Plant Variety
Protection
Act
Amendments
of 1994.
7 USC 2321 note.

To amend the Plant Variety Protection Act to make such Act consistent with the International Convention for the Protection of New Varieties of Plants of March 19, 1991, to which the United States is a signatory, and for other purposes.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE; REFERENCES.

(a) **SHORT TITLE.**—This Act may be cited as the “Plant Variety Protection Act Amendments of 1994”.

(b) **REFERENCES TO PLANT VARIETY PROTECTION ACT.**—Except as otherwise expressly provided, whenever in this Act an amendment or repeal is expressed in terms of an amendment to, or repeal of, a section or other provision, the reference shall be considered to be made to a section or other provision of the Plant Variety Protection Act (7 U.S.C. 2321 et seq.).

SEC. 2. DEFINITIONS AND RULES OF CONSTRUCTION.

Section 41 (7 U.S.C. 2401) is amended to read as follows:

“§ 41. Definitions and rules of construction

“(a) **DEFINITIONS.**—As used in this Act:

“(1) **BASIC SEED.**—The term ‘basic seed’ means the seed planted to produce certified or commercial seed.

“(2) **BREEDER.**—The term ‘breeder’ means the person who directs the final breeding creating a variety or who discovers and develops a variety. If the actions are conducted by an agent on behalf of a principal, the principal, rather than the agent, shall be considered the breeder. The term does not include a person who redevelops or rediscovers a variety the existence of which is publicly known or a matter of common knowledge.

“(3) **ESSENTIALLY DERIVED VARIETY.**—

“(A) **IN GENERAL.**—The term ‘essentially derived variety’ means a variety that—

“(i) is predominantly derived from another variety (referred to in this paragraph as the ‘initial variety’) or from a variety that is predominantly derived from the initial variety, while retaining the expression of the essential characteristics that result from the genotype or combination of genotypes of the initial variety;

“(ii) is clearly distinguishable from the initial variety; and

“(iii) except for differences that result from the act of derivation, conforms to the initial variety in the expression of the essential characteristics that result from the genotype or combination of genotypes of the initial variety.

“(B) METHODS.—An essentially derived variety may be obtained by the selection of a natural or induced mutant or of a somaclonal variant, the selection of a variant individual from plants of the initial variety, backcrossing, transformation by genetic engineering, or other method.

“(4) KIND.—The term ‘kind’ means one or more related species or subspecies singly or collectively known by one common name, such as soybean, flax, or radish.

“(5) SEED.—The term ‘seed’, with respect to a tuber propagated variety, means the tuber or the part of the tuber used for propagation.

“(6) SEXUALLY REPRODUCED.—The term ‘sexually reproduced’ includes any production of a variety by seed, but does not include the production of a variety by tuber propagation.

“(7) TUBER PROPAGATED.—The term ‘tuber propagated’ means propagated by a tuber or a part of a tuber.

“(8) UNITED STATES.—The terms ‘United States’ and ‘this country’ mean the United States, the territories and possessions of the United States, and the Commonwealth of Puerto Rico.

“(9) VARIETY.—The term ‘variety’ means a plant grouping within a single botanical taxon of the lowest known rank, that, without regard to whether the conditions for plant variety protection are fully met, can be defined by the expression of the characteristics resulting from a given genotype or combination of genotypes, distinguished from any other plant grouping by the expression of at least one characteristic and considered as a unit with regard to the suitability of the plant grouping for being propagated unchanged. A variety may be represented by seed, transplants, plants, tubers, tissue culture plantlets, and other matter.

“(b) RULES OF CONSTRUCTION.—For the purposes of this Act:

“(1) SALE OR DISPOSITION FOR NONREPRODUCTIVE PURPOSES.—The sale or disposition, for other than reproductive purposes, of harvested material produced as a result of experimentation or testing of a variety to ascertain the characteristics of the variety, or as a by-product of increasing a variety, shall not be considered to be a sale or disposition for purposes of exploitation of the variety.

“(2) SALE OR DISPOSITION FOR REPRODUCTIVE PURPOSES.—The sale or disposition of a variety for reproductive purposes shall not be considered to be a sale or disposition for the purposes of exploitation of the variety if the sale or disposition is done as an integral part of a program of experimentation or testing to ascertain the characteristics of the variety, or to increase the variety on behalf of the breeder or the successor in interest of the breeder.

“(3) SALE OR DISPOSITION OF HYBRID SEED.—The sale or disposition of hybrid seed shall be considered to be a sale or disposition of harvested material of the varieties from which the seed was produced.

“(4) APPLICATION FOR PROTECTION OR ENTERING INTO A REGISTER OF VARIETIES.—The filing of an application for the protection or for the entering of a variety in an official register of varieties, in any country, shall be considered to render the variety a matter of common knowledge from the date of the application, if the application leads to the granting of protection or to the entering of the variety in the official register of varieties, as the case may be.

“(5) DISTINCTNESS.—The distinctness of one variety from another may be based on one or more identifiable morphological, physiological, or other characteristics (including any characteristics evidenced by processing or product characteristics, such as milling and baking characteristics in the case of wheat) with respect to which a difference in genealogy may contribute evidence.

“(6) PUBLICLY KNOWN VARIETIES.—

“(A) IN GENERAL.—A variety that is adequately described by a publication reasonably considered to be a part of the public technical knowledge in the United States shall be considered to be publicly known and a matter of common knowledge.

“(B) DESCRIPTION.—A description that meets the requirements of subparagraph (A) shall include a disclosure of the principal characteristics by which a variety is distinguished.

“(C) OTHER MEANS.—A variety may become publicly known and a matter of common knowledge by other means.”.

SEC. 3. RIGHT TO PLANT VARIETY PROTECTION; PLANT VARIETIES PROTECTABLE.

Section 42 (7 U.S.C. 2402) is amended to read as follows:

“§ 42. Right to plant variety protection; plant varieties protectable

“(a) IN GENERAL.—The breeder of any sexually reproduced or tuber propagated plant variety (other than fungi or bacteria) who has so reproduced the variety, or the successor in interest of the breeder, shall be entitled to plant variety protection for the variety, subject to the conditions and requirements of this Act, if the variety is—

“(1) new, in the sense that, on the date of filing of the application for plant variety protection, propagating or harvested material of the variety has not been sold or otherwise disposed of to other persons, by or with the consent of the breeder, or the successor in interest of the breeder, for purposes of exploitation of the variety—

“(A) in the United States, more than 1 year prior to the date of filing; or

“(B) in any area outside of the United States—

“(i) more than 4 years prior to the date of filing;

or

“(ii) in the case of a tree or vine, more than 6 years prior to the date of filing;

“(2) distinct, in the sense that the variety is clearly distinguishable from any other variety the existence of which is

publicly known or a matter of common knowledge at the time of the filing of the application;

“(3) uniform, in the sense that any variations are describable, predictable, and commercially acceptable; and

“(4) stable, in the sense that the variety, when reproduced, will remain unchanged with regard to the essential and distinctive characteristics of the variety with a reasonable degree of reliability commensurate with that of varieties of the same category in which the same breeding method is employed.

“(b) MULTIPLE APPLICANTS.—

“(1) IN GENERAL.—If 2 or more applicants submit applications on the same effective filing date for varieties that cannot be clearly distinguished from one another, but that fulfill all other requirements of subsection (a), the applicant who first complies with all requirements of this Act shall be entitled to a certificate of plant variety protection, to the exclusion of any other applicant.

“(2) REQUIREMENTS COMPLETED ON SAME DATE.—

“(A) IN GENERAL.—Except as provided in subparagraph (B), if 2 or more applicants comply with all requirements for protection on the same date, a certificate shall be issued for each variety.

“(B) VARIETIES INDISTINGUISHABLE.—If the varieties that are the subject of the applications cannot be distinguished in any manner, a single certificate shall be issued jointly to the applicants.”.
