amendment placing the same amendments in both proceedings. This may be accomplished by amending either of the two proceedings (the reissue application or the reexamination) or both of them, as appropriate. The patent owner must not address any issue of patentability in the housekeeping amendment. Amendments in a merged reexamination/reissue proceeding are submitted under 37 CFR 1.173, in accordance with reissue practice. In the event that an amendment to make the claims the same in each file is required by the merger decision (identical amendments to be placed in all files) but is not timely submitted, any claim that does not contain identical text in all of the merged proceedings should be rejected under 35 U.S.C. 112, paragraph 2, as being indefinite as to the content of the claim, and thus failing to particularly point out the invention.<

IV. *INTER PARTES* REEXAMINATION, *EX PARTE* REEXAMINATION, AND REISSUE APPLICATION FOR THE SAME PATENT

It will sometimes happen that an *inter partes* reexamination, an *ex parte* reexamination and a reissue application will all be copending. In these situations, the OPLA should be notified by, as promptly as possible after the reissue application reaches the TC, that the proceedings are ready for consideration of merger. If any of the reexamination files, the reissue application, and the patent file are paper files, they should be

hand delivered to the OPLA at the time of the notification to OPLA. The three most common examples of this are as follows:

(A) A reissue application was previously merged with an *ex parte* reexamination, and then an *inter partes* reexamination is filed. An order to reexamine is prepared, and the signed order and any paper files should be promptly hand delivered to the CRU for mailing of the order, and then consideration by the OPLA as to whether or not to merge the proceedings. The OPLA should be notified of the hand delivery, and the potential merger consideration.

(B) A reissue application was previously merged with an *inter partes* reexamination, and then a request for *ex parte* reexamination is filed. After an order to reexamine has been issued, the **>TC Quality Assurance Specialist (QAS)< will retain jurisdiction over the merged reexamination proceeding until the patent owner's statement and any reply by the *ex parte* third party requester have been received for the *ex parte* reexamination request, or until the time for filing the same expires. OPLA should then be notified that the proceedings are ready for consideration of merger. If any of the reexamination files, the reissue application, and the patent file are paper files, they should be hand delivered to the OPLA at the time of the notification to OPLA.

(C) An *inter partes* reexamination was merged with an *ex parte* reexamination, and then a reissue application is filed. Once the reissue application is received, OPLA should be promptly notified that the proceedings are ready for consideration of merger. If any of the reexamination files, the reissue application, and the patent file are paper files, they should be hand delivered to the OPLA at the time of the notification to OPLA.

The decision to merge the three proceedings by the OPLA will provide the guidance for conducting the merged proceeding. It is to be noted that the merger will **not** be carried out pursuant to MPEP Chapter 2200. Prosecution prior to the point of merger will remain as-is, in the files.

In the event the *inter partes* reexamination prosecution is terminated and only the *ex parte* reexamination and the reissue application remain, the prosecution will no longer be governed by the present section. Any further prosecution will be governed by MPEP Chapter 2200; specifically see MPEP § 2285.

V. PETITION TO MERGE REISSUE APPLICATION AND *INTER PARTES* REEXAMINATION PROCEEDING OR TO STAY EITHER OF THE TWO BECAUSE OF THE EXISTENCE OF THE OTHER

No petition to merge the reexamination proceeding and the reissue application examination, or stay one of them, is necessary, since the Office will generally, *sua sponte*, make a decision to merge the reexamination proceeding and the reissue application examination or to stay one of them. If any petition to merge the reexamination proceeding and the reissue application examination, or to stay one of them because of the other, is filed prior to the determination (37 CFR 1.923) and the order to reexamine (37 CFR 1.931), it will not be considered, but will be returned to the party submitting the same by the OPLA, regardless of whether the petition is filed in the reexamination proceeding, the reissue application, or both. This is necessary in order to prevent premature papers relating to the reexamination proceeding from being filed. The decision returning such a premature petition will be made of record in both the reexamination file and the reissue application file, but no copy of the petition will be retained by the Office. See MPEP § 2667.

The patent owner ** may file a petition under 37 CFR 1.182 to merge a reexamination proceeding and a reissue application examination, or stay one of them because of the other, after the order to reexamine (37 CFR 1.931), in the event the Office has not acted prior to that date to merge or stay. >The third party requester may file a petition under 37 CFR 1.182 to merge a reexamination proceeding and a reissue application examination, or stay the reexamination proceeding, after the order to reexamine (37 CFR 1.931), in the event the Office has not acted prior to that date to merge or stay. Any such petition under 37 CFR 1.182 filed prior to the initial Office action on the merits must also be filed under 37 CFR 1.183 to waive the requirement of 37 CFR 1.933(b) that no paper shall be filed prior to the initial Office action on the merits of the *inter partes* reexamination proceeding.< Any petition to merge or stay which is filed by a party **other than** the patent owner or the third party

requester of the reexamination will not be considered, but will be returned to that party by the OPLA.

All petitions to merge or stay which are filed by the patent owner or the third party requester subsequent to the date of the order for reexamination will be referred to the OPLA for decision.

VI. FEES IN MERGED PROCEEDINGS

Where the proceedings have been merged and a paper is filed which requires payment of a fee (e.g., excess claims fee, extension of time fee, petition fees, appeal fees, brief fees, oral hearing fees), only a single fee need be paid. For example, only one fee need be paid for an appellant brief, even though the brief relates to merged multiple examinations and copies of the brief are filed for each file in the merger (as is required). As to excess claim fees, reissue practice will control.

VII. INTERVIEWS IN MERGED PROCEEDINGS

Pursuant to 37 CFR 1.955, an interview which discusses the merits of a proceeding is not permitted in an *inter partes* reexamination proceeding. Thus, in a merged proceeding of an *inter partes* reexamination and a reissue application, there will be no *inter partes* interview as to the substance of the proceeding. Also, there will be no separate *ex parte* interview as to the substance of the proceeding with either the patent owner (the reissue applicant) or the third party requester (of the reexamination). Accordingly, where a party requests any information as to the merits of the merged proceeding, the examiner will not conduct a personal or telephone interview with that party to provide the information. Further, an informal amendment by the patent owner (the reissue applicant) will not be accepted, because that would be tantamount to an *ex parte* interview. All communications between the Office and the patent owner (and the third party requester) which are directed to the merits of the merged proceeding must be in writing and filed with the Office for entry into the record of the proceeding.

VIII. EXAMINER'S AMENDMENT TO PLACE PROCEEDING IN CONDITION FOR ALLOWANCE

As pointed out immediately above, interviews, both personal and telephone are **not** permitted in a merged reissue/*inter partes* reexamination proceeding. Thus, the examiner is not permitted to telephone the patent owner/reissue applicant and obtain authorization to make an amendment. Accordingly, the only times that an examiner's amendment can be made in conjunction with a Notice of Allowability are where the patent owner authorization need not be obtained. Such amendments include:

(A) An examiner's amendment to deal with formal matters such as grammar, incorrect spelling, or incorrect number; i.e., matters that do not involve a rejection, do not go to the merits, and do not require the examiner to obtain approval.

(B) An examiner's amendment to change the title.

See also MPEP § 1302.04 *et seq.* as to examiner's amendments not needing authorization by an applicant or a patent owner. Note, however, that in a merged reissue/*inter partes* reexamination proceeding (as opposed to an application *per se*) all such examiner's amendments must be made by **formal examiner's amendment accompanying the Notice of Allowability**, in order to provide notice of the changes made in the patent being reexamined to both the patent owner/reissue applicant and the third party requester.

Note that any change going to the merits of the case (i.e., more than a formal matter) could not be made by examiner's amendment accompanying the Notice of Allowability. Rather, a change going to the merits would require (A) reopening of prosecution with the approval of the CRU Director, (B) an Office action suggesting the change to the patent owner/reissue applicant, (C) a formal amendment submitted by patent owner/reissue applicant, and (D) an opportunity for the third party requester to comment on the patent owner/applicant's submission.

2686.04 Reexamination and Litigation Proceedings [R-7]

35 U.S.C. 314. Conduct of inter partes reexamination proceedings.

*****

(c) SPECIAL DISPATCH.— Unless otherwise provided by the Director for good cause, all inter partes reexamination proceedings under this section, including any appeal to the Board of Patent Appeals and Interferences, shall be conducted with special dispatch within the Office.

35 U.S.C. 317. Inter partes reexamination prohibited.

*****

(b) FINAL DECISION.— Once a final decision has been entered against a party in a civil action arising in whole or in part under section 1338 of title 28, that the party has not sustained its burden of proving the invalidity of any patent claim in suit or if a final decision in an inter partes reexamination proceeding instituted by a third-party requester is favorable to the patentability of any original or proposed amended or new claim of the patent, then neither that party nor its privies may thereafter request an inter partes reexamination of any such patent claim on the basis of issues which that party or its privies raised or could have raised in such civil action or inter partes reexamination proceeding, and an inter partes reexamination requested by that party or its privies on the basis of such issues may not thereafter be maintained by the Office, notwithstanding any other provision of this chapter. This subsection does not prevent the assertion of invalidity based on newly discovered prior art unavailable to the third-party requester and the Patent and Trademark Office at the time of the inter partes reexamination proceedings.

35 U.S.C. 318. Stay of litigation.

Once an order for inter partes reexamination of a patent has been issued under section 313, the patent owner may obtain a stay of any pending litigation which involves an issue of patentability of any claims of the patent which are the subject of the inter partes reexamination order, unless the court before which such litigation is pending determines that a stay would not serve the interests of justice.

37 CFR 1.987. Suspension of inter partes reexamination proceeding due to litigation.

If a patent in the process of *inter partes* reexamination is or becomes involved in litigation, the Director shall determine whether or not to suspend the *inter partes* reexamination proceeding.

37 CFR 1.907. Inter partes reexamination prohibited.

*****

(b) Once a final decision has been entered against a party in a civil action arising in whole or in part under 28 U.S.C. 1338 that the party has not sustained its burden of proving invalidity of any patent claim-in-suit, then neither that party nor its privies may thereafter request *inter partes* reexamination of any such patent claim on the basis of issues which that party, or its privies, raised or could have raised in such civil action, and an *inter partes* reexamination requested by that party, or its privies, on the basis of such issues may not thereafter be maintained by the Office.

35 U.S.C. 311 permits a request for *inter partes* reexamination to be filed "at any time." Thus, requests for *inter partes* reexamination can be filed where the patent (for which reexamination is requested) is involved in concurrent litigation. The guidelines set forth below will generally govern Office handling of *inter partes* reexamination requests where there is concurrent litigation.

I. **>COURT-ORDERED/SANCTIONED< REEXAMINATION PROCEEDING, LITIGATION STAYED FOR REEXAMINATION, OR EXTENDED PENDENCY OF REEXAMINATION PROCEEDING CONCURRENT WITH LITIGATION

Where a request for reexamination indicates >(A)< that it is filed as a result of an order by a court **>or an agreement by parties to litigation which agreement is sanctioned by a court, or (B)< that litigation is stayed for the purpose of reexamination, >the request will be taken up by the examiner for decision 6 weeks after the request is filed, and< all aspects of the proceeding will be expedited to the extent possible. Cases will be taken up for action at the earliest time possible, and **>Office actions in these reexamination proceedings will normally set a 1-month shortened statutory period for response rather than the 2 months usually set in reexamination proceedings. Response periods< may be extended only upon a strong showing of sufficient cause (see MPEP § 2665). Action on such a proceeding will >generally< take precedence to any other action taken by the examiner in the Office. See generally *In re Vamco Machine and Tool, Inc.*, 752 F.2d 1564, 224 USPQ 617 (Fed. Cir. 1985); *Gould v. Control Laser Corp.*, 705 F.2d 1340, 217 USPQ 985 (Fed. Cir. 1983); *Loffland Bros. Co. v. Mid-Western Energy Corp.*, 225 USPQ 886 (W.D. Okla. 1985); *The Toro Co. v. R.L. Nelson Corp.*, 223 USPQ 636 (C.D. Ill. 1984); *Digital Magnetic Systems, Inc. v. Ansley*, 213 USPQ 290 (W.D. Okla. 1982); *Raytek, Inc. v. Solfan Systems Inc.*, 211 USPQ 405 (N.D. Cal. 1981); and *Dresser Industries, Inc. v. Ford Motor Co.*, 211 USPQ 1114 (N.D. Texas 1981).

In addition, if (A) there is litigation concurrent with an *inter partes* reexamination proceeding and (B) the reexamination proceeding has been pending for more than one year, the Director or Deputy Director of the Office of Patent Legal Administration (OPLA), Director of the Central Reexamination Unit (CRU), or a Senior Legal Advisor of the OPLA, may approve Office actions in such reexamination proceeding setting a one-month or thirty days, whichever is longer, shortened statutory period for response rather than the

two months usually set in reexamination proceedings. A statement at the end of the Office action – "One month or thirty days, whichever is longer, shortened statutory period approved," followed by the signature of one of these officials, will designate such approval. It is to be noted that the statutory requirement for "special dispatch" in reexamination often becomes important, and sometimes critical, in coordinating the concurrent litigation and reexamination proceedings.

II. FEDERAL COURT DECISION KNOWN TO EXAMINER AT THE TIME THE DETERMINATION ON THE REQUEST FOR REEXAMINATION IS MADE

If a Federal Court decision *on the merits* of a patent is known to the examiner at the time the determination on the request for *inter partes* reexamination is made, the following guidelines will be followed by the examiner:

(A) The Third Party Requester Was Not a Party to the Litigation.

When the initial question as to whether the art raises a substantial new question of patentability as to a patent claim is under consideration, the existence of a final court decision of claim validity in view of the same or different art does not necessarily preclude the presence of a new question. This is true because of the different standards of proof and claim interpretation employed by the District Courts and the Office. See for example *In re Zletz*, 893 F.2d 319, 322, 13 USPQ2d 1320, 1322 (Fed. Cir. 1989) (manner of claim interpretation that is used by courts in litigation is not the manner of claim interpretation that is applicable during prosecution of a pending application before the PTO) and *In re Etter*, 756 F.2d 852, 225 USPQ 1 (Fed. Cir. 1985) (the 35 U.S.C. 282 presumption of patent validity has no application in reexamination proceedings). Thus, while the Office may accord deference to factual findings made by the court, the determination of whether a substantial new question of patentability exists will be made independently of the court's decision on *validity*, since the decision is not controlling on the Office.

A *non-final* holding of claim *invalidity* or unenforceability will also not be controlling on the question of whether a substantial new question of patentability is present.

Only a final holding of claim invalidity or unenforceability (after all appeals) is controlling on the Office. In such cases, a substantial new question of patentability would not be present as to the claims held invalid or unenforceable. See *Ethicon v. Quigg*, 849 F.2d 1422, 7 USPQ2d 1152 (Fed. Cir. 1988).

(B) The Third Party Requester Was a Party to the Litigation.

Final Holding of validity: The provisions of 37 CFR 1.907(b) apply. Where a final decision was entered against a party in a Federal Court civil action (arising in whole or in part under 28 U.S.C. 1338) that the party did not sustain its burden of proving invalidity of a patent claim in suit, that party and its privies may **not** request *inter partes* reexamination of any such patent claim on the basis of issues which that party or its privies raised or could have raised in the civil action >(as to those asserted by the patent owner, and/or challenged by the third party requester, and resolved in favor of the patent owner in the civil action)<. Further, an *inter partes* reexamination already requested by that party, or its privies, on the basis of such issues will not be maintained by the Office, i.e., the proceeding will be concluded. Note, however, that the statute does not preclude an *ex parte* reexamination by the same third party requester.

In view of the above, when the examiner is aware that the third party requester was a party to previous Federal Court litigation as to the patent for which *inter partes* reexamination has been requested, the examiner must determine:

(1) Was the Federal Court decision adverse to the third party requester as to at least one claim of the patent?

(2) Was the Federal Court decision a final decision, after all appeals?

(3) Is the issue being raised in the reexamination request the same issue as was raised in the Federal Court during the civil action, or an issue that the third party requester could have raised in the Federal Court during the civil action?

- If the answer to each of questions (1)-(3) is "yes" for all claims for which reexamination was requested in the proceeding, then the *inter partes* reexamination prosecution must be terminated. In such a case, the Central Reexamination Unit (CRU) Director will prepare a decision discussing the above

considerations (1)-(3) and vacating the reexamination proceeding.

- If the answer to all of questions (1)-(3) is "yes" for one or more (but not all) of the claims for which reexamination was requested in the proceeding; those claims will not be treated. The examiner's action will point out the claims not treated and the reason why, i.e., a discussion of the above considerations (1)-(3). The guidelines set forth above in subsection II.(A) will be used for the claims remaining.

- If the answer to question (1) or to question (3) is "no" for all claims for which reexamination was requested, then the examination of the reexamination proceeding will proceed without any discussion on the record of considerations (1)-(3), using the guidelines set forth above in subsection II.(A).

- If, for any claim for which reexamination was requested, the answer to both of questions (1) and (3) is "yes", but the answer to question (2) is "no", then examination of the reexamination proceeding will proceed using the guidelines set forth above in subsection II.(A). The examiner's action will contain a discussion of considerations (1)-(3). If the examiner subsequently becomes aware that the Federal Court decision has become final, reexamination of the affected claims must be discontinued. If all claims being examined are affected, the reexamination will be vacated by the CRU Director as discussed above. See also subsection V. below.

Final Holding of invalidity: A *final holding of claim invalidity or unenforceability* (after all appeals) is controlling on the Office. In such cases, a substantial new question of patentability would not be present as to the claims held invalid or unenforceable. See *Ethicon v. Quigg*, 849 F.2d 1422, 7 USPQ2d 1152 (Fed. Cir. 1988). Where all claims for which reexamination was requested are affected, the reexamination will be vacated by the CRU Director. A non-final holding of claim invalidity or unenforceability, however, will not be controlling on the question of whether a substantial new question of patentability is present.

(C) Specific Situations.

For a discussion of the policy in specific situations where a Federal Court decision has been issued, see MPEP § 2642 and subsection V. below.

>Note the following two Federal Circuit decisions involving reexamination proceedings where the court affirmed the Office's rejections even though parallel district court proceeding upheld the claims as valid and infringed. *In re Trans Texas Holdings Corp.*, 498 F.3d 1290, 83 USPQ2d 1835 (Fed. Cir. 2007) and *In re Translogic Technology, Inc.*, 504 F.3d 1249, 84 USPQ2d 1929 (Fed. Cir. 2007).

In *Trans Texas*, the patent being reexamined was subject to an infringement suit, in which the district court had issued its claim construction ruling (in a district court opinion) as to the definition of a term. The parties ultimately reached a settlement before trial, and the district court issued an "Order of Dismissal with Prejudice." The patent owner relied on that district court claim construction ruling in a reexamination proceeding, and argued that the Office was bound by that district court claim construction ruling, under the doctrine of issue preclusion. The Federal Circuit stated that issue preclusion could not be applied against the Office based on a district court holding in an infringement proceeding, since the Office was not a party to that earlier infringement proceeding.

In *Translogic*, a district court infringement suit proceeded in parallel with a reexamination proceeding. The district court upheld the validity of the patent in the infringement suit, while the reexamination examiner found the claim combination to be obvious. The examiner's rejection was affirmed by the Board of Patent Appeals and Interferences (Board). The defendant (the alleged infringer) of the infringement suit appealed the district court decision to the Federal Circuit, while the patent owner appealed the Board's decision to the Federal Circuit. The Federal Circuit consolidated the appeals, and then addressed only the patent owner's reexamination appeal from the Board. The Federal Circuit affirmed the examiner's conclusion of obviousness by relying upon and providing an extensive discussion of *KSR International Co. v. Teleflex Inc.*, 550 U.S.___, 82 USPQ2d 1385 (2007).<

III. REEXAMINATION WITH CONCURRENT LITIGATION BUT ORDERED PRIOR TO FEDERAL COURT DECISION

In view of the statutory mandate to make the determination on a request for reexamination within 3 months, the determination on the request based on the record before the examiner will be made without

awaiting a decision by the Federal Court. It is not realistic to attempt to determine what issues will be treated by the Federal Court prior to the Court's decision. Accordingly, the determination on the request will be made without considering the issues allegedly before the Court. If reexamination is ordered, the reexamination generally (see discussion immediately below) will continue until the Office becomes aware that a court decision has issued. At such time, the request will be reviewed in accordance with the guidelines set forth below.

In *Ethicon v. Quigg*, 849 F.2d 1422, 7 USPQ2d 1152 (Fed. Cir. 1988), the Court of Appeals for the Federal Circuit stated the following as to the Office's authority to stay a reexamination process pending the outcome of a Federal District Court case where invalidity is an issue:

> "Whatever else special dispatch means, it does not admit of an indefinite suspension of reexamination proceedings pending conclusion of litigation. If it did, one would expect to find some intimation to that effect in the statute, for it would suggest the opposite of the ordinary meaning. But there is none."

> "The Commissioner… has no inherent authority, only that which Congress gives. It did not give him authority to stay reexaminations; it told him to conduct them with special dispatch. Its silence about stays cannot be used to countermand that instruction."

The *Ethicon* case was decided as to *ex parte* reexamination, for which 35 U.S.C. 305 dictates in its last sentence:

> "All reexamination proceedings under this section, including any appeal to the Board of Patent Appeals and Interferences, will be conducted with special dispatch within the Office."

For *inter partes* reexamination, however, 35 U.S.C. 314 states:

> **"Unless otherwise provided by the Director for good cause,** all inter partes reexamination proceedings under this section, including any appeal to the Board of Patent Appeals and Interferences, shall be conducted with special dispatch within the Office."

35 U.S.C. 314 *provides for inter partes* reexamination the clause "*>[u]nless< otherwise provided by the Director for good cause" *>, this< clause is not present in 35 U.S.C. 305 for *ex parte* reexamination. Accordingly, where there is good cause for the Director of the USPTO to suspend (stay) reexamination proceedings pending the conclusion of litigation, a suspension will be effected. **>This matter will be approached on a case-by-case basis. See< subsection V. below for the situation where there *>was< pending litigation having the potential to terminate a reexamination prosecution under 35 U.S.C. 317(b)>, and a suspension was granted<. If the examiner believes there is "good cause" to suspend (stay) reexamination proceedings, the case should be brought to the Office of Patent Legal Administration (OPLA) for consideration of such by a Reexamination Legal Advisor (RLA). **

>It should be noted that a suspension will not be considered on its merits prior to ordering of reexamination. Until that point, there is no proceeding to suspend, and the Office must issue its decision on the request within the statutorily mandated 3 months. Also, suspension will not be considered on its merits when there is an outstanding Office action. In order to ensure consideration on the merits of a petition to suspend where there is an outstanding Office action, the patent owner must (1) provide a complete response to the outstanding Office action, (2) include a petition to suspend under 37 CFR 1.182, and (3) include a petition under 37 CFR 1.182 for OPLA to take jurisdiction of the proceeding prior to issuing an Office action on the submitted response and retain such jurisdiction until OPLA issues its decision on the petition to suspend.<

It should >also< be noted that if, pursuant to 35 U.S.C. 318, a court stays litigation as to the patent being reexamined, action in the reexamination proceeding would not be suspended. This is so because action in the reexamination proceeding would be needed to resolve the "issue of patentability of any claims of the patent which are the subject of the *inter partes* reexamination order" set forth in 35 U.S.C. 318.

IV. FEDERAL COURT DECISION ISSUES AFTER *INTER PARTES* REEXAMINATION ORDERED

Pursuant to 37 CFR 1.985(a), the patent owner in an *inter partes* reexamination proceeding must promptly notify the Office of any Federal Court decision involving the patent.

Upon the issuance of a holding of claim invalidity or unenforceability by a Federal Court, reexamination of those claims will continue in the Office until the decision becomes final. A *non-final* Court decision concerning a patent under reexamination shall have no binding effect on a reexamination proceeding.

Where an *inter partes* reexamination proceeding is currently pending and a **final** Federal Court decision issues after all appeals, the reexamination proceeding is reviewed to see if no substantial new question of patentability remains (as to one or more claims) due to holding of claims invalid, and to determine whether the provisions of 37 CFR 1.907(b) apply as a result of a decision in a civil action arising in whole or in part under 28 U.S.C. 1338.

A *final Court holding of invalidity/unenforceability* is binding on the Office. Upon the issuance of a final holding of invalidity or unenforceability, the claims held invalid or unenforceable will be withdrawn from consideration in the reexamination. The reexamination will continue as to any remaining claims. If all of the claims being examined are finally held invalid or unenforceable, the reexamination will be vacated by the CRU Director as no longer containing a substantial new question of patentability and the reexamination prosecution will be terminated. If not all claims being examined were held invalid, a substantial new question of patentability may still exist as to the remaining claims. In such a situation, the remaining claims would be examined; and, as to the claims held invalid, form paragraph 26.80 should be used at the beginning of the Office action.

¶ *26.80 Claims Held Invalid by Court, No Longer Being Reexamined*

Claims **[1]** of the **[2]** patent are not being reexamined in view of the final decision of **[3]**. Claims **[1]** were held invalid by the **[4]**.

Examiner Note:

1. In bracket 1, insert the claims held invalid.

2. In bracket 2, insert the patentee (e.g., Rosenthal, Schor et al).

3. In bracket 3, insert the decision (e.g., *ABC Corp. v. Kery Fries*, 999 USPQ2d 99 (Fed. Cir. 1999) or *XYZ Corp. v. Jones*, 999 USPQ2d 1024 (N.D. Cal. 1999)).

4. In bracket 4, insert the name of the court (e.g., the Court of Appeals for the Federal Circuit, or the Federal District Court).

The issuance of a *final* Court decision >after all appeals< (in a civil action arising in whole or in part under 28 U.S.C. 1338) upholding validity during an *inter partes* reexamination, where the person who filed the request **was a party to the litigation**, will have the effect that the Office will discontinue examination of all claims affected by the holding of validity >(for issues raised or could have been raised as to those claims asserted by the patent owner, and/or challenged by the third party requester)<. If the provisions of 37 CFR 1.907(b) apply such that all of the claims in the reexamination proceeding cannot be maintained, the order to reexamine is vacated by the CRU Director, and reexamination is terminated. If the provisions of 37 CFR 1.907(b) apply to some of the claims, but not all of the claims in the proceeding; those claims to which 37 CFR 1.907(b) applies will not be treated. The examiner's action will point out the claims not treated, and the reason why those claims cannot be maintained in the reexamination under 37 CFR 1.907(b). Action will be given on the remaining claims. Note that the provisions of 37 CFR 1.907(b) cannot be waived since they track the statute, 35 U.S.C. 317. See also subsection V. below.

The issuance of a final Court decision **upholding validity** during an *inter partes* reexamination, where the person who filed the request **was not a party to the litigation**, will have no binding effect on the examination of the reexamination. This is because the Court stated in *Ethicon v. Quigg*, 849 F.2d 1422, 1428, 7 USPQ2d 1152, 1157 (Fed. Cir. 1988) that the Office is not bound by a court's holding of patent validity and should continue the reexamination. The Court noted that District Courts and the Office use different standards of proof in determining invalidity, and thus, on the same evidence, could quite correctly come to different conclusions. Specifically, invalidity in a District Court must be shown by "clear and convincing" evidence, whereas in the Office it is sufficient to show non-patentability by a "preponderance" of the evidence. Since the "clear and convincing" standard is harder to satisfy than the "preponderance standard," a court's holding of patent validity is not controlling. Deference will, however, ordinarily be accorded to the factual findings of the court, where the evidence before the Office and the court is the same. If sufficient reasons are present, claims held valid by the court may be rejected in reexamination.

V. DISCUSSION OF AFFECT OF LITIGATION WHERE REQUESTER WAS A PARTY TO THE LITIGATION

For *inter partes* reexamination, 35 U.S.C. 317(b) provides:

> "Once a final decision has been entered against a party in a civil action arising in whole or in part under section 1338 of title 28, that the party has not sustained its burden of proving the invalidity of any patent claim in suit…, then neither that party nor its privies may thereafter request an *inter partes* reexamination **of any such patent claim** on the basis of issues which that party or its privies **raised or could have raised** in such civil action…, and an *inter partes* reexamination requested by that party or its privies **on the basis of such issues** may not thereafter be maintained by the Office, notwithstanding any other provision of this chapter. This subsection **does not prevent** the assertion of invalidity based on **newly discovered** prior art **unavailable** to the third-party requester and the Patent and Trademark Office at the time of the *inter partes* reexamination proceedings." [Emphasis added]

Where a final decision was entered against a party in a Federal Court civil action (arising in whole or in part under 28 U.S.C. 1338) that the party did not sustain its burden of proving invalidity of a patent claim in suit, then that party and its privies may not request *inter partes* reexamination of any such patent claim on the basis of issues which that party or its privies raised or could have raised in the civil action. Further, an *inter partes* reexamination already requested by that party, or its privies, on the basis of such issues will not be maintained by the Office; in such an instance, the prosecution will be terminated and the proceeding will be concluded. This is a statutory estoppel which can attach to an *inter partes* reexamination third party requester that is also a party to litigation concerning the patent for which reexamination has been requested.

35 U.S.C. 314(c) states:

> "**Unless otherwise provided by the Director for good cause**, all *inter partes* reexamination proceedings under this section, including any appeal to the Board of Patent Appeals and Interferences, shall be conducted with special dispatch within the Office." [Emphasis added]

The statute thus authorizes the Director of the USPTO to suspend (stay) reexamination proceedings, where there is good cause to do so, pending the conclusion of litigation based on a potential for termination of a reexamination prosecution under 35 U.S.C. 317(b). Thus, a District Court decision that is pending appeal on the validity of the same claims considered in an *inter partes* reexamination proceeding may provide the requisite statutory "good cause" for suspension, due to the real possibility that the 35 U.S.C. 317(b) estoppel may attach in the near future to bar/terminate the reexamination proceeding. Any such fact situation is resolved on a case-by-case basis.

In any *inter partes* reexamination where the requester (or its privies) is also a party to ongoing or concluded litigation as to the patent for which reexamination has been requested, the potential for this statutory estoppel to attach must be considered. The following provides a discussion of the interaction of 35 U.S.C. 317(b), 35 U.S.C. 314, and the *inter partes* reexamination process.

Congress, in creating the *inter partes* reexamination statutory framework in 2002, borrowed heavily from the existing *ex parte* reexamination regime. For example, *inter partes* reexamination proceedings, like *ex parte* reexaminations, must be conducted with "special dispatch." 35 U.S.C. 314(c). Unlike *ex parte* reexamination, however, Congress provided the Office with the statutory authority and discretion to suspend *inter partes* reexamination proceedings for "good cause." See 35 U.S.C. 314(c).

Another difference between the two regimes is that Congress specifically provided estoppel provisions to shut down an *inter partes* reexamination of a patent claim when a "final decision" upholding the validity of that claim has been reached in a civil action or in a prior *inter partes* reexamination proceeding. See 35 U.S.C. 317(b); 35 U.S.C. 315(c). Thus, if a party's challenge to the validity of certain patent claims has been finally resolved, either through civil litigation or the *inter partes* reexamination process, then (A) that party is barred from making a subsequent request for *inter partes* reexamination (or filing a new civil action) challenging the validity of those same claims, and (B) "an *inter partes* reexamination previously requested by that party or its privies on the basis of such issues may not thereafter be maintained by the Office." *Id*.

The statute and legislative history of the estoppel provisions make it clear that the *inter partes* reexamination of a claim (requested by a party) must be terminated once a final decision upholding the validity of that claim (challenged by the same party) has issued

"after any appeals," not simply just after a district court decision which is still pending on appeal. While Congress desired that the creation of an *inter partes* reexamination option would lead to a reduction in expensive patent litigation, it nonetheless also provided in the statute that a court validity challenge and *inter partes* reexamination of a patent may occur simultaneously; but once one proceeding finally ends in a manner adverse to a third party, then the issues raised (or that could have been raised) with respect to the validity of a claim in that proceeding would have estoppel effect on the same issues in the other proceeding.

Taking the above into account, the following factors are to be considered in determining whether it is appropriate to refuse to order an *inter partes* reexamination, terminate the reexamination, or suspend action in the reexamination, based on litigation in which the reexamination requester is a party to the litigation.

(A) The 35 U.S.C. 317(b) estoppel applies only to patent claims that were litigated in the suit, i.e., litigated claims. The estoppel does not apply to non-litigated patent claims.

Where there are non-litigated claims for which reexamination had been requested in the *inter partes* reexamination request, the reexamination proceeding is to go forward based on those non-litigated claims. If, however, during the reexamination proceeding, the patent owner disclaimed all the non-litigated claims, leaving only litigated claims, the proceeding is to be referred to the Office of Patent Legal Administration (OPLA).

(B) The 35 U.S.C. 317(b) estoppel applies only to issues which the requester or its privies raised or could have raised in the civil action. The estoppel does not apply where new issues are raised in the request.

If the request provides new art/issues not raised in the litigation (civil action), and which could not have been so raised, then estoppel does not attach. The patent owner has the burden of showing that the art and issues applied in the request was available to the third-party requester and could have been placed in the litigation.

(C) The 35 U.S.C. 317(b) estoppel applies only in a situation where a final decision adverse to the requester has already been issued.

If there remains any time for an appeal, or a request for reconsideration, from a court (e.g., District Court or Federal Circuit) decision, or such action has already been taken, then the decision is not final, and the estoppel does not attach. A stay/suspension of action may be appropriate for the reexamination proceeding if the litigation has advanced to a late enough stage and there is sufficient probability that a final decision will be adverse to the requester; however, that is a matter to be discussed with the OPLA in any such instance.

(D) Is there a concurrent *ex parte* reexamination proceeding for the patent?

As stated in MPEP § 2286: "The issuance of a final Federal Court decision upholding validity during an *ex parte* reexamination also will have no binding effect on the examination of the reexamination. This is because the court states in *Ethicon v. Quigg*, 849 F.2d 1422, 1428, 7 USPQ2d 1152, 1157 (Fed. Cir. 1988) that the Office is not bound by a court's holding of patent validity and should continue the reexamination." If there is a concurrent *ex parte* reexamination proceeding having overlapping issues with an *inter partes* reexamination proceeding where the estoppel has the potential to attach, but no final decision has been issued, then the Office may in some instances (depending on the individual facts and circumstances), to go forward with statutorily required "special dispatch" as per *Ethicon* in a merged proceeding containing both the *inter partes* reexamination and the *ex parte* reexamination. This is a matter of administrative convenience to avoid rework and make the process more efficient. Again, OPLA should be consulted.

(E) Some examples of where this estoppel issue was actually addressed by the Office.

In reexamination control numbers 95/000,093 and 95/000,094 (the '093 and '094 proceedings), action was suspended based on ongoing litigation. After a District Court decision adverse to requester, it was determined that "good cause" existed to wait for the outcome of the Federal Circuit appeal, because the reexamination proceedings were only at their beginning stages, while the concurrent litigation was potentially near its final resolution. It was noted that requester had chosen to permit the District Court litigation to proceed for three years before filing its requests for reexamination, the filing taking place

only after judgment was entered in patent owner's favor in the litigation. Had requester filed its requests for reexamination earlier, the reexamination proceedings would have been much farther along in the process, and may likely have been completed at the Office before the District Court issued its decision. Moreover, had requester filed its reexamination requests earlier in the litigation, the District Court might have stayed the litigation to await the Office's decisions in the two reexamination proceedings. After choosing to go years through the entire District Court litigation proceeding without asking for the Office's input, requester was not in a position to complain that a suspension of the '093 and '094 reexamination proceedings would deprive requester of a chance to obtain the Office's decision, when there was a strong possibility that the Federal Circuit's decision would estop the Office from issuing any decision at all. In short, requester could not have it both ways. Requester waited three years after the district court case began, and waited until after the District Court issued a final decision, such that its District Court litigation could in no way be affected by any decision on its reexamination requests. Requester's delay was the reason that the '093 and '094 reexaminations could very well be mooted before any reexamination decision issued and the USPTO Director found "good cause" to suspend the proceedings. >On May 22, 2006, the U.S. District Court, Eastern District of Virginia, in *Sony Computer Entertainment America Inc. v. Dudas*, 85 USPQ2d 1594 (E.D. Va 2006), issued a decision upholding the Office's finding of "good cause" to suspend the '093 and '094 *inter partes* reexamination proceedings.< Requester chose its route >(litigation)< and had to deal with the consequences of its decision, i.e., a suspension of the reexamination proceedings.

On the other hand, see reexamination control numbers 95/000,020, 95/000,071 and 95/000,072, for decisions in which action was not suspended, because the specific facts dictated otherwise.

VI. LITIGATION REVIEW AND CRU APPROVAL

In order to ensure that the Office is aware of prior or concurrent litigation, the examiner is responsible for conducting a reasonable investigation for evidence as to whether the patent for which reexamination is requested has been, or is, involved in litigation. The investigation will include a review of the reexamination file, the patent file, and the results of the litigation computer search by the Scientific and Technical Information Center (STIC). If the examiner discovers, at any time during the reexamination proceeding, that there is litigation or that there has been a Federal Court decision on the patent, the fact will be brought to the attention of a Reexamination Legal Advisor (RLA) of the OPLA prior to *any* further action by the examiner. The RLA will provide the examiner with guidance as to compliance with Office policy where there is concurrent litigation.

2687 Notice of Intent to Issue *Inter Partes* Reexamination Certificate (NIRC) and Conclusion of Reexamination Proceeding [R-7]

Upon conclusion of the *inter partes* reexamination proceeding, the examiner must complete a Notice of Intent to Issue *Inter Partes* Reexamination Certificate (NIRC) by filling out Form PTOL-2068. If appropriate, an examiner's amendment will also be prepared. Where the claims are found patentable, reasons must be given for each claim found patentable. See the discussion as to preparation of an examiner's amendment and reasons for allowance found at the end of this section. In addition, the examiner must prepare the reexamination file so that the Office of *>Data Management< can prepare and issue a certificate in accordance with 35 U.S.C. 316 and 37 CFR 1.997 and setting forth the results of the reexamination proceeding and the content of the patent following the proceeding. See MPEP § 2688.

I. INSTANCES WHERE A NIRC WOULD BE APPROPRIATE

The following are the only instances when issuance of a NIRC action would be proper in an *inter partes* reexamination proceeding:

(A) There is **no** timely response by the patent owner to an Office action requiring a response. If **all** claims are under rejection, the examiner will issue a Notice of Intent to Issue *Inter Partes* Reexamination Certificate (NIRC). All claims will be canceled by formal examiner's amendment.

(B) After a Right of Appeal Notice (RAN) where no party to the reexamination timely files a notice of appeal.

(C) After filing of a notice of appeal, where all parties who filed a notice of appeal or notice of cross appeal fail to timely file an appellant brief (or fail to timely complete the brief, where the appellant brief is noted by the examiner as being incomplete).

(D) After a final decision by the Board of Patent Appeals and Interferences (Board), where there is no further timely appeal to the Court of Appeals for the Federal Circuit nor is there a timely request for rehearing by the Board.

(E) After the Federal Court appeal process has been completed and the case is returned to the examiner.

II. PREPARATION OF THE NIRC ACTION

A. No Allowed Claims

Where **all** claims are rejected or objected to in the prior Office action, the examiner will issue a NIRC indicating that all claims have been canceled and terminating the prosecution. The cover sheet to be used is Notice of Intent to Issue Reexamination Certificate Form PTOL-2068. As an attachment to the NIRC cover sheet, the examiner will draft an examiner's amendment canceling all live claims in the reexamination proceeding. Check the appropriate box on PTOL-2068. In the remarks of the examiner's amendment, the examiner should point out why the claims have been canceled. Since all claims are being canceled in the proceeding, no reasons for patentability are attached. No panel review conference is needed in this instance, as the issuance of the NIRC is essentially ministerial.

B. At Least One Allowed Claim

If at least one claim is free of rejection and objection, the examiner will issue a NIRC, in which all patentable claims and canceled claims will be identified. All rejected or objected claims will be canceled by formal examiner's amendment (attached as part of the NIRC). Check the appropriate box on Form PTOL-2068. In the remarks section of the examiner's amendment, the examiner should point out why the claims have been canceled. As to the patentable claims, reasons for patentability must be provided for all such claims. After the examiner has determined that the reexamination proceeding is ready for the NIRC, the examiner will formulate a draft preliminary NIRC with attachments as needed. The examiner will then inform his/her **>Central Reexamination Unit (CRU) Supervisory Patent Examiner (SPE) or Technology Center (TC) Quality Assurance Specialist (QAS)< of his/her intent to issue the NIRC. The *>CRU SPE/TC QAS< will convene a panel review conference, and the conference members will review the patentability of the remaining patentable claim(s) pursuant to MPEP § 2671.03. If the conference confirms the examiner's preliminary decision, the proposed NIRC shall be issued and signed by the examiner, with the two other conferees initialing the action (as "conferee") to indicate their presence in the conference. If the conference does not confirm the examiner's decision (e.g., it is determined that one or more of the remaining claims should be rejected), then the examiner will reevaluate and issue an appropriate Office action. A panel review conference is not to be held as to any claim that was in the case (proceeding) at the time the case was reviewed by the Board of Patent Appeals and Interferences (Board) or a federal court.

III. EXAMINER'S AMENDMENT TO PLACE PROCEEDING IN CONDITION FOR NOTICE OF INTENT TO ISSUE *INTER PARTES* REEXAMINATION CERTIFICATE

Interviews, both personal and telephone are not permitted in an *inter partes* reexamination proceeding (see MPEP § 2685). Thus, the examiner is not permitted to telephone the patent owner to obtain authorization to make an amendment. Accordingly, the only times that an examiner's amendment can be made in conjunction with a NIRC are where the patent owner authorization need not be obtained. Such amendments include:

(A) An examiner's amendment to deal with formal matters such as grammar, incorrect spelling, or incorrect number; i.e., matters that do not involve a rejection, do not go to the merits, and do not require the examiner to obtain approval.

(B) An examiner's amendment to change the title.

(C) An examiner's amendment to cancel all rejected and objected claims in the proceeding, when

the patent owner fails (1) to timely respond (where a response is required), (2) to timely appeal, or (3) to take further action to maintain an appeal.

>

(D) If a patent expires during the pendency of a reexamination proceeding for that patent, all amendments to the patent claims and all claims added during the proceeding must be withdrawn. The examiner's amendment is to include a statement such as:

"As the patent being reexamined has expired during the pendency of the present reexamination proceeding, all amendments made during the proceeding are improper, and are hereby expressly withdrawn."

If it has not previously been done in the proceeding, a diagonal line should be drawn across a copy of all amended and new claims (and text added to the specification) residing in the amendment papers, and scanned into the Image File Wrapper (IFW).<

See also MPEP § 1302.04 *et. seq*. as to examiner's amendments not needing authorization by an applicant or a patent owner. Note, however, that in an *inter partes* reexamination proceeding (as opposed to an application) all such examiner's amendments must be made by **formal examiner's amendment accompanying the NIRC**, in order to provide notice of the changes made in the patent being reexamined to both the patent owner and the third party requester.

Note that any change going to the merits of the case (i.e., more than a formal matter) could not be made by examiner's amendment accompanying the NIRC. Rather, a change going to the merits would require (1) reopening of prosecution with the approval of the **>CRU< Director, (2) an Office action suggesting the change to patent owner, (3) a formal amendment submitted by the patent owner, and (4) an opportunity for the third party requester to comment on the patent owner's submission.

Where an examiner's amendment is to be prepared, Box 9 of Form PTOL-2068 (Notice of Intent to Issue a Reexamination Certificate) is checked, and form paragraph 26.69 is used to provide the appropriate attachment:

¶ *26.69 Examiner's Amendment Accompanying Notice of Intent to Issue Reexamination Certificate*

An examiner's amendment to the record appears below. The changes made by this examiner's amendment will be reflected in the reexamination certificate to issue in due course.

[1]

The examiner's amendment must comply with the requirements of 37 CFR 1.530(d)-(j) in amending the patent.

Thus, if a portion of the text is amended more than once, the examiner's amendment should indicate all changes (insertions and deletions) in relation to the current text in the patent under reexamination, **not** in relation to a prior amendment made during the proceeding.

In addition, the examiner's amendment requires presentation of the **full text** of any paragraph or claim to be changed, with 37 CFR 1.530(f) markings. Examiners' amendments in reexamination are not subject to the exceptions to this requirement which are provided for applications in 37 CFR 1.121(g) and which do not apply to reexamination proceedings. See MPEP § 2250. The only **exception** to the full text presentation requirement is that an entire claim or an entire paragraph of specification may be deleted from the patent by a statement deleting the claim or paragraph without the presentation of the text of the claim or paragraph.

IV. REASONS FOR PATENTABILITY AND/OR CONFIRMATION

Reasons for patentability must be provided, unless all claims are canceled in the proceeding. Check the appropriate box on Form PTOL-2068 and provide the reasons as an attachment. In the attachment to the NIRC, the examiner should indicate why the claims found patentable in the reexamination proceeding are clearly patentable over the cited patents or printed publications. This is done in a manner similar to that used to indicate reasons for allowance in an application. See MPEP § 1302.14. Where the record is clear as to why a claim is patentable (which should be the usual situation, in view of the *inter partes* nature of the proceeding), the examiner may simply refer to the particular portions of the record which clearly establish the patentability of that claim. **In any event, reasons for patentability must be provided for every claim identified as patentable in the NIRC, and the patent owner must be notified in the NIRC that it has an opportunity to provide comments on the statement of the reasons for patentability.**

The reasons for patentability may be set forth on Form PTOL-476, entitled "REASONS FOR PATENTABILITY AND/OR CONFIRMATION." However, as a preferred alternative to using Form PTOL-476, the examiner may instead use form paragraph 26.70.

¶ *26.70 Reasons for Patentability and/or Confirmation in Inter Partes Reexamination*

STATEMENT OF REASONS FOR PATENTABILITY AND/OR CONFIRMATION

The following is an examiner's statement of reasons for patentability and/or confirmation of the claims found patentable in this reexamination proceeding: **[1]**

Any comments considered necessary by the PATENT OWNER regarding the above statement must be submitted promptly to avoid processing delays. Such submission by the patent owner should be labeled: "Comments on Statement of Reasons for Patentability and/or Confirmation" and will be placed in the reexamination file.

Examiner Note:

This form paragraph may be used as an attachment to the Notice of Intent to Issue *Inter Partes* Reexamination Certificate, PTOL-2068 (item number 3).

Original patent claims that are found patentable in a reexamination proceeding are generally to be designated as "confirmed" claims, while new claims and amended patent claims are generally to be designated as "patentable" claims. However, for purposes of the examiner setting forth reasons for patentability or confirmation, the examiner may use "patentable" to refer to any claim that defines over the cited patents or printed publications. There is no need to separate the claims into "confirmed" and "patentable" categories when setting forth the reasons.

Where all claims are canceled in the proceeding, no reasons for patentability are provided.

V. PREPARATION OF THE CASE FOR PUBLICATION

As to preparing the *inter partes* reexamination file for publication of the certificate, see MPEP § 2287 for guidance. The preparation of an *inter partes* reexamination proceeding for publication is carried out in the same manner that an *ex parte* reexamination proceeding is prepared for publication.

The examiner must complete the examiner preparation of the case for reexamination certificate by completing an Examiner Checklist Reexamination form, PTOL-1516. The Legal Instrument Examiner (LIE) (the reexamination clerk) must complete a Reexamination Clerk Checklist form, PTOL-1517. The case is reviewed by the **>CRU SPE/TC QAS< and if all is in order, the case will be forwarded by the *>CRU SPE/TC QAS< to the Reexamination Legal Advisor (RLA).

After the reexamination file and its contents are reviewed, the NIRC will be mailed, and appropriate PALM work and update scanning will be carried out. The reexamination proceeding will then be forwarded, via the appropriate Office, to the Office of *>Data Management< for printing.

If the RLA returns the case to the *>CRU/TC< for correction/revision, the correction/revision must be handled specially and returned to the RLA within the time set for such by the RLA.

VI. REEXAMINATION REMINDERS

The following items deserve special attention. The examiner should ensure they have been correctly completed or followed before forwarding the case to the *>CRU SPE or TC QAS< for review.

(A) All patent claims for which a substantial new question of patentability had been found must have been examined. See MPEP § 2643.

(B) No renumbering of patent claims is permitted. New claims may require renumbering. See MPEP § 2666.01 and § 2250.

(C) Amendments to the description and claims must conform to requirements of 37 CFR 1.530(d)-(k). This includes any changes made by examiner's amendment. If a portion of the text is amended more than once, each amendment should indicate all of the changes (insertions and deletions) in relation to the current text in the patent under reexamination. See MPEP § 2666.01 and § 2250.

(D) The prior art must be listed on a form PTO-892, PTO-1449, PTO/SB/08A or 08B, or PTO/SB/42 (or on a form having format equivalent to one of these forms). These forms must be properly completed. See MPEP § 2657.

(E) The examiner and clerk checklists PTO-1516 and PTO-1517 must be *entirely and properly* completed. A careful reading of the instructions contained in these checklists is essential. The clerk checklist is designed as a check and review of the examiner's responses on the examiner checklist. Accordingly, the clerk should personally review the file before

completing an item. The clerk should check to make certain that the responses to all related items on both checklists are in agreement.

(F) Multiple copending reexamination proceedings are often merged. See MPEP § 2686.01.

(G) Where the reexamination proceeding is copending with an application for reissue of the patent being reexamined, the files must have been forwarded to the Office of Patent Legal Administration (OPLA) for a consideration of potential merger, with a decision on the question being present in the reexamination file. See MPEP § 2686.03.

(H) Reasons for patentability and/or confirmation are required for each claim found patentable.

(I) There is no issue fee in reexamination. See MPEP § 2634.

(J) The patent claims may not be amended nor new claims added after expiration of the patent. See MPEP § 2666.01 and § 2250.

(K) Original drawings cannot be physically changed. All drawing amendments must be presented on new sheets. The examiner may have the draftsperson review the new sheets of drawings if the examiner would like the draftsperson's assistance in identifying errors in the drawings. A draftsperson's "stamp" to indicate approval is no longer required on patent drawings, and these stamps are no longer to be used by draftspersons. See MPEP § 2666.02.

(L) An amended or new claim may not enlarge the scope of the patent claims. See MPEP § 2658, § 2666.01, and § 2250.

(M) If the patent has expired, all amendments to the patent claims and all claims added during the proceeding must be withdrawn. Further, all presently rejected and objected claims are canceled by examiner's amendment. See MPEP § 2250, subsection on "Amendment After the Patent Has Expired."

A. Handling of Multiple Dependent Claims

For treatment of multiple dependent claims when preparing a reexamination proceeding for publication of the reexamination certificate, see the discussion in MPEP § 2287.

B. The Title of the Patent

Normally, the title will not need to be changed during reexamination. If a change of the title is necessary, it should have been pointed out as early as possible in the prosecution, as a part of an Office Action. An informal examiner's amendment (i.e., changing the title and merely initialing the change) is **not** permitted in reexamination.

VII. REEXAMINATION PROCEEDINGS IN WHICH ALL THE CLAIMS ARE CANCELED

There will be instances where all claims in the reexamination proceeding are to be canceled. This would occur where the patent owner fails to timely respond to an Office action, and all live claims in the reexamination proceeding are under rejection. This would also occur where all live claims in the reexamination proceeding are to be canceled as a result of a decision of the Board affirming the examiner, and the time for appeal to the court and for requesting rehearing has expired. In these instances the examiner will issue a NIRC indicating that all claims have been canceled and terminating the prosecution. As an attachment to the NIRC, the examiner will draft an examiner's amendment canceling all live claims in the reexamination proceeding. In the examiner's amendment, the examiner should point out why the claims have been canceled. For example, the examiner might state one of the two following examples, as is appropriate:

> "Claims 1-8 (all live claims in the proceeding) were subject to rejection in the last Office action mailed 9/9/99. Patent owner failed to timely respond to that Office action. Accordingly, claims 1-8 have been canceled. See 37 CFR 1.957(b) and MPEP § 2666.10."

> "The rejection of claims 1-8 (all live claims in the proceeding) has been affirmed in the Board decision of 9/9/99, and no timely appeal to the court has been filed. Accordingly claims 1-8 have been canceled."

In order to physically cancel the live claims in the reexamination file history, brackets should be placed around all the live claims on a copy of the claims printed from the file history, and the copy then scanned into the file history. All other claims in the proceeding should have previously been either replaced or canceled.

The examiner will designate a canceled original patent claim, to be printed in the *Official Gazette*, on the Issue Classification IFW form in the appropriate place for the claim chosen.

A panel review conference is not to be held because the proceeding is to be concluded by the cancellation of all claims.

2687.01 Examiner Consideration of Submissions After NIRC [R-7]

The rules do not provide for an amendment to be filed in an *inter partes* reexamination proceeding after a Notice of Intent to Issue *Inter Partes* Reexamination Certificate (NIRC) has been issued. Note that 37 CFR 1.312 does not apply in reexamination. Any amendment, information disclosure statement, or other paper related to the merits of the reexamination proceeding filed after the NIRC (except as indicated immediately below) must be accompanied by a petition under 37 CFR 1.182. The petition must be granted, in order to have the amendment, information disclosure statement, or other paper related to the merits considered. Where an amendment, information disclosure statement, or other paper related to the merits of the reexamination proceeding is filed after the NIRC, and the accompanying petition under 37 CFR 1.182 is granted, the examiner will reconsider the case in view of the new information, and if appropriate, will reopen prosecution. >See MPEP § 2656 for a detailed discussion of the criteria for obtaining entry and consideration of information disclosure statement filed after the NIRC.<

Interviews, both personal and telephone, are **not** permitted in an *inter partes* reexamination proceeding (see MPEP § 2685). Thus, the examiner is not permitted to telephone the patent owner and obtain authorization to make an amendment. The only time an examiner's amendment can be made in an *inter partes* reexamination after the NIRC has been issued is where an examiner's amendment is needed to address matters that do not require the patent owner's approval. However, matters that do not require the patent owner's approval are generally minor formal matters. Thus, it would be rare for an examiner to need to withdraw the issued NIRC for issuance of a new NIRC with an examiner's amendment, since withdrawal of the NIRC should not be done for minor formal matters. In view of this, any examiner's amendment in an *inter partes* reexamination proceeding to be made after a NIRC (has been issued) requires the **>Central Reexamination Unit (CRU) Supervisory Patent Examiner (SPE) or Technology Center (TC) Quality Assurance Specialist (QAS)< to approve the examiner's amendment.

Any "Comments on Statement of Reasons for Patentability and/or Confirmation" which are received will be placed in the reexamination file, without comment. This will be done even where the reexamination certificate has already issued.

2688 Issuance of *Inter Partes* Reexamination Certificate [R-7]

35 U.S.C. 316. Certificate of patentability, unpatentability and claim cancellation.

(a) IN GENERAL.— In an inter partes reexamination proceeding under this chapter, when the time for appeal has expired or any appeal proceeding has terminated, the Director shall issue and publish a certificate canceling any claim of the patent finally determined to be unpatentable, confirming any claim of the patent determined to be patentable, and incorporating in the patent any proposed amended or new claim determined to be patentable.

*****

*37 CFR 1.997. **>Issuance and publication of inter partes reexamination certificate concludes inter partes reexamination proceeding.<*

(a) **>To conclude an *inter partes* reexamination proceeding, the Director will issue and publish an *inter partes* reexamination certificate in accordance with 35 U.S.C. 316 setting forth the results of the *inter partes* reexamination proceeding and the content of the patent following the *inter partes* reexamination proceeding.

(b) A certificate will be issued and published in each patent in which an *inter partes* reexamination proceeding has been ordered under § 1.931. Any statutory disclaimer filed by the patent owner will be made part of the certificate.<

(c) The certificate will be sent to the patent owner at the address as provided for in § 1.33(c). A copy of the certificate will also be sent to the third party requester of the *inter partes* reexamination proceeding.

(d) **>If a certificate has been issued and published which cancels all of the claims of the patent, no further Office proceedings will be conducted with that patent or any reissue applications or any reexamination requests relating thereto.<.

(e) If the *inter partes* reexamination proceeding is terminated by the grant of a reissued patent as provided in § 1.991, the reissued patent will constitute the reexamination certificate required by this section and 35 U.S.C. 316.

(f) A notice of the issuance of each certificate under this section will be published in the *Official Gazette*.

Since abandonment is not possible in a reexamination proceeding, an *inter partes* reexamination certificate will be issued at the conclusion of the proceeding

for each patent in which a reexamination proceeding has been ordered under 37 CFR 1.931, except where the reexamination has been concluded by vacating the reexamination proceeding, or by the grant of a reissue patent on the same patent in which case the reissue patent also serves as the reexamination certificate.

The *inter partes* reexamination certificate will set forth the results of the proceeding and the content of the patent following the reexamination proceeding. The certificate will:

(A) cancel any patent claims determined to be unpatentable;

(B) confirm any patent claims determined to be patentable;

(C) incorporate into the patent any amended or new claims determined to be patentable;

(D) make any changes in the description approved during reexamination;

(E) include any statutory disclaimer or terminal disclaimer filed by the patent owner;

(F) identify unamended claims which were held invalid on final holding by another forum on any grounds;

(G) identify any patent claims not reexamined;

(H) be mailed on the day of its date to the patent owner at the address provided for in 37 CFR 1.33(c), and a copy will be mailed to the requester; and

(I) refer to patent claims, dependent on amended claims, determined to be patentable.

If a certificate issues which cancels all of the claims of the patent, no further Office proceedings will be conducted with regard to that patent or any reissue application or reexamination request directed thereto. >However, in an extremely rare situation in which a reissue application is copending with a reexamination proceeding in which a reexamination certificate subsequently issues cancelling all claims of the patent, the patent owner may file a petition under 37 CFR 1.183 requesting waiver of the provisions of 37 CFR 1.997(d), to address claims that were pending in the reissue application prior to the issuance of the certificate. Any such petition must be accompanied by a paper cancelling any claim within the scope of the claims canceled by the certificate and pointing out why the claims remaining in the reissue application can be patentable, despite the cancellation of all the patent claims by certificate, i.e., why the remaining claims are patentable over the cancelled claims. Such a paper will be available to the examiner, should the petition be granted.<

If a reexamination proceeding is concluded by the grant of a reissue patent as provided for in 37 CFR 1.991, the reissue patent will constitute the reexamination certificate required by 35 U.S.C. 316.

If all of the claims are disclaimed in a patent under reexamination, a certificate under 37 CFR 1.997 will be issued indicating that fact.

A notice of the issuance of each reexamination certificate will be published in the *Official Gazette* on its date of issuance in a format similar to that used for reissue patents. See MPEP § 2691.

2689 Reexamination Review [R-7]

After a reexamination case is acted on by the examiner and all premailing clerical processing is completed, the case is forwarded to the **>Central Reexamination Unit (CRU) Supervisory Patent Examiner (SPE) or Technology Center (TC) Quality Assurance Specialist (QAS)<. The *>CRU SPE/TC QAS< (with the aid of the paralegals or other technical support who might be assigned as backup) will then (A) procedurally review the examiner's action for compliance with the applicable provisions of the reexamination statute and regulations, and with reexamination policy, practice and procedure, (B) do a completeness review of the action to ensure that all issues and arguments raised by all parties are appropriately developed, considered and addressed, and that all materials of the action (e.g., references, forms and cover sheets) are present and appropriately completed and (C) hand carry any paper parts of the file directly to the Reexamination Legal Advisor (RLA). The RLA will do a general review of the examiner's action for correct application of reexamination law, rules, procedure and policy.

In addition to the *>CRU SPE/TC QAS< review of the reexamination cases, a panel review is made prior to issuing Office actions as set forth in MPEP § 2671.03.

After a Notice of Intent to Issue *Inter Partes* Reexamination Certificate (NIRC) has been issued and prosecution has been terminated, the reexamination case is screened by the Office of Patent Legal Administration for obvious errors and proper preparation, in order to issue a reexamination certificate. The above

identified review processes are appropriate vehicles for providing information on the uniformity of practice, identifying problem areas and providing feedback to the Office personnel that process and examine reexamination cases.

2690 Format of *Inter Partes* Reexamination Certificate [R-3]

An *inter partes* reexamination certificate is issued at the close of each *inter partes* reexamination proceeding in which reexamination has been ordered under 37 CFR 1.931, unless the *inter partes* reexamination proceeding is merged with a reissue application pursuant to 37 CFR 1.991. In that situation, the *inter partes* reexamination proceeding is *>concluded< by the grant of a reissue patent, the reissue patent will constitute the reexamination certificate. It should be noted that where an *ex parte* reexamination is merged with an *inter partes* reexamination proceeding, an *inter partes* reexamination certificate will issue for the merged proceeding.

The *inter partes* reexamination certificate is formatted much the same as the title page of current U.S. patents.

The certificate is titled "*INTER PARTES* REEXAMINATION CERTIFICATE." The title is followed by an "ordinal" number in parentheses, such as "(5^{th})", which indicates that it is the fifth *inter partes* reexamination certificate that has issued. The *inter partes* reexamination certificates will be numbered in a separate and new ordinal sequence, beginning with "(1^{st})". The *ex parte* reexamination certificates will continue the ordinal numbering sequence that has already been established for *ex parte* reexamination certificates.

The certificate number will always be the patent number of the original patent followed by a two-character "kind code" suffix. The "kind code" suffix is **C1** for a first reexamination certificate, **C2** for a second reexamination certificate for the same patent, etc.

For example, "1" is provided in the certificate for the first reexamination certificate and "2" for the second reexamination certificate. Thus, a second reexamination certificate for the same patent would be designated as "C2" preceded by the patent number. The next higher number will be given to the reexamination proceeding for which the reexamination certificate is issued, regardless of whether the proceeding is an *ex parte* reexamination or an *inter partes* reexamination proceeding.

Note that "B1" *ex parte* reexamination certificates that were issued prior to January 1, 2001, included the patent number of the original patent followed by the letter "B." Where the first reexamination certificate was a "B1" certificate and an *inter partes* reexamination certificate then issues, the *inter partes* reexamination certificate will be designated "C2" and NOT "C1." Thus, by looking at the number following the "C," one will be able to ascertain the number of reexamination certificates that preceded the certificate being viewed, i.e., how many prior reexamination certificates have been issued for the patent. (If this were not the practice and C1 were used, one would not be able to ascertain from the number on the certificate how many B certificates came before.)

The certificate denotes the date the certificate was issued at INID code [45] (see MPEP § 901.04). The title, name of inventor, international and U.S. classification, the abstract, and the list of prior art documents appear at their respective INID code designations, much the same as is presently done in utility patents.

The primary differences, other than as indicated above, are:

(A) The filing date and number of the request is preceded by "Reexamination Request;"

(B) The patent for which the certificate is now issued is identified under the heading "Reexamination Certificate for"; and

(C) The prior art documents cited at INID code [56] will be only those which are part of the reexamination file and cited on forms PTO-1449 *>, PTO/SB/08A or 08B, or PTO/SB/42 (or on a form having a format equivalent to one of these forms) (and the documents< have not been crossed out because they were not considered) and PTO-892.

Finally, the certificate will identify the patent claims which were confirmed as patentable, canceled, disclaimed, and those claims not examined. Only the status of the confirmed, canceled, disclaimed, and not examined claims will be indicated in the certificate. The text of the new and amended claims will be printed in the certificate. Any new claims will be printed in the certificate completely in italics, and any amended claims will be printed in the certificate with

italics and bracketing indicating the amendments thereto. Any prior court decisions will be identified, as well as the citation of the court decisions.

2691 Notice of *Inter Partes* Reexamination Certificate Issuance in *Official Gazette* [R-3]

The *Official Gazette* notice will include bibliographic information, and an indication of the status of each claim after the *>conclusion< of the reexamination proceeding. Additionally, a representative claim will be published along with an indication of any changes to the specification or drawing.

The notice of reexamination certificate will clearly state that it is a certificate for a concluded *inter partes* reexamination proceeding (as opposed to an *ex parte* reexamination proceeding).

2692 Distribution of Certificate [R-3]

**>An e-copy< of the *inter partes* reexamination certificate **>will be associated with the e-copy< of the patent in the search files. A copy of the certificate will also be made a part of any patent copies prepared by the Office subsequent to the issuance of the certificate.

A copy of the *inter partes* reexamination certificate will also be forwarded to all depository libraries and to those foreign offices which have an exchange agreement with the Office.

2693 Intervening Rights [Added R-2]

35 U.S.C. 316. Certificate of patentability, unpatentability and claim cancellation.

*****

(b) AMENDED OR NEW CLAIM.— Any proposed amended or new claim determined to be patentable and incorporated into a patent following an inter partes reexamination proceeding shall have the same effect as that specified in section 252 of this title for reissued patents on the right of any person who made, purchased, or used within the United States, or imported into the United States, anything patented by such proposed amended or new claim, or who made substantial preparation therefor, prior to issuance of a certificate under the provisions of subsection (a) of this section.

The situation of intervening rights resulting from *inter partes* reexamination proceedings parallels the intervening rights situation resulting from reissue patents or from *ex parte* reexamination proceedings. The rights detailed in 35 U.S.C. 252 for reissue apply equally in reexamination and reissue situations. See *Fortel Corp. v. Phone-Mate, Inc.*, 825 F.2d 1577, 3 USPQ2d 1771 (Fed. Cir. 1987); *Kaufman Co., Inc. v. Lantech, Inc.*, 807 F.2d 970, 1 USPQ2d 1202 (Fed. Cir. 1986); *Tennant Co. v. Hako Minuteman, Inc.*, 4 USPQ2d 1167 (N.D. Ill. 1987); and *Key Mfg. Group, Inc. v. Microdot, Inc.*, 679 F.Supp. 648, 4 USPQ2d 1687 (E.D. Mich. 1987).

2694 Concluded Reexamination Proceedings [R-7]

Inter partes reexamination proceedings may be concluded in one of three ways:

(A) The prosecution of the reexamination proceeding may be *>brought to an end,< and the proceeding itself concluded, by a denial of reexamination>,< or vacating the reexamination proceeding**>, or terminating the reexamination proceeding. (In these instances, no reexamination certificate is issued).<

>

(1) < A * reexamination file (IFW or paper) in which reexamination has been denied or vacated should be forwarded to the Central Reexamination Unit (CRU) if the file is not already there. The CRU will process the file to provide the partial refund set forth in 37 CFR 1.26(c). The reexamination file will then be given **>an 820< status (reexamination denied) or **>an 822< status (reexamination vacated). A copy of the PALM "Application Number Information" screen and the "Contents" screen is printed, the printed copy is annotated by adding the comment "PROCEEDING CONCLUDED," and the annotated copy is then scanned into IFW using the miscellaneous letter document code.

>

(2) A reexamination file (IFW or paper) in which reexamination has been terminated should be forwarded to the CRU if the file is not already there. The reexamination file will then be given an 820 status (reexamination terminated). A copy of the PALM "Application Number Information" screen and the "Contents" screen is printed, the printed copy is annotated by adding the comment "PROCEEDING CONCLUDED," and the annotated copy is then scanned

into IFW using the miscellaneous letter document code. A partial refund is not made in this instance, since the reexamination was properly commenced and addressed, and was terminated later based upon a court decision, or the like.<

(B) The proceeding may be concluded under 37 CFR 1.997(b) with the issuance of a reexamination certificate.

A reexamination proceeding that is to be concluded in this manner should be processed as set forth in MPEP § 2687 and then forwarded to the CRU for review, mailing of the NIRC, and forwarding the file to the Office of *>Data Management<.

(C) The proceeding may be concluded under 37 CFR 1.997(e) where the reexamination proceeding has been merged with a reissue proceeding and a reissue patent is granted; an individual reexamination certificate is not issued, but rather the reissue patent serves as the certificate.

A reexamination proceeding that is concluded in this manner should be processed, together with the reissue proceeding, as set forth in MPEP § 1455 and forwarded to the Office of Patent Legal Administration in accordance with MPEP § 1456.

2695 Reexamination of a Reexamination [Added R-2]

See MPEP § 2295 for guidance for the processing and examination of a reexamination request filed on a patent for which a reexamination certificate has already issued, or a reexamination certificate issues on a prior reexamination, while the new reexamination is pending. This reexamination request is generally referred to as a "reexamination of a reexamination." A reexamination of a reexamination is processed in accordance with the guidelines set forth in MPEP § 2295 regardless of whether the reexamination certificate was issued for an *ex parte* reexamination or an *inter partes* reexamination, and regardless of whether the pending reexamination proceeding is an *ex parte* reexamination or an *inter partes* reexamination.

2696 USPTO Forms To Be Used in *Inter Partes* Reexamination [R-3]

The correct forms which are to be used by the Office in *inter partes* reexamination actions and processing are as follows (these forms are not reproduced below):

(A) NOTICE OF FAILURE TO COMPLY WITH *INTER PARTES* REEXAMINATION REQUEST FEE REQUIREMENTS	PTOL 2057
(B) NOTICE OF *INTER PARTES* REEXAMINATION REQUEST FILING DATE	PTOL 2058
(C) NOTICE OF INCOMPLETE REQUEST FOR *INTER PARTES* REEXAMINATION	PTOL 2059
(D) NOTICE OF ASSIGNMENT OF *INTER PARTES* REEXAMINATION REQUEST	PTOL 2060
(E) NOTE TO *>SPE</EXAMINER/TC PERSONNEL OF *INTER PARTES* REEXAMINATION DEADLINES	PTOL 2061
(F) NOTICE OF CONCURRENT PROCEEDING(S)	PTOL 2062
(G) ORDER GRANTING/DENYING REQUEST FOR *INTER PARTES* REEXAMINATION	PTOL 2063
(H) OFFICE ACTION IN *INTER PARTES* REEXAMINATION	PTOL 2064
(I) ACTION CLOSING PROSECUTION (37 CFR 1.949)	PTOL 2065

A user Request for Reexamination Transmittal Form, PTO/SB/58, is provided for public use in filing a request for *inter partes* reexamination; its use, however, is not mandatory.

Chapter 2700 Patent Terms and Extensions

2701 Patent Term [R-2]

35 U.S.C. 154. Contents and term of patent; provisional rights.

(a) IN GENERAL.—

*****

(2) TERM.—Subject to the payment of fees under this title, such grant shall be for a term beginning on the date on which the patent issues and ending 20 years from the date on which the application for the patent was filed in the United States or, if the application contains a specific reference to an earlier filed application or applications under section 120, 121, or 365(c) of this title, from the date on which the earliest such application was filed.

(3) PRIORITY.—Priority under section 119, 365(a), or 365(b) of this title shall not be taken into account in determining the term of a patent.

*****

(c) CONTINUATION.—

(1) DETERMINATION.—The term of a patent that is in force on or that results from an application filed before the date that is 6 months after the date of the enactment of the Uruguay Round Agreements Act shall be the greater of the 20-year term as provided in subsection (a), or 17 years from grant, subject to any terminal disclaimers.

(2) REMEDIES.—The remedies of sections 283, 284, and 285 of this title shall not apply to acts which —

(A) were commenced or for which substantial investment was made before the date that is 6 months after the date of the enactment of the Uruguay Round Agreements Act; and

(B) became infringing by reason of paragraph (1).

(3) REMUNERATION.—The acts referred to in paragraph (2) may be continued only upon the payment of an equitable remuneration to the patentee that is determined in an action brought under chapter 28 and chapter 29 (other than those provisions excluded by paragraph (2)) of this title.

*****

For applications filed on or after June 8, 1995, Section 532(a)(1) of the Uruguay Round Agreements Act (Pub. L. 103-465, 108 Stat. 4809 (1994)) amended 35 U.S.C. 154 to provide that the term of a patent (other than a design patent) begins on the date the patent issues and ends on the date that is twenty years from the date on which the application for the patent was filed in the United States or, if the application contains a specific reference to an earlier filed application or applications under 35 U.S.C. 120, 121, or 365(c), twenty years from the filing date of the

earliest of such application(s). This patent term provision is referred to as the "twenty-year term." Design patents have a term of fourteen years from the date of patent grant. See 35 U.S.C 173 and MPEP § 1505.

All patents (other than design patents) that were in force on June 8, 1995, or that issued on an application that was filed before June 8, 1995, have a term that is the greater of the "twenty-year term" or seventeen years from the patent grant. See 35 U.S.C. 154(c). A patent granted on an international application filed before June 8, 1995, and which entered the national stage under 35 U.S.C. 371 before, on or after June 8, 1995, will have a term that is the greater of seventeen years from the date of grant or twenty years from the international filing date or any earlier filing date relied upon under 35 U.S.C. 120, 121 or 365(c). The terms of these patents are subject to reduction by any applicable terminal disclaimers (discussed below).

CONTINUING APPLICATIONS

A patent granted on a continuation, divisional, or continuation-in-part application that was filed on or after June 8, 1995, will have a term which ends twenty years from the filing date of earliest application for which a benefit is claimed under 35 U.S.C. 120, 121, or 365(c), regardless of whether the application for which a benefit is claimed under 35 U.S.C. 120, 121, or 365(c) was filed prior to June 8, 1995.

INTERNATIONAL APPLICATIONS

A patent granted on an international application filed on or after June 8, 1995 and which enters the national stage under 35 U.S.C. 371 will have a term which ends twenty years from the filing date of the international application. A continuation or a continuation-in-part application claiming benefit under 35 U.S.C. 365(c) of an international application filed under 35 U.S.C. 363 designating the United States will have a term which ends twenty years from the filing date of the parent international application.

FOREIGN PRIORITY

Foreign priority under 35 U.S.C. 119(a)-(d), 365(a), or 365(b) is not considered in determining the term of a patent. Accordingly, an application claiming priority under 35 U.S.C. 365(a) or 365(b) has a term which ends twenty years from the filing date of the application in the United States and not the prior international application.

DOMESTIC PRIORITY UNDER 35 U.S.C. 119(e)

Domestic priority under 35 U.S.C. 119(e) to one or more U.S. provisional applications is not considered in the calculation of the twenty-year term. See 35 U.S.C. 154(a)(3).

EXPIRATION DATE OF PATENTS WITH TERMINAL DISCLAIMERS

To determine the "original expiration date" of a patent subject to a terminal disclaimer, it is generally necessary to examine the language of the terminal disclaimer in the patent file history. If the disclaimer disclaims the terminal portion of the term of the patent which would extend beyond the expiration date of an earlier issued patent, then the expiration date of the earlier issued patent determines the expiration date of the patent subject to the terminal disclaimer. Before June 8, 1995, the terminal disclaimer date was printed on the face of the patent; the date was determined from the expected expiration date of the earlier issued patent based on a seventeen year term measured from grant. When 35 U.S.C. 154 was amended such that all patents (other than design patents) that were in force on June 8, 1995, or that issued on an application that was filed before June 8, 1995, have a term that is the greater of the "twenty year term" or seventeen years from the patent grant, the terminal disclaimer date as printed on many patents became incorrect. If the terminal disclaimer of record in the patent file disclaims the terminal portion of the patent subsequent to the full statutory term of a referenced patent (without identifying a specific date), then the date printed on the face of the patent is incorrect when the full statutory term of the referenced patent is changed as a result of 35 U.S.C. 154(c). That is, the referenced patent's "twenty year term" is longer than the seventeen year term. In such a case, a patentee may request a Certificate of Correction under 37 CFR 1.323 to correct the information printed on the face of the patent. However, if the terminal disclaimer of record in the patent file disclaims the terminal portion of the patent subsequent to a specific date, without reference to the full statutory term of a referenced patent, then the expiration date is the date specified. Several decisions related to disclaimers are posted in the Freedom

of Information Act (FOIA) section of the USPTO Internet site (www.uspto.gov).

PATENT TERM EXTENSIONS OR ADJUSTMENTS

See MPEP § 2710, *et seq.*, for patent term extensions or adjustments for delays within the USPTO under 35 U.S.C. 154 for utility and plant patents issuing on applications filed on or after June 8, 1995. Patents that issue from applications filed before June 8, 1995, are not eligible for >patent term extension or patent< term adjustment under 35 U.S.C. 154.

See MPEP § 2750 *et. seq.* for patent term extensions available under 35 U.S.C. 156 for premarket regulatory review. The patent term extension that may be available under 35 U.S.C. 156 for premarket regulatory review is separate from and will be added to any extension that may be available under former and current 35 U.S.C. 154. While patents that issue from applications filed before June 8, 1995, are not eligible for term adjustment under 35 U.S.C. 154, such patents may be extended under 35 U.S.C. 156.

2710 Term Extensions or Adjustments for Delays Within the USPTO Under 35 U.S.C. 154 [R-2]

Utility and plant patents issuing on applications filed on or after June 8, 1995, but before May 29, 2000, are eligible for the patent term ** extension * provisions of former 35 U.S.C. 154(b) and 37 CFR 1.701. See MPEP § 2720. Utility and plant patents issuing on applications filed on or after May 29, 2000 are eligible for the patent term adjustment provisions of 35 U.S.C. 154(b)(amended, effective May 29, 2000) and 37 CFR 1.702-1.705. See MPEP § 2730.

Plant and utility patents issuing on applications filed before June 8, 1995 which have a term that is the greater of the "twenty-year term" (see MPEP § 2701) or seventeen years from patent grant are not eligible for term extension or adjustment due to delays in processing the patent application by the United States Patent and Trademark Office.

Since the term of a design patent is not affected by the length of time prosecution takes place, there are no patent term adjustment provisions for design patents.

2720 Applications Filed Between June 8, 1995, and May 28, 2000 [R-2]

Former 35 U.S.C. 154. Contents and term of patent.

*****

(b) TERM EXTENSION.—

(1) INTERFERENCE DELAY OR SECRECY ORDERS.—If the issue of an original patent is delayed due to a proceeding under section 135(a) of this title, or because the application for patent is placed under an order pursuant to section 181 of this title, the term of the patent shall be extended for the period of delay, but in no case more than 5 years.

(2) EXTENSION FOR APPELLATE REVIEW. —If the issue of a patent is delayed due to appellate review by the Board of Patent Appeals and Interferences or by a Federal court and the patent is issued pursuant to a decision in the review reversing an adverse determination of patentability, the term of the patent shall be extended for a period of time but in no case more than 5 years. A patent shall not be eligible for extension under this paragraph if it is subject to a terminal disclaimer due to the issue of another patent claiming subject matter that is not patentably distinct from that under appellate review.

(3) LIMITATIONS.—The period of extension referred to in paragraph (2)—

(A) shall include any period beginning on the date on which an appeal is filed under section 134 or 141 of this title, or on which an action is commenced under section 145 of this title, and ending on the date of a final decision in favor of the applicant;

(B) shall be reduced by any time attributable to appellate review before the expiration of 3 years from the filing date of the application for patent; and

(C) shall be reduced for the period of time during which the applicant for patent did not act with due diligence, as determined by the Commissioner.

(4) LENGTH OF EXTENSION.—The total duration of all extensions of a patent under this subsection shall not exceed 5 years.

*****

37 CFR 1.701. Extension of patent term due to examination delay under the Uruguay Round Agreements Act (original applications, other than designs, filed on or after June 8, 1995, and before May 29, 2000).

(a) A patent, other than for designs, issued on an application filed on or after June 8, 1995, is entitled to extension of the patent term if the issuance of the patent was delayed due to:

(1) Interference proceedings under 35 U.S.C. 135(a); and/or

(2) The application being placed under a secrecy order under 35 U.S.C. 181; and/or

(3) **>Appellate review by the Board of Patent Appeals and Interferences or by a Federal court under 35 U.S.C. 141 or 145, if the patent was issued pursuant to a decision in the review reversing an adverse determination of patentability and if the patent is not subject to a terminal disclaimer due to the issuance of

another patent claiming subject matter that is not patentably distinct from that under appellate review. If an application is remanded by a panel of the Board of Patent Appeals and Interferences and the remand is the last action by a panel of the Board of Patent Appeals and Interferences prior to the mailing of a notice of allowance under 35 U.S.C. 151 in the application, the remand shall be considered a decision in the review reversing an adverse determination of patentability as that phrase is used in 35 U.S.C. 154(b)(2) as amended by section 532(a) of the Uruguay Round Agreements Act, Public Law 103-465, 108 Stat. 4809, 4983-85 (1994), and a final decision in favor of the applicant under paragraph (c)(3) of this section. A remand by a panel of the Board of Patent Appeals and Interferences shall not be considered a decision in the review reversing an adverse determination of patentability as provided in this paragraph if there is filed a request for continued examination under 35 U.S.C. 132(b) that was not first preceded by the mailing, after such remand, of at least one of an action under 35 U.S.C. 132 or a notice of allowance under 35 U.S.C. 151.<

(b) The term of a patent entitled to extension under paragraph (a) of this section shall be extended for the sum of the periods of delay calculated under paragraphs (c)(1), (c)(2), (c)(3) and (d) of this section, to the extent that these periods are not overlapping, up to a maximum of five years. The extension will run from the expiration date of the patent.

(c)(1) The period of delay under paragraph (a)(1) of this section for an application is the sum of the following periods, to the extent that the periods are not overlapping:

(i) With respect to each interference in which the application was involved, the number of days, if any, in the period beginning on the date the interference was declared or redeclared to involve the application in the interference and ending on the date that the interference was terminated with respect to the application; and

(ii) The number of days, if any, in the period beginning on the date prosecution in the application was suspended by the Patent and Trademark Office due to interference proceedings under 35 U.S.C. 135(a) not involving the application and ending on the date of the termination of the suspension.

(2) The period of delay under paragraph (a)(2) of this section for an application is the sum of the following periods, to the extent that the periods are not overlapping:

(i) The number of days, if any, the application was maintained in a sealed condition under 35 U.S.C. 181;

(ii) The number of days, if any, in the period beginning on the date of mailing of an examiner's answer under § 1.193 in the application under secrecy order and ending on the date the secrecy order and any renewal thereof was removed;

(iii) The number of days, if any, in the period beginning on the date applicant was notified that an interference would be declared but for the secrecy order and ending on the date the secrecy order and any renewal thereof was removed; and

(iv) The number of days, if any, in the period beginning on the date of notification under § 5.3(c) and ending on the date of mailing of the notice of allowance under § 1.311.

(3) The period of delay under paragraph (a)(3) of this section is the sum of the number of days, if any, in the period beginning on the date on which an appeal to the Board of Patent Appeals and Interferences was filed under 35 U.S.C. 134 and ending on the date of a final decision in favor of the applicant by the Board of Patent Appeals and Interferences or by a Federal court in an appeal under 35 U.S.C. 141 or a civil action under 35 U.S.C. 145.

(d) The period of delay set forth in paragraph (c)(3) shall be reduced by:

(1) Any time during the period of appellate review that occurred before three years from the filing of the first national application for patent presented for examination; and

**>

(2) Any time during the period of appellate review, as determined by the Director, during which the applicant for patent did not act with due diligence. In determining the due diligence of an applicant, the Director may examine the facts and circumstances of the applicant's actions during the period of appellate review to determine whether the applicant exhibited that degree of timeliness as may reasonably be expected from, and which is ordinarily exercised by, a person during a period of appellate review.<

(e) The provisions of this section apply only to original patents, except for design patents, issued on applications filed on or after June 8, 1995, and before May 29, 2000.

The twenty-year term of a patent issuing from an application filed on or after June 8, 1995, and before May 29, 2000, may be extended for a maximum of five years for delays in the issuance of the patent due to interferences, secrecy orders and/or successful appeals to the Board of Patent Appeals and Interferences >(Board)< or the Federal courts in accordance with 37 CFR 1.701. See former 35 U.S.C. 154(b), as reproduced above. Extensions for successful appeals are limited in that the patent must not be subject to a terminal disclaimer. Further, the period of extension will be reduced by any time attributable to appellate review within three years of the filing date of the >first national< application >for patent<, and the period of extension for appellate review will be reduced by any time during which the applicant did not act with due diligence. The patent term extension that may be available under 35 U.S.C. 156 for premarket regulatory review is separate from and will be added to any extension that may be available under former and current 35 U.S.C. 154. See MPEP § 2750 *et seq.* 35 U.S.C. 154(b) was amended, effective May 29, 2000, to provide for patent term adjustment for applications filed on or after May 29, 2000, but the provisions of former 35 U.S.C. 154(b), as reproduced above, continue to apply to applications filed between and including June 8, 1995 and May 28, 2000.

Examiners make no decisions regarding patent term extensions. Extensions under former 35 U.S.C. 154 will be calculated by PALM and will be printed on the Notice of Allowance and Issue Fee Due. Any patent term extension granted as a result of administrative delay pursuant to 37 CFR 1.701 will also be printed on the face of the patent in generally the same location as the terminal disclaimer information. The term of a patent will be readily discernible from the face of the patent (i.e., from the filing date, continuing data, issue date and any patent term extensions printed on the patent).

If applicant disagrees with the patent term extension ** information printed on the Notice of Allowance and **>Fee(s)< Due, applicant may request review by way of a petition under 37 CFR 1.181. To avoid loss of patent term, however, any such petitions filed during the pendency of the application will not be decided until after issuance of the patent. If the petition is granted, a Certificate of Correction pursuant to 37 CFR 1.322 will be issued. If **>the patent issues with a different patent term extension value than that indicated on the Notice of Allowance or Office computer records (Patent Application Information Retrieval (PAIR))<, patentee may seek correction of the patent term extension information by filing a request for a Certificate of Correction pursuant to 37 CFR 1.322.

>Effective May 24, 2004, 37 CFR 1.701(a)(3) was amended to indicate that certain remands by the Board shall be considered “a decision in the review reversing an adverse determination of patentability” for patent term extension purposes. Any request for reconsideration of the patent term extension indicated on a patent resulting from an application in which the notice of allowance was mailed before May 24, 2004 on the basis of the changes to 37 CFR 1.701 must be filed no later than July 21, 2004.<

Petitions and Certificates of Correction regarding patent term extension under former 35 U.S.C. 154(b) should be addressed to **>Mail Stop Patent Ext., Commissioner for Patents, P.O. Box 1450, Alexandria, Virginia 22313-1450<.

2730 Applications Filed on or After May 29, 2000; Grounds for Adjustment [R-2]

35 U.S.C. 154. Contents and term of patent; provisional rights.

*****

(b) ADJUSTMENT OF PATENT TERM.—

(1) PATENT TERM GUARANTEES.—

(A) GUARANTEE OF PROMPT PATENT AND TRADEMARK OFFICE RESPONSES.— Subject to the limitations under paragraph (2), if the issue of an original patent is delayed due to the failure of the Patent and Trademark Office to—

(i) provide at least one of the notifications under section 132 of this title or a notice of allowance under section 151 of this title not later than 14 months after—

(I) the date on which an application was filed under section 111(a) of this title; or

(II) the date on which an international application fulfilled the requirements of section 371 of this title;

(ii) respond to a reply under section 132, or to an appeal taken under section 134, within 4 months after the date on which the reply was filed or the appeal was taken;

(iii) act on an application within 4 months after the date of a decision by the Board of Patent Appeals and Interferences under section 134 or 135 or a decision by a Federal court under section 141, 145, or 146 in a case in which allowable claims remain in the application; or

(iv) issue a patent within 4 months after the date on which the issue fee was paid under section 151 and all outstanding requirements were satisfied, the term of the patent shall be extended 1 day for each day after the end of the period specified in clause (i), (ii), (iii), or (iv), as the case may be, until the action described in such clause is taken.

(B) GUARANTEE OF NO MORE THAN 3-YEAR APPLICATION PENDENCY.— Subject to the limitations under paragraph (2), if the issue of an original patent is delayed due to the failure of the United States Patent and Trademark Office to issue a patent within 3 years after the actual filing date of the application in the United States, not including—

(i) any time consumed by continued examination of the application requested by the applicant under section 132(b);

(ii) any time consumed by a proceeding under section 135(a), any time consumed by the imposition of an order under section 181, or any time consumed by appellate review by the Board of Patent Appeals and Interferences or by a Federal court; or

(iii) any delay in the processing of the application by the United States Patent and Trademark Office requested by the applicant except as permitted by paragraph (3)(C), the term of the patent shall be extended 1 day for each day after the end of that 3-year period until the patent is issued.

(C) GUARANTEE OR ADJUSTMENTS FOR DELAYS DUE TO INTERFERENCES, SECRECY ORDERS,

AND APPEALS.— Subject to the limitations under paragraph (2), if the issue of an original patent is delayed due to—

(i) a proceeding under section 135(a);

(ii) the imposition of an order under section 181; or

(iii) appellate review by the Board of Patent Appeals and Interferences or by a Federal court in a case in which the patent was issued under a decision in the review reversing an adverse determination of patentability, the term of the patent shall be extended 1 day for each day of the pendency of the proceeding, order, or review, as the case may be.

(2) LIMITATIONS.—

(A) IN GENERAL.— To the extent that periods of delay attributable to grounds specified in paragraph (1) overlap, the period of any adjustment granted under this subsection shall not exceed the actual number of days the issuance of the patent was delayed.

(B) DISCLAIMED TERM.— No patent the term of which has been disclaimed beyond a specified date may be adjusted under this section beyond the expiration date specified in the disclaimer.

(C) REDUCTION OF PERIOD OF ADJUSTMENT.—

(i) The period of adjustment of the term of a patent under paragraph (1) shall be reduced by a period equal to the period of time during which the applicant failed to engage in reasonable efforts to conclude prosecution of the application.

(ii) With respect to adjustments to patent term made under the authority of paragraph (1)(B), an applicant shall be deemed to have failed to engage in reasonable efforts to conclude processing or examination of an application for the cumulative total of any periods of time in excess of 3 months that are taken to respond to a notice from the Office making any rejection, objection, argument, or other request, measuring such 3-month period from the date the notice was given or mailed to the applicant.

(iii) The Director shall prescribe regulations establishing the circumstances that constitute a failure of an applicant to engage in reasonable efforts to conclude processing or examination of an application.

(3) PROCEDURES FOR PATENT TERM ADJUSTMENT DETERMINATION.—

(A) The Director shall prescribe regulations establishing procedures for the application for and determination of patent term adjustments under this subsection.

(B) Under the procedures established under subparagraph (A), the Director shall—

(i) make a determination of the period of any patent term adjustment under this subsection, and shall transmit a notice of that determination with the written notice of allowance of the application under section 151; and

(ii) provide the applicant one opportunity to request reconsideration of any patent term adjustment determination made by the Director.

(C) The Director shall reinstate all or part of the cumulative period of time of an adjustment under paragraph (2)(C) if the applicant, prior to the issuance of the patent, makes a showing that, in spite of all due care, the applicant was unable to respond within the 3-month period, but in no case shall more than three additional months for each such response beyond the original 3-month period be reinstated.

(D) The Director shall proceed to grant the patent after completion of the Director's determination of a patent term adjustment under the procedures established under this subsection, notwithstanding any appeal taken by the applicant of such determination.

(4) APPEAL OF PATENT TERM ADJUSTMENT DETERMINATION.—

(A) An applicant dissatisfied with a determination made by the Director under paragraph (3) shall have remedy by a civil action against the Director filed in the United States District Court for the District of Columbia within 180 days after the grant of the patent. Chapter 7 of title 5, United States Code, shall apply to such action. Any final judgment resulting in a change to the period of adjustment of the patent term shall be served on the Director, and the Director shall thereafter alter the term of the patent to reflect such change.

(B) The determination of a patent term adjustment under this subsection shall not be subject to appeal or challenge by a third party prior to the grant of the patent.

*****

37 CFR 1.702. Grounds for adjustment of patent term due to examination delay under the Patent Term Guarantee Act of 1999 (original applications, other than designs, filed on or after May 29, 2000).

(a) *Failure to take certain actions within specified time frames.* Subject to the provisions of 35 U.S.C. 154(b) and this subpart, the term of an original patent shall be adjusted if the issuance of the patent was delayed due to the failure of the Office to:

(1) Mail at least one of a notification under 35 U.S.C. 132 or a notice of allowance under 35 U.S.C. 151 not later than fourteen months after the date on which the application was filed under 35 U.S.C. 111(a) or fulfilled the requirements of 35 U.S.C. 371 in an international application;

(2) Respond to a reply under 35 U.S.C. 132 or to an appeal taken under 35 U.S.C. 134 not later than four months after the date on which the reply was filed or the appeal was taken;

(3) Act on an application not later than four months after the date of a decision by the Board of Patent Appeals and Interferences under 35 U.S.C. 134 or 135 or a decision by a Federal court under 35 U.S.C. 141, 145, or 146 where at least one allowable claim remains in the application; or

(4) Issue a patent not later than four months after the date on which the issue fee was paid under 35 U.S.C. 151 and all outstanding requirements were satisfied.

(b) *Failure to issue a patent within three years of the actual filing date of the application.* Subject to the provisions of 35 U.S.C. 154(b) and this subpart, the term of an original patent shall be adjusted if the issuance of the patent was delayed due to the failure of the Office to issue a patent within three years after the date on which the application was filed under 35 U.S.C. 111(a) or the national stage commenced under 35 U.S.C. 371(b) or (f) in an international application, but not including:

(1) Any time consumed by continued examination of the application under 35 U.S.C. 132(b);

(2) Any time consumed by an interference proceeding under 35 U.S.C. 135(a);

(3) Any time consumed by the imposition of a secrecy order under 35 U.S.C. 181;

(4) Any time consumed by review by the Board of Patent Appeals and Interferences or a Federal court; or

(5) Any delay in the processing of the application by the Office that was requested by the applicant.

(c) *Delays caused by interference proceedings*. Subject to the provisions of 35 U.S.C. 154(b) and this subpart, the term of an original patent shall be adjusted if the issuance of the patent was delayed due to interference proceedings under 35 U.S.C. 135(a).

(d) *Delays caused by secrecy order*. Subject to the provisions of 35 U.S.C. 154(b) and this subpart, the term of an original patent shall be adjusted if the issuance of the patent was delayed due to the application being placed under a secrecy order under 35 U.S.C. 181.

(e) **>*Delays caused by successful appellate review*. Subject to the provisions of 35 U.S.C. 154(b) and this subpart, the term of an original patent shall be adjusted if the issuance of the patent was delayed due to review by the Board of Patent Appeals and Interferences under 35 U.S.C. 134 or by a Federal court under 35 U.S.C. 141 or 145, if the patent was issued under a decision in the review reversing an adverse determination of patentability. If an application is remanded by a panel of the Board of Patent Appeals and Interferences and the remand is the last action by a panel of the Board of Patent Appeals and Interferences prior to the mailing of a notice of allowance under 35 U.S.C. 151 in the application, the remand shall be considered a decision by the Board of Patent Appeals and Interferences as that phrase is used in 35 U.S.C. 154(b)(1)(A)(iii), a decision in the review reversing an adverse determination of patentability as that phrase is used in 35 U.S.C. 154(b)(1)(C)(iii), and a final decision in favor of the applicant under § 1.703(e). A remand by a panel of the Board of Patent Appeals and Interferences shall not be considered a decision in the review reversing an adverse determination of patentability as provided in this paragraph if there is filed a request for continued examination under 35 U.S.C. 132(b) that was not first preceded by the mailing, after such remand, of at least one of an action under 35 U.S.C. 132 or a notice of allowance under 35 U.S.C. 151.<

(f) The provisions of this section and §§1.703 through 1.705 apply only to original applications, except applications for a design patent, filed on or after May 29, 2000, and patents issued on such applications.

35 U.S.C. 154(b), as amended effective May 29, 2000, and 37 CFR 1.702-1.705 apply to utility and plant patent applications filed on or after May 29, 2000. All references to 35 U.S.C. 154(b) hereinafter are to 35 U.S.C. 154(b), as amended effective May 29, 2000.

37 CFR 1.702 sets forth the bases for patent term adjustment under 35 U.S.C. 154(b)(1).

37 CFR 1.702(a) indicates that a patent is entitled to patent term adjustment if the Office fails to perform certain acts of examination within specified time frames (35 U.S.C. 154(b)(1)(A)).

37 CFR 1.702(b) indicates that a patent is entitled to patent term adjustment if, subject to a number of limitations, the Office fails to issue a patent within three years of the actual filing date of the application (35 U.S.C. 154(b)(1)(B)). In the case of an international application, the phrase "actual filing date of the application in the United States" means the date the national stage commenced under 35 U.S.C. 371(b) or (f). See *Changes to Implement Patent Term Adjustment Under Twenty-Year Patent Term*, 65 *FR* 56366, 56382-84, (Sept. 18, 2000), 1239 *Off. Gaz. Pat. Office* 14, 28-30 (Oct. 3, 2000).

37 CFR 1.702(c) indicates that a patent is entitled to patent term adjustment if the issuance of the patent was delayed by an interference proceeding (35 U.S.C. 154(b)(1)(C)(i)). 37 CFR 1.702(d) indicates that a patent is entitled to patent term adjustment if the issuance of the patent was delayed by the application being placed under a secrecy order under 35 U.S.C. 181 (35 U.S.C. 154(b)(1)(C)(ii)). 37 CFR 1.702(e) indicates that a patent is entitled to patent term adjustment if the issuance of the patent was delayed by successful appellate review under 35 U.S.C. 134, 141, or 145 (35 U.S.C. 154(b)(1)(C)(iii)).

>Effective May 24, 2004, 37 CFR 1.702(e) was amended to indicate that certain remands by the Board of Patent Appeals and Interferences shall be considered "a decision in the review reversing an adverse determination of patentability" for patent term adjustment purposes. Any request for reconsideration of the patent term adjustment indicated on a patent resulting from an application in which the notice of allowance was mailed before May 24, 2004 on the basis of the changes to 37 CFR 1.702 must be filed no later than July 21, 2004.<

37 CFR 1.702(f) provides that the provisions of 37 CFR 1.702 through 1.705 apply only to original (i.e., non-reissue) applications, except applications for a design patent, filed on or after May 29, 2000, and patents issued on such applications. Since a continued prosecution application (CPA) filed under 37 CFR 1.53(d) is a new (continuing) application, a CPA filed on or after May 29, 2000, >and before July 14, 2003,< is entitled to the benefits of the patent term adjustment

provisions of 35 U.S.C. 154(b) and 37 CFR 1.702 through 1.705. Since a request for continued examination (RCE) filed under 35 U.S.C. 132(b) and 37 CFR 1.114 is **not** a new application (it is a submission in a previously filed application), filing an RCE in an application filed before May 29, 2000, does **not** cause that application to be entitled to the benefits of the patent term adjustment provisions of 35 U.S.C. 154(b) and 37 CFR 1.702 through 1.705.

37 CFR 1.703. Period of adjustment of patent term due to examination delay.

(a) The period of adjustment under § 1.702(a) is the sum of the following periods:

(1) The number of days, if any, in the period beginning on the day after the date that is fourteen months after the date on which the application was filed under 35 U.S.C. 111(a) or fulfilled the requirements of 35 U.S.C. 371 and ending on the date of mailing of either an action under 35 U.S.C. 132, or a notice of allowance under 35 U.S.C. 151, whichever occurs first;

(2) The number of days, if any, in the period beginning on the day after the date that is four months after the date a reply under § 1.111 was filed and ending on the date of mailing of either an action under 35 U.S.C. 132, or a notice of allowance under 35 U.S.C. 151, whichever occurs first;

(3) The number of days, if any, in the period beginning on the day after the date that is four months after the date a reply in compliance with § 1.113(c) was filed and ending on the date of mailing of either an action under 35 U.S.C. 132, or a notice of allowance under 35 U.S.C. 151, whichever occurs first;

(4) The number of days, if any, in the period beginning on the day after the date that is four months after the date an appeal brief in compliance with § 1.192 was filed and ending on the date of mailing of any of an examiner's answer under § 1.193, an action under 35 U.S.C. 132, or a notice of allowance under 35 U.S.C. 151, whichever occurs first;

(5) The number of days, if any, in the period beginning on the day after the date that is four months after the date of a final decision by the Board of Patent Appeals and Interferences or by a Federal court in an appeal under 35 U.S.C. 141 or a civil action under 35 U.S.C. 145 or 146 where at least one allowable claim remains in the application and ending on the date of mailing of either an action under 35 U.S.C. 132 or a notice of allowance under 35 U.S.C. 151, whichever occurs first; and

(6) The number of days, if any, in the period beginning on the day after the date that is four months after the date the issue fee was paid and all outstanding requirements were satisfied and ending on the date a patent was issued.

(b) The period of adjustment under § 1.702(b) is the number of days, if any, in the period beginning on the day after the date that is three years after the date on which the application was filed under 35 U.S.C. 111(a) or the national stage commenced under 35 U.S.C. 371(b) or (f) in an international application and ending on the date a patent was issued, but not including the sum of the following periods:

(1) The number of days, if any, in the period beginning on the date on which a request for continued examination of the application under 35 U.S.C. 132(b) was filed and ending on the date the patent was issued;

(2)(i) The number of days, if any, in the period beginning on the date an interference was declared or redeclared to involve the application in the interference and ending on the date that the interference was terminated with respect to the application; and

(ii) The number of days, if any, in the period beginning on the date prosecution in the application was suspended by the Office due to interference proceedings under 35 U.S.C. 135(a) not involving the application and ending on the date of the termination of the suspension;

(3)(i) The number of days, if any, the application was maintained in a sealed condition under 35 U.S.C. 181;

(ii) The number of days, if any, in the period beginning on the date of mailing of an examiner's answer under § 1.193 in the application under secrecy order and ending on the date the secrecy order was removed;

(iii) The number of days, if any, in the period beginning on the date applicant was notified that an interference would be declared but for the secrecy order and ending on the date the secrecy order was removed; and

(iv) The number of days, if any, in the period beginning on the date of notification under § 5.3(c) of this chapter and ending on the date of mailing of the notice of allowance under 35 U.S.C. 151; and,

(4) The number of days, if any, in the period beginning on the date on which a notice of appeal to the Board of Patent Appeals and Interferences was filed under 35 U.S.C. 134 and § 1.191 and ending on the date of the last decision by the Board of Patent Appeals and Interferences or by a Federal court in an appeal under 35 U.S.C. 141 or a civil action under 35 U.S.C. 145, or on the date of mailing of either an action under 35 U.S.C. 132, or a notice of allowance under 35 U.S.C. 151, whichever occurs first, if the appeal did not result in a decision by the Board of Patent Appeals and Interferences.

(c) The period of adjustment under § 1.702(c) is the sum of the following periods, to the extent that the periods are not overlapping:

(1) The number of days, if any, in the period beginning on the date an interference was declared or redeclared to involve the application in the interference and ending on the date that the interference was terminated with respect to the application; and

(2) The number of days, if any, in the period beginning on the date prosecution in the application was suspended by the Office due to interference proceedings under 35 U.S.C. 135(a) not involving the application and ending on the date of the termination of the suspension.

(d) The period of adjustment under § 1.702(d) is the sum of the following periods, to the extent that the periods are not overlapping:

(1) The number of days, if any, the application was maintained in a sealed condition under 35 U.S.C. 181;

(2) The number of days, if any, in the period beginning on the date of mailing of an examiner's answer under § 1.193 in the

application under secrecy order and ending on the date the secrecy order was removed;

(3) The number of days, if any, in the period beginning on the date applicant was notified that an interference would be declared but for the secrecy order and ending on the date the secrecy order was removed; and

(4) The number of days, if any, in the period beginning on the date of notification under § 5.3(c) of this chapter and ending on the date of mailing of the notice of allowance under 35 U.S.C. 151.

(e) The period of adjustment under § 1.702(e) is the sum of the number of days, if any, in the period beginning on the date on which a notice of appeal to the Board of Patent Appeals and Interferences was filed under 35 U.S.C. 134 and § 1.191 and ending on the date of a final decision in favor of the applicant by the Board of Patent Appeals and Interferences or by a Federal court in an appeal under 35 U.S.C. 141 or a civil action under 35 U.S.C. 145.

(f) **>The adjustment will run from the expiration date of the patent as set forth in 35 U.S.C. 154(a)(2). To the extent that periods of delay attributable to the grounds specified in §1.702 overlap, the period of adjustment granted under this section shall not exceed the actual number of days the issuance of the patent was delayed. The term of a patent entitled to adjustment under § 1.702 and this section shall be adjusted for the sum of the periods calculated under paragraphs (a) through (e) of this section, to the extent that such periods are not overlapping, less the sum of the periods calculated under § 1.704. The date indicated on any certificate of mailing or transmission under § 1.8 shall not be taken into account in this calculation.<

(g) No patent, the term of which has been disclaimed beyond a specified date, shall be adjusted under § 1.702 and this section beyond the expiration date specified in the disclaimer.

37 CFR 1.704. Reduction of period of adjustment of patent term.

(a) The period of adjustment of the term of a patent under § 1.703(a) through (e) shall be reduced by a period equal to the period of time during which the applicant failed to engage in reasonable efforts to conclude prosecution (processing or examination) of the application.

(b) With respect to the grounds for adjustment set forth in §§ 1.702(a) through (e), and in particular the ground of adjustment set forth in § 1.702(b), an applicant shall be deemed to have failed to engage in reasonable efforts to conclude processing or examination of an application for the cumulative total of any periods of time in excess of three months that are taken to reply to any notice or action by the Office making any rejection, objection, argument, or other request, measuring such three-month period from the date the notice or action was mailed or given to the applicant, in which case the period of adjustment set forth in § 1.703 shall be reduced by the number of days, if any, beginning on the day after the date that is three months after the date of mailing or transmission of the Office communication notifying the applicant of the rejection, objection, argument, or other request and ending on the date the reply was filed. The period, or shortened statutory period, for reply that is set in the Office action or notice has no effect on the three-month period set forth in this paragraph.

(c) Circumstances that constitute a failure of the applicant to engage in reasonable efforts to conclude processing or examination of an application also include the following circumstances, which will result in the following reduction of the period of adjustment set forth in § 1.703 to the extent that the periods are not overlapping:

(1) Suspension of action under § 1.103 at the applicant's request, in which case the period of adjustment set forth in § 1.703 shall be reduced by the number of days, if any, beginning on the date a request for suspension of action under § 1.103 was filed and ending on the date of the termination of the suspension;

(2) Deferral of issuance of a patent under § 1.314, in which case the period of adjustment set forth in § 1.703 shall be reduced by the number of days, if any, beginning on the date a request for deferral of issuance of a patent under § 1.314 was filed and ending on the date the patent was issued;

(3) Abandonment of the application or late payment of the issue fee, in which case the period of adjustment set forth in §1.703 shall be reduced by the number of days, if any, beginning on the date of abandonment or the date after the date the issue fee was due and ending on the earlier of:

(i) The date of mailing of the decision reviving the application or accepting late payment of the issue fee; or

(ii) The date that is four months after the date the grantable petition to revive the application or accept late payment of the issue fee was filed;

(4) Failure to file a petition to withdraw the holding of abandonment or to revive an application within two months from the mailing date of a notice of abandonment, in which case the period of adjustment set forth in § 1.703 shall be reduced by the number of days, if any, beginning on the day after the date two months from the mailing date of a notice of abandonment and ending on the date a petition to withdraw the holding of abandonment or to revive the application was filed;

(5) Conversion of a provisional application under 35 U.S.C. 111(b) to a nonprovisional application under 35 U.S.C. 111(a) pursuant to 35 U.S.C. 111(b)(5), in which case the period of adjustment set forth in § 1.703 shall be reduced by the number of days, if any, beginning on the date the application was filed under 35 U.S.C. 111(b) and ending on the date a request in compliance with §1.53(c)(3) to convert the provisional application into a nonprovisional application was filed;

(6) Submission of a preliminary amendment or other preliminary paper less than one month before the mailing of an Office action under 35 U.S.C. 132 or notice of allowance under 35 U.S.C. 151 that requires the mailing of a supplemental Office action or notice of allowance, in which case the period of adjustment set forth in § 1.703 shall be reduced by the lesser of:

(i) The number of days, if any, beginning on the day after the mailing date of the original Office action or notice of allowance and ending on the date of mailing of the supplemental Office action or notice of allowance; or

(ii) Four months;

(7) Submission of a reply having an omission (§1.135(c)), in which case the period of adjustment set forth in § 1.703 shall be reduced by the number of days, if any, beginning on the day after the date the reply having an omission was filed and ending on the

date that the reply or other paper correcting the omission was filed;

(8) Submission of a supplemental reply or other paper, other than a supplemental reply or other paper expressly requested by the examiner, after a reply has been filed, in which case the period of adjustment set forth in § 1.703 shall be reduced by the number of days, if any, beginning on the day after the date the initial reply was filed and ending on the date that the supplemental reply or other such paper was filed;

(9) Submission of an amendment or other paper after a decision by the Board of Patent Appeals and Interferences, other than a decision designated as containing a new ground of rejection under § 1.196(b) or statement under § 1.196(c), or a decision by a Federal court, less than one month before the mailing of an Office action under 35 U.S.C. 132 or notice of allowance under 35 U.S.C. 151 that requires the mailing of a supplemental Office action or supplemental notice of allowance, in which case the period of adjustment set forth in § 1.703 shall be reduced by the lesser of:

(i) The number of days, if any, beginning on the day after the mailing date of the original Office action or notice of allowance and ending on the mailing date of the supplemental Office action or notice of allowance; or

(ii) Four months;

(10) Submission of an amendment under § 1.312 or other paper after a notice of allowance has been given or mailed, in which case the period of adjustment set forth in § 1.703 shall be reduced by the lesser of:

(i) The number of days, if any, beginning on the date the amendment under § 1.312 or other paper was filed and ending on the mailing date of the Office action or notice in response to the amendment under § 1.312 or such other paper; or

(ii) Four months; and

(11) Further prosecution via a continuing application, in which case the period of adjustment set forth in § 1.703 shall not include any period that is prior to the actual filing date of the application that resulted in the patent.

(d) **>A paper containing only an information disclosure statement in compliance with §§ 1.97 and 1.98 will not be considered a failure to engage in reasonable efforts to conclude prosecution (processing or examination) of the application under paragraphs (c)(6), (c)(8), (c)(9), or (c)(10) of this section if it is accompanied by a statement that each item of information contained in the information disclosure statement was first cited in any communication from a foreign patent office in a counterpart application and that this communication was not received by any individual designated in § 1.56(c) more than thirty days prior to the filing of the information disclosure statement. This thirty-day period is not extendable.<

(e) Submission of an application for patent term adjustment under § 1.705(b) (with or without request under § 1.705(c) for reinstatement of reduced patent term adjustment) will not be considered a failure to engage in reasonable efforts to conclude prosecution (processing or examination) of the application under paragraph (c)(10) of this section.

37 CFR 1.705. Patent term adjustment determination

(a) The notice of allowance will include notification of any patent term adjustment under 35 U.S.C. 154(b).

(b) Any request for reconsideration of the patent term adjustment indicated in the notice of allowance, except as provided in paragraph (d) of this section, and any request for reinstatement of all or part of the term reduced pursuant to § 1.704(b) must be by way of an application for patent term adjustment. An application for patent term adjustment under this section must be filed no later than the payment of the issue fee but may not be filed earlier than the date of mailing of the notice of allowance. An application for patent term adjustment under this section must be accompanied by:

(1) The fee set forth in § 1.18(e); and

(2) A statement of the facts involved, specifying:

(i) The correct patent term adjustment and the basis or bases under § 1.702 for the adjustment;

(ii) The relevant dates as specified in §§ 1.703(a) through (e) for which an adjustment is sought and the adjustment as specified in § 1.703(f) to which the patent is entitled;

(iii) Whether the patent is subject to a terminal disclaimer and any expiration date specified in the terminal disclaimer; and

(iv)(A)Any circumstances during the prosecution of the application resulting in the patent that constitute a failure to engage in reasonable efforts to conclude processing or examination of such application as set forth in § 1.704; or

(B) That there were no circumstances constituting a failure to engage in reasonable efforts to conclude processing or examination of such application as set forth in § 1.704.

(c) Any application for patent term adjustment under this section that requests reinstatement of all or part of the period of adjustment reduced pursuant to § 1.704(b) for failing to reply to a rejection, objection, argument, or other request within three months of the date of mailing of the Office communication notifying the applicant of the rejection, objection, argument, or other request must also be accompanied by:

(1) The fee set forth in § 1.18(f); and

**>

(2) A showing to the satisfaction of the Director that, in spite of all due care, the applicant was unable to reply to the rejection, objection, argument, or other request within three months of the date of mailing of the Office communication notifying the applicant of the rejection, objection, argument, or other request. The Office shall not grant any request for reinstatement for more than three additional months for each reply beyond three months from the date of mailing of the Office communication notifying the applicant of the rejection, objection, argument, or other request.

(d) If there is a revision to the patent term adjustment indicated in the notice of allowance, the patent will indicate the revised patent term adjustment. If the patent indicates or should have indicated a revised patent term adjustment, any request for reconsideration of the patent term adjustment indicated in the patent must be filed within two months of the date the patent issued and must comply with the requirements of paragraphs (b)(1) and (b)(2) of this section. Any request for reconsideration

under this section that raises issues that were raised, or could have been raised, in an application for patent term adjustment under paragraph (b) of this section shall be dismissed as untimely as to those issues.

(e) The periods set forth in this section are not extendable.

(f) No submission or petition on behalf of a third party concerning patent term adjustment under 35 U.S.C. 154(b) will be considered by the Office. Any such submission or petition will be returned to the third party, or otherwise disposed of, at the convenience of the Office.

>

2731 Period of Adjustment [R-2]

37 CFR 1.703. Period of adjustment of patent term due to examination delay.

(a) The period of adjustment under § 1.702(a) is the sum of the following periods:

(1) The number of days, if any, in the period beginning on the day after the date that is fourteen months after the date on which the application was filed under 35 U.S.C. 111(a) or fulfilled the requirements of 35 U.S.C. 371 and ending on the date of mailing of either an action under 35 U.S.C. 132, or a notice of allowance under 35 U.S.C. 151, whichever occurs first;

(2) The number of days, if any, in the period beginning on the day after the date that is fourteen months after the date on which the application was filed under 35 U.S.C. 111(a) or fulfilled the requirements of 35 U.S.C. 371 and ending on the date of mailing of either an action under 35 U.S.C. 132, or a notice of allowance under 35 U.S.C. 151, whichever occurs first;

(3) The number of days, if any, in the period beginning on the day after the date that is four months after the date a reply in compliance with § 1.113(c) was filed and ending on the date of mailing of either an action under 35 U.S.C. 132, or a notice of allowance under 35 U.S.C. 151, whichever occurs first;

(4) The number of days, if any, in the period beginning on the day after the date that is four months after the date an appeal brief in compliance with § 1.192 was filed and ending on the date of mailing of any of an examiner's answer under § 1.193, an action under 35 U.S.C. 132, or a notice of allowance under 35 U.S.C. 151, whichever occurs first;

(5) The number of days, if any, in the period beginning on the day after the date that is four months after the date of a final decision by the Board of Patent Appeals and Interferences or by a Federal court in an appeal under 35 U.S.C. 141 or a civil action under 35 U.S.C. 145 or 146 where at least one allowable claim remains in the application and ending on the date of mailing of either an action under 35 U.S.C. 132 or a notice of allowance under 35 U.S.C. 151, whichever occurs first; and

(6) The number of days, if any, in the period beginning on the day after the date that is four months after the date the issue fee was paid and all outstanding requirements were satisfied and ending on the date a patent was issued.

(b) The period of adjustment under § 1.702(b) is the number of days, if any, in the period beginning on the day after the date that is three years after the date on which the application was filed under 35 U.S.C. 111(a) or the national stage commenced under 35 U.S.C. 371(b) or (f) in an international application and ending on the date a patent was issued, but not including the sum of the following periods:

(1) The number of days, if any, in the period beginning on the date on which a request for continued examination of the application under 35 U.S.C. 132(b) was filed and ending on the date the patent was issued;

(2)(i)The number of days, if any, in the period beginning on the date an interference was declared or redeclared to involve the application in the interference and ending on the date that the interference was terminated with respect to the application; and

(ii) The number of days, if any, in the period beginning on the date prosecution in the application was suspended by the Office due to interference proceedings under 35 U.S.C. 135(a) not involving the application and ending on the date of the termination of the suspension;

(3)(i)The number of days, if any, the application was maintained in a sealed condition under 35 U.S.C. 181;

(ii) The number of days, if any, in the period beginning on the date of mailing of an examiner's answer under § 1.193 in the application under secrecy order and ending on the date the secrecy order was removed;

(iii) The number of days, if any, in the period beginning on the date applicant was notified that an interference would be declared but for the secrecy order and ending on the date the secrecy order was removed; and

(iv) The number of days, if any, in the period beginning on the date of notification under § 5.3(c) of this chapter and ending on the date of mailing of the notice of allowance under 35 U.S.C. 151; and,

(4) The number of days, if any, in the period beginning on the date on which a notice of appeal to the Board of Patent Appeals and Interferences was filed under 35 U.S.C. 134 and § 1.191 and ending on the date of the last decision by the Board of Patent Appeals and Interferences or by a Federal court in an appeal under 35 U.S.C. 141 or a civil action under 35 U.S.C. 145, or on the date of mailing of either an action under 35 U.S.C. 132, or a notice of allowance under 35 U.S.C. 151, whichever occurs first, if the appeal did not result in a decision by the Board of Patent Appeals and Interferences.

(c) The period of adjustment under § 1.702(c) is the sum of the following periods, to the extent that the periods are not overlapping:

(1) The number of days, if any, in the period beginning on the date an interference was declared or redeclared to involve the application in the interference and ending on the date that the interference was terminated with respect to the application; and

(2) The number of days, if any, in the period beginning on the date prosecution in the application was suspended by the Office due to interference proceedings under 35 U.S.C. 135(a) not involving the application and ending on the date of the termination of the suspension.

(d) The period of adjustment under § 1.702(d) is the sum of the following periods, to the extent that the periods are not overlapping:

(1) The number of days, if any, the application was maintained in a sealed condition under 35 U.S.C. 181;

(2) The number of days, if any, in the period beginning on the date of mailing of an examiner's answer under § 1.193 in the application under secrecy order and ending on the date the secrecy order was removed;

(3) The number of days, if any, in the period beginning on the date applicant was notified that an interference would be declared but for the secrecy order and ending on the date the secrecy order was removed; and

(4) The number of days, if any, in the period beginning on the date of notification under § 5.3(c) of this chapter and ending on the date of mailing of the notice of allowance under 35 U.S.C. 151.

(e) The period of adjustment under § 1.702(e) is the sum of the number of days, if any, in the period beginning on the date on which a notice of appeal to the Board of Patent Appeals and Interferences was filed under 35 U.S.C. 134 and § 1.191 and ending on the date of a final decision in favor of the applicant by the Board of Patent Appeals and Interferences or by a Federal court in an appeal under 35 U.S.C. 141 or a civil action under 35 U.S.C. 145.

(f) The adjustment will run from the expiration date of the patent as set forth in 35 U.S.C. 154(a)(2). To the extent that periods of delay attributable to the grounds specified in §1.702 overlap, the period of adjustment granted under this section shall not exceed the actual number of days the issuance of the patent was delayed. The term of a patent entitled to adjustment under § 1.702 and this section shall be adjusted for the sum of the periods calculated under paragraphs (a) through (e) of this section, to the extent that such periods are not overlapping, less the sum of the periods calculated under § 1.704. The date indicated on any certificate of mailing or transmission under § 1.8 shall not be taken into account in this calculation.

(g) No patent, the term of which has been disclaimed beyond a specified date, shall be adjusted under § 1.702 and this section beyond the expiration date specified in the disclaimer.

37 CFR 1.703 specifies the period of adjustment if a patent is entitled to patent term adjustment under 35 U.S.C. 154(b)(1) and 37 CFR 1.702. When a period is indicated (in 37 CFR 1.703 or 1.704) as "beginning" on a particular day, that day is included in the period, in that such day is "day one" of the period and not "day zero." For example, a period beginning on April 1 and ending on April 10 is ten (and not nine) days in length.

35 U.S.C. 154(b)(1)(A) and (B) provide for an adjustment of one day for each day after the end of the period set forth in 35 U.S.C. 154(b)(1)(A)(i), (ii), (iii), (iv), and (B) until the prescribed action is taken, whereas 35 U.S.C. 154(b)(1)(C) provides for an adjustment of one day for each day of the pendency of the proceeding, order, or review prescribed in 35 U.S.C. 154(b)(1)(C)(i) through (iii). Therefore, the end of the period set forth in 37 CFR 1.703(a) and 1.703(b) (which correspond to 35 U.S.C. 154(b)(1)(A) and (B)) is "day zero" (not "day one") as to the period of adjustment, whereas the first day of the proceeding, order, or review set forth in 37 CFR 1.703(c), 1.703(d), and 1.703(e) (which correspond to 35 U.S.C. 154(b)(1)(C)(i) through (iii)) is "day one" of the period of adjustment.

37 CFR 1.703(a) pertains to 35 U.S.C. 154(b)(1)(A) and indicates that the period of adjustment under 37 CFR 1.702(a) is the sum of the periods specified in 37 CFR 1.703(a)(1) through 37 CFR 1.703(a)(6).

37 CFR 1.703(a)(1) pertains to the provisions of 35 U.S.C. 154(b)(1)(A)(i) and specifies that the period is the number of days, if any, beginning on the date after the day that is fourteen months after the date on which the application was filed under 35 U.S.C. 111(a) or fulfilled the requirements of 35 U.S.C. 371 in an international application and ending on the mailing date of either an action under 35 U.S.C. 132, or a notice of allowance under 35 U.S.C. 151, whichever occurs first. For purposes of 35 U.S.C. 154(b)(1)(A)(i)(II), an international application fulfills the requirements of 35 U.S.C. 371 on the date of commencement of the national stage under 35 U.S.C. 371(b) or (f), or the date the application fulfills the requirements of 35 U.S.C. 371(c) if that date is later than the date of commencement of the national stage under 35 U.S.C. 371(b) or (f). In other words, the requirements of 35 U.S.C. 371 are met when applicant has met all of the requirements of 35 U.S.C. 371(c) and, unless applicant requests early processing under 35 U.S.C. 371(f), the time limit set forth in the applicable one of PCT Articles 22 and 39 has expired. Accordingly, the requirements of 35 U.S.C. 371 are met when the Office can begin examination of the patent application. If, for example, an applicant files the required oath or declaration (35 U.S.C. 115) and any necessary English translation after the expiration of the time limit set forth in Article 22 of the PCT or the time limit under Article 39 of the PCT, the date the requirements of 35 U.S.C. 371 are met is the date the requirements of 35 U.S.C. 371(c) are met. If, however, an applicant files the required declaration, filing fee, and any required English translation before the expiration of the relevant PCT Article 22 or Article 39 time period, but does not request early processing under 35

U.S.C. 371, the requirements of 35 U.S.C. 371 will be met once the applicable time period has expired.

A written restriction requirement, a written election of species requirement, a requirement for information under 37 CFR 1.105, an action under *Ex parte Quayle*, 1935 Comm'r Dec. 11 (1935), and a notice of allowability (PTOL-37) are each an action issued as a result of the examination conducted pursuant to 35 U.S.C. 131. As such, each of these Office actions is a notification under 35 U.S.C. 132. Office notices and letters issued as part of the pre-examination processing of an application are not notices issued as a result of an examination conducted pursuant to 35 U.S.C. 131, and thus are not notifications under 35 U.S.C. 132. Examples of such pre-examination processing notices are: a Notice of Incomplete Nonprovisional Application, a Notice of Omitted Item(s) in a Nonprovisional Application, a Notice to File Missing Parts of Application, a Notice of Informal Application, a Notice to File Corrected Application Papers Filing Date Granted, or a Notice to Comply with Requirements for Patent Applications Containing Nucleotide Sequence and/or Amino Acid Sequence Disclosures.

37 CFR 1.703(a)(2) pertains to the provisions of 35 U.S.C. 154(b)(1)(A)(ii) and specifies that the period is the number of days, if any, beginning on the day after the date that is four months after the date a reply under 37 CFR 1.111 was filed and ending on the mailing date of either an action under 35 U.S.C. 132, or a notice of allowance under 35 U.S.C. 151, whichever occurs first.

37 CFR 1.703(a)(3) also pertains to the provisions of 35 U.S.C. 154(b)(1)(A)(ii) and specifies that the period is the number of days, if any, beginning on the day after the date that is four months after the date a reply in compliance with 37 CFR 1.113(c) was filed and ending on the date of mailing of either an action under 35 U.S.C. 132, or a notice of allowance under 35 U.S.C. 151, whichever occurs first. A reply under 37 CFR 1.113 is a reply to a final Office action, and a reply in compliance with 37 CFR 1.113 is a reply that cancels all of the rejected claims and removes all outstanding objections and requirements or otherwise places the application in condition for allowance. Any amendment after final that does not cancel all of the rejected claims and remove all outstanding objections and requirements or otherwise place the application in condition for allowance is not a reply in compliance with 37 CFR 1.113(c).

37 CFR 1.703(a)(4) also pertains to the provisions of 35 U.S.C. 154(b)(1)(A)(ii) and specifies that the period is the number of days, if any, beginning on the day after the date that is four months after the date an appeal brief in compliance with 37 CFR 1.192 was filed and ending on the mailing date of any of an examiner's answer under 37 CFR 1.193, an action under 35 U.S.C. 132, or a notice of allowance under 35 U.S.C. 151, whichever occurs first. As discussed below, the phrase "the date on which" an "appeal was taken" in 35 U.S.C. 154(b)(1)(A)(ii) means the date on which an appeal brief (and not a notice of appeal) was filed. The phrase "appeal brief in compliance with 37 CFR 1.192" requires that: (1) the appeal brief fee (37 CFR 1.17(c)) be paid (37 CFR 1.192(a)); and (2) the appeal brief complies with 37 CFR 1.192(c)(1) through (c)(9).

37 CFR 1.703(a)(5) pertains to the provisions of 35 U.S.C. 154(b)(1)(A)(iii) and specifies that the period is the number of days, if any, beginning on the day after the date that is four months after the date of a final decision by the Board of Patent Appeals and Interferences or by a Federal court in an appeal under 35 U.S.C. 141 or a civil action under 35 U.S.C. 145 or 146, where at least one allowable claim remains in the application and ending on the mailing date of either an action under 35 U.S.C. 132, or a notice of allowance under 35 U.S.C. 151, whichever occurs first.

The phrase "allowable claims remain in the application" for purposes of 35 U.S.C. 154(b)(1)(A)(iii) means that after the decision there is at least one pending claim (for purposes of statutory construction, "words importing the plural include the singular" (1 U.S.C. 1)) that is not withdrawn from consideration and is not subject to a rejection, objection, or other requirement. This applies in the following situations: (1) at least one claim is allowable (not merely objected to) at the time the examiner's answer is mailed and is not canceled before, or made subject to a rejection as a result of, the appellate review; or (2) when all of the rejections applied to at least one claim are reversed, and such claim is not made subject to a rejection, as a result of the appellate review. For example:

(A) If claims 1 and 2 (both independent) are pending, the decision affirms the rejection of claim 1,

and claim 2 was indicated as allowable prior to the appeal, "allowable claims remain in the application" for purposes of 35 U.S.C. 154(b)(1)(A)(iii).

(B) If claims 1 and 2 are pending, the decision affirms the rejection of claim 1, and claim 2 was objected to by the examiner prior to the appeal as being allowable except for its dependency from claim 1, "allowable claims" do not "remain in the application" for purposes of 35 U.S.C. 154(b)(1)(A)(iii) (claim 2 is not allowable because there is an outstanding objection to it).

(C) If claims 1 and 2 are pending, and the decision affirms the rejection of claim 1 and reverses the rejection of claim 2, "allowable claims remain in the application" for purposes of 35 U.S.C. 154(b)(1)(A)(iii) (claim 2 is "allowable" within the meaning of 37 CFR 1.703(a)(5) because there is no outstanding objection or requirement as to it (see MPEP § 1214.06, paragraph (I)(B)).

37 CFR 1.703(a)(6) pertains to the provisions of 35 U.S.C. 154(b)(1)(A)(iv) and specifies that the period is the number of days, if any, beginning on the day after the date that is four months after the date the issue fee was paid and all outstanding requirements were satisfied and ending on the date the patent was issued. The date the issue fee was paid and all outstanding requirements were satisfied is the later of the date the issue fee was paid or the date all outstanding requirements were satisfied. Note that the filing of a priority document (and processing fee) is not considered an outstanding requirement under 35 U.S.C. 154(b)(1)(A)(iv) and 37 CFR 1.703(a)(6) because if the priority document is not filed the patent simply issues without the priority claim (the application is not abandoned) and since no petition is required to add a priority claim after payment of the issue fee. If prosecution in an application is reopened after allowance (see MPEP § 1308), all outstanding requirements are not satisfied until the application is again in condition for allowance as indicated by the issuance of a new notice of allowance under 35 U.S.C. 151 (see MPEP § 1308).

37 CFR 1.703(b) pertains to the provisions of 35 U.S.C. 154(b)(1)(B) and indicates that the period of adjustment under 37 CFR 1.702(b) is the number of days, if any, in the period beginning on the day after the date that is three years after the actual filing date of the application and ending on the date a patent was issued. 37 CFR 1.703(b) also sets forth the limitations on patent term adjustment specified in 35 U.S.C. 154(b)(1)(B)(i) and (ii). Specifically, 37 CFR 1.703(b) provides that the period of adjustment of the term of a patent shall not include the period equal to the sum of the following periods: (1) The period of pendency consumed by continued examination of the application under 35 U.S.C. 132(b) (35 U.S.C. 154(b)(1)(B)(i)); (2) the period of pendency consumed by interference proceedings (35 U.S.C. 154(b)(1)(B)(ii)); (3) the period of pendency consumed by imposition of a secrecy order (35 U.S.C. 154(b)(1)(B)(ii)); and (4) the period of pendency consumed by appellate review under 35 U.S.C. 134, 141, 145, whether successful or unsuccessful (35 U.S.C. 154(b)(1)(B)(ii)). The provisions of 35 U.S.C. 154(b)(1)(B)(iii) concerning the period of pendency consumed by delays in the processing of the application requested by the applicant are treated in 37 CFR 1.704 as such delays are also circumstances constituting a failure of an applicant to engage in reasonable efforts to conclude processing or examination of an application.

37 CFR 1.703(c) pertains to the provisions of 35 U.S.C. 154(b)(1)(C)(i) and indicates that the period of adjustment under 37 CFR 1.702(c) is the sum of the following periods (to the extent that such periods are not overlapping): (1) the number of days, if any, in the period beginning on the date an interference was declared or redeclared to involve the application in the interference and ending on the date that the interference was terminated with respect to the application; and (2) the number of days, if any, in the period beginning on the date prosecution in the application was suspended by the Office due to interference proceedings under 35 U.S.C. 135(a) not involving the application and ending on the date of the termination of the suspension.

37 CFR 1.703(d) pertains to the provisions of 35 U.S.C. 154(b)(1)(C)(ii) and indicates that the period of adjustment under 37 CFR 1.702(d) is the sum of the following periods (to the extent that such periods are not overlapping): (1) the number of days, if any, the application was maintained in a sealed condition under 35 U.S.C. 181; (2) the number of days, if any, in the period beginning on the date of mailing of an examiner's answer under 37 CFR 1.193 in the application under secrecy order and ending on the date the

secrecy order was removed; (3) the number of days, if any, in the period beginning on the date applicant was notified that an interference would be declared but for the secrecy order and ending on the date the secrecy order was removed; and (4) the number of days, if any, in the period beginning on the date of notification under 37 CFR 5.3(c) and ending on the date of mailing of the notice of allowance under 35 U.S.C. 151 and 37 CFR 1.311.

37 CFR 1.703(e) pertains to the provisions of 35 U.S.C. 154(b)(1)(C)(iii) and indicates that the period of adjustment under 37 CFR 1.702(e) is the sum of the number of days, if any, in the period beginning on the date on which a notice of appeal to the Board of Patent Appeals and Interferences was filed under 35 U.S.C. 134 and 37 CFR 1.191 and ending on the date of a final decision in favor of the applicant by the Board of Patent Appeals and Interferences or by a Federal court in an appeal under 35 U.S.C. 141 or a civil action under 35 U.S.C. 145.

37 CFR 1.703(f) indicates that the adjustment will run from the expiration date of the patent as set forth in 35 U.S.C. 154(a)(2) and also indicates that to the extent that periods of *>delay< attributable to the grounds specified in 37 CFR 1.702 overlap, the period of adjustment will not exceed the actual number of days the issuance of the patent was delayed (35 U.S.C. 154(b)(2)(A)). 37 CFR 1.703(f) also specifically indicates that the term of a patent entitled to adjustment under 37 CFR 1.702 and 1.703 shall be adjusted for the sum of the periods calculated under 37 CFR 1.703(a) through (e), to the extent that such periods are not overlapping, less the sum of the periods calculated under 37 CFR 1.704.

Moreover, 37 CFR 1.703(f) provides that the date indicated on any certificate of mailing or transmission under 37 CFR 1.8 shall not be taken into account in this calculation. The date indicated on a certificate of mailing is used only to determine whether the correspondence is timely (including whether any extension of the time and fee are required) so as to avoid abandonment of the application or termination or dismissal of proceedings. The actual date of receipt of the correspondence in the Office is used for all other purposes. See 37 CFR 1.8(a). Thus, while the date indicated on any certificate of mailing or transmission under 37 CFR 1.8 will continue to be taken into account in determining timeliness, the date of filing (37 CFR 1.6) will be the date used in a patent term adjustment calculation. Applicant may wish to consider the use of the "Express Mail Post Office to Addressee" service of the United States Postal Service (37 CFR 1.10) or facsimile transmission (37 CFR 1.6(d)) for replies to be accorded the earliest possible filing date for patent term adjustment calculations. Alternatively, applicant may choose to mail correspondence with sufficient time to ensure that the correspondence is received in the Office (and stamped with a date of receipt) before the expiration of the three-month period. Applicants are encouraged to check PAIR to verify the date of deposit entered in PALM for the correspondence. Applicants should contact the Office for correction of any such entries prior to the mailing of the notice of allowance. At the time of the mailing of the notice of allowance, the patent term adjustment calculation will be made with the dates in PALM. Thereafter, a patent term adjustment application (37 CFR 1.705(b) or (c)), accompanied by the requisite fee and statement or showing, will be necessary to have any reduction of patent term reinstated.

Finally, 37 CFR 1.703(g) indicates that no patent, the term of which has been disclaimed beyond a specified date, shall be adjusted under 37 CFR 1.702 and 1.703 beyond the expiration date specified in the disclaimer (35 U.S.C. 154(b)(2)(B)).<

>

2732 Reduction of Period of Adjustment of Patent Term [R-2]

37 CFR 1.704. Reduction of period of adjustment of patent term.

(a) The period of adjustment of the term of a patent under § 1.703(a) through (e) shall be reduced by a period equal to the period of time during which the applicant failed to engage in reasonable efforts to conclude prosecution (processing or examination) of the application.

(b) With respect to the grounds for adjustment set forth in §§ 1.702(a) through (e), and in particular the ground of adjustment set forth in § 1.702(b), an applicant shall be deemed to have failed to engage in reasonable efforts to conclude processing or examination of an application for the cumulative total of any periods of time in excess of three months that are taken to reply to any notice or action by the Office making any rejection, objection, argument, or other request, measuring such three-month period from the date the notice or action was mailed or given to the applicant, in which case the period of adjustment set forth in § 1.703 shall be reduced by the number of days, if any, beginning on the day after the date that is three months after the date of mailing or transmission of the Office communication notifying the applicant of the rejection,

objection, argument, or other request and ending on the date the reply was filed. The period, or shortened statutory period, for reply that is set in the Office action or notice has no effect on the three-month period set forth in this paragraph.

(c) Circumstances that constitute a failure of the applicant to engage in reasonable efforts to conclude processing or examination of an application also include the following circumstances, which will result in the following reduction of the period of adjustment set forth in § 1.703 to the extent that the periods are not overlapping:

(1) Suspension of action under § 1.103 at the applicant's request, in which case the period of adjustment set forth in § 1.703 shall be reduced by the number of days, if any, beginning on the date a request for suspension of action under § 1.103 was filed and ending on the date of the termination of the suspension;

(2) Deferral of issuance of a patent under § 1.314, in which case the period of adjustment set forth in § 1.703 shall be reduced by the number of days, if any, beginning on the date a request for deferral of issuance of a patent under § 1.314 was filed and ending on the date the patent was issued;

(3) Abandonment of the application or late payment of the issue fee, in which case the period of adjustment set forth in §1.703 shall be reduced by the number of days, if any, beginning on the date of abandonment or the date after the date the issue fee was due and ending on the earlier of:

(i) The date of mailing of the decision reviving the application or accepting late payment of the issue fee; or

(ii) The date that is four months after the date the grantable petition to revive the application or accept late payment of the issue fee was filed;

(4) Failure to file a petition to withdraw the holding of abandonment or to revive an application within two months from the mailing date of a notice of abandonment, in which case the period of adjustment set forth in § 1.703 shall be reduced by the number of days, if any, beginning on the day after the date two months from the mailing date of a notice of abandonment and ending on the date a petition to withdraw the holding of abandonment or to revive the application was filed;

(5) Conversion of a provisional application under 35 U.S.C. 111(b) to a nonprovisional application under 35 U.S.C. 111(a) pursuant to 35 U.S.C. 111(b)(5), in which case the period of adjustment set forth in § 1.703 shall be reduced by the number of days, if any, beginning on the date the application was filed under 35 U.S.C. 111(b) and ending on the date a request in compliance with §1.53(c)(3) to convert the provisional application into a nonprovisional application was filed;

(6) Submission of a preliminary amendment or other preliminary paper less than one month before the mailing of an Office action under 35 U.S.C. 132 or notice of allowance under 35 U.S.C. 151 that requires the mailing of a supplemental Office action or notice of allowance, in which case the period of adjustment set forth in § 1.703 shall be reduced by the lesser of:

(i) The number of days, if any, beginning on the day after the mailing date of the original Office action or notice of allowance and ending on the date of mailing of the supplemental Office action or notice of allowance; or

(ii) Four months;

(7) Submission of a reply having an omission (§1.135(c)), in which case the period of adjustment set forth in § 1.703 shall be reduced by the number of days, if any, beginning on the day after the date the reply having an omission was filed and ending on the date that the reply or other paper correcting the omission was filed;

(8) Submission of a supplemental reply or other paper, other than a supplemental reply or other paper expressly requested by the examiner, after a reply has been filed, in which case the period of adjustment set forth in § 1.703 shall be reduced by the number of days, if any, beginning on the day after the date the initial reply was filed and ending on the date that the supplemental reply or other such paper was filed;

(9) Submission of an amendment or other paper after a decision by the Board of Patent Appeals and Interferences, other than a decision designated as containing a new ground of rejection under § 1.196(b) or statement under § 1.196(c), or a decision by a Federal court, less than one month before the mailing of an Office action under 35 U.S.C. 132 or notice of allowance under 35 U.S.C. 151 that requires the mailing of a supplemental Office action or supplemental notice of allowance, in which case the period of adjustment set forth in § 1.703 shall be reduced by the lesser of:

(i) The number of days, if any, beginning on the day after the mailing date of the original Office action or notice of allowance and ending on the mailing date of the supplemental Office action or notice of allowance; or

(ii) Four months;

(10)Submission of an amendment under § 1.312 or other paper after a notice of allowance has been given or mailed, in which case the period of adjustment set forth in § 1.703 shall be reduced by the lesser of:

(i) The number of days, if any, beginning on the date the amendment under § 1.312 or other paper was filed and ending on the mailing date of the Office action or notice in response to the amendment under § 1.312 or such other paper; or

(ii) Four months; and

(11)Further prosecution via a continuing application, in which case the period of adjustment set forth in § 1.703 shall not include any period that is prior to the actual filing date of the application that resulted in the patent.

(d) A paper containing only an information disclosure statement in compliance with §§ 1.97 and 1.98 will not be considered a failure to engage in reasonable efforts to conclude prosecution (processing or examination) of the application under paragraphs (c)(6), (c)(8), (c)(9), or (c)(10) of this section if it is accompanied by a statement that each item of information contained in the information disclosure statement was first cited in any communication from a foreign patent office in a counterpart application and that this communication was not received by any individual designated in § 1.56(c) more than thirty days prior to the filing of the information disclosure statement. This thirty-day period is not extendable.

(e) Submission of an application for patent term adjustment under § 1.705(b) (with or without request under § 1.705(c) for reinstatement of reduced patent term adjustment) will not be considered a failure to engage in reasonable efforts to conclude prosecution (processing or examination) of the application under paragraph (c)(10) of this section.

37 CFR 1.704 implements the provisions of 35 U.S.C. 154(b)(2)(C) which provides that the period of patent term adjustment under 35 U.S.C. 154(b)(1) "shall be reduced by a period equal to the period of time during which the applicant failed to engage in reasonable efforts to conclude prosecution of the application," and specifies certain circumstances as constituting a failure of an applicant to engage in reasonable efforts to conclude processing or examination of an application. Further, 35 U.S.C. 154(b)(2)(C)(iii) gives the Office the authority to prescribe regulations establishing circumstances that constitute "a failure of an applicant to engage in reasonable efforts to conclude processing or examination of an application." 35 U.S.C. 154(b)(2)(C) does not require the applicant's action or inaction (that amounts to a failure to engage in reasonable efforts to conclude prosecution of the application) to have caused or contributed to patent term adjustment for the period of adjustment to be reduced due to such action or inaction. The patent term adjustment provisions of 35 U.S.C. 154(b) create a balanced system allowing for patent term adjustment due to Office delays for a reasonably diligent applicant. Since the public has an interest in the technology disclosed and covered by a patent being available to the public at the earliest possible date, 35 U.S.C. 154(b)(2)(C)(i) provides that patent term adjustment is reduced by any period of time during which applicant failed to engage in reasonable efforts to conclude prosecution of the application, regardless of whether the applicant's actions or inactions caused or contributed to patent term adjustment.

37 CFR 1.704(a) implements the provisions of 35 U.S.C. 154(b)(2)(C)(i) and sets forth that the period of adjustment shall be reduced by a period equal to the period of time during which the applicant failed to engage in reasonable efforts to conclude prosecution (i.e., processing or examination) of an application.

37 CFR 1.704(b) provides that with respect to the ground for adjustments set forth in 37 CFR 1.702(a) through (e), and in particular 37 CFR 1.702(b), an applicant shall be deemed to have failed to engage in reasonable efforts to conclude prosecution for the cumulative total of any periods of time in excess of three months that are taken to reply to any notice or action by the Office making any rejection, objection, argument, or other request, measuring such three-month period from the date the notice or action was mailed or given to the applicant. A Notice of Omitted Items in a Nonprovisional Application, however, is not a notice or action by the Office making a rejection, objection, argument, or other request within the meaning of 35 U.S.C. 154(b)(2)(C)(ii) or 37 CFR 1.704(b), since the Office does not require a reply to that notice to continue the processing and examination of an application. 37 CFR 1.704(b) indicates that the period of adjustment set forth in 37 CFR 1.703 shall be reduced by the number of days, if any, beginning on the day after the date that is three months after the date of mailing or transmission of the Office communication notifying the applicant of the rejection, objection, argument, or other request and ending on the date the reply was filed. As discussed above, a reply is considered filed on the date of its actual receipt in the Office as defined by 37 CFR 1.6, and the date indicated on any certificate of mailing or transmission under 37 CFR 1.8 will not be taken into account for patent term adjustment purposes.

The three-month period in 37 CFR 1.704(b) applies to the Office notices and letters issued as part of the pre-examination processing of an application (except a Notice of Omitted Items in a Nonprovisional Application as discussed above). These notices include: (1) a Notice of Incomplete Nonprovisional Application (except as to any period prior to the filing date ultimately accorded to the application); (2) a Notice to File Missing Parts of Non-Provisional Application; (3) a Notice of Informal Application; (4) a Notice to File Corrected Application Papers Filing Date Granted; or (5) a Notice to Comply with Requirements for Patent Applications Containing Nucleotide Sequence and/or Amino Acid Sequence Disclosures.

In addition, the three-month period in 35 U.S.C. 154(b)(2)(C)(ii) and 37 CFR 1.704(b) applies regardless of the period for reply set in the Office action or notice. For example, if an Office action sets a one-month period for reply (restriction requirement), the applicant may obtain a two-month extension of time under 37 CFR 1.136(a) before being subject to a reduction of patent term adjustment under 35 U.S.C. 154(b)(2)(C)(ii) and 37 CFR 1.704(b). If, however, an

Office action sets a six-month period for reply, as is commonly set in applications subject to secrecy orders (see MPEP §130), the applicant is subject to a reduction of patent term adjustment under 35 U.S.C. 154(b)(2)(C)(ii) and 37 CFR 1.704(b) if the applicant does not reply to the Office action within three months, notwithstanding that a reply may be timely filed six months after the mailing date of the Office action.

37 CFR 1.704(c) establishes further circumstances that constitute a failure of an applicant to engage in reasonable efforts to conclude processing or examination of an application. 37 CFR 1.704(c)(1) through (c)(11) set forth actions or inactions by an applicant that interfere with the Office's ability to process or examine an application (and thus circumstances that constitute a failure of an applicant to engage in reasonable efforts to conclude processing or examination of an application), as well as the period by which a period of adjustment set forth in 37 CFR 1.703 shall be reduced if an applicant engages in any of the enumerated actions or inactions. 37 CFR 1.704(c) requires that an applicant refrain from engaging in actions or inactions that prevent or interfere with the Office's ability to process or examine an application. An applicant who is engaging in actions or inactions that prevent or interfere with the Office's ability to process or examine an application cannot reasonably be characterized as "engag[ing] in reasonable efforts to conclude processing or examination of an application" (35 U.S.C. 154(b)(2)(C)(i)).

37 CFR 1.704(c)(1) through 1.704(c)(11) address situations that occur with sufficient frequency to warrant being specifically provided for in the rules of practice. These situations do not represent an exhaustive listing of actions or inactions that interfere with the Office's ability to process or examine an application, since there are a myriad of actions or inactions that occur infrequently but will interfere with the Office's ability to process or examine an application (e.g., applicant files and persists in requesting reconsideration of a meritless petition under 37 CFR 1.10; parties to an interference obtain an extension for purposes of settlement negotiations which do not result in settlement of the interference; and when the scope of the broadest claim in the application at the time an application is placed in condition for allowance is substantially the same as suggested or allowed by the examiner more than six months earlier than the date the application was placed in condition for allowance). Thus, the actions or inactions set forth in 37 CFR 1.704154(c) are exemplary circumstances that constitute a failure of an applicant to engage in reasonable efforts to conclude processing or examination of an application. The Office may also reduce a period of adjustment provided in 37 CFR 1.703 on the basis of conduct that interferes with the Office's ability to process or examine an application under the authority provided in 35 U.S.C. (b)(2)(C)(iii), even if such conduct is not specifically addressed in 37 CFR 1.704(c).

37 CFR 1.704(c)(1) establishes suspension of action under 37 CFR 1.103 at the applicant's request as a circumstance that constitutes a failure of an applicant to engage in reasonable efforts to conclude processing or examination of an application. Obviously, if action is suspended at the applicant's request, the Office is precluded from processing or examining the application as a result of an action by the applicant. 37 CFR 1.704(c)(1) also provides that in such a case the period of adjustment set forth in 37 CFR 1.703 shall be reduced by the number of days, if any, beginning on the date a request for suspension of action under 37 CFR 1.103 was filed and ending on the date of the termination of the suspension.

37 CFR 1.704(c)(2) establishes deferral of issuance of a patent under 37 CFR 1.314 as a circumstance that constitutes a failure of an applicant to engage in reasonable efforts to conclude processing or examination of an application. Obviously, if issuance of the patent is deferred under 37 CFR 1.314, the Office is precluded from issuing the application as a result of an action by the applicant. When a petition under 37 CFR 1.314 is granted, the petition decision generally states that the application will be held for a period of a month to await the filing of a paper. At the end of the period, the application is returned to the issue process without a further communication from the Office to the applicant. 37 CFR 1.704(c)(2) also provides that in such a case the period of adjustment set forth in 37 CFR 1.703 shall be reduced by the number of days, if any, beginning on the date a request for deferral of issuance of a patent under 37 CFR 1.314 was filed and ending on the issue date of the patent.

37 CFR 1.704(c)(3) establishes abandonment of the application or late payment of the issue fee as a circumstance that constitutes a failure of an applicant to

engage in reasonable efforts to conclude processing or examination of an application. Obviously, if the application is abandoned (either by failure to prosecute or late payment of the issue fee), the Office is precluded from processing or examining the application as a result of an action or inaction by the applicant. 37 CFR 1.704(c)(3) also provides that in such a case the period of adjustment set forth in 37 CFR 1.703 shall be reduced by the number of days, if any, beginning on the date of abandonment or the date after the day the issue fee was due, and ending on the earlier of: (1) the date of mailing of the decision reviving the application or accepting late payment of the issue fee; or (2) the date that is four months after the date the grantable petition to revive the application or accept late payment of the issue fee was filed. The phrase "earlier of…[t]he date that is four months after the date the grantable petition to revive the application or accept late payment of the issue fee was filed" is to place a cap (measured from the filing date of the grantable petition) on the reduction if the Office does not act on (grant) the grantable petition to revive within four months of the date it was filed.

37 CFR 1.704(c)(4) establishes failure to file a petition to withdraw a holding of abandonment or to revive an application within two months from the mailing date of a notice of abandonment as a circumstance that constitutes a failure of an applicant to engage in reasonable efforts to conclude processing or examination of an application. Any applicant who considers an application to have been improperly held abandoned (the reduction in 37 CFR 1.704(c)(3) is applicable to the revival of an application properly held abandoned) is expected to file a petition to withdraw the holding of abandonment (or to revive the application) within two months from the mailing date of a notice of abandonment. See MPEP § 711.03(c), paragraph (I). 37 CFR 1.704(c)(4) also provides that in such a case the period of adjustment set forth in 37 CFR 1.703 shall be reduced by the number of days, if any, beginning on the day after the date two months from the mailing date of a notice of abandonment and ending on the date a petition to withdraw the holding of abandonment or to revive the application was filed.

If a petition to withdraw the holding of abandonment is granted, the Office's PALM system records should be checked to ensure that the correct term adjustment determination is made. Applicants are encouraged to check the Office's PALM system records for their applications through PAIR (see MPEP § 2733). For example, if applicant shows that a reply was filed in the Office on March 2, but the March 2 reply was never matched with the file, when the petition to withdraw the holding of abandonment is granted, the receipt of a paper on March 2 should be recorded on the Office's PALM system records. If the papers or dates are recorded incorrectly, applicant should contact the examiner, the examiner's supervisor or the Technology Center customer service representative to have the entry corrected. If an applicant receives a Notice of Abandonment and does not request that the holding of abandonment be withdrawn within two months of the mailing date of the notice, the applicant has failed to engage in reasonable efforts to conclude prosecution and any patent term adjustment will be reduced pursuant to 37 CFR 1.704(c)(4).

37 CFR 1.704(c)(5) establishes conversion of a provisional application under 35 U.S.C. 111(b) to a nonprovisional application under 35 U.S.C. 111(a) (pursuant to 35 U.S.C. 111(b)(5); (see MPEP § 201.04(b)) as a circumstance that constitutes a failure of an applicant to engage in reasonable efforts to conclude processing or examination of an application. Conversion of a provisional application to a nonprovisional application will require the Office to reprocess the application (as a nonprovisional application) up to one year after the filing date that will be accorded to such nonprovisional application as a result of an action by the applicant. 37 CFR 1.704(c)(5) also provides that in such a case the period of adjustment set forth in 37 CFR 1.703 shall be reduced by the number of days, if any, beginning on the date the application was filed under 35 U.S.C. 111(b) and ending on the date a request in compliance with 37 CFR 1.53(c)(3) to convert the provisional application into a nonprovisional application was filed.

37 CFR 1.704(c)(6) establishes submission of a preliminary amendment or other preliminary paper less than one month before the mailing of an Office action under 35 U.S.C. 132 or a notice of allowance under 35 U.S.C. 151 that requires the mailing of a supplemental Office action or notice of allowance as a circumstance that constitutes a failure of an applicant to engage in reasonable efforts to conclude processing or examination of an application. If the submission of

a preliminary amendment or other paper requires the Office to issue a supplemental Office action or notice of allowance, the submission of that preliminary amendment or other paper has interfered with the processing and examination of an application. 37 CFR 1.704(c)(6) also provides that in such a case the period of adjustment set forth in 37 CFR 1.703 shall be reduced by the lesser of the number of days, if any, beginning on the day after the mailing date of the original Office action or notice of allowance and ending on the date of mailing of the supplemental Office action or notice of allowance or four months. The phrase "lesser of… or [f]our months" is to provide a four-month cap for a reduction under 37 CFR 1.704(c)(6) if the Office takes longer than four months to issue a supplemental Office action or notice of allowance.

37 CFR 1.704(c)(7) establishes submission of a reply having an omission (37 CFR 1.135(c)) as a circumstance that constitutes a failure of an applicant to engage in reasonable efforts to conclude processing or examination of an application. Submitting a reply having an omission requires the Office to issue an action under 37 CFR 1.135(c) and await and process the applicant's reply to the action under 37 CFR 1.135(c) before the initial reply (as corrected) can be treated on its merits. In addition, 37 CFR 1.704(c)(7) provides that in such a case the period of adjustment set forth in 37 CFR 1.703 shall be reduced by the number of days, if any, beginning on the day after the date the reply having an omission was filed and ending on the date that the reply or other paper correcting the omission was filed. The reference to 37 CFR 1.135(c) is parenthetical because 37 CFR 1.704(c)(7) is not limited to Office actions under 37 CFR 1.135(c) but applies when the Office issues any action or notice indicating that a reply has an omission which must be corrected: e.g., (1) a decision on a petition under 37 CFR 1.47 dismissing the petition as lacking an item necessary to grant the petition; or (2) a notice indicating that the computer readable format sequence listing filed in reply to a Notice to Comply with Requirements for Patent Applications Containing Nucleotide Sequence and/or Amino Acid Sequence Disclosures (PTO-1661) does not comply with 37 CFR 1.821 et seq.

37 CFR 1.704(c)(8) establishes submission of a supplemental reply or other paper after a reply has been filed as a circumstance that constitutes a failure of an applicant to engage in reasonable efforts to conclude processing or examination of an application. The submission of a supplemental reply or other paper (e.g., an information disclosure statement (IDS) or petition) after an initial reply was filed requires the Office to restart consideration of the initial reply in view of the supplemental reply or other paper, which will result in a delay in the Office's response to the initial reply. 37 CFR 1.704(c)(8) does not apply to a supplemental reply or other paper that was expressly requested by the examiner. If an amendment is requested by an examiner, the examiner will have the paper processed so that it is included as part of an interview summary or examiner's amendment and not a separate paper for PALM to flag in the patent term adjustment calculation. 37 CFR 1.704(c)(8) also provides that in such a case the period of adjustment set forth in 37 CFR 1.703 shall be reduced by the number of days, if any, beginning on the day after the date the initial reply was filed and ending on the date that the supplemental reply or such other paper was filed.

37 CFR 1.704(c)(9) establishes submission of an amendment or other paper in an application containing allowed claims after a decision by the Board of Patent Appeals and Interferences (other than a decision containing a rejection under 37 CFR 1.196(b)) or a Federal court less than one month before the mailing of an Office action under 35 U.S.C. 132 or notice of allowance under 35 U.S.C. 151, that requires the mailing of a supplemental Office action or supplemental notice of allowance as a circumstance that constitutes a failure of an applicant to engage in reasonable efforts to conclude processing or examination of an application. The submission of an amendment or other paper (e.g., IDS or petition) in an application after a Board of Patent Appeals and Interferences or court decision requires the Office to restart consideration of the application in view of the amendment or other paper, which will result in a delay in the Office's taking action on the application. 37 CFR 1.704(c)(9) also provides that in such a case the period of adjustment set forth in 37 CFR 1.703 shall be reduced by the lesser of the number of days, if any, beginning on the day after the mailing date of the original Office action or notice of allowance and ending on the mailing date of the supplemental Office action or notice of allowance or four months. The phrase "lesser of…or

[f]our months" is to provide a four-month cap for a reduction under 37 CFR 1.704(c)(9) if the Office takes longer than four months to issue a supplemental Office action or notice of allowance. If the amendment is requested by an examiner, the examiner will have the paper processed so that it is included as part of an interview summary or examiner's amendment and not a separate paper for PALM to flag in the patent term adjustment calculation.

37 CFR 1.704(c)(10) establishes submission of an amendment under 37 CFR 1.312 or other paper after a notice of allowance has been given or mailed as a circumstance that constitutes a failure of an applicant to engage in reasonable efforts to conclude processing or examination of an application. The submission of amendments (or other papers) after an application is allowed may cause substantial interference with the patent issue process. Certain papers filed after allowance are not considered to be a failure to engage in reasonable efforts to conclude processing or examination of an application. See Clarification of 37 CFR 1.704(c)(10) – Reduction of Patent Term Adjustment for Certain Types of Papers Filed After a Notice of Allowance has been Mailed, 1247 Off. Gaz. Pat. Office 111 (June 26, 2001). The submission of the following papers after a "Notice of Allowance" is **not** considered a failure to engage in reasonable efforts to conclude processing or examination of an application: (1) Fee(s) Transmittal (PTOL-85B); (2) Power of Attorney; (3) Power to Inspect; (4) Change of Address; (5) Change of Status (small/not small entity status); (6) a response to the examiner's reasons for allowance or a request to correct an error or omission in the "Notice of Allowance" or "Notice of Allowability;" and (7) letters related to government interests (e.g., those between NASA and the Office). Papers that **will be** considered a failure to engage in reasonable efforts to conclude processing or examination of an application include: (1) a request for a refund; (2) a status letter; (3) amendments under 37 CFR 1.312; (4) late priority claims; (5) a certified copy of a priority document; (6) drawings; (7) letters related to biologic deposits; and (8) oaths or declarations. 37 CFR 1.704(c)(10) provides that in such a case the period of adjustment set forth in 37 CFR 1.703 shall be reduced by the lesser of: (1) the number of days, if any, beginning on the date the amendment under 37 CFR 1.312 was filed and ending on the mailing date of the Office action or notice in response to the amendment under 37 CFR 1.312 or such other paper; or (2) four months. The phrase "lesser of …or [f]our months" is to provide a four-month cap for a reduction under 37 CFR 1.704(c)(10) if the Office takes longer than four months to issue an Office action or notice in response to the amendment under 37 CFR 1.312 or other paper.

37 CFR 1.704(c)(11) establishes further prosecution via a continuing application as a circumstance that constitutes a failure of an applicant to engage in reasonable efforts to conclude processing or examination of an application. Currently, a continuing application may be used to: (1) obtain further examination of an invention disclosed and claimed in the prior application (continuation application); (2) obtain examination (for the first time) of an invention disclosed but not claimed or not elected for examination in the prior application (divisional application); or (3) obtain examination of an invention neither disclosed nor claimed in the prior application (continuation-in-part application). The provisions of 35 U.S.C. 132(b) and 37 CFR 1.114 permit an applicant to obtain further or continued examination of an invention disclosed and claimed in an application, which renders it unnecessary for an applicant whose application is eligible for patent term adjustment under 35 U.S.C. 154(b) to file a continuing application to obtain further examination of an invention disclosed and claimed in an application. If an applicant is filing a continuing application to obtain examination (for the first time) of an invention disclosed but not claimed or not elected for examination in the prior application or an invention neither disclosed nor claimed in the prior application, it is not appropriate for that applicant to obtain any benefit in the continuing application for examination delays that might have occurred in the prior application. Thus, the Office has established further prosecution via a continuing application as a circumstance that constitutes a failure of an applicant to engage in reasonable efforts to conclude processing or examination of an application, in that the period of adjustment set forth in 37 CFR 1.703 shall not include any period that is prior to the actual filing date of the application that resulted in the patent. Thus, if the application that resulted in the patent is a continuing application (including a CPA), the period of adjustment set forth in 37 CFR 1.703 (if any) will not

include any period that is prior to the actual filing date of the application (in the case of a CPA, the filing date of the request for a CPA) that resulted in the patent.

A CPA under 37 CFR 1.53(d) filed on or after May 29, 2000 and before July 14, 2003 is entitled to the patent term adjustment provisions of 35 U.S.C. 154(b) as amended by § 4402 of the American Inventors Protection Act of 1999 (CPAs can only be filed in design patent applications on or after July 14, 2003, and design applications are not entitled to PTA). The period of patent term adjustment set forth in 37 CFR 1.703 (if any), however, will not include any period that is prior to the filing date of the request for that CPA.

Delays before the filing date of an application are not relevant to whether an application is entitled to patent term adjustment. Patent term adjustment will not be reduced by applicant actions or inactions (that amount to a failure to engage in reasonable efforts to conclude processing or examination of the application) occurring in a prior (or other) application.

37 CFR 1.704(d) provides that a paper containing only an information disclosure statement in compliance with 37 CFR 1.97 and 1.98 will not be considered (result in a reduction) under 37 CFR 1.704(c)(6), 1.704(c)(8), 1.704(c)(9), or 1.704(c)(10) if it is accompanied by a statement that each item of information contained in the information disclosure statement was >first< cited in a communication from a foreign patent office in a counterpart application and that this communication was not received by any individual designated in 37 CFR 1.56(c) more than thirty days prior to the filing of the information disclosure statement. This provision will permit applicants to submit information >first< cited in a communication from a foreign patent office in a counterpart application to the Office without a reduction in patent term adjustment if an information disclosure statement is promptly (within thirty days of receipt of the >first< communication) submitted to the Office. Compliance with the statement requirement of 37 CFR 1.704(d) does not substitute for compliance with any relevant requirement of 37 CFR 1.97 or 1.98. 37 CFR 1.704(d) also provides that this thirty-day period is not extendable.

37 CFR 1.704(e) provides that submission of an application for patent term adjustment under 37 CFR 1.705(b) (with or without request under 37 CFR 1.705(c) for reinstatement of reduced patent term adjustment) will not be considered a failure to engage in reasonable efforts to conclude prosecution (processing or examination) of the application under 37 CFR 1.704(c)(10). Due to the time constraints on the Office under 35 U.S.C. 154(b)(1)(A)(iv) and (B) to complete its patent term adjustment determination and issue the patent, the Office must require applicants to follow the specific procedure set forth in 37 CFR 1.705 for requesting reconsideration of the Office's initial patent term adjustment determination and for requesting reinstatement of patent term adjustment reduced under 37 CFR 1.704(b). Thus, while submission of an application for patent term adjustment under 37 CFR 1.705(b) (regardless of whether it contains a request under 37 CFR 1.705(c) for reinstatement of reduced patent term adjustment) will interfere with the patent printing process, submission of the application will not be considered a failure to engage in reasonable efforts to conclude prosecution (processing or examination) of the application under 37 CFR 1.704(c)(10). Other papers concerning patent term adjustment (e.g., status letters, untimely applications for patent term adjustment, requests for reconsideration of the Office's decisions on applications for patent term adjustment, petitions under 37 CFR 1.181, 1.182, or 1.183 concerning patent term adjustment, or miscellaneous letters concerning patent term adjustment), however, will be considered a failure to engage in reasonable efforts to conclude prosecution (processing or examination) of the application under 37 CFR 1.704(c)(10).<

>

2733 Patent Term Adjustment Determination [R-2]

37 CFR 1.705. Patent term adjustment determination.

(a) The notice of allowance will include notification of any patent term adjustment under 35 U.S.C. 154(b).

*****

37 CFR 1.705 implements the provisions of 35 U.S.C. 154(b)(3) and (b)(4)(B) and indicates that the notice of allowance will include notification of any patent term adjustment under 35 U.S.C. 154(b) (35 U.S.C. 154(b)(3)(B)(i)). The patent term adjustment determinations required by 35 U.S.C. 154(b)(3)(B)(i) are made by a computer program that uses the infor-

mation (dates of receipt and nature of applicant correspondence and of the dates of mailing and nature of Office actions or notices) recorded in the PALM system. The Office currently issues a notice of allowance using a form entitled, Notice of Allowance and Fee(s) Due (PTOL-85). Since November 13, 2001, the Notice of Allowance and Fee(s) Due (PTOL-85) includes the patent term adjustment information on the third page of the form.

37 CFR 1.705(b) provides that any request for review or reconsideration of the patent term adjustment indicated in the notice of allowance (except as provided in 37 CFR 1.705(d)) and any request for reinstatement of all or part of the term reduced pursuant to 37 CFR 1.704(a) must be filed no later than the payment of the issue fee but may not be filed earlier than the date of mailing of the notice of allowance. See MPEP § 2734 for a discussion of the requirements of any such request.

If a registered practitioner receives a notice of allowance with a patent term adjustment that is longer than expected, the practitioner should disclose the error to the Office in compliance with the practitioner's duty of candor and good faith in practice before the Office. Where the correct patent term adjustment is thought to be less than indicated by the Office, an application for term adjustment under 37 CFR 1.705(b) need not be filed. Instead, a letter could be filed with the issue fee payment, indicating that the term adjustment is thought to be longer than appropriate. The Office does not require the practitioner to determine whether the Office's patent term adjustment determination is correct. Alternatively, if a notice of allowance indicates a patent term adjustment that is longer than expected, since the Office frequently corrects the error after mailing the notice of allowance, the practitioner (or applicant) may wait until the patent issues, and if the patent issues with a value that is incorrect, request a certificate of correction.

Information as to how the patent term adjustment calculation has been made will be available through Patent Application Information Retrieval (PAIR) at http://pair.uspto.gov. This system is available to all patent applicants who have a customer number as the correspondence address for the application. Applicants should routinely use PAIR to check the accuracy of the data entered in the PALM system for their applications (i.e., the type of the paper and date of receipt in the Office) throughout prosecution. If any errors are detected, they should be brought to the Office's attention (e.g., the examiner or the Technology Center's customer service representative) as soon as possible to ensure that they are corrected before allowance of the application and the initial determination of the patent term adjustment. In checking Office records, applicants should keep in mind that the date that should be recorded in the Office computer records is the date of receipt of the paper, not the date that it was mailed under 37 CFR 1.8. In addition, if an original paper is misplaced by the Office and a duplicate is filed with a post card receipt showing the date of receipt of the original paper, the date shown on the post-card receipt for the original paper is the date that should be shown in the Office computer records. If Express Mail service was used, then the date shown as the "date in" on the Express Mail label will be entered into the Office computer records. Otherwise, the date reflected in the Office computer records for a duplicate copy of correspondence will normally be the date that the duplicate was received in the USPTO.<

2734 Application for Patent Term Adjustment; Due Care Showing [R-2]

37 CFR 1.705. Patent term adjustment determination.

*****

(b) Any request for reconsideration of the patent term adjustment indicated in the notice of allowance, except as provided in paragraph (d) of this section, and any request for reinstatement of all or part of the term reduced pursuant to § 1.704(b) must be by way of an application for patent term adjustment. An application for patent term adjustment under this section must be filed no later than the payment of the issue fee but may not be filed earlier than the date of mailing of the notice of allowance. An application for patent term adjustment under this section must be accompanied by:

(1) The fee set forth in § 1.18(e); and

(2) A statement of the facts involved, specifying:

(i) The correct patent term adjustment and the basis or bases under § 1.702 for the adjustment;

(ii) The relevant dates as specified in §§ 1.703(a) through (e) for which an adjustment is sought and the adjustment as specified in § 1.703(f) to which the patent is entitled;

(iii) Whether the patent is subject to a terminal disclaimer and any expiration date specified in the terminal disclaimer; and

(iv)(A)Any circumstances during the prosecution of the application resulting in the patent that constitute a failure to engage in reasonable efforts to conclude processing or examination of such application as set forth in § 1.704; or

(B) That there were no circumstances constituting a failure to engage in reasonable efforts to conclude processing or examination of such application as set forth in § 1.704.

(c) Any application for patent term adjustment under this section that requests reinstatement of all or part of the period of adjustment reduced pursuant to § 1.704(b) for failing to reply to a rejection, objection, argument, or other request within three months of the date of mailing of the Office communication notifying the applicant of the rejection, objection, argument, or other request must also be accompanied by:

(1) The fee set forth in § 1.18(f); and

(2) A showing to the satisfaction of the Director that, in spite of all due care, the applicant was unable to reply to the rejection, objection, argument, or other request within three months of the date of mailing of the Office communication notifying the applicant of the rejection, objection, argument, or other request. The Office shall not grant any request for reinstatement for more than three additional months for each reply beyond three months from the date of mailing of the Office communication notifying the applicant of the rejection, objection, argument, or other request.

*****

37 CFR 1.705(b) provides that any request for review or reconsideration of the patent term adjustment indicated in the notice of allowance (except as provided in 37 CFR 1.705(d)) and any request for reinstatement of all or part of the term reduced pursuant to 37 CFR 1.704(a) must be filed no later than the payment of the issue fee but may not be filed earlier than the date of mailing of the notice of allowance. 37 CFR 1.705(b) provides that any such request must be by way of an application for patent term adjustment accompanied by the fee set forth in 37 CFR 1.18(e) and a statement of the facts involved. 37 CFR 1.705(b) also provides that such statement of facts must specify: (1) the basis or bases under 37 CFR 1.702 for the adjustment; (2) the relevant dates as specified in 37 CFR 1.703(a) through (e) for which an adjustment is sought and the adjustment as specified in 37 CFR 1.703(f) to which the patent is entitled; (3) whether the patent is subject to a terminal disclaimer and any expiration date specified in the terminal disclaimer; and (4) any circumstances during the prosecution of the application resulting in the patent that constitute a failure to engage in reasonable efforts to conclude processing or examination of such application as set forth in 37 CFR 1.704 (or a statement that there were no such circumstances). Since the Office must complete its determination of patent term adjustment before proceeding to issue the patent (35 U.S.C. 154(b)(3)(D)), the Office must require that such application for patent term adjustment be filed within a non-extendable time period and set forth with particularity why the Office's patent term adjustment determination is not correct. In the absence of these requirements, the issuance of the patent will be further delayed by a protracted patent term adjustment determination proceeding.

DUE CARE SHOWING

37 CFR 1.705(c) implements the provisions of 35 U.S.C. 154(b)(3)(C) and specifically provides that a request for reinstatement of all or part of the period of adjustment reduced pursuant to 37 CFR 1.704(b) for failing to reply to a rejection, objection, argument, or other request within three months of the date of mailing of the Office communication notifying the applicant of the rejection, objection, argument, or other request must include: (1) the fee set forth in 37 CFR 1.18(f); and (2) a showing to the satisfaction of the Director that, in spite of all due care, the applicant was unable to reply to the rejection, objection, argument, or other request within three months of the date of mailing of the Office communication notifying the applicant of the rejection, objection, argument, or other request. 37 CFR 1.705(c) also provides that the Office shall not grant any request for reinstatement for more than three additional months for each reply beyond three months of the date of mailing of the Office communication notifying the applicant of the rejection, objection, argument, or other request (35 U.S.C. 154(b)(3)(C)).

Filing a reply outside of three months after an Office action is *per se* a failure to engage in reasonable efforts to conclude prosecution under 35 U.S.C. 154(b)(2)(C)(ii) unless applicant can establish that the delay was "in spite of all due care." The Office "shall reinstate all or part of the cumulative period of time of an adjustment reduced under [35 U.S.C. 154(b)(2)(C)] if the applicant… makes a showing that, in spite of all due care, the applicant was unable to respond within the 3-month period…." See 35 U.S.C. 154(b)(3)(C). The "due care" of a reasonably prudent person standard has been applied in deciding petitions under the "unavoidable delay" standard of

35 U.S.C. 133. See *In re Mattullath*, 38 App. D.C. 497, 514-15 (1912) ("the word 'unavoidable' … is applicable to ordinary human affairs, and requires no more or greater care or diligence than is generally used and observed by prudent and careful men in relation to their most important business") (quoting and adopting *Ex parte Pratt*, 1887 Dec. Comm'r Pat. 31, 32-33); see also *Ray v. Lehman*, 55 F.3d 606, 609, 34 USPQ2d 1786, 1787 (Fed. Cir. 1995) ("in determining whether a delay…was unavoidable, one looks to whether the party…exercised the due care of a reasonably prudent person"). While the legislative history of the American Inventors Protection Act of 1999 is silent as to the meaning of the phrase "in spite of all due care," the phrases "all due care" and "unable to respond" invoke a higher degree of care than the ordinary due care standard of 35 U.S.C. 133, as well as the "reasonable efforts to conclude processing or examination [or prosecution] of an application" standard of 35 U.S.C. 154(b)(2)(C)(i) and (iii). Therefore, applicants should not rely upon decisions relating to the "unavoidable delay" standard of 35 U.S.C. 133 as controlling in a request to reinstate reduced patent term adjustment on the basis of a showing that the applicant was unable to respond within the three-month period in spite of all due care.

Examples

Examples of showings that may establish that the applicant was unable to respond within the three-month period in spite of all due care are as follows:

(A) a showing that the original three-month period was insufficient to obtain the test data necessary for an affidavit or declaration under 37 CFR 1.132 that was submitted with a reply filed outside the original three-month period;

(B) a showing that the applicant was unable to reply within the original three-month period due to a natural disaster;

(C) a showing that applicant was unable to reply within the original three-month period because testing was required to reply to an Office action, and the testing necessarily took longer than three months; or

(D) a showing that the applicant was unable to reply within the original three-month period due to illness or death of a sole practitioner of record who was responsible for prosecuting the application.

The patent term adjustment term reinstated would be limited to the period in which the showing establishes that applicant was acting with all due care to reply to the Office notice or action, but circumstances (outside applicant's control) made applicant unable to reply in spite of such due care. An applicant will not be able to show that he or she was unable to respond within the three-month period "in spite of all due care" if the reply was not filed within the three-month period due to reasons within the control of applicant or agencies within the applicant's control.

Examples of circumstances that would **NOT** establish that the applicant was unable to respond within the three-month period in spite of all due care are:

(A) an applicant's or representative's preoccupation with other matters (e.g., an inter partes lawsuit or interference) that is given priority over the application;

(B) illness or death of the practitioner in charge of the application if the practitioner is associated (in a law firm) with other practitioners (since the other practitioners could have taken action to reply within the three-month period);

(C) time consumed with communications between the applicant and his or her representative, regardless of whether the applicant resides in the United States or chooses to communicate with the United States representative via a foreign representative;

(D) vacation or other non-attention to an application that results in a failure to reply within the three-month period;

(E) applicant filing a reply on or near the last day of the three-month period using first class mail with a certificate of mailing under 37 CFR 1.8, rather than by Express Mail under 37 CFR 1.10 or facsimile (if permitted), and the reply is not received (filed) in the Office until after the three-month period; or

(F) failure of clerical employees of applicant or applicant's representative to properly docket the Office action or notice for reply or perform other tasks necessary for reply within the three-month period.

Rarely is the power of attorney given to a single attorney and often many attorneys are given power of attorney in an application. An attorney in litigation, working on an interference or taking a vacation is generally aware of that fact before the event and

should make plans for another to take over his or her work so that it is completed and filed in the Office within the three-month period. Thus, failure to reply within the three-month period in 35 U.S.C. 154(b)(2)(C)(ii) due to preoccupation with other matters (e.g., an *inter partes* lawsuit or interference) given priority over the application, or vacation or other non-attention to an application, cannot be relied upon to show that applicant was unable to reply "in spite of all due care" under 35 U.S.C. 154(b)(3)(C).<

>

2735 Request for Reconsideration of Patent Term Adjustment Determination [R-2]

37 CFR 1.705. Patent term adjustment determination.

*****

(d) If there is a revision to the patent term adjustment indicated in the notice of allowance, the patent will indicate the revised patent term adjustment. If the patent indicates or should have indicated a revised patent term adjustment, any request for reconsideration of the patent term adjustment indicated in the patent must be filed within two months of the date the patent issued and must comply with the requirements of paragraphs (b)(1) and (b)(2) of this section. Any request for reconsideration under this section that raises issues that were raised, or could have been raised, in an application for patent term adjustment under paragraph (b) of this section shall be dismissed as untimely as to those issues.

(e) The periods set forth in this section are not extendable.

*****

Since the Office is obligated to provide a determination of patent term adjustment under 35 U.S.C. 154(b) in the notice of allowance (i.e., before the actual patent issue date), the Office must project (or estimate) the actual patent issue date and base its patent term adjustment determination on that projection. Additionally, there are a number of papers which if submitted by an applicant after the mailing of the notice of allowance will result in a reduction of any patent term adjustment, and there may be Office delays occurring after mailing the notice of allowance resulting in an increase in the amount of patent term adjustment. Thus, 37 CFR 1.705(d) provides for a revision of the patent term adjustment when revision is necessitated by events occurring after the mailing of the notice of allowance. 37 CFR 1.705(d) specifically provides that if there is a revision to the patent term adjustment indicated in the notice of allowance, the patent will indicate the revised patent term adjustment. 37 CFR 1.705(d) also provides that if the patent indicates or should have indicated a revised patent term adjustment, any request for reconsideration of the patent term adjustment indicated in the patent must be filed within two months of the date the patent issued and must comply with the requirements of 37 CFR 1.705(b). The two month period is not extendable. 37 CFR 1.705(e).

Any request for reconsideration under 37 CFR 1.705(d) that raises issues that were raised, or could have been raised, in an application for patent term adjustment under 37 CFR 1.705(b) shall be dismissed as untimely as to those issues.<

>

2736 Third Party Papers [R-2]

37 CFR 1.705. Patent term adjustment determination.

*****

(f) No submission or petition on behalf of a third party concerning patent term adjustment under 35 U.S.C. 154(b) will be considered by the Office. Any such submission or petition will be returned to the third party, or otherwise disposed of, at the convenience of the Office.

*****

37 CFR 1.705(f) implements the provisions of 35 U.S.C. 154(b)(4)(B) and provides that no submission or petition on behalf of a third party concerning patent term adjustment under 35 U.S.C. 154(b) will be considered by the Office, and that any such submission or petition will be returned to the third party, or otherwise disposed of, at the convenience of the Office.<

2750 Patent Term Extension for Delays at other Agencies under 35 U.S.C. 156 [R-2]

The right to a patent term extension based upon regulatory review is the result of the Drug Price Competition and Patent Term Restoration Act of 1984, Pub. L. No. 98-417, 98 Stat. 1585 (codified at 21 U.S.C. 355(b), (j), (l); 35 U.S.C. 156, 271, 282)(Hatch-Waxman Act). The act sought to eliminate two distortions to the normal "patent term produced by the requirement that certain products must receive premarket regulatory approval." *Eli Lilly & Co. v. Medtronic Inc.*, 496 U.S. 661, 669, 15 USPQ2d

1121, 1126 (1990). The first distortion was that the patent owner loses patent term during the early years of the patent because the product cannot be commercially marketed without approval from a regulatory agency. The second distortion occurred after the end of the patent term because competitors could not immediately enter the market upon expiration of the patent because they were not allowed to begin testing and other activities necessary to receive FDA approval before patent expiration.

The part of the act codified as 35 U.S.C. 156 was designed to create new incentives for research and development of certain products subject to premarket government approval by a regulatory agency. The statute enables the owners of patents on certain human drugs, food or color additives, medical devices, animal drugs, and veterinary biological products to restore to the terms of those patents some of the time lost while awaiting premarket government approval from a regulatory agency. The rights derived from extension of the patent term are limited to the approved product (as defined in 35 U.S.C. 156(a)(4) and (a)(5)). See 35 U.S.C. 156(b). Accordingly, if the patent claims other products in addition to the approved product, the exclusive patent rights to the additional products expire with the original expiration date of the patent.

In exchange for extension of the term of the patent, Congress legislatively overruled *Roche Products v. Bolar Pharmaceuticals*, 733 F.2d 858, 221 USPQ 937 (Fed. Cir. 1984) as to products covered by 35 U.S.C. 271(e) and provided that it shall not be an act of infringement, for example, to make and test a patented drug solely for the purpose of developing and submitting information for an Abbreviated New Drug Application (ANDA). 35 U.S.C. 271(e)(1). See Donald O. Beers, *Generic and Innovator Drugs: A Guide to FDA Approval Requirements*, Fifth Edition, Aspen Law & Business, 1999, 4.3[2] for a discussion of the Hatch-Waxman Act and infringement litigation. Furthermore, Congress provided that an ANDA cannot be filed until five years after the approval date of the product if the active ingredient or a salt or ester of the active ingredient had not been previously approved under section 505(b) of the Federal Food, Drug and Cosmetic Act. 21 U.S.C. 355(j)(4)(D)(ii). See also Lourie, *Patent Term Restoration: History, Summary, and Appraisal*, 40 Food, Drug and Cosmetic L. J. 351, 353-60 (1985). See also Lourie, *Patent Term Restoration*, 66 J. Pat. Off. Soc'y 526 (1984).

On November 16, 1988, 35 U.S.C. 156 was amended by Public Law 100-670, essentially to add animal drugs and veterinary biologics to the list of products that can form the basis of patent term extension. Animal drug products which are primarily manufactured through biotechnology are excluded from the provisions of patent term extension.

On December 3, 1993, 35 U.S.C. 156 was further amended to provide for interim extension of a patent where a product claimed by the patent was expected to be approved, but not until after the original expiration date of the patent. Public Law 103-179, Section 5.

An application for the extension of the term of a patent under 35 U.S.C. 156 must be submitted by the owner of record of the patent or its agent within the sixty-day period beginning on the date the product received permission for commercial marketing or use under the provision of law under which the applicable regulatory review period occurred for commercial marketing or use. See 35 U.S.C. 156(d)(1). The USPTO initially determines whether the application is formally complete and whether the patent is eligible for extension. The statute requires the **>Director of the United States Patent and Trademark Office< to notify the Secretary of Agriculture or the Secretary of Health and Human Services of the submission of an application for extension of patent term which complies with 35 U.S.C. 156 within sixty days and to submit to the Secretary a copy of the application. Not later than thirty days after receipt of the application from the *>Director<, the Secretary will determine the length of the applicable regulatory review period and notify the *>Director< of the determination. If the *>Director< determines that the patent is eligible for extension, the *>Director< calculates the length of extension for which the patent is eligible under the appropriate statutory provision and issues an appropriate Certificate of Extension.

Patent term extensions provided by private relief legislation, public laws other than as enacted by 35 U.S.C. 156, such as 35 U.S.C. 155 and 155A, are not addressed herein.

2751 Eligibility Requirements [R-2]

35 U.S.C. 156. Extension of patent term

(a) The term of a patent which claims a product, a method of using a product, or a method of manufacturing a product shall be extended in accordance with this section from the original expiration date of the patent, which shall include any patent term adjustment granted under section 154(b) if —

(1) the term of the patent has not expired before an application is submitted under subsection (d)(1) for its extension;

(2) the term of the patent has never been extended under subsection (e)(1) of this section;

(3) an application for extension is submitted by the owner of record of the patent or its agent and in accordance with the requirements of paragraphs (1) through (4) of subsection (d);

(4) the product has been subject to a regulatory review period before its commercial marketing or use;

(5)(A) except as provided in subparagraph (B) or (C), the permission for the commercial marketing or use of the product after such regulatory review period is the first permitted commercial marketing or use of the product under the provision of law under which such regulatory review period occurred;

(B) in the case of a patent which claims a method of manufacturing the product which primarily uses recombinant DNA technology in the manufacture of the product, the permission for the commercial marketing or use of the product after such regulatory period is the first permitted commercial marketing or use of a product manufactured under the process claimed in the patent; or

(C) for purposes of subparagraph (A), in the case of a patent which —

(i) claims a new animal drug or a veterinary biological product which (I) is not covered by the claims in any other patent which has been extended, and (II) has received permission for the commercial marketing or use in non-food-producing animals and in food-producing animals, and

(ii) was not extended on the basis of the regulatory review period for use in non-food-producing animals, the permission for the commercial marketing or use of the drug or product after the regulatory review period for use in food-producing animals is the first permitted commercial marketing or use of the drug or product for administration to a food-producing animal.

The product referred to in paragraphs (4) and (5) is hereinafter in this section referred to as the "approved product."

*****

(f) For purposes of this section:

(1) The term "product" means:

(A) A drug product.

(B) Any medical device, food additive, or color additive subject to regulation under the Federal Food, Drug, and Cosmetic Act.

(2) The term "drug product" means the active ingredient of—

(A) a new drug, antibiotic drug, or human biological product (as those terms are used in the Federal Food, Drug, and Cosmetic Act and the Public Health Service Act) or

(B) a new animal drug or veterinary biological product (as those terms are used in the Federal Food, Drug, and Cosmetic Act and the Virus-Serum-Toxin Act) which is not primarily manufactured using recombinant DNA, recombinant RNA, hybridoma technology, or other processes involving site specific genetic manipulation techniques, including any salt or ester of the active ingredient, as a single entity or in combination with another active ingredient.

(3) The term "major health or environmental effects test" means a test which is reasonably related to the evaluation of the health or environmental effects of a product, which requires at least six months to conduct, and the data from which is submitted to receive permission for commercial marketing or use. Periods of analysis or evaluation of test results are not to be included in determining if the conduct of a test required at least six months.

(4)(A)Any reference to section 351 is a reference to section 351 of the Public Health Service Act.

(B) Any reference to section 503, 505, 512, or 515 is a reference to section 503, 505, 512, or 515 of the Federal Food, Drug and Cosmetic Act.

(C) Any reference to the Virus-Serum-Toxin Act is a reference to the Act of March 4, 1913 (21 U.S.C. 151 - 158).

(5) The term "informal hearing" has the meaning prescribed for such term by section 201(y) of the Federal Food, Drug and Cosmetic Act.

(6) The term "patent" means a patent issued by the United States Patent and Trademark Office.

(7) The term "date of enactment" as used in this section means September 24, 1984, for human drug product, a medical device, food additive, or color additive.

(8) The term "date of enactment" as used in this section means the date of enactment of the Generic Animal Drug and Patent Term Restoration Act for an animal drug or a veterinary biological product.

*****

37 CFR 1.710. Patents subject to extension of the patent term

(a) A patent is eligible for extension of the patent term if the patent claims a product as defined in paragraph (b) of this section, either alone or in combination with other ingredients that read on a composition that received permission for commercial marketing or use, or a method of using such a product, or a method of manufacturing such a product, and meets all other conditions and requirements of this subpart.

(b) The term *product* referred to in paragraph (a) of this section means —

(l) The active ingredient of a new human drug, antibiotic drug, or human biological product (as those terms are used in the Federal Food, Drug, and Cosmetic Act and the Public Health Service Act) including any salt or ester of the active ingredient, as a single entity or in combination with another active ingredient; or

(2) The active ingredient of a new animal drug or veterinary biological product (as those terms are used in the Federal Food, Drug, and Cosmetic Act and the Virus-Serum-Toxin Act) that is not primarily manufactured using recombinant DNA, recombinant RNA, hybridoma technology, or other processes

including site specific genetic manipulation techniques, including any salt or ester of the active ingredient, as a single entity or in combination with another active ingredient; or

(3) Any medical device, food additive, or color additive subject to regulation under the Federal Food, Drug, and Cosmetic Act.

37 CFR 1.720. Conditions for extension of patent term

The term of a patent may be extended if:

(a) The patent claims a product or a method of using or manufacturing a product as defined in § 1.710;

(b) The term of the patent has never been previously extended, except for extensions issued pursuant to §§ 1.701, 1.760, or 1.790;

(c) An application for extension is submitted in compliance with § 1.740;

(d) The product has been subject to a regulatory review period as defined in 35 U.S.C. 156(g) before its commercial marketing or use;

(e) The product has received permission for commercial marketing or use and —

(1) The permission for the commercial marketing or use of the product is the first received permission for commercial marketing or use under the provision of law under which the applicable regulatory review occurred, or

(2) In the case of a patent other than one directed to subject matter within § 1.710(b)(2) claiming a method of manufacturing the product that primarily uses recombinant DNA technology in the manufacture of the product, the permission for the commercial marketing or use is the first received permission for the commercial marketing or use of a product manufactured under the process claimed in the patent, or

(3) In the case of a patent claiming a new animal drug or a veterinary biological product that is not covered by the claims in any other patent that has been extended, and has received permission for the commercial marketing or use in non-food-producing animals and in food-producing animals, and was not extended on the basis of the regulatory review period for use in non-food-producing animals, the permission for the commercial marketing or use of the drug or product after the regulatory review period for use in food-producing animals is the first permitted commercial marketing or use of the drug or product for administration to a food-producing animal.

(f) The application is submitted within the sixty-day period beginning on the date the product first received permission for commercial marketing or use under the provisions of law under which the applicable regulatory review period occurred; or in the case of a patent claiming a method of manufacturing the product which primarily uses recombinant DNA technology in the manufacture of the product, the application for extension is submitted within the sixty-day period beginning on the date of the first permitted commercial marketing or use of a product manufactured under the process claimed in the patent; or in the case of a patent that claims a new animal drug or a veterinary biological product that is not covered by the claims in any other patent that has been extended, and said drug or product has received permission for the commercial marketing or use in non-food-producing animals, the application for extension is submitted within the sixty-day period beginning on the date of the first permitted commercial marketing or use of the drug or product for administration to a food-producing animal;

(g) The term of the patent, including any interim extension issued pursuant to § 1.790, has not expired before the submission of an application in compliance with § 1.741; and

(h) No other patent term has been extended for the same regulatory review period for the product.

35 U.S.C. 156(a) sets forth what patents can be extended and the conditions under which they may be extended. 37 CFR 1.710 also addresses the patents that may be extended, and 37 CFR 1.720 describes the conditions under which a patent may be extended. As set forth in 35 U.S.C. 156 and 37 CFR 1.710, a patent which claims a human drug product, medical device, food or color additive first approved for marketing or use after September 24, 1984, or an animal drug or veterinary biological product (which was not primarily manufactured through biotechnology) first approved for marketing or use after November 16, 1988, may qualify for patent term extension. Furthermore, 35 U.S.C. 156(a)(1) - (5) require that the applicant establish that:

(1) the patent has not expired before an application under 35 U.S.C. 156(d) was filed (this may be an application for patent term extension under subsection (d)(1) or an application for interim extension under subsection (d)(5));

(2) the patent has never been extended under 35 U.S.C. 156(e)(1);

(3) the application for extension is submitted by the owner of record of the patent or its agent to the Office within 60 days of regulatory agency approval of the commercial marketing application and the application includes details relating to the patent, the approved product, and the regulatory review time spent in securing regulatory agency approval;

(4) the product has been subject to a regulatory review period within the meaning of 35 U.S.C. 156(g) before its commercial marketing or use;

(5) the approval is the first permitted commercial marketing or use of the product (35 U.S.C. 156(a)(5)(A)), except in the case of human drug products manufactured using recombinant DNA technology where the provisions of 35 U.S.C. 156(a)(5)(B) apply, or in the case of a new animal drug or a veterinary biological product where the provisions of 35 U.S.C. 156(a)(5)(C) apply.

35 U.S.C. 156(c)(4) also requires that no other patent term has been extended for the same regulatory review period for the product. See MPEP § 2761.

>TERMINALLY DISCLAIMED PATENTS ARE ELIGIBLE

A patent may be extended under 35 U.S.C. 156, even though it has been terminally disclaimed. A patent term extension under 35 U.S.C. 156 is a limited extension of the patent rights associated with the approved product that is attached onto the original term of the patent. See 35 U.S.C. 156(b). Only one patent may be extended for a regulatory review period for any product, and 35 U.S.C. 156 sets the expiration date of a patent term extension. Although 35 U.S.C. 154(b)(2)(June 8, 1995) precludes a patent from being extended under 35 U.S.C. 154(b) if the patent has been terminally disclaimed due to an obviousness-type double patenting rejection (see MPEP § 2720), there is no such exclusion in 35 U.S.C. 156. Additionally, 35 U.S.C. 154(b)(2)(B)(May 29, 2000) provides that a patent cannot be adjusted beyond the date set by the disclaimer (see MPEP § 2730), but there is no similar provision in 35 U.S.C. 156. Thus patents may receive a patent term extension under 35 U.S.C. 156 beyond an expiration date set by a terminal disclaimer.<

MEANING OF "PRODUCT" AS DEFINED IN 35 U.S.C. 156(f)

As required by 35 U.S.C. 156(a), patents eligible for extension of patent term are those which:

(A) claim a "product" as defined in 35 U.S.C. 156(f)(1), either alone or in combination with other ingredients, wherein the product reads on a composition (product) that received permission for commercial marketing or use, or a method of using such a product, or a method of manufacturing such a product, and

(B) meet all other conditions and requirements of the statute.

The term "claims a product" is not synonymous with "infringed by a product." A patent which claims a metabolite of an approved drug does not claim the approved drug. *Hoechst-Roussel Pharmaceuticals Inc. v. Lehman*, 109 F.3d 756, 759, 42 USPQ2d 1220, 1223 (Fed. Cir. 1997).

The term "product" means:

(A) The active ingredient of a new human drug, antibiotic drug, or human biological product (as those terms are used in the Federal Food, Drug, and Cosmetic Act and the Public Health Service Act) including any salt or ester of the active ingredient, as a single entity or in combination with another active ingredient; or

(B) The active ingredient of a new animal drug or veterinary biological product (as those terms are used in the Federal Food, Drug, and Cosmetic Act and the Virus-Serum-Toxin Act) that is not primarily manufactured using recombinant DNA, recombinant RNA, hybridoma technology, or other processes including site specific genetic manipulation techniques, including any salt or ester of the active ingredient, as a single entity or in combination with another active ingredient; or

(C) Any medical device, food additive, or color additive subject to regulation under the Federal Food, Drug, and Cosmetic Act.

See 21 CFR 60.3(b) for definitions of terms such as active ingredient, color additive, food additive, human drug product, and medical device.

Essentially, a "product" is a "drug product," medical device, food additive, or color additive requiring Food and Drug Administration or Department of Agriculture (Plant and Animal Inspection Service) approval of an order or regulation prior to commercial marketing or use. "Drug product" is the active ingredient of a human drug, animal drug (excluding those primarily manufactured using recombinant DNA, recombinant RNA, hybridoma technology, or other processes including site specific genetic manipulation techniques), or biological product (as defined by the Federal Food, Drug and Cosmetics Act and the Public Health Service Act) including any salt or ester of the active ingredient, as a single entity or in combination with another active ingredient. Animal biological products are approved by the Plant and Animal Inspection Service of the Department of Agriculture.

A "drug product" means the active ingredient found in the final dosage form prior to administration of the product to the patient, not the resultant form the drug may take after administration. In this regard, a drug in the ester form which is used for oral administration is a different drug product from the same active moiety

in a salt form which is administered by injection, even though both the salt and the ester are used to treat the same disease condition. The ester form is a different active ingredient from the salt form. Both the ester and the salt active ingredient may each support an extension of patent term of different patents provided the acid itself has not previously been approved. See *Glaxo Operations UK Ltd. v. Quigg*, 706 F.Supp. 1224, 1232-33, 10 USPQ2d 1100, 1107 (E.D. Va. 1989); *aff'd.*, 894 F.2d 392, 13 USPQ2d 1628 (Fed. Cir. 1990).

Furthermore, a "drug product" is the active ingredient of a particular new drug, rather than the entire composition of the drug product approved by the Food and Drug Administration. See *Fisons plc v. Quigg*, 1988 U.S. Dist. LEXIS 10935; 8 USPQ2d 1491, 1495 (D.D.C. 1988); *aff'd.*, 876 F2d 99, 110; 10 USPQ2d 1869, 1870 (Fed. Cir. 1989). An active ingredient of a drug is the ingredient in the drug product that becomes therapeutically active when administered. *Glaxo Operations UK Ltd. v. Quigg*, 894 F.2d 392, 393, 13 USPQ2d 1628, 1629 (Fed. Cir. 1990); *but c.f., Abbott Laboratories v. Young*, 920 F.2d 984, 989 n.7 (D.C. Cir. 1990), *cert denied*, 112 S. Ct. 76 (1991) (The court rejected the approach of *Glaxo* in considering whether *Abbott* was entitled to exclusivity).

A patent is considered to claim the product at least in those situations where the patent claims the active ingredient per se, or claims a composition or formulation which contains the active ingredient(s) and reads on the composition or formulation approved for commercial marketing or use.

NO PREVIOUS EXTENSIONS (WITH LIMITED EXCEPTIONS)

37 CFR 1.720(b) explains that patent term extension pursuant to 35 U.S.C. 156 is available only if the term of the patent has never been previously extended, except for extensions issued pursuant to 37 CFR 1.701, 1.760, or 1.790. An extension issued pursuant to 37 CFR 1.701 is an extension of the patent due to administrative delay within the Office. Note that the term of a patent is "adjusted," not extended, pursuant to 37 CFR 1.702-1.705. An extension issued pursuant to 37 CFR 1.760 is an interim extension under 35 U.S.C. 156(e)(2). An extension issued pursuant to 37 CFR 1.790 is an interim extension under 35 U.S.C. 156(d)(5).

REGULATORY REVIEW PERIOD

37 CFR 1.720(d) restates the statutory requirement set forth in 35 U.S.C. 156(a)(4). The regulatory review period must have been a regulatory review period defined by the statute. A regulatory review period under section 510(k) of the Federal Food, Drug and Cosmetic Act is not a regulatory review period which gives rise to eligibility for patent term extension under 35 U.S.C. 156. *In re Nitinol Medical Technologies Inc.*, 17 USPQ2d 1492, 1492-1493 (Comm'r Pat. & Tm. 1990). See also *Baxter Diagnostics v. AVL Scientific Corp.* 798 F. Supp. 612, 619-620; 25 USPQ2d 1428,1434 (CD CA 1992)(Congress intended only Class III medical devices to be eligible for patent term extension).

If the product is alleged to be a medical device, then regulatory review must have occurred under section 515, and not section 505, of the Federal Food, Drug and Cosmetic Act. Drug products are not reviewed under section 515.

If more than one application for patent term extension is filed based upon a single regulatory review period, election will be required of a single patent. See MPEP § 2761.

FIRST PERMITTED MARKETING OR USE

37 CFR 1.720(e) follows 35 U.S.C. 156(a)(5), and sets forth that the approval under the relevant provision of law must have been the first permitted marketing or use of the product under the provision of law, unless the product is for use in food producing animals as explained below. See *In re Patent Term Extension Application, U.S. Patent No. 3,849,549*, 226 USPQ 283, 284 (Pat. & Tm. Office 1985). If the product is a human drug product, then the approval of the active ingredient must be the first permitted commercial marketing or use of the active ingredient as a single entity or in combination with another active ingredient under the provision of law under which regulatory review occurred.

Where a product contains multiple active ingredients, if any one active ingredient has not been previously approved, it can form the basis of an extension of patent term provided the patent claims that ingredient. See *In re Alcon Laboratories Inc.*, 13 USPQ2d

1115, 1121 (Comm'r Pat. & Tm. 1989) for examples of products having different combinations of active ingredients. A different ratio of hormones is not a different active ingredient for purposes of 35 U.S.C. 156. Furthermore, an approved product having two active ingredients, which are not shown to have a synergistic effect or have pharmacological interaction, will not be considered to have a single active ingredient made of the two active ingredients.

As to 35 U.S.C. 156(a)(5)(C), which is addressed in 37 CFR 1.720(e)(3), the term of a patent directed to a new animal drug or veterinary biological product may be extended based on a second or subsequent approval of the active ingredient provided all the following conditions exist:

(A) the patent claims the drug or product;

(B) the drug or product is not covered by the claims in any other patent that has been extended;

(C) the patent term was not extended on the basis of the regulatory review period for use in non-food producing animals; and

(D) the second or subsequent approval was the first permitted commercial marketing or use of the drug or product for administration to a food-producing animal. In this case, the application must be filed within sixty days of the first approval for administration to a food-producing animal.

For animal drugs or products, prior approval for use in a non-food producing animal will not make a patent ineligible for patent term extension based upon a later approval of the drug or product for use in food producing animals, if the later approval is the first approval of the drug or product for use in food producing animals.

2752 Patent Term Extension Applicant

35 U.S.C. 156. Extension of patent term

*****

(d)(1) To obtain an extension of the term of a patent under this section, the owner of record of the patent or its agent shall submit an application to the Director. Except as provided in paragraph (5), such an application may only be submitted within the sixty-day period beginning on the date the product received permission under the provision of law under which the applicable regulatory review period occurred for commercial marketing or use. The application shall contain —

(A) the identity of the approved product and the Federal statute under which regulatory review occurred;

(B) the identity of the patent for which an extension is being sought and the identity of each claim of such patent;

(C) information to enable the Director to determine under subsections (a) and (b) the eligibility of a patent for extension and the rights that will be derived from the extension and information to enable the Director and the Secretary of Health and Human Services or the Secretary of Agriculture to determine the period of the extension under subsection (g);

(D) a brief description of the activities undertaken by the applicant during the applicable regulatory review period with respect to the approved product and the significant dates applicable to such activities; and

(E) such patent or other information as the Director may require.

*****

37 CFR 1.730. Applicant for extension of patent term; signature requirements.

(a) Any application for extension of a patent term must be submitted by the owner of record of the patent or its agent and must comply with the requirements of § 1.740.

(b) If the application is submitted by the patent owner, the application must be signed either by:

(1) The patent owner in compliance with § 3.73(b) of this chapter; or

(2) A registered practitioner on behalf of the patent owner.

(c) If the application is submitted on behalf of the patent owner by an agent of the patent owner (*e.g.*, a licensee of the patent owner), the application must be signed by a registered practitioner on behalf of the agent. The Office may require proof that the agent is authorized to act on behalf of the patent owner.

(d) If the application is signed by a registered practitioner, the Office may require proof that the practitioner is authorized to act on behalf of the patent owner or agent of the patent owner.

35 U.S.C. 156(d)(1) requires that the application for extension of the patent term must be submitted by the owner of record of the patent or its agent. If the application is filed by an assignee, the application papers should refer to the reel and frame number of the recorded assignment. A power of attorney from the patent owner to any patent attorney or agent submitting the patent term extension application papers should be filed, if the attorney or agent is not already of record in the patent (see 37 CFR 1.34(b)).

If the applicant for patent term extension was not the marketing applicant before the regulatory agency, then there must be an agency relationship between the patent owner and the marketing applicant during the regulatory review period. To show that such an applicant is authorized to rely upon the activities of the marketing applicant before the Food and Drug Administration or the Department of Agriculture, it is

advisable for the applicant for patent term extension to obtain a letter from the marketing applicant specifically authorizing such reliance.

2753 Application Contents [R-2]

37 CFR 1.740. Formal requirements for application for extension of patent term; correction of informalities.

**>

(a) An application for extension of patent term must be made in writing to the Director. A formal application for the extension of patent term must include:<

(1) A complete identification of the approved product as by appropriate chemical and generic name, physical structure or characteristics;

(2) A complete identification of the Federal statute including the applicable provision of law under which the regulatory review occurred;

(3) An identification of the date on which the product received permission for commercial marketing or use under the provision of law under which the applicable regulatory review period occurred;

(4) In the case of a drug product, an identification of each active ingredient in the product and as to each active ingredient, a statement that it has not been previously approved for commercial marketing or use under the Federal Food, Drug, and Cosmetic Act, the Public Health Service Act, or the Virus-Serum-Toxin Act, or a statement of when the active ingredient was approved for commercial marketing or use (either alone or in combination with other active ingredients), the use for which it was approved, and the provision of law under which it was approved.

(5) A statement that the application is being submitted within the sixty day period permitted for submission pursuant to § l.720(f) and an identification of the date of the last day on which the application could be submitted;

(6) A complete identification of the patent for which an extension is being sought by the name of the inventor, the patent number, the date of issue, and the date of expiration;

(7) A copy of the patent for which an extension is being sought, including the entire specification (including claims) and drawings;

(8) A copy of any disclaimer, certificate of correction, receipt of maintenance fee payment, or reexamination certificate issued in the patent;

(9) A statement that the patent claims the approved product, or a method of using or manufacturing the approved product, and a showing which lists each applicable patent claim and demonstrates the manner in which at least one such patent claim reads on:

(i) The approved product, if the listed claims include any claim to the approved product;

(ii) The method of using the approved product, if the listed claims include any claim to the method of using the approved product; and

(iii) The method of manufacturing the approved product, if the listed claims include any claim to the method of manufacturing the approved product;

(10) A statement beginning on a new page of the relevant dates and information pursuant to 35 U.S.C. 156(g) in order to enable the Secretary of Health and Human Services or the Secretary of Agriculture, as appropriate, to determine the applicable regulatory review period as follows:

(i) For a patent claiming a human drug, antibiotic, or human biological product:

(A) The effective date of the investigational new drug (IND) application and the IND number;

(B) The date on which a new drug application (NDA) or a Product License Application (PLA) was initially submitted and the NDA or PLA number; and

(C) The date on which the NDA was approved or the Product License issued;

(ii) For a patent claiming a new animal drug:

(A) The date a major health or environmental effects test on the drug was initiated, and any available substantiation of that date, or the date of an exemption under subsection (j) of Section 512 of the Federal Food, Drug, and Cosmetic Act became effective for such animal drug;

(B) The date on which a new animal drug application (NADA) was initially submitted and the NADA number; and

(C) The date on which the NADA was approved;

(iii) For a patent claiming a veterinary biological product:

(A) The date the authority to prepare an experimental biological product under the Virus-Serum-Toxin Act became effective;

(B) The date an application for a license was submitted under the Virus-Serum-Toxin Act; and

(C) The date the license issued;

(iv) For a patent claiming a food or color additive:

(A) The date a major health or environmental effects test on the additive was initiated and any available substantiation of that date;

(B) The date on which a petition for product approval under the Federal Food, Drug and Cosmetic Act was initially submitted and the petition number; and

(C) The date on which the FDA published a *Federal Register* notice listing the additive for use;

(v) For a patent claiming a medical device:

(A) The effective date of the investigational device exemption (IDE) and the IDE number, if applicable, or the date on which the applicant began the first clinical investigation involving the device, if no IDE was submitted, and any available substantiation of that date;

(B) The date on which the application for product approval or notice of completion of a product development protocol under Section 515 of the Federal Food, Drug and Cosmetic Act was initially submitted and the number of the application; and

(C) The date on which the application was approved or the protocol declared to be completed;

(11) A brief description beginning on a new page of the significant activities undertaken by the marketing applicant during the applicable regulatory review period with respect to the approved product and the significant dates applicable to such activities;

(12) A statement beginning on a new page that in the opinion of the applicant the patent is eligible for the extension and a statement as to the length of extension claimed, including how the length of extension was determined;

**>

(13) A statement that applicant acknowledges a duty to disclose to the Director of the United States Patent and Trademark Office and the Secretary of Health and Human Services or the Secretary of Agriculture any information which is material to the determination of entitlement to the extension sought (*see* § 1.765);<

(14) The prescribed fee for receiving and acting upon the application for extension (see § 1.20(j)); and

(15) The name, address, and telephone number of the person to whom inquiries and correspondence relating to the application for patent term extension are to be directed.

(b) The application under this section must be accompanied by two additional copies of such application (for a total of three copies).

(c) If an application for extension of patent term is informal under this section, the Office will so notify the applicant. The applicant has two months from the mail date of the notice, or such time as is set in the notice, within which to correct the informality. Unless the notice indicates otherwise, this time period may be extended under the provisions of § 1.136.

37 CFR 1.740 sets forth the requirements for a formal application for extension of patent term. See MPEP § 2752 for a discussion of who may apply for a patent term extension. See 37 CFR 1.741 and MPEP § 2754 for a description of the information that must be submitted in the patent term extension application in order to be accorded a filing date.

37 CFR 1.740(a)(1) requires a complete identification of the approved product as by appropriate chemical and generic name, physical structure or characteristics so as to enable the *>Director< to make a determination of whether the patent claims the approved product, or a method of using or manufacturing the approved product.

37 CFR 1.740(a)(2) requires a complete identification of the federal statute including the applicable provision of law under which the regulatory review occurred. When the regulatory review of the product took place under more than one Federal statute, each appropriate statute should be listed. This could apply to a situation where a human biological product is tested under an investigational new drug (IND) application pursuant to the Federal Food, Drug, and Cosmetic Act, but is approved under the Public Health Service Act; or to a situation where approval is sought for use of a particular medical device with a specific drug product which may require approval under more than a single provision of law. The product that forms the basis of an application for patent term extension must be either a medical device or a drug product; it cannot be a combination of those separate products. See the file history of U.S. Patent No. 4,428,744 for an example of the application of this principle.

The date that a product receives permission for commercial marketing or use (which must be identified pursuant to 37 CFR 1.740(a)(3)) is generally the mailing date of the letter from the regulatory agency indicating regulatory approval. For a food additive, the approval date is generally the effective date stated in the regulation and the date the regulation is published.

37 CFR 1.740(a)(4) provides that for drug products, each active ingredient must be identified and there must be an indication of the use for which the product was approved. For each active ingredient, a statement must be made that either the active ingredient was not previously approved for commercial marketing or use under the Federal Food, Drug and Cosmetic Act, or that the active ingredient was approved for commercial marketing or use (either alone or in combination with other active ingredients) and the provision of law under which it was approved. The information is especially necessary for a determination of eligibility where, for example, the application is based on a second or subsequent approval of an active ingredient, but the first approval for administration to a food-producing animal.

In accordance with 37 CFR 1.740(a)(5), the application must be submitted within the sixty day period permitted for submission pursuant to 37 CFR 1.720(f). If the sixty day period ends on a Saturday, Sunday or Federal holiday, then the last day on which the application could be submitted will be considered to be the next business day following the Saturday, Sunday or Federal holiday. See 37 CFR 1.7. However, applicants are cautioned to avoid filing an application for patent term extension on the last day for filing to avoid the application being denied because the filing deadline was inadvertently missed.

The expiration date of the patent for which an extension is sought as identified pursuant to 37 CFR 1.740(a)(6) should be the expiration date according to the law (35 U.S.C. 154) at the time of filing of the application for patent term extension, and should

include any patent term adjustment under 35 U.S.C. 154(b).

Pursuant to 37 CFR 1.740(a)(9), the application for patent term extension need only explain how one product claim of the patent claims the approved product, if there is a claim to the product. In addition, the application need only explain how one method of use claim of the patent claims the method of use of the approved product, if there is a claim to the method of use of the product. Lastly, the application need only explain how one claim of the patent claims the method of manufacturing the approved product, if there is a claim to the method of manufacturing the approved product. At most, a showing explaining three claims is required. However, each claim that claims the approved product, the method of use of the approved product, or the method of manufacturing the approved product must be listed. See 35 U.S.C. 156(d)(1)(B).

The showing should clearly explain how each listed claim reads on the approved product. For example, where a generic chemical structure is used in the claim to define the claimed invention, a listing of variables and substituents which correspond to the approved product is appropriate. Where a claim uses the "means for" language permitted by 35 U.S.C. 112, paragraph 6, reference to the column and line number of the patent text and any drawing reference numbers, as well as a description of any relevant equivalents, is also appropriate.

Pursuant to 37 CFR 1.740(a)(10), the patent term extension applicant must provide a statement to enable the Secretary of Health and Human Services or the Secretary of Agriculture, as appropriate, to determine the applicable regulatory period. In cases where there is no regulatory event to reflect the commencement of the testing or approval phase of the regulatory review period, applicants should include in the application the dates that they claim initiate either the approval or the testing phases and an explanation of their reasonable bases for why they conclude that these dates are the relevant dates. For instance, when the clinical trials are conducted outside of the United States, the testing phase for a medical device begins on the date the clinical investigation involving the device began. An applicant should include an explanation as to why the date claimed is the date on which such clinical investigations had commenced. If the applicant has any means of substantiating that date, that information should be included in the application.

37 CFR 1.740(a)(11) requires a brief description of the activities of the marketing applicant before the regulatory agency. This description should include an identification of significant communications of substance with the regulatory agency and the dates related to such communications. For example, these activities would include the dates of the submissions of new data to the FDA, communications between FDA and the applicant with respect to the appropriate protocols for testing the product, and communications between FDA and the applicant that are attempts to define the particular requirements for premarketing approval for this particular product. The applicant is not required to establish the existence of due diligence during the regulatory review period in order to have a complete application.

As stated above, the marketing applicant must have been an agent of the patent owner, if not the same entity as the patent owner. Accordingly, the Office will not assist the patent owner in obtaining information required in an application for patent term extension from the marketing applicant. It is sufficient that the description of the activities briefly identify those significant activities undertaken by the marketing applicant directed toward regulatory approval, and a submission of insignificant details or identification of non-substantive communications is not required.

37 CFR 1.740(a)(12) requires that the extension applicant state the length of extension claimed and show how the length of extension was calculated, including whether the 14-year limit of 35 U.S.C. 156(c)(3) or the two or three limit of 35 U.S.C. 156(g)(6)(C) applies.

37 CFR 1.740(a)(15) requires the patent term extension applicant to provide a correspondence address. A fax number should also be provided. Normally only communications regarding the application for patent term extension will be sent to the address specified in the patent term extension application. If the address is changed after filing the application for patent term extension, the change of address should be sent to *>Mail Stop< Patent Extension, since changing the address for the patent file will not cause the address for the patent term extension application to also be changed.

In order to change the address of all correspondence, including maintenance fee reminders, a change of address should also be filed. A change of address must be signed by the patent applicant, the assignee of the entire interest, or an attorney or agent of record. 37 CFR 1.33(a). Accordingly, if the patent term extension application is signed by the marketing applicant, as an agent of the patent owner, a power of attorney from the patent owner to any attorney for the marketing applicant would be necessary for the attorney for the marketing applicant to be able to sign a change of address for the patent file.

Pursuant to 37 CFR 1.740(b), two additional copies of the application for patent term extension must be filed with the application. In addition, applicants are requested to file an additional two copies of the application, for a total of five copies. The original copy is placed into the patent application file after the Notice of Final Determination is mailed. Two copies of the application are forwarded to the regulatory agency, one copy is made available for public inspection in the Office of Patent Legal Administration, and the fifth copy is used by the Legal Advisor.

2754 Filing Date [R-2]

37 CFR 1.741. Complete application given a filing date; petition procedure.

(a) The filing date of an application for extension of a patent term is the date on which a complete application is received in the Office or filed pursuant to the procedures set forth in §1.8 or § 1.10. A complete application must include:

(1) An identification of the approved product;

(2) An identification of each Federal statute under which regulatory review occurred;

(3) An identification of the patent for which an extension is being sought;

(4) An identification of each claim of the patent which claims the approved product or a method of using or manufacturing the approved product;

**>

(5) Sufficient information to enable the Director to determine under subsections (a) and (b) of 35 U.S.C. 156 the eligibility of a patent for extension, and the rights that will be derived from the extension, and information to enable the Director and the Secretary of Health and Human Services or the Secretary of Agriculture to determine the length of the regulatory review period; and<

(6) A brief description of the activities undertaken by the marketing applicant during the applicable regulatory review period with respect to the approved product and the significant dates applicable to such activities.

(b) If an application for extension of patent term is incomplete under this section, the Office will so notify the applicant. If applicant requests review of a notice that an application is incomplete, or review of the filing date accorded an application under this section, applicant must file a petition pursuant to this paragraph accompanied by the fee set forth in § 1.17(h) within two months of the mail date of the notice that the application is incomplete, or the notice according the filing date complained of. Unless the notice indicates otherwise, this time period may be extended under the provisions of § 1.136.

FILING DATE ACCORDED

An application for patent term extension under 35 U.S.C. 156 may be filed by mail addressed to **>Mail Stop Patent Ext., Commissioner for Patents, P.O. Box 1450, Alexandria, Virginia 22313-1450< or may be hand carried to the Office of Patent Legal Administration. Applicants are encouraged to use the post card receipt practice described in MPEP § 502.

As set forth in 37 CFR 1.741(a), the filing date of an application for patent term extension is the date on which a complete application is received in the USPTO or filed pursuant to the certificate of mailing provisions of 37 CFR 1.8 (see MPEP § 512 for suggested formats for a certificate of mailing) or the Express Mail provisions of 37 CFR 1.10. Patent term extension applications should not be filed by facsimile, however correspondence setting forth a change of address and other papers relating to a patent term extension may be sent by facsimile to the Office of Patent Legal Administration.

COMPLETE APPLICATION

The term "complete application" is defined in 37 CFR 1.741(a) and is an application meeting the requirements set forth in 35 U.S.C. 156(d)(1). For the establishment of a filing date, the distinction between the requirements of 37 CFR 1.740 and the requirements of 37 CFR 1.741 are important. While the requirements of 37 CFR 1.740 may be satisfied outside the 60 day filing period, the requirements of 37 CFR 1.741 are mandated by 35 U.S.C. 156 and must be satisfied within the 60 day filing period for the establishment of the filing date. The Office will consider each of these statutory requirements to be satisfied in an application which provides sufficient information, directed to each requirement, to act on the application, even though further information may be desired by the USPTO or the regulatory agency before a final determination of eligibility and length of patent term extension is made.

INFORMAL APPLICATION

37 CFR 1.740. Formal requirements for application for extension of patent term; correction of informalities.

*****

(c) If an application for extension of patent term is informal under this section, the Office will so notify the applicant. The applicant has two months from the mail date of the notice, or such time as is set in the notice, within which to correct the informality. Unless the notice indicates otherwise, this time period may be extended under the provisions of § 1.136.

*****

If the application does not meet all the formal requirements of 37 CFR 1.740(a) (see MPEP § 2753), the applicant will be notified of the informalities and may seek to have that holding reviewed under 37 CFR 1.740(c) or to correct the informality. The time periods set forth therein are subject to the provisions of 37 CFR 1.136, unless otherwise stated in the notice.

Note that if the application satisfies the requirements of 37 CFR 1.741, the application filing date will have been established even if the application is held to be informal under 37 CFR 1.740.

2754.01 Deadline for Filing an Application Under 35 U.S.C. 156(d)(1)

An application for patent term extension under 35 U.S.C. 156(d)(1) may only be filed within the sixty-day period beginning on the date the product received permission under the provision of law under which the applicable regulatory review period occurred for commercial marketing or use. The statutory time period is not extendable and cannot be waived or excused. See U.S. Patent No. 4,486,425 (application for patent term extension filed after the end of the 60-day period and was therefore denied). The sixty-day period begins on the regulatory agency approval date which marks the end of the regulatory review period. The statute takes into account only the regulatory review carried out by the Food and Drug Administration or the Department of Agriculture and no other government obstacles to marketing or use. See *Unimed, Inc. v. Quigg*, 888 F2d 826, 828; 12 USPQ2d 1644, 1646 (Fed. Cir. 1989). For drug products the approval date is the date of a letter by the Food and Drug Administration indicating that the application has been approved, even if the letter requires further action before the drug can be marketed. *Mead Johnson Pharmaceutical Group v. Bowen*, 838 F2d 1332, 1336; 6 USPQ2d 1565, 1568 (D.C. Cir. 1988). For food or color additives, the relevant date is the effective date of the regulation or order, which is set forth in the regulation or order, and which is generally the date that the regulation or order is published, e.g., in the Federal Register. See 21 U.S.C. 348(e). This date will generally be later than the date the approval is communicated to the marketing applicant.

2754.02 Filing Window for an Application Under 35 U.S.C. 156(d)(5)

A first application for interim extension under 35 U.S.C. 156(d)(5) (to extend the patent term before product approval) must be filed within the period beginning six months and ending fifteen days before the patent is due to expire. Each subsequent application for interim extension must be filed during the period beginning sixty days before and ending thirty days before the expiration of the preceding interim extension. 35 U.S.C. 156(d)(5)(C). An interim extension granted under 35 U.S.C. 156(d)(5) terminates sixty days after permission for commercial marketing or use of the product is granted, except, if within the sixty-day period any additional information needed for an application for patent term extension under 35 U.S.C. 156(d)(1) is submitted, the patent may be further extended. 35 U.S.C. 156(d)(5)(E). The additional information required to be submitted includes the fee for an application for patent term extension under 35 U.S.C. 156(d)(1) and identification of the date the product received permission for commercial marketing or use and a statement that the application is being submitted within sixty days of such date and identification of the last date that the application could be submitted. See 37 CFR 1.740(a)(3) and (5). However, if the product is not approved within the period of interim extension, a new request for interim extension must be filed and another interim extension granted to keep the patent in force. An applicant is generally limited to four one-year interim extensions.

See MPEP § 2755.02 for additional information pertaining to the interim extension of patent term under 35 U.S.C. 156(d)(5).

2754.03 Filing of a Request for an Extension Under 35 U.S.C. 156(e)(2)

A request for an interim extension under 35 U.S.C. 156(e)(2) (to extend the patent term during the processing of the patent term extension application) should be made at least three months before the patent is due to expire. See MPEP § 2755.01 for information pertaining to the interim extension of patent term under 35 U.S.C. 156(e)(2).

2755 Eligibility Determination [R-2]

**>

37 CFR 1.750. Determination of eligibility for extension of patent term

A determination as to whether a patent is eligible for extension may be made by the Director solely on the basis of the representations contained in the application for extension filed in compliance with § 1.740 or § 1.790. This determination may be delegated to appropriate Patent and Trademark Office officials and may be made at any time before the certificate of extension is issued. The Director or other appropriate officials may require from applicant further information or make such independent inquiries as desired before a final determination is made on whether a patent is eligible for extension. In an application for extension filed in compliance with § 1.740, a notice will be mailed to applicant containing the determination as to the eligibility of the patent for extension and the period of time of the extension, if any. This notice shall constitute the final determination as to the eligibility and any period of extension of the patent. A single request for reconsideration of a final determination may be made if filed by the applicant within such time as may be set in the notice of final determination or, if no time is set, within one month from the date of the final determination. The time periods set forth herein are subject to the provisions of § 1.136.<

The determination as to whether a patent is eligible for an extension will normally be made solely from the representations contained in the application for patent term extension. However, further information may be required or inquiry made of applicant before a final determination is made on whether a patent is eligible for extension. In circumstances where further information is required by the Office, the applicant will be given a time period within which to respond. The failure to provide a response within the time period provided may result in a final determination adverse to the granting of an extension of patent term unless the response period is extended. An extension of time to respond may be requested under the provisions of 37 CFR 1.136. Under appropriate circumstances, e.g., if time is of the essence for a particular reason, a request for information may contain a statement that the provisions of 37 CFR 1.136(a) are not available. The intentional failure to provide the information requested may result in an adverse final determination.

A final determination may be made at any time after an application is filed. A single request for reconsideration of a final determination may be filed within one month or within such other time period set in the final determination. A notice will be mailed to applicant containing the determination as to eligibility of the patent for extension and the period of time of the extension of the term, if any. This notice shall constitute the final determination as to eligibility and any period of extension of the patent term. If no request for reconsideration is filed within the time period set in the notice of final determination, the certificate of patent term extension will be issued in due course. See MPEP § 2758.

2755.01 Interim Extension of Patent Term During the Processing of the Application [R-2]

35 U.S.C. 156. Extension of patent term.

*****

(e)(2) If the term of a patent for which an application has been submitted under subsection (d)(1) would expire before a certificate of extension is issued or denied under paragraph (1) respecting the application, the Director shall extend, until such determination is made, the term of the patent for periods of up to one year if he determines that the patent is eligible for extension.

*****

**>

37 CFR 1.760. Interim extension of patent term under 35 U.S.C. 156(e)(2).

An applicant who has filed a formal application for extension in compliance with § 1.740 may request one or more interim extensions for periods of up to one year each pending a final determination on the application pursuant to § 1.750. Any such request should be filed at least three months prior to the expiration date of the patent. The Director may issue interim extensions, without a request by the applicant, for periods of up to one year each until a final determination is made. The patent owner or agent will be notified when an interim extension is granted and notice of the extension will be published in the *Official Gazette of the United States Patent and Trademark Office*. The notice will be recorded in the official file of the patent and will be considered as part of the original patent. In no event will the interim extensions

granted under this section be longer than the maximum period for extension to which the applicant would be eligible.<

If the original term of the patent for which extension is sought will expire before a final decision to issue a certificate of extension can be made, and a determination is made that the patent is eligible for extension, 35 U.S.C. 156 provides that the *>Director< may issue an interim extension of the patent term for up to one year pending a final decision on the application for extension. Should additional time be necessary, additional interim extensions of up to one year may be granted by the *>Director<. The length of any interim extension is discretionary with the *>Director< so long as it is for one year or less. Its length should be set to provide time for completion of any outstanding requirements. See *In re Reckitt & Colman Products Ltd.*, 230 USPQ 369, 372 (Comm'r Pat. & Tm. 1986). The *>Director< may issue an interim extension under 35 U.S.C. 156(e)(2) with or without a request from the applicant.

Where a determination is made that the patent is not eligible for patent term extension, an interim extension of the patent term is not warranted under 35 U.S.C. 156(e)(2). See *In re Alcon Laboratories Inc.*, 13 USPQ2d 1115, 1123 (Comm'r. Pat.& Tm. 1989).

Where an interim extension has been granted and it is subsequently determined that the patent is not eligible for patent term extension, the interim extension may be vacated *ab initio* as ineligible under 35 U.S.C. 156(e)(2). See *In re Reckitt*, 230 USPQ at 370.

While 37 CFR 1.760 provides that a request for an interim extension by the applicant "should" be filed three months prior to the expiration of the patent, this time frame is not mandatory. Any request filed within a shorter period of time will be considered, upon a proper showing, where it is not possible to make an earlier request. However, for an interim extension to be granted, the application for extension, in compliance with 37 CFR 1.741, must have been filed prior to the expiration date of the patent. In no event will an interim extension be granted for a period of patent term extension longer than the period of extension to which the patent would be eligible.

A notice of each interim extension granted will be issued to the applicant for patent term extension. The notice will be recorded in the official file of the patent and will be considered as part of the original patent. Notification of the issuance of the interim extension will be published in the Official Gazette of the Patent and Trademark Office.

2755.02 Interim Extension of Patent Term Before Product Approval

35 U.S.C. 156. Extension of patent term.

*****

(d)(5)(A) If the owner of record of the patent or its agent reasonably expects that the applicable regulatory review period described in paragraphs (1)(B)(ii), (2)(B)(ii), (3)(B)(ii), (4)(B)(ii), or (5)(B)(ii) of subsection (g) that began for a product that is the subject of such patent may extend beyond the expiration of the patent term in effect, the owner or its agent may submit an application to the Director for an interim extension during the period beginning 6 months, and ending 15 days before such term is due to expire. The application shall contain—

(i) the identity of the product subject to regulating review and the Federal statute under which such review is occurring;

(ii) the identity of the patent for which interim extension is being sought and the identity of each claim of such patent which claims the product under regulatory review or a method of using or manufacturing the product;

(iii) information to enable the Director to determine under subsection (a)(1), (2), and (3) the eligibility of a patent for extension;

(iv) a brief description of the activities undertaken by the applicant during the applicable regulatory review period to date with respect to the product under review and the significant dates applicable to such activities; and

(v) such patent or other information as the Director may require.

(5)(B)If the Director determines that, except for permission to market or use the product commercially, the patent would be eligible for an extension of the patent term under this section, the Director shall publish in the Federal Register a notice of such determination, including the identity of the product under regulatory review, and shall issue to the applicant a certificate of interim extension for a period of not more than 1 year.

(C) The owner of record of a patent, or its agent, for which an interim extension has been granted under subparagraph (B), may apply for not more than 4 subsequent interim extensions under this paragraph, except that, in the case of a patent subject to subsection (g)(6)(C), the owner of record of the patent, or its agent, may apply for only 1 subsequent interim extension under this paragraph. Each such subsequent application shall be made during the period beginning 60 days before, and ending 30 days before, the expiration of the preceding interim extension.

(D) Each certificate of interim extension under this paragraph shall be recorded in the official file of the patent and shall be considered part of the original patent.

(E) Any interim extension granted under this paragraph shall terminate at the end of the 60-day period beginning on the day on which the product involved receives permission for commercial marketing or use, except that, if within that 60-day period, the applicant notifies the Director of such permission and submits any additional information under paragraph (1) of this subsection not previously contained in the application for interim extension, the patent shall be further extended, in accordance with the provisions of this section—

(i) for not to exceed 5 years from the date of expiration of the original patent term; or

(ii) if the patent is subject to subsection (g)(6)(C), from the date on which the product involved receives approval for commercial marketing or use.

(F) The rights derived from any patent the term of which is extended under this paragraph shall, during the period of interim extension—

(i) in the case of a patent which claims a product, be limited to any use then under regulatory review;

(ii) in the case of a patent which claims a method of using a product, be limited to any use claimed by the patent then under regulatory review; and

(iii) in the case of a patent which claims a method of manufacturing a product, be limited to the method of manufacturing as used to make the product then under regulatory review.

*****

37 CFR 1.790. Interim extension of patent term under 35 U.S.C. 156(d)(5).

(a) An owner of record of a patent or its agent who reasonably expects that the applicable regulatory review period described in paragraph (1)(B)(ii), (2)(B)(ii), (3)(B)(ii), (4)(B)(ii), or (5)(B)(ii) of subsection (g) that began for a product that is the subject of such patent may extend beyond the expiration of the patent term in effect may submit one or more applications for interim extensions for periods of up to one year each. The initial application for interim extension must be filed during the period beginning 6 months and ending 15 days before the patent term is due to expire. Each subsequent application for interim extension must be filed during the period beginning 60 days before and ending 30 days before the expiration of the preceding interim extension. In no event will the interim extensions granted under this section be longer than the maximum period of extension to which the applicant would be entitled under 35 U.S.C. 156(c).

(b) A complete application for interim extension under this section shall include all of the information required for a formal application under § 1.740 and a complete application under § 1.741. Sections (a)(1), (a)(2), (a)(4), and (a)(6) - (a)(17) of § 1.740 and § 1.741 shall be read in the context of a product currently undergoing regulatory review. Sections (a)(3) and (a)(5) of § 1.740 are not applicable to an application for interim extension under this section.

(c) The content of each subsequent interim extension application may be limited to a request for a subsequent interim extension along with a statement that the regulatory review period has not been completed along with any materials or information required under §§ 1.740 and 1.741 that are not present in the preceding interim extension application.

37 CFR 1.791. Termination of interim extension granted prior to regulatory approval of a product for commercial marketing or use.

Any interim extension granted under 35 U.S.C. 156(d)(5) terminates at the end of the 60-day period beginning on the date on which the product involved receives permission for commercial marketing or use. If within that 60-day period the patent owner or its agent files an application for extension under §§ 1.740 and 1.741 including any additional information required under 35 U.S.C. 156(d)(1) not contained in the application for interim extension, the patent shall be further extended in accordance with the provisions of 35 U.S.C. 156.

If a patent that claims a product which is undergoing the approval phase of regulatory review as defined by 35 U.S.C. 156(g)(1)(B)(ii), (2)(B)(ii), (3)(B)(ii), (4)(B)(ii), and (5)(B)(ii) is expected to expire before approval is granted, interim patent term extension is available under 35 U.S.C. 156(d)(5). The application for patent term extension that must be submitted is generally the same as would be filed had the product been approved, except that the approval date is not required to be set forth. Once the product is approved, the application must be converted to an application for patent term extension under 35 U.S.C. 156(d)(1) to obtain patent term extension under that subsection.

Processing of an application for interim patent term extension under 35 U.S.C. 156(d)(5) is performed in the Office of Patent Legal Administration and is similar to other applications for patent term extension, except that the Office is not required to seek the advice of the relevant regulatory agency. The relevant agency, however, is normally consulted before an interim extension is granted or before the application is denied. The fee for an application for patent term extension under 35 U.S.C. 156(d)(5) is set forth in 37 CFR 1.20(j)(2), and the fee for a subsequent application is set forth in 37 CFR 1.20(j)(3). Copies of an application for interim extension are maintained in the same manner as applications for patent term extension. As required by 35 U.S.C. 156(d)(5)(B), a determination that a patent is eligible for extension under 35 U.S.C. 156, but for regulatory approval, is published in the Federal Register. A sample order granting a second interim extension follows:

UNITED STATES PATENT AND TRADEMARK OFFICE
BEFORE THE COMMISSIONER OF PATENTS AND TRADEMARKS

In re___

Request for Patent Term Extension U.S. Patent No.___ ORDER GRANTING INTERIM EXTENSION

On __, patent owner __, filed an application under 35 U.S.C. 156(d)(5) for interim extension of the term of U.S. Patent No. __. The patent claims the active ingredient __ in the human drug product "___." The application indicates that the product is currently undergoing a regulatory review before the Food and Drug Administration for permission to market or use the product commercially. The original term of the patent expired on ___ On ___, the patent was granted an first interim extension under 35 U.S.C. 156(d)(5) for a period of one year.

Review of the application indicates that except for receipt of permission to market or use the product commercially, the subject patent would be eligible for an extension of the patent term under 35 U.S.C. 156. Since it is apparent that the regulatory review period may extend beyond the date of expiration of the patent, as extended by the first interim extension, a second interim extension of the patent term under 35 U.S.C. 156(d)(5) is appropriate.

An interim extension under 35 U.S.C. 156(d)(5) of the term of U.S. Patent No. __ is granted for a period of one year from the extended expiration date of the patent.

As seen from the example given, a series of one-year interim extensions may be granted if requested in a timely manner (in the window of time between thirty and sixty days before the extended expiration date).

An interim extension granted under 35 U.S.C. 156(d)(5) terminates sixty days after permission for commercial marketing or use of the product is granted, except, if within the sixty day period any additional information needed for an application for patent term extension under 35 U.S.C. 156(d)(1) is submitted, the patent may be further extended. 35 U.S.C. 156(d)(5)(E).

2756 Correspondence Between the USPTO and the Regulatory Agency [R-2]

It is the *>Director's< responsibility to decide whether an applicant has satisfied the requirements of the statute and whether the patent qualifies for patent term extension. The regulatory agency possesses expertise and records regarding some of the statutory requirements and has certain direct responsibilities under 35 U.S.C. 156 for determining the length of the regulatory review period. Consequently, to facilitate eligibility decisions and permit the regulatory agency and the Office to carry out their responsibilities under 35 U.S.C. 156, both the Food and Drug Administration and the Department of Agriculture have entered into an "agreement" of cooperation with the Office. *Memorandum of Understanding Between the Patent and Trademark Office and the Food and Drug Administration*, 52 Fed. Reg. 17830 (May 12, 1987); *Memorandum of Understanding Between the Patent and Trademark Office and the Animal and Plant Health Inspection Service*, 54 Fed. Reg. 26399 (June 23, 1989); 1104 OG 18 (July 11, 1989). The agreements establish the procedures whereby the regulatory agency assists the Office in determining a patent's eligibility for patent term restoration under 35 U.S.C. 156. It also establishes procedures for exchanging information between the regulatory agency and the Office regarding regulatory review period determinations, due diligence petitions and informal regulatory agency hearings under the law. The patent term extension applicant receives a copy of all correspondence between the Office and the regulatory agency.

The Animal and Health Inspection Service of the Department of Agriculture is responsible for assisting the Office in determining the eligibility of patent claiming a veterinary biological product that has been subject to the Virus-Serum-Toxin Act (21 U.S.C. 151-59) and for determining the regulatory review period of the veterinary biological product. The Secretary of Health and Human Services of the Food and Drug Administration is responsible for assisting the Office in determining the eligibility of patents claiming any other product for which regulatory review gives rise to eligibility for patent term extension. 21 CFR 60.10.

INFORMATION REGARDING ELIGIBILITY FOR EXTENSION

If the Office has no clear reason to deny eligibility for patent term extension (even if there are questions concerning eligibility), or if the applicant has been notified of any informalities and it is anticipated that the informalities will be corrected or explained, a first letter is sent to the regulatory agency requesting infor-

mation regarding eligibility. The letter is accompanied by a copy of the patent term extension application. This letter does **not** request the determination of the applicable regulatory review period.

The regulatory agency reply is usually in the form of a written response:

(A) verifying whether the product has undergone a regulatory review period within the meaning of 35 U.S.C. 156(g) prior to commercial marketing or use;

(B) stating whether the marketing permission was for the first permitted commercial marketing or use of that product, or, in the case of recombinant DNA technology, whether such commercial marketing or use was the first permitted under the process claimed in the patent;

(C) informing the Office whether the patent term extension application was submitted within sixty days after the product was approved for marketing or use; and

(D) providing the Office with any other information relevant to the Office determination of whether a patent related to a product is eligible for patent term extension.

While the Office has primary responsibility for the eligibility determination, the regulatory agency often possesses information which is not readily available to the Office. The assistance on the part of the regulatory agency enables both the Office and the agency to process applications efficiently and to conserve resources.

PRELIMINARY ELIGIBILITY DECISION

Upon receipt of a reply from the regulatory agency to the first letter from the Office requesting assistance on determining eligibility, a preliminary eligibility decision (not the final decision) is made as to whether the patent is eligible for an extension of its term. As noted above, the reply from the regulatory agency will usually inform the Office as to whether the permission for commercial marketing and use of the product on which the application for patent term extension is based is the first such approval for that product. Furthermore, the regulatory agency usually provides information regarding the date of product approval to permit a determination as to whether the application was filed within the sixty-day statutory period. The information provided by the regulatory agency is then compared with the related information from the application. If no major discrepancies are found and the patent is determined to be eligible for patent term extension, a second letter requesting a determination of the length of the regulatory review period of the product is mailed to the regulatory agency not later than sixty (60) days after the Office receipt date of the reply from the regulatory agency. In the interest of efficiency, if the patent is determined to be ineligible for patent term extension, the Office will dismiss the application rather than request a determination of the regulatory review period. *In re Allen & Hansbury, Ltd.*, 227 USPQ 955, 960 n. 9 (Comm'r Pat. & Tm. 1985). A certified copy of the application for patent term extension is sent to the regulatory agency along with the second letter. The second letter states that, subject to final review, the patent is considered eligible for patent term extension and requests a determination of the applicable regulatory review period.

2757 Regulatory Agency Determination of the Length of the Regulatory Review Period

Under 35 U.S.C. 156, the regulatory agency is responsible for the determination of the length of the regulatory review period for the approved product on which the application for patent term extension is based. The determination by the regulatory agency is made based on the application as well as the official regulatory agency records for the approved product. See, e.g., 21 CFR Ch. 1, Subpart C. The determination of the length of the regulatory review period is solely the responsibility of the regulatory agency. *Aktiebolaget Astra v. Lehman*, 71 F.3d 1578, 1580-81, 37 USPQ2d 1212, 1214-15 (Fed. Cir. 1995); U.S. Patent No. 4,215,113.

Once the determination has been made, the regulatory agency publishes the information in the Federal Register and forwards a letter to the Office with the same information. Included in both the Federal Register Notice and the letter to the Office are the total length of the regulatory review period and the relevant dates on which the determination is based. Both the letter to the Office and the Federal Register Notice separate the total regulatory period into the initial or testing phase and the final approval phase. This provides the Office with the information necessary to

determine the actual length of extension for which the patent may be eligible. The Federal Register Notice also sets a date, 180 days after publication of the notice, as a deadline for filing written comments concerning any of the information set forth in the notice or a petition for a determination regarding whether the marketing applicant has acted with due diligence during the regulatory review period. The letter to the Office makes clear that the determination does not take into account the issue date of the patent nor does it exclude one-half of the testing phase.

The regulatory review period determination is not final until due diligence petitions and informal hearings, if any, have been resolved. A certificate for extension of the term of a patent may not issue from the Office until the regulatory review period determination is final unless an interim extension appears warranted under 35 U.S.C. 156(d)(5) and (e)(2).

2757.01 Due Diligence Determination

If a due diligence petition is filed during the 180-day period following publication of the regulatory agency determination of the regulatory review period, the regulatory agency (e.g., FDA) makes the determination under 35 U.S.C. 156(d)(2)(B) whether the applicant for patent term extension acted with due diligence during the regulatory review proceedings. The term "due diligence" is defined in 35 U.S.C. 156(d)(3) as "that degree of attention, continuous directed effort, and timeliness as may reasonably be expected from, and are ordinarily exercised by, a person during a regulatory review period." After affirming or revising the determination of the regulatory review period, the regulatory agency notifies the Office and publishes the results in the Federal Register. If no comment or petition is filed in the time period provided, the regulatory agency notifies the Office that the period for filing a due diligence petition pursuant to the notice has expired and that the regulatory agency therefore considers its determination of the regulatory review period for the product to be final. Following notification from the regulatory agency, the Office proceeds with the final eligibility determination. See 21 CFR Ch. 1, Subparts D and E.

2758 Notice of Final Determination - Calculation of Patent Term Extension [R-2]

35 U.S.C. 156. Extension of patent term.

*****

(c) The term of a patent eligible for extension under subsection (a) shall be extended by the time equal to the regulatory review period for the approved product which period occurs after the date the patent is issued, except that—

(1) each period of the regulatory review period shall be reduced by any period determined under subsection (d)(2)(B) during which the applicant for the patent extension did not act with due diligence during such period of the regulatory review period;

(2) after any reduction required by paragraph (1), the period of extension shall include only one-half of the time remaining in the periods described in paragraphs (1)(B)(i), (2)(B)(i), (3)(B)(i), (4)(B)(i), and (5)(B)(i) of subsection (g);

(3) if the period remaining in the term of a patent after the date of the approval of the approved product under the provision of law under which such regulatory review occurred when added to the regulatory review period as revised under paragraphs (1) and (2) exceeds fourteen years, the period of extension shall be reduced so that the total of both such periods does not exceed fourteen years, and

(4) in no event shall more than one patent be extended under subsection (e)(i) for the same regulatory review period for any product.

*****

(6) A period determined under any of the preceding paragraphs is subject to the following limitations:

(A) If the patent involved was issued after the date of the enactment of this section, the period of extension determined on the basis of the regulatory review period determined under any such paragraph may not exceed five years.

(B) If the patent involved was issued before the date of the enactment of this section and —

(i) no request for an exemption described in paragraph (1)(B) or (4)(B) was submitted and no request for the authority described in paragraph (5)(B) was submitted,

(ii) no major health or environment effects test described in paragraph (2)(B) or (4)(B) was initiated and no petition for a regulation or application for registration described in such paragraph was submitted, or

**>

(iii) no clinical investigation described in paragraph (3) was begun or product development protocol described in such paragraph was submitted, before such date for the approved product the period of extension determined on the basis of the regulatory review period determined under any such paragraph may not exceed five years.<

(C) If the patent involved was issued before the date of the enactment of this section and if an action described in subparagraph (B) was taken before the date of enactment of this section

with respect to the approved product and the commercial marketing or use of the product has not been approved before such date, the period of extension determined on the basis of the regulatory review period determined under such paragraph may not exceed two years or in the case of an approved product which is a new animal drug or veterinary biological product (as those terms are used in the Federal Food, Drug, and Cosmetic Act or the Virus-Serum-Toxin Act), three years.

*****

After reviewing the information provided by the regulatory agency, if the Office determines the patent to be eligible for extension, the calculation is made of the length of extension for which the patent is eligible under the appropriate statutory provisions (35 U.S.C. 156(c); 37 CFR 1.750). The length of extension is subject to the limitations of 35 U.S.C. 156(c)(3) and 35 U.S.C. 156(g)(6). A Notice of Final Determination is mailed to applicant which states the length of extension for which the application has been determined to be eligible and the calculations used to determine the length of extension. Recently mailed Notices of Final Determination are posted in the Freedom of Information (FOIA) section of the USPTO web site (www.uspto.gov) with other Decisions of the *>Director<. The notice provides a period, usually one month, in which the applicant can request reconsideration of any aspect of the Office determination as to eligibility or the length of extension for which the application has been found eligible.

If the application has been determined to be ineligible for patent term extension, an appropriate Notice of Final Determination is mailed to applicant which denies the application and sets forth the basis for the denial. The applicant is given a period, usually one month, in which to seek reconsideration of the determination.

If the patent is found to be eligible for extension, the Notice of Final Determination may include text similar to the following:

> A determination has been made that U.S. Patent No. ___, which claims the human drug ___, is eligible for patent term extension under 35 U.S.C. 156. The period of extension has been determined to be ___.
>
> A single request for reconsideration of this final determination as to the length of extension of the term of the patent may be made if filed within one month of the date of this notice. Extensions of time under 37 CFR 1.136(a) are not applicable to this time period. In the absence of such request for reconsideration, the *>Director< will issue a certificate of extension, under seal, for a period of ___ days.
>
> The period of extension has been calculated using the FDA determination of the length of the regulatory review period published in the Federal Register of ___. Under 35 U.S.C. 156(c).
>
> Period of Extension = 1/2 (Testing Phase) + Approval Phase
>
> = 1/2 (___ -___) + ___
>
> = ___ days
>
> Since the regulatory review period began __, before the patent issued ___, only that portion of the regulatory review period occurring after the date the patent issued has been considered in the above determination of the length of the extension period 35 U.S.C. 156(c). (From __ to ___) is___ days; this period is subtracted for the number of days occurring in the testing phase according to the FDA determination of the length of the regulatory review period.) No determination of a lack of due diligence under 35 U.S.C. 156(c)(1) was made.
>
> The 14 year exception of 35 U.S.C. 156(c)(3) operates to limit the term of the extension in the present situation because it provides that the period remaining in the term of the patent measured from the date of approval of the approved product (___) when added to the period of extension calculated above (___ days) cannot exceed fourteen years. The period of extension is thus limited to ___, by operation of 35 U.S.C. 156(c)(3). Since the patent term (35 U.S.C. 154) would expire on ___, the period of extension is the number of days to extend the term of the patent from its expiration date to and including ___, or ___ days.
>
> The limitations of 35 U.S.C. 156(g)(6) do not operate to further reduce the period of extension determined above.

See MPEP § 2759 for further information pertaining to the issuance of a certificate of extension.

A patent term extension generally extends the patent from its "original expiration date," as defined by 35 U.S.C. 154 to include extension under 35 U.S.C. 154(b). Patents "in force on June 8, 1995 only because of a Hatch-Waxman extension are not entitled to re-apply a restoration extension to a 20-year from filing term." *Merck & Co. v. Kessler*, 80 F.3d 1543, 1553, 38 USPQ2d 1347, 1354 (Fed. Cir. 1996). However, if the patent received an interim extension under 35 U.S.C. 156(d)(5) and the patent is eligible for either a two- or a three-year extension, the extension would run from the approval date of the product, not the original expiration date of the patent. See 35 U.S.C. 156(d)(5)(E)(ii).

No certificate or extension will be issued if the term of a patent cannot be extended, even though the patent is otherwise determined to be eligible for extension. In such situations the final determination would issue indicating that no certificate will issue.

CALCULATION OF PATENT TERM EXTENSION

The procedure for calculating the length of the patent term extension is set forth for human drugs, antibiotic drugs, and human biological products in 37 FR 1.775; for food or color additives in 37 CFR 1.776; for medical devices in 37 CFR 1.777; for animal drug products in 37 CFR 1.778; and for veterinary biological products in 37 CFR 1.779. The length of patent term extension is the length of the regulatory review period as determined by the Secretary of Health and Human Services or the Secretary of Agriculture, but reduced, where appropriate, by the time periods provided in 37 CFR 1.775 - 1.779. The Office will rely on the Secretary's determination of the length of the regulatory review period when calculating the length of the extension period under 37 CFR 1.775 - 1.779.

Any part of the regulatory review period which occurs before the patent was granted will not be counted toward patent term extension. Any period in which the marketing applicant failed to exercise due diligence, thereby unnecessarily adding to the length of the regulatory review period after the patent issued, will not be considered in determining the length of the extension period. In making the calculation of the extension period, half days will be ignored and thus will not be subtracted from the regulatory review period.

For products other than animal drug or veterinary biological products, the calculated extension period cannot exceed any of the following statutory maximum periods of extension:

(A) If the period remaining in the term of the patent after the date of approval of the approved product when added to the calculated regulatory review period exceeds fourteen years, the period of extension shall be reduced so that the total of both such periods does not exceed fourteen years;

(B) If the patent involved was issued after September 24, 1984, (the date of enactment of the statute), the calculated period of extension may not exceed five years;

(C) If the patent involved was issued before September 24, 1984, (the date of enactment of the statute), and the regulatory review period proceeding started after this date, the calculated period of extension may not exceed five years; and

(D) If the patent involved was issued before September 24, 1984, (the date of enactment of the statute), and the regulatory review period proceeding started before this date, and the commercial marketing or use of the product has been approved after such date, the calculated period of extension may not exceed two years.

For animal drug or veterinary biological products, the calculated extension period cannot exceed any of the following statutory maximum periods of extension:

(A) If the period remaining in the term of the patent after the date of approval of the approved product when added to the calculated regulatory review period exceeds fourteen years, the period of extension shall be reduced so that the total of both such periods does not exceed fourteen years;

(B) If the patent involved was issued after November 16, 1988, the calculated period of extension may not exceed five years;

(C) If the patent involved was issued before November 16, 1988, and the regulatory review period proceeding started after this date, the calculated period of extension may not exceed five years; and

(D) If the patent involved was issued before November 16, 1988, and the regulatory review period proceeding started before this date, and the commercial marketing or use of the product has been approved after such date, the calculated period of extension may not exceed three years.

The patent term extension of a patent that issued before September 24, 1984, where the regulatory review period began and ended before September 24, 1984, would only be a function of the regulatory review period and the fourteen-year limit, and may be extended for more than five years. *Hoechst Aktiengesellschaft v. Quigg*, 916 F2d 522, 525, 16 USPQ2d 1549, 1551 (Fed. Cir. 1990).

2759 Certificate of Extension of Patent Term [R-2]

35 U.S.C. 156. Extension of patent term.

*****

(e)(1) A determination that a patent is eligible for extension may be made by the Director solely on the basis of the representations contained in the application for the extension. If the Director determines that a patent is eligible for extension under subsection (a) and that the requirements of paragraphs (1) through (4) of subsection (d) have been complied with, the Director shall issue to the applicant for the extension of the term of the patent a certificate of extension, under seal, for the period prescribed by subsection (c). Such certificate shall be recorded in the official file of the patent and shall be considered as part of the original patent.

*****

37 CFR 1.780. Certificate or order of extension of patent term.

If a determination is made pursuant to § 1.750 that a patent is eligible for extension and that the term of the patent is to be extended, a certificate of extension, under seal, or an order granting interim extension under 35 U.S.C. 156(d)(5), will be issued to the applicant for the extension of the patent term. Such certificate or order will be recorded in the official file of the patent and will be considered as part of the original patent. Notification of the issuance of the certificate or order of extension will be published in the *Official Gazette of the United States Patent and Trademark Office*. Notification of the issuance of the order granting an interim extension under 35 U.S.C. 156(d)(5), including the identity of the product currently under regulatory review, will be published in the *Official Gazette of the United States Patent and Trademark* Office and in the *Federal Register*. No certificate of, or order granting, an extension will be issued if the term of the patent cannot be extended, even though the patent is otherwise determined to be eligible for extension. In such situations, the final determination made pursuant to § 1.750 will indicate that no certificate or order will issue.

Once a determination is made pursuant to 37 CFR 1.750 that a patent is eligible for extension of its term, a certificate of extension, under seal, will be issued to the patent owner at the correspondence address specified in the application for patent term extension. Following the one-month period provided in the Notice of Final Determination, and where an extension is appropriate, the Certificate of Extension is signed by the *>Director<. The original certificate is mailed or delivered to the applicant and a copy is sent to the regulatory agency. A copy of the certificate is placed in the two files (official file/patent file and public file) maintained for the patent term extension application.

Upon issuance of the certificate of extension, a notice is published in the *Official Gazette*. A sample *Official Gazette* Notice Follows:

PATENT TERM EXTENDED UNDER 35 U.S.C. 156

A Certificate extending the term of the following patent was issued on __.

U.S. Patent No.: __ Granted: __; Applicant: __; Owner of Record: __; Title: ___; Classification: __ Product Trade Name: __; Original Expiration Date: __; Term Extended: ____; Extended Expiration Date: __.

All original papers from the application for patent term extension in the official file are transferred to the official patent file of the subject patent and become a part of the permanent record. A copy of the certificate of extension of patent term is added to the patent electronic database as part of the patent record in the same manner as is a certificate of correction or a terminal disclaimer. The patent is also added to the list of patents extended under 35 U.S.C. 156, a copy of which is posted on the USPTO web site (www.uspto.gov) and which is also available in the Reading Room of the Public Search Room and from the Office of Patent Legal Administration. The public file for the application for patent term extension is stored in the Office of Patent Legal Administration.

2760 Trade Secret, Confidential, and Protective Order Material

There is no provision in the statute or the rules for withholding from the public any information that is submitted to the Office or the regulatory agency relating to an application for patent term extension. While one submitting such materials to the Office in relation to a pending application for patent term extension must generally assume that such materials will be made of record in the file and be made public, the Office is not unmindful of the difficulties this sometimes imposes. Proprietary or trade secret information should be submitted generally in accordance with the procedures set forth in MPEP § 724.02. Identification of the propriety or trade secret material should be made by page, line, and word, as necessary. The Office will not in the first instance undertake the task of determining the precise material in the application which is proprietary or trade secret information. Only

the applicant is in a position to make this determination. See *In re Schering-Plough Corp.*, 1 USPQ2d 1926, 1926 (Comm'r Pat. & Tm. 1986).

The information will not be made public as part of the patent file before a certificate of patent extension is issued. Should the Office receive a Freedom of Information Act (FOIA) request for the material, the applicant will be provided notice and an opportunity to substantiate its claim that the material is proprietary before the Office determines whether disclosure of the material is required under the FOIA. If such information was material to a determination of eligibility or any other Office responsibility under 35 U.S.C. 156, it will be made public at the time the certificate of extension is issued. Otherwise, if a suitable petition to expunge is filed before the issuance of the certificate, the trade secret or confidential information will be expunged from the file and returned to the patent term extension applicant. If a petition to expunge is not filed prior to the issuance of the certificate, all of the information will be open to public inspection.

2761 Multiple Applications for Extension of Term of the Same Patent or of Different Patents for the Same Regulatory Review Period for a Product

35 U.S.C. 156. Extension of patent term.

*****

(c)(4) in no event shall more than one patent be extended under subsection (e)(i) for the same regulatory review period for any product.

*****

37 CFR 1.785. Multiple applications for extension of term of the same patent or of different patents for the same regulatory review period for a product.

(a) Only one patent may be extended for a regulatory review period for any product § 1.720 (h). If more than one application for extension of the same patent is filed, the certificate of extension of patent term, if appropriate, will be issued based upon the first filed application for extension.

(b) If more than one application for extension is filed by a single applicant which seeks the extension of the term of two or more patents based upon the same regulatory review period, and the patents are otherwise eligible for extension pursuant to the requirements of this subpart, in the absence of an election by the applicant, the certificate of extension of patent term, if appropriate, will be issued upon the application for extension of the patent term having the earliest date of issuance of those patents for which extension is sought.

(c) If an application for extension is filed which seeks the extension of the term of a patent based upon the same regulatory review period as that relied upon in one or more applications for extension pursuant to the requirements of this subpart, the certificate of extension of patent term will be issued on the application only if the patent owner or its agent is the holder of the regulatory approval granted with respect to the regulatory review period.

(d) An application for extension shall be considered complete and formal regardless of whether it contains the identification of the holder of the regulatory approval granted with respect to the regulatory review period. When an application contains such information, or is amended to contain such information, it will be considered in determining whether an application is eligible for an extension under this section. A request may be made of any applicant to supply such information within a non-extendable period of not less than one month whenever multiple applications for extension of more than one patent are received and rely upon the same regulatory review period. Failure to provide such information within the period for reply set shall be regarded as conclusively establishing that the applicant is not the holder of the regulatory approval.

(e) Determinations made under this section shall be included in the notice of final determination of eligibility for extension of the patent term pursuant to § 1.750 and shall be regarded as part of that determination.

Only one patent may be extended for a regulatory review period for any product. If more than one application for extension is filed for a single patent by different applicants, the certificate of extension of the term of the patent, if appropriate, would be issued based upon the first filed application for extension of patent term. If a single applicant files more than one application for patent term extension for a single patent based upon the regulatory review period of different products, then the final determination under 37 CFR 1.750 will provide a period of time (usually one month) for the patent owner to elect the product for which extension is desired. An express withdrawal of the applications for extension of the nonelected products should accompany the election. The final determination will indicate that if the patent owner fails to elect a single product within the set time period, the Office will issue a certificate of extension for the patent for a specified one of the products.

If more than one application for extension is filed by a single applicant for the extension of the terms of different patents based upon the same regulatory review period for a product, the certificate of extension will be issued on the application for extension of the patent having the earliest date of issuance of those

for which extension is sought unless all but one application for extension is voluntarily withdrawn by the applicant. When plural patents are found to be eligible for patent term extension based on the same regulatory review of a product, the final determination under 37 CFR 1.750 will provide a period of time (usually one month) for the patent owner to elect the patent for which extension is desired. An express withdrawal of the application(s) for extension of the nonelected patent(s) should accompany the election. A failure to elect within the set time period will result in issuance of a certificate of extension for the patent having the earliest date of issue.

If applications for extension are filed by different applicants for the extension of the terms of different patents based upon the same regulatory review period of a product, the certificate of extension will be issued on the application of the holder of the regulatory approval (marketing applicant). If the marketing applicant is not an applicant for extension, the certificate of extension will issue to the applicant for extension which holds an express authorization from the marketing applicant to rely upon the regulatory review period as the basis for the application for extension. See also 37 CFR 1.785(d).

2762 Duty of Disclosure in Patent Term Extension Proceedings [R-2]

37 CFR 1.765. Duty of disclosure in patent term extension proceedings.

(a) A duty of candor and good faith toward the Patent and Trademark Office and the Secretary of Health and Human Services or the Secretary of Agriculture rests on the patent owner or its agent, on each attorney or agent who represents the patent owner and on every other individual who is substantively involved on behalf of the patent owner in a patent term extension proceeding. All such individuals who are aware, or become aware, of material information adverse to a determination of entitlement to the extension sought, which has not been previously made of record in the patent term extension proceeding must bring such information to the attention of the Office or the Secretary, as appropriate, in accordance with paragraph (b) of this section, as soon as it is practical to do so after the individual becomes aware of the information. Information is material where there is a substantial likelihood that the Office or the Secretary would consider it important in determinations to be made in the patent term extension proceeding.

(b) Disclosures pursuant to this section must be accompanied by a copy of each written document which is being disclosed. The disclosure must be made to the Office or the Secretary, as appropriate, unless the disclosure is material to determinations to be made by both the Office and the Secretary, in which case duplicate copies, certified as such, must be filed in the Office and with the Secretary. Disclosures pursuant to this section may be made to the Office or the Secretary, as appropriate, through an attorney or agent having responsibility on behalf of the patent owner or its agent for the patent term extension proceeding or through a patent owner acting on his or her own behalf. Disclosure to such an attorney, agent or patent owner shall satisfy the duty of any other individual. Such an attorney, agent or patent owner has no duty to transmit information which is not material to the determination of entitlement to the extension sought.

(c) No patent will be determined eligible for extension and no extension will be issued if it is determined that fraud on the Office or the Secretary was practiced or attempted or the duty of disclosure was violated through bad faith or gross negligence in connection with the patent term extension proceeding. If it is established by clear and convincing evidence that any fraud was practiced or attempted on the Office or the Secretary in connection with the patent term extension proceeding or that there was any violation of the duty of disclosure through bad faith or gross negligence in connection with the patent term extension proceeding, a final determination will be made pursuant to § 1.750 that the patent is not eligible for extension.

*****

A duty of candor and good faith toward the USPTO, the Secretary of Health and Human Services, and the Secretary of Agriculture rests on the patent owner or its agent, on each attorney or agent who represents the patent owner, and on every other individual who is substantively involved on behalf of the patent owner in a patent term extension proceeding. All such individuals who are aware, or become aware, of material information adverse to a determination of entitlement to the extension sought, which has not been previously made of record in the patent term extension proceeding, must bring such information to the attention of the Office or the Secretary, as appropriate, as soon as it is practicable to do so after the individual becomes aware of the information. Information is "material" when there is a substantial likelihood that the Office or the Secretary would consider it important in determinations to be made in the patent term extension proceeding. Any such material information should be submitted to the **>Director of the United States Patent and Trademark Office<, the Secretary of Health and Human Services, or the Secretary of Agriculture, as appropriate, accompanied by a copy of each written document being disclosed. The information may be submitted through a patent attorney or agent.

A determination of eligibility for an extension or the issuance of a certificate will not be made if clear and convincing evidence of fraud or attempted fraud on the Office or a Secretary is determined to be present, or the duty of disclosure is determined to have been violated through bad faith or gross negligence in connection with the patent term extension proceeding. Since the determination as to whether a patent is eligible for extension may be made solely on the basis of the representations made in the application for extension, a final determination to refuse a patent term extension because of fraud or a violation of the duty of disclosure is expected to be rare. See MPEP § 2010.

2763 Limitation of Third Party Participation [R-2]

37 CFR 1.765. Duty of disclosure in patent term extension proceedings.

*****

(d) The duty of disclosure pursuant to this section rests on the individuals identified in paragraph (a) of this section and no submission on behalf of third parties, in the form of protests or otherwise, will be considered by the Office. Any such submissions by third parties to the Office will be returned to the party making the submission, or otherwise disposed of, without consideration by the Office.

*****

Although the statute specifically provides for public input into the determination of the regulatory review period, i.e., the filing of a due diligence petition before the regulatory agency, no such provision was made for proceedings before the Office. Since applicant already has a duty of disclosure to both the Office and the regulatory agency, and Congress expected that it would be an administratively simple proceeding, no input from third parties is permitted. Absent an invitation from the *>Director<, any such submission would be inappropriate. Accordingly, 37 CFR 1.765(d) precludes submissions to the Office by or on behalf of third parties, thereby making patent term extension proceedings in the Office an *ex parte* matter between the patent owner or its agent and the Office. Submissions by third parties not requested by the Office will be returned, or otherwise disposed of, without consideration. See *In re Dubno*, 12 USPQ2d 1153, 1154 (Comm'r Pat. & Tm. 1989).

2764 Express Withdrawal of Application for Extension of Patent Term

37 CFR 1.770. Express withdrawal of application for extension of patent term.

An application for extension of patent term may be expressly withdrawn before a determination is made pursuant to § 1.750 by filing in the Office, in duplicate, a written declaration of withdrawal signed by the owner of record of the patent or its agent. An application may not be expressly withdrawn after the date permitted for reply to the final determination on the application. An express withdrawal pursuant to this section is effective when acknowledged in writing by the Office. The filing of an express withdrawal pursuant to this section and its acceptance by the Office does not entitle applicant to a refund of the filing fee (§ 1.20(j)) or any portion thereof.

Any request for withdrawal of an application for extension of patent term after a determination has been made pursuant to 37 CFR 1.750 must be submitted on or before the date permitted for reply to the final determination, and be accompanied by a petition under 37 CFR 1.182 with the appropriate petition filing fee.

Appendix AI Administrative Instructions Under the PCT

(as in force from July 1, 2008)

TABLE OF CONTENTS[1]

[1] Table of Contents added for the convenience of the reader; it is not part of the Administrative Instructions.

PART 1

INSTRUCTIONS RELATING TO GENERAL MATTERS

Section 101

Abbreviated Expressions and Interpretation

(a) In these Administrative Instructions:

(i) "Treaty" means the Patent Cooperation Treaty;

(ii) "Regulations" means the Regulations under the Treaty;

(iii) "Article" means an Article of the Treaty;

(iv) "Rule" means a Rule of the Regulations;

(v) "International Bureau" means the International Bureau as defined in Article 2 (xix) of the Treaty;

(vi) "International Authorities" means the receiving Offices, the International Searching Authorities, the International Preliminary Examining Authorities, and the International Bureau;

(vii) "Annex" means an Annex to these Administrative Instructions, unless the contrary clearly follows from the wording or the nature of the provision, or the context in which the word is used;

(viii) "Form" means a Form contained in Annex A;[2]

(ix) "WIPO Standard" means a Standard established by the World Intellectual Property Organization;

(x) "Director General" means the Director General as defined in Article 2(xx) of the Treaty;

(xi) "electronic" technology includes that having electrical, digital, magnetic, optical or electromagnetic capabilities.

(b) The Annexes are part of these Administrative Instructions.

Section 102

Use of the Forms

(a) Subject to paragraphs (b) to (i) and Section 103, the International Authorities shall use, or require the use of, the mandatory Forms specified below:

(i) Forms for use by the applicant:

PCT/RO/101 (request Form)

PCT/IPEA/401 (demand Form)

(ii) Forms for use by the receiving Offices:

PCT/RO/103	PCT/RO/115	PCT/RO/152
PCT/RO/104	PCT/RO/117	PCT/RO/153
PCT/RO/105	PCT/RO/118	PCT/RO/154
PCT/RO/106	PCT/RO/123	PCT/RO/155
PCT/RO/107	PCT/RO/126	PCT/RO/156
PCT/RO/109	PCT/RO/133	PCT/RO/157
PCT/RO/110	PCT/RO/136	PCT/RO/158
PCT/RO/111	PCT/RO/143	PCT/RO/159
PCT/RO/112	PCT/RO/147	
PCT/RO/113	PCT/RO/150	
PCT/RO/114	PCT/RO/151	

(iii) Forms for use by the International Searching Authorities:

PCT/ISA/201	PCT/ISA/212	PCT/ISA/233
PCT/ISA/202	PCT/ISA/217	PCT/ISA/234
PCT/ISA/203	PCT/ISA/218	PCT/ISA/235
PCT/ISA/205	PCT/ISA/219	PCT/ISA/236
PCT/ISA/206	PCT/ISA/220	PCT/ISA/237
PCT/ISA/209	PCT/ISA/225	
PCT/ISA/210	PCT/ISA/228	

(iv) Forms for use by the International Bureau:

[2]Annex A is published separately by the World Intellectual Property Organization.

PCT/IB/301	PCT/IB/325	PCT/IB/357
PCT/IB/304	PCT/IB/326	PCT/IB/358
PCT/IB/305	PCT/IB/331	PCT/IB/360
PCT/IB/306	PCT/IB/332	PCT/IB/366
PCT/IB/307	PCT/IB/335	PCT/IB/367
PCT/IB/308	PCT/IB/336	PCT/IB/368
PCT/IB/310	PCT/IB/337	PCT/IB/369
PCT/IB/311	PCT/IB/338	PCT/IB/370
PCT/IB/313	PCT/IB/339	PCT/IB/371
PCT/IB/314	PCT/IB/344	PCT/IB/373
PCT/IB/315	PCT/IB/345	PCT/IB/374
PCT/IB/316	PCT/IB/346	PCT/IB/399
PCT/IB/317	PCT/IB/349	
PCT/IB/318	PCT/IB/350	
PCT/IB/319	PCT/IB/351	
PCT/IB/320	PCT/IB/353	
PCT/IB/321	PCT/IB/354	
PCT/IB/323	PCT/IB/356	

(v) Forms for use by the International Preliminary Examining Authorities:

PCT/IPEA/402	PCT/IPEA/414	PCT/IPEA/437
PCT/IPEA/404	PCT/IPEA/415	PCT/IPEA/440
PCT/IPEA/405	PCT/IPEA/416	PCT/IPEA/441
PCT/IPEA/407	PCT/IPEA/420	PCT/IPEA/442
PCT/IPEA/408	PCT/IPEA/425	PCT/IPEA/443
PCT/IPEA/409	PCT/IPEA/431	PCT/IPEA/444
PCT/IPEA/412	PCT/IPEA/436	

(b) Slight variations in layout necessary in view of the printing of the Forms referred to in paragraph (a) in various languages are permitted.

(c) Slight variations in layout in the Forms referred to in paragraph (a)(ii) to (v) are permitted to the extent necessary to meet the particular office requirements of the International Authorities, in particular in view of the production of the Forms by computer or of the use of window envelopes.

(d) Where the receiving Office, the International Searching Authority and/or the International Preliminary Examining Authority are each part of the same Office, the obligation to use the Forms referred to in paragraph (a) does not extend to communications within that same Office.

(e) The annexes to Forms PCT/RO/106, PCT/RO/118, PCT/ISA/201, PCT/ISA/205, PCT/ISA/206, PCT/ISA/210, PCT/ISA/219, PCT/IB/313, PCT/IB/336, PCT/IPEA/404, PCT/IPEA/405 and PCT/IPEA/415 may be omitted in cases where they are not used.

(f) The notes attached to Forms PCT/RO/101 (request Form) and PCT/IPEA/401 (demand Form) shall be distributed by the International Authorities concerned together with the printed versions of those Forms. The notes attached to Form PCT/ISA/220 shall accompany the Form when sent to the applicant.

(g) The use of Forms other than those referred to in paragraph (a) is optional.

(h) Where the request or the demand is presented as a computer print-out, such print-out shall be prepared as follows:

(i) the layout and contents of the request and the demand when presented as computer print-outs shall correspond to the format of Forms PCT/RO/101 (request Form) and PCT/IPEA/401 (demand Form) (“the printed Forms”), with the same information being presented on the corresponding pages;

(ii) all boxes shall be drawn by solid lines; double lines may be presented as single lines;

(iii) the box numbers and box titles shall be included even where no information is supplied therein;

(iv) the boxes for use by the International Authorities shall be at least as large as those on the printed Forms;

(v) all other boxes shall be within one cm in size of those on the printed Forms;

(vi) all text shall be 9 points or larger in size;

(vii) titles and other information shall be clearly distinguished;

(viii) explanatory notes presented in italics on the printed Forms may be omitted.

(i) Other formats permitted for the presentation of the request and the demand as computer print-outs may be determined by the Director General. Any such format shall be published in the Gazette.

Section 102*bis*

Filing of PCT-EASY Request Together with PCT-EASY Physical Medium Containing Request Data and Abstract

(a) Pursuant to Rule 89*ter*, any receiving Office may, if it is prepared to do so, accept the filing with it of an international application containing the request presented as a print-out prepared using the PCT-EASY features of the PCT-SAFE software made available by the International Bureau ("PCT-EASY request") together with a physical medium that has been specified by the receiving Office in accordance with Annex F. Such physical medium shall contain a copy in electronic form of the data contained in the request and of the abstract ("PCT-EASY physical medium").

(b) Any receiving Office which, under paragraph (a), accepts the filing of PCT-EASY requests together with PCT-EASY physical media shall notify the International Bureau accordingly. The International Bureau shall promptly publish this information in the Gazette.

(c) Item 3(a) of the Schedule of Fees annexed to the Regulations shall apply to reduce the fees payable in respect of an international application containing a PCT-EASY request filed, together with a PCT-EASY physical medium, with a receiving Office which, under paragraph (a), accepts the filing of such international applications.

Section 103

Languages of the Forms Used by International Authorities

(a) The language of the Forms used by any receiving Office shall be the same as the language in which the international application is filed, provided that:

(i) where the international application is to be published in the language of a translation required under Rule 12.3(a) or 12.4(a), the receiving Office shall use the Forms in such language;

(ii) the receiving Office may, in its communications to the applicant, use the Forms in any other language being one of its official languages.

(b) Subject to Section 104(b), the language or languages of the Forms to be used by any International Searching Authority shall be specified in the applicable agreement referred to in Article 16(3)(b).

(c) Subject to Section 104(b), the language or languages of the Forms to be used by any International Preliminary Examining Authority shall be specified in the applicable agreement referred to in Article 32(3).

(d) The language of any Form used by the International Bureau shall be English where the language of the international application is English, and it shall be French where the language of the international application is French. Where the language of the international application is neither English nor French, the language of any Form used by the International Bureau in its communications to any other International Authority shall be English or French according to the wishes of such Authority, and in its communications to the applicant it shall be English or French according to the wishes of the applicant.

Section 104

Language of Correspondence in Cases Not Covered by Rule 92.2

(a) The language of any letter from the applicant to the receiving Office shall be the same as the language of the international application to which such letter relates, provided that, where the international application is to be published in the language of a translation required under Rule 12.3(a) or 12.4(a), any letter shall be in such language. However, the receiving Office may expressly authorize the use of any other language.

(b) The language of any letter to the International Bureau shall be English where the language of the international application is English, and it shall be French where the language of the international application is French. Where the language of the international application is neither English nor French, the language of any letter to the International Bureau

shall be English or French, provided that any copy, sent to the International Bureau as a notification addressed to it, of a Form sent to the applicant by the receiving Office, the International Searching Authority or the International Preliminary Examining Authority, does not require translation into English or French.

Section 105

Identification of International Application with Two or More Applicants

Where any international application indicates two or more applicants, it shall be sufficient, for the purpose of identifying that application, to indicate, in any Form or correspondence relating to such application, the name of the applicant first named in the request. The provisions of the first sentence of this Section do not apply to the demand.

Section 106

Change of Common Representative

Where a change is recorded under Rule 92*bis*.1(a) in the person of an applicant who was considered to be the common representative under Rule 90.2(b), the new applicant shall be considered to be the common representative under Rule 90.2(b) if he is entitled according to Rule 19.1 to file an international application with the receiving Office.

Section 107

Identification of International Authorities and of Designated and Elected Offices

(a) Whenever the nature of any communication from or to the applicant, from or to any International Authority or, before national processing or examination has started, from or to any designated or elected Office so permits, any International Authority or any designated or elected Office may be indicated in the communication by the two-letter code referred to in Section 115.

(b) The indication of a receiving Office, an International Searching Authority, an International Preliminary Examining Authority or a designated or elected Office shall be preceded by the letters "RO," "ISA", "IPEA," "DO," or "EO," respectively, followed by a slant (e.g., "RO/JP," "ISA/US", "IPEA/SE," "DO/EP," "EO/AU").

Section 108

Correspondence Intended for the Applicant

(a) For the purpose of this Section, where there are two or more agents whose appointments are in force, "first mentioned agent" means the agent first mentioned in the document containing the appointments or, where the appointments are contained in two or more documents, in that which was filed first.

(b) Where a sole applicant has appointed an agent or agents under Rule 90.1(a), correspondence intended for the applicant from the International Authorities shall, subject to paragraph (d), be addressed to the agent or, where applicable, to the first mentioned agent.

(c) Where there are two or more applicants, correspondence intended for the applicants from the International Authorities shall, subject to paragraph (d), be addressed:

(i) if no common agent has been appointed under Rule 90.1 —to the common representative or, where applicable, to his agent or first mentioned agent; or

(ii) if the applicants have appointed a common agent or common agents under Rule 90.1(a)—to that common agent or, where applicable, to the first mentioned common agent.

(d) Where an agent has or agents have been appointed under Rule 90.1(b), (c) or (d)(ii), paragraphs (b) and (c) shall apply to correspondence intended for the applicant relating to the procedure before the International Searching Authority or the International Preliminary Examining Authority, as the case may be, as if those paragraphs referred to the agent or agents so appointed.

(e) Where, in accordance with paragraph (c), correspondence intended for the applicants from the International Authorities is to be addressed to the common representative but the indication required under Rule 4.5(a)(ii) has not been provided for the common representative, correspondence shall be addressed:

(i) to the first applicant named in the request who is entitled according to Rule 19.1 to file an international application with the receiving Office and in respect of whom the indication required under Rule 4.5(a)(ii) has been provided; or, if there is no such applicant,

(ii) to the applicant first named in the request who is entitled according to Article 9 to file an international application and in respect of, whom the indication required under Rule 4.5(a)(ii) has been provided; or, if there is no such applicant,

(iii) to the applicant first named in the request in respect of whom the indication required under Rule 4.5(a)(ii) has been provided.

Section 109

File Reference

(a) Where any document submitted by the applicant contains an indication of a file reference, that reference shall not exceed 12 characters in length and may be composed of either letters of the Latin alphabet or Arabic numerals, or both.

(b) Correspondence from International Authorities intended for the applicant shall indicate any such file reference.

Section 110

Dates

Any date in the international application, or used in any correspondence emanating from International Authorities relating to the international application, shall be indicated by the Arabic number of the day, by the name of the month, and by the Arabic number of the year. The receiving Office, where the applicant has not done so, or the International Bureau, where the applicant has not done so and the receiving Office fails to do so, shall, after, above, or below any date indicated by the applicant in the request, repeat the date, in parentheses, by indicating it by two-digit Arabic numerals each for the number of the day and for the number of the month followed by the number of the year in four digits, in that order and with a period, slant or hyphen after the digit pairs of the day and of the month (for example, "20 March 2004 (20.03.2004)," "20 March 2004 (20/03/2004)," or "20 March 2004 (20-03-2004)").

Section 111

[*Deleted*]

Section 112

Ceasing of Effect under Articles 24(1)(iii) and 39(2), Review under Article 25(2) and Maintaining of Effect under Articles 24(2) and 39(3)

(a) Each national Office shall, in its capacity as designated Office, notify the International Bureau once a year of:

(i) the number of international applications in respect of which, during the preceding calendar year, the time limit applicable under Article 22 has expired;

(ii) the number of international applications in respect of which, during the preceding calendar year, the requirements provided for in Article 22 have not been complied with before the expiration of the time limit applicable under that Article, with the consequence that the effects of the international applications concerned have ceased under Article 24(1)(iii).

(b) Each national Office shall, in its capacity as elected Office, notify the International Bureau once a year of:

(i) the number of international applications in respect of which, during the preceding calendar year, the time limit applicable under Article 39(1) has expired;

(ii) the number of international applications in respect of which, during the preceding calendar year, the requirements provided for in Article 39(1) have not been complied with before the expiration of the time limit applicable under that Article, with the consequence that the effects of the international applications concerned have ceased under Article 39(3).

(c) Where, under Article 25(2), the designated Office decides that the refusal, declaration or finding referred to in Article 25(1) was not justified, it shall promptly notify the International Bureau that it will treat the international application as if the error or omission referred to in Article 25(2) had not occurred. The notification shall preferably contain the reasons for the decision of the designated Office.

(d) Where, under Article 24(2) or under Article 39(3), the designated or elected Office maintains the effect provided for in Article 11(3), it shall promptly notify the International Bureau accordingly. The notification shall preferably contain the reasons for the decision of the designated or elected Office.

Section 113

Special Fees Payable to the International Bureau

(a) The special publication fee provided for in Rule 48.4 shall be 200 Swiss francs.

(b) The special fee provided for in Rule 91.3(d) shall be payable to the International Bureau and shall be 50 Swiss francs plus 12 Swiss francs for each sheet in excess of one. Where that fee has not been paid prior to the expiration of the time limit under Rule 91.3(d), the request for rectification, the reasons for refusal by the authority and any further brief comments submitted by the applicant shall not be published. Where the last sentence of Rule 91.3(d) applies and the said fee has not been paid before the time of the communication of the international application under Article 20, a copy of the request for rectification shall not be included in that communication.

(c) The special fee provided for in Rule 26*bis*.2(e) shall be payable to the International Bureau and shall be 50 Swiss francs plus 12 Swiss francs for each sheet in excess of one.

Section 114

[*Deleted*]

Section 115

Indications of States, Territories and Intergovernmental Organizations

The indication of a State, territory, or intergovernmental organization shall be made either by its full name, by a generally accepted short title which, if the indications are in English or French, shall be as appears in WIPO Standard ST.3 (Recommended Standard Two-Letter Code for the Representation of Countries, and of Other Entities and International Organizations Issuing or Registering Industrial Property Titles), or by the two-letter code as appears in that Standard. [3]

[3] Published in the WIPO Handbook on Industrial Property Information and Documentation.

PART 2

INSTRUCTIONS RELATING TO THE INTERNATIONAL APPLICATION

Section 201

Language of the International Application

The language in which the international application is filed shall preferably be indicated in the request.

Section 202

[*Deleted*]

Section 203

Different Applicants for Different Designated States

(a) Different applicants may be indicated for different States designated for a regional patent.

(b) Where a particular State has been designated for both a national patent and a regional patent, the same applicant or applicants shall be indicated for both designations.

Section 204

Headings of the Parts of the Description

The headings of the parts of the description should be as follows:

(i) for matter referred to in Rule 5.1(a)(i), "Technical Field";

(ii) for matter referred to in Rule 5.1(a)(ii), "Background Art";

(iii) for matter referred to in Rule 5.1(a)(iii), "Disclosure of Invention";

(iv) for matter referred to in Rule 5.1(a)(iv), "Brief Description of Drawings";

(v) for matter referred to in Rule 5.1(a)(v), "Best Mode for Carrying Out the Invention," or, where appropriate, "Mode(s) for Carrying Out the Invention";

(vi) for matter referred to in Rule 5.1(a)(vi), "Industrial Applicability";

(vii) for matter referred to in Rule 5.2(a), "Sequence Listing";

(viii) for matter referred to in Rule 5.2(b), "Sequence Listing Free Text."

Section 205

Numbering and Identification of Claims upon Amendment

(a) Amendments to the claims under Article 19 or Article 34(2)(b) may be made either by cancelling one or more entire claims, by adding one or more new claims or by amending the text of one or more of the claims as filed. All the claims appearing on a replacement sheet shall be numbered in Arabic numerals. Where a claim is cancelled, no renumbering of the other claims shall be required. In all cases where claims are renumbered, they shall be renumbered consecutively.

(b) The applicant shall, in the letter referred to in the second and third sentences of Rule 46.5(a) or in the second and fourth sentences of Rule 66.8(a), indicate the differences between the claims as filed and the claims as amended. He shall, in particular, indicate in the said letter, in connection with each claim appearing in the international application (it being understood that identical indications concerning several claims may be grouped), whether:

(i) the claim is unchanged;

(ii) the claim is cancelled;

(iii) the claim is new;

(iv) the claim replaces one or more claims as filed;

(v) the claim is the result of the division of a claim as filed.

Section 206

Unity of Invention

The determination by the International Searching Authority, the International Preliminary Examining Authority and the designated and elected Offices whether an international application complies with the requirement of unity of invention under Rule 13 shall be made in accordance with Annex B.

Section 207

Arrangement of Elements and Numbering of Sheets of the International Application

(a) In effecting the sequential numbering of the sheets of the international application in accordance with Rule 11.7, the elements of the international application shall be placed in the following order: the request, the description (other than any sequence listing part thereof), the claims, the abstract, the drawings, the sequence listing part of the description (where applicable).

(b) The sequential numbering of the sheets shall be effected by using the following separate series of numbering:

(i) the first series applying to the request only and commencing with the first sheet of the request,

(ii) the second series commencing with the first sheet of the description (other than any sequence listing part thereof) and continuing through the claims until the last sheet of the abstract,

(iii) if applicable, a further series applying to the sheets of the drawings only and commencing with the first sheet of the drawings; the number of each sheet of the drawings shall consist of two Arabic numerals separated by a slant, the first being the sheet number and the second being the total number of sheets of drawings (for example, 1/3, 2/3, 3/3), and

(iv) if applicable, preferably, a further series applying to the sequence listing part of the description commencing with the first sheet of that part.

Section 208

Sequence Listings

Any nucleotide and/or amino acid sequence listing ("sequence listing"), whether on paper or in electronic form, filed as part of the international application, or furnished together with the international application or subsequently, shall comply with Annex C.

Section 209

Indications as to Deposited Biological Material on a Separate Sheet

(a) To the extent that any indication with respect to deposited biological material is not contained in the description, it may be given on a separate sheet. Where any such indication is so given, it shall preferably be on Form PCT/RO/134 and, if furnished at the time of filing, the said Form shall, subject to paragraph (b), preferably be attached to the request and referred to in the check list referred to in Rule 3.3 (a)(ii).

(b) For the purposes of designated Offices, which have so notified the International Bureau under Rule 13*bis*.7(a), paragraph (a) applies only if the said Form or sheet is included as one of the sheets of the description of the international application at the time of filing.

Section 210

[*Deleted*]

Section 211

Declaration as to the Identity of the Inventor

(a) Any declaration as to the identity of the inventor, referred to in Rule 4.17(i), shall be worded as follows:

> "Declaration as to the identity of the inventor (Rules 4.17(i) and 51*bis*.1(a)(i)):
>
> in relation to [this] international application [No. PCT/…], … *(name)* of … *(address)* is the inventor of the subject matter for which protection is sought by way of [the] [this] international application"

(b) This declaration need not be made if the name and address of the inventor are otherwise indicated in the request.

(c) This declaration may, where applicable, be combined, in accordance with Section 212(b), with the declaration referred to in Section 212(a).

Section 212

Declaration as to the Applicant's Entitlement to Apply for and Be Granted a Patent

(a) Any declaration as to the applicant's entitlement, as at the international filing date, to apply for and be granted a patent, referred to in Rule 4.17(ii), shall be worded as follows, with such inclusion, omission, repetition and re-ordering of the matters listed as items (i) to (viii) as is necessary to explain the applicant's entitlement:

"Declaration as to the applicant's entitlement, as at the international filing date, to apply for and be granted a patent (Rules 4.17(ii) and 51*bis*.1(a)(ii)), in a case where the declaration under Rule 4.17(iv) is not appropriate:

in relation to [this] international application [No. PCT/…],

… *(name)* is entitled to apply for and be granted a patent by virtue of the following:

(i) ... *(name)* of ... *(address)* … is the inventor of the subject matter for which protection is sought by way of [the] [this] international application

(ii) … *(name)* [is] [was] entitled as employer of the inventor, … *(inventor's name)*

(iii) an agreement between … *(name)* and … *(name)*, dated …

(iv) an assignment from … *(name)* to … *(name)*, dated …

(v) consent from … *(name)* in favor of … *(name)*, dated …

(vi) a court order issued by … *(name of court)*, effecting a transfer from … *(name)* to … *(name)*, dated …

(vii) transfer of entitlement from … *(name)* to … *(name)* by way of … *(specify kind of transfer)*, dated ...

(viii) the applicant's name changed from … *(name)* to … *(name)* on … *(date)*"

(b) The declaration referred to in paragraph (a) may, where applicable, be combined with the declaration referred to in Section 211(a), in which case the introductory phrase shall be worded as follows and the remainder of the combined declaration shall be worded as prescribed in paragraph (a):

"Combined declaration as to the applicant's entitlement, as at the international filing date, to apply for and be granted a patent (Rules 4.17(ii) and 51*bis*.1(a)(ii)) and as to the identity of the inventor (Rules 4.17(i) and 51*bis*.1(a)(i)), in a case where the declaration under Rule 4.17(iv) is not appropriate:"

Section 213

Declaration as to the Applicant's Entitlement to Claim Priority of Earlier Application

Any declaration as to the applicant's entitlement, as at the international filing date, to claim priority of the earlier application, referred to in Rule 4.17(iii), shall be worded as follows, with such inclusion, omission, repetition and re-ordering of the matters listed as items (i) to (viii) as is necessary to explain the applicant's entitlement:

"Declaration as to the applicant's entitlement, as at the international filing date, to claim the priority of the earlier application specified below, where the applicant is not the applicant who filed the earlier application or where the applicant's name has changed since the filing of the earlier application (Rules 4.17(iii) and 51*bis*.1(a)(iii)):

in relation to [this] international application [No. PCT/…],

... *(name)* is entitled to claim priority of earlier application No. … by virtue of the following:

(i) the applicant is the inventor of the subject matter for which protection was sought by way of the earlier application

(ii) … *(name)* [is] [was] entitled as employer of the inventor, … *(inventor's name)*

(iii) an agreement between … *(name)* and … *(name)*, dated …

(iv) an assignment from … *(name)* to … *(name)*, dated …

(v) consent from … *(name)* in favor of … *(name)*, dated …

(vi) a court order, issued by …. *(name of court)*, effecting a transfer from … *(name)* to … *(name)*, dated …

(vii) transfer of entitlement from … *(name)* to … *(name)* by way of … *(specify kind of transfer)*, dated …

(viii) the applicant's name changed from … *(name)* to … *(name)* on … *(date)*"

Section 214

Declaration of Inventorship

(a) A declaration of inventorship, referred to in Rule 4.17(iv), that is made for the purposes of the designation of the United States of America shall be worded as follows:

"Declaration of inventorship (Rules 4.17(iv) and 51*bis*.1(a)(iv)) for the purposes of the designation of the United States of America:

I hereby declare that I believe I am the original, first and sole (if only one inventor is listed below) or joint (if more than one inventor is listed below) inventor of the subject matter which is claimed and for which a patent is sought.

This declaration is directed to the international application of which it forms a part (if filing declaration with application).

This declaration is directed to international application No. PCT/… (if furnishing declaration pursuant to Rule 26*ter*).

I hereby declare that my residence, mailing address, and citizenship are as stated next to my name.

I hereby state that I have reviewed and understand the contents of the above-identified international application, including the claims of said application. I have identified in the request of said application, in compliance with PCT Rule 4.10, any claim to foreign priority, and I have identified below, under the heading "Prior Applications," by application number, country or Member of the World Trade Organization, day, month and year of filing, any application for a patent or inventor's certificate filed in a country other than the United States of America, including any PCT international application designating at least one country other than the United States of America, having a filing date before that of the application on which foreign priority is claimed.

I hereby acknowledge the duty to disclose information that is known by me to be material to patentability as defined by 37 C.F.R. § 1.56, including for continuation-in-part applications, material information which became available between the filing date of the prior application and the PCT international filing date of the continuation-in-part application.

I hereby declare that all statements made herein of my own knowledge are true and that all statements made on information and belief are believed to be true; and further that these statements were made with the knowledge that willful false statements and the like so made are punishable by fine or imprisonment, or both, under Section 1001 of Title 18 of the United States Code and that such willful false statements may jeopardize the validity of the application or any patent issued thereon.

Name: …

Residence: … (city and either US state, if applicable, or country)

Mailing Address: …

Citizenship: …

Prior Applications: …

Inventor's Signature: … (The signature must be that of the inventor, not that of the agent)

Date: …"

(b) Where there is more than one inventor and all inventors do not sign the same declaration referred to in paragraph (a), each declaration shall indicate the names of all the inventors.

(c) Any correction or addition under Rule 26*ter*.1 of a declaration referred to in paragraph (a) shall take the form of a declaration referred to in that paragraph and be signed by the inventor. In addition, any such correction shall be entitled "Supplemental declaration of inventorship (Rules 4.17(iv) and 51*bis*.1(a)(iv))".

Section 215

Declaration as to Non-Prejudicial Disclosures or Exceptions to Lack of Novelty

Any declaration as to non-prejudicial disclosures or exceptions to lack of novelty shall be worded as follows, with such inclusion, omission, repetition and re-ordering of the matters listed as items (i) to (iv) as is necessary:

"Declaration as to non-prejudicial disclosures or exceptions to lack of novelty (Rules 4.17(v) and 51*bis*.1(a)(v)):

in relation to [this] international application [No. PCT/…],

… *(name)* declares that the subject matter claimed in [the] [this] international application was disclosed as follows:

(i) kind of disclosure *(include as applicable)*:

(a) international exhibition

(b) publication

(c) abuse

(d) other: ...*(specify)*

(ii) date of disclosure: ...

(iii) title of disclosure (*if applicable*): ...

(iv) place of disclosure (*if applicable*): ..."

Section 216

Notice of Correction or Addition of a Declaration under Rule 26*ter*

Any notice referred to in Rule 26*ter*.1 shall consist of a replacement sheet containing a corrected declaration, or of an additional sheet containing a declaration, and an accompanying letter explaining the correction or addition.

PART 3

INSTRUCTIONS RELATING TO THE RECEIVING OFFICE

Section 301

Notification of Receipt of Purported International Application

Before the determination under Article 11(1), the receiving Office may notify the applicant of the receipt of the purported international application. The notification should indicate the date of actual receipt and the international application number of the purported international application referred to in Section 307 as well as, where useful for purposes of identification, the title of the invention.

Section 302

Priority Claim Considered Not to Have Been Made

Where the receiving Office declares, under Rule 26*bis*.2(b), that a priority claim is considered not to have been made, that Office shall enclose the priority claim concerned within square brackets, draw a line between the square brackets, while still leaving legible the indications concerned, and enter, in the margin, the words "NOT TO BE CONSIDERED FOR PCT PROCEDURE (RO)" or their equivalent in the language of publication of the international application, and shall notify the applicant accordingly. If copies of the international application have already been sent to the International Bureau and the International Searching Authority, the receiving Office shall also notify that Bureau and that Authority.

Section 303

Deletion of Additional Matter in the Request

(a) Where, under Rule 4.19(b), the receiving Office deletes *ex officio* any matter contained in the request, it shall do so by enclosing such matter within square brackets and entering, in the margin, the words "DELETED BY RO" or their equivalent in the language of publication of the international application, and shall notify the applicant accordingly. If copies of the international application have already been sent to the International Bureau and the International Searching Authority, the receiving Office shall also notify that Bureau and that Authority.

(b) The receiving Office shall not delete *ex officio* any indication made in declarations referred to in Rule 4.17 which are contained in the request.

Section 304

Invitation to Pay Fees Before Date on Which They Are Due

If the receiving Office finds, before the date on which they are due, that the transmittal fee, the international filing fee (including any supplement per sheet over 30) or the search fee are lacking in whole or in part, it may invite the applicant to pay the missing amounts within one month from the date of receipt of the international application.

Section 305

Identifying the Copies of the International Application

(a) Where, under Rule 11.1(a), the international application has been filed in one copy, the receiving Office shall, after preparing under Rule 21.1(a) the additional copies required under Article 12(1), mark,

(i) the words "RECORD COPY" in the upper left-hand corner of the first page of the original copy,

(ii) in the same space on one additional copy, the words "SEARCH COPY", and

(iii) in the same space on the other such copy, the words "HOME COPY," or their equivalent in the language of publication of the international application.

(b) Where, under Rule 11.1(b), the international application has been filed in more than one copy, the receiving Office shall choose the copy most suitable for reproduction purposes, and mark the words "RECORD COPY," or their equivalent in the language of publication of the international application, in the upper left-hand corner of its first page. After verifying the identity of any additional copies and, if applicable, preparing under Rule 21.1(b) the home copy, it shall mark, in the upper left-hand corner of the

first page of one such copy, the words "SEARCH COPY," and, in the same space on the other such copy, the words "HOME COPY," or their equivalent in the language of publication of the international application.

Section 305*bis*

Preparation, Identification and Transmittal of the Copies of the Translation of the International Application

(a) Where a translation of the international application is furnished under Rule 12.3, the receiving Office shall:

(i) be responsible for the prompt preparation of any additional copies required where the translation is furnished in less than the number of copies required for the purposes of this paragraph, and shall have the right to fix a fee for performing that task and to collect such fee from the applicant;

(ii) mark the words "RECORD COPY-TRANSLATION (RULE 12.3)" in the upper left-hand corner of the first page of the original copy of the translation and transmit that copy to the International Bureau;

(iii) mark the words "SEARCH COPY-TRANSLATION (RULE 12.3)" in the same space on one additional copy of the translation which, together with a copy of the request marked "SEARCH COPY" under Section 305(a)(ii), is considered pursuant to Rule 23.1(b) to be the search copy, and transmit such search copy to the International Searching Authority; and

(iv) mark the words "HOME COPY-TRANSLATION (RULE 12.3)" in the same space on the other such copy of the translation, and keep that copy in its files.

(b) The receiving Office may, when marking the copies of the translation under paragraph (a), use, instead of the words referred to in that paragraph, the equivalent of those words in the language of publication of the international application.

(c) Where a translation of the international application is furnished under Rule 12.4, the receiving Office shall:

(i) be responsible for the prompt preparation of any additional copies required where the translation is furnished in less than the number of copies required for the purposes of this paragraph, and shall have the right to fix a fee for performing that task and to collect such fee from the applicant;

(ii) mark the words "RECORD COPY – TRANSLATION (RULE 12.4)" in the upper left-hand corner of the first page of the original copy of the translation and transmit that copy to the International Bureau; and

(iii) mark the words "HOME COPY – TRANSLATION (RULE 12.4)" in the same space on the other such copy of the translation, and keep that copy in its files.

Section 305*ter*

Identification and Transmittal of the Translation of an Earlier Application Furnished under Rule 20.6(a)(iii)

Where a translation of an earlier application is furnished under Rule 20.6(a)(iii), the receiving Office shall mark the words "TRANSLATION OF EARLIER APPLICATION (RULE 20.6(a)(iii))" in the upper left-hand corner of the first page of the translation and, after having made a finding under Rule 20.6(b) or (c), transmit the translation to the International Bureau.

Section 306

Delayed Transmittal of Search Copy

Where the search copy will be transmitted to the International Searching Authority after the date on which the record copy is transmitted to the International Bureau, the receiving Office shall notify the International Bureau. The notification may be made by marking a check-box provided for this purpose on the request.

Section 307

System of Numbering International Applications

Papers purporting to be an international application under Rule 20.1(a) shall be allocated an international application number, consisting of the letters "PCT," a slant, the two-letter code referred to in Section 115, indicating the receiving Office, a four-digit indication of the year in which such papers were first received, a slant and a six-digit number, allotted in sequential order corresponding to the order in which the international applications are received (e.g., "PCT/SE2004/000001"). Where the International

Bureau acts as receiving Office, the two-letter code "IB" shall be used.

Section 308

Marking of the Sheets of the International Application and of the Translation Thereof

(a) Upon receipt of papers purporting to be an international application, the receiving Office shall indelibly mark the date of actual receipt on the request of each copy received.

(b) The receiving Office shall indelibly mark the international application number referred to in Section 307 in the upper right-hand corner of each sheet of each copy of the purported international application and of any translation of the international application furnished under Rule 12.3 or 12.4.

(c) If a positive determination is made under Rule 20.2, the receiving Office shall mark on the request the name of the receiving Office and the words "PCT International Application" or "Demande internationale PCT". If the official language of the receiving Office is neither English nor French, the words "International Application" or "Demande internationale" may be accompanied by a translation of these words in the official language of the receiving Office.

(d) If a negative determination is made under Rule 20.4 or a declaration is made under Article 14(4), the letters "PCT" shall be deleted by the receiving Office from the indication of the international application number on any papers marked previously with that number, and the said number shall be used without such letters in any future correspondence relating to the purported international application.

Section 308*bis*

Marking of Later Submitted Sheets

The receiving Office shall indelibly mark any sheet containing an element referred to in Article 11(1)(iii)(d) or (e), or a part referred to in Rule 20.5(a), received on a date later than the date on which sheets were first received ("later submitted sheet"), in the upper right-hand corner of each sheet, with the international application number referred to in Section 307 and the date of actual receipt of that sheet.

Section 309

Procedure in the Case of Later Submitted Sheets Furnished for the Purposes of Incorporation by Reference

(a) This Section applies, subject to paragraph (f), to later submitted sheets which accompany a notice confirming under Rule 20.6 that an element or part embodied in those sheets was incorporated by reference.

(b) Where later submitted sheets as referred to in paragraph (a) are received within the applicable time limit referred to in Rule 20.7 and the receiving Office makes a finding under Rule 20.6(b), the receiving Office shall:

(i) indelibly mark, in the middle of the bottom margin of each later submitted sheet, the words "INCORPORATED BY REFERENCE (RULE 20.6)", or their equivalent in the language of publication of the international application;

(ii) notify the applicant that the element or part contained in the later submitted sheets is considered to have been contained in the international application or purported international application on the date when sheets were first received and that that date has been accorded or retained, as the case may be, as the international filing date;

(iii) keep in its files a copy of the later submitted sheets marked under item (i) and of the notice under Rule 20.6(a);

(iv) where transmittals under Article 12(1) have already been made, notify the International Bureau and the International Searching Authority accordingly, and transmit the later submitted sheets marked under item (i) to the said Bureau and a copy thereof to the said Authority;

(v) where transmittals under Article 12(1) have not yet been made, attach the later submitted sheets marked under item (i) and the notice under Rule 20.6(a) to the record copy and a copy thereof to the search copy.

(c) Where later submitted sheets referred to in paragraph (a) are received within the applicable time limit referred to in Rule 20.7 and the receiving Office makes a finding under Rule 20.6(c), the receiving Office shall, subject to Section 310*bis*:

(i) effect the required correction of the international filing date or accord as the international fil-

ing date the date of receipt of the later submitted sheets;

(ii) notify the applicant that the content of the later submitted sheets is not considered to have been contained in the international application or purported international application on the date when sheets were first received and that the international filing date has been accorded as, or corrected to, as the case may be, the date on which the new sheets were received;

(iii) keep in its files a copy of the later submitted sheets and of the notice under Rule 20.6(a);

(iv) where transmittals under Article 12(1) have already been made, notify the International Bureau and the International Searching Authority accordingly and transmit a copy of the corrected first and last sheets of the request, the later submitted sheets and the notice under Rule 20.6(a) to the said Bureau and a copy thereof to the said Authority;

(v) where transmittals under Article 12(1) have not yet been made, attach the later submitted sheets and the notice under Rule 20.6(a) to the record copy and a copy thereof to the search copy.

(d) Where later submitted sheets referred to in paragraph (a) are received within the applicable time limit referred to in Rule 20.7 but the purported international application still does not fulfill the requirements of Article11(1), the receiving Office shall proceed as provided in Rule 20.4, but not before the expiration of the time limit under Rule 20.7.

(e) Where later submitted sheets referred to in paragraph (a) are received after the expiration of the applicable time limit referred to in Rule 20.7, the receiving Office shall proceed as provided in Section 310*ter*.

(f) Where later submitted sheets referred to in paragraph (a) are received but a missing element or part contained in those sheets cannot be incorporated by reference in the international application under Rules 4.18 and 20.6 because of the operation of Rule 20.8(a), the receiving Office shall:

(i) inform the applicant that the notice under Rule 20.6(a) confirming the incorporation by reference of the missing element or part has been disregarded:

(ii) proceed in accordance with Section 310(b), which shall apply *mutatis mutandis*, as if the notice under Rule 20.6(a) were a correction furnished under Rule 20.3(b)(i), or a missing part furnished under Rules 20.5(b) or (c), as the case may be; and

(iii) proceed in accordance with Section 310*bis*(b) where the applicant requests, within the time limit under Rule 20.5(e), that the missing part concerned be disregarded.

Section 310

Procedure in the Case of Later Submitted Sheets Not Furnished for the Purposes of Incorporation by Reference

(a) This Section applies to later submitted sheets which do not accompany a notice confirming under Rule 20.6 that an element or part embodied in those sheets was incorporated by reference.

(b) Where later submitted sheets as referred to in paragraph (a) are received within the applicable time limit referred to in Rule 20.7 and where the international filing date is to be accorded under Rules 20.3(b)(i) or 20.5(b), or corrected under Rule 20.5(c), the receiving Office shall, subject to Section 310*bis*:

(i) accord the international filing date in accordance with Rules 20.3(b)(i) or 20.5(b), or effect the required correction of the international filing date in accordance with Rule 20.5(c), as the case may be;

(ii) notify the applicant of the correction or the according of the international filing date effected under item (i);

(iii) keep in its files a copy of the later submitted sheets;

(iv) where transmittals under Article 12(1) have already been made, notify the International Bureau and the International Searching Authority accordingly and transmit a copy of the corrected first and last sheets of the request and the later submitted sheets to the said Bureau and a copy thereof to the said Authority;

(v) where transmittals under Article 12(1) have not yet been made, attach the later submitted sheets to the record copy and a copy thereof to the search copy.

(c) Where later submitted sheets referred to in paragraph (a) are received within the applicable time limit referred to in Rule 20.7 but the purported international application still does not fulfill the requirements of Article 11(1), the receiving Office shall proceed as provided in Rule 20.4.

(d) Where later submitted sheets referred to in paragraph (a) are received after the expiration of the applicable time limit referred to in Rule 20.7, the receiving Office shall proceed as provided in Section 310*ter*.

Section 310*bis*

Procedure in the Case of Later Submitted Sheets Resulting in the Correction of the International Filing Date under Rule 20.5(c)

(a) Where, following the receipt of later submitted sheets referred to in Sections 309(a) or 310(a) within the applicable time limit referred to in Rule 20.7, the international filing date has been corrected under Rule 20.5(c), the receiving Office shall, in addition to proceeding under Sections 309(c)(i) to (iii), or 310(b)(i) to (iii), as the case may be:

(i) draw the attention of the applicant to the procedure available under Rule 20.5(e);

(ii) proceed under Sections 309(c)(iv) or (v), or 310(b)(iv) or (v), as the case may be, but only after the expiration of the time limit under Rule 20.5(e) and only where the applicant has not made a request under that Rule.

(b) Where the applicant requests within the time limit under Rule 20.5(e) that the missing part concerned be disregarded, the receiving Office shall:

(i) restore the international filing date to that which had applied prior to its correction under Rule 20.5(c);

(ii) indelibly mark, in the middle of the bottom margin of each sheet containing the missing part concerned, the words "NOT TO BE CONSIDERED (RULE 20.5(e))", or their equivalent in the language of publication of the international application;

(iii) notify the applicant that the missing part is considered not to have been furnished and that the international filing date has been restored to that which had applied prior to its correction under Rule 20.5(c);

(iv) keep in its files a copy of the later submitted sheets marked under item (ii) and of the request made under Rule 20.5(e);

(v) where transmittals under Article 12(1) have already been made, notify the International Bureau and the International Searching Authority accordingly, and transmit a copy of the corrected first and last sheets of the request, the later submitted sheets marked under item (ii) and the request made under Rule 20.5(e) to the said Bureau and a copy thereof to the said Authority;

(vi) where transmittals under Article 12(1) have not yet been made, notify the International Bureau accordingly and attach the later submitted sheets marked under item (ii), the notice under Rule 20.6(a) and the request under Rule 20.5(e) to the record copy.

Section 310*ter*

Procedure in the Case of Later Submitted Sheets Furnished after the Expiration of the Applicable Time Limit Referred to in Rule 20.7

Where later submitted sheets referred to in Sections 309(a) or 310(a) are received after the expiration of the applicable time limit referred to in Rule 20.7, the receiving Office shall:

(i) notify the applicant of the fact and of the date of receipt of the later submitted sheets, and of the fact that they will not be considered for the PCT procedure;

(ii) indelibly mark, in the middle of the bottom margin of each sheet containing the missing element or part concerned, the words "NOT TO BE CONSIDERED (RULE 20.7)", or their equivalent in the language of publication of the international application;

(iii) keep in its files a copy of the later submitted sheets marked under item (ii) and, where applicable, of the notice under Rule 20.6(a);

(iv) where transmittals under Article 12(1) have already been made, notify the International Bureau accordingly, and transmit the later submitted sheets marked under item (ii) and, where applicable, the notice under Rule 20.6(a) to the said Bureau;

(v) where transmittals under Article 12(1) have not yet been made, notify the International Bureau accordingly, and attach the later submitted sheets marked under item (ii) and, where applicable, the notice under Rule 20.6(a) to the record copy.

Section 311

Renumbering in the Case of Deletion, Substitution or Addition of Sheets of the International Application and of the Translation Thereof

(a) The receiving Office shall, subject to Section 207, sequentially renumber the sheets of the

international application when necessitated by the addition of any new sheet, the deletion of entire sheets, a change in the order of the sheets or any other reason.

(b) The sheets of the international application shall be provisionally renumbered in the following manner:

(i) when a sheet is deleted, the receiving Office shall either include a blank sheet with the same number and with the word "DELETED," or its equivalent in the language of publication of the international application, below the number, or insert, in brackets, below the number of the following sheet, the number of the deleted sheet with the word "DELETED" or its equivalent in the language of publication of the international application;

(ii) when one or more sheets are added, each sheet shall be identified by the number of the preceding sheet followed by a slant and then by another Arabic numeral such that the additional sheets are numbered consecutively, starting always with number one for the first sheet added after an unchanged sheet (e.g., 10/1, 15/1, 15/2, 15/3, etc.); when later additions of sheets to an existing series of added sheets are necessary, an extra numeral shall be used for identifying the further additions (e.g., 15/1, 15/1/1, 15/1/2, 15/2, etc.).

(c) In the cases mentioned in paragraph (b), it is recommended that the receiving Office should write, below the number of the last sheet, the total number of the sheets of the international application followed by the words "TOTAL OF SHEETS" or their equivalent in the language of publication of the international application. It is further recommended that, at the bottom of any last sheet added, the words "LAST ADDED SHEET" or their equivalent in the language of publication of the international application should be inserted.

(d) Paragraphs (a) to (c) shall apply *mutatis mutandis* to any translation of the international application furnished under Rule 12.3 or 12.4.

Section 312

Notification of Decision Not to Issue Declaration that the International Application Is Considered Withdrawn

Where the receiving Office, after having notified the applicant under Rule 29.4 of its intent to issue a declaration under Article 14(4), decides not to issue such a declaration, it shall notify the applicant accordingly.

Section 313

Documents Filed with the International Application; Manner of Marking the Necessary Annotations in the Check List

(a) Any power of attorney, any priority document, any fee calculation sheet and any separate sheet referred to in Section 209(a) containing indications as to deposited biological material, filed with the international application shall accompany the record copy; any other document referred to in Rule 3.3(a)(ii) shall be sent only at the specific request of the International Bureau. If any document which is indicated in the check list as accompanying the international application is not, in fact, filed at the latest by the time the record copy leaves the receiving Office, that Office shall so note on the check list and the said indication shall be considered as if it had not been made.

(b) Where, under Rule 3.3(b), the receiving Office itself completes the check list, that Office shall enter, in the margin, the words "COMPLETED BY RO" or their equivalent in the language of publication of the international application. Where only some of the indications are completed by the receiving Office, the said words and each indication completed by that Office shall be identified by an asterisk.

(c) Any sequence listing not forming part of the international application, whether on paper or in electronic form, that is furnished for the purposes of the international search to the receiving Office together with the international application or subsequent to the filing of the international application, shall be transmitted to the International Searching Authority together with the search copy. Where such a sequence listing is received by the receiving Office after the transmittal of the search copy, that sequence listing shall be promptly transmitted to the International Searching Authority.

Section 314

Correction or Addition of a Priority Claim Under Rule 26*bis*

(a) Where the applicant, in a notice submitted to the receiving Office, corrects or adds a priority

claim under Rule 26*bis*, that Office shall enter the correction or addition in the request, draw a line through, while still leaving legible, any indication deleted as a result of the correction, and enter, in the margin, the letters "RO."

(b) The applicant and, if copies of the international application have already been sent to the International Bureau and the International Searching Authority, that Bureau and that Authority shall be promptly notified by the receiving Office of any correction or addition of a priority claim under Rule 26*bis* and of the date on which it received such correction or addition.

Section 315

[*Deleted*]

Section 316

Procedure in the Case Where the International Application Lacks the Prescribed Signature

Where, under Article 14(1)(a)(i), the receiving Office finds that the international application is defective in that it lacks the prescribed signature, that Office shall send to the applicant, together with the invitation to correct under Article 14(1)(b), a copy of the relevant sheet of the request part of the international application. The applicant shall, within the prescribed time limit, return said copy after affixing thereto the prescribed signature.

Section 317

Transmittal of a Notice of Correction or Addition of a Declaration under Rule 26*ter*.1

If a notice under Rule 26*ter*.1 is submitted by the applicant to the receiving Office, that Office shall mark the date of receipt on the notice and transmit it promptly to the International Bureau. The notice shall be considered to have been received by the International Bureau on the date marked.

Section 318

Cancellation of Designations of Non-Contracting States

The receiving Office shall cancel *ex officio* the designation of any State which is not a Contracting State, shall enclose that designation within square brackets, shall draw a line between the square brackets while still leaving the designation legible, shall enter, in the margin, the words "CANCELLED EX OFFICIO BY RO" or their equivalent in the language of publication of the international application, and shall promptly notify the applicant accordingly. If the record copy has already been sent to the International Bureau, the receiving Office shall also notify that Bureau.

Section 319

Procedure under Rule 4.9(b)

(a) Where the receiving Office finds that the request contains an indication under Rule 4.9(b) that the designation of a State is not made but the request does not contain a priority claim to an earlier national application filed in that State, the receiving Office shall promptly notify the applicant accordingly and shall draw the applicant's attention to Rule 26*bis*.

(b) If the receiving Office does not, before the expiration of the time limit under Rule 26*bis*.1(a), receive a notice correcting or adding a priority claim to an earlier national application filed in the State, the designation of which is not made, it shall cancel *ex officio* the indication under Rule 4.9(b), shall enclose that indication in square brackets, draw a line between the square brackets while still leaving the indication legible, enter, in the margins, the words "CANCELLED EX OFFICIO BY RO" or their equivalent in the language of publication of the international application, and promptly notify the applicant accordingly. If the record copy has already been sent to the International Bureau, the receiving Office shall also notify that Bureau.

Section 320

Invitation to Pay Fees under Rule 16*bis*.1(a)

When issuing an invitation under Rule 16*bis*.1(a), the receiving Office shall, if it received moneys from the applicant before the due date, inform the applicant of the fees to which those moneys have been applied.

Section 321

Application of Moneys Received by the Receiving Office in Certain Cases

(a) The receiving Office shall, to the extent that it has received instructions from the applicant as to

the fees to which it shall apply moneys received by it from the applicant, apply those moneys accordingly.

(b) Where the receiving Office receives moneys from the applicant which, together with any other moneys so received, are not sufficient to cover in full the transmittal fee (if any), the international filing fee and the search fee (if any), the receiving Office shall, to the extent that it has not received instructions from the applicant as to the fees to which it shall apply the moneys which are available for the purpose, apply those moneys in payment, successively, of the fees set out below to the extent that they are due and unpaid and in the order in which they appear below:

(i) the transmittal fee;

(ii) the international filing fee;

(iii) the search fee.

Section 322

Invitation to Submit a Request for Refund of the Search Fee

The receiving Office may, before making a refund of the search fee under Rule 16.2, first invite the applicant to submit a request for the refund.

Section 323

Transmittal of Priority Documents to International Bureau

(a) Any priority document which is submitted to the receiving Office under Rule 17.1(a) shall be transmitted by that Office to the International Bureau together with the record copy or, if received after the record copy has been sent to the International Bureau, promptly after having been received by that Office.

(b) Where the priority document is issued by the receiving Office and the applicant has, not later than 16 months after the priority date, requested the receiving Office under Rule 17.1(b) to prepare and transmit it to the International Bureau, the receiving Office shall, promptly after receipt of such request ("request for priority document") and, where applicable, the payment of the fee referred to in that Rule, transmit the priority document to the International Bureau. Where such request for priority document has been made but the required fee has not been paid, the receiving Office shall promptly notify the applicant that the request for priority document will be considered not to have been made unless the fee is paid not later than 16 months after the priority date or, in the case referred to in Article 23(2), not later than at the time the processing or examination of the international application is requested.

(c) When transmitting a priority document, the receiving Office shall notify the International Bureau of the date on which it received the priority document or the request for priority document.

(d) Where a request for priority document has, under paragraph (b), been considered not to have been made, the receiving Office shall promptly notify the International Bureau. Where the receiving Office fails to notify the International Bureau accordingly within 17 months from the priority date, the receiving Office shall prepare and transmit the priority document to the International Bureau even though the required fee has not been paid by the applicant.

(e) Where a request for priority document has been received by the receiving Office later than 16 months after the priority date, or where such request has, under paragraph (b), been considered not to have been made, the receiving Office shall promptly notify the applicant accordingly, directing attention to the requirements of Rule 17.1(a).

Section 324

Copy of Notification of the International Application Number and the International Filing Date under Rule 20.2(c)

The copy, sent to the International Bureau, of the notification of the international application number and the international filing date under Rule 20.2(c) shall also include, if the priority of an earlier application is claimed in the international application, the date of filing – as indicated in the international application – of that earlier application. If the priority of several earlier applications is claimed, the earliest filing date shall be indicated.

Section 325

Corrections of Defects under Rule 26.4, Rectifications of Obvious Mistakes under Rule 91, and Corrections under Rule 9.2

(a) Where the receiving Office receives a correction of defects under Rule 26.4 or authorizes a rectification of an obvious mistake under Rule 91, it shall:

(i) indelibly mark, in the upper right-hand corner of each replacement sheet, the international application number and the date on which that sheet was received;

(ii) indelibly mark, in the middle of the bottom margin of each replacement sheet, the words "SUBSTITUTE SHEET (RULE 26)" (where the replacement sheet contains a correction of defects under Rule 26) or "RECTIFIED SHEET (RULE 91)" (where the replacement sheet contains the rectification of an obvious mistake under Rule 91) or their equivalent in the language of publication of the international application;

(iii) indelibly mark on the letter containing the correction or rectification, or accompanying any replacement sheet, the date on which that letter was received;

(iv) keep in its files a copy of the letter containing the correction or rectification or, when the correction or rectification is contained in a replacement sheet, the replaced sheet, a copy of the letter accompanying the replacement sheet, and a copy of the replacement sheet;

(v) subject to item (vi), promptly transmit any letter and any replacement sheet to the International Bureau, and a copy thereof to the International Searching Authority;

(vi) where transmittals under Article 12(1) have not yet been made, transmit any letter and any replacement sheet to the International Bureau together with the record copy and, except where the international application is considered withdrawn and Rule 29.1(iii) applies, a copy of the said letter or replacement sheet to the International Searching Authority together with the search copy. The record copy and the search copy shall contain any replaced sheet.

(b) Where the receiving Office refuses to authorize the rectification of an obvious mistake under Rule 91, it shall proceed as indicated under paragraph (a)(i), (iii) and (iv) and promptly transmit any letter and any proposed replacement sheet to the International Bureau. If the record copy has not yet been sent to the International Bureau, any letter and any proposed replacement sheet shall be transmitted together with the record copy.

(c) Where the receiving Office receives corrections aimed at complying with Rule 9.1, paragraphs (a) and (b) shall apply *mutatis mutandis*, provided that, where a sheet is marked as indicated in paragraph (a)(ii), the words "SUBSTITUTE SHEET (RULE 9.2)" shall be used.

Section 326

Withdrawal by Applicant under Rule 90*bis*.1, 90*bis*.2 or 90*bis*.3

(a) The receiving Office shall promptly transmit to the International Bureau any notice from the applicant effecting withdrawal of the international application under Rule 90*bis*.1, of a designation under Rule 90*bis*.2 or of a priority claim under Rule 90*bis*.3 which has been filed with it together with an indication of the date of receipt of the notice. If the record copy has not yet been sent to the International Bureau, the receiving Office shall transmit the said notice together with the record copy.

(b) If the search copy has already been sent to the International Searching Authority and the international application is withdrawn under Rule 90*bis*.1 or a priority claim is withdrawn under Rule 90*bis*.3, the receiving Office shall promptly transmit a copy of the notice effecting withdrawal to the International Searching Authority.

(c) If the search copy has not yet been sent to the International Searching Authority and the international application is withdrawn under Rule 90*bis*.1, the receiving Office shall not send the search copy to the International Searching Authority and shall, subject to Section 322, refund the search fee to the applicant unless it has already been transferred to the International Searching Authority. If the search fee has already been transferred to the International Searching Authority, the receiving Office shall send a copy of the request and of the notice effecting withdrawal to that Authority.

(d) If the search copy has not yet been sent to the International Searching Authority and a priority claim is withdrawn under Rule 90*bis*.3, the receiving Office shall transmit a copy of the notice effecting withdrawal to the International Searching Authority together with the search copy.

Section 327

Ex Officio Correction of Request by the Receiving Office

(a) Subject to paragraph (d), where the record copy has not yet been sent to the International Bureau and the request requires correction because it contains an inconsistency or a minor defect such as non-compliance with the requirement for indications under Section 115, the receiving Office may correct the request *ex officio*. If the receiving Office does so, it shall notify the applicant accordingly.

(b) When making a correction under paragraph (a), the receiving Office shall enter, in the margin, the letters "RO." Where any matter is to be deleted, the receiving Office shall enclose such matter within square brackets and shall draw a line between the square brackets while still leaving the deleted matter legible. Where any matter is to be replaced, both the first and second sentences of this paragraph shall apply.

(c) The receiving Office shall check the number of characters of the file reference, if any, and shall delete any characters beyond the number permitted by Section 109.

(d) The receiving Office shall not make any *ex officio* correction to declarations referred to in Rule 4.17 which are contained in the request.

Section 328

Notifications Concerning Representation

(a) Where a power of attorney or a document containing the revocation or renunciation of an appointment is submitted to the receiving Office and the record and search copies have already been transmitted, the receiving Office shall immediately notify the International Bureau and the International Searching Authority by sending them a copy of the power of attorney or document and request the International Bureau to record a change in the indications concerning the agent or common representative under Rule 92*bis*.1(a)(ii).

(b) If the record copy and/or search copy have not yet been transmitted by the receiving Office, a copy of the power of attorney or document containing the revocation or renunciation of an appointment shall be transmitted by the receiving Office with the record copy and/or search copy.

Section 329

Correction of Indications Concerning the Applicant's Residence or Nationality

Where, in response to an invitation to correct a defect under Article 11 (1)(i), evidence is submitted indicating to the satisfaction of the receiving Office that, in fact, the applicant had, on the date on which the international application was actually received, the right to file an international application with that receiving Office, the invitation shall be considered to be an invitation to correct a defect under Article 14 (1)(a)(ii) and Rule 4.5 in the prescribed indications concerning the applicant's residence and/or nationality, and the applicant may correct those indications accordingly. If such correction is made, no defect shall be considered to exist under Article 11 (1)(i).

Section 330

Transmittal of Record Copy Prevented or Delayed by National Security Prescriptions

(a) Where prescriptions concerning national security prevent the transmittal of the record copy by the receiving Office to the International Bureau under Rule 22.1(a), the receiving Office shall notify the applicant and the International Bureau accordingly**.**

(b) The notifications under paragraph (a) shall be sent before the expiration of 13 months from the priority date. Where the receiving Office believes that national security clearance is imminent, it may postpone the sending of the notifications, but shall send them before the expiration of 17 months from the priority date if no clearance has been given by that time.

Section 331

Receipt of Confirmation Copy

Where, subject to Rule 92.4, the receiving Office receives an international application by facsimile machine transmission and subsequently receives the original of that international application, it shall mark such original with the words "CONFIRMATION COPY" or their equivalent in the language of publication of the international application on the bottom of the first page of the request and on the first page of the description. The marking under Section 325 is not required in such a case. The international application as received by facsimile machine transmission shall

constitute the record copy. The confirmation copy shall be transmitted to the International Bureau in addition to the record copy.

Section 332

Notification of Languages Accepted by the Receiving Office under Rules 12.1(a) and (c) and 12.4(a)

(a) Each receiving Office shall notify the International Bureau of the language or languages which, having regard to Rule 12.1(b), it is prepared to accept under Rule 12.1(a) for the filing of international applications.

(b) Each receiving Office shall notify the International Bureau of any change to the information notified under paragraphs (a), (d) and (e). If the change means that

(i) the receiving Office is no longer prepared to accept the filing of international applications in a language that it had previously notified the International Bureau that it was prepared to accept; or

(ii) the receiving Office is no longer prepared to accept the translation of international applications into a language of publication that it had previously notified the International Bureau that it was prepared to accept; or

(iii) the receiving Office is no longer prepared to accept the filing of requests in a language that it had previously notified the International Bureau that it was prepared to accept,

the effective date of such change shall be two months after the date of publication of the notification of the change in the Gazette pursuant to Section 405 or such later date as may be determined by the receiving Office.

(c) Nothing in paragraph (a), (b), (d) or (e) prevents any receiving Office from accepting, in a particular case,

(i) the filing of an international application in a language that it has not notified the International Bureau that it is prepared to accept; or

(ii) the translation of an international application into a language of publication that it has not notified the International Bureau that it is prepared to accept; or

(iii) the filing of a request in a language that it has not notified the International Bureau that it is prepared to accept.

(d) Each receiving Office concerned shall notify the International Bureau of the language or languages which it is prepared to accept under Rule 12.4(a) for the translation of international applications into a language of publication.

(e) Each receiving Office shall notify the International Bureau of the language or languages which it is prepared to accept under Rule 12.1(c) for the filing of requests.

Section 333

Transmittal of International Application to the International Bureau as Receiving Office

(a) Where a national Office intends to proceed under Rule 19.4(b) having regard to Rule 19.4(a)(i) or (ii), it shall, if it requires payment of the fee referred to in Rule 19.4(b) and that fee has not already been paid, promptly invite the applicant to pay that fee within a time limit of 15 days from the date of the invitation.

(b) Where a national Office intends to proceed under Rule 19.4(b) having regard to Rule 19.4(a)(iii), it shall promptly request the International Bureau as receiving Office to agree to the transmittal of the international application. The International Bureau as receiving Office shall promptly respond to that request. If the International Bureau as receiving Office agrees to the transmittal, the national Office shall promptly invite the applicant:

(i) if the transmittal has not already been authorized by the applicant, to submit to that Office, within a time limit of 15 days from the date of the invitation, an authorization of the transmittal, and,

(ii) if the Office requires payment of the fee referred to in Rule 19.4(b) and that fee has not already been paid, to pay that fee within the time limit referred to in item (i).

(c) The national Office:

(i) need not proceed under Rule 19.4(b) having regard to Rule 19.4(a)(i) to (iii) if the Office requires payment of the fee referred to in Rule 19.4(b) and the applicant does not pay that fee;

(ii) shall not proceed under Rule 19.4(b) having regard to Rule 19.4(a)(iii) if the International Bureau as receiving Office does not agree to, or if the applicant does not authorize, the transmittal of the international application under Rule 19.4(a)(iii).

Section 334

Notification to Applicant of Submission of Demand after the Expiration of 19 Months from the Priority Date

Where the demand is submitted after the expiration of 19 months from the priority date to a receiving Office and the time limit under Article 22 (1), as in force from April 1 2002, does not apply in respect of all designated Offices, the receiving Office shall:

(i)promptly notify the applicant accordingly, directing attention to the fact that the time limit under Article 39(1)(a) does not apply, and that Article 22(1), as in force until March 31, 2002, continues to apply in respect of any such designated Office, and

(ii)proceed under Rule 59.3.

Section 335

Transmittal of PCT-EASY Request Data and Abstract

The request data and abstract contained on a PCT-EASY physical medium furnished to the receiving Office in accordance with Section 102*bis* shall be transmitted by that Office to the International Bureau, in a form and manner agreed upon by that Office and that Bureau, at the same time as the record copy.

Section 336

Waivers under Rules 90.4(d) and 90.5(c)

(a) Where, in accordance with Rule 90.4(d), a receiving Office waives the requirement under Rule 90.4(b) that a separate power of attorney be submitted to it, the receiving Office shall notify the International Bureau accordingly.

(b) Where, in accordance with Rule 90.5(c), a receiving Office waives the requirement under Rule 90.5(a)(ii) that a copy of a general power of attorney be attached to the request or any separate notice, the receiving Office shall notify the International Bureau accordingly.

(c) A receiving Office may require a separate power of attorney, or a copy of a general power of attorney, in particular instances even if the receiving Office has waived the requirement in general.

(d) A receiving Office which has notified the International Bureau under paragraph (a) or (b) shall notify the International Bureau of any change to the information notified under those paragraphs.

Section 337

Transmittal of copy of results of earlier search

Where the applicant has

(i) submitted a copy of the results of an earlier search to the receiving Office under Rule 12*bis*.1(a) together with the international application; or

(ii) requested the receiving Office under Rule 12*bis*.1(c) to prepare and transmit a copy of the results of the earlier search, a copy of the earlier application concerned and/or a copy of any document cited in the results of the earlier search;

the receiving Office shall promptly transmit any such copy to the International Searching Authority, preferably together with the search copy.

PART 4

INSTRUCTIONS RELATING TO THE INTERNATIONAL BUREAU

Section 401

Marking of the Sheets of the Record Copy

(a) The International Bureau shall, upon receipt of the record copy, mark the date of receipt of the record copy in the appropriate space on the request.

(b) If the receiving Office has failed to mark any sheet as provided in Sections 311 and 325, the marking which has not been made may be inserted by the International Bureau.

Section 402

Correction or Addition of a Priority Claim under Rule 26*bis*

(a) Where the applicant, in a notice submitted to the International Bureau, corrects or adds a priority claim under Rule 26*bis*, that Bureau shall enter the correction or addition in the request, draw a line through, while still leaving legible, any indication deleted as a result of the correction, and enter, in the margin, the letters "IB".

(b) [Deleted]

(c) The applicant, the receiving Office and the International Searching Authority shall be promptly notified by the International Bureau of any correction or addition of a priority claim under Rule 26*bis* and of the date on which it received such correction or addition.

(d) [Deleted]

Section 403

Transmittal of Protest Against Payment of Additional Fees and Decision Thereon Where International Application Is Considered to Lack Unity of Invention

Where, under Rules 40.2(c) or 68.3(c), the International Bureau receives a request from the applicant to forward to any designated or elected Office the texts of both the protest against payment of additional fees as provided for in Articles 17(3)(a) and 34(3)(a) where the international application is considered to lack unity of invention and the decision thereon by the International Searching Authority or the International Preliminary Examining Authority, as the case may be, it shall proceed according to such request.

Section 404

International Publication Number of International Application

The International Bureau shall assign to each published international application an international publication number which shall be different from the international application number. The international publication number shall be used on the published international application and in the Gazette entry. It shall consist of the two-letter code "WO" followed by a four-digit indication of the year of publication, a slant, and a serial number consisting of six digits (e.g., "WO 2004/123456").

Section 405

Publication of Notifications of Languages Accepted by the receiving Office under Rules 12.1(a) and (c) and 12.4(a)

The International Bureau shall promptly publish in the Gazette any notification under Section 332(a), (b), (d), or (e).

Section 406

Publication of International Applications

(a) International applications shall be published on a given day of the week.

(b) International applications may be published, for the purposes of Article 21, on paper or wholly or partly in electronic form.

(c) Details concerning the publication of international applications, and the form and particulars of the front page of each published international application, shall be decided by the Director General, after consultation with the Offices or Authorities which have a direct interest in those details.

Section 407

The Gazette

(a) The Gazette referred to in Rule 86.1 shall be published in electronic form on the Internet. It may be made available by any other electronic means as determined by the Director General after consultation with the Offices or Authorities which have a direct interest in the means by which the Gazette is published.

(b) In addition to the contents specified in Rule 86.1, the Gazette shall contain, in respect of each published international application, the data indicated in Annex D.

(c) The information referred to in Rule 86.1(a)(v) shall be that which is indicated in Annex E.

(d) Details concerning the form and further particular content of the Gazette shall be decided by the Director General after consultation with Offices and Authorities which have a direct interest in those details.

Section 408

Priority Application Number

(a) [Deleted]

(b) If the number of the earlier application referred to in Rule 4.10(a)(ii) ("priority application number") is furnished after the expiration of the prescribed time limit, the International Bureau shall inform the applicant and the designated Offices of the date on which the said number was furnished. It shall indicate the said date in the international publication by including on the front page of the published international application next to the priority application number the words "FURNISHED LATE ON... (date)," and the equivalent of such words in the language in which the international application is published if that language is other than English.

(c) If the priority application number has not been furnished at the time of the completion of the technical preparations for international publication, the International Bureau shall indicate that fact by including on the front page of the published international application in the space provided for the priority application number the words "NOT FURNISHED" and the equivalent of such words in the language in which the international application is published if that language is other than English.

Section 409

Priority Claim Considered Not to Have Been Made

Where the International Bureau declares, under Rule 26*bis*.2(b), that a priority claim is considered not to have been made, that Bureau shall enclose the priority claim concerned within square brackets, draw a line between the square brackets, while still leaving legible the indications concerned, and enter, in the margin, the words "NOT TO BE CONSIDERED FOR PCT PROCEDURE (IB)" or their equivalent in the language of publication of the international application, and shall notify the applicant accordingly. The International Bureau shall also notify the receiving Office and the International Searching Authority.

Section 410

Numbering of Sheets for the Purposes of International Publication; Procedure in Case of Missing Sheets

(a) In the course of preparing the international application for international publication, the International Bureau shall sequentially renumber the sheets to be published only when necessitated by the addition of any new sheet, the deletion of entire sheets or a change in the order of the sheets. Otherwise, the numbering provided under Section 207 shall be maintained.

(b) Where a sheet has not been filed or is not to be taken into consideration for the purposes of international processing under Section 310*bis* or 310*ter*, the International Bureau shall include an indication to that effect in the published international application.

Section 411

Receipt of Priority Document

(a) The International Bureau shall, in respect of any priority document received by it, record the date on which the priority document has been received by it, and notify the applicant and the designated Offices accordingly. The notification should indicate whether the priority document was or was not submitted or transmitted in compliance with Rule 17.1(a) or (b), and with respect to the designated Offices, should preferably be made together with the notification under Rule 47.1(a-*bis*).

(b) Where the priority document has been submitted or transmitted but not in compliance with Rule 17.1(a) or (b), the International Bureau shall, in the notification under paragraph (a) of this Section, direct the attention of the applicant and the designated Offices to the provisions of Rule 17.1(c).

Section 411*bis*

Receipt of Translation of Earlier Application under Rule 20.6(a)(iii)

The International Bureau shall indicate the words "TRANSLATION (RULE 20.6(a)(iii))", or their equivalent in French, on any translation received under Rule 20.6(a)(iii).

Section 412

Notification of Lack of Transmittal of Search Copy

If the International Bureau does not receive from the International Searching Authority a notification under Rule 25.1 within two months from the date of receipt of the record copy, the International Bureau shall remind the receiving Office to transmit the search copy to the International Searching Authority. A copy of the reminder shall be sent to the International Searching Authority.

Section 413

Incorporations by Reference under Rule 20, Corrections of Defects under Rule 26.4, Rectifications of Obvious Mistakes under Rule 91, and Corrections under Rule 9.2

(a) Where the International Bureau receives from the receiving Office a letter containing a correction of any defects under Rule 26.4, or a replacement sheet and the letter accompanying it, the International Bureau shall transfer the correction to the record copy, together with the indication of the date on which the receiving Office received the letter, or shall insert the replacement sheet in the record copy. Any letter and any replaced sheet shall be kept in the file of the international application.

(b) Paragraph (a) shall apply *mutatis mutandis* to rectifications of obvious mistakes under Rule 91 authorized by the receiving Office, by the International Searching Authority or, where a demand has been made, by the International Preliminary Examining Authority and to corrections submitted by the applicant to the receiving Office or the International Searching Authority aimed at complying with the prescription of Rule 9.1 concerning certain expressions, drawings, statements or other matter.

(b-*bis*) Where the International Bureau receives from the receiving Office, under Sections 309(c)(iv), 310(b)(iv), or 310*bis*(b)(v), corrected sheets of the request or later submitted sheets, the International Bureau shall transfer any correction to the record copy and insert any later submitted sheets in the record copy.

(c) Where the International Bureau is notified by the International Searching Authority under Rule 43.6*bis*(b) that the rectification of an obvious mistake authorized under Rule 91 has not been taken into account for the purposes of the international search, the International Bureau shall notify the applicant, the designated Offices and, where a demand has been made, the International Preliminary Examining Authority accordingly.

(d) Where the International Bureau is notified by the International Preliminary Examining Authority under Rule 70.2(e) that the rectification of an obvious mistake authorized under Rule 91 has not been taken into account for the purposes of the international preliminary examination, the International Bureau shall notify the applicant and the elected Offices accordingly.

Section 413*bis*

Rectifications of Obvious Mistakes under Rule 91

(a) Where the International Bureau authorizes a rectification under Rule 91, it shall:

(i) indelibly mark, in the upper right-hand corner of each replacement sheet, the international application number and the date on which that sheet was received;

(ii) indelibly mark, in the middle of the bottom margin of each replacement sheet, the words "RECTIFIED SHEET (RULE 91)" or their equivalent in the language of publication of the international application;

(iii) indelibly mark on the letter containing the rectification or accompanying any replacement sheet the date on which that letter was received;

(iv) keep in its files a copy of the letter containing the rectification or, when the rectification is

contained in a replacement sheet, the replaced sheet, a copy of the letter accompanying the replacement sheet, and a copy of the replacement sheet.

(b) Where the International Bureau refuses to authorize a rectification under Rule 91, it shall proceed as indicated under paragraph (a)(i), (iii) and (iv).

(c) Where the International Bureau authorizes or refuses to authorize the rectification of an obvious mistake under Rule 91, it shall notify the applicant, the International Searching Authority, where a demand has been made, the International Preliminary Examining Authority, as well as the designated or elected Offices accordingly and, where the International Bureau refuses to authorize a rectification, the notification shall also include the reasons for the refusal.

Section 414

Notification to the International Preliminary Examining Authority Where the International Application is Considered Withdrawn

If a demand has been submitted and the international application is considered withdrawn under Article 14(1), (3) or (4), the International Bureau shall promptly notify the International Preliminary Examining Authority, unless the international preliminary examination report has already issued.

Section 415

Notification of Withdrawal Under Rule 90*bis*.1, 90*bis*.2, 90*bis*.3 or 90*bis*.4

(a) The fact of withdrawal by the applicant of the international application under Rule 90*bis*.1, of designations under Rule 90*bis*.2, or of a priority claim under Rule 90*bis*.3, together with the date on which the notice effecting withdrawal reached the International Bureau, the International Preliminary Examining Authority or the receiving Office, shall be recorded by the International Bureau and promptly notified by it to the receiving Office, the applicant, the designated Offices affected by the withdrawal and, where the withdrawal concerns the international application or a priority claim and where the international search report, or the declaration referred to in Article 17(2)(a), and the written opinion of the International Searching Authority have not yet issued, the International Searching Authority. However, where the withdrawal concerns the international application and where the notice effecting withdrawal was filed with the receiving Office before the sending of the record copy to the International Bureau, that Bureau shall send the notifications referred to in the preceding sentence and in Rule 24.2(a) to the receiving Office and the applicant only.

(b) If, at the time of the withdrawal of the international application under Rule 90*bis*.1, or of a priority claim under Rule 90*bis*.3, a demand has already been submitted and the international preliminary examination report has not yet issued, the International Bureau shall, unless the notice effecting withdrawal was submitted to the International Preliminary Examining Authority, promptly notify the fact of withdrawal to that Authority, together with the date on which the notice effecting withdrawal has reached the International Bureau or the receiving Office.

(c) The fact of withdrawal by the applicant of the demand or of one or more elections under Rule 90*bis*.4, together with the date on which the notice effecting withdrawal was, or was considered to have been, submitted to the International Bureau, shall be promptly notified by that Bureau:

(i) to the applicant,

(ii) to each elected Office affected by the withdrawal, except where it has not yet been notified of its election, and

(iii) in the case of withdrawal of the demand or of all elections, to the International Preliminary Examining Authority, unless the notice effecting withdrawal was submitted to that Authority.

Section 416

Correction of Request in Record Copy

(a) Where the request requires correction as a consequence of the withdrawal of a designation or of a change made under Rule 92*bis*, the International Bureau shall make the necessary correction in the record copy and shall notify the applicant and the receiving Office accordingly.

(b) When making a correction under paragraph (a), the International Bureau shall enter, in the margin, the letters "IB." Where the correction involves the deletion or replacement of some matter, the International Bureau shall enclose such matter within square brackets and shall draw a line between the square

brackets while still leaving the deleted or replaced matter legible.

Section 417

Processing of Amendments Under Article 19

(a) The International Bureau shall record the date on which, under Rule 46.1, any amendment made under Article 19 was received, shall notify the applicant of that date and indicate it in any publication or copy issued by it.

(b) The International Bureau shall mark, in the upper right-hand corner of each replacement sheet submitted under Rule 46.5(a), the international application number, the date on which that sheet was received under Rule 46.1 and, in the middle of the bottom margin, the words "AMENDED SHEET (ARTICLE 19)." It shall keep in its files any replaced sheet, the letter accompanying the replacement sheet or sheets, and any letter referred to in the last sentence of Rule 46.5(a).

(c) The International Bureau shall insert any replacement sheet in the record copy and, in the case referred to in the last sentence of Rule 46.5(a), shall indicate the cancellations in the record copy.

(d) If, at the time when the demand is received by the International Bureau, the international search report and the written opinion of the International Searching Authority have been established and no amendments under Article 19 have been made, the International Bureau shall inform the International Preliminary Examining Authority accordingly, unless the Authority has informed the International Bureau that it wishes not to be so notified.

Section 418

Notifications to Elected Offices Where the Demand Is Considered Not to Have Been Submitted or Made

Where, after any elected Office has been notified of its election under Article 31(7), the demand is considered not to have been submitted or made, the International Bureau shall notify the said Office accordingly.

Section 419

Processing of a Declaration under Rule 26*ter*

(a) Where any declaration referred to in Rule 4.17, or any correction thereof under Rule 26*ter*.1, is submitted to the International Bureau within the time limit under Rule 26*ter*.1, the International Bureau shall indicate the date on which it received the declaration or correction and insert the additional sheet or replacement sheet in the record copy.

(b) The International Bureau shall promptly notify the applicant, the receiving Office and the International Searching Authority of any declaration corrected or added under Rule 26*ter*.1.

(c) The International Bureau shall not make any *ex officio* correction to declarations referred to in Rule 4.17 which are contained in the request.

(d) Where any declaration referred to in Rule 4.17, or any correction thereof under Rule 26*ter*.1, is submitted to the International Bureau after the expiration of the time limit under Rule 26*ter*.1, the International Bureau shall notify the applicant accordingly and inform the applicant that such a declaration or correction should be submitted directly to the designated Office or Offices concerned. Any declaration referred to in Rule 4.17(iv), signed as prescribed in Section 214, which is submitted to the International Bureau after the expiration of the time limit under Rule 26*ter*.1 shall be returned to the applicant.

Section 420

Copy of International Application and International Search Report for the International Preliminary Examining Authority

Where the International Preliminary Examining Authority is not part of the same national Office or intergovernmental organization as the International Searching Authority, the International Bureau shall, promptly upon receipt of the international search report or, if the demand was received after the international search report, promptly upon receipt of the demand, send a copy of the international application and the international search report to the International Preliminary Examining Authority. In cases where, instead of the international search report, a declaration under Article 17(2)(a) was issued, references in the preceding sentence to the international search report shall be considered references to the said declaration.

Section 421

Invitation to Furnish a Copy of the Priority Document

Where a request for a copy of the application whose priority is claimed in the international application is made under Rule 43*bis*.1(b) by the International Searching Authority or, under Rule 66.7(a), by either the International Searching Authority, or the International Preliminary Examining Authority before the International Bureau has received the priority document under Rule 17.1, the International Bureau shall, unless the applicable time limit referred to in Rule 17.1(a) has already expired, inform the applicant of such request and remind him of the requirements of Rule 17.1.

Section 422

Notifications Concerning Changes Recorded Under Rule 92*bis*.1

(a) The International Bureau shall give notifications concerning changes recorded by it under Rule 92*bis*.1(a), except changes which are the subject of notifications under Section 425:

(i) to the receiving Office;

(ii) as long as the international search report, or the declaration referred to in Article 17(2)(a), and the written opinion of the International Searching Authority have not been established, to the International Searching Authority;

(iii) to the designated Offices unless the change can be duly reflected in the published international application used for the purposes of the communication under Article 20;

(iv) as long as the international preliminary examination report has not been established, to the International Preliminary Examining Authority;

(v) to the elected Offices, unless the change can be duly reflected in the published international application used for the purposes of the communication under Article 20;

(vi) to the applicant; where the change consists of a change in the person of the applicant, the notification shall be sent to the earlier applicant and the new applicant, provided that, where the earlier applicant and the new applicant are represented by the same agent, one notification only shall be sent to the said agent.

(b) Where Rule 92*bis*.1(b) applies, the International Bureau shall notify the applicant accordingly and, if the change was requested by the receiving Office, that Office.

Section 422*bis*

Objections Concerning Changes in the Person of the Applicant Recorded under Rule 92*bis*.1(a)

(a) Where a change recorded by the International Bureau under Rule 92*bis*.1(a):

(i) consists of a change in the person of the applicant, and

(ii) the request under Rule 92*bis*.1(a) was not signed by or on behalf of both the earlier and the new applicant, and

(iii) the earlier applicant objects to the change in writing,

the change under Rule 92*bis*.1(a) shall be considered as if it had not been recorded.

(b) Where paragraph (a) applies, the International Bureau shall notify all those who received a notification under Section 422(a) accordingly.

Section 423

Cancellation of Designations and Elections

(a) The International Bureau shall, if the receiving Office has failed to do so, cancel *ex officio* the designation of any State which is not a Contracting State, shall enclose that designation within square brackets, draw a line between the square brackets while still leaving the designation legible, enter, in the margin, the words "CANCELLED EX OFFICIO BY IB" or their equivalent in French, and notify the applicant and the receiving Office accordingly.

(b) The International Bureau shall cancel *ex officio*:

(i) the election of any State which is not a designated State;

(ii) the election of any State not bound by Chapter II of the Treaty, if the International Preliminary Examining Authority has failed to do so.

(c) The International Bureau shall enclose the cancelled election within square brackets, draw a line between the square brackets while still leaving the election legible, enter, in the margin, the words "CANCELLED EX OFFICIO BY IB" or their equivalent in French, and notify the applicant and, if the

election is in the demand, the International Preliminary Examining Authoring accordingly.

Section 424

Procedure under Rule 4.9(b)

(a) Where the International Bureau finds, if the Receiving Office has failed to do so, that the request contains an indication under Rule 4.9(b) that the designation of a State is not made but the request does not contain a priority claim to an earlier national application filed in that State, the International Bureau shall promptly notify the applicant accordingly and shall draw the applicant's attention to Rule 26*bis*.

(b) If the International Bureau does not, before the expiration of the time limit under Rule 26bis.1(a), receive a notice correcting or adding a priority claim to an earlier national application filed in the State, the designation of which is not made, it shall cancel *ex officio* the indication under Rule 4.9(b), shall enclose that indication in square brackets, draw a line between the square brackets while still leaving the indication legible, enter, in the margins, the words "CANCELLED EX OFFICIO BY IB" or their equivalent in French, and notify the applicant and the receiving Office accordingly.

Section 425

Notifications Concerning Representation

Where a power of attorney or a document containing the revocation or renunciation of an appointment is submitted to the International Bureau, the International Bureau shall immediately notify the receiving Office, the International Searching Authority and the International Preliminary Examining Authority by sending them a copy of the power of attorney or document and shall record a change in the indications concerning the agent or common representative under Rule 92*bis*. In the case of a renunciation of an appointment, the International Bureau shall also notify the applicant. Where the International Bureau receives a notification concerning representation under Section 328, it shall immediately notify the International Preliminary Examining Authority accordingly.

Section 426

[*Deleted*]

Section 427

[*Deleted*]

Section 428

[*Deleted*]

Section 429

[*Deleted*]

Section 430

Notification of Designations under Rule 32

Where the effects of any international application are extended to a successor State under Rule 32.1(a), the International Bureau shall promptly, but not before the international publication of the international application, effect the communication under Article 20 to the designated Office concerned, and notify that Office under Rule 47.1(a-*bis*)

Section 431

Publication of Notice of Submission of Demand

(a) For international applications in respect of which a demand is filed before January 1, 2004, the publication in the Gazette of information on the demand and the elected States concerned, as referred to in Rule 61.4, as in force until December 31, 2003, shall consist of a notice indicating that a demand has been submitted prior to the expiration of 19 months from the priority date and, as applicable, indicating that all eligible States have been elected or, where not all eligible States have been elected, indicating those eligible States which have not been elected.

(b) For international applications in respect of which a demand is filed on or after January 1, 2004, the publication in the Gazette of information on the demand and the elected States concerned, as referred to in Rule 61.4, as in force from January 1, 2004, shall consist of a notice indicating that a demand has been submitted prior to the expiration of the applicable time limit under Rule 54*bis*.1(a) and that all Contracting States which were designated and were bound by Chapter II of the Treaty have been elected. Where the

demand is made subsequent to the expiration of 19 months from the priority date and the time limit under Article 22(1), as in force from April 1, 2002, does not apply in respect of all designated Offices, the notice shall also indicate that fact.

Section 432

Notification to Applicant of Submission of Demand after the Expiration of 19 Months from the Priority Date

Where the demand is submitted after the expiration of 19 months from the priority date and subsequently transmitted to the International Bureau under Rule 59.3(a), or is submitted after the expiration of 19 months from the priority date to the International Bureau, and the time limit under Article 22(1), as in force from April 1, 2002, does not apply in respect of all designated Offices, the International Bureau shall, together with the notification sent to the applicant under Rule 59.3(c)(i) or the invitation sent to the applicant under Rule 59.3(c)(ii), as the case may be:

(i) promptly notify the applicant accordingly, directing attention to the fact that the time limit under Article 39(1)(a) does not apply, and that Article 22(1), as in force until March 31, 2002, continues to apply in respect of any such designated Office,

(ii) proceed under Rule 59.3.

Section 433

Waivers under Rule 90.4(d)

(a) Where, in accordance with Rule 90.4(d), the International Bureau waives the requirement under Rule 90.4(b) that a separate power of attorney be submitted to it, the International Bureau shall publish a notice of this fact in the Gazette.

(b) The International Bureau may require a separate power of attorney in particular instances even if the International Bureau has waived the requirement in general.

Section 434

Publication of Information Concerning Waivers under 90.4(d) and 90.5(c)

(a) Any waivers of the requirement under Rule 90.4(b) that a separate power of attorney be submitted, or any changes to the information, notified to the International Bureau under Sections 336(a), 517(a), or 617(a) shall be promptly published in the Gazette. The effective date of any change shall be two months after the date of publication of the change in the Gazette, or such later date as may be determined by the International Bureau.

(b) Any waivers of the requirement under Rule 90.5(a)(ii) that a copy of a general power of attorney be attached to the request, the demand or any separate notice, or any changes to the information, notified to the International Bureau under Sections 336(b), 517(b), or 617(b) shall be promptly published in the Gazette. The effective date of any change shall be two months after the date of publication of the change in the Gazette, or such later date as may be determined by the International Bureau.

Section 435

Communication of Publications and Documents

(a) Subject to paragraph (b), publications under Rule 87.1 and documents under Rule 93*bis*.1 shall be communicated in electronic form via the International Bureau's electronic data exchange services.

(b) Where so agreed between the International Bureau and the Authority or Office concerned, publications under Rule 87.1 and documents under Rule 93bis.1 may be communicated in other forms and by other means.

(c) Pursuant to Rule 93*bis*.1(b), where so agreed between the International Bureau and the Office concerned, the communication of documents under Rule 93*bis*.1 shall be considered to be effected at the time when the International Bureau makes the document available to that Office in electronic form via the International Bureau's electronic data exchange services.

(d) Technical details concerning the communication of publications under Rule 87.1 and of documents under Rule 93*bis*.1 shall be agreed between the International Bureau and the Authority or Office concerned.

PART 5

INSTRUCTIONS RELATING TO THE INTERNATIONAL SEARCHING AUTHORITY

Section 501

Corrections Submitted to the International Searching Authority Concerning Expressions, Etc., Not to Be Used in the International Application

Where the International Searching Authority receives corrections aimed at complying with Rule 9.1, Section 511 shall apply *mutatis mutandis*, provided that, where a sheet is marked as indicated in Section 511(a)(ii), the words "SUBSTITUTE SHEET (RULE 9.2)" shall be used.

Section 502

Transmittal of Protest against Payment of Additional Fees and Decision Thereon Where International Application Is Considered to Lack Unity of Invention

The International Searching Authority shall transmit to the applicant, preferably at the latest together with the international search report, any decision which it has taken under Rule 40.2(c) on the protest of the applicant against payment of additional fees where the international application is considered to lack unity of invention. At the same time, it shall transmit to the International Bureau a copy of both the protest and the decision thereon, as well as any request by the applicant to forward the texts of both the protest and the decision thereon to the designated Offices.

Section 503

Method of Identifying Documents Cited in the International Search Report and the Written Opinion of the International Searching Authority

Identification of any document cited in the international search report shall be as provided in WIPO Standard ST.14 (Recommendation for the Inclusion of References Cited in Patent Documents).[4] Any document cited in the international search report may be referred to in a shortened form in the written opinion of the International Searching Authority, provided that the reference to the document is unambiguous.

Section 504

Classification of the Subject Matter of the International Application

(a) Where the subject matter of the international application is such that classification thereof requires more than one classification symbol according to the principles to be followed in the application of the International Patent Classification to any given patent document, the international search report shall indicate all such symbols.

(b) Where any national classification system is used, the international search report may indicate all the applicable classification symbols also according to that system.

(c) Where the subject matter of the international application is classified both according to the International Patent Classification and to any national classification system, the international search report shall, wherever possible, indicate the corresponding symbols of both classifications opposite each other.

(d) The version of the International Patent Classification applicable at the time the international application is published under Article 21 shall be used whenever feasible.

Section 505

Indication of Citations of Particular Relevance in the International Search Report

(a) Where any document cited in the international search report is of particular relevance, the special indication required by Rule 43.5(c) shall consist of the letter(s) "X" and/or "Y" placed next to the citation of the said document.

[4] *Editor's Note:* Published in the *WIPO Handbook on Industrial Property Information and Documentation.*

(b) Category "X" is applicable where a document is such that when taken alone, a claimed invention cannot be considered novel or cannot be considered to involve an inventive step.

(c) Category "Y" is applicable where a document is such that a claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art.

Section 506

[*Deleted*]

Section 507

Manner of Indicating Certain Special Categories of Documents Cited in the International Search Report

(a) Where any document cited in the international search report refers to an oral disclosure, use, exhibition, or other means referred to in Rule 33.1(b), the separate indication required by that Rule shall consist of the letter "O" placed next to the citation of the said document.

(b) Where any document cited in the international search report is a published application or patent as defined in Rule 33.1(c), the special mention required by that Rule shall consist of the letter "E" placed next to the citation of the said document.

(c) Where any document cited in the international search report is not considered to be of particular relevance requiring the use of categories "X" and/or "Y" as provided in Section 505 but defines the general state of the art, it shall be indicated by the letter "A" placed next to the citation of the said document.

(d) Where any document cited in the international search report is a document whose publication date occurred earlier than the international filing date of the international application, but later than the priority date claimed in that application, it shall be indicated by the letter "P" next to the citation of the said document.

(e) Where any document cited in the international search report is a document whose publication date occurred after the filing date or the priority date of the international application and is not in conflict with the said application, but is cited for the principle or theory underlying the invention, which may be useful for a better understanding of the invention, or is cited to show that the reasoning or the facts underlying the invention are incorrect, it shall be indicated by the letter "T" next to the citation of the document.

(f) Where in the international search report any document is cited for reasons other than those referred to in paragraphs (a) to (e), for example:

— a document which may throw doubt on a priority claim,

— a document cited to establish the publication date of another citation,

such document shall be indicated by the letter "L" next to the citation of the document and the reason for citing the document shall be given.

(g) Where a document is a member of a patent family, it shall, whenever feasible, be mentioned in the international search report in addition to the one cited belonging as well to this family and should be preceded by the sign ampersand (&). Members of a patent family may also be mentioned on a separate sheet, provided that the family to which they belong shall be clearly identified and that any text matter on that sheet, if not in the English language, shall also be furnished to the International Bureau in English translation.

(h) A document whose contents have not been verified by the search examiner but are believed to be substantially identical with those of another document which the search examiner has inspected, may be cited in the international search report in the manner indicated for patent family members in the first sentence of paragraph (g).

Section 508

Manner of Indicating the Claims to Which the Documents Cited in the International Search Report Are Relevant

(a) The claims to which cited documents are relevant shall be indicated by placing in the appropriate column of the international search report:

(i) where the cited document is relevant to one claim, the number of that claim; for example, "2" or "17";

(ii) where the cited document is relevant to two or more claims numbered in consecutive order, the number of the first and last claims of the series connected by a hyphen; for example, "1-15" or "2-3";

(iii) where the cited document is relevant to two or more claims that are not numbered in consecutive order, the number of each claim placed in ascending order and separated by a comma or commas; for example, "1, 6" or "1, 7, 10";

(iv) where the cited document is relevant to more than one series of claims under (ii), above, or to claims of both categories (ii) and (iii), above, the series or individual claim numbers and series placed in ascending order using commas to separate the several series, or to separate the numbers of individual claims and each series of claims; for example, "1-6, 9-10, 12-15" or "1, 3-4, 6, 9-11."

(b) Where different categories apply to the same document cited in an international search report in respect of different claims or groups of claims, each relevant claim or group of claims shall be listed separately opposite each indicated category of relevance. Each category and each relevant claim or group of claims may be separated by a line.

The following example illustrates the situation where a document is of particular relevance under Section 505(b) as to claims 1 to 3 and under Section 505(c) as to claim 4, and indicates the general state of the art under Section 507(c) as to claims 11 and 12:

Section 509

International Search and Written Opinion of the International Searching Authority on the Basis of a Translation of the International Application

Where the International Searching Authority has carried out the international search and established the written opinion on the basis of a translation of the international application transmitted to that Authority under Rule 23.1(b), the international search report and the written opinion of the International Searching Authority shall so indicate.

Section 510

Refund of Search Fee in Case of Withdrawal of International Application

(a) Where the international application is withdrawn or is considered withdrawn before the International Searching Authority has started the international search, that Authority shall, subject to paragraphs (b) and (c), refund the search fee to the applicant.

(b) If the refund referred to in paragraph (a) is not compatible with the national law of the national Office acting as International Searching Authority and as long as it continues to be not compatible with that law, the International Searching Authority may abstain from refunding the search fee.

(c) The International Searching Authority may, before making a refund under paragraph (a), first invite the applicant to submit a request for the refund.

Section 511

Rectifications of Obvious Errors under Rule 91

(a) Where the International Searching Authority authorizes a rectification under Rule 91, it shall:

(i) indelibly mark, in the upper right-hand corner of each replacement sheet, the international application number and the date on which that sheet was received;

(ii) indelibly mark, in the middle of the bottom margin of each replacement sheet, the words "RECTIFIED SHEET (RULE 91)" or their equivalent in the language of publication of the international application as well as an indication of the International Searching Authority as provided for in Section 107(b);

(iii) indelibly mark on the letter containing the rectification or accompanying any replacement sheet the date on which that letter was received;

(iv) keep in its files a copy of the letter containing the rectification or, when the rectification is contained in a replacement sheet, the replaced sheet, a copy of the letter accompanying the replacement sheet, and a copy of the replacement sheet;

(v) promptly transmit any letter and any replacement sheet to the International Bureau and a copy thereof to the receiving Office.

(b) Where the International Searching Authority refuses to authorize a rectification under Rule 91,

it shall proceed as indicated under paragraph (a)(i), (iii), and (iv) and promptly transmit any letter and any proposed replacement sheet to the International Bureau.

Section 512

Notifications Concerning Representation

Where a power of attorney or a document containing the revocation or renunciation of an appointment is submitted to the International Searching Authority, that Authority shall immediately notify the International Bureau by sending it a copy of the power of attorney or document and request the International Bureau to record a change in the indications concerning the agent or common representative under Rule 92*bis*.1(a)(ii).

Section 513

Sequence Listings

(a) Where the International Searching Authority receives a correction of a defect under Rule 13*ter*.1(f), it shall:

(i) indelibly mark, in the upper right-hand corner of each replacement sheet, the international application number and the date on which that sheet was received;

(ii) indelibly mark, in the middle of the bottom margin of each replacement sheet, the words "SUBSTITUTE SHEET (RULE 13*ter*.1(f))" or their equivalent in the language of publication of the international application;

(iii) indelibly mark on the letter containing the correction, or accompanying any replacement sheet, the date on which that letter was received;

(iv) keep in its files a copy of the letter containing the correction or, when the correction is contained in a replacement sheet, the replaced sheet, a copy of the letter accompanying the replacement sheet, and a copy of the replacement sheet;

(v) promptly transmit any letter and any replacement sheet to the International Bureau, and a copy thereof to the receiving Office.

(b) Where the international search report and the written opinion of the International Searching Authority are based on a sequence listing that was not contained in the international application as filed but was furnished subsequently to the International Searching Authority, the international search report and the written opinion of the International Searching Authority shall so indicate.

(c) Where a meaningful international search cannot be carried out and a meaningful written opinion, as to whether the claimed invention appears to be novel, to involve an inventive step (to be non-obvious) and to be industrially applicable, cannot be established because a sequence listing is not available to the International Searching Authority in the required form, that Authority shall so state in the international search report or declaration referred to in Article 17(2)(a), and in the written opinion.

(d) The International Searching Authority shall indelibly mark, in the upper right-hand corner of the first sheet of any sequence listing on paper which was not contained in the international application as filed but was furnished subsequently to that Authority, the words "SUBSEQUENTLY FURNISHED SEQUENCE LISTING" or their equivalent in the language of publication of the international application.

(e) The International Searching Authority shall keep in its files:

(i) any sequence listing on paper which was not contained in the international application as filed but was furnished subsequently to that Authority; and

(ii) any sequence listing in electronic form furnished for the purposes of the international search.

Section 514

Authorized Officer

The officer of the International Searching Authority responsible for the international search report, as referred to in Rule 43.8, and for the written opinion of the International Searching Authority, as referred to in Rule 43*bis*.1(b), means the person who actually performed the search work and prepared the search report and the written opinion of the International Searching Authority, or another person who was responsible for supervising the search and the establishment of the written opinion.

Section 515

Amendment of Established Abstract in Response to Applicant's Comments

The International Searching Authority shall inform the applicant and the International Bureau of any

amendments made under Rule 38.2(b) to an abstract established by it under Rule 38.2(a).

Section 516

Notification to Applicant of Submission of Demand after the Expiration of 19 Months from the Priority Date

Where the demand is submitted after the expiration of 19 months from the priority date to an International Searching Authority and the time limit under Article 22(1), as in force from April 1, 2002, does not apply in respect of all designated Offices, that Authority shall:

(i) promptly notify the applicant accordingly, directing attention to the fact that the time limit under Article 39(1)(a) does not apply, and that Article 22(1), as in force until March 31, 2002, continues to apply in respect of any such designated Office,

(ii) proceed under Rule 59.3.

Section 517

Waivers under Rule 90.4(d) and Rule 90.5(c)

(a) Where, in accordance with Rule 90.4(d), an International Searching Authority waives the requirement under Rule 90.4(b) that a separate power of attorney be submitted to it, the International Searching Authority shall notify the International Bureau accordingly.

(b) Where, in accordance with Rule 90.5(c), an International Searching Authority waives the requirement under Rule 90.5(a)(ii) that a copy of a general power of attorney be attached to any separate notice, it shall notify the International Bureau accordingly.

(c) An International Searching Authority may require a separate power of attorney, or a copy of a general power of attorney, in particular instances even if the International Searching Authority has waived the requirement in general.

(d) An International Searching Authority which has notified the International Bureau under paragraph (a) or (b) shall notify the International Bureau of any change to the information notified under those paragraphs.

Section 518

Guidelines for Explanations Contained in the Written opinion of the International Searching Authority

For the purposes of establishing the written opinion of the International Searching Authority, Section 604 shall apply *mutatis mutandis*.

PART 6

INSTRUCTIONS RELATING TO THE INTERNATIONAL PRELIMINARY EXAMINING AUTHORITY

Section 601

Notification to Applicant of Submission of Demand after the Expiration of 19 Months from the Priority Date

(a) Where the demand is submitted after the expiration of 19 months from the priority date and the time limit under Article 22(1), as in force from April 1, 2002, does not apply in respect of all designated Offices, the International Preliminary Examining Authority shall promptly notify the applicant accordingly, directing attention to the fact that the time limit under Article 39(1)(a) does not apply, and that Article 22(1), as in force until March 31, 2002, continues to apply in respect of any such designated Office.

(b) Where the demand is submitted after the expiration of 19 months from the priority date to an International Preliminary Examining Authority which is not competent for the international preliminary examination of the international application, and the time limit under Article 22(1), as in force from April 1, 2002, does not apply in respect of all designated Offices, that Authority shall:

(i) promptly notify the applicant accordingly, directing attention to the fact that the time limit under Article 39(1)(a) does not apply, and that Article 22(1), as in force until March 31, 2002, continues to apply in respect of any such designated Office,

(ii) proceed under Rule 59.3.

Section 602

Processing of Amendments by the International Preliminary Examining Authority

(a) The International Preliminary Examining Authority shall:

(i) indelibly mark, in the upper right-hand corner of each replacement sheet submitted under Rule 66.8, the international application number and the date on which that sheet was received;

(ii) indelibly mark, in the middle of the bottom margin of each replacement sheet, the words "AMENDED SHEET" or their equivalent in the language of the demand as well as an indication of the International Preliminary Examining Authority as provided for in Section 107(b);

(iii) subject to item (iv), keep in its files any replaced sheet, the letter accompanying any replacement sheet, and any superseded replacement sheet or any letter referred to in the last sentence of Rule 66.8(b) as well as a copy of any replacement sheet which is annexed to the international preliminary examination report;

(iv) where any superseded replacement sheet referred to in item (iii) is to be annexed to the international preliminary examination report under Rule 70.16(b), indelibly mark, in addition to the markings referred to in items (i) and (ii), in the middle of the bottom margin of each superseded replacement sheet, without obscuring the marking made under item (ii), the words "SUPERSEDED REPLACEMENT SHEET (RULE 70.16(b))";

(v) annex to the copy of the international preliminary examination report which is transmitted to the International Bureau any replacement sheet as provided for under Rule 70.16;

(vi) annex to the copy of the international preliminary examination report which is transmitted to the applicant a copy of each replacement sheet as provided for under Rule 70.16.

(b) Section 311(b)(ii) relating to the numbering of replacement sheets shall apply when one or more sheets are added under Rule 66.8.

(c) Where the International Preliminary Examining Authority receives from the applicant a copy of a purported amendment under Article 19 submitted after the time limit set forth in Rule 46.1, the International Preliminary Examining Authority may consider such an amendment as an amendment under Article 34 in which case it shall inform the applicant accordingly.

(d) Where the International Preliminary Examining Authority receives a copy of an amendment under Article 19, paragraphs (a) and (b) shall apply *mutatis mutandis*.

Section 603

Transmittal of Protest against Payment of Additional Fees and Decision Thereon Where International Application Is Considered to Lack Unity of Invention

The International Preliminary Examining Authority shall transmit to the applicant, preferably at the latest together with the international preliminary examination report, any decision which it has taken under Rule 68.3(c) on the protest of the applicant against payment of additional fees where the international application is considered to lack unity of invention. At the same time, it shall transmit to the International Bureau a copy of both the protest and the decision thereon, as well as any request by the applicant to forward the texts of both the protest and the decision thereon to the elected Offices.

Section 604

Guidelines for Explanations Contained in the International Preliminary Examination Report

(a) Explanations under Rule 70.8 shall clearly point out to which of the three criteria of novelty, inventive step (non-obviousness) and industrial applicability referred to in Article 35(2), taken separately, any cited document is applicable and shall clearly describe, with reference to the cited documents, the reasons supporting the conclusion that any of the said criteria is or is not satisfied.

(b) Explanations under Article 35(2) shall be concise and preferably in the form of short sentences.

Section 605

File to Be Used for International Preliminary Examination

Where the International Preliminary Examining Authority is part of the same national Office or intergovernmental organization as the International Searching Authority, the same file shall serve the purposes of international search and international preliminary examination.

Section 606

Cancellation of Elections

(a) The International Preliminary Examining Authority shall cancel *ex officio*:

(i) the election of any State which is not a designated State;

(ii) the election of any State not bound by Chapter II of the Treaty.

(b) The International Preliminary Examining Authority shall enclose that election within square brackets, shall draw a line between the square brackets while still leaving the election legible and shall enter, in the margin, the words “CANCELLED EX OFFICIO BY IPEA” or their equivalent in the language of the demand, and shall notify the applicant accordingly.

Section 607

Rectifications of Obvious Mistakes under Rule 91

Where the International Preliminary Examining Authority authorizes a rectification of an obvious mistake under Rule 91, Section 602(a)(i) to (iii) and (b) shall apply *mutatis mutandis*, provided that, where a sheet is marked as indicated in Section 602, the words “RECTIFIED SHEET (RULE 91)” shall be used.

Section 608

Notifications Concerning Representation

Where a power of attorney or a document containing the revocation or renunciation of an appointment is submitted to the International Preliminary Examining Authority, that Authority shall immediately notify the International Bureau by sending it a copy of the power of attorney or document and request the International Bureau to record a change in the indications concerning the agent or common representative under Rule 92*bis*.1(a)(ii).

Section 609

Withdrawal by Applicant under Rules 90*bis*. 1, 90*bis*. 2, or 90*bis*. 3

The International Preliminary Examining Authority shall promptly transmit to the International Bureau any notice from the applicant effecting withdrawal of the international application under Rule 90*bis*.1(b), of a designation under Rule 90*bis*.2(d), or of a priority claim under Rule 90*bis*.3(c) which has been filed with it. The International Preliminary Examining Authority shall mark the notice with the date on which it was received.

Section 610

[*Deleted*]

Section 611

Method of Identification of Documents in the International Preliminary Examination Report

Any document cited in the international preliminary examination report which was not cited in the international search report shall be cited in the same form as required under Section 503 for international search reports. Any document cited in the international preliminary examination report which was previously cited in the international search report may be cited in a shortened form, provided that the reference to the document is unambiguous.

Section 612

Authorized Officer

The officer of the International Preliminary Examining Authority responsible for the international preliminary examination report, as referred to in Rule 70.14, means the person who actually performed the examination work and prepared the international preliminary examination report or another person who was responsible for supervising the examination.

Section 613

Invitation to Submit a Request for Refund of Fees under Rule 57.6 or 58.3

The International Preliminary Examining Authority may, before making a refund under Rule 57.6 or 58.3, first invite the applicant to submit a request for the refund.

Section 614

Evidence of Right to File Demand

Where a demand is considered as not having been made under Rule 61.1(b) by the International Preliminary Examining Authority because the applicant appeared, on the basis of the indication made in the demand, not to have the right to file a demand with that Authority under Rule 54 but evidence is submitted indicating to the satisfaction of the International Preliminary Examining Authority that in fact, an applicant had, on the date on which the demand was received, the right to file the demand with that Authority, the International Preliminary Examining Authority shall regard the requirements under Article 31 (2)(a) as having been fulfilled on the date of actual receipt of the demand.

Section 615

Invitation to Pay Fees before Date on Which They Are Due

If the International Preliminary Examining Authority finds, before the date on which they are due, that the handling fee or the international preliminary examination fee are lacking in whole or in part, it may invite the applicant to pay the missing amounts within the time limit under Rule 57.3 or 58.1(b), as the case may be.

Section 616

International Preliminary Examination on the Basis of a Translation of the International Application

Where the International Preliminary Examining Authority has carried out international preliminary examination on the basis of a translation of the international application furnished to that Authority under Rule 55.2(a) or, in the case referred to in Rule 55.2 (b), transmitted, under Rule 23.1(b), to the national Office or intergovernmental organization of which that Authority is part, the international preliminary examination report shall so indicate.

Section 617

Waivers under Rule 90.4(d) and 90.5(c)

(a) Where, in accordance with Rule 90.4(d), an International Preliminary Examining Authority waives the requirement under Rule 90.4(b) that a separate power of attorney be submitted to it, the International Preliminary Examining Authority shall notify the International Bureau accordingly.

(b) Where, in accordance with Rule 90.5(c), an International Preliminary Examining Authority waives the requirement under Rule 90.5(a)(ii) that a copy of a general power of attorney be attached to the demand or any separate notice, it shall notify the International Bureau accordingly.

(c) An International Preliminary Examining Authority may require a separate power of attorney, or a copy of a general power of attorney, in particular instances even if the International Preliminary Examining Authority has waived the requirement in general.

(d) An International Preliminary Examining Authority which has notified the International Bureau under paragraph (a) or (b) shall notify the International Bureau of any change to the information notified under those paragraphs.

PART 7

INSTRUCTIONS RELATING TO THE FILING AND PROCESSING IN ELECTRONIC FORM OF INTERNATIONAL APPLICATIONS

Section 701

Abbreviated Expressions

For the purposes of this Part and Annex F, from the wording, the nature of the provision or the context:

(i) "electronic package" means a package of one or more electronic files assembled for the purposes of transmission of one or more documents in electronic form;

(ii) "electronic document format" means the presentation or arrangement of the information in a document in electronic form;

(iii) "means of transmittal," in connection with a document in electronic form, means the manner in which a document is transmitted, for example, by electronic means or physical means;

(iv) "electronic signature" means information in electronic form which is attached to, or logically associated with, a document in electronic form, which may be used to identify the signer and which indicates the signer's approval of the content of the document;

(v) "basic common standard" means the basic common standard for electronic filing of international applications provided for in Annex F;

(vi) "communication" of an international application or other document has the same meaning as in Rule 89*bis*.3;

(vii) words and expressions whose meanings are explained in Annex F have the same meanings in this Part.

Section 702

Filing, Processing and Communication in Electronic Form of International Applications

(a) The filing, processing and communication of international applications filed in electronic form, and the processing and communication in electronic form of international applications filed on paper, shall be in accordance with this Part and Annex F.

(b) Subject to this Part, an international application that is filed, processed or communicated in electronic form shall not be denied legal effect merely because it is in electronic form.

(c) This Part and Annex F do not apply to an international application containing a sequence listing part which is filed in electronic form under Section 801(a), except that Section 705*bis* shall apply *mutatis mutandis* to such an application to the extent that it is filed on paper.

Section 703

Filing Requirements; Basic Common Standard

(a) An international application may, subject to this Part, be filed in electronic form if the receiving Office has notified the International Bureau in accordance with Rule 89*bis*.1(d) that it is prepared to receive international applications in such form.

(b) An international application filed in electronic form shall be:

(i) in an electronic document format that has been specified by the receiving Office in accordance with Annex F or that complies with the basic common standard;

(ii) filed by a means of transmittal that has been specified by the receiving Office in accordance with Annex F or that complies with the basic common standard;

(iii) in the form of an electronic package, appropriate to the means of transmittal, that has been specified by the receiving Office in accordance with Annex F or that complies with the basic common standard;

(iv) prepared and filed using electronic filing software that has been specified by the receiving Office in accordance with Annex F or that complies with the basic common standard; and

(v) free of viruses and other forms of malicious logic in accordance with Annex F or that complies with the basic common standard.

(c) An international application filed in electronic form shall, for the purposes of Article 14(1)(a)(i), be signed by the applicant using a type of electronic signature that has been specified by the receiving Office in accordance with Annex F or, subject to Section 704(g), that complies with the basic common standard.

(d) A receiving Office which has not notified the International Bureau in accordance with Rule 89.1(d) that it is prepared to receive international applications in electronic form may nevertheless decide in a particular case to receive an international application submitted to it in such form, in which case this Part shall apply accordingly.

(e) Any receiving Office may refuse to receive an international application submitted to it in electronic form if the application does not comply with paragraph (b), or may decide to receive the application.

(f) If, on 7 January 2002, the applicable national law and the technical systems of a national Office provide for the filing with it of national applications in electronic form according to requirements which are incompatible with any of items (ii) to (iv) of paragraph (b):

(i) the provisions concerned shall not apply in respect of the Office in its capacity as a receiving Office for as long as the incompatibility continues; and

(ii) the Office may instead provide for the filing with it of international applications in electronic form according to that national law and those technical systems; provided that the Office informs the International Bureau accordingly by the date on which the Office sends the International Bureau a notification under Rule 89.1(d) and in any case no later than 7 April 2002. The information received shall be promptly published by the International Bureau in the Gazette.

Section 704

Receipt; International Filing Date; Signature; Physical Requirements

(a) The receiving Office shall promptly notify the applicant of, or otherwise enable the applicant to obtain confirmation of, the receipt of any purported international application filed with it in electronic form. The notification or confirmation shall indicate or contain:

(i) the identity of the Office;

(ii) the date of receipt;

(iii) any reference number or application number assigned to the purported application by the Office; and

(iv) a message digest, generated by the Office, of the purported application as received; and may, at the option of the Office, also indicate or contain other information such as:

(v) the names and sizes of the electronic files received;

(vi) the dates of creation of the electronic files received; and

(vii) a copy of the purported application as received.

(b) Where the receiving Office refuses in accordance with Rule 89*bis*.1(d) or Section 703(e) to receive a purported international application submitted to it in electronic form, it shall, if practicable having regard to the indications furnished by the applicant, promptly notify the applicant accordingly.

(c) Promptly after receiving a purported international application in electronic form, the receiving Office shall determine whether the purported application complies with the requirements of Article 11(1) and shall proceed accordingly.

(d) Where an international application filed in electronic form is not signed in compliance with Section 703(c), the application shall be considered not to comply with the requirements of Article 14(1)(a)(i) and the receiving Office shall proceed accordingly.

(e) Where an international application filed in electronic form does not comply with Section 703(b) but the receiving Office decides, under Section 703(e), to receive it, that non-compliance shall be considered to be non-compliance with the physical requirements referred to in Article 14(1)(a)(v) and the receiving Office shall proceed accordingly, having regard to whether compliance is necessary for the purpose of reasonably uniform international publication (Rule 26.3) and satisfactory electronic communications.

(f) An international application filed in electronic form may, in accordance with the provisions of Rule 19.4, be transmitted by the Office with which the

application was filed to the International Bureau as receiving Office.

(g) Where an international application filed in electronic form was signed using a type of electronic signature that complies with the basic common standard but that has not been specified by the receiving Office under Section 703(c), the Office may require that any subsequent document or correspondence submitted to it in electronic form be signed using a type of electronic signature that has been so specified. If that requirement is not complied with, Rule 92.1(b) and (c) shall apply *mutatis mutandis*.

(h) The provisions of this Part, other than paragraph (g), shall apply *mutatis mutandis* to other documents and correspondence relating to international applications.

Section 705

Home Copy, Record Copy and Search Copy Where International Application is Filed in Electronic Form

(a) Where an international application is filed in electronic form as a wrapped and signed package in accordance with Annex F, the home copy and the record copy in relation to that application for the purposes of Article 12 shall each consist of a copy in electronic form of that package.

(b) Where an international application is filed in electronic form but is not filed as a wrapped and signed package in accordance with Annex F, the home copy and the record copy in relation to that application for the purposes of Article 12 shall each consist of a copy in electronic form of the application as filed. If the application as filed was encrypted, the home copy and the record copy shall consist of the decrypted version. If the application as filed was infected by a virus or other form of malicious logic, the home copy and the record copy shall consist of the disinfected version.

(c) Where the international application is filed in electronic form on a physical medium, the home copy and the record copy shall not include the physical medium, but the receiving Office shall, for the purposes of Rule 93.1, retain the application as originally filed, together with the physical medium.

(d) Where the International Searching Authority has notified the International Bureau in accordance with Rule 89.1(d) that it is prepared to process international applications in electronic form, paragraphs (a) and (b) apply *mutatis mutandis* to the search copy; otherwise, the search copy shall consist of a copy of the application printed on paper by the receiving Office.

Section 705*bis*

Processing in Electronic Form of International Applications Filed on Paper; Home Copy, Record Copy and Search Copy

(a) Where an international application is filed on paper, it may, subject to this Part, be processed and kept as a complete and accurate copy in electronic form prepared by the receiving Office, the International Searching Authority, the International Preliminary Examining Authority or the International Bureau. Any receiving Office, International Searching Authority or International Preliminary Examining Authority which proceeds under this paragraph shall notify the International Bureau accordingly.

(b) Pursuant to paragraph and for the purposes of Article 12, where an international application is filed on paper:

(i) the receiving Office may keep a copy in electronic form referred to in that paragraph as the home copy;

(ii) the International Bureau may keep a copy in electronic form referred to in that paragraph as the record copy;

(iii) the International Searching Authority may keep a copy in electronic form referred to in that paragraph as the search copy.

(c) Where a copy in electronic form is kept as the record copy under paragraph (b)(ii), the original of the international application as filed on paper shall be kept, for a period of at least 10 years from the international filing date, by the International Bureau or, where so agreed by the receiving Office and the International Bureau, by the receiving Office on behalf of the International Bureau. The original shall be marked with the words "INTERNATIONAL APPLICATION— ORIGINAL AS FILED ON PAPER (SECTION 705*bis*)" or their equivalent in the language of publication of the international application on the bottom of the first page of the request and of the first page of the description.

(d) Where, before the expiration of the period referred to in paragraph (c), the International Bureau

finds, upon request for correction made by the applicant or otherwise, that a copy in electronic form kept as the record copy under paragraph (b)(ii) is not in fact a complete and accurate copy of the original kept under paragraph (c), it shall correct the record copy so as to bring it into conformity with the original. If the receiving Office, the International Searching Authority, the International Preliminary Examining Authority or a designated or elected Office considers that the International Bureau should make a finding under the first sentence of this paragraph, it shall call the relevant facts to the attention of the International Bureau.

(e) Where the International Bureau has corrected the record copy in accordance with paragraph (d), it shall promptly notify the applicant, publish the corrected international application together with a revised front page, and publish a notice of this fact in the Gazette. Section 422(a)(i) to (v) shall apply *mutatis mutandis* with regard to the notification of the receiving Office, the International Searching Authority, the International Preliminary Examining Authority and the designated and elected Offices.

Section 706

Documents in Pre-Conversion Format

(a) Where, for the purposes of filing the international application in electronic form, the document making up the international application has been prepared by conversion from a different electronic document format ("pre-conversion format"), the applicant may, if the receiving Office so permits and the pre-conversion format is accepted for that purpose by that Office, submit, together with the international application, the document in the pre-conversion format, in which case:

(i) the document in the pre-conversion format shall be identified as such and shall be accompanied by a statement by the applicant that the international application as filed in electronic form is a complete and accurate copy of the document in the pre-conversion format;

(ii) the request shall preferably contain an indication that the document in the pre-conversion format is submitted under Section 706 together with the international application.

(b) Where it is found that the international application as filed in electronic form is not in fact a complete and accurate copy of the document in the pre-conversion format submitted under paragraph (a), the applicant may, within 30 months from the priority date, request the receiving Office to correct the international application so as to bring it into conformity with the document in the pre-conversion format. Rule 26.4 shall apply *mutatis mutandis* to the manner in which corrections under this paragraph shall be requested.

(c) Where the receiving Office, the International Searching Authority, the International Preliminary Examining Authority or the International Bureau discovers what appears to be a correctable defect under paragraph (b), that Office, Authority or Bureau, as the case may be, may bring such defect to the attention of the applicant, drawing attention to the correction procedure under paragraph (b).

(d) The applicant and, if copies of the international application have already been sent to the International Bureau and the International Searching Authority, that Bureau and that Authority shall be promptly notified by the receiving Office of any correction under paragraph (b). If required, the International Bureau shall notify the International Preliminary Examining Authority accordingly. Where a correction is made after the completion of the technical preparations for international publication, the International Bureau shall promptly publish the corrected international application together with a revised front page.

(e) A correction under paragraph (b) shall be taken into account by the International Searching Authority for the purposes of the international search and the establishment of the written opinion, and by the International Preliminary Examining Authority for the purposes of the international preliminary examination, if it is notified to that Authority before it has begun to draw up the international search report, the written opinion or the international preliminary examination report, as applicable, in which case the said report or opinion shall so indicate.

(f) Paragraphs (a) to (e) shall apply *mutatis mutandis* to any document making up any element of the international application referred to in Article 3(2).

Section 707

Calculation of International Filing Fee and Fee Reduction

(a) Where an international application is filed in electronic form, the international filing fee shall, subject to paragraph (a-*bis*), be calculated on the basis of the number of sheets that the application would contain if presented as a print-out complying with the physical requirements prescribed in Rule 11.[5]

(a-*bis*) Where an international application filed in electronic form contains a sequence listing as referred to in Rule 5.2(a), the calculation of the international filing fee shall not take into account any sheet of the sequence listing nor any sheet of any tables related thereto in excess of 400 sheets.

(b) Item 3(b), (c), and (d) of the Schedule of Fees annexed to the Regulations shall apply to reduce the fees payable in respect of an international application filed in electronic form with a receiving Office which has notified the International Bureau under Section 710(a) that it is prepared to receive international applications in electronic form or which has decided to receive such an application in accordance with Section 703(d).

Section 708

Special Provisions Concerning Legibility, Completeness, Infection by Viruses, Etc.

(a) Where an international application is filed in electronic form, the receiving Office shall promptly check whether the application is legible and whether it appears to have been fully received. Where the Office finds that all or part of the international application is illegible or that part of the application appears not to have been received, the international application shall be treated as not having been received to the extent that it is illegible or, where transmitted by electronic means, that the attempted transmission failed, and the Office shall, if practicable having regard to the indications furnished by the applicant, promptly notify the applicant accordingly.

(b) Where a purported international application is received in electronic form, the receiving Office shall promptly check it for infection by viruses and other forms of malicious logic. Where the Office finds that the purported application is so infected:

(i) the Office is not required to disinfect the purported application and may, under Section 703(e), refuse to receive it;

(ii) if the Office decides under Section 703(e) to receive the purported application, the Office shall use means reasonably available under the circumstances to read it, for example, by disinfecting it or preparing a backup copy under Section 706, and to store it in such a way that its contents may be ascertained if necessary;

(iii) if the Office finds that it is able to read and store the purported application as mentioned in item (ii), it shall determine whether an international filing date should be accorded;

(iv) if the Office accords an international filing date to the application, it shall, if possible having regard to the indications furnished by the applicant, promptly notify the applicant and, if necessary, invite the applicant to submit a substitute copy of the application free of infection;

(v) if the Office accords an international filing date to the application, it shall prepare the home copy, the record copy and the search copy on the basis of the disinfected application, the backup copy or the substitute copy referred to in items (ii) or (iv), as applicable, provided that the application shall be stored by the Office, as referred to in item (ii), for the purposes of Rule 93.1.

Section 709

Means of Communication with the Receiving Office

(a) Where an international application is filed in electronic form and by electronic means of transmittal, the receiving Office shall, if practicable, send any notifications, invitations and other correspondence to the applicant by electronic means of trans-

[5]Noting that Rule 11 leaves some flexibility as to the margins of the sheets (see Rule 11.6) and the size of the characters (see Rule 11.9(d)), the international filing fee should be calculated on the basis of the number of sheets that the application would contain if presented as a print-out complying with the minimum margin and character size requirements. In practice, however, the receiving Office should not print-out the international application but rather rely on the number of pages of the international application as calculated by the electronic filing software and indicated in the request.

mittal in accordance with Annex F, or by such other means indicated by the applicant from among those offered by the Office.

(b) Where it appears to the receiving Office that a notification, invitation or other correspondence sent to the applicant by electronic means of transmittal was not successfully transmitted, the Office shall, if practicable, promptly retransmit the notification, invitation or other correspondence by the same or another means.

(c) At times when the electronic systems of the receiving Office are not available for the filing of documents in electronic form or by electronic means of transmittal, the Office shall, if possible, promptly publish information to that effect by means reasonably available to it under the circumstances, for example, by including a notice on the Office's Internet site, if any.

Section 710

Notification and Publication of Receiving Offices' Requirements and Practices

(a) A notification by a receiving Office to the International Bureau under Rule 89*bis*.1(d) and Section 703(a) that it is prepared to receive international applications in electronic form shall indicate, where applicable:

(i) the electronic document formats (including, where applicable, the versions of such electronic document formats), means of transmittal, types of electronic packages, electronic filing software and types of electronic signature specified by it under Section 703(b)(i) to (iv) and (c), and any options specified by it under the basic common standard;

(ii) the conditions, rules and procedures relating to electronic receipt, including hours of operation, choices for processes to verify or acknowledge receipt, choices for electronic communication of invitations and notifications, any methods of online payment, details concerning any help desks, electronic and software requirements and other administrative matters related to the filing in electronic form of international applications and related documents;

(iii) the kinds of documents which may be transmitted to or by the Office in electronic form;

(iv) whether and under what conditions the Office accepts the filing, under Section 706 (a) and (f), of documents in pre-conversion format and the electronic document formats (including, where applicable, the versions of such electronic document formats) accepted by it under that Section;

(v) procedures for notification of applicants and procedures which applicants may follow as alternatives when the electronic systems of the Office are not available;

(vi) the certification authorities that are accepted by the Office, and the electronic addresses of the certificate policies under which certificates are issued;

(vii) the procedures relating to access to the files of international applications filed or stored in electronic form.

(b) The receiving Office shall notify the International Bureau of any change in the matters previously indicated by it in a notification under Section 705*bis*(a) or paragraph (a) of this Section.

(c) The International Bureau shall promptly publish in the Gazette any notification received by it under Section 705*bis*(a) or paragraph (a) or (b) of this Section.

(d) The effective date of any change notified under paragraph (b) shall be as specified by the receiving Office in the notification, provided that any change which restricts filing options shall not be effective earlier than two months after the date of publication of the notification of the change in the Gazette.

Section 711

Electronic Records Management

(a) Records, copies and files in electronic form in relation to international applications shall be processed and, for the purposes of Rule 93, kept in accordance with the requirements of authentication, integrity, confidentiality and non-repudiation, and having due regard to the principles of electronic records management, set out in Annex F.

(b) Upon request by the applicant or other interested party in relation to a particular international application, the receiving Office shall, subject to any restrictions applicable under the Treaty as to access by third parties,[6] certify that any electronic records relating to that application are maintained and stored by it in accordance with paragraph (a).

Section 712

Access to Electronic Records

Access permitted by the Treaty, the Regulations or these Administrative Instructions to documents contained in the file of an international application filed, processed or kept in electronic form may, at the option of the national Office or intergovernmental organization concerned, be provided by electronic means or in electronic form, having due regard to the need to ensure the integrity and where applicable confidentiality of data, the principles of electronic records management set out in Annex F, and the need to ensure security of the electronic networks, systems and applications of the Office or organization.

Section 713

Application of Provisions to International Authorities and the International Bureau, and to Notifications, Communications, Correspondence and Other Documents

(a) The provisions of this Part, other than Sections 703(c), 704(c) to (g), 706, 707, 708(b)(iii) to (v), 710(a)(iv) and 714(b), shall, if they are capable of applying but do not expressly apply to the International Searching Authorities, the International Preliminary Examining Authorities and the International Bureau, apply *mutatis mutandis* to those Authorities and that Bureau.

(b) The provisions of this Part, other than Sections 702(c), 703(c), 704(c) to (f), 705, 705*bis*(b) to (e), 706, 707, 708(b)(iii) to (v) and 710(a)(iv), shall, if they are capable of applying but do not expressly apply to notifications, communications, correspondence or other documents relating to international applications that are filed, processed or communicated in electronic form, shall apply *mutatis mutandis* to such notifications, communications, correspondence or other documents relating to international applications.

Section 714

Furnishing by the International Bureau of Copies of Documents Kept in Electronic Form; Designated Offices' Signature Requirements

(a) Where any International Searching Authority, International Preliminary Examining Authority or designated Office has not notified the International Bureau in accordance with Rule 89*bis*.1(d) or Section 705*bis*(a) that it is prepared to process international applications in electronic form, the International Bureau shall furnish to that Office or Authority a copy on paper of any document which is kept by the International Bureau in electronic form and which that Office or Authority is entitled to receive. The International Bureau may also, upon request by the Authority or Office concerned, furnish such copy in electronic form.

(b) Any designated Office may require that any document or correspondence submitted to it by the applicant in electronic form be signed by the applicant using a type of electronic signature specified by it in accordance with Annex F.

[6] Articles 30 and 38 and Rule 94 restrict access.

PART 8

INSTRUCTIONS RELATING TO INTERNATIONAL APPLICATIONS CONTAINING LARGE NUCLEOTIDE AND/OR AMINO ACID SEQUENCE LISTINGS AND/OR TABLES RELATING THERETO

Section 801

Filing of International Applications Containing Sequence Listings and/or Tables

(a) Pursuant to Rules 89*bis* and 89*ter*, where an international application contains disclosure of one or more nucleotide and/or amino acid sequence listings ("sequence listings"), the receiving Office may, if it is prepared to do so, accept that the sequence listing part of the description, as referred to in Rule 5.2(a) and/or any table related to the sequence listing(s) ("sequence listings and/or tables"), be filed, at the option of the applicant:

(i) only on an electronic medium in electronic form in accordance with Section 802; or

(ii) both on an electronic medium in electronic form and on paper in accordance with Section 802;

provided that the other elements of the international application are filed as otherwise provided for under the Regulations and these Instructions.

(b) Any receiving Office which is prepared to accept the filing in electronic form of the sequence listings and/or tables under paragraph (a) shall notify the International Bureau accordingly. The notification shall specify the electronic media on which the receiving Office will accept such filings. The International Bureau shall promptly publish any such information in the Gazette.

(c) A receiving Office which has not made a notification under paragraph (b) may nevertheless decide in a particular case to accept an international application the sequence listings and/or tables of which are filed with it under paragraph (a).

(d) Where the sequence listings and/or tables are filed in electronic form under paragraph (a) but not on an electronic medium specified by the receiving Office under paragraph (b), that Office shall, under Article 14(1)(a)(v), invite the applicant to furnish to it replacement sequence listings and/or tables on an electronic medium specified under paragraph (b).

(e) Where an international application containing sequence listings and/or tables in electronic form is filed under paragraph (a) with a receiving Office which is not prepared, under paragraph (b) or (c), to accept such filings, Section 333(b) and (c) shall apply.

Section 802

Format and Identification Requirements Relating to International Applications Containing Sequence Listings and/or Tables

(a) Paragraphs 40 to 45 of Annex C shall apply *mutatis mutandis* to the sequence listing part of an international application filed in electronic form.

(b) Tables filed in electronic form under Section 801(a) shall comply with Annex C-*bis*.

(b-*bis*) Any International Searching Authority which requires that sequence listings be furnished in electronic form shall select from the technical requirements contained in Annex C-*bis* those which it will apply and it shall notify the International Bureau accordingly. The International Bureau shall promptly publish any such information in the Gazette.

(b-*ter*) Where sequence listings and tables are both filed in electronic form under Section 801(a), such listings and tables shall, respectively, be contained on separate electronic carriers which shall contain no other programs or files.

(b-*quater*) Rules 13*ter*.1 and 2 shall apply *mutatis mutandis* to any tables not complying with Annex C-*bis* and paragraph (b-*ter*).

(c) The label provided for in paragraph 44 of Annex C shall, in respect of the sequence listings and/or tables, also include, as the case may be, the following indications:

(i) that the sequence listings and/or tables are filed under Section 801(a);

(ii) where the sequence listings and/or tables in electronic form are contained on more than one electronic carrier, the numbering of each such carrier (for example, "DISK 1/3," "DISK 2/3," "DISK 3/3");

(iii) where more than one copy of the sequence listings and/or tables in electronic form has

been filed, the numbering of each copy (for example, "COPY 1," "COPY 2," "COPY 3").

(d) Where any correction under Rule 26.3, any rectification of an obvious error under Rule 91, or any amendment under Article 34 is submitted in respect of the sequence listings and/or tables filed, under Section 801(a)(i) or (ii), in electronic form, replacement sequence listings and/or tables in electronic form containing the entirety of the sequence listings and/or tables with the relevant correction, rectification or amendment shall be furnished and the label referred to in paragraph (c) shall be marked accordingly (for example, "SUBMITTED FOR CORRECTION," "SUBMITTED FOR RECTIFICATION," "SUBMITTED FOR AMENDMENT"). Where the sequence listings and/or tables were filed both in electronic form and in written form under Section 801(a)(ii), replacement sheets containing the correction, rectification or amendment in question shall also be submitted on paper.

Section 803

Calculation of International Filing Fee for International Applications Containing Sequence Listings and/or Tables

Where sequence listings and/or tables are filed in electronic form under Section 801(a), the international filing fee payable in respect of that application shall include the following two components:

(i) a basic component calculated as provided in the Schedule of Fees in respect of all pages filed on paper (that is, all pages of the request, description (excluding sequence listings and/or tables if also filed on paper), claims, abstract and drawings), and

(ii) an additional component, in respect of sequence listings and/or tables, equal to 400 times the fee per sheet as referred to in item 1 of the Schedule of Fees, regardless of the actual length of the sequence listings and/or tables filed in electronic form and regardless of the fact that sequence listings and/or tables may have been filed both on paper and in electronic form.

Section 804

Preparation, Identification and Transmittal of Copies of International Applications Containing Sequence Listings and/or Tables

(a) Where sequence listings and/or tables are filed only in electronic form under Section 801(a)(i), the record copy for the purposes of Article 12 shall, subject to Sections 702(c) and 705*bis*, consist of those elements of the international application filed on paper together with the sequence listings and/or tables filed in electronic form.

(b) Where sequence listings and/or tables are filed both in electronic form and on paper under Section 801(a)(ii), the record copy for the purposes of Article 12 shall, subject to Sections 702(c) and 705*bis*, consist of all the elements of the international application filed on paper, including the sequence listings and/or tables filed on paper.

(c) Where sequence listings and/or tables are filed in electronic form under Section 801(a)(i) or (ii) in less than the number of copies required for the purposes of this Section, the receiving Office shall either:

(i) promptly prepare any additional copies required, in which case it shall have the right to fix a fee for performing that task and to collect such fee from the applicant; or

(ii) invite the applicant to promptly furnish the additional number of copies required, accompanied by a statement that the sequence listings and/or tables in electronic form contained in those copies are identical to the sequence listings and/or tables in electronic form as filed;

provided that, where those sequence listings and/or tables were also filed on paper under Section 801(a)(ii), the receiving Office shall not, notwithstanding Rule 11.1(b), require the applicant to file additional copies of the sequence listings and/or tables on paper.

(d) Where the sequence listings and/or tables are filed under Section 801(a)(i), the receiving Office shall, subject to Sections 702(c) and 705*bis*, in addition to proceeding under Section 305 with respect to the parts of the international application filed on paper:

(i) mark the words "RECORD COPY—SEQUENCE LISTINGS AND/OR TABLES" on the original electronic medium containing the sequence

listings and/or tables part in electronic form and transmit that part of the record copy to the International Bureau together with the paper part of the record copy;

(ii) mark the words "SEARCH COPY—SEQUENCE LISTINGS AND/OR TABLES" on one additional copy of the electronic medium containing the sequence listings and/or tables in electronic form and transmit that part of the search copy to the International Searching Authority, for the purposes of Rule 13*ter*.1, together with the paper part of the search copy;

(iii) mark the words "HOME COPY—SEQUENCE LISTINGS AND/OR TABLES" on the other such copy of the electronic medium containing the sequence listings and/or tables in electronic form and keep that part of the home copy in its files together with the paper part of the home copy.

(e) Where the sequence listings and/or tables are filed under Section 801(a)(ii), the receiving Office shall, subject to Sections 702(c) and 705*bis*, in addition to proceeding under Section 305 with respect to the parts of the international application filed on paper:

(i) mark the words "RECORD COPY—SEQUENCE LISTINGS AND/OR TABLES" in the upper left-hand corner of the first page of the sequence listing and of the first page of the first table filed on paper and transmit that part of the record copy to the International Bureau together with the paper part of the record copy; it shall also mark the words "COPY FOR INTERNATIONAL BUREAU—SEQUENCE LISTINGS AND/OR TABLES" on one copy of the electronic medium containing the sequence listings and/or tables in electronic form and transmit that copy with the record copy;

(ii) mark the words "SEARCH COPY—SEQUENCE LISTINGS AND/OR TABLES" on one additional copy of the electronic medium containing the sequence listings and/or tables in electronic form and transmit that part of the search copy to the International Searching Authority, for the purposes of Rule 13*ter*.1, together with the paper part of the search copy;

(iii) mark the words "HOME COPY—SEQUENCE LISTINGS AND/OR TABLES" on the other such copy of the electronic medium containing the sequence listings and/or tables in electronic form and keep that part of the home copy in its files together with the paper part of the home copy.

(f) The receiving Office may, when marking the copies referred to in paragraphs (d) and (e), use, instead of the words referred to in those paragraphs, the equivalent of those words in the language of publication of the international application.

Section 805

Publication and Communication of International Applications Containing Sequence Listings and/or Tables; Copies; Priority Documents

(a) Notwithstanding Section 406, an international application containing sequence listings and/or tables may be published under Article 21, in whole or in part, in electronic form as determined by the Director General.

(b) Paragraph (a) shall apply *mutatis mutandis* in relation to:

(i) the communication of an international application under Article 20;

(ii) the furnishing of copies of an international application under Rules 87 and 94.1;

(iii) the furnishing under Rule 17.1, as a priority document, of a copy of an international application containing sequence listings and/or tables filed under Section 801(a);

(iv) the furnishing under Rules 17.2 and 66.7 of copies of a priority document.

Section 806

Sequence Listings and/or Tables for Designated Office

(a) Where sequence listings and/or tables were filed only in electronic form under Section 801(a)(i), any designated Office which does not accept the filing of sequence listings and/or tables in electronic form may require that the applicant furnish to it, for the purposes of the national phase, a copy on paper of such sequence listings complying with Annex C and a copy on paper of such tables, accompanied by a statement that the sequence listings and/or tables on paper are identical to the sequence listings and/or tables in electronic form.

(b) Rule 13*ter*.3 shall apply *mutatis mutandis* to any tables filed under Section 801(a).

(c) For the purposes of Rule 49.5, any designated Office may require that the applicant furnish to it a translation of any text matter contained in any tables filed under Section 801(a), if that text matter is not in the language-neutral vocabulary referred to in Annex C and if it does not appear in the main part of the description in the language thereof.

[Annexes follow]

ANNEX A

FORMS

[This Annex, which is not reproduced here, contains Forms for use by applicants and by the International Authorities, including those referred to in Section 102 of the Administrative Instructions. It consists of five Parts, as follows:

Part I: Forms Relating to the Receiving Office;

Part II: Forms Relating to the International Searching Authority;

Part III: Forms Relating to the International Bureau;

Part IV: Forms Relating to the International Preliminary Examining Authority;

Part V: Request and Demand Forms.

These forms are available from the WIPO web site at: www.wipo.int/pct/en/texts/index.htm; paper copies are available from the International Bureau on request.]

[Annex B follows]

ANNEX B

UNITY OF INVENTION

(a) **Unity of Invention**. Rule 13.1 deals with the requirement of unity of invention and states the principle that an international application should relate to only one invention or, if there is more than one invention, that the inclusion of those inventions in one international application is only permitted if all inventions are so linked as to form a single general inventive concept.

(b) **Technical Relationship**. Rule 13.2 defines the method for determining whether the requirement of unity of invention is satisfied in respect of a group of inventions claimed in an international application. Unity of invention exists only when there is a technical relationship among the claimed inventions involving one or more of the same or corresponding "special technical features". The expression "special technical features" is defined in Rule 13.2 as meaning those technical features that define a contribution which each of the inventions, considered as a whole, makes over the prior art. The determination is made on the contents of the claims as interpreted in light of the description and drawings (if any).

(c) **Independent and Dependent Claims**. Unity of invention has to be considered in the first place only in relation to the independent claims in an international application and not the dependent claims. By "dependent" claim is meant a claim which contains all the features of another claim and is in the same category of claim as that other claim (the expression "category of claim" referring to the classification of claims according to the subject matter of the invention claimed for example, product, process, use or apparatus or means, etc.).

(i) If the independent claims avoid the prior art and satisfy the requirement of unity of invention, no problem of lack of unity arises in respect of any claims that depend on the independent claims. In particular, it does not matter if a dependent claim itself contains a further invention. Equally, no problem arises in the case of a genus/species situation where the genus claim avoids the prior art. Moreover, no problem arises in the case of a combination/subcombination situation where the subcombination claim avoids the prior art and the combination claim includes all the features of the subcombination.

(ii) If, however, an independent claim does not avoid the prior art, then the question whether there is still an inventive link between all the claims dependent on that claim needs to be carefully considered. If there is no link remaining, an objection of lack of unity a *posteriori* (that is, arising only after assessment of the prior art) may be raised. Similar considerations apply in the case of a genus/species or combination/subcombination situation.

(iii) This method for determining whether unity of invention exists is intended to be applied even before the commencement of the international search. Where a search of the prior art is made, an initial determination of unity of invention, based on the assumption that the claims avoid the prior art, may be reconsidered on the basis of the results of the search of the prior art.

(d) **Illustrations of Particular Situations**. There are three particular situations for which the method for determining unity of invention contained in Rule 13.2 is explained in greater detail:

(i) combinations of different categories of claims;

(ii) so-called "Markush practice"; and

(iii) intermediate and final products.

Principles for the interpretation of the method contained in Rule 13.2, in the context of each of those situations are set out below. It is understood that the principles set out below are, in all instances, interpretations of and not exceptions to the requirements of Rule 13.2.

Examples to assist in understanding the interpretation on the three areas of special concern referred to in the preceding paragraph are set out below.

(e) **Combinations of Different Categories of Claims**. The method for determining unity of invention under Rule 13.2 shall be construed as

permitting, in particular, the inclusion of any one of the following combinations of claims of different categories in the same international application:

(i) in addition to an independent claim for a given product, an independent claim for a process specially adapted for the manufacture of the said product, and an independent claim for a use of the said product, or

(ii) in addition to an independent claim for a given process, an independent claim for an apparatus or means specifically designed for carrying out the said process, or

(iii) in addition to an independent claim for a given product, an independent claim for a process specially adapted for the manufacture of the said product and an independent claim for an apparatus or means specifically designed for carrying out the said process,

it being understood that a process is specially adapted for the manufacture of a product if it inherently results in the product and that an apparatus or means is specifically designed for carrying out a process if the contribution over the prior art of the apparatus or means corresponds to the contribution the process makes over the prior art.

Thus, a process shall be considered to be specially adapted for the manufacture of a product if the claimed process inherently results in the claimed product with the technical relationship being present between the claimed product and claimed process. The words "specially adapted" are not intended to imply that the product could not also be manufactured by a different process.

Also an apparatus or means shall be considered to be "specifically designed for carrying out" a claimed process if the contribution over the prior art of the apparatus or means corresponds to the contribution the process makes over the prior art. Consequently, it would not be sufficient that the apparatus or means is merely capable of being used in carrying out the claimed process. However, the expression "specifically designed" does not imply that the apparatus or means could not be used for carrying out another process, nor that the process could not be carried out using an alternative apparatus or means.

(f) **"Markush Practice"**. The situation involving the so-called "Markush practice" wherein a single claim defines alternatives (chemical or non-chemical) is also governed by Rule 13.2. In this special situation, the requirement of a technical interrelationship and the same or corresponding special technical features as defined in Rule 13.2, shall be considered to be met when the alternatives are of a similar nature.

(i) When the Markush grouping is for alternatives of chemical compounds, they shall be regarded as being of a similar nature where the following criteria are fulfilled:

(A) all alternatives have a common property or activity, and

(B)(1) a common structure is present, i.e., a significant structural element is shared by all of the alternatives, or

(B)(2) in cases where the common structure cannot be the unifying criteria, all alternatives belong to a recognized class of chemical compounds in the art to which the invention pertains.

(ii) In paragraph (f)(i)(B)(1), above, the words "significant structural element is shared by all of the alternatives" refer to cases where the compounds share a common chemical structure which occupies a large portion of their structures, or in case the compounds have in common only a small portion of their structures, the commonly shared structure constitutes a structurally distinctive portion in view of existing prior art, and the common structure is essential to the common property or activity. The structural element may be a single component or a combination of individual components linked together.

(iii) In paragraph (f)(i)(B)(2), above, the words "recognized class of chemical compounds" mean that there is an expectation from the knowledge in the art that members of the class will behave in the same way in the context of the claimed invention. In other words, each member could be substituted one for the other, with the expectation that the same intended result would be achieved.

(iv) The fact that the alternatives of a Markush grouping can be differently classified shall not, taken alone, be considered to be justifi-

cation for a finding of a lack of unity of invention.

(v) When dealing with alternatives, if it can be shown that at least one Markush alternative is not novel over the prior art, the question of unity of invention shall be reconsidered by the examiner. Reconsideration does not necessarily imply that an objection of lack of unity shall be raised.

(g) **Intermediate and Final Products**. The situation involving intermediate and final products is also governed by Rule 13.2.

(i) The term "intermediate" is intended to mean intermediate or starting products. Such products have the ability to be used to produce final products through a physical or chemical change in which the intermediate loses its identity.

(ii) Unity of invention shall be considered to be present in the context of intermediate and final products where the following two conditions are fulfilled:

(A) the intermediate and final products have the same essential structural element, in that:

(1) the basic chemical structures of the intermediate and the final products are the same, or

(2) the chemical structures of the two products are technically closely interrelated, the intermediate incorporating an essential structural element into the final product, and

(B) the intermediate and final products are technically interrelated, this meaning that the final product is manufactured directly from the intermediate or is separated from it by a small number of intermediates all containing the same essential structural element.

(iii) Unity of invention may also be considered to be present between intermediate and final products of which the structures are not known—for example, as between an intermediate having a known structure and a final product the structure of which is not known, or as between an intermediate of unknown structure and a final product of unknown structure. In order to satisfy unity in such cases, there shall be sufficient evidence to lead one to conclude that the intermediate and final products are technically closely interrelated as, for example, when the intermediate contains the same essential element as the final product or incorporates an essential element into the final product.

(iv) It is possible to accept in a single international application different intermediate products used in different processes for the preparation of the final product, provided that they have the same essential structural element.

(v) The intermediate and final products shall not be separated, in the process leading from one to the other, by an intermediate which is not new.

(vi) If the same international application claims different intermediates for different structural parts of the final product, unity shall not be regarded as being present between the intermediates.

(vii) If the intermediate and final products are families of compounds, each intermediate compound shall correspond to a compound claimed in the family of the final products. However, some of the final products may have no corresponding compound in the family of the intermediate products so that the two families need not be absolutely congruent.

(h) As long as unity of invention can be recognized applying the above interpretations, the fact that, besides the ability to be used to produce final products, the intermediates also exhibit other possible effects or activities shall not affect the decision on unity of invention.

(i) Rule 13.3 requires that the determination of the existence of unity of invention be made without regard to whether the inventions are claimed in separate claims or as alternatives within a single claim.

(j) Rule 13.3 is not intended to constitute an encouragement to the use of alternatives within a single claim, but is intended to clarify that the criterion

for the determination of unity of invention (namely, the method contained in Rule 13.2) remains the same regardless of the form of claim used.

(k) Rule 13.3 does not prevent an International Searching or Preliminary Examining Authority or an Office from objecting to alternatives being contained within a single claim on the basis of considerations such as clarity, the conciseness of claims or the claims fee system applicable in that Authority or Office.

(l) Examples giving guidance on how these principles may be interpreted in particular cases are set out in the PCT International Search and Preliminary Examination Guidelines.

[Annex C follows]

ANNEX C

STANDARD FOR THE PRESENTATION OF NUCLEOTIDE AND AMINO ACID SEQUENCE LISTINGS IN INTERNATIONAL PATENT APPLICATIONS UNDER THE PCT

Introduction

1. This Standard has been elaborated so as to provide standardization of the presentation of nucleotide and amino acid sequence listings in international patent applications. The Standard is intended to allow the applicant to draw up a single sequence listing which is acceptable to all receiving Offices, International Searching and Preliminary Examining Authorities for the purposes of the international phase, and to all designated and elected Offices for the purposes of the national phase. It is intended to enhance the accuracy and quality of presentations of nucleotide and amino acid sequences given in international applications, to make for easier presentation and dissemination of sequences for the benefit of applicants, the public and examiners, to facilitate searching of sequence data and to allow the exchange of sequence data in electronic form and the introduction of sequence data onto computerized databases.

Definitions

2. For the purposes of this Standard:

(i) the expression “sequence listing” means a part of the description of the application as filed or a document filed subsequently to the application, which gives a detailed disclosure of the nucleotide and/or amino acid sequences and other available information;

(ii) sequences which are included are any unbranched sequences of four or more amino acids or unbranched sequences of ten or more nucleotides. Branched sequences, sequences with fewer than four specifically defined nucleotides or amino acids as well as sequences comprising nucleotides or amino acids other than those listed in Appendix 2, Tables 1, 2, 3 and 4, are specifically excluded from this definition;

(iii) “nucleotides” embrace only those nucleotides that can be represented using the symbols set forth in Appendix 2, Table 1. Modifications, for example, methylated bases, may be described as set forth in Appendix 2, Table 2, but shall not be shown explicitly in the nucleotide sequence;

(iv) “amino acids” are those L-amino acids commonly found in naturally occurring proteins and are listed in Appendix 2, Table 3. Those amino acid sequences containing at least one D-amino acid are not intended to be embraced by this definition. Any amino acid sequence that contains post-translationally modified amino acids may be described as the amino acid sequence that is initially translated using the symbols shown in Appendix 2, Table 3, with the modified positions, for example, hydroxylations or glycosylations, being described as set forth in Appendix 2, Table 4, but these modifications shall not be shown explicitly in the amino acid sequence. Any peptide or protein that can be expressed as a sequence using the symbols in Appendix 2, Table 3, in conjunction with a description elsewhere to describe, for example, abnormal linkages, cross-links (for example, disulfide bridge) and end caps, non-peptidyl bonds, etc., is embraced by this definition;

(v) “sequence identifier” is a unique integer that corresponds to the SEQ ID NO assigned to each sequence in the listing;

(vi) “numeric identifier” is a three-digit number which represents a specific data element;

(vii) “language-neutral vocabulary” is a controlled vocabulary used in the sequence listing that represents scientific terms as prescribed by sequence database providers (including scientific names, qualifiers and their controlled-vocabulary values, the symbols appearing in Appendix 2, Tables 1, 2, 3 and 4, and the feature keys appearing in Appendix 2, Tables 5 and 6;

(viii) “competent Authority” is the International Searching Authority that is to carry out the international search and to establish the written opinion of the International Searching Authority on the international applica-

tion, or the International Preliminary Examining Authority that is to carry out the international preliminary examination on the international application, or the designated/elected Office before which the processing of the international application has started.

Sequence Listing

3. The sequence listing as defined in paragraph 2(i) shall, where it is filed together with the application, be placed at the end of the application. This part shall be entitled "Sequence Listing", begin on a new page and preferably have independent page numbering. The sequence listing forms an integral part of the description; it is therefore unnecessary, subject to paragraph 36, to describe the sequences elsewhere in the description.

4. Where the sequence listing as defined in paragraph 2(i) is not contained in the application as filed but is a separate document furnished subsequently to the filing of the application (see paragraph 37), it shall be entitled "Sequence Listing" and shall have independent page numbering. The original numbering of the sequences (see paragraph 5) in the application as filed shall be maintained in the subsequently furnished sequence listing.

5. Each sequence shall be assigned a separate sequence identifier. The sequence identifiers shall begin with 1 and increase sequentially by integers. If no sequence is present for a sequence identifier, the code 000 should appear under numeric identifier <400>, beginning on the next line following the SEQ ID NO. The response for numeric identifier <160> shall include the total number of SEQ ID NOs, whether followed by a sequence or by the code 000.

6. In the description, claims or drawings of the application, the sequences represented in the sequence listing shall be referred to by the sequence identifier and preceded by "SEQ ID NO:".

7. Nucleotide and amino acid sequences should be represented by at least one of the following three possibilities:

(i) a pure nucleotide sequence;
(ii) a pure amino acid sequence;
(iii) a nucleotide sequence together with its corresponding amino acid sequence.

For those sequences disclosed in the format specified in option (iii), above, the amino acid sequence must be disclosed separately in the sequence listing as a pure amino acid sequence with a separate integer sequence identifier.

Nucleotide Sequences

Symbols to Be Used

8. A nucleotide sequence shall be presented only by a single strand, in the 5'-end to 3'-end direction from left to right. The terms 3' and 5' shall not be represented in the sequence.

9. The bases of a nucleotide sequence shall be represented using the one-letter code for nucleotide sequence characters. Only lower case letters in conformity with the list given in Appendix 2, Table 1, shall be used.

10. Modified bases shall be represented as the corresponding unmodified bases or as "n" in the sequence itself if the modified base is one of those listed in Appendix 2, Table 2, and the modification shall be further described in the feature section of the sequence listing, using the codes given in Appendix 2, Table 2. These codes may be used in the description or the feature section of the sequence listing but not in the sequence itself (see also paragraph 32). The symbol "n" is the equivalent of only one unknown or modified nucleotide.

Format to be Used

11. A nucleotide sequence shall be listed with a maximum of 60 bases per line, with a space between each group of 10 bases.

12. The bases of a nucleotide sequence (including introns) shall be listed in groups of 10 bases, except in the coding parts of the sequence. Leftover bases, fewer than 10 in number at the end of non-coding parts of a sequence, should be grouped together and separated from adjacent groups by a space.

13. The bases of the coding parts of a nucleotide sequence shall be listed as triplets (codons).

14. The enumeration of the nucleotide shall start at the first base of the sequence with number 1. It shall be continuous through the whole sequence in the direction 5' to 3'. It shall be marked in the right margin, next to the line containing the one-letter codes for the bases, and giving the number of the last base of that line. The enumeration method for nucleotide sequences set forth above remains applicable to nucleotide sequences that are circular in configuration, with the exception that the designation of the first nucleotide of the sequence may be made at the option of the applicant.

15. A nucleotide sequence that is made up of one or more non-contiguous segments of a larger sequence or of segments from different sequences shall be numbered as a separate sequence, with a separate sequence identifier. A sequence with a gap or gaps shall be numbered as a plurality of separate sequences with separate sequence identifiers, with the number of separate sequences being equal in number to the number of continuous strings of sequence data.

Amino Acid Sequences

Symbols to Be Used

16. The amino acids in a protein or peptide sequence shall be listed in the amino to carboxy direction from left to right. The amino and carboxy groups shall not be represented in the sequence.

17. The amino acids shall be represented using the three-letter code with the first letter as a capital and shall conform to the list given in Appendix 2, Table 3. An amino acid sequence that contains a blank or internal terminator symbols (for example, “Ter” or “*” or “.”) may not be represented as a single amino acid sequence, but shall be presented as separate amino acid sequences (see paragraph 22).

18. Modified and unusual amino acids shall be represented as the corresponding unmodified amino acids or as “Xaa” in the sequence itself if the modified amino acid is one of those listed in Appendix 2, Table 4, and the modification shall be further described in the feature section of the sequence listing, using the codes given in Appendix 2, Table 4. These codes may be used in the description or the feature section of the sequence listing but not in the sequence itself (see also paragraph 32). The symbol “Xaa” is the equivalent of only one unknown or modified amino acid.

Format to Be Used

19. A protein or peptide sequence shall be listed with a maximum of 16 amino acids per line, with a space provided between each amino acid.

20. Amino acids corresponding to the codons in the coding parts of a nucleotide sequence shall be placed immediately under the corresponding codons. Where a codon is split by an intron, the amino acid symbol should be given below the portion of the codon containing two nucleotides.

21. The enumeration of amino acids shall start at the first amino acid of the sequence, with number 1. Optionally, the amino acids preceding the mature protein, for example pre-sequences, pro-sequences, pre-pro-sequences and signal sequences, when present, may have negative numbers, counting backwards starting with the amino acid next to number 1. Zero (0) is not used when the numbering of amino acids uses negative numbers to distinguish the mature protein. It shall be marked under the sequence every five amino acids. The enumeration method for amino acid sequences set forth above remains applicable for amino acid sequences that are circular in configuration, with the exception that the designation of the first amino acid of the sequence may be made at the option of the applicant.

22. An amino acid sequence that is made up of one or more non-contiguous segments of a larger sequence or of segments from different sequences shall be numbered as a separate sequence, with a separate sequence identifier. A sequence with a gap or gaps shall be numbered as a plurality of separate sequences with separate sequence identifiers, with the number of separate sequences being equal in number to the number of continuous strings of sequence data.

Other Available Information in the Sequence Listing

23. The order of the items of information in the sequence listings shall follow the order in which those items are listed in the list of numeric identifiers of data elements as defined in Appendix 1.

24. Only numeric identifiers of data elements as defined in Appendix 1 shall be used for the presentation of the items of information in the sequence listing. The corresponding numeric identifier descriptions shall not be used. The provided information shall follow immediately after the numeric identifier while only those numeric identifiers for which information is given need appear on the sequence listing. Two exceptions to this requirement are numeric identifiers <220> and <300>, which serve as headers for "Feature" and "Publication Information," respectively, and are associated with information in numeric identifiers <221> to <223> and <301> to <313>, respectively. When feature and publication information is provided in the sequence listing under those numeric identifiers, numeric identifiers <220> and <300>, respectively, should be included, but left blank. Generally, a blank line shall be inserted between numeric identifiers when the digit in the first or second position of the numeric identifier changes. An exception to this general rule is that no blank line should appear preceding numeric identifier <310>. Additionally, a blank line shall precede any repeated numeric identifier.

Mandatory Data Elements

25. The sequence listing shall include, in addition to and immediately preceding the actual nucleotide and/or amino acid sequence, the following items of information defined in Appendix 1 (mandatory data elements).

<110>	Applicant name
<120>	Title of invention
<160>	Number of SEQ ID NOs
<210>	SEQ ID NO: x
<211>	Length
<212>	Type
<213>	Organism
<400>	Sequence

Where the name of the applicant (numeric identifier <110>) is written in characters other than those of the Latin alphabet, it shall also be indicated in characters of the Latin alphabet either as a mere transliteration or through translation into English.

The data elements, except those under numeric identifiers <110>, <120> and <160>, shall be repeated for each sequence included in the sequence listing. Only the data elements under numeric identifiers <120> and <400>

are mandatory if no sequence is present for a sequence identifier (see paragraph 5, above, and SEQ ID NO: 4 in the example depicted in Appendix 3 of this Standard).

26. In addition to the data elements identified in paragraph 25, above, when a sequence listing is filed at the same time as the application to which it pertains or at any time prior to the assignment of an application number, the following data element shall be included in the sequence listing.

<130>	File reference

27. In addition to the data elements identified in paragraph 25, above, when a sequence listing is filed in response to a request from a competent Authority or at any time following the assignment of an application number, the following data elements shall be included in the sequence listing.

<140>	Current patent application
<141>	Current filing date

28. In addition to the data elements identified in paragraph 25, above, when a sequence listing is filed relating to an application which claims the priority of an earlier application, the following data elements shall be included in the sequence listing:

<150>	Earlier patent application
<151>	Earlier application filing date

29. If “n” or “Xaa” or a modified base or modified/unusual L-amino acid is used in the sequence, the following data elements are mandatory:

<220>	Feature
<221>	Name/key
<222>	Location
<223>	Other information

30. If the organism (numeric identifier <213>) is “Artificial Sequence” or “Unknown,” the following data elements are mandatory:

<220>	Feature
<223>	Other information

Optional Data Elements

31. All data elements defined in Appendix 1, not mentioned in paragraphs 25 to 30, above, are optional (optional data elements).

Presentation of Features

32. When features of sequences are presented (that is, numeric identifier <220>), they shall be described by the "feature keys" set out in Appendix 2, Tables 5 and 6.[7]

Free Text

33. "Free text" is a wording describing characteristics of the sequence under numeric identifier <223> (Other information) which does not use language-neutral vocabulary as referred to in paragraph 2(vii).

34. The use of free text shall be limited to a few short terms indispensable for the understanding of the sequence. It shall not exceed four lines with a maximum of 65 characters per line for each given data element, when written in English. Any further information shall be included in the main part of the description in the language thereof.

35. Any free text should preferably be in the English language.

36. Where the sequence listing part of the description contains free text, any such free text shall be repeated in the main part of the description in the language thereof. It is recommended that the free text in the language of the main part of the description be put in a specific section of the description called "Sequence Listing Free Text."

Subsequently Furnished Sequence Listing

37. Any sequence listing which is not contained in the application as filed but which is furnished subsequently shall not go beyond the disclosure in the application as filed and shall be accompanied by a statement to that effect. This means that a sequence listing furnished subsequently to the filing of the application shall contain only those sequences that were disclosed in the application as filed.

38. Any sequence listing not contained in the application as filed does not form part of the application. However, the provisions of PCT Rules 13*ter*, 26.3, and 91 and PCT Article 34 would apply, so that it may be possible, subject to the applicable provisions, for a sequence listing contained in the application as filed to be corrected under PCT Rules 13*ter* or 26.3, rectified under PCT Rule 91 (in the case of an obvious error), or amended under PCT Article 34, or for a sequence listing to be submitted under PCT Article 34 as an amendment to the application.

Electronic Form of the Sequence Listing

39. A copy of the sequence listing shall also be submitted in electronic form, in addition to the sequence listing as contained in the application, whenever this is required by the competent Authority.

40. Any sequence listing in electronic form submitted in addition to the sequence listing as contained in the application shall be identical to the sequence listing as contained in the application and shall be accompanied by a statement that "the information recorded in electronic form is identical to the sequence listing as contained in the application."

[7] *Editor's Note:* These tables contain extracts from the DDBJ/EMBL/GenBank Feature Table (nucleotide sequences) and the SWISS PROT Feature Table (amino acid sequences).

41. The entire printable copy of the sequence listing shall be contained within one electronic file preferably on a single diskette or any other electronic medium that is acceptable to the competent Authority. The file recorded on the diskette or any other electronic medium that is acceptable to the competent Authority shall be encoded using IBM[8] Code Page 437, IBM Code Page 932[9] or a compatible code page. A compatible code page, as would be required for, for example, Japanese, Chinese, Cyrillic, Arabic, Greek or Hebrew characters, is one that assigns the Roman alphabet and numerals to the same hexadecimal positions as do the specified code pages.

42. The electronic form shall preferably be created by dedicated software such as PatentIn or other custom computer programs; it may be created by any means, as long as the sequence listing on a submitted diskette or any other electronic medium that is acceptable to the competent Authority is machine searchable under a Personal Computer Operating system that is acceptable to the competent Authority.

43. File compression is acceptable when using diskette media, so long as the compressed file is in a self-extracting format that will decompress on a Personal Computer Operating system that is acceptable to the competent Authority.

44. The diskette or any other electronic medium that is acceptable to the competent Authority shall have a label permanently affixed thereto on which has been hand-printed, in block capitals or typed, the name of the applicant, the title of the invention, a reference number, the date on which the data were recorded, the computer operating system and the name of the competent Authority.

45. If the diskette or any other electronic medium that is acceptable to the competent Authority is submitted after the date of filing of an application, the labels shall also include the filing date of the application and the application number.

46. Any correction of the sequence listing as contained in the application which is submitted under PCT Rules 13*ter*.1(b) or 26.3, any rectification of an obvious error in the sequence listing as contained in the application which is submitted under PCT Rule 91, or any amendment which includes a sequence listing as contained in the application and which is submitted under PCT Article 34, shall be accompanied by a copy in electronic form of the sequence listing including any such correction, rectification or amendment.

Annex C, Appendix 1
Numeric Identifiers

Only numeric identifiers as defined below may be used in sequence listings submitted in applications. The text of the data element headings given below shall not be included in the sequence listings.

Numeric identifiers of mandatory data elements, that is, data elements which must be included in all sequence listings (see paragraph 25 of this Standard: items 110, 120, 160, 210, 211, 212, 213 and 400) and numeric identifiers of data elements which must be included in circumstances specified in this Standard (see paragraphs 26, 27, 28, 29 and 30 of this Standard: items 130, 140, 141, 150 and 151, and 220 to 223) are marked by the symbol "M."

Numeric identifiers of optional data elements (see paragraph 31 of this Standard) are marked by the symbol "O."

Numeric Identifier	Numeric Identifier Description	Mandatory (M) or Optional (O)	Comment
<110>	Applicant name	M	where the name of the applicant is written in characters other than those of the Latin alphabet, the same shall also be indicated in characters of the Latin alphabet either as a mere transliteration or through translation into English
<120>	Title of Invention	M	
<130>	File Reference	M, in the circumstances specified in paragraph 26 of this Standard	see paragraph 26 of this Standard
<140>	Current patent application	M, in the circumstances specified in paragraph 27 of this Standard	see paragraph 27 of this Standard; the current patent application shall be identified, in the following order, by the two-letter code indicated in accordance with WIPO Standard ST.3 and the application number (in the format used by the industrial property Office with which the current patent application is filed) or, for an international application, by the international application number
<141>	Current filing date	M, in the circumstances specified in paragraph 27 of this Standard	see paragraph 27 of this Standard; the date shall be indicated in accordance with WIPO Standard ST.2 (CCYY MM DD)
<150>	Earlier patent application	M, in the circumstances specified in paragraph 28 of this Standard	see paragraph 28 of this Standard; the earlier patent application shall be identified, in the following order, by the two-letter code indicated in accordance with WIPO Standard ST.3 and the application number (in the format used by the industrial property Office with which the earlier patent application was filed) or, for an international application, by the international application number

Numeric Identifier	Numeric Identifier Description	Mandatory (M) or Optional (O)	Comment
<151>	Earlier application filing date	M, in the circumstances specified in paragraph 28 of this Standard	see paragraph 28 of this Standard; the date shall be indicated in accordance with WIPO Standard ST.2 (CCYY MM DD)
<160>	Number of SEQ ID NOs	M	
<170>	Software	O	
<210>	Information for SEQ ID NO: x	M	response shall be an integer representing the SEQ ID NO shown
<211>	Length	M	sequence length expressed in number of base pairs or amino acids
<212>	Type	M	type of molecule sequenced in SEQ ID NO: x, either DNA, RNA or PRT; if a nucleotide sequence contains both DNA and RNA fragments, the value shall be "DNA"; in addition, the combined DNA/RNA molecule shall be further described in the <220> to <223> feature section
<213>	Organism	M	Genus Species (that is, scientific name) or "Artificial Sequence" or "Unknown"
<220>	Feature	M, in the circumstances specified in paragraph 29 and 30 of this Standard	leave blank; see paragraphs 29 and 30 of this Standard; description of points of biological significance in the sequence in SEQ ID NO: x) (may be repeated depending on the number of features indicated)
<221>	Name/key	M in the circumstances specified in paragraph 29 of this Standard	see paragraph 29 of this Standard; only those keys as described in Table 5 or 6 of Appendix 2 shall be used
<222>	Location	M, in the circumstances specified in paragraph 29 of this Standard	see paragraph 29 of this Standard; - from (number of first base/amino acid in the feature) - to (number of last base/amino acid in the feature) - base pairs (numbers refer to positions of base pairs in a nucleotide sequence) - amino acids (numbers refer to positions of amino acid residues in an amino acid sequence) - whether feature is located on the complementary strand to that filed in the sequence listing

Numeric Identifier	Numeric Identifier Description	Mandatory (M) or Optional (O)	Comment
<223>	Other information:	M, in the circumstances specified in paragraphs 29 and 30 of this Standard	see paragraphs 29 and 30 of this Standard; any other relevant information, using language neutral vocabulary, or free text (preferably in English); any free text is to be repeated in the main part of the description in the language thereof (see paragraph 36 of this Standard); where any modified base or modified/unusual L-amino acid appearing in Appendix 2, Tables 2 and 4, is in the sequence, the symbol associated with that base or amino acid from Appendix 2, Tables 2 and 4, should be used
<300>	Publication information	O	leave blank; repeat section for each relevant publication
<301>	Authors	O	
<302>	Title	O	title of publication
<303>	Journal	O	journal name in which data published
<304>	Volume	O	journal volume in which data published
<305>	Issue	O	journal issue number in which data published
<306>	Pages	O	journal page numbers on which data published
<307>	Date	O	journal date on which data published; if possible, the date shall be indicated in accordance with WIPO Standard ST.2 (CCYY MM DD)
<308>	Database accession number	O	accession number assigned by database including database name
<309>	Database entry date	O	date of entry in database; the date shall be indicated in accordance with WIPO Standard ST.2 (CCYY MM DD)
<310>	Document number	O	document number, for patent type citations only; the full document shall specify, in the following order, the two-letter code indicated in accordance with WIPO Standard ST.3, the publication number indicated in accordance with WIPO Standard ST.6, and the kind-of-document code indicated in accordance with WIPO Standard ST.16
<311>	Filing date	O	document filing date, for patent-type citations only; the date shall be indicated in accordance with WIPO Standard ST.2 (CCYY MM DD)

Numeric Identifier	Numeric Identifier Description	Mandatory (M) or Optional (O)	Comment
<312>	Publication date	O	document publication date; for patent-type citations only; the date shall be indicated in accordance with WIPO Standard ST.2 (CCYY MM DD)
<313>	Relevant residues in SEQ ID NO: x: from to	O	
<400>	Sequence	M	SEQ ID NO: x should follow the numeric identifier and should appear on the line preceding the sequence (see Appendix 3)

Annex C, Appendix 2
Nucleotide and Amino Acid Symbols and Feature Table

Table 1: List of Nucleotides

Symbol	Meaning	Origin of designation
a	a	adenine
g	g	guanine
c	c	cytosine
t	t	thymine
u	u	uracil
r	g or a	purine
y	t/u or c	pyrimidine
m	a or c	amino
k	g or t/u	keto
s	g or c	strong interactions 3H-bonds
w	a or t/u	weak interactions 2H-bonds
b	g or c or t/u	not a
d	a or g or t/u	not c
h	a or c or t/u	not g
v	a or g or c	not t, not u
n	a or g or c or t/u, unknown, or other	any

Table 2: List of Modified Nucleotides

Symbol	Meaning
ac4c	4-acetylcytidine
chm5u	5-(carboxyhydroxymethyl)uridine
cm	2'-O-methylcytidine
cmnm5s2u	5-carboxymethylaminomethyl-2-thiouridine
cmnm5u	5-carboxymethylaminomethyluridine
d	dihydrouridine
fm	2'-O-methylpseudouridine
gal q	beta, D-galactosylqueuosine

Symbol	Meaning
gm	2'-O-methylguanosine
i	inosine
i6a	N6-isopentenyladenosine
m1a	1-methyladenosine
m1f	1-methylpseudouridine
m1g	1-methylguanosine
m1i	1-methylinosine
m22g	2,2-dimethylguanosine
m2a	2-methyladenosine
m2g	2-methylguanosine
m3c	3-methylcytidine
m5c	5-methylcytidine
m6a	N6-methyladenosine
m7g	7-methylguanosine
mam5u	5-methylaminomethyluridine
mam5s2u	5-methoxyaminomethyl-2-thiouridine
man q	beta, D-mannosylqueuosine
mcm5s2u	5-methoxycarbonylmethyl-2-thiouridine
mcm5u	5-methoxycarbonylmethyluridine
mo5u	5-methoxyuridine
ms2i6a	2-methylthio-N6-isopentenyladenosine
ms2t6a	N-((9-beta-D-ribofuranosyl-2-methylthiopurine-6-yl)carbamoyl)threonine
mt6a	N-((9-beta-D-ribofuranosylpurine-6-yl)N-methylcarbamoyl)threonine
mv	uridine-5-oxyacetic acid-methylester
o5u	uridine-5-oxyacetic acid
osyw	wybutoxosine
p	pseudouridine
q	queuosine
s2c	2-thiocytidine
s2t	5-methyl-2-thiouridine

Symbol	Meaning
s2u	2-thiouridine
s4u	4-thiouridine
t	5-methyluridine
t6a	N-((9-beta-D-ribofuranosylpurine-6-yl)-carbamoyl)threonine
tm	2'-O-methyl-5-methyluridine
um	2'-O-methyluridine
yw	wybutosine
x	3-(3-amino-3-carboxy-propyl)uridine, (acp3)u

Table 3: List of Amino Acids

Symbol	Meaning
Ala	Alanine
Cys	Cysteine
Asp	Aspartic Acid
Glu	Glutamic Acid
Phe	Phenylalanine
Gly	Glycine
His	Histidine
Ile	Isoleucine
Lys	Lysine
Leu	Leucine
Met	Methionine
Asn	Asparagine
Pro	Proline
Gln	Glutamine
Arg	Arginine
Ser	Serine
Thr	Threonine
Val	Valine
Trp	Tryptophan
Tyr	Tyrosine
Asx	Asp or Asn
Glx	Glu or Gln
Xaa	unknown or other

Table 4: List of Modified and Unusual Amino Acids

Symbol	Meaning
Aad	2-Aminoadipic acid
bAad	3-Aminoadipic acid
bAla	beta-Alanine, beta-Aminopropionic acid

Symbol	Meaning
Abu	2-Aminobutyric acid
4Abu	4-Aminobutyric acid, piperidinic acid
Acp	6-Aminocaproic acid
Ahe	2-Aminoheptanoic acid
Aib	2-Aminoisobutyric acid
bAib	3-Aminoisobutyric acid
Apm	2-Aminopimelic acid
Dbu	2,4 Diaminobutyric acid
Des	Desmosine
Dpm	2,2'-Diaminopimelic acid
Dpr	2,3-Diaminopropionic acid
EtGly	N-Ethylglycine
EtAsn	N-Ethylasparagine
Hyl	Hydroxylysine
aHyl	allo-Hydroxylysine
3Hyp	3-Hydroxyproline
4Hyp	4-Hydroxyproline
Ide	Isodesmosine
aIle	allo-Isoleucine
MeGly	N-Methylglycine, sarcosine
MeIle	N-Methylisoleucine
MeLys	6-N-Methyllysine
MeVal	N-Methylvaline
Nva	Norvaline
Nle	Norleucine
Orn	Ornithine

Table 5: List of Feature Keys Related to Nucleotide Sequences

Key	Description
allele	a related individual or strain contains stable, alternative forms of the same gene which differs from the presented sequence at this location (and perhaps others)
attenuator	(1) region of DNA at which regulation of termination of transcription occurs, which controls the expression of some bacterial operons; (2) sequence segment located between the promoter and the first structural gene that causes partial termination of transcription
C_region	constant region of immunoglobulin light and heavy chains, and T-cell receptor alpha, beta, and gamma chains; includes one or more exons depending on the particular chain
CAAT_signal	CAAT box; part of a conserved sequence located about 75 bp up-stream of the start point of eukaryotic transcription units which may be involved in RNA polymerase binding; consensus=GG (C or T) CAATCT
CDS	coding sequence; sequence of nucleotides that corresponds with the sequence of amino acids in a protein (location includes stop codon); feature includes amino acid conceptual translation
conflict	independent determinations of the “same” sequence differ at this site or region
D-loop	displacement loop; a region within mitochondrial DNA in which a short stretch of RNA is paired with one strand of DNA, displacing the original partner DNA strand in this region; also used to describe the displacement of a region of one strand of duplex DNA by a single stranded invader in the reaction catalyzed by RecA protein
D-segment	diversity segment of immunoglobulin heavy chain, and T-cell receptor beta chain
enhancer	a cis-acting sequence that increases the utilization of (some) eukaryotic promoters, and can function in either orientation and in any location (upstream or downstream) relative to the promoter
exon	region of genome that codes for portion of spliced mRNA; may contain 5'UTR all CDSs, and 3'UTR
GC_signal	GC box; a conserved GC-rich region located upstream of the start point of eukaryotic transcription units which may occur in multiple copies or in either orientation; consensus=GGGCGG
gene	region of biological interest identified as a gene and for which a name has been assigned
iDNA	intervening DNA; DNA which is eliminated through any of several kinds of recombination
intron	a segment of DNA that is transcribed, but removed from within the transcript by splicing together the sequences (exons) on either side of it
J_segment	joining segment of immunoglobulin light and heavy chains, and T-cell receptor alpha, beta, and gamma chains
LTR	long terminal repeat, a sequence directly repeated at both ends of a defined sequence, of the sort typically found in retroviruses

Key	Description
mat_peptide	mature peptide or protein coding sequence; coding sequence for the mature or final peptide or protein product following post-translational modification; the location does not include the stop codon (unlike the corresponding CDS)
misc_binding	site in nucleic acid which covalently or non-covalently binds another moiety that cannot be described by any other Binding key (primer_bind or protein_bind)
misc_difference	feature sequence is different from that presented in the entry and cannot be described by any other Difference key (conflict, unsure, old_sequence, mutation, variation, allele, or modified_base)
misc_feature	region of biological interest which cannot be described by any other feature key; a new or rare feature
misc_recomb	site of any generalized, site-specific or replicative recombination event where there is a breakage and reunion of duplex DNA that cannot be described by other recombination keys (iDNA and virion) or qualifiers of source key (/insertion_seq, /transposon, /proviral)
misc_RNA	any transcript or RNA product that cannot be defined by other RNA keys (prim_transcript, precursor_RNA, mRNA, 5'clip, 3'clip, 5'UTR, 3'UTR, exon, CDS, sig_peptide, transit_peptide, mat_peptide, intron, polyA_site, rRNA, tRNA, scRNA, and snRNA)
misc_signal	any region containing a signal controlling or altering gene function or expression that cannot be described by other Signal keys (promoter, CAAT_signal, TATA_signal, -35_signal, -10_signal, GC_signal, RBS, polyA_signal, enhancer, attenuator, terminator, and rep_origin)
misc_structure	any secondary or tertiary structure or conformation that cannot be described by other Structure keys (stem_loop and D-loop)
modified_base	the indicated nucleotide is a modified nucleotide and should be substituted for by the indicated molecule (given in the mod_base qualifier value)
mRNA	messenger RNA; includes 5' untranslated region (5'UTR), coding sequences (CDS, exon) and 3' untranslated region (3'UTR)
mutation	a related strain has an abrupt, inheritable change in the sequence at this location
N_region	extra nucleotides inserted between rearranged immunoglobulin segments
old_sequence	the presented sequence revises a previous version of the sequence at this location
polyA_signal	recognition region necessary for endonuclease cleavage of an RNA transcript that is followed by polyadenylation; consensus=AATAAA
polyA_site	site on an RNA transcript to which will be added adenine residues by post-transcriptional polyadenylation
precursor_RNA	any RNA species that is not yet the mature RNA product; may include 5' clipped region (5'clip), 5' untranslated region (5'UTR), coding sequences (CDS, exon), intervening sequences (intron), 3' untranslated region (3'UTR), and 3' clipped region (3'clip)

Key	Description
prim_transcript	primary (initial, unprocessed) transcript; includes 5' clipped region (5'clip), 5' untranslated region (5'UTR), coding sequences (CDS, exon), intervening sequences (intron), 3' untranslated region (3'UTR), and 3' clipped region (3' clip)
primer_bind	non-covalent primer binding site for initiation of replication, transcription, or reverse transcription; includes site(s) for synthetic, for example, PCR primer elements
promoter	region on a DNA molecule involved in RNA polymerase binding to initiate transcription
protein_bind	non-covalent protein binding site on nucleic acid
RBS	ribosome binding site
repeat_region	region of genome containing repeating units
repeat_unit	single repeat element
rep_origin	origin of replication; starting site for duplication of nucleic acid to give two identical copies
rRNA	mature ribosomal RNA; the RNA component of the ribonucleoprotein particle (ribosome) which assembles amino acids into proteins
S_region	switch region of immunoglobulin heavy chains; involved in the rearrangement of heavy chain DNA leading to the expression of a different immunoglobulin class from the same B-cell
satellite	many tandem repeats (identical or related) of a short basic repeating unit; many have a base composition or other property different from the genome average that allows them to be separated from the bulk (main band) genomic DNA
scRNA	small cytoplasmic RNA; any one of several small cytoplasmic RNA molecules present in the cytoplasm and (sometimes) nucleus of a eukaryote
sig_peptide	signal peptide coding sequence; coding sequence for an N-terminal domain of a secreted protein; this domain is involved in attaching nascent polypeptide to the membrane; leader sequence
snRNA	small nuclear RNA; any one of many small RNA species confined to the nucleus; several of the snRNAs are involved in splicing or other RNA processing reactions
source	identifies the biological source of the specified span of the sequence; this key is mandatory; every entry will have, as a minimum, a single source key spanning the entire sequence; more than one source key per sequence is permissable
stem_loop	hairpin; a double-helical region formed by base-pairing between adjacent (inverted) complementary sequences in a single strand of RNA or DNA
STS	Sequence Tagged Site; short, single-copy DNA sequence that characterizes a mapping landmark on the genome and can be detected by PCR; a region of the genome can be mapped by determining the order of a series of STSs

Key	Description
TATA_signal	TATA box; Goldberg-Hogness box; a conserved AT-rich septamer found about 25 bp before the start point of each eukaryotic RNA polymerase II transcript unit which may be involved in positioning the enzyme for correct initiation; consensus=TATA(A or T)A(A or T)
terminator	sequence of DNA located either at the end of the transcript or adjacent to a promoter region that causes RNA polymerase to terminate transcription; may also be site of binding of repressor protein
transit_peptide	transit peptide coding sequence; coding sequence for an N-terminal domain of a nuclear-encoded organellar protein; this domain is involved in post-translational import of the protein into the organelle
tRNA	mature transfer RNA, a small RNA molecule (75-85 bases long) that mediates the translation of a nucleic acid sequence into an amino acid sequence
unsure	author is unsure of exact sequence in this region
V_region	variable region of immunoglobulin light and heavy chains, and T-cell receptor alpha, beta, and gamma chains; codes for the variable amino terminal portion; can be made up from V_segments, D_segments, N_regions, and J_segments
V_segment	variable segment of immunoglobulin light and heavy chains, and T-cell receptor alpha, beta, and gamma chains; codes for most of the variable region (V_region) and the last few amino acids of the leader peptide
variation	a related strain contains stable mutations from the same gene (for example, RFLPs, polymorphisms, etc.) which differ from the presented sequence at this location (and possibly others)
3'clip	3'-most region of a precursor transcript that is clipped off during processing
3'UTR	region at the 3′ end of a mature transcript (following the stop codon) that is not translated into a protein
5'clip	5'-most region of a precursor transcript that is clipped off during processing
5'UTR	region at the 5' end of a mature transcript (preceding the initiation codon) that is not translated into a protein
-10_signal	pribnow box; a conserved region about 10 bp upstream of the start point of bacterial transcription units which may be involved in binding RNA polymerase; consensus=TAtAaT
-35_signal	a conserved hexamer about 35 bp upstream of the start point of bacterial transcription units; consensus=TTGACa [ ] or TGTTGACA [ ]

Table 6: List of Feature Keys Related to Protein Sequences

Key	Description
CONFLICT	different papers report differing sequences
VARIANT	authors report that sequence variants exist
VARSPLIC	description of sequence variants produced by alternative splicing
MUTAGEN	site which has been experimentally altered
MOD_RES	post-translational modification of a residue
ACETYLATION	N-terminal or other
AMIDATION	generally at the C-terminal of a mature active peptide
BLOCKED	undetermined N- or C-terminal blocking group
FORMYLATION	of the N-terminal methionine
GAMMA-CARBOXYGLUTAMIC ACID HYDROXYLATION	of asparagine, aspartic acid, proline or lysine
METHYLATION	generally of lysine or arginine
PHOSPHORYLATION	of serine, threonine, tyrosine, aspartic acid or histidine
PYRROLIDONE CARBOXYLIC ACID	N-terminal glutamate which has formed an internal cyclic lactam
SULFATATION	generally of tyrosine
LIPID	covalent binding of a lipidic moiety
MYRISTATE	myristate group attached through an amide bond to the N-terminal glycine residue of the mature form of a protein or to an internal lysine residue
PALMITATE	palmitate group attached through a thioether bond to a cysteine residue or through an ester bond to a serine or threonine residue
FARNESYL	farnesyl group attached through a thioether bond to a cysteine residue
GERANYL-GERANYL	geranyl-geranyl group attached through a thioether bond to a cysteine residue
GPI-ANCHOR	glycosyl-phosphatidylinositol (GPI) group linked to the alpha-carboxyl group of the C-terminal residue of the mature form of a protein
N-ACYL DIGLYCERIDE	N-terminal cysteine of the mature form of a prokaryotic lipoprotein with an amide-linked fatty acid and a glyceryl group to which two fatty acids are linked by ester linkages

Key	Description
DISULFID	disulfide bond; the 'FROM' and 'TO' endpoints represent the two residues which are linked by an intra-chain disulfide bond; if the 'FROM' and 'TO' endpoints are identical, the disulfide bond is an interchain one and the description field indicates the nature of the cross-link
THIOLEST	thiolester bond; the 'FROM' and 'TO' endpoints represent the two residues which are linked by the thiolester bond
THIOETH	thioether bond; the 'FROM' and 'TO'endpoints represent the two residues which are linked by the thioether bond
CARBOHYD	glycosylation site; the nature of the carbohydrate (if known) is given in the description field
METAL	binding site for a metal ion; the description field indicates the nature of the metal
BINDING	binding site for any chemical group (co-enzyme, prosthetic group, etc.); the chemical nature of the group is given in the description field
SIGNAL	extent of a signal sequence (prepeptide)
TRANSIT	extent of a transit peptide (mitochondrial, chloroplastic, or for a microbody)
PROPEP	extent of a propeptide
CHAIN	extent of a polypeptide chain in the mature protein
PEPTIDE	extent of a released active peptide
DOMAIN	extent of a domain of interest on the sequence; the nature of that domain is given in the description field
CA_BIND	extent of a calcium-binding region
DNA_BIND	extent of a DNA-binding region
NP_BIND	extent of a nucleotide phosphate binding region; the nature of the nucleotide phosphate is indicated in the description field
TRANSMEM	extent of a transmembrane region
ZN_FING	extent of a zinc finger region
SIMILAR	extent of a similarity with another protein sequence; precise information, relative to that sequence is given in the description field
REPEAT	extent of an internal sequence repetition
HELIX	secondary structure: Helices, for example, Alpha-helix, 3(10) helix, or Pi-helix

Key	Description
STRAND	secondary structure: Beta-strand, for example, Hydrogen bonded beta-strand, or Residue in an isolated beta-bridge
TURN	secondary structure Turns, for example, H-bonded turn (3-turn, 4-turn or 5-turn)
ACT_SITE	amino acid(s) involved in the activity of an enzyme
SITE	any other interesting site on the sequence
INIT_MET	the sequence is known to start with an initiator methionine
NON_TER	the residue at an extremity of the sequence is not the terminal residue; if applied to position 1, this signifies that the first position is not the N-terminus of the complete molecule; if applied to the last position, it signifies that this position is not the C-terminus of the complete molecule; there is no description field for this key
NON_CONS	non consecutive residues; indicates that two residues in a sequence are not consecutive and that there are a number of unsequenced residues between them
UNSURE	uncertainties in the sequence; used to describe region(s) of a sequence for which the authors are unsure about the sequence assignment

ANNEX C-bis

TECHNICAL REQUIREMENTS FOR THE PRESENTATION OF TABLES RELATED TO NUCLEOTIDE AND AMINO ACID SEQUENCE LISTINGS IN INTERNATIONAL PATENT APPLICATIONS UNDER THE PCT

Introduction

1. These technical requirements have been elaborated so as to provide standardization of the presentation of tables related to nucleotide and amino acid sequence listings in international patent applications. These technical requirements are intended to allow the applicant to draw up such tables in a manner which is acceptable to all receiving Offices, International Searching Authorities, International Preliminary Examining Authorities and to the International Bureau for the purposes of the international phase and to all designated and elected Offices for the purposes of the national phase.

Definition

2. For the purposes of these technical requirements, "competent Authority" is the International Searching Authority that is to carry out the international search on the international application, or the International Preliminary Examining Authority that is to carry out the international preliminary examination on the international application, or the designated/elected Office before which the processing of the international application has started.

Tables related to sequence listings

3. Tables filed in electronic form under Section 801(a) shall comply with one of the following character formats:

   (i) UTF-8-encoded Unicode 3.0; or

   (ii) XML format conforming to the "Application-Body" Document Type Definition referred to in Appendix I of Annex F;

   at the option of the competent Authority.

4. The spatial relationships (e.g., columns and rows) of the table elements shall be maintained.

5. At the option of the competent Authority, file compression is acceptable, so long as the compressed file is in a self-extracting format that will decompress on a Personal Computer Operating system that is acceptable to the competent Authority and to the International Bureau.

6. Each table shall be contained within a separate electronic file on any electronic medium that is acceptable to the competent Authority. The file recorded on the electronic medium that is acceptable to the competent Authority shall be encoded using IBM Code Page 437, IBM Code Page 932 or a compatible code page. A compatible code page, as would be required for, for example, Japanese, Chinese, Cyrillic, Arabic, Greek or Hebrew characters, is one that assigns the Roman alphabet and numerals to the same hexadecimal positions as do the specified code pages.

7. Tables filed in electronic form may be created by any means, as long as the table on an electronic medium that is acceptable to the competent Authority is readable under a Personal Computer Operating system that is acceptable to the competent Authority and to the International Bureau.

8. If the electronic medium that is acceptable to the competent Authority is submitted after the date of filing of an application, the labels shall also include the filing date of the application and the application number.

[Annex D follows]

ANNEX D

INFORMATION FROM FRONT PAGE OF PUBLISHED INTERNATIONAL APPLICATION TO BE INCLUDED IN THE GAZETTE UNDER RULE 86.1(i)

The following information shall be extracted from the front page of the publication of the international publication for each published international application and shall, in accordance with Rule 86.1(i), appear in the corresponding entry of the Gazette:

1. as to the international publication:
   - 1.1 the international publication number
   - 1.2 the date of the international publication
   - 1.3 an indication whether the following items were published in the published international application:
     - 1.31 international search report
     - 1.32 declaration under Article 17(2)
     - 1.33 claims amended under Article 19(1)
     - 1.34 statement under Article 19(1)
     - 1.35 [*Deleted*]
     - 1.36 request for rectification under the third sentence of Rule 91.3(d)
     - 1.37 information concerning the incorporation by reference of an element or part as referred to in Rule 48.2(b)(v)
     - 1.38 information concerning a priority claim under Rule 26*bis*.2(d)
     - 1.39 information concerning a request under Rule 26*bis*.3 for restoration of the right of priority
     - 1.40 information on copies of any declaration or other evidence furnished under Rule 26*bis*.3(f)
   - 1.4 the language in which the international application was filed
   - 1.5 the language of publication of the international application

2. as to the international application:
   - 2.1 the title of the invention
   - 2.2 the symbol(s) of the International Patent Classification (IPC)
   - 2.3 the international application number
   - 2.4 the international filing date

3. as to any priority claim:
   - 3.1 the application number of the earlier application
   - 3.2 the date on which the earlier application was filed
   - 3.3 where the earlier application is:
     - 3.31 a national application: the country in which the earlier application was filed
     - 3.32 a regional application: the authority entrusted with the granting of regional patents under the applicable regional patent treaty and, in the case referred to in Rule 4.10(b)(ii), a country party to the Paris Convention for the Protection of Industrial Property for which that earlier application was filed
     - 3.33 an international application: the receiving Office with which it was filed

4. as to the applicant, inventor and agent:
   - 4.1 their name(s)
   - 4.2 their mailing address(es)

5. as to the designated States:
   - 5.1 their names
   - 5.2 the indication of any wish for a regional patent

5.3 the indication that every kind of protection available is sought, unless otherwise indicated

6. as to a statement concerning non-prejudicial disclosure or exception to lack of novelty:
   6.1 the date of the disclosure
   6.2 the place of the disclosure
   6.3 the kind of the disclosure (e.g., exhibition, scientific publication, conference reports, etc.)
   6.4 the title of the exhibition, publication or conference

7. as to any indication in relation to deposited biological material furnished under Rule 13*bis* separately from the description:
   7.1 the fact that such indication is published
   7.2 the date on which the International Bureau received such indication

8. as to any declaration referred to in Rule 4.17 which was received by the International Bureau before the expiration of the time limit under Rule 26*ter*.1:
   8.1 the fact that such a declaration was made and a reference to the applicable item in Rule 4.17 under which it was made

[Annex E follows]

ANNEX E

INFORMATION TO BE PUBLISHED IN THE GAZETTE UNDER RULE 86.1(v)

1. The time limits applicable under Articles 22 and 39 in respect of each Contracting State.
2. The list of the non-patent literature agreed upon by the International Searching Authorities for inclusion in the minimum documentation.
3. The names of the national Offices which do not wish to receive copies under Article 13(2)(c).
4. The provisions of the national laws of Contracting States concerning international-type search.
5. The text of the agreements entered into between the International Bureau and the International Searching Authorities or the International Preliminary Examining Authorities.
6. The names of the national Offices which entirely or in part waived their rights to any communication under Article 20.
7. The names of the Contracting States which are bound by Chapter II of the PCT.
8. Index of concordance of international application numbers and international publication numbers, listed according to international application numbers.
9. Index of applicants' names giving, for each name, the corresponding international publication number(s).
10. Index of international publication numbers, grouped according to the International Patent Classification symbols.
11. Indication of any subject matter that will not be searched or examined by the various International Searching and Preliminary Examining Authorities under Rules 39 and 67.
12. Requirements of designated and elected Offices under Rules 49.5 and 76.5 in relation to the furnishing of translations.
13. The dates defining the period referred to in Rule 32.1(b) during which the international application, whose effects may be extended to a successor State under Rule 32.1, must have been filed.
14. The criteria for restoration of the right of priority applied by receiving Offices under Rule 26*bis*.3 or designated Offices under Rule 49*ter*.2, and any subsequent changes in that respect.

Appendix I Partial List of Trademarks

The following is a partial list of trademarks which may appear from time to time in patent applications. Proper usage of trademarks requires that they be capitalized at all times. See MPEP § 608.01(v).

Any questions by the examiners as to whether an apparent trademark is in fact a registered trademark or to what particular goods a registered trademark applies should be referred to the Trademark Search Branch (308-9800) for determination.

Trademark	*Particular goods on or in connection with which the trademark is used*
ACE	Elastic bandages, adhesive bandages, adherent compounds for attaching surgical dressings or bandages to the skin, and bandage fastening clips
ACTIONWEAR	Men's, women's, children's, and infants' garments - namely coats, sweaters, blouses, shirts, underwear, and sleepwear
ADRENALIN	Hemostatic, astringent, blood-pressure raising and stimulating preparations for medicinal or surgical purposes
AEROJET	Thrust motors whose general purpose is to provide thrust by means of a combustion process, and includes all the component parts of such motors
AEROSOL	Wetting agents for use in reducing the interfacial tension between liquids and solids or between two immiscible liquids
AIRVEYOR	Conveyors for conveying and handling materials
ANCHOR	Metallic fencing and related components
ARNEL	Yarns; textile fibers, including staple fibers and continuous filaments
BARBIE	Doll; accessories for doll
BEEF STICK	Summer sausage
BIRKENSTOCK	Footwear-namely, sandals, shoes, and shoe insoles
BLUSH	Wines
BOOGIE	Surfboards
BUSS	Electric fuses, fuse holders, fuse wire, and protectors for electric circuits that include fuse links and thermal cutouts and that respond to heavy overloads or short circuits to open the circuits
BUTTERFLY	Medical infusion sets for administration of fluids
CALGON	Water softening and water conditioning for industrial, laundry, and semi-industrial use
CALROD	Electrical resistance heaters; electrical resistance heating elements for cooling devices
CARBORUNDUM	Electrical devices comprising detectors for radio apparatus, resistance rods, lightning arrestors, resistors, and resistor units
CARBORUNDUM	Crystalline substance used as an abradant and for other purposes
CAROUSEL	Photographic projectors
CAT	Machinery for earth moving, earth conditioning, and material handling, namely, loaders and engines therefor, and parts for the foregoing; vehicles and internal combustion engines for earth and material hauling and handling, namely tractors and engines therefor, and parts for the foregoing
CATERPILLAR	Tractors, engines, treads, etc.
CHAP STICK	Medicinal preparation for chapped skin, sunburn, and hangnails
CLOROX	Household cleanser compositions, laundry detergent

Trademark	*Particular goods on or in connection with which the trademark is used*
COCA-COLA	Beverages and syrups for the manufacture of such beverages (carbonated soft drink)
COCOA-PUFFS	Ready to eat breakfast cereal
COKE	Nonalcoholic, maltless beverages and the syrups for making such beverages
COREX	Thermosetting plastic in the nature of a paint converted by heat into an insoluble, unfusible film
CRAWLER	Children's play clothes, namely, overalls, shirts, rompers, and sunsuits
CYCLONE	Seeders and planters
DACRON	Yarns of synthetic fibers; synthetic polyester fibers for generalized use in the industrial arts
DORITOS	Corn chips, potato chips, tortilla chips, pretzels, and nut meats
FEDEX	Shipping containers in the nature of document envelopes, boxes and tubes; pick-up, transportation, storage, and delivery of documents, packages and freight by land and air
FIBERGLAS	Inorganic material in a fibrous condition or in the form of a loose mass of filaments or fibers
FLEXWOOD	Fabric-backed wood veneer
FLYING SAUCER	Toys, namely model airplanes and aerodynamic flying discs
FOAMICIDE	Chemical composition for addition to foaming liquids present in bottle and container washing processes and in industrial chemistry processes, to prevent the formation of foam therein
FOOTLETS	Anklets, knee-hi socks, hosiery, and footsocks
FORMICA	Laminates and solid surfacing materials in the form of slabs made predominantly of plastic for use in the manufacture of countertops, vanity tops, tabletops, sinkbowls, bath tubs, wall paneling, flooring, and furniture
GLAD	Plastic bag holders
GLAD LOCK	Plastic bags for packaging, such as food storage and freezer bags
HACKY SACK	Footbags used in a kicking game; conducting kicking game tournaments and kicking game instructional clinics
HI-LITER	Marking pens
INTERNET	Communication services, namely providing electronic data transmission services in the electronic banking field and retail marketing field
INTERNET	Carpeting installation information exchange and consulting services rendered by computer
INTERNET TELEVISION	Distribution and production of broadcast and nonbroadcast television programs, videotaped programs and audio tapes
IRONCLAD	Storage-battery plates
JARLSBERG	Cheese
JEEP	Automobiles and structural parts thereof
JELL-O	A compound used in the preparation of (jellies) desserts (pastries and ice-cream); gelatin dessert
JELLO-LIGHT	Pudding
JET SKI	Boats, recreational watercraft, floor mats, clothing, paint for machinery, tarpaulins, used to hold down boat covers; straps, namely boat covers and boat towing lines, motor oil, duffle bags

Trademark	*Particular goods on or in connection with which the trademark is used*
KARMELKORN	Popcorn candy, seasoned popcorn, cheese-covered popcorn, and popcorn balls each of which is made from popped popcorn; and also unpopped popcorn, candy, candied apple, nuts, and ice cream
KEVLAR	Man-made fibers for generalized use in the industrial arts
KITTY LITTER	Ground clay used for litters for small animals, i.e., cats, rats, mice, hamsters
KLEENEX	Absorbent tissue suitable for cleaning, hygienic, and cosmetic purposes, and paper towels
KOOSH	Tossing balls
LIFE SAVERS	Chewing-gum, candy, sweetmeats, and confections
LINOTYPE	Typesetting machines and parts thereof; accessories and equipment for use with typeset machines and systems - namely, line printers, video terminals, keyboards, tape perforators, tape readers, graphic scanners, optical character readers and computer programs
LIQUID PAPER	Office supply products, namely correction fluid, error correction tapes
LISTSERV	Computer software for managing electronic mailing lists
LOAFERS	Ladies', men's, and boys' shoes made of leather, rubber, fabric, and various combinations of such materials
LUCITE	Enamel and paint
LYCRA	Synthetic fibers and filaments for generalized use in the industrial arts
MINI BAR	Small-sized pry bars
MONOTYPE	Type casting and composing machines, including keyboards and casting-machines and repair parts and supplies therefor; paper ribbons or controllers for type casting and composing machines; photo typesetting machines utilizing cameras and laser beam, and structural parts thereof, typefaces, typefonts and type designs of alphanumeric characters and/or typographical symbols recorded as visible images in printer's type
MUSIC BY MUZAK	Planned music service for transmitting specially programmed background music to stores, restaurants, homes, hotels, banks, railroads, airlines, boats, transportation terminals, factories and other industrial and commercial establishments throughout the U.S.
MYLAR	Flexible film for packaging purposes; polyester film
OILGEAR	Valves for use in and in connection with the hydraulic transmission of power
ORLON	Synthetic fiber-forming polymers and copolymers of acrylic acid or its derivatives produced in the form of fibers for further use in the industrial arts
PAMPERS	Disposable diapers
PARA-SAIL	Parachutes
PERF-A-TAPE	Paper tape for sealing composition board joints
PERMALLOY	Metal hardening agent sold as a component part of machine parts; namely, sheaves, drill steels, barrel rollers, and pins for mining machinery such as drag line conveyors and drills

Trademark	*Particular goods on or in connection with which the trademark is used*
PIZZA ROLLS	Pasta snacks, namely hamburger flavor pasta snacks, cheeseburger flavor pasta snacks, pepperoni and cheese flavor pasta snacks, sausage, and cheese flavor pasta snacks, and shrimp and cheese flavor pasta snacks
POPSICLE	Frozen confections on sticks and liquid flavoring concentrates for making said confections
POST-IT	Stationary notes containing adhesive on one side for attachment to surfaces
PYREX	Beakers, flasks, test tubes, etc.; glass
QUICKEN	Computer software programs and user documentation supplied therewith
Q-TIPS	Absorbent swabs and balls for toiletry, medical, and cosmetic uses; swabs consisting of small sticks of wood or paper having wads of cotton twisted about one or both ends, intended for use primarily as a cosmetic aid
RICE KRISPIES	Cereal breakfast food
RIPPLE	Wines
ROLLERBLADE	Boots equipped with longitudinally aligned rollers used for skating and skiing
ROQUEFORT	Cheese
SANKA	Coffees and teas, coffee and tea extracts, both dry and liquid, and tea and coffee substitutes
SCOTCH	Masking tape, cellophane tape, acetate fiber tape and other pressure-sensitive adhesive tapes; liquid adhesive, adhesive sheet material, an adhesive coated sheet material in sheet or strip form; adhesive tape
SNAP-ON	Sharpening stones, nail clipper; calibrated rulers, magnetic paper clips, magnetic tape holders, drill bit gauges, tape measurers; tools and machinery
SNOOZ-ALARM	Electronic repeat alarm timer sold as a component of alarm clocks; clocks
SPEED NUT	Nuts
SPERRY TOP-SIDER	Boating coats, boating hats, boating suits, boating jackets, boating shirts and boating trousers, footwear
STELLITE	Metal alloys
STELLITE	Rivet setting tools
SWOOSH	Footwear
TABASCO	Pepper sauce
TALON	Thread
TEFLON	Synthetic resinous fluorine-containing polymers in form of molding and extruding compositions, fabricated shapes-namely, sheets, [rods] tubes, tape and filaments [-solutions,] and emulsions; polytetrafluoroethylene coatings in the nature of paints and varnishes
TELEMARKETING INC.	Telephone marketing consulting services; conducting telephone sales campaigns for business clients
TELETYPE	Printing-telegraph apparatus
TELEX	Equipment and apparatus for electronic treatment of sound-namely, sound recorders-reproducers, phonographs, tape decks, tape recorders, tape cartridge players, tape duplicators, tapes for sound recording and reproduction, combination tape recorders and radios, and combination phonographs-tape decks, and components and parts for all of said equipment
THERMOS	Temperature-retaining vessels; double-walled glass vessels with vacuum between the walls
TOLL HOUSE	Prepared edible chocolate

Trademark	*Particular goods on or in connection with which the trademark is used*
TOUCH-TONE	Musical instruments, mainly timpani and other drums, malletsfor playing drums, and other percussion instruments and parts thereof
TRAV-O-LATER	Endless conveyors
TRIGGER	Indicating tripping fuses
TROUT CHOW	Feed for fish
TWIST-LOCK	Electrical wiring apparatus, namely electric flush receptacles, attachment plug, caps, cord-coupling, caps, couplings, connectors, motor couplings, attachment plugs, and motor plugs
TYVEK	Fabrics of man-made fibers and filaments suitable for making into household furnishings and apparel and for industrial uses
VASELINE	Emollient and medicinal preparation for external and internal use; petroleum jelly, oil petrol, white mineral oil; moisturizing lotion and cream
VELCRO	Notion - namely, a synthetic material sold in ribbon, sheet, or piece goods form, said material having complemental parts which adhere to each other when pressed together and adapted for use as a closure fastener, or button for closing garments, curtains, or the like; separable fasteners-namely, hook and loop-type fasteners and components thereof
VICTROLA	Prerecorded audio cassettes; records for talking-machines
VIDEOFILE	Document storage systems designed to automate the storage andretrieval of document images, and components thereof
VIENNA BEEF	Tongue, corned beef, frankfurters, wieners, knockwurst, polish sausage, pastrami, salami, and bologna
VISE-GRIP	Hand tools and instruments, namely pliers and workholding clamps with or without a cutting edge, wrenches, wrenches with a wire cutter and welding clamps, and sheet metal bending tool
VOTATOR	Machinery for processing and handling materials in fluid, plastic, or particulate form including food products
WEATHER-OMETER	Apparatus for testing the effect of weather upon the surface of objects
WEED EATER	Machinery for edging and trimming vegetation; weed and grass cutting machinery for edging and trimming lawns
WIFFLE	Simulated or auxiliary pliable plastic baseballs and a game played therewith
WINDBREAKER	Men's, young men's, boys', women's, misses' and girl's apparel for sportswear, dress wear, work wear, and uniforms; namely jackets, vests, trousers, suits, shirts, blouses
WINDOWS	Cartridges containing software for operating or enhancing the operation of laser printers, which cartridges are to be inserted into the printers, and accompanying software for installation in computers which communicate with the printers; computer programs and manuals sold as a unit; namely graphical operating environment programs for microcomputers
WINDSURFER	Sailboats having a free sail system
WITE-OUT	Typing and drawing correction fluid (erasing liquid)

Trademark	*Particular goods on or in connection with which the trademark is used*
XEROX	Electrophotographic copying machines (and equipment for recording x-ray images - namely, processors for electrostatically charging xeroradiographic plates and conditioners for producing positive or negative prints)
ZIPLOC	Plastic bags

PART I — UNITED STATES PATENT AND TRADEMARK OFFICE

CHAPTER 1 — ESTABLISHMENT, OFFICERS AND EMPLOYEES, FUNCTIONS

35 U.S.C. 1 Establishment.

(a) ESTABLISHMENT.— The United States Patent and Trademark Office is established as an agency of the United States, within the Department of Commerce. In carrying out its functions, the United States Patent and Trademark Office shall be subject to the policy direction of the Secretary of Commerce, but otherwise shall retain responsibility for decisions regarding the management and administration of its operations and shall exercise independent control of its budget allocations and expenditures, personnel decisions and processes, procurements, and other administrative and management functions in accordance with this title and applicable provisions of law. Those operations designed to grant and issue patents and those operations which are designed to facilitate the registration of trademarks shall be treated as separate operating units within the Office.

(b) OFFICES.— The United States Patent and Trademark Office shall maintain its principal office in the metropolitan Washington, D.C., area, for the service of process and papers and for the purpose of carrying out its functions. The United States Patent and Trademark Office shall be deemed, for purposes of venue in civil actions, to be a resident of the district in which its principal office is located, except where jurisdiction is otherwise provided by law. The United States Patent and Trademark Office may establish satellite offices in such other places in the United States as it considers necessary and appropriate in the conduct of its business.

(c) REFERENCE.— For purposes of this title, the United States Patent and Trademark Office shall also be referred to as the "Office" and the "Patent and Trademark Office".

(Amended Jan. 2, 1975, Public Law 93-596, sec. 1, 88 Stat. 1949; amended Nov. 29, 1999, Public Law 106-113, sec. 1000(a)(9), 113 Stat. 1501A-572 (S. 1948 sec. 4711).)

35 U.S.C. 2 Powers and duties.

(a) IN GENERAL.— The United States Patent and Trademark Office, subject to the policy direction of the Secretary of Commerce—

(1) shall be responsible for the granting and issuing of patents and the registration of trademarks; and

(2) shall be responsible for disseminating to the public information with respect to patents and trademarks.

(b) SPECIFIC POWERS.— The Office—

(1) shall adopt and use a seal of the Office, which shall be judicially noticed and with which letters patent, certificates of trademark registrations, and papers issued by the Office shall be authenticated;

(2) may establish regulations, not inconsistent with law, which—

(A) shall govern the conduct of proceedings in the Office;

(B) shall be made in accordance with section 553 of title 5;

(C) shall facilitate and expedite the processing of patent applications, particularly those which can be filed, stored, processed, searched, and retrieved electronically, subject to the provisions of section 122 relating to the confidential status of applications;

(D) may govern the recognition and conduct of agents, attorneys, or other persons representing applicants or other parties before the Office, and may require them, before being recognized as representatives of applicants or other persons, to show that they are of good moral character and reputation and are possessed of the necessary qualifications to render to applicants or other persons valuable service, advice, and assistance in the presentation or prosecution of their applications or other business before the Office;

(E) shall recognize the public interest in continuing to safeguard broad access to the United States patent system through the reduced fee structure for small entities under section 41(h)(1) of this title; and

(F) provide for the development of a performance-based process that includes quantitative and qualitative measures and standards for evaluating cost-effectiveness and is consistent with the principles of impartiality and competitiveness;

(3) may acquire, construct, purchase, lease, hold, manage, operate, improve, alter, and renovate any real, personal, or mixed property, or any interest therein, as it considers necessary to carry out its functions;

(4)(A) may make such purchases, contracts for the construction, or management and operation of facilities, and contracts for supplies or services, without regard to the provisions of subtitle I and chapter 33 of title 40, title III of the Federal Property and

Administrative Services Act of 1949 (41 U.S.C. 251 et seq.), and the McKinney-Vento Homeless Assistance Act (42 U.S.C. 11301 et seq.);

(B) may enter into and perform such purchases and contracts for printing services, including the process of composition, platemaking, presswork, silk screen processes, binding, microform, and the products of such processes, as it considers necessary to carry out the functions of the Office, without regard to sections 501 through 517 and 1101 through 1123 of title 44;

(5) may use, with their consent, services, equipment, personnel, and facilities of other departments, agencies, and instrumentalities of the Federal Government, on a reimbursable basis, and cooperate with such other departments, agencies, and instrumentalities in the establishment and use of services, equipment, and facilities of the Office;

(6) may, when the Director determines that it is practicable, efficient, and cost-effective to do so, use, with the consent of the United States and the agency, instrumentality, Patent and Trademark Office, or international organization concerned, the services, records, facilities, or personnel of any State or local government agency or instrumentality or foreign patent and trademark office or international organization to perform functions on its behalf;

(7) may retain and use all of its revenues and receipts, including revenues from the sale, lease, or disposal of any real, personal, or mixed property, or any interest therein, of the Office;

(8) shall advise the President, through the Secretary of Commerce, on national and certain international intellectual property policy issues;

(9) shall advise Federal departments and agencies on matters of intellectual property policy in the United States and intellectual property protection in other countries;

(10) shall provide guidance, as appropriate, with respect to proposals by agencies to assist foreign governments and international intergovernmental organizations on matters of intellectual property protection;

(11) may conduct programs, studies, or exchanges of items or services regarding domestic and international intellectual property law and the effectiveness of intellectual property protection domestically and throughout the world;

(12)(A) shall advise the Secretary of Commerce on programs and studies relating to intellectual property policy that are conducted, or authorized to be conducted, cooperatively with foreign intellectual property offices and international intergovernmental organizations; and

(B) may conduct programs and studies described in subparagraph (A); and

(13)(A) in coordination with the Department of State, may conduct programs and studies cooperatively with foreign intellectual property offices and international intergovernmental organizations; and

(B) with the concurrence of the Secretary of State, may authorize the transfer of not to exceed $100,000 in any year to the Department of State for the purpose of making special payments to international intergovernmental organizations for studies and programs for advancing international cooperation concerning patents, trademarks, and other matters.

(c) CLARIFICATION OF SPECIFIC POWERS.—

(1) The special payments under subsection (b)(13)(B) shall be in addition to any other payments or contributions to international organizations described in subsection (b)(13)(B) and shall not be subject to any limitations imposed by law on the amounts of such other payments or contributions by the United States Government.

(2) Nothing in subsection (b) shall derogate from the duties of the Secretary of State or from the duties of the United States Trade Representative as set forth in section 141 of the Trade Act of 1974 (19 U.S.C. 2171).

(3) Nothing in subsection (b) shall derogate from the duties and functions of the Register of Copyrights or otherwise alter current authorities relating to copyright matters.

(4) In exercising the Director's powers under paragraphs (3) and (4)(A) of subsection (b), the Director shall consult with the Administrator of General Services.

(5) In exercising the Director's powers and duties under this section, the Director shall consult with the Register of Copyrights on all copyright and related matters.

(d) CONSTRUCTION.— Nothing in this section shall be construed to nullify, void, cancel, or interrupt any pending request-for-proposal let or con-

tract issued by the General Services Administration for the specific purpose of relocating or leasing space to the United States Patent and Trademark Office.

(Amended Jan. 2, 1975, Public Law 93-596, sec. 1, 88 Stat. 1949; amended Nov. 29, 1999, Public Law 106-113, sec. 1000(a)(9), 113 Stat. 1501A-572 (S. 1948 sec. 4712); subsection (b)(4)(A) amended Oct. 30, 2000, Public Law 106-400, sec. 2, 114 Stat. 1675; subsections (b)(2)(B) and (b)(4)(B) amended Nov. 2, 2002, Public Law 107-273, sec. 13206, 116 Stat. 1904; subsection (b)(4)(A) amended Dec. 15, 2003, Public Law 108-178, sec. 4(g), 117 Stat. 2641.)

35 U.S.C. 3 Officers and employees.

(a) UNDER SECRETARY AND DIRECTOR.—

(1) IN GENERAL.— The powers and duties of the United States Patent and Trademark Office shall be vested in an Under Secretary of Commerce for Intellectual Property and Director of the United States Patent and Trademark Office (in this title referred to as the "Director"), who shall be a citizen of the United States and who shall be appointed by the President, by and with the advice and consent of the Senate. The Director shall be a person who has a professional background and experience in patent or trademark law.

(2) DUTIES.—

(A) IN GENERAL.— The Director shall be responsible for providing policy direction and management supervision for the Office and for the issuance of patents and the registration of trademarks. The Director shall perform these duties in a fair, impartial, and equitable manner.

(B) CONSULTING WITH THE PUBLIC ADVISORY COMMITTEES.— The Director shall consult with the Patent Public Advisory Committee established in section 5 on a regular basis on matters relating to the patent operations of the Office, shall consult with the Trademark Public Advisory Committee established in section 5 on a regular basis on matters relating to the trademark operations of the Office, and shall consult with the respective Public Advisory Committee before submitting budgetary proposals to the Office of Management and Budget or changing or proposing to change patent or trademark user fees or patent or trademark regulations which are subject to the requirement to provide notice and opportunity for public comment under section 553 of title 5, as the case may be.

(3) OATH.— The Director shall, before taking office, take an oath to discharge faithfully the duties of the Office.

(4) REMOVAL.— The Director may be removed from office by the President. The President shall provide notification of any such removal to both Houses of Congress.

(b) OFFICERS AND EMPLOYEES OF THE OFFICE.—

(1) DEPUTY UNDER SECRETARY AND DEPUTY DIRECTOR.— The Secretary of Commerce, upon nomination by the Director, shall appoint a Deputy Under Secretary of Commerce for Intellectual Property and Deputy Director of the United States Patent and Trademark Office who shall be vested with the authority to act in the capacity of the Director in the event of the absence or incapacity of the Director. The Deputy Director shall be a citizen of the United States who has a professional background and experience in patent or trademark law.

(2) COMMISSIONERS.—

(A) APPOINTMENT AND DUTIES.— The Secretary of Commerce shall appoint a Commissioner for Patents and a Commissioner for Trademarks, without regard to chapter 33, 51, or 53 of title 5. The Commissioner for Patents shall be a citizen of the United States with demonstrated management ability and professional background and experience in patent law and serve for a term of 5 years. The Commissioner for Trademarks shall be a citizen of the United States with demonstrated management ability and professional background and experience in trademark law and serve for a term of 5 years. The Commissioner for Patents and the Commissioner for Trademarks shall serve as the chief operating officers for the operations of the Office relating to patents and trademarks, respectively, and shall be responsible for the management and direction of all aspects of the activities of the Office that affect the administration of patent and trademark operations, respectively. The Secretary may reappoint a Commissioner to subsequent terms of 5 years as long as the performance of the Commissioner as set forth in the performance agreement in subparagraph (B) is satisfactory.

(B) SALARY AND PERFORMANCE AGREEMENT.— The Commissioners shall be paid an annual rate of basic pay not to exceed the maximum rate of basic pay for the Senior Executive Ser-

vice established under section 5382 of title 5, including any applicable locality-based comparability payment that may be authorized under section 5304(h)(2)(C) of title 5. The compensation of the Commissioners shall be considered, for purposes of section 207(c)(2)(A) of title 18, to be the equivalent of that described under clause (ii) of section 207(c)(2)(A) of title 18. In addition, the Commissioners may receive a bonus in an amount of up to, but not in excess of, 50 percent of the Commissioners' annual rate of basic pay, based upon an evaluation by the Secretary of Commerce, acting through the Director, of the Commissioners' performance as defined in an annual performance agreement between the Commissioners and the Secretary. The annual performance agreements shall incorporate measurable organization and individual goals in key operational areas as delineated in an annual performance plan agreed to by the Commissioners and the Secretary. Payment of a bonus under this subparagraph may be made to the Commissioners only to the extent that such payment does not cause the Commissioners' total aggregate compensation in a calendar year to equal or exceed the amount of the salary of the Vice President under section 104 of title 3.

(C) REMOVAL.— The Commissioners may be removed from office by the Secretary for misconduct or nonsatisfactory performance under the performance agreement described in subparagraph (B), without regard to the provisions of title 5. The Secretary shall provide notification of any such removal to both Houses of Congress.

(3) OTHER OFFICERS AND EMPLOYEES.— The Director shall—

(A) appoint such officers, employees (including attorneys), and agents of the Office as the Director considers necessary to carry out the functions of the Office; and

(B) define the title, authority, and duties of such officers and employees and delegate to them such of the powers vested in the Office as the Director may determine.

The Office shall not be subject to any administratively or statutorily imposed limitation on positions or personnel, and no positions or personnel of the Office shall be taken into account for purposes of applying any such limitation.

(4) TRAINING OF EXAMINERS.— The Office shall submit to the Congress a proposal to provide an incentive program to retain as employees patent and trademark examiners of the primary examiner grade or higher who are eligible for retirement, for the sole purpose of training patent and trademark examiners.

(5) NATIONAL SECURITY POSITIONS.— The Director, in consultation with the Director of the Office of Personnel Management, shall maintain a program for identifying national security positions and providing for appropriate security clearances, in order to maintain the secrecy of certain inventions, as described in section 181, and to prevent disclosure of sensitive and strategic information in the interest of national security.

(c) CONTINUED APPLICABILITY OF TITLE 5. — Officers and employees of the Office shall be subject to the provisions of title 5, relating to Federal employees.

(d) ADOPTION OF EXISTING LABOR AGREEMENTS.— The Office shall adopt all labor agreements which are in effect, as of the day before the effective date of the Patent and Trademark Office Efficiency Act, with respect to such Office (as then in effect).

(e) CARRYOVER OF PERSONNEL.—

(1) FROM PTO.— Effective as of the effective date of the Patent and Trademark Office Efficiency Act, all officers and employees of the Patent and Trademark Office on the day before such effective date shall become officers and employees of the Office, without a break in service.

(2) OTHER PERSONNEL.— Any individual who, on the day before the effective date of the Patent and Trademark Office Efficiency Act, is an officer or employee of the Department of Commerce (other than an officer or employee under paragraph (1)) shall be transferred to the Office, as necessary to carry out the purposes of this Act, if—

(A) such individual serves in a position for which a major function is the performance of work reimbursed by the Patent and Trademark Office, as determined by the Secretary of Commerce;

(B) such individual serves in a position that performed work in support of the Patent and Trademark Office during at least half of the incumbent's

work time, as determined by the Secretary of Commerce; or

(C) such transfer would be in the interest of the Office, as determined by the Secretary of Commerce in consultation with the Director.

Any transfer under this paragraph shall be effective as of the same effective date as referred to in paragraph (1), and shall be made without a break in service.

(f) TRANSITION PROVISIONS.—

(1) INTERIM APPOINTMENT OF DIRECTOR.— On or after the effective date of the Patent and Trademark Office Efficiency Act, the President shall appoint an individual to serve as the Director until the date on which a Director qualifies under subsection (a). The President shall not make more than one such appointment under this subsection.

(2) CONTINUATION IN OFFICE OF CERTAIN OFFICERS.—

(A) The individual serving as the Assistant Commissioner for Patents on the day before the effective date of the Patent and Trademark Office Efficiency Act may serve as the Commissioner for Patents until the date on which a Commissioner for Patents is appointed under subsection (b).

(B) The individual serving as the Assistant Commissioner for Trademarks on the day before the effective date of the Patent and Trademark Office Efficiency Act may serve as the Commissioner for Trademarks until the date on which a Commissioner for Trademarks is appointed under subsection (b).

(Amended Sept. 6, 1958, Public Law 85-933, sec. 1, 72 Stat. 1793; Sept. 23, 1959, Public Law 86-370, sec. 1(a), 73 Stat. 650; Aug. 14, 1964, Public Law 88-426, sec. 305(26), 78 Stat. 425; Jan. 2, 1975, Public Law 93-596, sec. 1, 88 Stat. 1949; Jan. 2, 1975, Public Law 93-601, sec. 1, 88 Stat. 1956; Aug. 27, 1982, Public Law 97-247, sec. 4, 96 Stat. 319; Oct. 25, 1982, Public Law 97-366, sec. 4, 96 Stat. 1760; Nov. 8, 1984, Public Law 98-622, sec. 405, 98 Stat. 3392; Oct. 28, 1998, Public Law 105-304, sec. 401(a)(1), 112 Stat. 2887; Nov. 29, 1999, Public Law 106-113, sec. 1000(a)(9), 113 Stat. 1501A-575 (S. 1948 sec. 4713); subsections (a)(2)(B), (b)(2), and (c) amended Nov. 2, 2002, Public Law 107-273, sec. 13206, 116 Stat. 1904.)

35 U.S.C. 4 Restrictions on officers and employees as to interest in patents.

Officers and employees of the Patent and Trademark Office shall be incapable, during the period of their appointments and for one year thereafter, of applying for a patent and of acquiring, directly or indirectly, except by inheritance or bequest, any patent or any right or interest in any patent, issued or to be issued by the Office. In patents applied for thereafter they shall not be entitled to any priority date earlier than one year after the termination of their appointment.

(Amended Jan. 2, 1975, Public Law 93-596, sec. 1, 88 Stat. 1949.)

35 U.S.C. 5 Patent and Trademark Office Public Advisory Committees.

(a) ESTABLISHMENT OF PUBLIC ADVISORY COMMITTEES.—

(1) APPOINTMENT.— The United States Patent and Trademark Office shall have a Patent Public Advisory Committee and a Trademark Public Advisory Committee, each of which shall have nine voting members who shall be appointed by the Secretary of Commerce and serve at the pleasure of the Secretary of Commerce. Members of each Public Advisory Committee shall be appointed for a term of 3 years, except that of the members first appointed, three shall be appointed for a term of 1 year, and three shall be appointed for a term of 2 years. In making appointments to each Committee, the Secretary of Commerce shall consider the risk of loss of competitive advantage in international commerce or other harm to United States companies as a result of such appointments.

(2) CHAIR.— The Secretary shall designate a chair of each Advisory Committee, whose term as chair shall be for 3 years.

(3) TIMING OF APPOINTMENTS.— Initial appointments to each Advisory Committee shall be made within 3 months after the effective date of the Patent and Trademark Office Efficiency Act. Vacancies shall be filled within 3 months after they occur.

(b) BASIS FOR APPOINTMENTS.— Members of each Advisory Committee—

(1) shall be citizens of the United States who shall be chosen so as to represent the interests of diverse users of the United States Patent and Trademark Office with respect to patents, in the case of the Patent Public Advisory Committee, and with respect to trademarks, in the case of the Trademark Public Advisory Committee;

(2) shall include members who represent small and large entity applicants located in the United States in proportion to the number of applications filed by such applicants, but in no case shall members who represent small entity patent applicants, including small business concerns, independent inventors, and nonprofit organizations, constitute less than 25 percent of the members of the Patent Public Advisory Committee, and such members shall include at least one independent inventor; and

(3) shall include individuals with substantial background and achievement in finance, management, labor relations, science, technology, and office automation. In addition to the voting members, each Advisory Committee shall include a representative of each labor organization recognized by the United States Patent and Trademark Office. Such representatives shall be nonvoting members of the Advisory Committee to which they are appointed.

(c) MEETINGS.— Each Advisory Committee shall meet at the call of the chair to consider an agenda set by the chair.

(d) DUTIES.— Each Advisory Committee shall—

(1) review the policies, goals, performance, budget, and user fees of the United States Patent and Trademark Office with respect to patents, in the case of the Patent Public Advisory Committee, and with respect to Trademarks, in the case of the Trademark Public Advisory Committee, and advise the Director on these matters;

(2) within 60 days after the end of each fiscal year—

(A) prepare an annual report on the matters referred to in paragraph (1);

(B) transmit the report to the Secretary of Commerce, the President, and the Committees on the Judiciary of the Senate and the House of Representatives; and

(C) publish the report in the Official Gazette of the United States Patent and Trademark Office.

(e) COMPENSATION.— Each member of each Advisory Committee shall be compensated for each day (including travel time) during which such member is attending meetings or conferences of that Advisory Committee or otherwise engaged in the business of that Advisory Committee, at the rate which is the daily equivalent of the annual rate of basic pay in effect for level III of the Executive Schedule under section 5314 of title 5. While away from such member's home or regular place of business such member shall be allowed travel expenses, including per diem in lieu of subsistence, as authorized by section 5703 of title 5.

(f) ACCESS TO INFORMATION.— Members of each Advisory Committee shall be provided access to records and information in the United States Patent and Trademark Office, except for personnel or other privileged information and information concerning patent applications required to be kept in confidence by section 122.

(g) APPLICABILITY OF CERTAIN ETHICS LAWS.— Members of each Advisory Committee shall be special Government employees within the meaning of section 202 of title 18.

(h) INAPPLICABILITY OF FEDERAL ADVISORY COMMITTEE ACT.— The Federal Advisory Committee Act (5 U.S.C. App.) shall not apply to each Advisory Committee.

(i) OPEN MEETINGS.— The meetings of each Advisory Committee shall be open to the public, except that each Advisory Committee may by majority vote meet in executive session when considering personnel, privileged, or other confidential information.

(j) INAPPLICABILITY OF PATENT PROHIBITION.— Section 4 shall not apply to voting members of the Advisory Committees.

(Added Nov. 29, 1999, Public Law 106-113, sec. 1000(a)(9), 113 Stat. 1501A-578 (S. 1948 sec. 4714); subsections (e) and (g) amended Nov. 2, 2002, Public Law 107-273, sec. 13206, 116 Stat. 1904; subsection (i) amended and subsection (j) added Nov. 2, 2002, Public Law 107-273, sec. 13203, 116 Stat. 1902.)

35 U.S.C. 6 Board of Patent Appeals and Interferences.

(a) ESTABLISHMENT AND COMPOSITION.— There shall be in the United States Patent and Trademark Office a Board of Patent Appeals and Interferences. The Director, the Deputy Commissioner, the Commissioner for Patents, the Commissioner for Trademarks, and the administrative patent judges shall constitute the Board. The administrative patent judges shall be persons of competent legal

knowledge and scientific ability who are appointed by the Director.

(b) DUTIES.— The Board of Patent Appeals and Interferences shall, on written appeal of an applicant, review adverse decisions of examiners upon applications for patents and shall determine priority and patentability of invention in interferences declared under section 135(a). Each appeal and interference shall be heard by at least three members of the Board, who shall be designated by the Director. Only the Board of Patent Appeals and Interferences may grant rehearings.

(Repealed by Public Law 106-113, sec. 1000(a)(9), 113 Stat. 1501A-580 (S. 1948 sec. 4715(a).)

(Added Nov. 29, 1999, Public Law 106-113, sec. 1000(a)(9), 113 Stat. 1501A-580 (S. 1948 sec. 4717(2)).)

(Subsection (a) amended Nov. 2, 2002, Public Law 107-273, sec. 13203, 116 Stat. 1902.)

35 U.S.C. 7 Library.

The Director shall maintain a library of scientific and other works and periodicals, both foreign and domestic, in the Patent and Trademark Office to aid the officers in the discharge of their duties.

(Repealed Nov. 29, 1999, Public Law 106-113, sec. 1000(a)(9), 113 Stat. 1501A-580 (S. 1948 sec. 4717(1)).)

(Transferred from 35 U.S.C. 8 Nov. 29, 1999, Public Law 106-113, sec. 1000(a)(9), 113 Stat. 1501A-580 (S. 1948 sec. 4717(1)); amended Jan. 2, 1975, Public Law 93-596, sec. 1, 88 Stat. 1949.)

(Amended Nov. 29, 1999, Public Law 106-113, sec. 1000(a)(9), 113 Stat. 1501A-582 (S. 1948 sec. 4732(a)(10)(A)).)

35 U.S.C. 8 Classification of patents.

The Director may revise and maintain the classification by subject matter of United States letters patent, and such other patents and printed publications as may be necessary or practicable, for the purpose of determining with readiness and accuracy the novelty of inventions for which applications for patent are filed.

(Transferred to 35 U.S.C. 7 Nov. 29, 1999, Public Law 106-113, sec. 1000(a)(9), 113 Stat. 1501A-580 (S. 1948 sec. 4717(1)).)

(Transferred from 35 U.S.C. 9 Nov. 29, 1999, Public Law 106-113, sec. 1000(a)(9), 113 Stat. 1501A-580 (S. 1948 sec. 4717(1)).)

(Amended Nov. 29, 1999, Public Law 106-113, sec. 1000(a)(9), 113 Stat. 1501A-582 (S. 1948 sec. 4732(a)(10)(A)).)

35 U.S.C. 9 Certified copies of records.

The Director may furnish certified copies of specifications and drawings of patents issued by the Patent and Trademark Office, and of other records available either to the public or to the person applying therefor.

(Transferred to 35 U.S.C. 8 Nov. 29, 1999, Public Law 106-113, sec. 1000(a)(9), 113 Stat. 1501A-580 (S. 1948 sec. 4717(1)).)

(Transferred from 35 U.S.C. 10 Nov. 29, 1999, Public Law 106-113, sec. 1000(a)(9), 113 Stat. 1501A-580 (S. 1948 sec. 4717(1)); amended Jan. 2, 1975, Public Law 93-596, sec. 1, 88 Stat. 1949.)

(Amended Nov. 29, 1999, Public Law 106-113, sec. 1000(a)(9), 113 Stat. 1501A-582 (S. 1948 sec. 4732(a)(10)(A)).)

35 U.S.C. 10 Publications.

(a) The Director may publish in printed, typewritten, or electronic form, the following:

(1) Patents and published applications for patents, including specifications and drawings, together with copies of the same. The Patent and Trademark Office may print the headings of the drawings for patents for the purpose of photolithography.

(2) Certificates of trademark registrations, including statements and drawings, together with copies of the same.

(3) The Official Gazette of the United States Patent and Trademark Office.

(4) Annual indexes of patents and patentees, and of trademarks and registrants.

(5) Annual volumes of decisions in patent and trademark cases.

(6) Pamphlet copies of the patent laws and rules of practice, laws and rules relating to trademarks, and circulars or other publications relating to the business of the Office.

(b) The Director may exchange any of the publications specified in items 3, 4, 5, and 6 of subsection (a) of this section for publications desirable for the use of the Patent and Trademark Office.

(Transferred to 35 U.S.C. 9 Nov. 29, 1999, Public Law 106-113, sec. 1000(a)(9), 113 Stat. 1501A-580 (S. 1948 sec. 4717(1)).)

(Transferred from 35 U.S.C. 11 Nov. 29, 1999, Public Law 106-113, sec. 1000(a)(9), 113 Stat. 1501A-580 (S 1948 sec. 4717(1)); amended Jan. 2, 1975, Public Law 93-596, sec. 1, 88 Stat. 1949; Nov. 29, 1999, Public Law 106-113, sec. 1000(a)(9), 113 Stat. 1501A-589 (S. 1948 sec. 4804(b)).)

(Amended Nov. 29, 1999, Public Law 106-113, sec. 1000(a)(9), 113 Stat. 1501A-565, 582 (S. 1948 secs. 4507(1) and 4732(a)(10)(A)).)

35 U.S.C. 11 Exchange of copies of patents and applications with foreign countries.

The Director may exchange copies of specifications and drawings of United States patents and published applications for patents for those of foreign countries.

The Director shall not enter into an agreement to provide such copies of specifications and drawings of United States patents and applications to a foreign country, other than a NAFTA country or a WTO member country, without the express authorization of the Secretary of Commerce. For purposes of this section, the terms "NAFTA country" and "WTO member country" have the meanings given those terms in section 104(b).

(Transferred to 35 U.S.C. 10 Nov. 29, 1999, Public Law 106-113, sec. 1000(a)(9), 113 Stat. 1501A-580 (S 1948 sec. 4717(1)).)

(Transferred from 35 U.S.C. 12 Nov. 29, 1999, Public Law 106-113, sec. 1000(a)(9), 113 Stat. 1501A-580 (S 1948 sec. 4717(1)); amended Nov. 29, 1999, Public Law 106-113, sec. 1000(a)(9), 113 Stat. 1501A-591 (S. 1948 sec. 4808).)

(Amended Nov. 29, 1999, Public Law 106-113, sec. 1000(a)(9), 113 Stat. 1501A-565, 582 (S. 1948 secs. 4507(2)(A), 4507(2)(B), and 4732(a)(10)(A)).)

35 U.S.C. 12 Copies of patents and applications for public libraries.

The Director may supply copies of specifications and drawings of patents and published applications for patents in printed or electronic form to public libraries in the United States which shall maintain such copies for the use of the public, at the rate for each year's issue established for this purpose in section 41(d) of this title.

(Transferred to 35 U.S.C. 11 Nov. 29, 1999, Public Law 106-113, sec. 1000(a)(9), 113 Stat. 1501A-580 (S. 1948 sec. 4717(1)).)

(Transferred from 35 U.S.C. 13 Nov. 29, 1999, Public Law 106-113, sec. 1000(a)(9), 113 Stat. 1501A-580 (S 1948 sec. 4717(1)); amended Aug. 27, 1982, Public Law 97-247, sec. 15, 96 Stat. 321; Nov. 29, 1999, Public Law 106-113, sec. 1000(a)(9), 113 Stat. 1501A-589 (S. 1948 sec. 4804(c)).)

(Amended Nov. 29, 1999, Public Law 106-113, sec. 1000(a)(9), 113 Stat. 1501A-565, 566, 582 (S. 1948 secs. 4507(3)(A), 4507(3)(B), 4507(4), and 4732(a)(10)(A)).)

35 U.S.C. 13 Annual report to Congress.

The Director shall report to the Congress, not later than 180 days after the end of each fiscal year, the moneys received and expended by the Office, the purposes for which the moneys were spent, the quality and quantity of the work of the Office, the nature of training provided to examiners, the evaluation of the Commissioner of Patents and the Commissioner of Trademarks by the Secretary of Commerce, the compensation of the Commissioners, and other information relating to the Office.

(Transferred to 35 U.S.C. 12 Nov. 29, 1999, Public Law 106-113, sec. 1000(a)(9), 113 Stat. 1501A-580 (S 1948 sec. 4717(1)).)

(Transferred from 35 U.S.C. 14 Nov. 29, 1999, Public Law 106-113, sec. 1000(a)(9), 113 Stat. 1501A-580 (S 1948 sec. 4717(1)).)

(Amended Nov. 29, 1999, Public Law 106-113, sec. 1000(a)(9), 113 Stat. 1501A-565, 581 (S. 1948 secs. 4507(2), 4718).)

CHAPTER 2 — PROCEEDINGS IN THE PATENT AND TRADEMARK OFFICE

Sec.

35 U.S.C. 21 Filing date and day for taking action.

(a) The Director may by rule prescribe that any paper or fee required to be filed in the Patent and Trademark Office will be considered filed in the Office on the date on which it was deposited with the United States Postal Service or would have been

deposited with the United States Postal Service but for postal service interruptions or emergencies designated by the Director.

(b) When the day, or the last day, for taking any action or paying any fee in the United States Patent and Trademark Office falls on Saturday, Sunday, or a Federal holiday within the District of Columbia, the action may be taken, or fee paid, on the next succeeding secular or business day.

(Amended Jan. 2, 1975, Public Law 93-596, sec. 1, 88 Stat. 1949; Aug. 27, 1982, Public Law 97-247, sec. 12, 96 Stat. 321; Nov. 29, 1999, Public Law 106-113, sec. 1000(a)(9), 113 Stat. 1501A-582 (S. 1948 sec. 4732(a)(10)(A)).)

35 U.S.C. 22 Printing of papers filed.

The Director may require papers filed in the Patent and Trademark Office to be printed, typewritten, or on an electronic medium.

(Amended Jan. 2, 1975, Public Law 93-596, sec. 1, 88 Stat. 1949; Nov. 29, 1999, Public Law 106-113, sec. 1000(a)(9), 113 Stat. 1501A-582, 589 (S. 1948 secs. 4732(a)(10)(A), 4804(a)).)

35 U.S.C. 23 Testimony in Patent and Trademark Office cases.

The Director may establish rules for taking affidavits and depositions required in cases in the Patent and Trademark Office. Any officer authorized by law to take depositions to be used in the courts of the United States, or of the State where he resides, may take such affidavits and depositions.

(Amended Jan. 2, 1975, Public Law 93-596, sec. 1, 88 Stat. 1949; Nov. 29, 1999, Public Law 106-113, sec. 1000(a)(9), 113 Stat. 1501A-582 (S. 1948 sec. 4732(a)(10)(A)).)

35 U.S.C. 24 Subpoenas, witnesses.
